MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

As a leading manufacturer of rotary kilns, grinding equipment and their related equipment in the PRC and the global market, business activities of the Group are divided into three business lines, namely (i) manufacturing of equipment, in which we engage in the design, manufacturing and sales of equipment including related parts and components for various industries including building materials, metallurgy, chemical and environmental protection industries; (ii) installation services, in which we mainly provide installation services to our customers under our manufacturing of equipment business as this is part and parcel of our manufacturing of equipment business; and (iii) construction of production line, in which we act as an EPC service provider providing bespoke one-stop solutions in respect of design, procurement, construction and/or trial operations of production lines.

Expansion of customer base

Despite a slowdown in growth and demand in the building materials industry, the Group was able to secure new projects for energy-saving technology transformation for its customers in response to the local government's vigorous promotion of upgrading and transformation of the construction and building materials industry. For the six months ended 30 June 2024, revenue generated from customers in the building materials industry amounted to approximately RMB203.9 million (six months ended 30 June 2023: RMB298.9 million).

Apart from serving our customers in the building materials industry, the Group has also expanded its products and services to serve our customers in other industries, mainly metallurgy, chemical and environmental protection industries as a result of our research and development efforts. Revenue generated from our customers of equipment manufacturing in non-building materials industries accounted for approximately 64.6% and 67.8%, respectively, of our total revenue in the manufacturing of equipment for the six months ended 30 June 2023 and 2024. In order to tap into the metallurgy, chemical and environmental protection industries with a primary focus on the treatment of various municipal solid waste, during the six months ended 30 June 2024, over 80% of our rotary kilns were used in emerging industries such as laterite nickel ore, new energy lithium batteries, environmental protection sludge, solid and hazardous waste disposal.

The Group also continued its effort to expand its business into potential markets along the "Belt and Road" countries including Uzbekistan and Republic of Burundi. Revenue generated from our customers in the "Belt and Road" countries accounted for approximately 6.9% and 20.8%, respectively, of our total revenue for the six months ended 30 June 2023 and 2024. As at 30 June 2024, we had one on-going production line project which is located in "Belt and Road" countries.

Research and Development

To maintain the Group's market position in the rotary kiln and grinding equipment industries and expand the Group's product portfolio and improve the functionality and efficiency of its products, the Group has invested in its research and development capabilities focusing on the metallurgical roasting energy saving and environmentally-friendliness technologies and continued to cooperate with research institutions in the PRC. Currently, the Group is conducting research and development with Tsinghua University on "Key Technology for Efficient Pyrolysis and Clean Utilisation of Low-rank Coal" (《低階煤高效熱解清潔利用關鍵技術》). As at 30 June 2024, the Group had 143 authorised patents, comprising 63 invention patents and 80 utility model patents. There are also 82 patent applications pending approval which primarily relate to manufacture of products in our rotary kiln and grinding equipment system.

Outlook

We believe the PRC government will continue adopting policies to stimulate the economy as well as encouraging investment in overseas infrastructure along the "Belt and Road" countries. Looking ahead, in light of the growing demand of rotary kilns, grinding equipment and their related equipment in the overseas market, the Group will continue to make good use of the "Belt and Road" initiatives and actively explore opportunities in relation to construction of production lines located in "Belt and Road" countries and emerging markets where there is a significant demand for building materials as well as production equipment relating to building materials.

Heading into the second half of the year, the global economy is expected to evolve in a complex and volatile manner, which, together with the adverse factors such as the Russian-Ukrainian war and Palestinian-Israeli conflict, will have a significant impact on the Company's oversea production line and grinding station EP/EPC business; in terms of demand in the domestic market, the delivery guarantee of commercial housing projects is expected to contribute incremental demand to the building materials industry. In a time when opportunities and challenges co-exist and the scrum between high expectation and insubstantial realistic achievement remains heated, product prices will continue to fluctuate at a low level in the short term. The Group will unwaveringly pursue its annual targets by continuously promoting improvement in all aspects of work. The Company will seize the market, gain market share and expand opportunities by continuously improving differentiated competitiveness of products, services and business models; we will stabilize exports, increase demand and enhance brand recognition to deeply explore potential demand in overseas markets; we will focus on innovation, increase input, promote enterprise competitiveness while comprehensively benchmarking against industry leaders; we will focus on integration, optimize layout and promote upgrades to develop new quality productive forces; we will also prevent risk, guard the bottom line and ensure safety to coordinate and promote high-quality development and high-level safety, making every effort to build a world-class high-end equipment enterprise group that leads in technology and practices green development.
