The Group allows a credit period normally ranging from one to six months (31 December 2023: one to six months) to its trade customers. Bills receivable are non-interest bearing bank acceptance bills and are matured within six months (31 December 2023: within six months) from the end of reporting period. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by the management of the Group.

Ageing analysis of trade and bills receivable (net of loss allowance) at the reporting date, based on the invoice date, is stated as follows:

	30 June	31 December
	2024	2023
	RMB'000	RMB'000
	(Unaudited)	(Audited)
0 to 90 days	389,057	346,580
91 to 180 days	62,222	83,770
181 to 365 days	3,552	1,007
Over 365 days	63	68
	454,894	431,425

The Directors considered that the fair values of trade and bills receivable are not materially different from their carrying amounts because these amounts have short maturity periods.

#### 11. TRADE PAYABLES

The Group was granted by its suppliers with credit periods ranging from 30 to 270 days (31 December 2023: ranging from 30 to 270 days). Ageing analysis of trade payables at the reporting date, based on the invoice date, is stated as follows:

	30 June	31 December
	2024	2023
	RMB'000	RMB'000
	(Unaudited)	(Audited)
0 to 90 days	32,824	31,148
91 to 180 days	1,448	759
181 to 365 days	755	1,454
Over 365 days	2,107	2,216
	37,134	35,577

The carrying amounts of trade payables are short-term and hence the carrying amounts of trade payables are considered to be a reasonable approximation of fair values.

#### MANAGEMENT DISCUSSION AND ANALYSIS

#### **BUSINESS REVIEW**

During the period under review, global interest rates remained elevated while the international geopolitical situation increasingly intensified. Moreover, many European countries and the United States pursued domestic production of raw materials and diversified their supply chains, collectively impacting the export of goods manufactured in the PRC negatively. On the other hand, the gradual slowdown in new investment in the domestic manufacturing industry and infrastructure, coupled with the persistent downward trend in the real estate sector, further hindered economic development and reduced the income of residents of the PRC. These factors eroded consumer confidence within the PRC. Confronted with the aforementioned adverse business conditions, the domestic manufacturing industry suffered significant setbacks. Price competition among products was particularly intense, leading to a general decrease in profit margins throughout the entire industry chain. Consequently, the selling prices of the products of the Group also declined drastically across the board.

In view of the weak economic situation, the Group adjusted its sales and marketing strategies to vigorously explore products application coverage in the downstream industries and expand its customer base. This was done to boost as much as possible the sales volume of the products of the Group, therefore partially offsetting the negative impacts on the turnover caused by the drastic decline in selling prices of the Group's products. As a result, the decrease in the revenue of the Group was relatively moderate as compared to that of the corresponding period last year.

On the other hand, thanks to the Group's long-standing efforts to improve the supply chain of upstream raw materials, several raw materials production lines were constructed in previous years, which enhanced self-sufficiency in raw materials and reduced reliance on external procurement. This move can also further deepen the Group's circular economy production system and improve overall cost-effectiveness simultaneously. During the period under review, these production lines commenced commercial production and delivered the expected benefits. In addition, the Group further refined its procurement strategies to minimise overall cost of raw materials to the largest possible extent. Coupled with the Group's efforts to optimise production processes to meet the safety and environmental protection requirements, these improvements also enhanced the production efficiency of the Group. The aforementioned measures to curb the costs of production were effective during the period under review. However, the extent of reduction in the costs of production was not as significant as the drop in the selling prices of the Group's products. Consequently, both the gross profit and gross profit margin of the Group during the period under review were drastically lower than those of the corresponding period last year.

During the period under review, the Group increased research and development expenditure to improve its production technologies and processes, while simultaneously exploring new products with strong market potential in different downstream industries, with a view to incessantly improving its business for sustainable development in the future. Other than that, the Group maintained strict controls over other expenses. However, due to the economic downturn in the PRC suppressing selling prices of the products, eventually the profit attributable to owners of the Company declined notably as compared to that of the corresponding period last year.

#### **Outlook**

The PRC government has implemented a series of economic stimulus policies, but their effects may take time to materialise. Consequently, the economy of the PRC is expected to continue slowdown in the near term. Coupled with potential increased tariffs on the goods exported by the PRC from many European countries and the United States, it will undoubtedly deal a heavy blow to the manufacturing industries of the PRC. This could lead to the contradiction between supply and demand in the market, and the elimination of weak players by intensifying competition.

Given the challenging business climate, the Group will adhere to its cautious and prudent operating principles, continuously focus on enhancing business competitiveness by improving its internal operations and controllable factors, rigorously managing costs and maintaining a strong cash flow position. This will enable the Group to weather the current economic downturn cycle. Furthermore, the Group will keep investing in advanced energy-saving and emission-reducing technologies to optimise its production processes and achieve low-carbon production in order to ensure sustainable development of the business.

In summary, due to the negative impact of the economic downturn in the PRC, it would be difficult for the Group to achieve a breakthrough in its business performance in the short term. However, the Group remains confident in its long-term prospects as the fine chemical industry will play a crucial role in the transformation of the economy of the PRC, driven by domestic demand, government support and technological advancement. In view of the fact that the Group has accumulated extensive operating experience in the industry, strong industry position and proven track record, the Board is committed to driving long-term stability and growth of the Group for the benefit of the shareholders of the Company (the "Shareholders").

#### FINANCIAL REVIEW

#### Revenue and gross profit

Due to the economic downturn in the PRC, the overall selling prices of the products of the Group decreased substantially during the period under review. Even though the sales and marketing strategies of the Group have been adjusted to counteract the challenging market environment, the revenue of the Group still declined to approximately RMB987.8 million for the six months ended 30 June 2024 (six months ended 30 June 2023: RMB1,152.9 million), representing a decrease of approximately RMB165.1 million or 14.3% as compared with that of the corresponding period last year.

With persistent downward pressure on the PRC economy, the costs of the raw materials also declined. Furthermore, the Group enhanced overall productivity by implementing various improvement measures. However, the degree of costs reduction from raw materials and the costs effectiveness of enhanced productivities were insufficient to offset the adverse impact of the lower selling prices of the products of the Group. The gross profit of the Group decreased considerably to approximately RMB144.1 million (six months ended 30 June 2023: RMB306.4 million), representing a decrease of approximately RMB162.3 million or 53.0% as compared with that of the corresponding period last year. Likewise, the gross profit margin decreased significantly by 12.0 percentage points to 14.6% (six months ended 30 June 2023: 26.6%).

#### **Operating expenses**

Selling expenses increased by approximately RMB7.1 million from approximately RMB29.2 million of the corresponding period last year to approximately RMB36.3 million for the period under review. Such increase was mainly due to (i) the increase in the costs of transportation related to overseas sales caused by attacks on the vessels in the Red Sea area, which forced shipping companies to divert vessels to longer sea routes, thus driving up shipping costs, and the increase in overseas sales volume; and (ii) the increase in sales commission for overseas sales. The selling expenses to the Group's revenue ratio was 3.7% (six months ended 30 June 2023: 2.5%).

Administrative and other operating expenses amounted to approximately RMB83.3 million (six months ended 30 June 2023: RMB51.8 million), representing an increase of approximately RMB31.5 million or 60.8% as compared with those of the corresponding period last year. The increase in administrative and other operating expenses was mainly attributable to (i) increased research and development expenses; (ii) increased entertainment expenses to promote the business; and (iii) increased depreciation expenses. The administrative and other operating expenses to the Group's revenue ratio was 8.4% (six months ended 30 June 2023: 4.5%).

Finance costs represented interests on bank borrowings of approximately RMB0.6 million during the period under review, increased by approximately RMB0.5 million (six months ended 30 June 2023: interests on advances from a substantial Shareholder of RMB0.1 million) as compared with those of the corresponding period last year. The increase was mainly attributable to increased bank borrowings during the period for treasury purpose due to lower borrowing costs from the banks.

#### **Profit for the period**

In view of the aforesaid negative factors, the profit for the period under review attributable to owners of the Company amounted to approximately RMB42.4 million (six months ended 30 June 2023: RMB166.1 million).

#### Trade and bills receivable

As at 30 June 2024, trade receivables (net of loss allowance) increased to approximately RMB294.9 million, representing an increase of approximately RMB34.4 million or 13.2% as compared with approximately RMB260.5 million recorded as at 31 December 2023. About 80.8% of trade receivables were incurred in the second quarter of this year and most of them were not yet due, whilst 18.0% of trade receivables were incurred in the first quarter of this year and only 1.2% of trade receivables were aging over 180 days. Up to the date of this announcement, over 45.6% of trade receivables have been settled after 30 June 2024. After assessing the creditworthiness of these customers, the Directors considered that no additional bad debt allowance was required on the trade receivables as at 30 June 2024.

As at 30 June 2024, bills receivable amounted to approximately RMB160.0 million, representing a decrease of approximately RMB10.9 million or 6.4% as compared with the balance of approximately RMB170.9 million recorded as at 31 December 2023. Since all bills receivable are bank acceptance bills, which are non-interest bearing and most of them have a maximum maturity period of six months, the payments of which were guaranteed by the reputable licensed banks in the PRC. Accordingly, the Directors considered that no allowance for doubtful debts was required because of the associated low default risk.

#### **Short-term bank borrowings**

Short-term bank borrowings were raised in the PRC at fixed and floating interest rates and are denominated in RMB. As at 30 June 2024, the short-term bank borrowings balance increased to approximately RMB66.0 million (31 December 2023: Nil).

#### **Liquidity and financial resources**

For the six months ended 30 June 2024, the Group's primary sources of funding included the net cash inflow generated from operating activities of approximately RMB151.8 million (six months ended 30 June 2023: RMB429.5 million), bank interest income received of approximately RMB10.8 million (six months ended 30 June 2023: RMB6.4 million), net proceeds from disposal of property, plant and equipment of approximately RMB0.1 million (six months ended 30 June 2023: RMB0.05 million), and newly raised bank borrowings of approximately RMB26.0 million (six months ended 30 June 2023: Nil). With the financial resources generated from the Group's operations, the Group spent approximately RMB104.0 million (six months ended 30 June 2023: RMB211.1 million) in the acquisition of the property, plant and equipment, interest paid of approximately RMB0.6 million (six months ended 30 June 2023: Nil), and no repayment of the principal amount of advances from a substantial Shareholder (six months ended 30 June 2023: RMB30.0 million).

As at 30 June 2024, the Group had bank and cash balances, time deposits and pledged bank deposits of approximately RMB701.3 million (31 December 2023: RMB616.4 million). The total amount of outstanding borrowings was approximately RMB71.7 million (31 December 2023: Nil). The Group during the period under review kept a solid financial position and maintained a net cash balance (total cash and cash equivalent net of total borrowings) of approximately RMB629.6 million (31 December 2023: RMB616.4 million) as at 30 June 2024. The net current assets amounted to approximately RMB906.1 million (31 December 2023: RMB924.2 million).

By virtue of the Group's financial position with cash inflow generated from the operating activities and available credit facilities from the banks, the Group is capable of fulfilling its capital commitments and working capital requirements in the foreseeable future. Nevertheless, the Group will continue to closely and cautiously manage its working capital and dedicate itself to keeping a sound liquidity position to support future business expansion.

During the period under review, the Group did not use any financial instruments for hedging purposes.

#### Pledge of assets

As at 30 June 2024, a bank deposit of approximately RMB0.3 million (31 December 2023: RMB0.3 million) was pledged to secure the water supply to the factories of the Company's subsidiaries. Right-of-use assets of the Group of approximately RMB26.8 million (31 December 2023: Nil) were pledged to secure the Group's bank borrowings. No bank deposit was pledged to secure the settlement of contracting fees for a production line under construction (31 December 2023: RMB1.0 million).

#### **Contingent liabilities**

As at 30 June 2024, the Group had no material contingent liabilities (31 December 2023: Nil).

#### **Exposure to fluctuations in exchange rates**

The Group's operations are mainly in the PRC and its assets, liabilities, revenues and transactions are mainly denominated in RMB, United States dollars and Hong Kong dollars.

The Group's foremost exposure to the foreign exchange fluctuations was caused by the impact of RMB exchange rate movements during the period under review. Most of the Group's income and expenses are denominated in RMB except for export sales which were, in majority, denominated in United States dollars. However, the Group has not experienced any material difficulties or effects on its operations or liquidity as a result of the fluctuations in currency exchange rates during the period under review. Besides, the Group will consider adoption of cost efficient hedging methods in future foreign currency transactions as and when appropriate.

#### **DIVIDEND**

The Board has declared an interim dividend of HK\$0.02 per share for the six months ended 30 June 2024 (six months ended 30 June 2023: HK\$0.03).
