INFORMATION ON CRYPTOCURRENCIES AND BITCOIN

Cryptocurrencies are digital currencies in which encryption techniques are used to regulate the generation of units of currency and verify the transfer of funds using blockchain technology. The blockchain is a public record of cryptocurrency transactions in chronological order. The blockchain is shared between all users in that blockchain. It is used to verify the permanence of transactions and to prevent double spending. Cryptocurrencies make it easier to transfer funds between two parties in a transaction and these transfers are facilitated through the use of public and private keys for security purposes.

Bitcoin is a type of cryptocurrency launched more than 10 years ago that operates using blockchain technology. It has several features that enable it to be a potential alternative store of value, such as being limited in supply, its exchangeability into fiat money or goods and services, portability, and its potential to act as an effective hedge against depreciation of fiat currencies.

REASONS FOR AND BENEFITS OF THE FURTHER BITCOIN ACQUISITION

The board of directors of the Company (the “**Board**”) observed increasing popularity of cryptocurrencies in the commercial world, with inclusion of cryptocurrencies in investment portfolios, in particular Bitcoin. The Board believes that there is still room for cryptocurrencies in general, including that for Bitcoin as a dependable store of value which is one of the longest standing and the largest cryptocurrencies in terms of market capitalisation, to appreciate in value. At the same time, having considered the uncertainty in the global economy, the unprecedented government financial stimulus measures, including quantitative easing, adopted around the world, depreciation pressure on the value of fiat currencies due to aggressive increases in money supply by central banks globally, the Board believes that the Bitcoin Acquisitions are symbolic in scale, and mark a significant step toward aligning with the evolving global financial landscape, and would diversify the Group’s investment portfolio and enhance its asset value.

The Bitcoin Acquisitions are part of the Group’s asset allocation strategy. Allocating part of the Group’s treasury in cryptocurrencies can also serve as a diversification to holding cash in treasury management. The Group also notes that cryptocurrency prices may be highly volatile and therefore the Board currently decided to invest in the largest cryptocurrency by market capitalization, Bitcoin, which should enhance shareholder value in the long-term. The Board also considers this a demonstration to investors and stakeholders that the Group has the vision and determination to embrace technological evolution, and hence preparing its foray into the blockchain industry.

In view of the above, the Directors are of the view that the terms of the Bitcoin Acquisitions are fair and reasonable and on normal commercial terms and in the interests of the Company and its shareholders as a whole.
