MANAGEMENT DISCUSSION AND ANALYSIS

(一) 業績分析

於本期間,本公司的主要業務為光纖、線纜、光電以及電纜組件。

於本期間,本集團營業額總計為人民幣 143,945,328.65元,與去年同期比較約下降7.83%。於本期間,線纜業務的營業收入總計為人民幣18,547,673.22元,較去年同期約上升24.08%;光電纜組件業務的營業收入總計為人民幣31,538,990.27元,較去年同期約上升107.98%。本公司的主要附屬公司成都中住光纖有限公司(「成都中住」)光纖銷售額總計為人民幣73,188,849.36元,較去年同期下降30.04%。

主營業務收入增加的主要原因是本期間本公司提高電纜組件及線纜銷量,光電纜組件業務收入增長約108%,線纜業務收入增長約24%,同時採取有效措施壓控成本費用。

(I) RESULTS ANALYSIS

During the Period, the Company was principally engaged in optical fibers, cable, optoelectronic and cable component business.

During the Period, the Group recorded a total operating revenue of RMB143,945,328.65, representing a decrease of approximately 7.83% as compared with the corresponding period last year. During the Period, total operating revenue from the cable business amounted to RMB18,547,673.22, representing an increase of approximately 24.08% as compared with the corresponding period last year. Total operating revenue from the optical cable component business amounted to RMB31,538,990.27, representing an increase of approximately 107.98% as compared with the corresponding period last year. Total sales of optical fibers by Chengdu SEI Optical Fiber Co., Ltd.("Chengdu SEI"), a principal subsidiary of the Company, amounted to RMB73,188,849.36, representing a decrease of 30.04% as compared with the corresponding period last year.

The increase in revenue from principal businesses was mainly due to the increase from sales of the cable components and cables by the Company during the period, resulting in an increase of approximately 108% in revenue from the optical cable component business, and an increase of approximately 24% in revenue from the cable business, and the control and reduction of costs and expenses by adopting effective measures.

(二) 主要業務回顧

為提高本集團業績,董事會針對本集團 內外部環境和市場的變化,積極調整生 產及經營策略,本集團於本期間主要業 務活動摘錄如下:

一、 主責主業情況

1. 光纖業務

於本期間,光纖市場產能供 猧於求, 價格處於歷史最低 位。本集團 識變 應變, 積極 應對。一是持續跟蹤客戶需 求,提高新型號及小首徑光 纖等高附加值光纖銷量,增 加銷售收入。二是深挖成本 控制點,與關鍵供方開展價 格談判,壓降原材料採購成 本;加強生產過程精益化管 理,優化生產工藝,多措並 舉提高生產運行效率,降低 生產成本。三是加大研發力 度,攻克性能更優的新品光 纖研發技術難題,提高產品 競爭力。

(II) REVIEW OF PRINCIPAL BUSINESSES

To improve the performance of the Group, the Board proactively adjusted the production and operation strategies in response to the changes in internal and external environments of the Group and the market. The major business activities of the Group during the Period are summarised as follows:

I. Major operations

I. Cable fibers business

During the Period, the capacity of optical fibers has been oversupplied and its price remained at the lowest level. The Group adapted and responded to changes actively. First, the Group continuously followed customer needs, improved sales of high-value-added optical fibers such as new models and small-diameter optical fibers, and increased sales revenue. Second, the Group further explored the potential of cost control, conducted price negotiations with key suppliers, and reduced procurement costs of raw material; the Group strengthened lean management of production process, optimized production process, and took various measures to improve the efficiency of production operation and reduced production costs. Third, the Company strengthened its efforts in research and development to overcome the technical problems of producing new optical fibers with better performance and improved product competitiveness.

為加快推進光電產品佈局, 拓展光電互聯市場,於本期 間,本公司組建專業團隊成 立光誦信產品部,負責公司 光產品的研發與生產。卜半 年本公司積極推進業務生產 能力建設,於2024年4月啟 用光通信產品部廠房,新建 光纖環、波分復用器、光模 塊生產線體各一條。加大研 發投入力度,2024年預計投 入人民幣150萬元用於8類新 研產品,涉及27種型號,目 前13個型號的新研產品已完 成開發,進入市場銷售及生 產交付階段。

4. 電纜組件業務

3. Optoelectronic business

To accelerate the development of optoelectronic products and expand into the optoelectronic interconnection market, the Company established a professional team and formed an optical communication products department during the Period, responsible for research, development, and production of optical products. In the first half of the year, the Company actively advanced its production capacity. The optical communication products department's facility was inaugurated in April 2024, with one production line established for each of fiber optic ring, wavelength division multiplexer and optical module. The Company has intensified its research and development efforts. For 2024, an investment of RMB1.50 million is expected for eight types of new products, encompassing 27 modules. At present, 13 models of new products have completed development and entered the stage of market sales and production delivery.

4. Cable components business

During the Period, the Company achieved significant technological improvements in its cable assembly business. The technical transformation of high-frequency induction welding equipment was completed, overcoming processing bottlenecks for semi-rigid cable assemblies in the target frequency band. The Company finalised the technical modification of high-power soldering station arm wires, achieving self-sufficiency in the corresponding production equipment and saving approximately RMB120,000 in production costs. The Company carried out the construction of the capacity of optical cable components, initially owned the processing capacity of optical cable components, and completed the delivery of multiple batches of products.

三、重要會計政策、會計估計(續)

(一) 具體會計政策和會計估計提示(續)

公司根據歷史經驗和其他因 素,包括對未來事項的合理 預期,對所採用的重要會計 估計和關鍵假設進行持續的 評價。下列重要會計估計及 關鍵假設如果發生重大變 動,則可能會導致以後會計 年度的資產和負債賬面價值 的重大影響:

應收賬款和其他應收 款預期信用損失

管理層根據其判斷的 應收賬款和其他應收 款的預期信用損失,以 此來估計應收賬款和 其他應收款減值準備。 如發生任何事件或情 況變動,顯示公司未必 可追回有關餘額,則需 要使用估計,對應收賬 款和其他應收款計提 準備。若預期數字與原 來估計數不同,有關差 額則會影響應收賬款 和其他應收款的賬面 價值,以及在估計變動 期間的減值費用。

(2) 存貨減值的估計

在資產負債表日對存 貨按照成本與可變現 淨值孰低計量,可變現 淨值的計算需要利用 假設和估計。如果管理 層對估計售價及完工 時將要發生的成本及 費用等進行重新修訂, 將影響存貨的可變現 淨值的估計,該差異將 對計提的存貨跌價準 備產生影響。

SIGNIFICANT ACCOUNTING POLICIES AND III. **ESTIMATES** (Continued)

Detailed accounting policies and accounting estimates (Continued)

Based on historical experience and other factors, including reasonable expectations for future events, the company carries out a continuous evaluation of the important accounting estimates and key assumptions adopted. If significant changes occur, the following important accounting estimates and key assumptions may lead to a significant impact on the asset and liability value of the future accounting year:

Expected Credit Loss of account receivable and other receivables.

The management of the Company estimates impairment provisions for receivables and other receivables based on its judgment of expected credit losses in accounts receivable and other receivables. If any event or change of circumstances occurs that indicates that the Company may not recover the balance in question, an impairment of accounts receivable and other receivables will need to be made using estimates. If the expected figures are different from the original estimates, the difference will affect the book value of accounts receivable, as well as the impairment charges during the estimated changes.

Estimation of inventory impairment

The management of the company has measured the lower of the cost and the net realizable value on the balance sheet day and the calculation of the net realizable value needs to be assumed and estimated. If the management of the Company revise the costs when estimating the selling price or project completed, it will affect the estimation of net realizable value of inventory, the differences of estimation will affect the provision of inventory depreciation.

Estimated useful life and the net residual value of fixed assets

The estimated useful life and estimated net residual value of fixed assets are based on the past actual life and the actual net residual value of fixed assets. with similar properties and functions. In the process of using fixed assets, the economic environment, technical environment, and other environments may have a greater impact on the useful life and estimated net residual value of fixed assets. If the estimated useful life and net residual value of fixed assets differ from the original estimate, management will make appropriate adjustments.

Deferred income tax assets and deferred income tax liabilities

Deferred tax assets and deferred tax liabilities are recognized based on the difference between the tax basis of the assets and liabilities and their carrying amount (temporary differences). At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the applicable tax rate during the expected recovery of the asset or the liquidation of the liability, and if the expected applicable tax rate changes due to a changing tax policy, the applicable tax rate for the measured deferred tax assets and deferred tax liabilities will be adjusted in a timely manner.

If the same transaction is identified differently from the consolidated perspective to the company or subsidiary, the transaction shall be adjusted from the perspective of consolidation.

The shares belonging to minority shareholders in the shareholders' equity, current net profit and loss, and current comprehensive income of the subsidiary shall be separately listed under the shareholders' equity of the consolidated balance sheet, net profit and total comprehensive income of the consolidated income statement. The current loss shared by minority shareholders of the subsidiary exceeds the balance formed by minority shareholders' share in the initial shareholders' equity of the subsidiary, thus reducing several shareholders' equity.

For the subsidiaries acquired through the merger under the common control, the financial statements shall be adjusted based on the book value of the assets and liabilities (including the goodwill generated by the acquisition of the subsidiary by the ultimate controller) in the financial statements of the ultimate controller.

For subsidiaries acquired through the merger not under the common control, the financial statements shall be adjusted based on the fair value of identifiable net assets on the purchase date.

Cash as presented in cash flow statement refers to cash on hand and deposit on demand for payment. Cash equivalents refer to short-term (generally matures within three months from the date of purchase), highly liquid investments that can be readily converted to cash and that are subject to an insignificant risk of changes in value.

(X) Foreign currency translation

Transactions denominated in foreign currency are translated into RMB yuan at the spot exchange rate/ the approximate exchange rate similar to the spot exchange rate at the transaction date at initial recognition.

At the balance sheet date, monetary items denominated in foreign currency are translated at the spot exchange rate at the balance sheet date with difference, except for those arising from the principal and interest of exclusive borrowings eligible for capitalization, included in profit or loss; non-cash items carried at historical costs are translated at the spot exchange rate at the transaction date, with the RMB amounts unchanged.

Non-cash items carried at fair value in foreign currency are translated at the spot exchange rate at the date when the fair value was determined (include exchange rate changes), with the difference included in profit or loss or other comprehensive income.

(XI) Financial Instruments

The Company shall recognize a financial asset or a financial liability in its statement of financial position when, and only when, the Company becomes party to the contractual provisions of the instrument.

Effective interest method refers to the method that is used in the calculation of the amortized cost of a financial asset or a financial liability and in the allocation and recognition of the interest revenue or interest expense in profit or loss over the relevant period.

The effective interest rate refers to the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Company shall estimate the expected cash flows by considering all the contractual terms of the financial instrument (such as prepayment, rollover, call option or other similar option, etc.) but shall not consider the expected credit losses.

The amortized cost of a financial asset or financial liability refers to the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance (only applicable for financial assets).

1. Recognition, classification and measurement for financial assets

The Company classifies financial assets into the following three categories based on the characteristics of business model of the financial assets under management and the contractual cash flow of financial assets management:

- (1) financial assets as subsequently measured at amortized cost
- (2) financial assets as subsequently measured at fair value through other comprehensive income.
- (3) financial assets as subsequently measured at fair value through profit or loss

Financial assets are measured at fair value at the time of initial recognition, but accounts receivable or notes receivable result from the sale of goods or services which do not have significant financing factor or do not consider the financing factor within one year, the initial measurement shall be made at the transaction price.

For financial assets measured at fair value are accounted in loss and profit in the current period, the relevant transaction costs are directly accounted in loss and profit, and the relevant transaction costs of other types of financial assets are accounted in the initially recognized amount.

The subsequent measurement of financial assets depends on their classification. If and only if the company changes the business model of managing financial assets, all the affected related financial assets will be reclassified.

- Recognition, classification and measurement for financial assets (Continued)
 - (2) Financial assets classified as subsequently measured at fair value through other comprehensive income

 The contract terms of financial assets

The contract terms of financial assets stipulate that the cash flow generated on a specific date is only the payment of the principal and the interest based on the outstanding principal amount, and the business mode of managing the financial assets is to receive the contract cash flow and sell the financial assets, then the company classifies the financial assets as financial assets classified as those measured at fair value with changes and its changes are accounted in other comprehensive income.

The Company adopts the effective interest rate method to recognize the interest income of such financial assets. Except that interest income, impairment loss and exchange difference are accounted in loss and profit in current period, other changes in fair value are accounted in other comprehensive income. When the financial asset is derecognized, the accumulated gains or losses previously accounted in other comprehensive income are transferred out and accounted in the current profit and loss

Notes receivable and accounts receivable measured at fair value with changes accounted in other comprehensive income are presented as receivables financing, and other financial assets are presented as other debt investments. In which, other debt investment due within one year from the balance sheet date is presented as non-current assets due within one year, and other debt investment originally due within one year is presented as other current assets.

An equity instrument investment is a financial asset measured at fair value and the change thereof is included in the profit or loss of the current period if it satisfies one of the following conditions: the financial asset is acquired primarily for the purpose of a recent sale; it was initially recognized as part of a centrally managed portfolio of identifiable financial asset instruments and there is objective evidence of a short-term profit pattern in the near future; and it is a derivative instrument (other than derivatives that meet the definition of a financial guarantee contract and are designated as valid hedging instruments).

Financial assets classified as subsequently measured at fair value through profit or loss

> Financial assets that do not meet the criteria for being classified as measured at amortized cost or at fair value and the change of which is included in other comprehensive income, nor that are specified as being measured at fair value and the change of which is included in other comprehensive income, are classified as financial assets measured at fair value and the change of which is included in the profit or loss of the current period.

5. The fair value of financial assets and financial liabilities

A financial asset or financial liability with an active market is determined by the quotation of the active market, unless there is a restriction period for the asset itself. For a restricted financial asset for the asset itself, it is determined by deducting the amount of compensation requested by the market participant for assuming the risk of not being able to sell the financial asset on the open market within a specified period on the basis of the quotation of the active market. Quotes for active markets include quotes for relevant assets or liabilities that are readily and regularly available from exchanges, traders, brokers, industry groups, pricing agencies or regulators, etc., and represent actual and frequent market transactions that occur on a fair-trade basis.

Financial assets acquired or derived initially or derived from liabilities are based on the market transaction price as the basis for determining their fair value.

If there are no active markets for financial assets or financial liabilities, the valuation method is used to determine their fair value. In valuation, the Company uses valuation method that is applicable in the current circumstances and are sufficiently supported by data and other information to select input values that are consistent with the characteristics of the assets or liabilities considered by market participants in transactions with the underlying assets or liabilities and to give priority to the use of the relevant observable inputs as much as possible. The observable input value is used in cases where the relevant observable input value cannot be obtained or is not feasible to obtain.

6. Impairment of financial instruments

The Company conducts impairment accounting treatment and recognizes loss allowance based on expected credit losses.

Expected credit losses refer to the weighted average of credit losses with the respective risks of a default occurring as the weights. Credit losses refer to the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

For trade receivables or contract assets that result from transactions that are within the scope of Revenue Standards and lease receivables, the Company shall adopt simplified approach, and shall always measure the loss allowance at an amount equal to lifetime expected credit losses.

For financial assets that have been subject to credit impairment purchased or originated, only the cumulative change in expected credit losses for the entire duration of the period since initial recognition is recognized at the balance sheet date as a provision for losses. At each balance sheet date, the amount of the change in the expected credit loss over the life of the current period is included in the profit or loss of the current period as an impairment loss or gain. Even if the expected credit loss for the entire duration determined at the balance sheet date is less than the amount of the expected credit loss reflected in the estimated cash flows at the time of initial recognition, the favorable change in the expected credit loss is recognized as an impairment gain.

 - Significant increases in credit risk If reasonable and supportable forwardlooking information is available, the Company uses the information to determine whether the credit risk of financial instruments has increased significantly since the initial recognition by comparing the risk of default on the balance sheet date with the risk of default on the initial recognition date. For loan commitments and financial guarantee contracts, the date that the entity becomes a party to the irrevocable commitment shall be considered to be the date of initial recognition for the purposes of applying the impairment requirements.

The Company considers the following factors in assessing whether there has been a significant increase in credit risk:

- a significant change in the actual or expected results of the borrower's operating results;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the borrower;
- significant changes in the quality of credit enhancement, that are expected to reduce the borrower's economic incentive to make scheduled contractual payments. Credit quality enhancements or support include the consideration of the financial condition of the guarantor and/or, for interests issued in securitizations, whether subordinated interests are expected to be capable of absorbing expected credit losses;

(XVI) Inventories (Continued)

2. Basis for determining net realizable value and the provision method of impairment

After the stocktaking, inventories are measured at the lower of cost and net realizable value: provisions for inventory write-down are made on the excess of its cost over the net realizable value. The net realizable value of Goods on hand and other inventories held for sale is determined based on the amount of the estimated selling price less the estimated selling expenses and relevant taxes and surcharges in the ordinary course of business; the net realizable value of materials to be processed is determined based on the amount of the estimated selling price less the estimated costs of completion, selling expenses and relevant taxes and surcharges in the ordinary course of business; The net realizable value of inventory held for the purpose of executing a sales contract or labour contract is calculated on the basis of the contract price, and if the quantity of inventory held is more than the quantity ordered in the sales contract, the net realizable value of the excess inventory is calculated on the basis of the general sales price.

Provisions for inventory write-down is made at the end of the period on the basis of individual inventory items; for inventories with massive quantities and lower unit prices, however, provisions for inventory write-down are made in accordance with inventory categories; for inventories related to a series of products produced and sold in the same region, with the same or similar end-use or purpose, and which are difficult to measure separately from other items, provisions for inventory write-down are made as a whole.

Where the factors affecting the value of the previous write-down of the inventory have disappeared, the amount of the write-down shall be restored and reversed within the amount of the original provisions for inventory write-down, and the amount of the reversal shall be included in the profit or loss of the current period.

5. Criteria for joint control and significant influence

The Company that is a party to an arrangement shall assess whether the contractual arrangement gives all the parties, or a group of the parties, control of the arrangement collectively, and all the parties, or a group of the parties, control the arrangement collectively when they must act together to direct the activities that significantly affect the returns of the arrangement. Then the arrangement is the joint arrangement.

A joint venture is defined as that a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. The joint venture adopts equity method for measurement. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The Company recognizes items related to the share of joint operating interests and treats them in accordance with the provisions of the relevant accounting standards.

Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of these policies. The Company determines that it has a significant influence on the investee by one or more of the following circumstances. and after comprehensively considering all the facts and circumstances: (1) When the Company is represented on the board of directors or equivalent governing body of the investee entity; (2) the Company participation in policy-making processes: (3) material transactions between the Company and its investee; (4) interchange of managerial personnel; (5) provision of essential technical information.

(XXII) Investment property

Investment property is property (land or a building — or part of a building — or both) held (by the owner or by the lessee as a right-of-use asset) to earn rentals or for capital appreciation or both. In addition, vacant buildings held by the Company for operational leasing are also reported as investment property if the Board of Directors makes a written resolution expressly indicating that it will be used for operating leasing and the intention to hold them will not change in the short term.

The Company's investment property is recorded at its cost, and the cost includes the purchase price, related taxes and other expenses directly attributable to the asset; the cost of self-constructing investment property consists of the necessary expenses incurred before the asset is built before it reaches its intended usable state.

The subsequent measurement is made using the cost model, the depreciation or amortization method. The expected useful life, residual value proportion and annual depreciation rate of investment property are shown below:

1. Recognition principles of fixed assets

Fixed assets are tangible assets held for use in the production of goods or rendering of services, for rental to others, or for administrative purposes, and expected to be used during more than one accounting year. Fixed assets shall be recognized if meet the both conditions as following:

- (1) it is probable that future economic benefits associated with the assets will flow to the Company,
- (2) and the cost of the assets can be measured reliably.

2. Initial measurement

The fixed assets should initially be recorded at cost.

- (1) Cost involves all costs necessary to bring the asset to working condition for its intended use, including its original purchase price, import duties and other related taxes and fees.

- (4) Where the purchase price of a fixed asset exceeds the normal credit conditions and is deferred from payment, and is essential of a financing nature, the cost of the fixed asset is determined on the basis of the present value of the purchase price. The difference between the price actually paid and the present value of the purchase price is recognized in the profit or loss of the current period, except as it should be capitalized, during the credit period.

Measurement subsequent to initial recognition

(1) Depreciation

The depreciable amount (cost less residual value) should be allocated on a systematic basis over the asset's useful life. For fixed assets for which an impairment provision is made, the depreciation is determined in future periods at the carrying amount after deduction of the impairment provision and on the basis of the useful life; an item is fully depreciated and continue to use shall not be depreciated.

The Company determines the useful life and estimated net residual value of the fixed assets based on the nature and use of the fixed assets. The residual value, the useful life, and the depreciation method of an asset should be reviewed at least at each financial year-end and, if expectations differ from previous estimates, any change is accounted for prospectively as a change in estimate.

 An asset should be removed from the statement of financial position on disposal or when it is withdrawn from use and no future economic benefits are expected from its disposal. The gain or loss on disposal is the difference between the proceeds and the carrying amount and should be recognised in profit and loss.

(XXIV) Construction in progress

The Company's self-constructed works in progress are valued at actual costs, which consist of the necessary expenses incurred before the asset is built to the intended usable state, including the cost of engineering materials, labour costs, relevant taxes paid, borrowing costs that should be capitalized, and indirect costs to be apportioned.

Construction in progress is recorded as the value of the fixed asset based on all expenditures incurred before the asset reaches its intended usable state. When the auditing of the construction in progress was not finished while reaching the designed usable conditions, it is transferred to fixed assets using estimated value first, and then adjusted accordingly when the actual cost is settled, but the accumulated depreciation is not to be adjusted retrospectively.

4. Capitalized amount of borrowing costs

For borrowings exclusively for the acquisition and construction or production of assets eligible for capitalization, the to-be-capitalized amount of interests is determined in light of the actual interest expenses incurred (including amortization of premium or discount based on effective interest method) of the special borrowings in the current period less the interest income on the unused borrowings as a deposit in the bank or as a temporary investment.

The Company calculates and determines the tobe-capitalized amount of interests on the general borrowing by multiplying the weighted average asset disbursement of the part of the accumulative asset disbursements less the general borrowing by the capitalization rate of the general borrowing used. Capitalization rate usually determines by the weighted average.

Where there is a discount or premium on the loan, the amount of the discount or premium to be amortized in each accounting period shall be determined in accordance with the effective interest rate method, and the amount of interest for each period shall be adjusted.

(XXVIII) Impairment of long-term assets

On the balance sheet date, the company determines whether there may be a sign of a reduction in long-term assets for long-term equity investment, investment property measured by cost method, fixed assets, construction in progress and intangible assets with certain useful life. If there are signs of impairment in long-term assets, the recoverable amount is estimated on the basis of each single asset. If it is difficult to estimate the recoverable amount of each single asset, then determine the recoverable amount on the basis of the asset group.

The estimates of assets recoverable amount are the larger amount between the fair value deducting the disposal cost and the present value of expected future cash flow.

According to the measurement of recoverable amounts, when the long-term assets recoverable amount is lower than its book value, the book value of long-term assets is reduced to its recoverable amount. The reduced amount is recognized as impairment loss shown on the profit and loss, and make the corresponding provision for impairment of assets. Once the provision recognized, it shall not be returned during the subsequent accounting period.

After the asset impairment loss is confirmed, the depreciation or amortization expenses of the impairment assets will be adjusted accordingly in the future period so that the assets' book value of adjusted assets will be allocated in the remaining useful life (deducting the estimated net residual value).

The impairment test should be carried out every year no matter there is any sign of impairment for the goodwill that caused by enterprise merger and the intangible assets with uncertain useful life.

(XXXII) Provisions (Continued)

2. Measurement of provisions

The amount recognized as a provision should be the best estimate of the expenditure required to settle the present obligation.

In reaching its best estimate, the Company takes into account the risks and uncertainties that surround the underlying events, the time value of money, etc. Where the time value of money is material, the best estimate determined by the present value of relative future cash outflows.

The best estimates are measured in different situation as follow:

If there is a continuous range (or range) of the required expenditure and the probability of the occurrence of all the results in the range is the same, the best estimate is determined according to the median value of the range, which is the average of the upper and lower limit.

There is a necessary expense that does not exist a continuous range (or range) or exist a continuous range with a range of different possibility of a variety of results. If the contingencies of individual projects involving, the best estimate is most likely to occur in accordance with the amount determined. If contingencies involving a number of projects, the best estimate according to various possible results and related probability calculation.

If some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement should be recognized as a separate asset, and not as a reduction of the required provision, when, and only when, it is virtually certain that reimbursement will be received if the Company settles the obligation. The amount recognized should not exceed the amount of the provision.

(XXXIII) Lease liability

At the commencement date, a lessee shall measure the lease liability at the present value of the lease payments that are not paid at that date. The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the lessee shall use the lessee's incremental borrowing rate. Lease payment comprises the following:

- 1. fixed payments (including in-substance fixed payments), less any lease incentives;
- 2. variable lease payments that depend on an index or a rate;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option;
- 4. payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease; and
- 5. amounts expected to be payable by the lessee under residual value guarantees.

The company recognizes in profit and loss or relative asset cost for the interest on the lease liability calculated by fixed discount rate.

(XXXV) Contract costs (Continued)

2. Incremental costs of obtaining a contract

The Company recognizes as an asset the incremental costs of obtaining a contract with a customer if the Company expects to recover those costs. The incremental costs of obtaining a contract are those costs that the Company incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained (for example, a sales commission). The Company may recognize the incremental costs of obtaining a contract as an expense when incurred if the amortization period of the asset that the Company otherwise would have recognized is one year or less.

3. Amortization of contract costs

An asset related to contract costs shall be amortized on a systematic basis that is consistent with related goods or services, with amortization included into profit or loss.

4. Impairment of contract costs

The Company shall make provision for impairment and recognize an impairment loss to the extent that the carrying amount of an asset related to contract costs exceeds the remaining amount of consideration that the Company expects to receive in exchange for the goods or services to which the asset relates less the costs expected to be incurred.

The Company shall recognize a reversal of an impairment loss previously recognized in profit or loss when the impairment conditions no longer exist or have improved. The carrying amount of the asset after the reversal shall not exceed the amount that would have been determined on the reversal date if no provision for impairment had been made previously.

(XXXVI) Government grants

1. Types

Government grants is the monetary assets and non-monetary assets obtained by the company from the government free of charge. According to the relevant government documents provided by the grant object, the government grants are divided into asset-related government grants and income-related government grants.

According to the grant objects stipulated in relevant government documents, government grants are divided into asset-related government grants and income-related government grants. The company defines the government grants obtained for the purchase, construction or other forms of long-term assets as the government grants related to the assets; The remaining government grants are defined as income-related government grants. If the object of grant is not clearly specified in the government document, the subsidy shall be divided into income-related government grants and asset-related government grants in the following ways: (1) If the government documents specify the specific project for which the grant is targeted, the division shall be made according to the relative proportion of the expenditure amount forming assets and the expenditure amount included in the expenses in the budget of the specific project, and the division proportion shall be reviewed on each balance sheet date and changed if necessary; (2) If the purpose is only generally stated in government documents and no specific project is specified, it shall be regarded as government grant related to income.

(XXXVI) Government grants (Continued)

2. Government grants recognition

If there is evidence at the end of the period that the Company can meet the relevant conditions stipulated in the financial support policy and is expected to receive financial support funds, the government grants shall be recognized according to the amount receivable. In addition, government grants are recognized when they are actually received.

If the government grants are monetary assets, it shall be measured according to the amount received or receivable. If the government grants are a non-monetary asset, it shall be measured at fair value. If the fair value cannot be obtained reliably, it shall be measured according to the nominal amount (RMB1.00). Government grants measured in nominal terms are directly included in the current profits and losses.

3. Accounting treatment

According to the essence of the economic business, the Company determines whether a certain type of government grants should be accounted for by the total amount method or the net method. In general, the Company chooses only one method for similar or similar government grants, and consistently applies that method.

Government grants related to assets They offset carrying amount of relevant assets, or they are recognized as deferred income. If recognized as deferred income, they are included in profit or loss on a systematic basis over the useful lives of the relevant assets.

(XXXVIII) Deferred tax assets/Deferred tax liabilities

Deferred tax assets and deferred liabilities are recognized based on the differences (temporary differences) between tax bases and the carrying amount of the assets and liabilities. At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized, or liability is settled.

1. Basis for recognition of deferred tax assets

Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available to offset the deductible temporary difference and deduct loss and tax deduction for the year after the end of the year. However, deferred income tax assets resulting from the initial confirmation of assets or liabilities in a transaction with the following characteristics are not recognized: (1) The transaction is not an enterprise merger. (2) The transaction does not affect the accounting profit and the taxable income or the deductible loss as well.

For deductible temporary differences related to investments in associated enterprises, where the following conditions are met, the corresponding deferred tax assets are recognized: the temporary difference is likely to be reversed in the foreseeable future and the taxable income used to offset the deductible temporary difference is likely to be obtained in the future.

 - the hedging gain or loss on the hedged item shall adjust the carrying amount of the hedged item and be recognized in profit or loss. If the hedged item is a financial asset (or a component thereof) that is measured at fair value through other comprehensive income, the hedging gain or loss on the hedged item shall be recognized in profit or loss. However, if the hedged item is an equity instrument for which the Company has elected to present changes in fair value in other comprehensive income, those amounts shall remain in other comprehensive income. When a hedged item is an unrecognized firm commitment (or a component thereof), the cumulative change in the fair value of the hedged item subsequent to its designation is recognized as an asset or a liability with a corresponding gain or loss recognized in profit or loss.

When a hedged item in a fair value hedge is a firm commitment (or a component thereof) to acquire an asset or assume a liability, the initial carrying amount of the asset or the liability that results from the Company meeting the firm commitment is adjusted to include the cumulative change in the fair value of the hedged item that was recognized in the statement of financial position.

 - Any adjustment arising from above shall be amortized to profit or loss if the hedged item is a financial instrument (or a component thereof) measured at amortized cost. Amortization may begin as soon as an adjustment exists and shall begin no later than when the hedged item ceases to be adjusted for hedging gains and losses. The amortization is based on a recalculated effective interest rate at the date that amortization begins. In the case of a financial asset (or a component thereof) that is a hedged item and that is measured at fair value through other comprehensive income, amortization applies in the same manner but to the amount that represents the cumulative gain or loss previously recognized instead of by adjusting the carrying amount.

Note 7 Inventories (Continued)

Provision for inventory write-down (Continued)

Note to provision for inventory write-down:

The provision for impairment in this period is mainly due to the price decline of some products, resulting that the realized value of some raw materials, semi-finished goods and work in process, inventory decline. Meanwhile, the aging stock, obsolete model, technology and market demand changes of some raw materials and finished products, resulting the net realizable value of part of the inventory decreases. The specific basis for determining the net realizable value is the estimated selling price of the relevant finished products minus the estimated costs to be incurred until completion, the estimated sales expenses and related taxes and fees. The reason for the disposal of the inventory write-down provision in the current period is that the inventory of the initial inventory write-down provision has been received or sold to external.

十、與金融工具相關的風險披露(續)

金融工具產生的各類風險(續)

1. 信用風險(續)

作為公司信用風險資產管理的一 部分,公司利用賬齡來評估應收 賬款和其他應收款的減值損失。 公司的應收賬款和其他應收款涉 及大量客戶,賬齡信息可以反映 這些客戶對於應收賬款和其他應 收款的償付能力和壞賬風險。公 司根據歷史數據計算不同賬齡期 間的歷史實際壞賬率,並考慮了 當前及未來經濟狀況的預測,如 國家GDP增速、基建投資總額、國 家貨幣政策等前瞻性信息進行調 整得出預期損失率。對於長期應 收款,公司綜合考慮結算期、合 同約定付款期、債務人的財務狀 况和債務人所處行業的經濟形勢, 並考慮上述前瞻性信息進行調整 後對於預期信用損失進行合理評估。

X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

Risks associated with financial instruments (Continued)

(I) Credit risk (Continued)

The cash and cash equivalents held by the Company are mainly deposited in financial institutions such as state-owned holding banks and other large and medium-sized commercial banks, and the management believes that these commercial banks have high reputation and good asset status, do not have major credit risks, and will not produce any major losses caused by the breach of contract of the counterparty. The Company controls the credit risk for deposits by limit the deposit amount in accordance with the market reputation, size of operation and financial background of each well-known financial institution.

As part of the Company's credit risk asset management, the Company uses ageing to assess impairment losses on accounts receivable and other receivables. The Company's accounts receivable and other receivables involve a large number of customers, and aging information can reflect the solvency and bad debt risk of these customers. The Company calculates the historical actual bad debt rate for different age periods based on historical data, and adjusts the expected loss ratio by taking into account the forecast of current and future economic conditions, such as national GDP growth, total infrastructure investment, national monetary policy and other forward-looking information. For long-term receivables, the Company takes into account the settlement date, the contractual payment schedule, the debtor's financial position and the economic situation of the debtor's industry, and makes a reasonable assessment of expected credit losses after adjusting for the above forward-looking information.

2. Interest rate risk

Financial liabilities with floating interest rates expose the Company to the cash flow interest rate risk, and the financial liabilities with fixed interest rates exposes the Company the fair value interest rate risk. The Company determines the relative proportion between contracts with floating interest rates and contracts with fixed interest rates according to the market environment.

The Company's financial department continuously monitors the interest rate level. Rising interest rates will increase the cost of new interest-bearing liabilities and the interest expenses of interest-bearing liabilities that the Company has not yet paid at floating interest rates, which will have a significant negative impact on the Company's financial performance. The management will make timely adjustments based on the latest market conditions, which may be arranged to reduce interest rate risk through arrangements such as interest rate swaps.

As of June 30, 2024, the Company's long-term interest-bearing debt was mainly fixed-rate contracts in the amount of €559,685.20, as detailed in Section V (Note 25), which states that interest rate risk will not have a significant impact on the Company's production and operation.

3. Price risk

Price risk refers to the risk of fluctuation caused by market price changes other than exchange rate risk and interest rate risk. It mainly comes from the changes of commodity price, stock market index, equity instrument price and other risk variables.

NOTES TO THE FINANCIAL STATEMENTS

2024年1-6月 For the six months to 30 June 2024

十一、公允價值

(一) 以公允價值計量的金融工具

公司按公允價值三個層次列示了以公允價值計量的金融資產工具截止2024年6月30日的賬面價值。公允價值整體歸類於三個層次時,依據的是公允價值計量時使用的各重要輸入值所屬三個層次中的最低層次。三個層次的定義如下:

第1層次:是在計量日能夠取得的相同資產或負債在活躍市場上未經調整的報價;

第3層次:是相關資產或負債的不可觀察輸入值。

(二) 期末公允價值計量

XI. FAIR VALUE

(I) Financial instruments measured at fair value

On June 30, 2024, our corporate expose the carrying value of financial asset instruments measured at fair value at three levels which is based on the lowest level of the three levels of the important input values used in the measurement of fair value. The three levels are defined as following:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability, for example, interest rates and yield curves observable at commonly quoted intervals; market-corroborated inputs;

Level 3 inputs are unobservable inputs for the asset or liability.

(II) Fair value at the end of the period

		期末公允價值 Fair value at the end of the period

NOTES TO THE FINANCIAL STATEMENTS

2024年1-6月 For the six months to 30 June 2024

十一·公允價值(續)

(三) 持續和非持續第三層次公允價值 計量的項目,採用的估值技術和 重要參數的定性及定量信息

應收款項融資為公司既以收取合同現金流量為目標又以出售該金融資產為目標的銀行承兑匯票,剩餘期限較短,賬面價值與公允價值接近,採用票面金額作為公允價值。

(四) 不以公允價值計量的金融資產和 金融負債的公允價值情況

不以公允價值計量的金融資產和 負債主要包括:應收款項、應付 款項和長期借款。

上述不以公允價值計量的金融資 產和負債的賬面價值與公允價值 相差很小。

XI. FAIR VALUE (Continued)

(III) Valuation techniques and qualitative and quantitative information on important parameters adopted for the third level of continuous and non-continuous fair value measurement

Receivable financing is a bank acceptance for the company to both collect contractual cash flows and sell the financial asset, with a short remaining period, a carrying value close to fair value, and a par value as fair value.

(IV) The fair value of financial assets and financial liabilities that are not measured at fair value

Financial assets and liabilities that are not measured at fair value are mainly including: accounts receivable, accounts payables and long-term loans.

There is slightly difference between the book value and the fair value of the financial assets and liabilities that are not measured at fair value.
