VOLUNTARY ANNOUNCEMENT
NEW DRUG APPLICATION OF OT-502 ACCEPTED
BY THE NATIONAL MEDICAL PRODUCTS ADMINISTRATION

This announcement is made by Ocumention Therapeutics (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to keep the shareholders of the Company and potential investors informed of the latest business updates of the Group.

The board (the “**Board**”) of directors of the Company is pleased to announce that the new drug application for OT-502 (DEXYCU[®], dexamethasone implant), a new drug for the treatment of postoperative inflammation indication, has been accepted by the National Medical Products Administration of the People’s Republic of China (the “**PRC**”) recently.

OT-502 (DEXYCU[®], dexamethasone implant) is a single-dose, sustained-release solution of dexamethasone, a corticosteroid, for the treatment of postoperative inflammation. To date, OT-502 is the first and only single-dose, sustained-release intracameral steroid for the treatment of postoperative inflammation that was approved by the United States Food and Drug Administration. The Group is developing OT-502 as a potential first-in-class treatment for postoperative inflammation associated with cataract surgery in China. The phase III clinical trial of OT-502 is designed to be a randomized, double-masked, placebo-controlled, parallel-group, multi-center clinical and pharmacokinetic study to evaluate the efficacy and safety of 9% dexamethasone implant in the treatment of post-cataract surgery inflammation, which has achieved its primary endpoints in the PRC in April 2024.

Cautionary Statement: The Company cannot guarantee that it will ultimately commercialize OT-502 (DEXYCU[®]) successfully. Shareholders of the Company and potential investors are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Ocumention Therapeutics
Dr. Lian Yong CHEN
Chairman and Non-executive Director
