(1) Earnings per share and weighted average return on net assets were calculated in accordance with Notes: the Compilation Rules for Information Disclosure by Companies Offering Securities to the Public No. 9 - Computation and Disclosure of Return on Net Assets and Earnings per Share (2010) Revision)(《公開發行證券的公司信息披露編報規則第9號-淨資產收益率和每股收益的計 算及披露》(2010年修訂)). The Bank completed A share and H share rights issue in January and February 2022 respectively. In accordance with the Accounting Standards for Enterprises No. 34 – Earnings per Share and the relevant application guidelines, the earnings per share indicator for the comparative period was recalculated taking into account the bonus issue factors included in the rights issue. Before the recalculation, the basic earnings per share and diluted earnings per share for 2021 were both RMB0.54 per share, for 2020 were both RMB0.42 per share. Both basic earnings per share and weighted average return on net assets for the period achieved an increase as compared with that of the previous year, which was mainly due to the increase in net profit attributable to ordinary shareholders of the Bank. The Bank issued offshore preference shares in 2017, which were redeemed in September 2022 and paid dividends for the current period. The Bank issued perpetual bonds from July to August 2022, which were classified as other equity instruments. In calculating earnings per share and weighted average return on net assets, the dividends of preference shares and the interest of perpetual bonds paid for the current period

(2) Dividend per share represents actual dividend per share attributable to ordinary shareholders of the Bank (not adjusted with taking account of the bonus issue factors included in rights issue), and the dividend per share of 2024 is subject to approval by the general meeting.

deducted from the "weighted average net assets".

have been deducted from the "net profit attributable to ordinary shareholders of the Bank", and the effect of the preference shares and perpetual bonds for the corresponding period has been

- (3) For details of the structure of total assets, total liabilities, total loans to customers and total deposits from customers, please refer to "6. Analysis of Major Items of the Statement of Financial Position" under "SECTION 3 MANAGEMENT DISCUSSION AND ANALYSIS" of this results announcement.
- (4) Net assets per share attributable to ordinary shareholders of the Bank = (equity attributable to shareholders of the Bank other equity instruments)/the number of ordinary shares as at the end of the period. The net assets per share attributable to ordinary shareholders of the Bank from the end of 2020 to the end of 2021 has taken account of the bonus issue factors included in the rights issue and was presented as adjusted.
- (5) Return on average total assets = net profit/average balance of total assets at the beginning and at the end of the period.
- (6) Net interest spread = average yield of interest-earning assets average cost rate of interest-bearing liabilities.
- (7) Net interest margin = net interest income/average balance of interest-earning assets.
- (8) Cost-to-income ratio = (operating expenses tax and surcharges)/operating income.
- (9) The relevant indicators of capital adequacy ratio as at the end of 2024 were calculated in accordance with the Regulation Governing Capital of Commercial Banks (《商業銀行資本管理辦法》) and other relevant regulatory provisions, and the relevant indicators of capital adequacy ratio as of the end of 2020 to the end of 2023 were calculated in accordance with the Regulation Governing Capital of Commercial Banks (Provisional) (《商業銀行資本管理辦法(試行)》) and other relevant regulatory provisions.

SECTION 3 MANAGEMENT DISCUSSION AND ANALYSIS

1. STATUS OF THE INDUSTRY WHICH THE BANK WAS ENGAGED IN DURING THE REPORTING PERIOD

In 2024, the PRC adopted a series of counter-cyclical macro control measures in the face of severe and complex situations. Proactive fiscal policies have been moderately strengthened to enhance its quality and effectiveness, and prudent monetary policies have remained flexible, precise and effective, providing strong support for stable economic growth. In particular, since the meeting of the Political Bureau of the Central Committee resolutely deployed a package of incremental policies in September 2024, social confidence has been effectively boosted and the economy has recovered significantly. In 2024, China's economy has achieved an overall steady progress in operation with policy support, and the major goals and tasks of economic and social development have been successfully completed.

In 2024, a package of policies and measures to expand domestic demand and stabilize foreign trade was effective in Shandong Province and Qingdao. The economic operation has been steady and positive, and the quality has been continuously improving. Investment, consumption and exports – the "three drivers" of economic growth provided a strong stimulus to economic growth. The consumption market continued to pick up, investment was generally stable, exports showed strong resilience, and economic performance continued to outperform the country as a whole.

In 2024, faced with the challenges of narrowing interest spread, declining fee rate, and insufficient effective credit demand, China's banking industry adhered to the path of high-quality and intensive development instead of rushing for scale and speed, and the overall development remained stable. Commercial bank continued to meet the effective financing needs of the real economy, closely followed the guidance of fiscal and monetary policies, and committed to the mission of consummating the "Five Major Aspects" to facilitate the stabilization of the general economic market. It strictly observed each regulatory requirement, persevered in preventing and resolving risks in major areas such as local debt and real estate, and continuously improved its own level of risk management, so as to build up a solid foundation for maintaining financial stability.

2. THE BANK'S PRINCIPAL BUSINESS DURING THE REPORTING PERIOD

The Bank, the predecessor of which known as Qingdao City Cooperative Bank and Qingdao City Commercial Bank, was established in November 1996 and is headquartered in Qingdao, Shandong Province. The Bank is committed to pursuing a "high-quality development" path, overall planning and balancing "effective improvement in quality" with "reasonable growth in quantity", aiming to build itself as a value-leading bank with "leading quality and efficiency, outstanding features and flexible mechanism". In December 2015, the Bank's H shares were listed on the Hong Kong Stock Exchange; in January 2019, the Bank's A shares were listed on the SZSE.

The Bank mainly offers several services and products such as corporate and personal deposits, loans, settlement to its customers, and its development is driven by three major business segments including retail banking, corporate banking and financial market business, which have formed a solid customer base and shaped a new financial business model of distinctive and high-quality development. The Bank's business is based in Qingdao with in-depth penetration in Shandong Province. As at the end of the Reporting Period, there were 16 branches in major cities of Shandong Province such as Jinan, Yantai and Weihai. The total number of branch offices reached 200; in February 2025, Liaocheng Branch officially opened, and the Bank achieved a strategic layout covering all 16 cities in Shandong. The Bank has two subsidiaries. In February 2017, the Bank initiated the establishment of BQD Financial Leasing Company Limited ("BQD Financial Leasing"). In May 2024, after the completion of the capital increase of BQD Financial Leasing, the shareholding ratio of the Bank in BQD Financial Leasing accounted for 60%. In September 2020, the Bank initiated the establishment of BQD Wealth Management Company Limited ("BQD Wealth Management"), which is a wholly-owned subsidiary of the Bank. As at the end of the Reporting Period, the Company had more than 5,300 employees.

During the Reporting Period, the status of the Company's key operational indicators achievements is as follows:

- (1) Total assets amounted to RMB689.963 billion, representing an increase of RMB81.978 billion or 13.48% as compared with that at the end of last year;
- (2) Total loans to customers amounted to RMB340.690 billion, representing an increase of RMB40.600 billion or 13.53% as compared with that at the end of last year;
- (3) Total deposits from customers amounted to RMB432.024 billion, representing an increase of RMB45.962 billion or 11.91% as compared with that at the end of last year;
- (4) Operating income amounted to RMB13.415 billion, representing a year-on-year increase of RMB933 million or 7.48%; net profit amounted to RMB4.405 billion, representing a year-on-year increase of RMB733 million or 19.97%; net profit attributable to shareholders of the Bank amounted to RMB4.264 billion, representing a year-on-year increase of RMB716 million or 20.16%;
- (5) Non-performing loan ratio was 1.14%, representing a decrease of 0.04 percentage point as compared with that at the end of last year; provision coverage ratio was 241.32%, representing an increase of 15.36 percentage points as compared with that at the end of last year; capital adequacy ratio was 13.80%, representing an increase of 1.01 percentage points as compared with that at the end of last year, and core tier-one capital adequacy ratio was 9.11%, representing an increase of 0.69 percentage point as compared with that at the end of last year;

- (6) Return on average total assets was 0.68%, representing an increase of 0.03 percentage point as compared with that in last year;
- (7) Basic earnings per share were RMB0.69, representing a year-on-year increase of RMB0.12 or 21.05%; weighted average return on net assets was 11.51%, representing an increase of 0.80 percentage point as compared with that in last year.

3. ANALYSIS OF DEVELOPMENT STRATEGIES AND CORE COMPETITIVENESS

3.1 Development Strategies

In order to further promote the high-quality development, the Bank formulated the "Bank of Qingdao's Strategic Plan for 2023-2025". By focusing on improving comprehensive operational capabilities, enhancing risk management level as a breakthrough, and accelerating digital transformation as a driving force, while continuing the development vision of "Innovative Finance, Brilliant Banking" and guided by the four strategic themes of "adjusting the structure, strengthening the customer base, optimizing the synergies and improving the capabilities", so as to build itself as a value-leading bank with "leading quality and efficiency, outstanding features and flexible mechanism" and embark on a new journey of development characterized by more specialization, digital intelligence, systematization, differentiation, and distinctive features.

Firstly, strengthening the corporate business. Adhering to the "customer-oriented" business concept, the Bank has become a "leading bank" for local small and medium-sized enterprises and institutional customers by strengthening segment synergy, further consolidating the advantages of public finance, while creating a special service model that harnesses financial innovation, building a comprehensive service system of "commercial bank + investment bank + asset management", and promoting small and medium-sized enterprises.

Secondly, deepening the retail business. The Bank has continued to deepen its customer business, becoming the "main account" of customers by expanding the retail customer base, further deepening the construction of customer, product and channel systems, strengthening the advantages of the wealth management business, and creating flagship products.

Thirdly, optimizing the financial markets. Maintaining a steady development trend, the Bank has built a leading financial market brand in the industry by optimizing the structure of interbank liability, actively developing capital-light businesses, consolidating the advantages of licensing qualifications, and further increasing the contribution of earnings.

Fourthly, specializing in international business. By focusing on high-quality foreign trade customers, strengthening the construction of the basic customer base, the Bank is creating an international business brand with the best international business services, the best foreign exchange professional team, and the fastest online processing efficiency.

3.2 Core Competitiveness

Centering on the development vision of "Innovative Finance, Brilliant Banking", the Bank is firmly committed to the strategic goal of "creating a value leading bank with leading quality and efficiency, outstanding features and flexible mechanisms" to achieve high-quality improvement in economies of scale as well as unremitting enhancement of market competitiveness. It is mainly reflected in:

- 1. Party leadership and corporate governance are closely integrated by adhering to the leadership of Party building. The Bank always adheres to the leadership of Party building, strives to uphold the political and people-oriented nature of financial work, and deeply integrates the Party's leadership into all aspects of corporate governance. The Bank adheres to market-oriented operation and operation and management is institutionalized, standardized and transparent. The equity structure is scientific and effective, forming a benign equity structure that is pluralistic and reasonable with mutual checks and balances, laying a solid governance foundation for the Bank's high-quality development.
- 2. **Deepened strategic planning contributes to consolidate the foundation for sustainable development.** The Bank actively responds to the challenges and opportunities arising from the changing external economic environment. Taking the three-year strategic plan (2023-2025) as the starting point, and guided by four strategic themes, namely "adjusting the structure, strengthening the customer base, optimizing the synergies and improving the capabilities", the Bank continues to optimize its business structure, continuously consolidates its customer base, comprehensively deepens cost reduction and efficiency improvement, further promotes high-quality, refined and professional development and constantly improves the quality and efficiency of strategic implementation, so as to consolidate the foundation for long-term sustainable development.

- Business boundaries are constantly expanded by focusing on characteristic 3. operations. Being headquartered in Oingdao with in-depth penetration in Shandong Province, the Bank takes full advantage of the characteristics of the regional economy and the advantages of regional industries, focuses on the two major ways of blue finance and green finance, and establishes the Blue and Green Finance Department on the basis of the Corporate Banking Department of the Head Office to create a distinctive brand of "BQD Green Finance, Exceed Project", so as to enhance the endogenous growth impetus and the professional management ability. By establishing a mechanism for specializing in financial technology, with the first-level department directly under the Bank's head office as the core, and franchised institutions and specialized branches as the two complements, the Bank continues to optimize the special products of financial technology to provide comprehensive services to technology enterprises at all stages of growth. The Bank has created the "Happy Neighborhood" community financial services brand, developed an attentive community branch service model, expanded the coverage of community financial outlets, and improved the breadth, depth and density of community financial services. Adhering to the development characteristics of warm service, the Bank will continue to optimize the brand effect of "BQD services" and provide customers with more professional, convenient and caring financial services.
- Synergistic development comprehensively promotes the integrated operation of the 4. group. The Bank has diversified licenses and qualifications, and its two subsidiaries, BQD Wealth Management and BQD Financial Leasing complement and reinforce each other, which has formed a development pattern with banking as the mainstay and multiple business modes co-existing. The Bank is the first local bank corporation in Shandong Province to receive approval for fund custody qualifications and the first to gain authorization for direct participation in the RMB Cross-Border Interbank Payment System (CIPS). The Bank is the only local bank corporation in Shandong Province with the lead underwriting qualification for debt financing instruments of non-financial enterprises, and a member of the local government bond underwriting syndicate of Shandong Province and Qingdao. The Bank is the first comprehensive city commercial bank spot bond market maker in Shandong province, and has the qualifications for "Northbound Bond Connect" and "Southbound Bond Connect" under Bond Connect and the ordinary derivatives trading business. The Bank is one of the first founding members of China's market interest rate pricing self-regulatory mechanism, the first batch of commercial bank in the non-Tenge regional trading territories, and an institution directly connected with Euroclear through the China Foreign Exchange Trade System (CFETS) platform. Relying on the advantages of group-wide collaborative development and abundant financial licenses, the Bank has continuously strengthened its business linkages in financial markets, custody, investment banking, wealth management, financial leasing, etc., and continued to provide customers with "package solutions" with professional and standardized financial services, leading to continuous reinforcement its integrated business capabilities.

- 5. Improved and optimised risk control system continuously improves asset quality. The Bank prioritizes compliance, continuously improves its comprehensive risk management system. The Bank has established the three-in-one risk monitoring system, and has achieved effective linkage of risk identification, analysis and management. On the basis of adhering to centralized and unified credit management, the Bank is continuously optimizing the approval mechanism, establishing the mechanism of independent approvers, improving the management of the entire process of credit business timeliness, optimizing the working mechanism of industry research, and ensuring the steady improvement of asset quality.
- 6. **Expedited transformation of digital intelligence contributes to full empowerment of business development.** The Bank is deeply implementing the digital development strategy, driving business innovation with technological innovation, deeply integrating digital means, and building a unified digital-intelligent product management platform. The Bank has further consolidated data quality, explored the value of data assets, vigorously promoted the construction of a new generation of distributed core business systems, continuously enhanced the capability of technological autonomy and control, and further improved the level of digitization of the four major platforms, namely marketing, risk control, operations and collaborative office, so as to enhance the effect of technological empowerment.

4. HONORS AND AWARDS

In March 2024, the Bank was awarded the honorary title of "March 15 Integrity Financial Brand" by Dazhong Daily Newspaper.

In June 2024, the list of 2024 "China's 500 Most Valuable Brands" was announced in Beijing. With a brand value of RMB30.296 billion, the Bank was selected for the eighth consecutive year, ranking 326th on the list, moving forward 9 places as compared with that of the previous year.

In July 2024, the lists of "Typical Financial Partner Cases" and "High-quality Financial Services" for 2023 in Shandong Province were officially released, and the "Ten-Hundred-Thousand-Ten Thousand' Financial Services Industrial Park: Contribute to the Strength of BQD in a Targeted Manner" as declared by the Bank was selected as a typical case in the list of Typical Financial Partner Cases.

In September 2024, the Bank was awarded the title of "2023 Qingdao Model Enterprise", and the "Innovative Technology Financial Business Model, Comprehensively Serving the Financing Needs of Technological Innovation Enterprises" declared by the Bank was awarded the title of "2023 Typical Case of High-Quality Development of Qingdao Enterprises".

In September 2024, the Bank entered the list of the Asia's Top 500 Brands for the eighth consecutive year, ranking 415th.

In October 2024, the Bank was awarded the highest rating of A again in the information disclosure assessment of the SZSE for the fourth consecutive year.

In October 2024, the 26th Listed Company Golden Bull Award was announced. In virtue of the outstanding performance in the areas such as information disclosure and investor relation management, the Bank was granted the Golden Bull - "Golden Information Disclosure Award" again.

In November 2024, the Bank was awarded the "Excellent City Commercial Bank of 2024" by 21st Century Business Herald.

In November 2024, the Bank was awarded the "2024 Best Practice Case of Board of Listed Companies" for its innovative initiatives and outstanding performance in Board operations.

In December 2024, the Bank was awarded the "2024 Best Practice Case of Board Office of Listed Companies" for its outstanding performance in compliant and effective operations, continuously improved governance effectiveness, investor relations management and information disclosure.

In December 2024, the Bank won the "2024 Tianji Award for Outstanding Banking Research Team" organized by the Securities Times under the People's Daily.

In December 2024, the Bank was granted the "Five-Star Diamond Award", the highest award in the global service field. It was not only the only city commercial bank that had been granted such award for nine consecutive years, but also the sole enterprise in Shandong Province that had been shortlisted for this award.

In December 2024, the Bank's "Green Financial Business Management System" won the first prize of "Excellent Financial Technology Project" at the "3rd Qingdao Digital Finance Innovation Competition". The Bank won the first prize of "Qingdao Excellent Financial Technology Project" for the fourth consecutive year.

In January 2025, by virtue of the outstanding performance in the year 2024, BQD Wealth Management, a subsidiary of the Bank, was honored with the "Golden Bull Innovation Award for Banking Wealth Management Companies" at the "5th Golden Bull Awards for Banking Wealth Management" hosted by China Securities Journal. The Company was awarded the "Golden Bull Award for Bank Wealth Management Products with Fixed Income" by virtue of the products thereunder.

5. ANALYSIS OF MAJOR ITEMS OF THE STATEMENT OF PROFIT OR LOSS

5.1 Financial Performance Summary

In 2024, the Company's net profit amounted to RMB4.405 billion, representing a year-on-year increase of RMB733 million or 19.97%; net profit attributable to shareholders of the Bank amounted to RMB4.264 billion, representing a year-on-year increase of RMB716 million or 20.16%. In 2024, the Company proactively responded to operational challenges such as the narrowing of net interest margin, deepened the promotion of high-quality development, comprehensively deepened cost reduction and efficiency improvement, continued to strengthen risk management and control, and achieved steady growth in operating income, with a decrease in impairment expenses, which led to a rapid growth in profits, a significant improvement in profitability, and vigorous operating results. The following table sets forth the changes in the Company's major profit items during the periods indicated.

Item	2024	2023	Change in amount	Change (%)
Net interest income	9,873,824	9,281,969	591,855	6.38
Net fee and commission income	1,509,553	1,586,519	(76,966)	(4.85)

5.2 Operating Income

In 2024, the Company's operating income amounted to RMB13.415 billion, representing a year-on-year increase of RMB933 million or 7.48%. In 2024, the Company expanded its business scale in a steady manner and continuously optimized its business structure resulting in the coordinated growth in net interest income and net non-interest income which drove the increase in operating income. Among the operating income, net non-interest income accounted for 26.40%, representing a year-on-year increase of 0.77 percentage point. The following table sets forth the principal components of the Company's operating income and the changes during the periods indicated.

	2024	2024		3	Percentage changes	
		Percentage		Percentage	(percentage	
Item	Amount	(%)	Amount	(%)	point)	
Net interest income	9,873,824	73.60	9,281,969	74.37	(0.77)	
Interest income	22,421,432	167.14	21,140,032	169.38	(2.24)	
Among which: Loans and advances to

Operating income	13,414,691	100.00	12,481,351	100.00	_	

5.3 Net Interest Income

In 2024, the Company's net interest income amounted to RMB9.874 billion, representing a year-on-year increase of RMB592 million or 6.38%. This was mainly due to the fact that interest income increased more than interest expense as the Company actively expanded the scale of its interest-earning assets and tightly controlled the cost ratio of its interest-bearing liabilities to hedge against the impacts of the downward trend in asset yields and the growth in the size of liabilities, which led to a growth in net interest income. The following table sets forth the average balance of interest-earning assets and interest-bearing liabilities items, interest income/expense and average yield/cost rate of the Company for the periods indicated. The average balances of interest-earning assets and interest-bearing liabilities represent the daily average balances.

		2024			2023	
		Interest	Average		Interest	Average
	Average	income/	yield/cost	Average	income/	yield/cost

- Notes: 1. Deposits and placements with banks and assets held under resale agreements include deposits with banks and other financial institutions, placements with banks and other financial institutions and financial assets held under resale agreements.
 - 2. Deposits and placements from banks and assets sold under repurchase agreements include deposits from banks and other financial institutions, placements from banks and other financial institutions and financial assets sold under repurchase agreements.

In 2024, the Company's average balance of interest-earning assets was RMB569.213 billion, representing a year-on-year increase of RMB61.682 billion or 12.15%; net interest spread was 1.76%, representing a year-on-year decrease of 0.09 percentage point; net interest margin was 1.73%, representing a year-on-year decrease of 0.10 percentage point. Under the backdrop of general downturn in market interest rate and increase in the level of the benefit supported to real economy, on the one hand, the Company increased the proportion of loans in interest-earning assets and effectively reduced the cost rate of interest-bearing liabilities, which mitigated the negative impact of the downward return on assets on net interest margin; on the other hand, the Company increased the financial investments measured at fair value through profit or loss, which reduced the proportion of financial investments in interest-earning assets and lowered the net interest margin to a certain extent, while increased the level of net non-interest income.

The following table sets forth the breakdown of changes in the Company's interest income and interest expense due to volume and rate changes for the periods indicated. The volume changes were measured by changes in average balance; rate changes were measured by changes in average rate, and changes in interest income and expense due to volume and rate changes were included in the amount of impact of changes in interest income and expense due to volume changes.

5.4 Interest Income

In 2024, the Company's interest income was RMB22.421 billion, representing a year-on-year increase of RMB1.281 billion or 6.06%, mainly due to the expansion of the Company's interest-earning assets, such as loans, which offset the impact of the downward return on assets and led to an increase in interest income. The interest income from loans and advances to customers and from financial investments constituted the major components of the interest income of the Company.

Interest income from loans and advances to customers

In 2024, the Company's interest income from loans and advances to customers amounted to RMB14.545 billion, representing a year-on-year increase of RMB914 million or 6.71%, mainly due to the fact that the Company's in-depth implementation of the policy guidance of financial support for the real economy and continuous expansion in size of loans issued, resulting in a year-on-year increase in the average balance of loans of RMB34.376 billion or 12.23%. Although the rate of return of loans continued to decline due to factors including the decline of market interest rates and the reduction of customer financing costs, the interest income of loans had stable growth in general. The following table sets forth the average balance, interest income and average yield of each component of the Company's loans and advances to customers for the periods indicated.

Unit: RMB'000

Item	Average balance	2024 Interest income	Average yield	Average balance	2023 Interest income	Average yield
Corporate loans	223,691,850	10,621,928	4.75%	189,706,118	9,478,638	5.00%
Personal loans	71,976,930	3,460,762	4.81%	68,628,345	3,697,252	5.39%
Discounted bills	19,876,966	462,572	2.33%	22,834,937	455,061	1.99%
Total	315,545,746	14,545,262	4.61%	281,169,400	13,630,951	4.85%

Interest income from financial investments

In 2024, the Company's interest income from financial investments amounted to RMB5.585 billion, representing a year-on-year increase of RMB114 million or 2.09%, mainly due to the increase in scale of financial investments, resulting in an increase in the average balance of financial investments of RMB14.680 billion or 9.00% year-on-year, which offset the impact of declining interest rates in the bond market and realized the growth of interest income from financial investments.

Interest income from deposits and placements with banks and assets held under resale agreements

In 2024, the Company's interest income from deposits and placements with banks and assets held under resale agreements amounted to RMB853 million, representing a year-on-year increase of RMB240 million or 39.12%, which mainly due to the Company's adjustments to its asset allocation strategies in response to the interbank market conditions, and the increase in the average balance of the placements with banks and other financial institutions alongside the assets held under resale agreements, which drove a rapid growth in interest income.

5.5 Interest Expense

In 2024, the Company's interest expense amounted to RMB12.548 billion, representing a year-on-year increase of RMB690 million or 5.81%, mainly due to the expansion of the size of the Company's interest-bearing liabilities, such as deposits from customers and debt securities issued, and the corresponding increase in interest expenses. Meanwhile, the Company comprehensively deepened cost reduction and efficiency improvement on the liability side, among which the cost rate of interest-bearing liabilities decreased by 0.14 percentage point to 2.18% compared with the previous year, partially offsetting the impact of the expansion of liability scale on interest expenses. Interest expense on deposits from customers was the major component of the interest expense of the Company.

Interest expense on deposits from customers

In 2024, the Company's interest expense on deposits from customers was RMB8.462 billion, representing a year-on-year increase of RMB401 million or 4.98%, mainly due to a year-on-year increase in average balances of RMB44.378 billion or 12.27% resulting from the expanded scale of deposit business of the Company, which drove an increase in the interest expenses on deposits. The average cost ratio of deposits was 2.08%, representing a year-on-year decrease of 0.15 percentage point, mainly due to the fact that in response to the deposit market situation, the Company implemented market-oriented adjustment mechanisms and self-discipline requirements and adopted various measures such as differentiated pricing, adjustment of maturity structures, and reduction of high-cost deposits to strictly control the deposit cost rate, thus the cost ratio of demand and time deposits, as well as corporate and personal deposits all recorded a year-on-year decrease. The following table sets forth the average balance, interest expense and average cost rate of each component of the Company's deposits from customers for the periods indicated.

		2024			2023	
	Average	Interest	Average	Average	Interest	Average
Item	balance	expense	cost ratio	balance	expense	cost ratio
Corporate deposits						
Demand	86,475,308	677,043	0.78%	89,825,871	799,774	0.89%

Demand	28,906,558	46,662	0.16%	28,863,986	61,753	0.21%
Time	173,397,789	4,929,603	2.84%	138,867,579	4,367,781	3.15%
Sub-total	202,304,347	4,976,265	2.46%	167,731,565	4,429,534	2.64%
Total	405,996,845	8,461,984	2.08%	361,618,498	8,060,870	2.23%

Interest expense on deposits and placements from banks and assets sold under repurchase agreements

In 2024, the Company's interest expense on deposits and placements from banks and assets sold under repurchase agreements amounted to RMB1.291 billion, representing a year-on-year decrease of RMB18 million or a slight decrease of 1.35%, and remained stable in general.

Interest expense on debt securities issued

In 2024, the Company's interest expense on debt securities issued amounted to RMB2.288 billion, representing a year-on-year increase of RMB214 million or 10.32%, mainly due to the increase in the scale of the Company's green finance debt securities and certificates of interbank deposit, resulting in a year-on-year increase in the average balance of RMB11.495 billion or 14.90%, which drove an increase in interest expenses, while the cost rate of the issued debt securities decreased by 0.11 percentage point as compared to the previous year.

Other interest expense

In 2024, the Company's other interest expense amounted to RMB507 million, representing a year-on-year increase of RMB92 million or 22.16%, mainly due to a corresponding increase in the interest expense resulting from an increase in the Company's average balance of borrowings from the central bank.

5.6 Net Non-interest Income

In 2024, the Company's net non-interest income was RMB3.541 billion, representing a year-on-year increase of RMB341 million or 10.67%, mainly due to the increase in other net non-interest income, which led to a steady increase in net non-interest income. The following table sets forth the components of the Company's net non-interest income for the periods indicated.

Unit: RMB'000

Item	2024	2023
Fee and commission income	1,993,954	2,113,031
Less: Fee and commission expense	(484,401)	(526,512)
Net fee and commission income	1,509,553	1,586,519
Other net non-interest income	2,031,314	1,612,863
Net non-interest income	3,540,867	3,199,382

5.7 Net Fee and Commission Income

In 2024, the Company's net fee and commission income amounted to RMB1.510 billion, representing a year-on-year decrease of RMB77 million or 4.85%. During the Reporting Period, the Company continuously optimized its business structure and vigorously expanded its intermediary services such as transaction banking, investment banking, and deepened cost reduction and efficiency improvement on the expenditure side and strictly controlled the fee expenditure rate, which partially offset the decrease in revenue due to changes in insurance policies and other factors. The following table sets forth the components of the Company's net fee and commission income for the periods indicated.

Item	2024	2023
Fee and commission income	1,993,954	2,113,031
Of which: Wealth management service fees	928,870	929,831
Agency service fees	459,183	556,492
Custody and bank card service fees	316,846	377,895
Settlement fees	127,634	97,033
Others	161,421	151,780
Less: Fee and commission expense	(484,401)	(526,512)
Net fee and commission income	1,509,553	1,586,519

In 2024, wealth management service fees amounted to RMB929 million, representing a year-on-year decrease of RMB1 million and remained stable in general; agency service fees amounted to RMB459 million, representing a year-on-year decrease of RMB97 million or 17.49%, mainly due to the impact of changes in insurance policies and other factors, and the decrease in service fee from agency insurance business was partially offset by the increase in service fee from underwriting of debt financing instruments; custody and bank card service fees amounted to RMB317 million, representing a year-on-year decrease of RMB61 million or 16.16%, mainly due to the decrease in credit card service fees; settlement fees amounted to RMB128 million, representing a year-on-year increase of RMB31 million or 31.54%, mainly due to the increase in settlement-type transaction banking income; others amounted to RMB161 million, representing a year-on-year increase of RMB10 million, mainly due to the increase in service fees from letters of guarantees. At the same time, the Company strictly controlled the fee expenditure rate, the fee and commission expense amounted to RMB484 million, representing a year-on-year decrease of RMB42 million, or 8.00%.

5.8 Other Net Non-interest Income

In 2024, the Company's other net non-interest income amounted to RMB2.031 billion, representing an increase of RMB418 million or 25.94% over the previous year. Net gain on investment is the main component of other net non-interest income, which reached RMB1.854 billion during the period, representing an increase of RMB231 million or 14.26% over the previous year. This was mainly due to the increase in gains from financial investments measured at fair value through profit or loss during the holding period. The net gain or loss on trading was RMB11 million, representing an increase of RMB180 million over the previous year, which was mainly attributable to the Company enhanced market research and judgment, adjusted investment structure, and increased financial investments held for trading in due time, which led to a relatively rapid growth in net trading gains. The following table sets forth the composition of the Company's other net non-interest income during the periods indicated:

Item	2024	2023
Net trading gains/(losses)	10,687	(168,992)
Net gains arising from investments	1,854,294	1,622,863
Other net operating income	166,333	158,992
Other net non-interest income	2,031,314	1,612,863

5.9 Operating Expenses

In 2024, the Company's operating expenses amounted to RMB4.885 billion, representing a year-on-year increase of RMB368 million or 8.15%, mainly due to increased investment in the Company's business development, staff and science and technology. Meanwhile, the Company comprehensively deepened the cost reduction and efficiency improvement, implemented dual control of budget and bidding, and continued to reduce operation and procurement costs, resulting in a steady increase in the overall expenses. The following table sets forth the components of the Company's operating expenses for the periods indicated.

Unit: RMB'000

Item	2024	2023
Staff costs	2,508,089	2,204,507
Property and equipment expenses	879,662	836,110
Tax and surcharges	167,428	156,268
Other general and administrative expenses	1,329,380	1,319,543
Operating expenses	4,884,559	4,516,428

5.10 Expected Credit Losses

In 2024, the Company's expected credit losses amounted to RMB3.534 billion, representing a year-on-year decrease of RMB480 million or 11.97%. Expected credit losses from loans and advances to customers constituted the largest component of the expected credit losses. During the Reporting Period, expected credit losses from loans and advances to customers amounted to RMB2.380 billion, representing a year-on-year increase of RMB332 million or 16.23%, mainly due to the fact that the Company further strengthened the identification and measurement of expected credit risk of loans and moderately increased the allowances for impairment in conjunction with the economic situation, while increasing the scale of loans. In addition, the total expected credit losses of financial investments amounted to RMB1.135 billion, representing a year-on-year decrease of RMB292 million, which was mainly due to the enhancement of credit risk management in financial investments, which led to an improvement in the quality of investment assets. The expected credit loss of credit commitment amounted to RMB-155 million, representing a year-on-year decrease of RMB468 million, mainly due to the strengthening of off-balance sheet business risk management and control, the adjustment of the credit commitment business structure, and the reversal of related impairment allowances. Expected credit losses on long-term receivables amounted to RMB57 million, representing a year-on-year decrease of RMB150 million, mainly due to the restructuring of the subsidiary's leasing business and the relative stability of asset quality. The following table sets forth the main components of the Company's expected credit losses for the periods indicated.

Item	2024	2023
Loans and advances to customers	2,380,293	2,047,853
Financial investments measured at amortised cost	1,015,720	1,501,595
Financial investments measured at fair value through

6.1.1 Loans and Advances to Customers

As at the end of 2024, the Company's loans and advances to customers amounted to RMB332.554 billion, representing an increase of RMB39.561 billion or 13.50% as compared with that at the end of last year. Total loans to customers (excluding accrued interest and allowances for impairment losses, the same below) amounted to RMB340.690 billion, representing an increase of RMB40.600 billion or 13.53% as compared with that at the end of last year. In 2024, the Company focused on strengthening the "Five Major Aspects" and actively expanded into the "Eight New Tracks", and continuously expanded the size of loans issued. The total loans to customers accounted for 49.38% of the total assets, representing an increase of 0.02 percentage point as compared with that at the end of last year. The following table sets forth the components of the loans and advances to customers of the Company by product type as at the dates indicated.

Corporate loans

As at the end of 2024, corporate loans amounted to RMB242.179 billion, representing an increase of RMB40.614 billion or 20.15% as compared with that at the end of last year, and accounting for 71.08% of the total loans to customers, representing an increase of 3.91 percentage points as compared with that at the end of last year. During the Reporting Period, the Company strove to develop its green and blue loan businesses, continued to strengthen its credit support for manufacturing industry, private sector, inclusive and technology, and other key fields, and achieved rapid growth in the corporate loans.

Personal loans

As at the end of 2024, personal loans amounted to RMB78.336 billion, representing a decrease of RMB748 million or a slight decrease of 0.95% as compared with that at the end of last year, and accounting for 22.99% of the total loans to customers, representing a decrease of 3.36 percentage points as compared with that at the end of last year. During the Reporting Period, while maintaining steady development in personal housing loan business, the Company actively promoted the personal inclusive loan business, leading to continuous optimization of the loan structure. Both housing mortgage loans and business loans experienced stable growth. The Company proactively adjusted its credit card business strategy, resulting in a decrease in personal consumption loans.

Discounted bills

As at the end of 2024, the Company's discounted bills amounted to RMB20.175 billion, representing an increase of RMB733 million or 3.77% as compared with that at the end of last year, and accounting for 5.93% of the total loans to customers, representing a decrease of 0.55 percentage point as compared with that at the end of last year. During the Reporting Period, the Company actively promoted the coverage of its commercial bills business and the scale for discounted bills increased steadily.

6.1.2 Financial Investments

As at the end of 2024, the Company's carrying value of financial investments amounted to RMB255.655 billion, representing an increase of RMB29.644 billion or 13.12% as compared with that at the end of last year. The following table sets forth the components of the Company's financial investment portfolios as of the dates indicated.

Unit: RMB'000

	31 Decem	ber 2024	31 Decem	ber 2023
Item	Amount	% of total	Amount	% of total
Financial investments measured at fair value through profit or	(2.00/ FAR	25.02	50 260 522	25.70

Total financial investments	255,655,096	100.00	226,011,166	100.00

Financial investments measured at fair value through profit or loss

As at the end of 2024, the Company's carrying value of financial investments measured at fair value through profit or loss amounted to RMB63.987 billion, representing an increase of RMB5.717 billion or 9.81% as compared with that at the end of last year, mainly due to the fact that with the continued strength of the bond market, the Company increased investments in the public funds to obtain excess returns by leveraging market while enhancing asset liquidity. The following table sets forth the components of the Company's financial investments measured at fair value through profit or loss as at the dates indicated.

Unit: RMB'000

6.2 Liabilities

As at the end of 2024, the Company's total liabilities amounted to RMB645.063 billion, representing an increase of RMB77.017 billion or 13.56% as compared with that at the end of last year. During the Reporting Period, the Company continued to improve the quality of its liabilities and further optimized its liability structure by diversifying its sources of liabilities. While maintaining a steady growth in deposits from customers, it moderately increased deposits from banks and other financial institutions, borrowings from the central bank and the scale of debt securities issued. The following table sets forth the components of the Company's total liabilities as of the dates indicated.

6.2.1 Deposits from Customers

As at the end of 2024, the Company's deposits from customers amounted to RMB443.426 billion, representing an increase of RMB47.958 billion or 12.13% as compared with that at the end of last year; total deposits from customers (excluding accrued interest, the same below) amounted to RMB432.024 billion, representing an increase of RMB45.962 billion or 11.91% as compared with that at the end of last year. During the Reporting Period, the Company adhered to the strategy of tiered and grouped customer base, continuously improved product functions, leveraged marketing activities to stabilize existing deposits and expand new ones, strengthened business synergies and increased capital deposits. The balance of corporate deposits was RMB212.153 billion, representing an increase of RMB14.925 billion or 7.57% as compared with that at the end of last year. The Bank focused on scenarios, deeply cultivated key retail customer groups, and promptly adjusted pricing strategies and the pace of product issuance based on market and peer dynamics. The balance of personal deposits was RMB219.798 billion, representing an increase of RMB31.354 billion or 16.64% as compared with that at the end of last year. The following table sets forth the components of Company's deposits from customers by product type and customer type as of the dates indicated.

	Compared with the

Deposits from customers	443,425,535	1	395,467,359	1	12.13	1	348,043,307	1

As at the end of 2024, personal deposits accounted for 50.88% of the total customer deposits, representing an increase of 2.07 percentage points as compared with that at the end of last year; corporate deposits accounted for 49.11% of total customer deposits, representing a decrease of 1.98 percentage points as compared with that at the end of last year.

6.2.2 Deposits from Banks and Other Financial Institutions

As at the end of 2024, the Company's deposits from banks and other financial institutions amounted to RMB12.355 billion, representing an increase of RMB10.113 billion or 451.00% as compared with that at the end of last year, mainly because the Company based on market conditions, strengthened its interbank liability management and actively expanded low-cost interbank deposits based on its own fund allocation needs.

6.2.3 Financial Assets Sold under Repurchase Agreements

As at the end of 2024, the Company's financial assets sold under repurchase agreements amounted to RMB35.504 billion, representing a decrease of RMB1.376 billion or 3.73% as compared with that at the end of last year, and remained stable in general.

6.2.4 Borrowings from the Central Bank

As at the end of 2024, the Company's borrowings from the central bank amounted to RMB28.240 billion, representing an increase of RMB10.005 billion or 54.87% as compared with that at the end of last year, mainly due to the fact that the Company proactively expanded the source of liabilities to obtain low-cost funding, and increase the balance of relending and rediscount to support the development of micro and small enterprises and the medium-term lending facilities borrowed from the central bank.

6.2.5 Debt Securities Issued

As at the end of 2024, the Company's debt securities issued amounted to RMB98.752 billion, representing an increase of RMB9.482 billion or 10.62% as compared with that at the end of last year, mainly because the Company issued low-cost interbank certificates of deposit in response to the trend of capital market and based on its own requirement of capital allocation. For details of the bonds, please refer to "35 Debt Securities Issued under Notes to the Financial Statements" of this results announcement.

6.3 Equity Attributable to Shareholders

As at the end of 2024, the shareholders' equity of the Company amounted to RMB44.900 billion, representing an increase of RMB4.961 billion or 12.42% as compared with that at the end of last year; equity attributable to equity shareholders of the Bank amounted to RMB43.932 billion, representing an increase of RMB4.868 billion or 12.46% as compared with that at the end of last year, mainly due to the increase in retained earnings, reserves and other comprehensive income. During the Reporting Period, the Company distributed RMB931 million of dividends to ordinary shareholders and paid interest of perpetual bonds amounting to RMB233 million. The following table sets forth the components of the Company's shareholders' equity as of the dates indicated.

Item	31 December 2024	31 December 2023
Share capital	5,820,355	5,820,355
Other equity instruments		
Of which: Perpetual bonds	6,395,783	6,395,783

Retained earnings	6,695,179	5,011,018
Total equity attributable to equity shareholders of the Bank	43,932,381	39,063,939
Non-controlling interests	967,448	875,304
Total equity	44,899,829	39,939,243

7. ANALYSIS OF THE CASH FLOW STATEMENT

In 2024, the net cash flows generated from operating activities amounted to RMB22.952 billion, representing an increase of RMB12.815 billion from last year, mainly due to the increase in net cash flows from deposits and loans, central bank and interbank transactions of RMB12.624 billion. Among them, net cash flows generated from operating assets increased by RMB8.237 billion and net cash flows generated from operating liabilities increased by RMB4.069 billion.

The net cash flows generated from investing activities amounted to RMB-13.279 billion, representing a year-on-year increase of RMB3.774 billion, mainly due to an increase in proceeds from disposal and redemption of investments of RMB3.069 billion.

The net cash flows generated from financing activities amounted to RMB5.833 billion, representing a year-on-year decrease of RMB5.159 billion, mainly due to a decrease in proceeds from debt securities issued of RMB4.369 billion.

8. SEGMENT ANALYSIS

The following segment operating performance is presented by business segment. The Company's main businesses include corporate banking, retail banking and financial market business and others. The following table shows a summary of the operating performance of each business segment of the Company during the periods presented.

10. ANALYSIS OF QUALITY OF LOANS

During the Reporting Period, the Company continued to strengthen the management and control over the quality of credit assets. While the credit assets grew steadily, the quality of credit assets continued to improve steadily. As at the end of the Reporting Period, the total amount of loans of the Company (excluding accrued interest and allowances for impairment) was RMB340.690 billion; the total non-performing loans amounted to RMB3.873 billion; and the non-performing loan ratio was 1.14%. For the purpose of discussion and analysis, unless otherwise specified, the amount of loans presented in the analysis below excludes accrued interest.

10.1 Distribution of Loans by Five Categories

Unit: RMB'000

	31 Decem	ber 2024	31 December 2023		
Item	Amount	% of total	Amount	% of total	
Normal loans	334,906,496	98.30	294,922,238	98.28	
Special mention loans	1,909,890	0.56	1,627,944	0.54	
Substandard loans	1,133,250	0.33	1,675,737	0.56	
Doubtful loans	704,274	0.21	711,995	0.24	
Loss loans	2,035,815	0.60	1,151,627	0.38	
Total loans to customers	340,689,725	100.00	300,089,541	100.00	
Total non-performing loans	3,873,339	1.14	3,539,359	1.18	

Under the five-category classification system for loan, the non-performing loans of the Company included the substandard, doubtful and loss loans. As at the end of the Reporting Period, the proportion of non-performing loans decreased by 0.04 percentage point as compared with that at the end of last year to 1.14%, where substandard loans decreased by 0.23 percentage point to 0.33%, doubtful loans decreased by 0.03 percentage point to 0.21% and loss loans increased by 0.22 percentage point to 0.60% as compared with that at the end of last year, respectively.

Total loans to customers	340,689,725	100.00	300,089,541	100.00

The Company had adopted a prudential classification standard as to overdue loans, according to which loans overdue for more than 60 days were classified as non-performing loans.

10.8 Repossessed Assets and Allowances for Impairment

As at the end of the Reporting Period, the Bank had total repossessed assets of RMB9.6536 million, allowances for impairment of RMB2.2202 million, and the net repossessed assets was RMB7.4334 million.

10.9 Changes in Allowances for Impairment of Loans

The Company has performed loan impairment accounting and confirmed loss allowances based on expected credit losses. If the credit risk of loan is low as at the end of the Reporting Period or has not increased significantly since initial recognition, the Company measures its loss allowances based on expected credit losses for the future 12 months; in other situations, the Company measures their loss allowances based on lifetime expected credit losses.

The Company re-measures expected credit losses at the end of the Reporting Period. In addition, the Company regularly reviews a number of key parameters and assumptions involved in the process of determining impairment allowances based on the expected credit loss model, including probability of default, loss rate of default and other parameter estimations, as well as forward-looking adjustment and other adjustment factors. The changes in the Company's allowances for impairment of loans are detailed in the following table:

Unit: RMB'000

Item	2024	2023
Balance at the beginning of the period/year	7,997,497	7,137,141
Allowances for the period/year	2,380,293	2,047,853
Write-offs for the period/year	(1,228,963)	(1,243,813)
Transfer out for the period/year	_	_
Recovery of write-offs for the period/year	233,075	86,700
Other changes	(34,699)	(30,384)
Balance at the end of the period/year	9,347,203	7,997,497

The Company maintained a stable and prudent provision policy. As at the end of the Reporting Period, the Company's allowances for impairment of loans (including discounted bills) amounted to RMB9.347 billion, representing an increase of RMB1.350 billion or 16.88% as compared with that at the end of last year. The provision coverage ratio reached 241.32%, representing an increase of 15.36 percentage points as compared with that at the end of last year; the provision rate of loans stood at 2.74%, representing an increase of 0.07 percentage point as compared with that at the end of last year, both provision indicators satisfying regulatory requirements.

10.10 Countermeasures Taken against Non-performing Assets

During the Reporting Period, the Bank continued to implement the disposal and mitigation of non-performing assets and further strengthened its asset quality. Firstly, the Bank tracked the evolution of risks in key areas and industries, strengthened the front-end controls on special mention loans and overdue business, prevented the risk of deterioration in asset quality, and prevented and disposed of potential risks; secondly, it strengthened the coordination and linkage of non-performing asset disposal with the core of improving quality and efficiency, and comprehensively implemented various measures such as independent collection, judicial disposal, asset write-off and creditor's rights transfer, which improved the disposal process; thirdly, it innovated the means of disposal, innovated the disposal mode of "Internet +" by standardizing the disposal mechanism, deepening judicial cooperation, and strengthening cooperation with banks, thereby broadening the disposal channels; fourthly, it upgraded the standards of intelligent risk control to promote the intelligent transformation of asset protection, and enhanced the efficiency and effectiveness of non-performing disposal to maintain the overall stability of asset quality.

10.11 Credit Extension to Group Customers and Risk Management

The Company adhered to the principles of "unified credit granting, appropriate limits, classified management, real-time monitoring, and lead bank system" in extending credit to group customers, developed risk management systems for the credit business to group customers and established a management mechanism and management information system adapted to the risk management characteristics of the credit business to group customers, with a complete family tree of the Group constructed, so as to strengthen the consolidation of group risk data, and optimized the risk monitoring system and post-credit granting management system in group dimension. At the same time, the Company constantly improved the system control scheme for extending credit to group customers and continuously enhanced the control of the entire process of credit extension to group customers, so as to continuously enhance the risk management level of credit extension to group customers.

Firstly, the Company implemented unified management for credit extension to group customers, standardized the unified identification of group customers and related information exchange management by the Bank and its subsidiaries, and centralized risks control of credit extension to group customers. Secondly, it set up a large-amount credit review committee to be responsible for reviewing and approving bank-wide large-amount credit granting services. Thirdly, it established a sound risk monitoring system at group level, focused on risk monitoring of BQD Wealth Management and BQD Financial Leasing, promoted the consolidated management of group risk data, and conducted penetrating and unified monitoring against the risks from group customers. Fourthly, it integrated and analyzed various credit risk information related to group customers based on the core enterprises engaged in the group's principal business. According to the level of risks of group customers and its own risks commitment capacity, it properly determined the credit extension plan to group customers, and prudently determined the general credit limit to group customers and the sub-credit limit to each member unit to prevent the concentration of credit risks. Fifthly, it continued to optimize the mechanism for controlling the concentration of credit extension to group customers, set up relevant concentration monitoring indicators in the system and achieved concentration limit management. Sixthly, it adopted a leading bank system for credit extension to group customers, with the leading bank responsible for the overall credit extension management of group customers, and reporting the material matters on group customers to the head office as required, so as to realize the unified coordination of risk management and control and strictly prevent multi-branch credit. Seventhly, it optimized the Group's credit risk and market risk management and control, carried out systematic rectification of business areas at the group level, and opened up the group association detection function of the communications management system to practically protect the effectiveness of quota management and control.

10.12 Rescheduled Loans

Unit: RMB'000

	31 December 2024		31 December 2023	
	Amount of		Amount of	
Item	loans	% of total	loans	% of total
Rescheduled loans	137,928	0.04	103,128	0.03
Total loans and advances to customers	340,689,725	100.00	300,089,541	100.00

The Company implemented strict management and control on rescheduled loans. As at the end of the Reporting Period, the proportion of rescheduled loans of the Company was 0.04%, which increased by 0.01 percentage point as compared with that at the end of last year.

11. LIABILITY QUALITY ANALYSIS

The Company places emphasis on the liability quality management. Based on the "Measures for Liability Quality Management of Commercial Banks" (《商業銀行負債質量管理辦法》), the "Measures for Liability Quality Management of Bank of Qingdao" has been formulated, the Company has established a more scientific and reasonable liability quality management system, and defined the responsibilities of liability quality management of the Board, senior management and relevant departments. Liability quality management strategies and policies were aligned with the business strategy, risk appetite and overall business characteristics.

The Company continued to improve its level of liability quality management and strengthened its management of the source, structure and cost of its liability. Firstly, the Company adhered to the balanced development between volume and price in the general deposit business, promoted the steady growth of the deposit size to consolidate the liability base. Secondly, the Company proactively expanded liability sources, optimized the liability structures, and reduced liability costs. Thirdly, the Company adhered to the principles of initiative and foresight, and reasonably arranged the scale and maturity of liabilities in conjunction with regulatory policies, market environment, and business strategy.

The liability quality of the Company remained sound with all indicators within a reasonable range. As at the end of 2024, the Company's net stable funding ratio was 120.31% and the liquidity coverage ratio was 203.02%, both of which complied with the regulatory requirements. In 2024, the Company's cost rate of interest-bearing liabilities was 2.18%, representing a year-on-year decrease of 0.14 percentage point; and the average cost ratio of deposits from customers was 2.08%, representing a year-on-year decrease of 0.15 percentage point.

12. ANALYSIS OF CAPITAL ADEQUACY RATIO AND LEVERAGE RATIO

The Company continuously optimized its business structure, strengthened capital management, continuously aimed to improve capital risk resistance and capital returns, and on this basis, reasonably determined the capital adequacy ratio target, and guided business development comprehensively with performance appraisal, capital allocation and other means, so as to achieve the coordinated development of the overall strategy, business development, and the capital management strategy.

In terms of internal capital management, the Company refined our capital management system, facilitated the smooth implementation of the new rules for capital and improved capabilities for refined capital management. The Company strengthened the economic capital allocation management function, overall planned for asset development and capital saving, and enhanced the awareness of operating institutions saving capital. Taking into account each institution's capital consumption and income in the performance assessment plan, the Company gradually optimized the risk adjustment performance assessment plan, and guided branches and management departments to proactively carry out transactions with high returns on capital, so as to maximize the returns on risk-weighted assets. Meanwhile, the Company established and improved the balance control mechanism between capital occupation and risk assets, to ensure continuously conforming capital adequacy ratio.

12.1 Capital Adequacy Ratio

The capital adequacy ratio of the Company and the Bank as of 31 December 2024 was calculated in accordance with the "Regulation Governing Capital of Commercial Banks" (《商業銀行資本管理辦法》) and other relevant regulatory provisions, and the capital adequacy ratio as of 31 December 2023 was calculated in accordance with the "Regulation Governing Capital of Commercial Banks (Provisional)" (《商業銀行資本管理辦法(試行)》) and other relevant regulatory provisions. The credit risk-weighted assets are calculated with different risk weights while considering the effects of qualified pledge and guarantee. Market risk-weighted assets and the operational risk-weighted assets are calculated with the standard approach. During the Reporting Period, the Company's capital adequacy indicators complied with the regulatory requirements.

As at the end of the Reporting Period, the Company's capital adequacy ratio was 13.80%, representing an increase of 1.01 percentage points as compared with that at the end of last year and the core tier-one capital adequacy ratio stood at 9.11%, representing an increase of 0.69 percentage point as compared with that at the end of last year. In 2024, The Company facilitated the smooth implementation of the new rules for capital, strengthened capability of refined management for capital and further enhanced the endogenous capital replenishment by an increase of retained profits and other comprehensive income. By virtue of reinforced performance evaluation and guidance, optimized structures of assets and liabilities and enhanced the efficiency in capital utilization, the capital adequacy ratio at all levels has been improved as compared to the end of last year under the premise of aggressive and prudent development of various businesses.

Relevant information on the Company's capital adequacy ratio as at the dates indicated is listed in the following table.

Unit: RMB'000

The Company	31 December 2024	31 December 2023

Retained earnings	6,695,179	5,011,018	33.61	Increase in retained earnings

15.5 Changes in Interest Receivables

As at the end of the Reporting Period, the Company's interest receivables reached RMB27 million, representing a decrease of RMB12 million or 31.83% from the end of the previous year, mainly attributable to the decrease in interest receivables arising from loans and advances to customers. The following table sets forth the changes in various items of interest receivables of the Company during the period indicated.

Unit: RMB'000

Item	31 December 2023	Increase during the period	Recovery during the period	31 December 2024
Loans and advances to customers	38,929	813,972	(827,834)	25,067
Long-term receivables	_	8,019	(6,548)	1,471
Total	38,929	821,991	(834,382)	26,538

Note: In accordance with the requirement of the "Format of the Financial Statements of Financial Enterprises for 2018" released by the Ministry of Finance of the People's Republic of China, the "interest receivables" item shall only reflect the interest that has been due and can be collected but has not been received as of the end of the Reporting Period. Since the amount is relatively small, it should be included in the item of "other assets". The Company has made impairment allowances for interest receivables, and implemented bad debt write-off procedures and policies.

15.6 Allowances for Bad Debts

As at the end of the Reporting Period, the Company's allowances for bad debts was RMB133 million, representing an increase of RMB94 million over the end of the previous year. Among them, the bad debt allowances for other receivables was RMB124 million, representing an increase of RMB93 million from the end of the previous year, which was mainly due to the fact that the Company has strengthened the risk identification and measurement of credit card handling fee receivables and appropriately increased bad debt allowances; the bad debt allowances for interest receivables was RMB9 million, representing an increase of RMB1 million from the end of the previous year. The following table sets forth the Company's interest receivables, other receivables and their allowances for bad debts as of the dates indicated.

Unit: RMB'000

Item	31 December 2024	31 December 2023	Change

Note: In May 2024, according to the "Reply of the Qingdao Bureau of the National Financial Regulatory Administration on the Intended Change of Registered Capital and Adjustment of Equity Structure of BQD Financial Leasing Company Limited" (Qing Guo Jin Fu [2024] No. 111) (《國家金融監督管理總局青島監管局關於青島青銀金融租賃有限公司變更註冊資本及調整股權結構的批覆》(青國金覆[2024]111號)), the registered capital of BQD Financial Leasing increased from RMB1.0 billion to RMB1.225 billion upon the completion of the capital increase and the procedures of change of industrial and commercial registration regarding the registered capital. After the completion of the capital increase, the shareholding ratio of the Bank in BQD Financial Leasing increased from 51% to 60%.

16.2 Acquisition and Disposal of Subsidiaries during the Reporting Period

During the Reporting Period, there was no acquisition and disposal of subsidiaries of the Bank.

16.3 Particulars of Major Companies Controlled or Invested in by the Company

16.3.1 BQD Financial Leasing

BQD Financial Leasing was established on 15 February 2017, with a registered capital of RMB1.225 billion. It was registered in Qingdao, and was initiated and established by the Bank. The Bank holds 60% of the share capital of BQD Financial Leasing. As the only approved financial leasing company in Qingdao, BQD Financial Leasing conscientiously implements the spirit of the economic and financial work conference of the CPC Central Committee, and returns to the main business of "fund financing" + "assets financing" by complying with the high-quality development requirements of higher-level party committees and the Company's party branch, and focusing on the guiding ideology of "strengthening foundation, improving capabilities, building images, and seeking development", so as to fulfill its main responsibility as a serving entity, and comprehensively promote the implementation of the Group and the Company's strategic plans. Based in Shandong with a footprint across the whole country, BQD Financial Leasing fully leverages its own business advantages and characteristics, focusing on manufacturing enterprises, technology innovation-oriented enterprise, competitive industries in the region, and financing and leasing business for small- and medium-sized enterprises, while actively expanding its business boundaries: provocatively penetrating into key projects in areas such as people's livelihood guarantee, strategic emerging industries, transportation, and urbanization construction.

Comprehensively optimizing market layout, business performance improved steadily. As at the end of the Reporting Period, BQD Financial Leasing's total assets reached RMB18.574 billion, representing an increase of 3.88% as compared with that at the end of last year. During the Reporting Period, it achieved operating income of RMB668 million, representing a year-on-year increase of 2.45% and achieved net profit of RMB351 million, representing a year-on-year increase of 40.23%. BQD Financial Leasing maintained a high degree of strategic resolve. At the end of the Reporting Period, the balance of direct leasing business (including prepayments for finance lease assets, the same below) was RMB2.301 billion, accounting for 13.37% of the total balance, an increase of 8.84 percentage points over the end of the previous year. The proportion of manufacturing-related business investment came to 47.98%, making it the largest industry in terms of new business, accounting for 26.92% of the total balance, an increase of 16.85 percentage points over the end of the previous year. During the Reporting Period, BQD Financial Leasing was awarded the "Soaring Award-Leading Enterprise of Serving the Real Economy" in China's financial leasing for its compliant and sound sustainable development achievements, as well as its outstanding performance in serving the real economy, particularly in the manufacturing sector.

Expanding the boundaries of business domains by simultaneously focusing on both intra-provincial and out-of-provincial markets. During the Reporting Period, while adhering to the premise of serving the local economic development, BQD Financial Leasing strived to give full play to the value of the national license. For intra-provincial business, it deeply penetrated lower-tier markets to explore "blue ocean" opportunities, comprehensively covering and solidifying its foundation; for out-of-provincial business, it explored actively and gradually established a stable customer base. Throughout the year, new business operations covered 16 cities within the province and 19 other provinces and municipalities nationwide. As at the end of the Reporting Period, out-of-provincial business accounted for 25.18% of total operations.

16.3.2 BQD Wealth Management

BOD Wealth Management was established on 16 September 2020, with a registered capital of RMB1.0 billion. It was registered in Qingdao, and was wholly initiated and established by the Bank. BQD Wealth Management is the first wealth management subsidiary of a city commercial bank approved in the Northern China and the sixth within the whole country. It is mainly engaged in the public offering of wealth management products to the general public, private placement of wealth management products to qualified investors, investment and management of properties entrusted by investors, and provision of wealth management advisory and consulting services. Guided by new asset management regulations and supporting policies, BQD Wealth Management is committed to focusing on the essence of asset management business and serving the real economy, and building a complete and innovative wealth management product system while adhering to the business philosophy of "establishment with compliance, governance with professionalism, emergence with innovation and enhancement with technology". Targeting the needs of specific groups of people and relying on strong investment and research capabilities, it creates an innovative wealth management company brand which is "inclusive + distinctive".

The product system optimized continuously and the channel expanded effectively. During the Reporting Period, the corporate governance capabilities of BQD Wealth Management achieved comprehensive improvement, the overall risk management standards continuously strengthened, and all businesses maintained steady and healthy development. As at the end of the Reporting Period, BQD Wealth Management had 680 wealth management products in existence with a balance of RMB199.326 billion, and there were 90 consignment channels outside the Bank, doubling as compared with that at the end of the previous year. During the Reporting Period, BQD Wealth Management issued 432 wealth management products, raising proceeds of RMB564.866 billion in total, and the fee and commission income from wealth management products amounted to RMB929 million. As at the end of the Reporting Period, the balance of investment assets from BQD Wealth Management's wealth management products was RMB216.591 billion. The assets mainly were directly and indirectly invested in fixed income, non-standardized debt, public fund products, and capital market assets.

BQD Wealth Management was awarded three gold honors of "Excellent Innovative Wealth Management Company", "Wealth Management Company with Excellent Channel Expansion Capability" and "Excellent Fixed Income Banking Financial Products" at the "Fourth Golden Honors" by PY Standard due to its outstanding performance. BQD Wealth Management won two awards, the "Golden Bull Award for Fixed Income Banking Wealth Management Products" and the "Golden Bull Innovative Award for Banking Wealth Management Companies" in the appraisal of the "Fifth Golden Bull Awards for Banking Wealth Management of Capital Securities Cup" organized by China Securities Journal, and won the "Double Golden Bull" award for the company and product for the fourth consecutive year.

17. OVERVIEW OF BUSINESS DEVELOPMENT

The year 2024 was a pivotal year for the "14th Five Year Plan", as well as a crucial year for Bank of Qingdao to make progress in the implementation of the three-year strategic plan. Bank of Qingdao fully implemented the decisions and arrangements of the Party Central Committee and the State Council, strictly implemented the spirit of the Economic and Financial Work Conference at central, provincial, and municipal level, and served the local populace and the real economy in accordance with the operation guiding ideology of "deepening strategies, strengthening features, optimizing mechanisms, and refining management", so as to continuously consolidate the foundation of development and achieve "stable progress and quality improvement" in its business performance.

17.1 Five Major Aspects

In 2024, the Bank deeply practiced the political and popular nature of financial work, comprehensively expanded the breadth and depth of financial services, upheld fundamental principles and broke new ground, served the overall situation, and fully supported the "Five Major Aspects" including technology finance, green finance, inclusive finance, pension finance and digital finance with practical actions.

Technology finance

The Bank promoted the development of technology finance with innovation. Firstly, it optimized full cycle technology finance product system. In 2024, the Bank continued to carry out the creation activities of Sword Forging 2.0 products (鑄劍2.0產品), and innovated and optimized a number of technology financial products such as "Financial Credit for Technological Innovation" (科融信貸), "Start-up Easy Loan" (啟航易貸) and "Pilot Easy Loan" (領航易貸), and gradually built up a full life cycle product system covering the start-up, growth and maturity stages of technology enterprises. During the Reporting Period, the Bank completed the issuance of the first "Financial Credit for Technological Innovation" business in the province. Secondly, it improved the working

mechanism of technology finance. During the Reporting Period, the Bank formulated the "Bank of Qingdao's Technology Finance Development Program", which clarified the direction of business development, built a technology finance franchise center in Jinan, promoted the construction of five technology finance specific branches, comprehensively upgraded and iterated the technology financial service model, responded to the needs of the customers and the market quickly, and provided customers with full-cycle and diversified financial services. As at the end of the Reporting Period, the balance of technology finance loans of the Bank amounted to RMB18.730 billion, representing an increase of RMB5.965 billion or 46.73% as compared with that at the end of last year, which was higher than the loan average growth rate of the whole Bank. It had 1,784 customers in technology finance customer segment, representing an increase of 473 customers or 36.08% as compared with that at the end of last year.

Green finance

The Bank coordinately promoted the development of green finance. Firstly, it established a long-acting mechanism for the development of green finance, setting up a long-acting development mechanism from multiple dimensions such as organizational structure, assessment and management, business promotion, etc., and constructing an innovative marketing model of three-dimensional operation of green customer groups and matrix deployment of green exclusive products through the multi-modal models of "customer stratification, product-driven, tool-enabled, and system-guaranteed". Secondly, it innovated green credit products, launching two industry-specific green products, namely, "Green Water – Clear Source Loan" (綠水清源貸) and "New Quality – Carbon Benefit Loan" (新質碳益 貸), and precisely implementing policies in two major fields, namely, sewage treatment and transformation finance. It also increased the promotion of dual-carbon tools to effectively reduce the cost of enterprise financing, and used capital leverage to guide enterprises to pursue green and develop towards green. Thirdly, it utilized the green financial system to realize digital empowerment. The Bank is the first corporate bank in Shandong Province to launch a green financial system. Fourthly, it released the special brand of "BQD Green Finance", aiming at realizing the whole process and standardized management of green credit to improve the service level of green finances. As at the end of the Reporting Period, the balance of the Bank's green loans amounted to RMB37.349 billion, representing an increase of RMB11.214 billion or 42.91% as compared with that at the end of last year, which was higher than the loan average growth rate of the whole Bank. It had 850 customers in green finance customer segment, representing an increase of 346 customers or 68.65% as compared with that at the end of last year. It continued to build the brand characteristics of blue finance, with the balance of blue loans of RMB16.782 billion, representing an increase of 26.75% as compared with that at the end of last year.

Inclusive finance

The Bank promoted the development of inclusive finance from a strategic perspective.

Firstly, it innovated and improved the service level of inclusive products, optimized and innovated 23 inclusive products through the "Sword Forging Operation 2.0" (鑄劍行動2.0), highlighted credit inclusion and public-private integration, and launched 3 new scenario online products of "Inclusive e-Financing" (普惠e融), forming a complete product system covering major industries, online and offline. Secondly, it constructed a franchise mechanism to guarantee the development of inclusive finance business, and promoted the establishment of new inclusive franchise departments in branches. The coverage of the inclusive franchise institutions has been expanding, the professional team of small and micro finance has been growing, and the professional capacity of the team has been improving. The Bank was recognized as an advanced unit of the small and micro financial services for consecutive years, and the Bank's regulatory rating for small and micro financial services was upgraded to "2A" in 2024. As at the end of the Reporting Period, the Bank had 54.7 thousand inclusive loans customers, representing an increase of 1.3 thousand as compared with that at the end of last year; the balance of inclusive loans amounted to RMB45.089 billion, representing an increase of RMB11.243 billion or 33.22% as compared with that at the end of last year, which was higher than the loan average growth rate of the whole Bank; the non-performing ratio was 0.83%, and the weighted average interest rate of inclusive loans was 3.73%. The balance of agriculture-related loans of the Bank was RMB36.573 billion, representing an increase of RMB11.040 billion or 43.24% as compared with that at the end of last year.

Pension finance

The Bank focused on deploying the development of pension finance. Firstly, it continued to explore the creation of a standard service model for the pension industry customer base, providing assistance for the transformation and upgrading of pension services, the development of the pension industry and focused on the needs of elderly customers. Secondly, it focused on deploying the development of pension finance with the base of specialization in the health care industry. In the health care field, it launched two exclusive products, "Easy Hospital Financing" (院易融) and "Easy Diagnosis Financing" (診易融), centering on the urban primary healthcare settings, and provided targeted support to more than 300 medical institutions at all levels in Shandong Province. As at the end of the Reporting Period, the Bank had 4,904 customers in hygiene and health segment, representing an increase of 913 or 22.88% as compared with that at the end of last year. Thirdly, in response to the growing demand of customers for planning and reserving for the "third pillar of pension care" (第三 養老支柱), the Bank actively deployed pension financial products, created exclusive credit plans for different pension enterprises, and launched special product of "Easy Enterprise Loan for Elderly" (養老企易貸). Fourthly, based on the two major positions of community and agriculture-benefit under the "Happiness • Companionship" brand, it provided customers with "Party Building + Volunteering" non-financial voluntary services.

Digital finance

The Bank comprehensively pushed forward of the digital transformation. Among which, the total number of mid-to-high end customers with financial assets above RMB200 thousand reached 427.4 thousand, exceeding 400 thousand for the first time and representing an increase of 9.51% as compared with that at the end of the previous year. Their asset scale in the Bank was RMB299.120 billion, accounting for 86.47% of assets retained by all retail customers.

Implementation of systematic operation for customer base. In terms of community banking customers, the Bank launched a series of activities centered around the "Happiness • Companionship" brand. As at the end of the Reporting Period, community banking of the Bank served 65.0 thousand customers, representing an increase of 18.6 thousand or 40.09% as compared with that at the end of the last year. In terms of agriculture-benefit customers, the Bank forged the "Happy Village" brand to promote the experience in non-financial service scenarios. As at the end of the Reporting Period, the Bank had 283.8 thousand agriculture-benefit customers, representing an increase of 7,673 or 2.78% as compared with that at the end of the last year. In terms of payroll credit customers, the Bank issued exclusive products to increase the contribution from customer base. The number of payroll credit customers has reached 228.3 thousand, representing an increase of 12.35% and the Bank has achieved the goal of delivering mid- to high-end customers upward. In terms of private banking customers, the Bank launched high-end equity services, with the growth rate of private banking customers amounting to 18.60%.

The Bank relied on the cloud service hall online and leveraged digital intelligence to deeply explore needs and implement precise policies and expanded the boundaries of customer base management, with the number of monthly active users on mobile reaching 1.4566 million.

4. Agency retail business

Accelerated product innovation and iteration. The Bank employed digital means to quickly respond to market changes and customer needs, and continuously launched new products in line with market trends to meet customers' diversified and personalized financial needs. During the Reporting Period, retail banking business realized net fee and commission income of RMB448 million, accounting for 29.68% of the Company's net fee and commission income.

In terms of agency sales of wealth management products, by strengthening the deep cooperation with leading wealth management subsidiaries, the Bank adjusted its product portfolio on the shelf in sync with the market, and timely introduced competitive products such as wealth management to meet the demand for customized exclusive products. In terms of agency business for insurance, by optimizing product supply and implementing a strategy which combines both lump sum and term insurance, the Bank seized the window of predetermined adjustment to the interest rates of insurance. Our total agency premium in Qingdao stood at RMB884 million, and the market share of agency insurance in the Qingdao region reached 14% among peers, ranking second in the market. In terms of agency sales of precious metals, the sales of panda coin special event was RMB59.9500 million. In terms of agency sales of funds, the Bank optimized the scientificity of fund allocation. During the Reporting Period, the service fee revenue from agency fund business reached RMB25.8648 million, representing an increase of 92.61% as compared with last year.

5. Private banking business

The Bank was deeply committed to the service philosophy of "Happiness • Companionship", continuously optimized the service experience for private banking clients. During the Reporting Period, the Bank implemented systematic measures such as building a professional service team system, creating a refined service capability matrix, and establishing an exclusive product system to strengthen the management of client relationships throughout their life cycle and effectively promote the high-quality development of private banking business. The Bank has consistently upgraded its asset allocation and "In-depth Service, Long-term Companionship" service system, provided trust service of insurance funds for high net-worth clients, and launched its first private banking exclusive wealth management product, achieving sustainable growth in both customer base and operating income. As at the end of the Reporting Period, the number of private banking clients of the Bank and assets held by the Bank increased by 18.60% and 17.31% respectively as compared with that at the end of last year.

6. Customer service management

Emphasizing user experience and improving service level. During the Reporting Period, the Bank interacted with more than 200 thousand customers throughout the year, and the Net Promoter Score (NPS) of customer satisfaction was 80.57%, representing an increase of 0.08 percentage point over the previous year and reaching the highest level in history, which fully demonstrated the customers' high recognition and trust in the Bank's branch services. Firstly, concentrating on the data of consumer complaint and requests. Through the establishment of a service evaluation mechanism, the Bank identified its pain points in product and service experiences, driving significant improvements in customer satisfaction. Secondly, the Bank comprehensively solidified the level of customer service delivery, and improved overall service quality of branches. Thirdly, through activities such as applying for service highlights, and the release of outstanding service cases, the Bank deeply explored the connotation of service-oriented brand. In 2024, the Bank was granted the 18th "Five Star Diamond Brand" award, the highest honor in the global service field, in recognition of its warm customer experience and outstanding customer service capabilities. The Bank was the only city commercial bank that had been granted such award for nine consecutive years.

17.3 Corporate Banking

The Bank's corporate business, with high-quality development as the original aspiration, and strengthening customer management as the center, operated at multiple levels on the customer side to create an industry-specific innovation model. It also made concerted efforts on the product side to improve the quality and efficiency of the Company's financial services; as for the asset side, its structure was optimized to lay the foundation for the Company's revenue growth and create a new situation for the high-quality development of the Company's business. During the Reporting Period, corporate banking realized operating income of RMB6.187 billion, accounting for 46.12% of the Company's operating income.

1. Corporate deposits

Continuously improving operation strategies, the liability business of the Company has been simultaneously improved in volume and quality. During the Reporting Period, the Bank anchored the expansion of accounts to improve quality, stabilized existing business and expanded new business. The scale of liabilities steadily grew and the structural transformation achieved remarkable results. Through precise marketing, smart scenarios and product bundling, the Bank gradually improved the online functions of the liability product. As at the end of the Reporting Period, the balance of corporate deposits (excluding accrued interest, the same below) was RMB212.153 billion, accounting for 49.11% of total deposits, representing an increase of RMB14.925 billion or 7.57% as compared with that at the end of last year. Specifically, the corporate demand deposits amounted to RMB83.070 billion, accounting for 39.16% of the balance of corporate deposits, and corporate time deposits amounted to RMB129.084 billion, accounting for 60.84% of the balance of corporate deposits. The effective cash management of contracted customer base contained 13,384 customers, representing a net increase of 6,620 or 97.87% as compared to the end of last year. During the Reporting Period, the total income from intermediary business of transaction banking business reached RMB243 million, representing a year-on-year increase of 25.80%.

17.4 Financial Market Business

The Bank's financial market segment adhered to the development concept of "expertise prioritized, stable operation, and technological empowerment", gave full play to the flexible and efficient inherent advantages of a regional bank corporation. Through the model of "investment banking + sales + market making", the Bank promoted underwriting through sales and market making, and promoted sales with trading and investment research, and comprehensively opened up the businesses of investment banking, sales, trading, research and custodianship. The Bank has formed a professional business line with proprietary investment and interbank business as the core while taking business innovation and risk control as the guarantee, meanwhile, which was equipped with a complete set of qualifications and licenses to occupy national competitiveness. During the Reporting Period, the Company's financial market business achieved operating income of RMB2.921 billion, accounting for 21.78% of the Company's operating income.

1. Proprietary investment

The Bank optimized its investment and trading strategies, achieving simultaneous growth in scale and profitability. During the Reporting Period, the Bank focused on "risk-based and efficiency-prioritized" while ensuring matching the liability and asset. Based on the principle of "strengthening strategy, deepening clientele, and optimizing empowerment", the Bank strengthened market research and judgment, made precise timing and flexible position adjustments to enhance the investment efficiency of its assets. In terms of investment and trading, the Bank adhered to the concept of prudent operation, actively studied the economic fundamentals and the direction of monetary policy of major domestic and overseas economies, and improved the framework for investment research and analysis. The Bank continued to strengthen the construction of its comprehensive market makers capability, and continuously to improve the standards of quotation and trading services.

The Bank adhered to the implementation of the national economic strategy orientation, focusing on the national industrial restructuring, and increasing credit bond investment in new dynamics and other corporate clients. Establishing a diversified business matrix that covers fund transactions, bond investments, interbank business and derivative services, the Bank provided regional real-economy enterprises with comprehensive financial services across the entire chain. As at the end of the Reporting Period, the proprietary investment (including accrued interest) of the Company amounted to RMB257.381 billion, representing an increase of RMB31.610 billion or 14.00% as compared with that at the end of last year, of which bond investment (including accrued interest) was RMB198.446 billion, representing an increase of RMB32.280 billion or 19.43% as compared with that at the end of last year; investments in public fund products reached RMB51.184 billion, representing an increase of RMB7.384 billion or 16.86% as compared with that at the end of last year; non-underlying investment assets (including accrued interest) amounted to RMB3.726 billion, representing a decrease of RMB7.153 billion or 65.75% as compared with that at the end of last year; and the value of other debt financing products (including accrued interest) was RMB3.890 billion, representing a decrease of RMB1.014 billion or 20.68% as compared with that at the end of last year.

2. Interbank business and asset custody

The Bank deepened its management of interbank liability structure and prudently controlled liability costs. Through forward-looking liability portfolio planning and differentiated pricing mechanisms, the Bank dynamically optimized the liability types and maturity profiles, simultaneously promoted the expansion of diversified liability channels and strengthened its market-oriented financing capabilities, realizing synergistic improvement in liability cost control and liquidity safety margins. The Bank focused on a tiered management strategy for interbank customer groups, refining comprehensive financial service solutions to drive growth in both core customer coverage and the depth of strategic partnerships. As at the end of the Reporting Period, the balance of the Bank's interbank certificates deposit issued was RMB82.540 billion, accounting for 60.98% of the Bank's interbank liabilities and 13.14% of the Bank's total liabilities. The balance of the Bank's RMB interbank deposits was RMB14.180 billion, accounting for 10.48% of the Bank's interbank liabilities and 2.26% of the Bank's total liabilities, among which the balance of interbank time deposits was RMB2.945 billion, accounting for 20.77%, and the balance of interbank demand deposits was RMB11.235 billion, accounting for 79.23%.

By deeply integrating group resources, the asset custody scale has achieved steady growth. The Bank's asset custody business seized the market development opportunities and continued to improve the "underwriting-investment-sales-custody" linkage mechanism, realizing rapid business growth. As at the end of the Reporting Period, the asset custody scale amounted to RMB145.012 billion, representing an increase of RMB132.141 billion as compared with that at the end of last year. The total number of custody products reached 420, covering public funds, wealth management products, brokerage fund management, fund-specific accounts, asset securitization, fund custody, and other types. The product spectrum has become increasingly diverse, with a reasonable and balanced product layout. The Bank positioned public securities investment fund held in custody as a strategic-level business and successfully launched 11 public fund products with a total custody scale of RMB32.561 billion, initially consolidating the foundation for business revenue. Fully utilizing the Group's synergistic advantages, each business segment has collaboratively developed interbank cooperation models and business expansion scenarios, leading to sustained growth in custody scale. It continuously strengthened the operational capabilities and risk prevention and control standards for various custody products to enhance the overall operational quality and efficiency. Relying on digital transformation to empower business development, it increased investment in financial technology and launched an institutional service platform - "BQD Custody" (青銀託管), providing customers with warm and efficient custody services. The professional custody capabilities and service standards have gained high recognition in the market.

3. Investment banking

Leveraging its professional advantages to achieve record-high results. The Bank actively leveraged its professional advantages in debt financing instruments underwriting business, strengthened integrated innovation and coordinated development, and created a comprehensive business model of "investment bank + commercial bank". In 2024, the issuance amount of the Bank's debt financing instruments was RMB98.223 billion with the underwriting quota being RMB48.056 billion, representing an increase of RMB17.987 billion or 59.82% as compared with the same period of last year. During the Reporting Period, the Bank's underwriting performance for debt financing instruments reached a new high. The underwriting size of full-calibre debt financing instruments ranked second in Shandong Province, while the underwriting size of medium- and long-term debt financing instruments ranked first in the province. The number of underwriting products and the number of issuers served also ranked first in Shandong Province. The Bank successfully issued the first credit-linked note by a financial institution in Shandong Province and the first cross-border target debt creditlinked note (CLN) established by a bank nationwide; the Bank was awarded the "Best Inter-bank Debt Financing Instrument Underwriter" and the "Bond Underwriting Rapid Progress Award" by Wind Information.

17.5 Channel Construction

1. Offline channels

The Bank's business outlets are based in Oingdao, expanding throughout Shandong Province. As at the end of the Reporting Period, the Bank had 200 business outlets, including 16 branches, in 15 cities of Shandong Province, including Qingdao, Jinan, Dongving, Weihai, Zibo, Dezhou, Zaozhuang, Yantai, Binzhou, Weifang, Linyi, Jining, Tai'an, Heze and Rizhao. The Company has implemented the "Solid Foundation Initiative" and data governance special initiative, constructed data quality control process and monitoring mechanism, and realized the full coverage of data service system; it has built four types of standardized model markets, namely, general model, risk marketplace, historical data query and external data, completed a "digital post-loan system" covering 16 areas and 65 key risk indicators, and released a visual management tool covering nine major topics and more than 180 key indicators, so as to enhance the end-to-end risk and control capability during and after the incident.

The Company enriched and improved the Company's financial service system. Key projects such as "online corporate business halls Phase II" were put into operation and the construction of the smart credit project groups were started; the Company has innovatively launched online financing products such as "Ticket Chain e-Loan" (票鏈 e貸) and "Smart Manufacturing e-Loan" (智造e貸), which enriched the digital service ecosystem and online product line; it has established an online loan rapid connection mechanism, standardized the connection between securities companies and enterprises, enhancing the digital operation efficiency of the corporate business.

The Company continued to increase its investment in digital innovation for retail business. The Company published Individual Mobile Bank 8.11, self-developed the "BQD ZhiLing – Mobile Customer Experience Monitoring System" (青銀智聆一移動端客戶體驗監測系統), and the mobile banking launched new functions such as business loans and commercial pension. The Bank innovatively launched the "Happiness Train" (幸福列車), a fast-moving marketing wealth management app, enhancing the financial service experience for retail customers.

The Company comprehensively enhanced the intelligence level of risk management. "New Capital Regulations Project" was put into operation to effectively improve the level of capital management and risk management; the external monitoring systems such as the "Provincial Public Security Department Funds Early Warning and Joint Defense Platform" (省公安廳資金預警聯防平台) and the "Financial Anti-fraud Integration Platform of People's Bank of China" (人民銀行金融反詐一體化平台) were accessed, and a number of systems were put into operation, such as the "Project of Graded and Classified Management of Accounts" and the "End-to-end Integrated Risk Monitoring and Risk Account Rule Optimization Project", etc.

3. Deepen information technology risk management and build a strong defense line for digital transformation

The Company continuously strengthened its information technology risk management system, enhanced infrastructure capabilities, optimized the "two cities and four centers" layout, put into operation the off-site disaster recovery center in Jinan, and initiated the comprehensive information innovation construction of its data centers; the Bank has achieved full coverage of emergency plans for critical business systems and promoted the application of distributed multi-active architecture; it established an accounting risk inspection mechanism, and strengthened network security management and regular risk monitoring, completed API unauthorized access checks, terminal sensitive data scanning, and risk assessments for systems such as mobile banking. During the Reporting Period, the Company achieved zero errors in secure operations and zero points lost in network protection during major events throughout the year, with all information systems across the whole Bank operating smoothly.

4. Explore the high ground of cutting-edge technologies and ignite a new engine for digital transformation

The Company comprehensively deepened its research into cutting-edge technologies, accelerated the construction of digital financial infrastructure, such as digital marketing platforms, intelligent identification centers, virtual digital humans, intelligent assistants, etc., and actively explored the application of generative artificial intelligence in multiple scenarios; it adopted the model of "external acquisition and internalization, self-built reinforcement, independent research and development, and standardized products" to stimulate innovation vitality; it has built a system of professional competence in science and technology that is "driven by both management and technology", put into operation the "Information Technology Integrated Management Platform"; and independently developed platforms for business management, operations and maintenance management, and cloud-native DevOps, so as to explore the digital transformation of technology management.

During the Reporting Period, the Company's independently developed "BQD ZhiLing – Mobile Customer Experience Monitoring System" was awarded the third prize in the FinTech Development Award by the People's Bank of China; the "Green Finance Business Management System" was awarded the first prize in the Financial Innovation Awards, and won the top prize of Digital Finance Innovation for four consecutive years; a number of projects, including the "Intelligent Financial Management Platform" and "BQD Inclusive e-Finance", have received major industry awards; four systems, including the "Testing Workbench", have obtained software copyright registration certificates.

18. STRUCTURED ENTITIES CONTROLLED BY THE COMPANY

The structured entities controlled by the Company include certain asset-backed securities initiated by the Company and certain asset management plans invested by the Company. As the Company has power over such structured entities to enjoy variable returns by participating in relevant activities, and has the ability to use its power over such structured entities to affect the variable returns, the Company has control over such structured entities. The Company does not provide financial support to the structured entities it controls. For details, please refer to "48(4) Consolidated Structured Entities under Notes to the Financial Statements" of this results announcement.

19. RISK MANAGEMENT

19.1 Comprehensive Risk Management

The Company has established a comprehensive risk management organizational structure in which the Board of Directors assumes the ultimate responsibility, the Board of Supervisors exercises effective supervision, and the senior management directly leads. Such organizational structure is supported by the Bank's Comprehensive Risk Management Committee, with Risk Management Department taking the lead in comprehensive risk management and each risk management department responsible for single types of risk management and control. Each business line management department, branch, sub-branch and affiliated institutions closely cooperates and collaborates, and the internal audit department independently audits, covering all risks, institutions, customers, businesses and processes, forming a comprehensive risk management operation mechanism that is multi-level, interconnected, and effective checks and balances.

During the Reporting Period, the types of risks faced by the Company's operations include credit risk, market risk (including interest rate risk of banking book), liquidity risk, operational risk, reputational risk, strategic risk, information technology risk, country risk, compliance risk, money laundering risk, outsourcing risk, data risk, environmental and social risk and other risks required by external regulatory authorities or the Company's Board of Directors.

19.2 Credit Risk Management

Credit risk refers to the risk arising from the failure by the obligating party or a party concerned to meet its obligations in accordance with agreed upon terms. The Company's credit risks are mainly derived from loan portfolios, investment portfolios, guarantees and commitments, etc. The management of credit risk is centralised and led by the Comprehensive Risk Management Committee of the Bank. Each business unit is required to implement credit policies and procedures, and is responsible for the quality and performance of its credit portfolio and for monitoring and controlling all credit risks in its credit portfolios (including asset portfolios approved by the Bank).

During the Reporting Period, the Company adhered to a prudent and sound risk appetite, and was committed to the establishment of a credit risk management system with comprehensive functions, controlled and balanced risks, a streamlined structure and high efficiency as well as well-delegated authority and duties. By taking the following measures, the Company achieved continuous optimization of various asset quality indicators and continuous improvement of its credit risk management capability, thus ensuring the Bank's high-quality development. The Company has adopted the following key measures to strengthen its credit risk management:

- 1. Continued to optimize a comprehensive risk monitoring system. Focusing on the construction of the risk monitoring system and monitoring arrangements at group level, the Bank added a number of monitoring areas (including the private sector and real estate) on the basis of the original monitoring areas and in accordance with the overall risk situation in 2024, so as to gradually realize effective identification, measurement, monitoring and control of the group's risk situation.
- 2. Continued to optimize credit asset quality. The Company actively promoted the steady implementation of three new regulatory regulations such as the new capital regulations, classification regulations and impairment regulations, gradually launched the supporting rules and ancillary systems to comprehensively upgrading the digital capabilities; implemented the refined dynamic management of various asset quality indicators, strengthened pre-assessment and analysis of the trends of risk migrations and changes, and enhanced pre-processing capabilities for risk signals; strengthened the management of maturing loans and overdue loans, strengthened the disposal of non-performing assets. The loans that were overdue more than 60 days continued to be managed as non-performing loans ratio in order to maintain a downward trend and achieved the management and control target.
- 3. Continued to strengthen risk management and control in key areas. The Bank continued to consolidate the foundation of the "Triple Loan Inspections", strictly implemented the "post-credit granting inspection" mechanism, implemented differentiated post-loan management measures, and improved the accuracy and effectiveness of post-loan management. The Bank established a long-term mechanism for risk investigation, strengthened risk monitoring in key areas and key customers, and promptly tracked and implemented rectifications once problems were discovered. Centering on the new triennial strategic plan and focusing on the transformation of the manufacturing industry while optimizing collaboration and strengthening driving force, the adjustments of industry approval structures were vigorously promoted, so as to comprehensively build a manufacturing development system.

- 4. Continued to strengthen post-credit risk management. According to "Measures for Post-credit Management of Bank of Qingdao's Credit Assets", the Bank shall carry out the implementation of post-credit management, including the construction of supporting systems and direct inspection and monitoring. The Bank has continued to optimize its post-credit management mechanism from the perspectives of management system, inspection framework, staffing, and supporting systems, so as to improve the Bank's credit risk management and business compliance standards.
- 5. Continued to improve the digital credit management. In 2024, the Bank launched its comprehensive smart credit system project. As the core of the Bank's credit business system, the credit system carries the entire credit business process from due diligence, rating, review and approval to lending, post-loan management and asset disposal, serving as a key system for credit business to maintain competitiveness, achieve risk prevention and control, as well as meet customers' needs. The launch of the internal rating, risk cockpit and smart post-loan systems of the smart credit system was completed throughout the year, which further strengthened the Bank's credit system's risk quantification and the visualization analysis capabilities of data of head office and branches.

By taking the said measures, the Company further improved the quality of its assets and effectively controlled credit risks during the Reporting Period.

19.3 Liquidity Risk Management

Liquidity risk refers to the risk that the Company is unable to obtain adequate capital in a timely manner and at reasonable cost to repay matured debts, perform other payment obligations or meet other capital needs for normal business. The Company attaches great importance to the construction of liquidity risk management, and has established a relatively complete liquidity risk management system that meets the current development needs based on the principles of comprehensiveness, prudence, and perspectiveness. The liquidity risk management policies and systems comply with regulatory requirements and the Company's own management needs.

The objective of the Company's liquidity risk management is to ensure that the Company has sufficient cash flows to meet payment obligations and fund business operations on a timely basis. In accordance with its development strategies, the Company continuously improves its liquidity risk management level and dynamically adjusts its liquidity risk management strategies to ensure that the liquidity risk is within the safe range.

The Company has established a liquidity risk management governance structure according to the principle of the segregation of the formulation, implementation and supervision of its liquidity risk management policies, specifying the roles, responsibilities and reporting lines of the Board, the Board of Supervisors, senior management, special committees and the relevant departments of the Bank in liquidity risk management in order to enhance the effectiveness thereof. The Company has established a prudent risk appetite in respect of liquidity risks, which better suits the current development stage of the Company.

The Company measures, monitors, and identifies liquidity risks from the perspectives of short-term provision and maturity structure of assets and liabilities, continuously supervises the status of high-quality liquid assets and the compliance with liquidity risk limits, and conducts regular stress tests and emergency drills.

The Company holds a sufficient amount of liquid assets to ensure the satisfaction of its liquidity needs and at the same time has sufficient capital to meet the unexpected payment needs that may arise from daily operation. Furthermore, the Company's internal control system for liquidity risk management is sound and compliant. The Company regularly conducts internal special audits on liquidity risks and prepares and submits an independent audit report to the Board.

The Company pays close attention to the market liquidity trends and regulatory policy changes, and deploys in advance and dynamically adjusts its liquidity management strategy based on the structure of assets and liabilities to ensure that its liquidity risk is within a reasonable and controllable range. During the Reporting Period, the Company focused on strengthening its liquidity risk management in the following areas:

- 1. Moderately increased investment in qualified high-quality bonds and maintained sufficient liquidity reserves;
- 2. Actively expanded the sources of liabilities and promoted the steady growth of deposits, with the stability of liabilities enhanced;
- 3. Conducted daily liquidity risk management, strengthened market analysis and study, and improved the capital utilization efficiency on the basis of ensuring the safety of liquidity;
- 4. Fully considered various macro and micro factors that may affect the Company's liquidity, and improved stress test procedures and conducted regular stress tests in light of changes in the external operating environment, regulatory requirements, the Company's business characteristics and complexity;
- 5. Revised the relevant administrative measures for liquidity risk management to further standardize the functional division of relevant business departments and Senior Management Committees, clarified the accountability mechanisms and risk assessment procedures for business innovation, integrated the liquidity risk early warning system, and enhanced the content of limit management and contingency plans.

As at the end of the Reporting Period, the Company's liquidity coverage ratio and net stable funding ratio are presented below.

Unit: RMB'000

Item of liquidity coverage ratio	31 December 2024	31 December 2023
Qualified and high-quality current assets	95,465,058	75,270,402
Net cash outflows in next 30 days	47,023,000	47,606,972
Liquidity coverage ratio (%)	203.02	158.11

Note: Pursuant to the "Measures for Liquidity Risk Management of Commercial Banks", the liquidity coverage ratio of commercial banks shall not be lower than 100%.

	31 De	cember 2024	30 Se ₁	otember 2024
	The		The	
Item of net stable funding ratio	Company	The Bank	Company	The Bank
Available stable funding	424,164,612	417,536,445	419,235,038	414,202,224
Required stable funding	352,570,107	328,907,881	342,817,507	321,915,538
Net stable funding ratio (%)	120.31	126.95	122.29	128.67

Note: Pursuant to the "Measures for Liquidity Risk Management of Commercial Banks", the net stable funding ratio of commercial banks shall not be lower than 100%.

For more information on the Company's liquidity risk management, refer to "45(3) Liquidity Risk under Notes to the Financial Statements" of this results announcement.

19.4 Market Risk Management

Market risk refers to the risk of loss in commercial banks' on-balance sheet and off-balance sheet operations due to unfavorable changes in market prices (interest rates, exchange rates, stock prices and commodity prices). Market risks affecting the Company's services are dominated by interest rate risks and exchange rate risks, including the trading books and banking books. The Company has established a complete and reliable market risk management system that is compatible with the nature, scale and complexity of the business. The Company's sound and compliant market risk management internal control system defines the responsibilities of, and reporting requirements on, the Board, senior management and various departments under the market risk governance structure, clarifies the market risk management policy and identification, measurement, monitoring and control procedures, and makes clear market risk reporting, information disclosure, emergency response and market risk capital measurement procedures and requirements. The Company has a well-established management system for market risk indicators limits and conducts special internal market risk audits regularly, reports market risk management to senior management and the Board, and prepares independent reports.

19.4.1 Analysis of interest rate risks

The Company distinguishes banking books and trading books according to the regulations of the regulators and traditional banking management practices and adopts market risk identification, measurement, monitoring and control measures based on the different nature and characteristics of banking books and trading books.

Interest rate risk of the Company's trading books are mainly measured and monitored with methods such as sensitivity analysis, stress tests and scenario simulation. During the Reporting Period, the Company closely followed regulatory requirements and financial market trends, continued to improve the trading book market risk management system, and gradually strengthened its market risk identification, measurement and monitoring capabilities. Firstly, it improved the market risk management policy and system, strictly implemented the management requirements of new capital regulations, and enhanced various market risk systems and methods such as book division, limit management, and stress testing. Secondly, it continued to strengthen market risk monitoring and reporting and dynamically adjust the market risk limit management system based on business changes to ensure that interest rate risks in trading books were controllable. Thirdly, it continued to improve market risk measurement capabilities and enhanced the Company's risk measurement and analysis capabilities by building a new generation of market risk management systems. Fourthly, it measured market risk capital in strict accordance with the requirements of new capital regulations and new standard laws.

Compared with trading books, the Bank's other services are recorded in banking books. The Company quantitatively evaluates the impact of interest rate changes on the Company's net interest income and economic value for different currencies and different sources of risks with methods such as repricing gap analysis, net interest income analysis, economic value analysis and stress tests, and prepares reports based on the analysis results to propose management suggestions and the service adjustment strategy.

During the Reporting Period, the Company optimized and adjusted its annual market risk limit management system based on its market risk preferences and annual operating objectives, and conducted dynamic monitoring as required to continuously improve the level of interest rate risk management. Firstly, the Company paid close attention to external policy trends and changes in the interest rate environment to monitor and analyze changes in various interest rate risks. Secondly, it proactively adjusted its business pricing strategy and its allocation strategy of asset-liability structure, optimized internal and external pricing strategies, and further refined the interest rate risk management of the corporate banking book to ensure that rate risks of the banking book were controllable to realize growth in net interest income.

The Company uses sensitivity analysis to measure the potential impact of changes in interest rates on the Company's net interest income and equity. The following table sets forth the sensitivity analysis results of the Company's net interest income and equity to possible interest rate changes with other variables remaining constant. The impact on net interest income refers to the impact of certain interest rate changes on the net interest income generated by financial assets and liabilities held at the end of the period that are expected to undergo interest rate repricing within one year. The impact on equity includes the impact of certain interest rate changes on equity attributable to the revaluation of fixed interest rate of financial assets measured at fair value through other comprehensive income held at the end of the period.

Unit: RMB'000

31 December 2024	31 December 2023
(Decrease)/Increase	(Decrease)/Increase
(961,661)	(731,924)
961,661	731,924
	Unit: RMB'000
31 December 2024	31 December 2023
(Decrease)/Increase	(Decrease)/Increase
(1,895,430)	(2,301,467)
2,009,853	2,465,394
	(Decrease)/Increase (961,661) 961,661 31 December 2024 (Decrease)/Increase

The above sensitivity analysis is based on the fact of assets and liabilities having a static interest rate risk structure.

The above analysis reflects the impact of repricing of the Company's assets and liabilities on the Company's annualized calculation of net interest income and equity, mainly based on the following assumptions:

1. Regardless of subsequent changes after the date of the statement of financial position, the analysis is based on the static gap at the date of the statement of financial position;

- 2. In measuring the effect of changes in interest rates on net interest income, all assets and liabilities that are repriced or matured within three months, after three months but within one year, or already matured are assumed to be repriced or matured at the beginning of the respective periods;
- 3. Interest rates for deposits with the central bank and demand deposits placed and taken are remain unchanged;
- 4. There is a parallel shift in the yield curve and in interest rates;
- 5. There are no other changes to the assets and liabilities portfolio and all positions will be retained and rolled over upon maturity;
- 6. Other variables (including exchange rates) remain unchanged;
- 7. No consideration of impact on customers' behavior, market price and off-balance sheet business resulting from interest rate changes.

The analysis does not take into account the effect of risk management measures taken by management. The actual changes in the Company's net interest income and equity resulting from changes in interest rates may differ from the results of the sensitivity analysis based on the above assumptions.

19.4.3 Analysis of exchange rate risk

The Company's exchange rate risks mainly arise from mismatched currencies in non-RMB assets and liabilities. The Company controls the exchange rate risks to be acceptable to the Company by strictly controlling risk exposures. The Company's exchange rate risk measurement and analysis methods mainly include foreign exchange exposure analysis, scenario simulation analysis and stress tests. During the Reporting Period, the Company paid close attention to exchange rate trends, proactively analyzed the impact of exchange rate changes based on the domestic and foreign macroeconomic situation, and proposed an asset-liability optimization plan. Given the prudent foreign exchange risk appetite, as of the end of the Reporting Period, the scale of the Company's foreign exchange risk exposure has no significant change, and the exchange rate risk level was controllable.

The Company uses sensitivity analysis to measure the possible impact of exchange rate changes on the Company's net profit and equity. The following table sets forth the results of the analysis of exchange rate sensitivity based on the current assets and liabilities on 31 December 2024 and 31 December 2023.

Unit: RMB'000

	31 December 2024	31 December 20	023
Item	Increase/(Decrease)	Increase/(Decrea	ase)
Change in annualized net profit and			
equity			
Foreign exchange rate increase by 100			
bps	91		4
Foreign exchange rate decrease by 100			
bps	(91)		(4)

The above sensitivity analysis is based on a static foreign exchange exposure profile of assets and liabilities and certain simplified assumptions. The analysis is based on the following assumptions:

- 1. the foreign exchange sensitivity is the gain or loss recognised as a result of 100 basis points fluctuation in the foreign currency exchange rates against RMB (central parity rate) at the closing on the reporting date;
- 2. the fluctuation of exchange rates by 100 basis points at the date of the statement of financial position is based on the anticipated exchange rates movement over the next year from the date of the statement of financial position;

- 3. the exchange rates against RMB for all foreign currencies change in the same direction simultaneously;
- 4. since the Company's assets and liabilities in other foreign currencies (excluding in USD) are not significant in proportion to the total assets and total liabilities, the possible impact of other foreign currencies on the Company's net profit and equity is calculated at the amount converted into USD in the above sensitivity analysis;
- 5. the foreign exchange exposures calculated include both spot foreign exchange exposures, forward foreign exchange exposures and options, and all positions will be retained and rolled over upon maturity;
- 6. other variables (including interest rates) remain unchanged;
- 7. no consideration of impact on customers' behavior and market price resulting from exchange rate changes.

The analysis does not take into account the effect of risk management measures taken by management. Due to the assumptions adopted, actual changes in the Company's gain or loss and equity resulting from changes in foreign exchange rates may differ from the results of this sensitivity analysis.

19.5 Operational Risk Management

Operational risk refers to the risk of loss arising from problematic internal procedures, employees, information technology systems, and external events. The Board regards operational risk as one of the major risks faced by the Company and assumes the ultimate responsibility for operational risk management. The senior management assumes the responsibility for the implementation of operational risk management.

During the Reporting Period, the Company focused on strengthening operational risk management in the following aspects: firstly, it established an operational risk management system framework, revised the Operational Risk Management Policy of Bank of Qingdao Co., Ltd., formulated a supporting specialized system for operational risk management, to improve the operational risk management system; secondly, it improved operational risk management tools, established unified operational risk management processes and methods, to promote the implementation and application of operational risk management tools at the bank level; thirdly, it launched the operational risk and internal control compliance management system to comprehensively improve the Bank's digital intelligence level of operational risk management; fourthly, it strengthened operational risk management training and publicity, carried out various forms of special training on operational risk management, to effectively improve the Bank's awareness and level of operational risk management.

19.6 Compliance Risk Management

Compliance risk refers to the possibility that financial institutions or their employees will bear criminal, administrative, and civil legal liabilities, property losses, reputation losses, and other negative impacts due to violations of compliance regulations with respect to financial institutions' operating and management behaviors or employee performance behaviors. The Board of Directors assumes the ultimate responsibility for the effectiveness of compliance management, and senior management is responsible for implementing compliance management goals.

During the Reporting Period, the Company aimed at compliance operations and continued to improve its compliance risk management and control capabilities on the premise of risk prevention, firstly, it continued to strengthen the management of internal control systems, paid attention to the actual needs of external regulatory policies and internal operation management, and continuously optimized the rationality and completeness of the system; secondly, it carried out internal control compliance inspections, effectively supervised the implementation of important projects, key measures, and major strategies, strengthened the rectification of problems, and improved the effectiveness of utilizing internal and external inspection results; thirdly, it established a collaborative working mechanism for intra-bank supervision, applied the joint meeting mechanism, connected various supervisory forces and resources, and built a "large-scale supervision" management system for Bank of Qingdao; fourthly, it promoted the construction of internal control and compliance culture, created an online publicity platform for compliance culture, published various compliance guidelines, risk warnings, training and education guidance on a regular basis, reinforced compliance awareness of all employees, and established the concept of value creation compliance across the Bank.

- 87 -

19.7 Money Laundering Risk Management

Money laundering risk refers to the risk that the Company faces when it may be used by money laundering activities in the course of conducting business and operating management. The Company has established a money laundering risk management structure with clear responsibilities, and continuously optimized management mechanisms such as policies, systems, execution, and supervision to improve the level of money laundering and terrorist financing risk management, and provide guarantees for the Company's stable operations.

During the Reporting Period, the Company actively fulfilled its anti-money laundering obligations and continuously improved the quality and effectiveness of money laundering risk management, firstly, it continued to improve the internal control system, closely followed the spirit of anti-money laundering laws and regulations, promptly revised the anti-money laundering internal control system, continued to optimize management processes, and implemented risk management and control measures; secondly, it strengthened the quality and efficiency of anti-money laundering monitoring, increased investment in science and technology, focused on new monitoring technical means, built an intelligent antimoney laundering monitoring system, and continued to improve the level of anti-money laundering monitoring; thirdly, it increased work execution management efforts, optimized the anti-money laundering work inspection model, promoted reform through inspection, improved awareness of proactive performance of duties, and consolidated the quality of work execution; fourthly, it strengthened theoretical education and risk warning, focused on job responsibilities and business practice, issued money laundering risk warnings, carried out various types of special training on money laundering risk management, and continuously improved the comprehensive capabilities of money laundering risk management.

19.8 Country Risk Management

Country risk refers to the risk that due to economic, political and social changes and events in a country or region, the debtor in that country or region is unable or refuses to pay the Company's debts, or make the Company's business presence in that country or region suffer losses, or make the Company suffer other losses.

Based on the scale and complexity of country risk exposure, the Company formulated the Country Risk Management Measures of Bank of Qingdao Co., Ltd., established a country risk assessment and rating system that effectively combines "external rating mapping + internal expert judgment", and set up "country risk exposure ratio of high-risk countries" to monitor the implementation of country risk preferences. During the Reporting Period, the Company had no country risk exposure in high-risk countries or significant country risk exposure. Country risk exposures were small in scale and low in complexity, and most of them were country risk exposures of financial institutions, with low country risks.

19.9 Reputational Risk Management

Reputational risk refers to the risk that the Company might be negatively evaluated by relevant stakeholders, the public and the media due to its operations and management, the behaviors of its employees or external incidents, which is detrimental to the brand value and normal operation of the Company, or, to the extent, affects the stability of the regional financial market as well as social stability.

Reputational risk management is an important part of the corporate governance and the overall risk management system of the Company, covering all activities, operations and businesses undertaken by the Company and its subsidiaries. The Company has established and formulated the reputational risk management rules and system by taking the initiatives to effectively prevent the reputational risk and coping with any incidents in relation to reputation, so as to reduce loss and negative impact to the greatest extent. During the Reporting Period, the Company strictly fulfilled the requirements of the "Rules on Reputational Risk Management of Banking and Insurance Institutions", and constantly enhanced its capability of managing reputational risk, on the one hand, by enhancing forward-looking management, the Company adhered to the reputational risk management philosophy of prevention comes first and strengthened inspection, early warning and prompting to reduce potential reputational risks at source; on the other hand, centering on various measures taken by the Company in order to actively fulfill its social responsibilities, the Company carried out promotion on the theme of supporting the real economy and protecting the rights and interests of consumers, so as to enhance its corporate image.

19.10 Information Technology Risk Management

Information technology risk refers to the uncertain impact on business continuity, customer information security and compliance that may be brought about by potential deficiencies in technical systems, network security, data management or external threats. The Company continuously identifies, evaluates and monitors information technology risks through the establishment of a comprehensive risk management system to ensure the security, stability and continuous operation of information systems.

The Company has established a comprehensive information technology risk management system, including a clear governance structure, strict policies and processes, advanced technological control measures, and regular emergency drills. The Company continued to deepen its technological internal control and compliance inspections, to strengthen risk identification and prevention, promoting proactive operations and maintenance, as well as establishing an accounting risk investigation mechanism to continuously improve operational risk management standards; the Bank continued to strengthen system availability management and optimize the layout of four-center data centers in the two areas. It has successfully completed the commissioning of off-site disaster recovery center in Jinan and achieved 100% coverage of emergency plans for important business systems; it also continued to promote the construction of special network security capabilities, and comprehensively ensured the safe and compliant operation of information systems by strengthening application security management, network monitoring and defense capabilities, and data security governance; moreover, the Bank was committed to enhancing the risk management level of its information technology outsourcing. To this end, it has established a sound technology outsourcing risk assessment system to ensure the quality and security of outsourcing services.

19.11 Data Risk Management

As the Company's business continues to evolve, the scale of its data assets is expanding, and the demand for systematic support of business data capabilities is increasing. While leveraging data to drive business development, the accompanying data risks such as data leakage and data misuse have become the types of risks that coexist with business development and will exist for a long time.

The Company attaches great importance to data risk management, strictly implements regulatory requirements, and continues to improve the construction of the data risk management system. During the Reporting Period, the Company clarified the promotion strategy of the group's data security work, and both parent and subsidiary companies collaborated to promote the implementation of data risk prevention and control measures, firstly, the Company improved the data security system, refined the group's data classification and grading and business-specific data security management system, clarified the responsibilities and strategies for data security protection throughout the data life cycle, and continuously strengthened the awareness of data risk responsibility; secondly, it strengthened the risk prevention and control of data processing activities, strictly implemented the security grading audit of business data extraction, strictly controlled data access rights, standardized the collection of source data in accordance with the law, strengthened the security management requirements for data processing activities with third-party organizations, and continuously strengthened the foundation of data risk management; thirdly, with the help of technical means to realize automated hierarchical identification of terminal sensitive data. By taking measures such as mobile storage device management and control and email data leakage risk monitoring, data life cycle security protection has been strengthened to prevent data leakage risks, and the Company's comprehensive ability in data risk management has been significantly enhanced.

20. PROSPECTS FOR THE FUTURE DEVELOPMENT OF THE COMPANY

20.1 Industry Landscape and Trend for the New Year

In 2025, there will be many positive factors in China's economic development. The central government has repeatedly emphasized that it will implement "more active and proactive macro policies", which released a positive signal to comprehensively strive for the economy. The proposal to "stabilize the real estate market and the stock market" indicates that macro policies will promote continuous improvement in the asset side and drive the real economy to stabilize and recover. With the implementation of more proactive incremental policies, it is expected that China's economy will bottom out and stabilize in 2025, the economic fundamentals will improve, and the bank credit investment environment will be better than last year. The more active fiscal policy and moderately relaxed monetary policy will bring new business opportunities to business development. The high-quality development of China and Shandong Province will provide broad business development space for Bank of Qingdao, which is "being headquartered in Qingdao with in-depth penetration in Shandong Province to radiate nationwide".

20.2 Development Guiding Ideology for the New Year

2025 is the last year both for the "14th Five-Year Plan", and the strategies of Bank of Qingdao. Under the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, Bank of Qingdao will strictly implement the spirit of the Economic and Financial Work Conference at central, provincial, and municipal level. Under the leadership of the Party Committee of the head office, and in accordance with the operating guiding ideology of "professional improvement, digital and intelligent empowerment, system optimization, and characteristic driving", the Bank will focus on high-quality development and work hard to ensure that the annual business plan will be fully achieved and the strategic plan will be successful completed.

Professional improvement: the Bank will continue to improve its professional operating capabilities such as product creation, business marketing, and comprehensive services to meet the diversified needs of customers. It will strengthen professional support roles such as risk management, assessment and financial management to drive the efficient and steady development of the Bank's operations. It will also enrich professional support forces such as technological support, operation management, and service guarantee to provide customers with efficient and convenient financial services.

Digital and intelligent empowerment: the Bank will adhere to the overall goal of giving priority to intelligence and mobile, systematically improve the Bank's technological research and development level, consolidate data quality, tap the value of data assets, improve guarantee mechanisms, and enhance the effect of technological empowerment. It will tilt resources to strengthen the application of intelligent technology and improve the digital and intelligence level of the four major platforms of marketing, risk control, operations, and collaborative office.

System optimization: the Bank will improve its product system, increase product innovation, and polish the details of existing products; upgrade its marketing system, empower digital and intelligence, and integrate online and offline to improve customer operating efficiency. It will optimize the risk control system and improve the existing system framework to strengthen weakness in risk management. The Bank will also strengthen the support and guarantee system, refine operations and ensure stable operation of the business; form an agile team to improve the quality and efficiency of industry-technology integration; and optimize business processes to improve the operating efficiency of the Bank.

Characteristic driving: the Bank will carry out differentiated operations around the "eight major tracks" (八大賽道), focusing on scenarios such as agriculture-benefit, communities, and elderly care to form differentiated approaches, and consolidate and enhance license advantages such as investment banking, wealth management, and financial leasing. It will establish advantages in technology, green, ocean, integrated operations, etc., create brands in warm services, charity, etc., so as to form business characteristics with social influence.

20.3 Main Work Measures for the New Year

In 2025, the Bank will continue to adhere to the concept of high-quality development and continue to promote the three strategic goals of "leading quality and efficiency, outstanding features and flexible mechanisms", attaching importance to the following nine aspects:

- 1. Retail business: leveraging digital and intelligence to deepen cultivation of customer base and laying a solid foundation for iterative development;
- 2. Corporate business: achieving differences improvement by consolidating the strength and making up for the weakness, as well as optimizing characteristics through innovation and efficiency creation;
- 3. Inclusive business: continuing to consolidate the foundation of business and developing "two complete and one comprehensive" (兩全一綜) professional development;
- 4. Financial market business: strengthening characteristics through transaction transformation, and improving quality and efficiency through coordinated development;
- 5. Subsidiaries: strengthening the Two Complements by deepening transformation and enhancing characteristics through coordinated development;
- 6. Technological support: deepening transformation by improving mechanisms and reaching a new level through digital and intelligent empowerment;
- 7. Risk management: continuing to strengthen the risk control system to help generate features across the Bank;
- 8. Internal control over operation: strengthening internal control through innovative operations and ensuring development through optimizing authorization;
- 9. Comprehensive management: promoting development through party building guidance, strengthening the team to lay a solid foundation, and solidly implementing various tasks.

21. RECEPTION OF ACTIVITIES SUCH AS SURVEYS, COMMUNICATIONS AND INTERVIEWS DURING THE REPORTING PERIOD

The contact telephone of the Bank's investor relations: +86 40066 96588 ext. 6

The official website of the Bank: http://www.qdccb.com/

Date of reception	Place of reception	Form of reception	Type of recipient	Recipient	Major discussion points and information provided	Index of the basic particulars of the survey
11 April 2024	Head office of the Bank	On-site survey and online interaction	Institutions	Ni Jun from GF Securities, Ma Xiangyun from Changjiang Securities, Ma Zhihao from Zhongtai Securities, Dai Tiantian from China Merchants Securities, Zhou Yuan from Zheshang Securities, Ding Huangshi from Kaiyuan Securities, Wang Xinyu from China Securities, Zhao Chenyang from Everbright Securities, Pu Jiayi from Huatai Securities, Lu Jiaoyang from CICC, Ni Anfeng from Guosheng Securities, and other investors who participated in this performance conference through live webcast	Exchanges on the 2023 performance and operating conditions of the Bank and the Bank provided relevant presentations	Please refer to the Investor Relations Activity Record Form and its attachments published by the Bank on CNINFO website (http://www.cninfo.com.cn/) dated 11 April 2024

SECTION 4 OTHER EVENTS

4.1 Use of Proceeds Raised

Please refer to "13. Investment Analysis" in "SECTION 3 MANAGEMENT DISCUSSION AND ANALYSIS" of this results announcement.

4.2 Corporate Governance Code

During the Reporting Period, the Bank strictly complied with the code provisions set out in the Corporate Governance Code as set out in Appendix C1 to the Rules Governing the Listing of Securities on the Hong Kong Stock Exchange (the "Listing Rules"), and, where appropriate, adopted the recommended best practices therein.

4.3 Securities Transactions by Directors and Supervisors

The Bank has adopted the required standard in the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") as set out in Appendix C3 to the Listing Rules as the code of conduct regarding securities transactions by directors and supervisors of the Bank.

Having made enquiries to the directors and supervisors, the Bank has confirmed that they had complied with the above Model Code during the Reporting Period regarding securities transactions on H shares of the Bank.

4.4 Changes in Directors, Supervisors and Senior Management

The directors of the Bank are nominated by the Board and elected in accordance with the qualifications of directors and the election procedures as specified in the Articles of Association of the Bank. The shareholder supervisor and external supervisors are nominated by the board of supervisors, and the employee supervisors are nominated by the labor union's committee, and all of such supervisors are elected in accordance with the election procedures as specified in the Articles of Association of the Bank.

As of the date of publication of this results announcement, changes in directors, supervisors and senior management of the Bank are shown in the following table:

Name	Position held	Type of change	Date of change	Reason of change
Marco MUSSITA	Former non-executive director	Resigned	31 May 2024	Expired term of the eighth session of the Board
Giamberto GIRALDO	Non-executive director	Newly elected	15 August 2024	-
Fan Xuejun	Independent non- executive director	Newly elected	15 August 2024	-
Fang Qiaoling	Former independent non-executive director	Resigned or	15 August 2024	Due to serving as an independent non-executive director of the Bank for almost 6 consecutive years and according to the provisions of laws and regulations on the term of office of independent non-executive directors
Liu Wenjia	Employee supervisor	Newly elected	31 May 2024	_
Meng Xianzheng	Former employee supervisor	Resigned	31 May 2024	Expired term of the eighth session of the Board of Supervisors
Yang Fengjiang	Former employee supervisor	Resigned	22 August 2024	Retired as he had attained the retirement age
Hao Xianjing	Former external supervisor	Resigned	29 November 2024	Resigned due to his personal career planning

Note: The date of change of newly elected personnel listed in the above table refers to the date when their qualifications were approved by the banking regulatory authority.

Mr. Giamberto GIRALDO and Mr. Fan Xuejun confirmed that they had obtained the legal opinions specified in Rule 3.09D of the Listing Rules on 31 May 2024 (before the qualifications were approved by the Qingdao Bureau National Financial Regulatory Administration (國家金融監督管理總局青島監管局)) and understood their responsibilities as directors of the Bank.

As of the date of publication of this results announcement, save for the above, there were no other changes in the directors, supervisors and senior management of the Bank.

4.5 Profits and Dividends

The Company's profit for the year ended 31 December 2024 and the Company's financial position as at the same date are set out in the section headed Financial Statements of this results announcement.

- 1. Pursuant to the relevant resolutions considered and passed at the 2023 annual general meeting of the Bank on 31 May 2024, the Bank distributed to holders of A shares and holders of H shares whose names appear on the register of members of the Bank at the close of business on their respective share registration date, dividends in cash for 2023 in an aggregate amount of RMB931 million (tax inclusive), according to the dividend distribution plan to distribute a cash dividend of RMB0.16 per share (tax inclusive) on 20 June 2024.
- 2. The Board has proposed to pay a final dividend in cash of RMB1.60 per 10 shares (tax inclusive) for the year ended 31 December 2024 to all ordinary shareholders of the Bank. The total cash dividends will be calculated based on the total number of the share capital as at the record date of the dividend distribution. The dividend distribution plan will be submitted to the 2024 annual general meeting of the Bank (the "2024 AGM") for consideration. In 2024, there were no bonus shares nor any conversion of capital reserve into share capital by the Bank.

If the proposal is approved by the 2024 AGM, the dividend will be distributed to holders of A shares and holders of H shares whose names appear on the register of members of the Bank at the close of business on their respective record date. The proposed dividends mentioned above will be denominated in RMB. Dividends to holders of A shares shall be paid in RMB, and dividends to holders of H shares shall be paid in Hong Kong dollars. The applicable exchange rate for dividends payable in Hong Kong dollars shall be the average of the central parity rates of RMB in the interbank foreign exchange market of the five business days preceding the date of declaration of such dividends at the 2024 AGM (including the date of the 2024 AGM to be held) as announced by the People's Bank of China. In order to determine the holders of H shares who are entitled to receive the 2024 final dividend, the register of members of the Bank will be closed from Tuesday, 3 June 2025 to Saturday, 7 June 2025 (both days inclusive), during such period no transfer of H shares will be registered. In order to be entitled to the 2024 final dividend distribution, holders of H shares of the Bank who have not registered the related transfer documents are required to lodge the transfer documents together with the relevant share certificates with the Bank's H share registrar, Computershare Hong Kong Investor Services Limited at Shops 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong no later than 4:30 p.m. on Monday, 2 June 2025. Shareholders whose names appear on the register of members of the Bank on Saturday, 7 June 2025 are entitled to the final dividend distribution.

The Board proposed to pay the final dividends for 2024 on or before 25 July 2025. If there are any changes to the expected dividend payment date, an announcement will be published regarding such changes.

4.6 2024 AGM and Closure of Register of Members

The Bank's 2024 AGM is proposed to be held on Wednesday, 28 May 2025. In order to determine the list of holders of H shares who are entitled to attend and vote at the 2024 AGM, the H share register of members of the Bank will be closed from Thursday, 22 May 2025 to Wednesday, 28 May 2025 (both days inclusive), during such period no share transfer will be registered. Holders of H shares of the Bank who intend to attend and vote at the annual general meeting must lodge all the transfer documents accompanied by the relevant share certificates with the Bank's H share registrar, Computershare Hong Kong Investor Services Limited at Shops 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong no later than 4:30 p.m. on Wednesday, 21 May 2025.

4.7 Purchase, Sale or Redemption of Listed Securities

During the Reporting Period, the Company had not purchased, sold or redeemed any listed securities of the Company (including sale of treasury shares as ascribed under the Listing Rules). As of the end of the Reporting Period, the Bank did not hold any such treasury shares.

4.8 Changes in Accounting Policies and Accounting Estimates or Correction of Significant Accounting Errors

During the Reporting Period, there was no change in significant accounting policies, accounting estimates or correction of significant accounting errors of the Company.

4.9 Review of Annual Results

KPMG Huazhen LLP and KPMG audited the 2024 annual financial statements prepared by the Company in accordance with Accounting Standards for Business Enterprises and IFRS Accounting Standards, respectively, and issued unqualified auditor's reports. The Board and its audit committee have reviewed the Annual Results and the financial statements of the Company for the year ended 31 December 2024.

KPMG is Registered Public Interest Entity Auditor in accordance with the Financial Reporting Council Ordinance.

SECTION 5 INDEPENDENT AUDITOR'S REPORT

Independent auditor's report to the shareholders of Bank of Qingdao Co., Ltd.

(A joint stock company incorporated in the People's Republic of China (the "PRC") with limited liability)

Opinion

We have audited the consolidated financial statements of Bank of Qingdao Co., Ltd. (the "Bank") and its subsidiaries (the "Group") set out on pages 113 to 243, which comprise the consolidated statement of financial position as at 31 December 2024, the consolidated statement of profit or loss, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2024 and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards issued by the International Accounting Standards Board and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants issued by International Ethics Standards Board for Accountants ("IESBA Code") together with any ethical requirements that are relevant to our audit of the consolidated financial statements in the People's Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Loss allowances of loans and advances to customers and financial investments measured at amortised cost

Refer to the accounting policies in note 2(4), and note 19 and note 22 to the financial statements.

The Key Audit Matter

As at 31 December 2024, gross loans and advances to customers and accrued interest included for the purpose of expected credit loss assessment, as presented in the Group's consolidated statement of financial position, amounted to RMB341.563 billion, for which management recognized an impairment allowance of RMB9.347 billion; total financial investments measured at amortised cost and accrued interest included for the purpose of expected credit loss assessment amounted to RMB103.090 billion, for which management recognized an impairment allowance of RMB5.497 billion.

The Group uses the expected credit loss model to determinate loss allowances of financial assets in accordance with the IFRS 9, Financial Instruments.

The determination of loss allowances of loans and advances to customers and financial investments measured at amortised cost using the expected credit loss model is subject to the application of a number of key parameters and assumptions, including the credit risk staging, probability of default, loss given default, exposures at default and discount rates, adjustments for forward-looking information and other adjustment factors. Extensive management judgment is involved in the selection of those parameters and the application of the assumptions.

How the matter was addressed in our audit

Our audit procedures to assess loss allowances of loans and advances to customers and financial investments measured at amortised cost included the following:

- understanding and assessing the design, implementation and operating effectiveness of key internal controls of financial reporting over the approval, recording and monitoring of loans and advances to customers and financial investments measured at amortised cost, the credit risk staging process and the measurement of allowances for impairment.
- with the assistance of our internal financial risk management specialists, assessing the appropriateness of the expected credit loss model used by management in determining the loss allowances and the appropriateness of the key parameters and assumptions in the expected credit loss model, which included credit risk staging, probability of default, loss given default, exposure at default, adjustments for forward-looking information and other adjustments, and assessing the appropriateness of related key management judgment.

1. Loss allowances of loans and advances to customers and financial investments measured at amortised cost

Refer to the accounting policies in note 2(4), and note 19 and note 22 to the financial statements.

The Key Audit Matter

In particular, the determination of the loss allowances is heavily dependent on the external macro environment and the Group's internal credit risk management strategy. The expected credit losses for corporate loans and advances, financial investments measured at amortised cost are derived from estimates including the historical losses, internal and external credit grading and other adjustment factors. The expected credit losses for personal loans and advances are derived from estimates whereby management takes into consideration historical overdue data, the historical loss experience and other adjustment factors.

Management also exercises judgement in determining the quantum of loss given default based on a range of factors. These include the financial situation of the borrowers or the debtors, the security types, the recoverable amounts of collaterals, the seniority of the claims, and other repayment sources of the borrower or the debtor. Management refers to valuation reports of collaterals issued by qualified third party valuers and considers the influence of various factors including the market prices, locations and uses when assessing the value of property held a collateral. The enforceability, timing and means of realisation of collateral can also have an impact on the recoverable amount of a collateral.

How the matter was addressed in our audit

- for key parameters involving judgement, critically assessing input parameters by seeking evidence from external sources and comparing to the Group's internal records including historical loss experience and type of collaterals. As part of these procedures, we assessed management's revisions to estimates and input parameters by comparing with prior period and considered the consistency of judgement.
- comparing the macroeconomic forwardlooking information used in the model with market information to assess whether they were aligned with market and economic development.
- assessing the completeness and accuracy of data used in the expected credit loss model. For key internal data, we compared the total balance of list of the loans and advances and financial investments measured at amortised cost used by management to assess the allowances for impairment with the general ledger, to check the completeness of the data. We also selected samples to compare individual loan and advance and investment information with the underlying agreements and other related documentation, to check the accuracy of the data, and to check the accuracy of external data by comparing them with public resources.

1. Loss allowances of loans and advances to customers and financial investments measured at amortised cost

Refer to the accounting policies in note 2(4), and note 19 and note 22 to the financial statements.

The Key Audit Matter

We identified the loss allowances of loans and advances to customers and financial investments measured at amortised cost as a key audit matter because of the complexity of the inherent uncertainty and management judgment involved and because of its significance to the financial results and capital of the Group.

How the matter was addressed in our audit

- for key parameters used in the expected credit loss model which were derived from system-generated internal data, assessing the accuracy of input data by comparing the input data with original documents on a sample basis. In addition, we involved our IT specialists to assess the compilation logics of the overdue information of the loans and advances and financial investments measured at amortised cost and the system calculation of the internal credit grading of corporate customers for selected samples.
- evaluating the validity of management's assessment on whether the credit risk of the loan and advance or the financial investment measured at amortised cost has, or has not, increased significantly since initial recognition and whether the loan and advance or the financial investment is creditimpaired by selecting samples which we checked loan and advance and investment overdue information, making enquiries of the credit managers about the borrowers' or the debtors' business operations, checking their financial information and researching market information about their businesses, understanding the credit risk status of the borrower or the debtor, and assessing the reasonableness of credit risk staging. Our samples of the loan and advance or the financial investment measured at amortised cost selected for credit review focus on accounts with high risk characteristics, including industries, public information and credit quality of accounts.

1. Loss allowances of loans and advances to customers and financial investments measured at amortised cost

Refer to the accounting policies in note 2(4), and note 19 and note 22 to the financial statements.

The Key Audit Matter

How the matter was addressed in our audit

- evaluating the reasonableness of loss given default for selected samples of corporate loans and advances or financial investment measured at amortised cost that are credit-impaired, by checking the financial situation of the borrowers or the debtors, the security types, the seniority of the claims, the recoverable amount of collaterals, and other repayment sources of the borrower or the debtor. Evaluating management's assessment of the value of any property collateral for selected samples, by comparison with evaluation results based on the location, use of the property and market prices, or the prices of neighbouring properties. We also evaluated the timing and means of realisation of collateral, evaluated the forecast cash flows, assessed the viability of the Group's recovery plans; based on the above work, we selected samples and assessed the accuracy of calculation for the credit losses of loans and advances and financial investments measured at amortised cost by using the expected credit loss model.
- evaluating whether the presentation and disclosures in the consolidated financial statements in relation to loss allowances of loans and advances and financial investments measured at amortised cost meet the requirements of the prevailing accounting standards.

2. Assessment of fair value of financial instruments

Refer to the accounting policies in note 2(4), and note 46 to the financial statements.

The Key Audit Matter

Financial instruments carried at fair value account for a significant part of the Group's assets and liabilities. The effect of fair value adjustments of financial instruments may impact either the profit or loss or other comprehensive income. The Group mainly holds level 2 and level 3 financial instruments measured at fair value.

The valuation of financial instruments measured at fair value of the Group is based on a combination of market data and valuation models which often require a considerable number of inputs. As in the case of level 2 financial instruments measured at fair value, the inputs of valuation models are mainly observable data. As in the case of level 3 financial instruments measured at fair value, where such observable data is not readily available, estimates need to be developed which can involve significant management judgments.

We identified assessment of the fair value of financial instruments as a key audit matter because of the degree of complexity involved in the valuating certain financial instruments and the significant degree of judgment exercised by management in determining the inputs used in the valuation models.

How the matter was addressed in our audit

Our audit procedures to assess the fair value of level 2 and 3 financial instruments included the following:

- understanding and assessing the design, implementation and operating effectiveness of key internal controls of financial reporting over the valuation of financial instruments.
- evaluating the fair value of level 2 and level 3 financial instruments on sample basis, by evaluating the Group's valuation models, obtaining inputs independently and verifying inputs, comparing our valuation results with the Group's results, and engaging KPMG valuation specialists to conduct independent valuation.
- evaluating whether the presentation and disclosures in the consolidated financial statements in relation to fair value of financial instruments meet the requirements of the prevailing accounting standards.

3. Consolidation of structured entities

Refer to the accounting estimates in note 2(24), and note 48 to the financial statements.

The Key Audit Matter

Structured entities are generally created to achieve a narrow and well defined objective with restrictions around their ongoing activities. The Group may acquire or retain an ownership interest in, or act as a sponsor to, a structured entity through issuing a wealth management product, an asset management plan, a trust plan, an asset-backed security, a debt investment plan or an investment fund.

In determining whether the Group should consolidate a structured entity, management is required to consider the power it possesses, its exposure to variable returns, and its ability to use its power to affect returns. These factors are not purely quantitative and need to be considered collectively in the overall substance of the transactions.

How the matter was addressed in our audit

Our audit procedures to assess the consolidation of structured entities included the following:

- understanding and assessing the design, implementation and operating effectiveness of key internal controls of financial reporting over consolidation of structured entities.
- selecting significant structured entities of each key product type and performing the following procedures:
 - inspecting the related contracts, internal establishment documents and information disclosed to the investors to understand the purpose of the establishment of the structured entity and the involvement of the Group in the structured entity; and to evaluate management's judgement over whether the Group has the ability to exercise power over the structured entity;
 - inspecting the risk and reward structure of the structured entity, including any capital or return guarantee, provision of liquidity support, commission paid and distribution of the returns, to evaluate management's judgement as to the exposure, or rights, to variable returns from the Group's involvement in such an entity;

3. Consolidation of structured entities

Refer to the accounting estimates in note 2(24), and note 48 to the financial statements.

The Key Audit Matter

We identified the consolidation of structured entities as a key audit matter because of the complex nature of certain of these structured entities and the significant judgement exercised by management in the qualitative assessment of the terms and nature of each entity.

How the matter was addressed in our audit

- inspecting management's analyses of the structured entity including qualitative analyses and calculations of the magnitude and variability associated with the Group's economic interests in the structured entity to evaluate management's judgement over the Group's ability to affect its own returns from the structured entity;
- evaluating management's judgement over whether the structured entity should be consolidated or not
- evaluating whether the presentation and disclosures in the consolidated financial statements in relation to consolidation of structured entities meet the requirements of the prevailing accounting standards.

Information other than the consolidated financial statements and auditor's report thereon

The directors are responsible for the other information. The other information comprises all the information included in the annual report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated financial statements

The directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRS Accounting Standards and the disclosure requirements of the Hong Kong Companies Ordinance and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The directors are assisted by the Audit Committee in discharging their responsibilities for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Choi Ching Hin.

NOTES TO THE FINANCIAL STATEMENTS

(Expressed in thousands of Renminbi, unless otherwise stated)

1 BACKGROUND INFORMATION

Bank of Qingdao Co., Ltd. (the "Bank"), formerly known as Qingdao City Cooperative Bank Co., Ltd., is a joint-stock commercial bank established on 15 November 1996 with the approval of the People's Bank of China (the "PBOC") according to the notices Yin Fu [1996] No. 220 "Approval upon the Preparing of Qingdao City Cooperative Bank" and Yin Fu [1996] No.353 "Approval upon the Opening of Qingdao City Cooperative Bank".

The Bank changed its name from Qingdao City Cooperative Bank Co., Ltd. to Qingdao City Commercial Bank Co., Ltd. in 1998 according to Lu Yin Fu [1998] No. 76 issued by Shandong Branch of the PBOC. The Bank changed its name from Qingdao City Commercial Bank Co., Ltd. to Bank of Qingdao Co., Ltd. in 2008 according to Yin Jian Fu [2007] No.485 issued by the former China Banking Regulatory Commission (the "CBRC", the predecessor of the National Financial Regulatory Administration).

The Bank obtained its financial institution licence No. B0170H237020001 from the Qingdao Office of the former China Banking and Insurance Regulatory Commission (the "CBIRC"). The Bank obtained its business license with a unified social credit code 91370200264609602K from Qingdao Municipal Bureau of Administrative Services, and the registered office is located at Building No. 3, No. 6 Qinling Road, Laoshan District, Qingdao City, Shandong Province, the People's Republic of China (the "PRC"). In December 2015, the Bank's H-shares were listed on the Main Board of The Stock Exchange of Hong Kong Limited (Stock code: 3866). In January 2019, the Bank's A-shares were listed on Shenzhen Stock Exchange (Stock code: 002948). In January and February 2022, the Bank completed the A Share Rights Issue and H Share Rights Issue respectively. The share capital of the Bank increased to RMB5.820 billion after the completion of the above rights issue. The share capital of the Bank is RMB5.820 billion as at 31 December 2024.

The Bank has 16 branches, respectively in Jinan, Dongying, Weihai, Zibo, Dezhou, Zaozhuang, Yantai, Binzhou, Qingdao, Weifang, Linyi, Jining, Taian, Heze and Rizhao as at 31 December 2024. The principal activities of the Bank and its subsidiaries (collectively the "**Group**") are the provision of corporate and personal deposits, loans and advances, settlement, financial market business, financial leasing, wealth management and other services as approved by the regulatory authority. The background information of the subsidiaries is shown in Note 23. The Bank mainly operates in Shandong Province.

For the purpose of this report, Chinese Mainland excludes the Hong Kong Special Administrative Region of the PRC ("**Hong Kong**"), the Macau Special Administrative Region of the PRC ("**Macau**") and Taiwan region.

2 MATERIAL ACCOUNTING POLICY INFORMATION

(1) Statement of compliance and basis of preparation

The financial statements have been prepared in accordance with IFRS Accounting Standards and related interpretations, issued by the International Accounting Standards Board, as well as with the disclosure requirements of the Hong Kong Companies Ordinance. The financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited.

The financial statements are presented in Renminbi ("RMB"), rounded to the nearest thousands, which is the functional currency of the Group.

The preparation of the financial statements in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and underlying assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for judgements on the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision and future years if the revision affects both current and future years. Judgements that have a significant effect on the financial statements and estimates with a significant risk of material adjustments in the subsequent period are discussed in Note 2(24).

The measurement basis used in the preparation of financial statements is historical cost, with the exception of certain financial assets and financial liabilities, which are measured at fair value, as stated in Note 2(4).

(2) Translation of foreign currencies

When the Group receives capital in foreign currencies from investors, the capital is translated to RMB at the spot exchange rates ruling at the date of receipt. Other foreign currency transactions are, on initial recognition, translated to RMB at the spot exchange rates or the rates that approximate the spot exchange rates ruling at the transaction dates.

A spot exchange rate is quoted by the PBOC, the State Administration of Foreign Exchange (the "SAFE"), or a cross rate determined based on quoted exchange rates. A rate that approximates the spot exchange rate is a rate determined under a systematic and rational method, such as the average exchange rate of the current period.

Monetary assets and liabilities denominated in foreign currencies are translated to RMB at the spot exchange rates ruling at the end of the reporting period. Changes in the fair value of monetary assets denominated in foreign currency classified as financial investments at fair value through other comprehensive income are analysed between translation differences resulting from changes in the amortised cost of the monetary assets and other changes in the carrying amount. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount are recognised in other comprehensive income. The translation differences of other monetary assets and liabilities denominated in foreign currency are recognised in profit or loss.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at historical cost are translated to RMB using the exchange rates ruling at the transaction dates. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated using the exchange rates ruling at the dates the fair value is determined. The resulting exchange differences are recognised in profit or loss, except for the differences arising from the re-translation of equity instrument at fair value through other comprehensive income, which are recognised in other comprehensive income.

(3) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, non-restricted balances with the central bank, short-term deposits and placements with banks and other financial institutions, discounted bills held under resale agreements, and highly liquid short-term investments which are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

(4) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Recognition and initial measurement of financial assets and financial liabilities

A financial asset or financial liability is recognised in the statements of financial position when the Group becomes a party to the contractual provisions of a financial instrument.

A financial asset or financial liability is measured initially at fair value. For financial assets and financial liabilities measured at fair value through profit or loss, any related directly attributable transaction costs are charged to profit or loss; for other categories of financial assets and financial liabilities, any related directly attributable transaction costs are included in their initial costs. A trade receivable, without significant financing component or practical expedient applied for one year or less contracts, is initially measured at the transaction price.

Measurement of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When measuring fair value, the Group shall take into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date (including the condition and location of the asset; and restrictions, if any, on the sale or use of the asset, etc.), and use valuation techniques that are appropriate in the circumstances and for which sufficient data and other information are available to measure fair value. The adopted valuation techniques mainly include market approach, income approach and cost approach.

(ii) Classification and subsequent measurement of financial assets

(a) Classification of financial assets

The classification of financial assets is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. On initial recognition, a financial asset is classified as measured at amortised cost, at fair value through other comprehensive income ("FVOCI"), or at fair value through profit or loss ("FVTPL").

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by-investment basis. The instrument meets the definition of equity from the perspective of the issuer.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The business model refers to how the Group manages its financial assets in order to generate cash flows. That is, the Group's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. The Group determines the business model for managing the financial assets according to the facts and based on the specific business objective determined by the Group's key management personnel.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The Group also assesses whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

(b) Subsequent measurement of financial assets

Financial assets measured at FVTPL

These financial assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss unless the financial assets are part of a hedging relationship.

Financial assets measured at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. A gain or loss on a financial asset that is measured at amortised cost and is not part of a hedging relationship shall be recognised in profit or loss when the financial asset is derecognised, reclassified, through the amortisation process or in order to recognise impairment gains or losses.

Debt investments measured at FVOCI

These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, impairment and foreign exchange gains and losses are recognised in profit or loss. Other net gains and losses are recognised in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

Equity investments designated as at FVOCI

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss. Other net gains and losses are recognised in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to retained earnings.

(iii) Classification and subsequent measurement of financial liabilities

Financial liabilities are classified as financial liabilities measured at FVTPL and other financial liabilities.

Financial liabilities measured at FVTPL

A financial liability is classified as at FVTPL if it is classified as held-for-trading (including derivative financial liability, separately stated in the statement of financial position) or it is designated as such on initial recognition.

Financial liabilities measured at FVTPL are subsequently measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss, unless the financial liabilities are part of a hedging relationship.

Other financial liabilities

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, except for financial liabilities, financial guarantee contracts and credit commitments arising from transfers of financial assets which did not qualify for derecognition or continuing involvement (see Note 2(4)(iv)).

(iv) Financial guarantee contracts and credit commitments

Financial guarantee contracts

Financial guarantee contracts are contracts that requires the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts are initially recognised at fair value on the date the guarantee was given. Subsequent to initial recognition, income related to financial guarantee is allocated and recognised in profit or loss in accordance with the policies in Note 2(16). A financial guarantee contract is measured at the higher of the amount of the loss allowance determined in accordance with impairment policies of financial instruments (see Note 2(4)(v)) and the amount initially recognised less the cumulative amount of income.

Credit commitments

Credit commitments are commitments to grant credit under the established contract terms and conditions.

The impairment allowance of credit commitments provided by the Group is measured using the expected credit loss (ECL) model. The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by issuing another financial instrument.

For credit commitments and financial guarantee contracts, the loss allowance is recognised as a provision.

(v) Impairment

The Group recognises loss allowances for ECL on:

- financial assets measured at amortised cost;
- debt investments measured at FVOCI;
- lease receivables; and
- financial guarantee contracts issued and loan commitments, which are not measured at FVTPL.

Financial assets measured at fair value, including debt investments or equity securities at FVTPL, equity securities designated at FVOCI and derivative financial assets, are not subject to the ECL assessment.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value, discounted at effective interest rate or the credit-adjusted effective interest rate on purchased or originated credit-impaired (POCI) financial assets, of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

The Group's method of measuring ECLs of financial instruments reflects the following elements: (i) unbiased weighted average probability determined by the results of evaluating a range of possible outcomes; (ii) time value of money; (iii) reasonable and evidence-based information about past events, current conditions, and future economic forecasts that are available at no additional cost or effort at the end of the reporting period.

The maximum period considered when estimating ECLs is the maximum contractual period (including extension options) over which the Group is exposed to credit risk.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the end of the reporting period (or a shorter period if the expected life of the instrument is less than 12 months).

The Group applies a 'three-stage model' for measuring ECL. For the measurement and segmentation of ECL of financial instruments of the Group, see Note 45(1) Credit risk.

Presentation of allowance for ECL

ECLs are remeasured at the end of each reporting period to reflect changes in the financial instruments' credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for debt investments that are measured at FVOCI, for which the loss allowance is recognised in other comprehensive income. The Group recognises loss allowances for loan commitments and financial guarantee contracts that are not measured at FVTPL in contingent liabilities. (See Note 37(2)).

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. A write-off constitutes a derecognition event. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(vi) Offsetting

Financial assets and financial liabilities are generally presented separately in the statement of financial position, and are not offset. However, a financial asset and a financial liability are offset and the net amount is presented in the statement of financial position when both of the following conditions are satisfied:

- The Group currently has a legally enforceable right to set off the recognised amounts; and
- The Group intends either to settle on a net basis, or to realise the financial asset and settle the financial liability simultaneously.

(vii) Derecognition of financial assets and financial liabilities

Financial asset is derecognised when one of the following conditions is met:

- The Group's contractual rights to the cash flows from the financial asset expire;
- The financial asset has been transferred and the Group transfers substantially all of the risks and rewards of ownership of the financial asset; or
- The financial asset has been transferred, although the Group neither transfers nor retains substantially all of the risks and rewards of ownership of the financial asset, it does not retain control over the transferred asset.

When the financial asset has been transferred, if the Group neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Group continues to recognise the asset to the extent of its continuing involvement and recognises an associated liability.

Where a transfer of a financial asset in its entirety meets the criteria for derecognition, the difference between the two amounts below is recognised in profit or loss:

- The carrying amount of the financial asset transferred measured at the date of derecognition, and
- The sum of the consideration received from the transfer; and when the transferred financial asset is a debt investment at FVOCI, any cumulative gain or loss that has been recognised directly in other comprehensive income for the part derecognised.

The Group derecognises a financial liability (or part of it) only when its contractual obligation (or part of it) is extinguished.

Securitisation

As part of its operational activities, the Group securities financial assets, generally through the sale of these assets to structured entities which then issue securities to investors. Further details on prerequisites for derecognition of financial assets are set out above. When a securitisation of financial assets does not qualify for derecognition, the relevant financial assets are not derecognised, and the consideration paid by third parties are recorded as a financial liability; when the securitisation of financial assets partially qualifies for derecognition, the Group continue to recognise the transferred assets to the extent of its continuing involvement, derecognise the remaining. The carrying amount of the transferred assets is apportioned between the derecognised portion and the retained portion based on their respective relative fair values, and the difference between the carrying amount of the derecognised portion and the total consideration paid for the derecognised portion is recorded in profit or loss.

Sales of assets on condition of repurchase

The derecognition of financial assets sold on condition of repurchase is determined by the economic substance of the transaction. If a financial asset is sold under an agreement to repurchase the same or substantially the same asset at a fixed price or at the sale price plus a reasonable return, the Group will not derecognise the asset. If a financial asset is sold together with an option to repurchase the financial asset at its fair value at the time of repurchase (in case of transferor sells such financial asset), the Group will derecognise the financial asset.

(viii) Modification of financial assets contracts

In some cases, the Group may modify or otherwise renegotiate the financial assets contracts. The Group would assess whether or not the modified or renegotiated contractual terms are substantially different to the original terms.

If the terms are substantially different, the Group derecognises the original financial asset and recognises a new asset under the revised terms.

If the modification or renegotiation does not result in derecognition, but leads to changes in contractual cash flows, the Group recalculates the carrying amount of the financial asset and recognised the relevant gain or loss in profit or loss for the period. When assessing whether a significant increase in credit risk has occurred, the Group compares the risk of a default occurring under the revised terms as at the end of the reporting period with that as at the date of initial recognition under original terms.

(ix) Derivative financial instruments

Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

An embedded derivative and the host contract together form the hybrid contract. If the host contract included in the hybrid contract is an asset within the scope of IFRS 9, *Financial Instruments*, the embedded derivative is no longer split from the host contract of the financial asset, but the hybrid financial instrument as a whole is related to the classification of the financial asset provision. If the host contract included in the hybrid contract is not an asset within the scope of IFRS 9, *Financial Instruments*, when their economic characteristics and risks are not closely related to those of the hybrid contract, those separate instruments with the same terms as the embedded derivative would meet the definition of a derivative, and the hybrid instrument is not carried at FVTPL, certain derivatives embedded in other financial instruments should be split from the hybrid contract and treated as separate derivatives. These embedded derivatives are measured at fair value with the changes in fair value recognised in profit or loss.

Any gains or losses arising from changes in fair value on derivatives that do not qualify for hedge accounting are taken directly to profit or loss.

For less complex derivative products, the fair values of derivative products are principally determined by valuation models which are commonly used by market participants. Inputs to valuation models are determined from observable market data wherever possible, including foreign exchange spot and forward rates and interest rate yield curves. For more complex derivative products, the fair values are mainly determined by quoted prices from dealers.

(x) Equity instrument

The consideration received from the issuance of equity instruments net of transaction costs is recognised in shareholders' equity. The costs paid for the issuance is adjusted against shareholders' equity (capital reserve), with any excess deducted from surplus reserve and retained earnings sequentially. Consideration and transaction costs paid by the Bank for repurchasing self-issued equity instruments are deducted from shareholders' equity.

When the Bank repurchases its own shares, those shares are treated as treasury shares. All expenditure relating to the repurchase is recorded in the cost of the treasury shares, with the transaction recording in the share register. Treasury shares are excluded from profit distributions and are presented as a deduction under shareholders' equity in the statement of financial position.

When treasury shares are cancelled, the share capital should be reduced to the extent of the total par value of the treasury shares cancelled. Where the cost of the treasury shares cancelled exceeds the total par value, the excess is deducted from capital reserve (share premium), surplus reserve and retained earnings sequentially. If the cost of treasury shares cancelled is less than the total par value, the difference is credited to the capital reserve (share premium).

When treasury shares are disposed of, any excess of proceeds above cost is recognised in capital reserve (share premium); otherwise, the shortfall is deducted against capital reserve (share premium), surplus reserve and retained earnings sequentially.

(xi) Preference shares and perpetual bonds

At initial recognition, the Group classifies the preference shares and perpetual bonds issued or their components as financial assets, financial liabilities or equity instruments based on their contractual terms and economic substance with reference to the definition of financial assets, financial liabilities and equity instruments.

Preference shares and perpetual bonds issued by the Group that should be classified as equity instruments are recognised in equity based on the actual proceeds received. Any distribution of dividends or interests during the instruments' duration is treated as profit appropriation. When the preference shares and perpetual bonds are redeemed according to the contractual terms, the redemption amount is recognised as a deduction from equity.

(5) Resale and repurchase agreements transactions (including securities borrowing and lending)

Financial assets held under resale agreements refers to the funds paid by the Group in transactions where the Group acquires financial assets which will be resold at a predetermined price at a future date under the resale agreement. Financial assets sold under repurchase agreements refers to the funds received by the Group in transactions where the Group sells financial assets which will be repurchased at a predetermined price at a future date under the repurchase agreement.

The cash advanced or received is recognised as amounts held under resale or sold under repurchase agreements in the statement of financial position. Assets held under resale agreements are not recognised. Assets sold under repurchase agreements continue to be recognised in the statement of financial position.

The difference between the purchase and resale consideration, and that between the sale and repurchase consideration, is amortised over the period of the respective transaction using the effective interest method and is included in interest income and interest expenses respectively.

Securities borrowing and lending transactions are usually collateralised by securities or cash. The transfer of the securities to counterparties is only reflected on the statement of financial position if the risks and rewards of ownership are also transferred. Cash advanced or received as collateral is recorded as an asset or liability.

(6) Precious metals

Precious metals comprise gold, silver and other precious metals. Precious metals that are not related to the Group's trading activities are initially measured at acquisition cost and subsequently measured at the lower of cost and net realizable value. The Group determines the net realizable value of precious metals at the end of the reporting period, and if the influence factors of the previous write-down of the value of precious metals have disappeared, the amount of the write-down shall be recovered and reversed within the amount of the original provision for price declines, and the amount of the reversal shall be recognised in profit or loss. Precious metals that are related to the Group's trading activities are initially recognized at fair value and subsequent changes in fair value are recognised in profit or loss.

(7) Property and equipment

Property and equipment are tangible assets held by the Group for operation and administration purposes with useful lives over one year.

The cost of a purchased property and equipment asset comprises the purchase price, related taxes, and any expenditure directly attributable to bringing the asset into working condition for its intended use.

All direct and indirect costs that are related to the construction of property and equipment and incurred before the assets are ready for their intended use are capitalised as the cost of construction in progress. No depreciation is provided against construction in progress.

Where the individual component parts of an item of property and equipment have different useful lives or provide benefits to the Group in different patterns, each part is depreciated separately.

Any subsequent costs including the cost of replacing part of an item of property and equipment are recognised as assets when it is probable that the economic benefits associated with the costs will flow to the Group, and the carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

Property and equipment assets are stated in the statement of financial position at cost less accumulated depreciation and impairment losses (see Note 2(11)).

The cost of a property and equipment, less its estimated residual value and accumulated impairment losses, is depreciated using the straight-line method over its estimated useful life, unless the property and equipment is classified as held for sale.

The estimated useful lives, residual values and annual depreciation rates of each class of property and equipment are as follows:

	Estimated useful lives	Estimated net residual value	Annual depreciation rate
Premises	20 - 50 years	3% – 5%	1.90% - 4.85%
Machinery equipment and others	5-10 years	3% - 5%	9.50% - 19.40%
Vehicles	5 years	3% - 5%	19.00% - 19.40%
Electronic equipment	3-7 years	3% - 5%	13.57% - 32.33%
Premises leased out under operating leases	20 - 50 years	3% - 5%	1.90% - 4.85%

Useful lives, residual values and depreciation methods of property and equipment are reviewed, and adjusted if appropriate, at least at each financial year end.

The carrying amount of a property and equipment is derecognised:

- When the property and equipment is holding for disposal; or
- When no future economic benefit is expected to be generated from its use or disposal.

Gains or losses arising from the retirement or disposal of an item of property and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item, and are recognised in profit or loss on the date of retirement or disposal.

(8) Intangible assets

The intangible assets of the Group have finite useful lives. The intangible assets are stated in the statements of financial position at cost less accumulated amortisation and impairment losses (see Note 2(11)). The cost of intangible assets less residual value and impairment losses is amortised on a straight-line basis over the estimated useful lives, unless the intangible asset is classified as held for sale.

The amortisation period for intangible assets is as follows:

Amortisation period

Software 3-10 years

Useful lives and amortisation methods of intangible asset with finite useful life are reviewed at least at each year-end.

(9) Long-term deferred expenses

Long-term deferred expenses are amortised using a straight-line method within the expected benefit period and stated in "other assets" at actual cost less accumulated amortisation and impairment losses (see Note 2(11)).

(10) Repossessed assets

Repossessed assets refer to the physical assets or property rights of the debtor, guarantor or a third party that the Group exercises its creditor's rights or security rights in accordance with the law.

Transferred financial repossessed assets are initially measured at their fair value, and classified and subsequently measured by the Group according to the accounting policies in Note 2(4)(ii).

Transferred non-financial repossessed assets are initially measured at the fair value of the relinquished creditor's rights and other costs such as taxes directly attributable to the asset, and subsequently measured at the lower of cost and net realizable value by the Group. Please refer to Note 2(11) for the method of impairment test and allowances for impairment.

(11) Impairment of non-financial assets other than precious metals

The carrying amounts of the following assets are reviewed at the end of the reporting period based on the internal and external sources of information to determine whether there is any indication of impairment:

- property and equipment
- right-of-use assets
- intangible assets
- investments in subsidiaries, associates and joint ventures
- non-financial repossessed assets
- long-term deferred expenses, etc.

If any indication exists that an asset may be impaired, the recoverable amount of the asset is estimated.

A Cash-Generating Unit (the "CGU") is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or asset groups. A CGU is composed of assets directly relating to cash-generation. Identification of a CGU is based on whether major cash inflows generated by the asset group are largely independent of the cash inflows from other assets or asset groups. In identifying an asset group, the Group also considers how management monitors the Group's operations and how management makes decisions about continuing or disposing of the Group's assets.

The recoverable amount of an asset or CGU, or a group of CGUs (hereinafter called "asset") is the greater of its fair value less costs of disposal and value in use.

An asset's fair value less costs of disposal is the amount determined by the price of a sale agreement in an arm's length transaction, less the costs that are directly attributable to the disposal of the asset. The value in use of an asset is determined by discounting the future cash flows, estimated to be derived from continuing use of the asset and from its ultimate disposal, to their present value using an appropriate pre-tax discount rate.

An impairment loss is recognised in profit or loss if the carrying amount of an asset exceeds its recoverable amount. An allowance for an impairment loss of the asset is recognised accordingly. Impairment losses related to an asset group or a set of asset groups are allocated first to reduce the carrying amount of any goodwill (if any is held) allocated to the asset group or set of asset groups and then, to reduce the carrying amount of the other assets in the asset group or set of asset groups on a pro rata basis. However, the carrying amount of an impaired asset will not be reduced below the highest of its individual fair value less costs of disposal (if measurable), value in use (if measurable) and zero.

An impairment loss in respect of goodwill is not reversed. If, in a subsequent period, the amount of impairment loss of the non-financial asset, except for goodwill, decreases and the decrease can be linked objectively to an event occurring after impairment is recognised, the previously recognised impairment loss is reversed through profit or loss. A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior periods.

(12) Employee benefits

(i) Short-term employee benefits

Employee wages or salaries, bonuses, social security contributions such as medical insurance, work injury insurance, and housing fund, measured at the amount incurred or at the applicable benchmarks and rates, are recognised as a liability as the employee provides services, with a corresponding charge to profit or loss or included in the cost of assets where appropriate.

(ii) Post-employment benefits - defined contribution plans

Pursuant to the relevant laws and regulations of the PRC, the Group participated in a defined contribution basic pension insurance and unemployment insurance in the social insurance system established and managed by government organisations, and annuity plan. The Group makes contributions to basic pension insurance plans and unemployment insurance based on the applicable benchmarks and rates stipulated by the government. The Group established supplementary defined contribution – annuity plan in accordance with the national enterprise annuity policies. The contributions are recognised as liability, charged to profit or loss or recognised as part of the cost of related assets during the accounting period in which employees provide services.

(iii) Post-employment benefits - defined benefit plans

In accordance with the projected unit credit method, the Group measures the obligations under defined benefit plans using unbiased and mutually compatible actuarial assumptions to estimate related demographic variables and financial variables, and discount obligations under the defined benefit plans to determine the present value of the defined benefit liability.

The Group attributes benefit obligations under a defined benefit plan to periods of service provided by respective employees. Service cost and interest expense on the defined benefit liability are charged to profit or loss or recognised as part of the cost of assets, and remeasurements of defined benefit liability are recognised in other comprehensive income.

(iv) Termination benefits

Termination benefits are payable as a result of either the Group's decision to terminate an employee's employment before the normal retirement date or an employee's decision to accept an offer of benefits in exchange for the termination of employment. The Group recognise termination benefits in profit or loss at the earlier of:

- When the Group can no longer withdraw an offer of those benefits;
- When the Group has a specific, concrete restructure plan involving payment of termination benefits, and the plan has started or been informed to each affected party, therefore each party has formed reasonable expectation.

(13) Income tax

Current tax and deferred tax are recognised in profit or loss except to the extent that they relate to a business combination or items recognised directly in equity (including other comprehensive income).

Current tax is the expected tax payable calculated at the applicable tax rate on taxable income for the year, plus any adjustment to tax payable in respect of previous years.

At the end of the reporting period, current tax assets and liabilities are offset only if the Group has a legally enforceable right to set them off and also intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Deferred tax assets and deferred tax liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases, which include deductible losses and tax credits carried forward to subsequent periods. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is not recognised for temporary differences arising from the initial recognition of assets or liabilities in a single transaction that is not a business combination, affects neither accounting profit nor taxable profit (or deductible loss) and does not give rise to equal taxable and deductible temporary differences. Deferred tax is also not recognised for taxable temporary differences arising from the initial recognition of goodwill.

At the end of the reporting period, deferred tax is measured based on the tax consequences that would follow from the expected manner of recovery or settlement of the carrying amounts of the assets and liabilities, using tax rates that are expected to be applied in the period when the asset is recovered or the liability is settled in accordance with tax laws.

The carrying amount of a deferred tax asset is reviewed at the end of the reporting period, and is reduced to the extent that it is no longer probable that the related tax benefits will be utilised. Such reductions are reversed to the extent that it becomes probable that sufficient taxable profits will be available.

At the end of the reporting period, deferred tax assets and liabilities are offset if all the following conditions are met:

- The taxable entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- They relate to income taxes levied by the same tax authority on either the same taxable entity or different taxable entities which intend either to settle the current tax liabilities and current tax assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or deferred tax assets are expected to be settled or recovered.

(14) Provisions and contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of uncertain future events. It can also be a present obligation arising from past events which is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably. The obligation is not recognised, and only contingent liabilities are disclosed in Note 47 to the financial statements.

A provision is recognised for an obligation related to a contingency if the Group has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

A provision is initially measured at the best estimate of the outflow required to settle the related present obligation. Where the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows. Factors pertaining to a contingency such as the risks, uncertainties and time value of money are taken into account as a whole in reaching the best estimate. Where there is a continuous range of possible outcomes for the outflow required, and each possible outcome in that range is as likely as any other, the best estimate is the mid-point of that range. In other cases, the best estimate is determined according to the following circumstances:

- Where the contingency involves a single item, the best estimate is the most likely outcome.
- Where the contingency involves a large population of items, the best estimate is determined by weighting all possible outcomes by their associated probabilities.

The Group reviews the carrying amount of a provision at the end of the reporting period and adjusts the carrying amount to the current best estimate.

(15) Fiduciary activities

The Group acts in fiduciary activities as a manager, a custodian, or an agent for customers. Assets held by the Group and the related undertakings to return such assets to customers are recorded as off-balance sheet items as the risks and rewards of the assets reside with customers.

The Group enters into entrusted loan agreements with customers, whereby the customers provide funding (the "entrusted funds") to the Group, and the Group grants loans to third parties (the "entrusted loans") under instructions of the customers. As the Group does not assume the risks and rewards of the entrusted loans and the corresponding entrusted funds, the entrusted loans and funds are recorded as off-balance sheet items at their principal amount. No allowance for impairment loss is made for entrusted loans.

(16) Income recognition

Revenue is the gross inflow of economic benefits arising in the course of the Group's ordinary activities when the inflows result in increase in shareholders' equity, other than increase relating to contributions from shareholders.

Revenue is recognised when the Group satisfies the performance obligation in the contract by transferring the control over relevant goods or services to the customers.

Where a contract has two or more performance obligations, the Group determines the stand-alone selling price at contract inception of the distinct good or service underlying each performance obligation in the contract and allocates the transaction price in proportion to those stand-alone selling prices. The Group recognises as revenue the amount of the transaction price that is allocated to each performance obligation. The stand-alone selling price is the price at which the Group would sell a promised good or service separately to a customer. If a stand-alone selling price is not directly observable, the Group considers all information that is reasonably available to the entity, maximises the use of observable inputs to estimate the stand-alone selling price.

(i) Interest income

For all financial instruments measured at amortised cost and interest-generating financial instruments classified as financial assets measured at FVOCI, interest income is calculated at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument, where appropriate, to the book value of the financial asset, or the amortised cost of financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but does not include expected credit losses.

The Group recognises interest income based on the effective interest method. Interest income is calculated by applying the effective interest rate to the book value of financial assets, except for:

 POCI financial assets, whose interest income is calculated, since initial recognition, by applying the credit adjusted effective interest rate to their amortised cost; and Purchased or originated financial assets that are not credit-impaired but have subsequently become credit-impaired, whose interest income is calculated by applying the effective interest rate to their amortised cost (i.e. net of the expected credit loss allowances). If, in a subsequent period, the financial assets improve their qualities so that they are no longer credit-impaired and the improvement in credit quality is related objectively to a certain event occurring after the application of the abovementioned rules, then the interest income is calculated by applying the effective interest rate to their gross carrying amount.

(ii) Fee and commission income

The Group earns fee and commission income from a diverse range of services which provides to the customers. Fee and commission income is recognised when the Group fulfills its performance obligation, either at a point in time or over time when a customer obtains control of the service.

The Group satisfies a performance obligation over time if one of the following criteria is met; otherwise, the performance obligation is satisfied at a point in time:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- The customer controls the service provided by the Group in the course of performance; or
- The Group does not provide service with an alternative use to the Group, and the Group has an enforceable right to payment for performance completed to date.

(iii) Dividend income

Dividend income from equity instrument is recognised in profit or loss when the Group's right to receive payment is established.

(17) Government grants

Government grants are transfers of monetary assets or non-monetary assets from the government to the Group at no consideration except for any capital contribution from the government as an investor in the Group.

A government grant is recognised when there is reasonable assurance that the grant will be received and that the Group will comply with the conditions attaching to the grant.

If a government grant is in the form of a transfer of a monetary asset, it is measured at the amount that is received or receivable. If a government grant is in the form of a transfer of a non-monetary asset, it is measured at its fair value.

Grants related to assets are government grants whose primary condition is that an entity qualifying for them should purchase, construct or otherwise acquire long-term assets. Grants related to income are government grants other than those related to assets. A government grant related to an asset is offset against the carrying amount of the related asset or recognised as deferred income and amortised to profit or loss over the useful life of the related asset on a reasonable and systematic manner. A grant that compensates the Group for cost, expenses or loss to be incurred in the future is recognised as deferred income and offset against the related expenses or recognised in profit or loss in the same periods in which the expenses are recognised. Or recognised in profit or loss or offset against the related expenses directly.

(18) Expenses recognition

(i) Interest expenses

Interest expenses from financial liabilities are accrued on a time proportion basis with reference to the amortised cost and the applicable effective interest rate.

(ii) Other expenses

Other expenses are recognised on an accrual basis.

(19) Leases

A contract is lease if the lessor conveys the right to control the use of an identified asset to lessee for a period of time in exchange for consideration.

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- The contract involves the use of an identified asset. An identified asset may be specified explicitly or implicitly specified in a contract and should be physically distinct, or capacity portion or other portion of an asset that is not physically distinct but it represents substantially all of the capacity of the asset and thereby provides the customer with the right to obtain substantially all of the economic benefits from the use of the asset. If the supplier has a substantive substitution right throughout the period of use, then the asset is not identified;
- The lessee has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and

- The lessee has the right to direct the use of the asset.

For a contract that contains more separate lease components, the lessee and the lessor separate lease components and account for each lease component as a lease separately. For a contract that contains lease and non-lease components, the lessee and the lessor separate lease components from non-lease components. For a contract that contains lease and non-lease components, the lessee allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The lessor allocates the consideration in the contract in accordance with the accounting policy in Note 2(16).

(i) As a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability, any lease payments made at or before the commencement date (less any lease incentives received), any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is depreciated using the straight-line method. If the lessee is reasonably certain to exercise a purchase option by the end of the lease term, the right-of-use asset is depreciated over the remaining useful lives of the underlying asset. Otherwise, the right-of-use asset is depreciated from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. Impairment losses of right-of-use assets are accounted for in accordance with the accounting policy described in Note 2(11).

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

A constant periodic rate is used to calculate the interest on the lease liability in each period during the lease term with a corresponding charge to profit or loss or included in the cost of assets where appropriate. Variable lease payments not included in the measurement of the lease liability is charged to profit or loss or included in the cost of assets where appropriate as incurred.

Under the following circumstances after the commencement date, the Group remeasures lease liabilities based on the present value of revised lease payments:

- There is a change in the amounts expected to be payable under a residual value guarantee;
- There is a change in future lease payments resulting from a change in an index or a rate used to determine those payments;
- There is a change in the assessment of whether the Group will exercise a purchase, extension or termination option, or there is a change in the exercise of the extension or termination option.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets that the underlying assets are individually of low value when new. The Group recognises the lease payments associated with these leases in profit or loss or as the cost of the assets where appropriate using the straight-line method over the lease term.

(ii) As a lessor

The Group determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset irrespective of whether the legal title to the asset is eventually transferred. An operating lease is a lease other than a finance lease.

When the Group is a sub-lessor, it assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies practical expedient described above, then it classifies the sub-lease as an operating lease.

Under a finance lease, at the commencement date, the Group recognises the finance lease receivable and derecognises the finance lease asset. The finance lease receivable is initially measured at an amount equal to the net investment in the lease. The net investment in the lease is measured at the aggregate of the unguaranteed residual value and the present value of the lease receivable that are not received at the commencement date, discounted using the interest rate implicit in the lease.

The Group recognises finance income over the lease term, based on a pattern reflecting a constant periodic rate of return. The derecognition and impairment of the finance lease receivable are recognised in accordance with the accounting policy in Note 2(4). Variable lease payments not included in the measurement of net investment in the lease are recognised as income as they are earned.

Lease receipts from operating leases is recognised as income using the straight-line method over the lease term. The initial direct costs incurred in respect of the operating lease are initially capitalised and subsequently amortised in profit or loss over the lease term on the same basis as the lease income. Variable lease payments not included in lease receipts are recognised as income as they are earned.

(20) Dividends

Dividends proposed in the profit appropriation plan which are authorised and declared after the end of the reporting period are not recognised as a liability at the end of the reporting period but disclosed separately in the notes.

(21) Related parties

The related parties of the Group include but are not limited to:

- (i) A person, or a close member of that person's family, if that person:
 - (a) has significant influence over the Group; or
 - (b) is a member of the key management personnel of the Group.
- (ii) An entity, if that entity:
 - (a) the entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
 - (b) has significant influence over the Group;
 - (c) controls an entity identified in (ii)(b);
 - (d) is controlled or jointly controlled by an entity identified in (ii)(b) and (ii)(c);
 - (e) is controlled or jointly controlled by a person identified in (i).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

(22) Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system after taking the materiality principle into account. Two or more operating segments may be aggregated into a single operating segment if the segments have the similar economic characteristics and are same or similar in respect of the nature of each segment's products and services, the nature of production processes, the types or classes of customers for the products and services, the methods used to distribute the products or provide the services, and the nature of the regulatory environment.

Management monitors the operating results of the Group's business units separately for the purpose of making decisions about resources allocation and performance assessment. Transactions between segments mainly represent the provision of funding to and from individual segments. These transactions are conducted on terms determined with reference to the average cost of funding. Segment accounting policies are consistent with those for the consolidated financial statements.

(23) Subsidiaries and non-controlling interests

Subsidiaries are entities (including structured entities) controlled by the Group. The Group controls an entity if it is exposed, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group reassesses whether it has control if there are changes to one or more of the elements of control. This includes circumstances in which protective rights held (e.g. those resulting from a lending relationship) become substantive and lead to the Group having power over an entity.

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, and the relevant activities are directed by means of contractual or other arrangements.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and any unrealised profits or loss arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements.

An investment in a subsidiary is stated at cost less impairment losses in the Bank's statements of financial position.

For the method of impairment test and allowances for impairment of an investment in a subsidiary, see Note 2(11).

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Bank.

Non-controlling interests are presented in the consolidated statements of financial position within equity, separately from equity attributable to the equity shareholders of the Bank. Non-controlling interests in the results of the Group are presented on the face of the consolidated statements of profit or loss and other comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the equity shareholders of the Bank.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

(24) Significant accounting estimates and judgements

The preparation of the financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates as well as underlying assumptions and uncertainties involved are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

In the process of applying the Group's accounting policies, management is required to make judgements, estimates and assumptions of the effects of uncertain future events on the financial statements. The most significant use of judgements, estimates and assumptions concerning the uncertainty of the future at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are described below.

(i) Measurement of ECLs

The measurement of the ECLs for loans and advances to customers and debt investments measured at amortised cost and measured at FVOCI, loan commitments and financial guarantee contracts, is subject to complex models and a number of assumptions about future economic conditions and credit conditions (for example, the possibility of customers defaulting and the resulting losses). For the descriptions of the inputs, assumptions and estimation techniques used in measuring ECLs, please refer to Note 45(1).

(ii) Fair value of financial instruments

If the market for a financial instrument is not active, the Group establishes fair value by using a valuation technique. Valuation techniques include using recent arm's length market transactions between knowledgeable and willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. To the extent practicable, valuation technique makes maximum use of market inputs. However, where market inputs are not available, management needs to make estimates on such unobservable market inputs.

(iii) Income taxes

Determining income tax provisions involves judgement on the future tax treatment of certain transactions. The Group carefully evaluates the tax implications of transactions and tax provisions are set up accordingly. The tax treatment of such transactions is reviewed periodically to take into account all changes in tax legislation. Deferred tax assets are recognised for temporary deductible differences. As those deferred tax assets can only be recognised to the extent that it is probable that future taxable profits will be available against which the unused tax credits can be utilised, management's judgement is required to assess the probability of future taxable profits. Management's assessment is constantly reviewed and additional deferred tax assets are recognised if it becomes probable that future taxable profits will be available against which deductible temporary differences can be utilised.

(iv) Impairment of non-financial assets (excluding precious metals)

Non-financial assets are reviewed regularly to determine whether the carrying amount exceeds the recoverable amount of the assets. If any such indication exists, an impairment loss is provided.

Since the market price of an asset (the asset group) cannot be obtained reliably, the fair value of the asset cannot be estimated reliably. In assessing the present value of future cash flows, significant judgements are exercised over the related operating income and expenses of the asset (the asset group) and discount rate to calculate the present value. All relevant materials which can be obtained are used for the estimation of the recoverable amount, including the estimation of the selling price and related operating expenses based on reasonable and supportable assumptions.

(v) Depreciation and amortisation

Property and equipment and intangible assets are depreciated and amortised using the straight-line method over their estimated useful lives after taking into account their residual values. The estimated useful lives are regularly reviewed to determine the depreciation and amortisation costs charged in the reporting period. The estimated useful lives are determined based on the historical experiences of similar assets and anticipated technology changes. If there is an indication that there has been a change in the factors used to determine the depreciation or amortisation, the fixed assets' estimated useful lives will be revised.

(vi) Determination of control over structured entities

The Group acts as manager to a number of investment funds, wealth management products, asset management plans, trust plans and assets-backed securities. When assessing whether controls such a structured entity, the Group would determine whether it exercises the decision-making rights as a principal or an agent and usually focuses on the assessment of the aggregate economic interests of the Group in the entity (comprising any carried interests and expected management fees) and the decision-making authority of the entity. The Group would also determine whether another entity with decision-making rights is acting as an agent for it.

For further disclosure in respect of unconsolidated investment funds, wealth management products, asset management plans, trust plans and assets-backed securities in which the Group has an interest or for which it is a sponsor, see Note 48.

3 NET INTEREST INCOME

	2024	2023
Interest income arising from		
Deposits with the central bank	343,133	313,957
Deposits with banks and other financial institutions	43,690	39,605
Placements with banks and other financial institutions	558,861	434,720
Loans and advances to customers		
 Corporate loans and advances 	10,621,928	9,478,638
 Personal loans and advances 	3,460,762	3,697,252
 Discounted bills 	462,572	455,061
Financial assets held under resale agreements	250,412	138,768
Financial investments	5,584,536	5,470,243
Long-term receivables	1,095,538	1,111,788
Sub-total	22,421,432	21,140,032
Interest expense arising from		
Borrowings from the central bank	(506,900)	(405,466)
Deposits from banks and other financial institutions	(248,640)	(134,510)
Placements from banks and other financial institutions	(646,995)	(571,665)
Deposits from customers	(8,461,984)	(8,060,870)
Financial assets sold under repurchase agreements	(395,000)	(602,063)
Debt securities issued	(2,288,089)	(2,074,024)
Others		(9,465)
Sub-total	(12,547,608)	(11,858,063)
Net interest income	9,873,824	9,281,969

4 NET FEE AND COMMISSION INCOME

		2024	2023
Fee and commission income			
Wealth management service fees		928,870	929,831
Agency service fees		459,183	556,492
Custody and bank card service fees		316,846	377,895
Settlement fees		127,634	97,033
Others	_	161,421	151,780

Notes:

- (1) The emoluments of non-executive directors ("NED"), independent non-executive directors ("INED"), shareholder supervisors and external supervisors were affected by the time of service during the reporting period. Directors and supervisors received emoluments since their assumption of duty until their resignation. The changes in directors and supervisors in the year of 2024 and 2023 are as follows:
 - (i) In January 2023, Mr. WANG Lin no longer served as executive director of the Bank. In March 2023, Mr. WU Xianming began to assume his duty as executive director.
 - (ii) In April 2023, Mr. Tingjie ZHANG no longer served as INED of the Bank. In April 2023, Mr. CHEUNG Man Chor, Elton began to assume his duty as INED of the Bank.
 - (iii) In December 2023, Mr. CHEUNG Simon no longer served as INED of the Bank. In December 2023, Mr. DU Ning began to assume his duty as INED of the Bank.
 - (iv) In November 2023, Ms. CHEN Shuang began to assume her duty as executive director.
 - (v) In May 2024, Mr. Marco MUSSITA no longer served as NED of the Bank.
 - (vi) In May 2024, Mr. MENG Xianzheng no longer served as supervisor of the Bank. In May 2024, Ms. LIU Wenjia began to assume her duty as supervisor.
 - (vii) In August 2024, Mr. Yang Fengjiang no longer served as supervisor of the Bank.
 - (viii) In August 2024, Ms. Fang Qiaoling no longer served as INED of the Bank. Mr. Giamberto GIRALDO began to assume his duty as NED of the Bank. Mr. Fan Xuejun began to assume his duty as INED of the Bank.
 - (ix) In November 2024, Mr. Hao Xianjing no longer served as INED of the Bank.
- (2) The emoluments of Mr. Rosario STRANO, Mr Giamberto GIRALDO and Mr. Marco MUSSITA were waived with their authorization. There was no other arrangement under which a director or a supervisor waived or agreed to waive any remuneration during the reporting period.
- (3) There were no amounts paid during the reporting period to the directors and supervisors in connection with their retirement from employment or as compensation for loss of office with the Bank or as inducement to join.
- (4) The total compensation package for certain directors and supervisors for the year ended 31 December 2024 have not yet been finalised. The difference in emoluments is not expected to have any significant impact on the Group's financial statements for the year ended 31 December 2024.

10 INDIVIDUALS WITH HIGHEST EMOLUMENTS

For the year ended 31 December 2024, the five individuals with the highest emoluments included four directors and one supervisor of the Bank (2023: four directors and one supervisor), whose emoluments are disclosed in Note 9.

Note:

⁽i) Non-taxable income consists of interest income from the PRC government bonds and local government bonds, and fund dividend income, which are exempt from income tax under the PRC tax regulations.

13 BASIC AND DILUTED EARNINGS PER SHARE

Basic earnings per share was computed by dividing the net profit for the period attributable to ordinary shareholders of the Bank by the weighted average number of ordinary shares in issue. Diluted earnings per share was computed by dividing the adjusted net profit attributable to the ordinary shareholders of the Bank for the period by the adjusted weighted average number of ordinary shares in issue, assuming that all dilutive potential shares have been converted. There is no difference between basic and diluted earnings per share as there were no potentially dilutive shares outstanding during the reporting period.

	Note	2024	2023
Weighted average number of ordinary shares (in thousands)	13(1)	5,820,355	5,820,355
Net profit attributable to equity shareholders of the Bank		4,264,120	3,548,599
Less: net profit attributable to other equity instruments holders of the Bank		233,200	233,200
Net profit attributable to ordinary shareholders of the Bank		4,030,920	3,315,399
Basic and diluted earnings per share (in RMB)		0.69	0.57

The Bank issued RMB4 billion and RMB2.4 billion of Domestic Perpetual Bonds on 14 July 2022 and 16 August 2022, respectively. Non-cumulative dividend payment method was adopted for Domestic Perpetual Bonds. The Bank classified these Domestic Perpetual Bonds as equity instruments, and the specific terms of these Domestic Perpetual Bonds are disclosed in Note 39.

(1) Weighted average number of ordinary shares (in thousands)

	2024	2023
Number of ordinary shares in issue as at 1 January Increase in weighted average number of new ordinary shares	5,820,355	5,820,355
Weighted average number of ordinary shares	5,820,355	5,820,355

14 CASH AND DEPOSITS WITH THE CENTRAL BANK

	Note	31 December 2024	31 December 2023
Cash on hand		477,724	532,013
Deposits with the central bank			
Statutory deposit reserves	14(1)	21,367,533	18,919,609

Sub-total		48,666,629	30,501,750
Accrued interest		8,913	9,901
Total		49,153,266	31,043,664

(1) The Bank places statutory deposit reserves with the PBOC in accordance with the relevant regulations. As at 31 December 2024, the statutory deposit reserve ratios for RMB deposits applicable to the Bank were 5.0% (31 December 2023: 5.0%). As at 31 December 2024, the statutory deposit reserve ratios for foreign currency deposits applicable to the Bank were 4.0% (31 December 2023: 4.0%). The Bank's subsidiaries place statutory deposit reserves with the PBOC in accordance with relevant regulations.

The statutory deposit reserves are not available for the Group's daily business.

- (2) The surplus deposit reserves are placed with the PBOC mainly for the purpose of clearing.
- (3) Other deposits with the central bank primarily represent fiscal deposits and foreign exchange risk reserve placed with the PBOC that are not available for use in the Group's daily operations.

Total	14,844,347	14,021,225

17 DERIVATIVE FINANCIAL INSTRUMENTS

The Group primarily enters into foreign exchange rate and interest rate derivative contracts related to trading, asset and liability management, and customer initiated transactions.

The contractual/notional amounts and fair values of the derivative financial instruments entered into by the Group are set out in the following tables. The contractual/notional amounts of derivative financial instruments provide a basis for comparison with fair values of instruments recognised in the consolidated statement of financial position but do not necessarily indicate the amounts of future cash flows involved or the current fair values of the instruments and, therefore, do not indicate the Group's exposure to credit or market risks. The fair value of derivative financial instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in market interest rates or foreign exchange rates relative to their terms. The aggregated fair values of derivative financial assets and liabilities can fluctuate significantly.

	31 I	31 December 2024			December 202	23		
	Nominal amount	Fair value of		- 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1		Nominal amount	Fair va	lue of

Net book value						
As at 31 December 2024	3,017,743	365,119	16,023	38,369		3,437,254
As at 31 December 2023	3,016,480	354,811	19,736	43,653	106,309	3,540,989

As at 31 December 2024 and 31 December 2023, the Group did not have significant property and equipment which were temporarily idle.

As at 31 December 2024, the net book value of the Group's premises with incomplete title deeds was RMB88 million (31 December 2023: RMB93 million). Management was of the opinion that the incomplete title deeds would not affect the Group's rights to these assets.

As at 31 December 2024 and 31 December 2023, the Group was not aware of any indicators for the possibility of property and equipment impairment, hence no impairment loss was recognised.

The net book values of premises at the end of the reporting period are analysed by the remaining terms of the land leases as follows:

		31 December 2024	31 December 2023
Held in Chinese Mainland – Long-term leases (over 50 years)		47,922	15,523
- Medium-term leases (10 – 50 years)		2,940,099	2,966,394

Change in fair value	(2,564,807)	(641,202)	(35,900)	(8,975)	
Others	863,646	215,912	955,618	238,905	
Total	14,215,266	3,553,816	15,175,547	3,793,887	

(2) Analysed by movement

	Allowances for impairment losses	Deferred interest income from discounted bills Note (i)	Change in fair value	Others Note (ii)	Total
As at 1 January 2023	2,915,242	40,892	350,155	140,054	3,446,343
Recognised in profit or loss Recognised in other	637,755	(19,727)	(80,851)	98,196	635,373
comprehensive income	(10,205)		(278,279)	655	(287,829)
As at 31 December 2023	3,542,792	21,165	(8,975)	238,905	3,793,887
Recognised in profit or loss Recognised in other	484,570	9,544	(117,830)	(26,570)	349,714
comprehensive income	(78,965)		(514,397)	3,577	(589,785)
As at 31 December 2024	3,948,397	30,709	(641,202)	215,912	3,553,816

Notes:

- (i) Pursuant to the requirement issued by the local tax authority, income tax obligations arise when the Group receives discounted bills. The deductible temporary difference, which arises from the interest income recognised in profit or loss using the effective interest method, forms deferred tax assets.
- (ii) Others mainly include the amount accrued for early retirement and supplementary retirement plans, provisions, and other accrued expenses, which are deductible against taxable income when actual payment occurs.

28 OTHER ASSETS

	Note	31 December 2024	31 December 2023

Notes:

- (i) The Group has issued several debt securities with fixed interest rates. The details are as follows:
 - (a) Five-year Financial Bonds were issued with an interest rate of 3.98% per annum and with a nominal amount of RMB1.0 billion in May 2019. The debts have matured on 22 May 2024 with annual interest payments. As at 31 December 2023, the fair value of the debts was RMB1.006 billion.

- (b) Five-year Financial Bonds were issued with an interest rate of 3.98% per annum and with a nominal amount of RMB1.0 billion in May 2019. The debts have matured on 31 May 2024 with annual interest payments. As at 31 December 2023, the fair value of the debts was RMB1.006 billion.
- (c) Five-year Small and Micro Enterprises Financial Bonds were issued with an interest rate of 3.84% per annum and with a nominal amount of RMB1.0 billion in December 2019. The debts have matured on 5 December 2024 with annual interest payments. As at 31 December 2023, the fair value of the debts was RMB1.012 billion.
- (d) Five-year Small and Micro Enterprises Financial Bonds were issued with an interest rate of 3.80% per annum and with a nominal amount of RMB1.0 billion in December 2019. The debts have matured on 16 December 2024 with annual interest payments. As at 31 December 2023, the fair value of the debts was RMB1.012 billion.
- (e) Ten-year Tier-two Capital Bonds were issued with an interest rate of 4.80% per annum and with a nominal amount of RMB4.0 billion in March 2021. The debts will mature on 24 March 2031 with annual interest payments. The Group has an option to redeem the debts at the end of the fifth year. As at 31 December 2024, the fair value of the debts was RMB4.144 billion (31 December 2023: RMB4.151 billion).
- (f) Ten-year Tier-two Capital Bonds were issued with an interest rate of 4.34% per annum and with a nominal amount of RMB2.0 billion in May 2021. The debts will mature on 28 May 2031 with annual interest payments. The Group has an option to redeem the debts at the end of the fifth year. As at 31 December 2024, the fair value of the debts was RMB2.069 billion (31 December 2023: RMB2.059 billion).
- (g) Three-year Green Bonds were issued with an interest rate of 2.84% per annum and with a nominal amount of RMB8.0 billion in December 2023. The debts will mature on 4 December 2026 with annual interest payments. As at 31 December 2024, the fair value of the debts was RMB8.169 billion (31 December 2023: RMB8.022 billion).
- (h) Ten-year Tier-two Capital Bonds were issued with an interest rate of 2.15% per annum and with a nominal amount of RMB2.0 billion in December 2024. The debts will mature on 16 December 2034 with annual interest payments. The Group has an option to redeem the debts at the end of the fifth year. As at 31 December 2024, the fair value of the debts was RMB2.002 billion.
- (ii) The Group issued a number of transferable certificates of interbank deposit with duration between 1 month to 1 year. As at 31 December 2024 and 2023, the outstanding fair value of certificates of interbank deposit was RMB82.651 billion and RMB71.050 billion respectively.

36 LEASE LIABILITIES

Maturity analysis on lease liabilities of the Group – analysis on undiscounted cash flows:

	31 December 2024	31 December 2023
Less than 1 year (inclusive)	152,607	153,462
1 year to 2 years (inclusive)	107,442	119,559
2 years to 3 years (inclusive)	87,115	90,302
3 years to 5 years (inclusive)	131,638	140,888
More than 5 years	83,550	111,467
Total undiscounted lease liabilities	562,352	615,678
Lease liabilities on statement of financial position	514,281	555,035

Note:

(i) The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases or leases of low value assets. In 2024, the Group's operating expenses include lease expenses relating to short-term leases and leases of low-value assets of RMB18.19 million (2023: RMB30.39 million).

Early retirement and supplementary retirement plans		
(Note (ii))	94,340	84,310
Total	1,090,741	758,284

Notes:

(i) Pursuant to the relevant laws and regulations of the PRC, the Group participated in a defined contribution basic pension insurance and unemployment insurance under the social insurance system established and managed by government authorities, and annuity plan.

As for defined contribution plan, forfeited contributions may not be used by the Group to reduce the existing level of contributions.

(ii) Early retirement and supplementary retirement plans

Early retirement plan

The Bank provides early retirement benefit to employees who voluntarily agreed to retire before the retirement age during the period from the date of early retirement to the statutory retirement date.

Supplementary retirement plan

The Bank provides a supplementary retirement plan to its eligible employees. The relevant obligations are recognised in accordance with the accounting policy in Note 2(12).

In accordance with the projected unit credit method, the Bank measures the obligations using actuarial assumptions to estimate the present value of the payables of early retirement and supplementary retirement plan.

Primary assumptions used:

31 December 2024 31 December 2023

Discount rate — early retirement plans	1.25%	2.50%
Discount rate — supplementary retirement plan	ns 2.00 %	3.00%

Assumptions regarding future mortality experience are based on the China Life Insurance Mortality Table (2010-2013), which is published historical statistics in China.

As at 31 December 2024 and 31 December 2023, there was no significant change in liabilities of early retirement and supplementary retirement plans that was attributable to changes in actuarial assumptions.

39 OTHER EQUITY INSTRUMENTS

(1) Perpetual bonds outstanding at the end of the year

The Bank's undated capital bonds (the "**Perpetual bonds**") outstanding in the statement of financial position as at 31 December 2024 are as follows:

Financial instrument issued	Issue date	Accounting classification	Interest rate	Issue price	Amount (in thousands of units)	In RMB (in thousands)	Maturity	Conversion
2022 Domestic Perpetual Bond Series 1 2022 Domestic Perpetual Bond	14 July 2022	Equity	3.70%	100RMB/Unit	40,000	4,000,000	None	None
Series 2	16 Aug 2022	Equity	3.55%	100RMB/Unit	24,000	2,400,000	None	None
Total						6,400,000		
Less: Issue costs						(4,217)		
Book value						6,395,783		

(2) Main Clauses and Basic information

With the approvals of relevant regulatory authorities, the Bank issued RMB4 billion and RMB2.4 billion of undated capital bonds on 14 July 2022 and 16 August 2022 (hereinafter referred to as "2022 Domestic Perpetual Bond Series 1" and "2022 Domestic Perpetual Bond Series 2" respectively, collectively "Domestic Perpetual Bonds") in the National Interbank Bond Market. The funds raised by the Bank from the bonds are used to supplement additional tier 1 capital of the Bank in accordance with the relevant laws and approvals by regulatory authorities.

(a) Interest

Each Domestic Perpetual Bond has a par value of RMB100, and the interest rate of the bonds for the first five years are 3.70% for 2022 Domestic Perpetual Bond Series 1 and 3.55% for 2022 Domestic Perpetual Bond Series 2, resetting every 5 years. The rates are determined by a benchmark rate plus a fixed spread. The initial fixed spreads are the difference between the interest rate and the benchmark rate as determined at the time of issuance. The fixed spread will not be adjusted once determined during the duration period. The interest of Domestic Perpetual Bond shall be paid annually.

(b) Interest stopper and setting mechanism

The interest payment for both the Domestic Perpetual Bonds is non-cumulative. The Bank shall have the right to cancel, in whole or in part, distributions on the interest payment and any such cancellation shall not constitute an event of default. The Bank may, at its sole discretion, use the proceeds from the cancelled distributions to meet other obligations as they fall due. However, the Bank shall not distribute profits to ordinary shareholders until resumption of full interest payment.

(c) Order of distribution and liquidation method

The claims in respect of Domestic Perpetual Bonds will be subordinated to claims of depositors, general creditors, and subordinated indebtedness that rank senior to Domestic Perpetual Bonds, and will rank in priority to all classes of shares held by shareholders of the Bank. Domestic Perpetual Bond will rank pari passu with the claims in respect of any other Additional Tier 1 Capital instruments of the Bank that rank pari passu with the perpetual bonds.

(d) Write down conditions

Upon the occurrence of the non survival trigger event, without the need for the consent of the holders of the Domestic Perpetual Bonds, the Bank has the right to write down all or part of the aggregate amount of the Bonds then issued and outstanding. The non survival trigger event means the earlier of the following events: (1) the regulatory authority having concluded that without a write-off of the Bank's capital, the Bank would become non-viable, and (2) the relevant authorities having concluded that without a public sector injection of capital or equivalent support, the Bank would become non-viable. The write down is unrecoverable.

(e) Redemption

The duration of the Domestic Perpetual Bonds is the same as the continuing operation of the Bank. Five years after the issuance date of the Domestic Perpetual Bonds, the Bank shall have the right to redeem them in whole or in part on each distribution payment date (including the fifth distribution payment date since the issuance). In the event that the Domestic Perpetual Bonds are not classified as additional tier 1 capital due to unpredicted changes in regulations, the Bank shall have the right to redeem Domestic Perpetual Bonds fully instead of partly.

(3) Changes in perpetual bonds outstanding

shares	967,448	875,304

40 RESERVES

(1) Capital reserve

Capital reserve mainly includes share premium arising from the issuance of new shares at prices in excess of nominal value.

(2) Surplus reserve

The surplus reserve at the end of the reporting period represented statutory surplus reserve fund and discretionary surplus reserve fund.

Pursuant to the Company Law of the PRC and the Article of Association, the Bank is required to appropriate 10% of its net profit as determined under the Accounting Standards for Business Enterprises issued by the MOF after offsetting prior year's accumulated losses, to statutory surplus reserve fund until the reserve fund balance reaches 50% of its registered capital.

(3) General reserve

Pursuant to the "Measures on Impairment Allowances for Financial Enterprises (Cai Jin [2012] No.20)" issued by the MOF in March 2012, the Bank is required to set aside a general reserve from net profit as profit appropriation which should not be lower than 1.50% of the ending balance of its gross risk-bearing assets.

The Bank's subsidiaries appropriate their profits to the general reserve according to the applicable industry regulations.

The Bank set aside a general reserve upon approval by the board of directors. The general reserve balance of the Bank as at 31 December 2024 amounted to RMB7.972 billion (31 December 2023: RMB7.072 billion), which has reached 1.50% of the year ending balance of the Bank's gross risk-bearing assets respectively.

Other net operating income	2,033	2,033

Intra-group balances and transactions are eliminated in full in preparing the consolidated financial statements.

(3) Key management personnel

The Bank's key management personnel includes people having authority and responsibility, directly or indirectly, to plan, command and control the activities of the Bank, including directors, supervisors and senior management at bank level.

	2024	2023
Remuneration of key management personnel	19,234	20,237

The total compensation package for certain key management personnel for the year ended 31 December 2024 have not yet been finalised. The difference in emoluments is not expected to have significant impact on the Group's financial statements for the year ended 31 December 2024.

The Bank enters into banking transactions with key management personnel in the normal course of business. For the reporting periods, the Bank had no material banking transactions and balances with key management personnel. As at 31 December 2024, the credit card overdraft balance of the Bank to the key management personnel amounted to RMB55.4 thousand (31 December 2023: RMB15.2 thousand), which have been included in loans and advances to related parties stated in Note 43(2).

(4) Transactions with the annuity

Except for normal contributions, there were no other related party transactions in the enterprise annuity funds established by the Group during the reporting period.

44 SEGMENT REPORTING

Segment reporting is disclosed in accordance with the accounting policy set out in Note 2(22).

The Group manages its businesses by business lines. Segment assets and liabilities, and segment income, expense and operating results are measured in accordance with the Group's accounting policies. Internal charges and transfer pricing of transactions between segments are determined for management purpose and have been reflected in the performance of each segment. Interest income and expenses earned from third parties are referred to as "External net interest income/expense". Net interest income and expenses arising from internal charges and transfer pricing adjustments are referred to as "Internal net interest income/expense".

Segment income, expense, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Segment income, expenses, assets, and liabilities are determined before intra-group balances, and intra-group transactions are eliminated as part of the consolidation process. Segment capital expenditure is the total payment during the period to acquire property and equipment, intangible assets and other long-term assets.

The Group defines its reporting segments based on the following for management purpose:

Corporate banking

This segment represents the provision of a range of financial products and services to corporations, government agencies and financial institutions. The products and services include corporate loans, deposit taking activities, agency services, remittance and settlement services.

Retail banking

This segment represents the provision of a range of financial products and services to individual customers. The products and services comprise personal loans and deposit services.

Financial market business

This segment covers financial market operations. The financial market business enters into inter-bank money market transactions, repurchases transactions, investments in debt securities, and non-standardised debt investments, etc.

Unallocated items and others

This segment contains related business of the subsidiaries except BQD Wealth Management Company Limited., head office assets, liabilities, income and expenses that are not directly attributable to a segment.

45 RISK MANAGEMENT

Credit commitments

The main risks of the Group are described and analysed as follows:

53,460,793

The board of directors has the ultimate responsibility for risk management and oversees the Group's risk management functions through the Risk Management and Consumer Right Protection Committee, the Audit Committee and the Related Party Transaction Control Committee, etc.

In accordance with the risk management strategy determined by the board of directors, the senior management keeps abreast of the level of risk and the management status, enabling the Group to have sufficient resources to develop and implement risk management policies and systems, and to monitor, identify and control risks in various businesses.

The Group establishes the enterprise risk management committee, which is mainly in charge of the enterprise risk management. Each department within the Group implements risk management policies and procedures in accordance with their respective management functions and is responsible for their own risk management in their respective business areas.

Each branch establishes a branch risk management committee, which is mainly in charge of the management and control of various risks of the branch, evaluating the risk status of the branch regularly, determining and improving the risk management and internal control measures and methods, etc., under the guidance from relevant risk management departments of the head office. Each branch should report major risk events to the relevant risk management department of the head office, and carry out risk enhancement plans or improvements proposed by the head office department.

The Group has exposure to the following risks from its use of financial instruments in the normal course of the Group's operations, which mainly include: credit risk, interest rate risk, foreign currency risk, liquidity risk and operational risk. This note presents information about the Group's exposure to each of the above risks and their sources, as well as the Group's risk management objectives, policies and processes for measuring and managing risks.

The Group aims to seek an appropriate balance between the risks and benefits from its use of financial instruments and to mitigate the adverse effects that the risks of financial instruments have on the Group's financial performance. Based on such objectives, the Group has established policies and procedures to identify and analyse these risks, to set appropriate risk limits and controls, and to constantly monitor the risks and utilisation of limits by means of reliable and up-to-date management information systems.

(1) Credit risk

(a) Definition and scope

Credit risk represents the financial loss that arises from the failure of a debtor or counterparty to discharge its contractual obligations or commitments to the Group. Credit risk mainly arises from loan portfolio, investment portfolio, guarantees and various other on- and off-balance sheet credit risk exposures.

The Risk Management and Consumer Right Protection Committee of the Board monitors the controls of credit risk, and regularly reviews related reports on risk profile. Credit risk management is under the unified leadership of the Comprehensive Risk Management Committee of the head office. Each business unit is required to implement credit policies and procedures, and is responsible for the quality and performance of its credit portfolio and for monitoring and controlling all credit risks in its portfolios, including those subject to central approval.

Without taking account of any collateral and other credit enhancements, the maximum exposure to credit risk is represented by the carrying amount of each type of financial assets and the contract amount of credit commitments. In addition to the Group's credit commitments disclosed in Note 45(1), the Group did not provide any other guarantee that might expose the Group to credit risk. The maximum exposure to credit risk in respect of above credit commitments as at the end of the reporting period is disclosed in Note 45(1).

In order to ensure that the current risk classification of financial assets of the Group meets requirements of the Measures for Risk Classification of Financial Assets of Commercial Banks (Order No. 1 [2023] of the China Banking and Insurance Regulatory Commission and People's Bank of China), the risk classification of financial assets of the Group shall be adjusted dynamically at least quarterly. Financial assets are classified by their level of risk into the five categories of Normal, Special-mention, Substandard, Doubtful, and Loss, with the latter three collectively referred to as non-performing assets.

The core of the five categories are defined as follows:

Normal: The debtor is capable of meeting its contractual obligations and there is no objective

evidence indicating that the principal, interests, and income cannot be paid in full and

on time.

Special-mention: The debtor is currently capable of paying the principal, interests, and income

notwithstanding a number of factors that might adversely affect its capacity to meet its

contractual obligations.

Substandard: The debtor is incapable of paying the principal, interests, or income in full or the

financial assets have undergone credit impairment.

Doubtful: The debtor has already been incapable of paying the principal, interests, or income in

full and the financial assets have undergone significant credit impairment.

Loss: None or only a minimum fraction of the financial assets can be recovered after exhausting

all available options.

(b) Credit risk assessment method

Stage of financial instruments

The Group classifies financial instruments into three stages and makes allowances for ECL accordingly, depending on whether credit risk on that financial instrument has increased significantly since initial recognition.

The three risk stages are defined as follows:

- Stage 1: A financial instrument of which the credit risk has not significantly increase since initial recognition. An amount equal to 12-month ECL is recognised as loss allowance.
- Stage 2: A financial instrument with a significant increase in credit risk since initial recognition but is not considered to be credit-impaired. An amount equal to lifetime ECL is recognised as loss allowance.
- Stage 3: A financial instrument is considered to be credit-impaired as at the end of the reporting period.

 An amount equal to lifetime ECL is recognised as loss allowance.

Financial instruments that have low credit risk

The credit risk on a financial instrument is considered low if the financial instrument has a low risk of default, the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

Significant increases in credit risk

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Group compares the risk of default occurring on the financial instrument assessed as at the end of the reporting period with that assessed at the date of initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort, including forward-looking information. In particular, the following information is taken into account:

- Failure to make payments of principal or interest on their contractually due dates;
- An actual or expected significant deterioration in a financial instrument's external or internal credit rating;
- An actual or expected significant deterioration in the operating results of the debtor; and
- Existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

Definition of default

The Group considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- The financial asset is more than 90 days past due.

Credit impairment assessment

At the end of each reporting period, the Group assesses whether financial assets carried at amortised cost and financial assets measured at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the issuer or borrower;
- A breach of contract, such as a default or delinquency in interest or principal payments for over 90 days, etc;
- For economic or contractual reasons relating to the borrower's financial difficulty, the Group having granted to the borrower a concession that would not otherwise consider;
- It is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- The disappearance of an active market for that financial asset because of the issuer's or borrower's financial difficulties.

Based on whether there is significant increase in credit risk since initial recognition and whether the financial instrument has suffered credit impairment, the Group measures allowances for loss of different financial instruments with 12-month ECL or lifetime ECL respectively. The expected credit loss is the result of the product of three key parameters, namely the probability of default (PD), loss given default (LGD) and exposure at default (EAD), taking into account the time value. The definitions of these terms are as follows:

- PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining lifetime of the obligation. The Group's PD is adjusted based on the results of the internal rating model, taking into account the forward-looking information to reflect the influence on future's point-in-time PD.
- LGD is expressed as a percentage loss per unit of exposure at the time of default. It varies depending on the type of products, collateral and other factors.
- EAD is based on the amounts the Group expects to be at risk at the time of default.

The Group considered credit risk characteristics such as product type, client type and the industry in which the client operates, and has divided exposures with common credit risk characteristics into separate groups. The impairment of expected credit loss is calculated by the method of single evaluation and combination evaluation The Group obtained sufficient information to ensure it is statistically reliable.

During the reporting period, there has been no significant changes in the estimate techniques and key assumptions of the Group.

The impairment loss on credit-impaired corporate loans and advance to customers applied cash flow discount method, if there is objective evidence that an impairment loss on a loan or advance has incurred, the amount of the loss is measured as the difference between the asset's gross carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The allowance for impairment loss is deducted in the carrying amount. The impairment loss is recognised in the statement of profit or loss. In determining allowances on an individual basis, the following factors are considered:

- The sustainability of the borrower's business plan;
- The borrower's ability to improve performance once a financial difficulty has arisen;
- The estimated recoverable cash flows from projects and liquidation;
- The availability of other financial support and the realisable value of collateral; and
- The timing of the expected cash flows.

It may not be possible to identify a single, or discrete events that result in the impairment, but it may be possible to identify impairment through the combined effect of several events. The impairment losses are evaluated at the end of each reporting period, unless unforeseen circumstances require more careful attention.

Forward-looking information contained in ECL

Both the assessment of significant increase in credit risk since initial recognition and the measurement of ECL of financial instruments involve forward-looking information.

The Group assumes three economic scenarios: the base scenario in line with the average internal forecast; the upside scenario and the downside scenario. The average scenario has the highest weighting. Weighted credit loss is the expected credit loss calculated by assigning scenario weighting of multiple scenarios.

Based on the analysis on historical data, the Group periodically assessed alternative macroeconomic indicators and identified key economic indicators that affect the credit risk and ECL of business types, including fixed assets investment, industry added value, and broad money supply etc. The Group identified the relations between these economic indicators and the probability of default historically by conducting regression analysis, and identified the expected probability of default by predicting future economic indicators.

For the year ended 31 December 2024, the Group has taken into account different macroeconomic scenarios and made forward-looking forecasts of key economic indicators, including the average forecasted year-on-year growth rate of fixed assets investment, used to estimate ECL, which is about 3.85% in the neutral scenario.

The Group has carried out sensitivity analysis of key economic variables, used in forward-looking measurement. As at 31 December 2024 and 31 December 2023, when the key economic indicators in the neutral scenario move up or down by 10.00%, the ECL will not change by more than 5.00%.

Similar to other economic forecasts, there is highly inherent uncertainty in the assessment of estimated economic indicators and the probability of occurrence, and therefore, the actual results may be materially different from the forecasts. The Group believes that these forecasts reflect the Group's best estimate of possible outcomes.

Other forward-looking factors not incorporated in above scenarios, such as the impact of regulatory and legal changes, have also been taken into account. However, they were not considered to have significant impact, and the ECL were not adjusted accordingly. The Group reviews and monitors the appropriateness of the above assumptions on a quarterly basis.

(c) Assessing credit risk of financial assets after the amendment of contractual cash flows

In order to maximise cash collection, the Group may modify the contractual terms of loans as a result of business negotiations or due to financial difficulties of the borrowers at times.

Such modification may include extended payment term arrangements, payment holidays and payment forgiveness. The Group's loan rescheduling policies and practices are based on indicators or criteria which, in the judgment of management, indicate that payment will most likely continue. These policies are kept under continuous review. The restructuring of loans is most common in the management of medium and long-term loans.

(d) Collaterals and other credit enhancements

The Group and its subsidiaries have established a range of risk management policies and adopted various methods to mitigate credit risk. A critical method for the Group to control its credit risks is to get collateral, security deposits and guarantees from enterprises or individuals. The Group has specified acceptable types of collaterals, mainly including the following:

- Real estate and land use rights
- Machinery and equipment
- Right to receive payments and accounts receivable
- Financial instruments such as time deposits, debt securities and equities

In order to minimise its credit risk, once an indication of impairment has been identified with an individual loan, the Group will seek additional collateral from counterparties/require additional guarantors or reduce the credit limit. It is the Group's policy to dispose of repossessed assets in an orderly manner. In general, the Group does not hold repossessed assets for business use.

Collateral held as security for financial assets other than loans and receivables is determined by the nature of the financial instruments. Debt securities are generally unsecured while asset-backed securities and other similar instruments, are usually secured by portfolios of financial instruments.

(e) Maximum credit risk exposure

As at the end of the reporting period, the maximum credit risk exposure of the Group without taking account of any collateral and other credit enhancements is set out below:

The Group

	31 December 2024	31 December 2023
Deposits with the central bank	48,675,542	30,511,651
Deposits with banks and other financial institutions	3,495,177	2,210,368
Placements with banks and other financial institutions	14,844,347	14,021,225
Derivative financial assets	55,310	149,377

Total	724,208,508	630,104,194

(f) Risk concentration

Credit risk is often greater when transactions are concentrated in one single industry or have comparable economic features. In addition, different industrial sectors have their sector unique characteristics in terms of economic development, and could present a different credit risk.

The composition of the Group's gross loans and advances to customers (excluding accrued interest) by industry is analysed as follows:

	31 Decem	ber 2024	31 December 2023		
	Amount	Percentage	Amount	Percentage	
Wholesale and retail trade	49,560,902	14.55%	40,112,000	13.37%	
Manufacturing	40,561,826	11.91%	27,820,169	9.27%

Distribution of debt securities investments (excluding accrued interest) analysed by rating

The Group adopts a credit rating approach to manage the credit risk of the debt securities portfolio held. The ratings are obtained from Wind, Bloomberg Composite, or major rating agencies where the issuers of debt securities are located. Debt securities investments analysed by rating as at the end of the reporting period are as follows:

	31 December 2024							
	Unrated	AAA	AA	A	Below A	Total		
Debt securities (analysed by type of issuers)								
Governments and the central bank	_	55,721,386	_	_	-	55,721,386

(2) Market risk

Market risk is the risk of loss, in respect of the Group's on- and off-balance sheet activities, arising from adverse movements in market rates including interest rates, foreign exchange rates and other prices, etc.

The Group has implemented a market risk management system that formulates procedures to identify, measure, monitor and control market risks. This system aims to minimise market risk to an acceptable level through examining and approving new products and limit management.

The Group adopts sensitivity analysis, interest repricing gap analysis and foreign currency gap analysis to measure and monitor market risks. The Group classifies transactions as banking book and trading book transactions, and applies different approaches based on the nature and characteristics of these books to monitor the associated risks.

The Group is exposed to market risk in the ordinary course of business, which includes the interest rate risk and the currency risk.

(a) Interest rate risk

Interest rate risk refers to the risk that the adverse changes in interest rate levels and maturity structures will cause the overall revenue and economic value of financial instruments to suffer losses. The Group's interest rate exposures mainly comprise the mismatching of interest-earning assets and interest-bearing liabilities' repricing dates, as well as the effect of interest rate volatility on trading positions.

The Group primarily uses gap analysis to assess and monitor its repricing risk and adjusts the portfolio mix of floating and fixed rate loans, the loan repricing cycle, as well as optimises the term structure of its customer deposits.

The Group implements various methods, such as sensitivity analysis and scenario simulation to measure and monitor interest risk exposure and limits. Such interest rate sensitivity and risk exposure are set regularly, and the respective limits are also monitored, managed and reported on a regular basis.

The following tables indicate the assets and liabilities analysis as at the end of the reporting period by the expected next repricing dates or by maturity dates, depending on which is earlier:

	31 December 2024

31 December 2023

Notes:

(i) As at 31 December 2024 and 31 December 2023, the category "Less than three months" of the Group's loans and advances to customers includes overdue loans and advances (net of allowances for impairment losses) of RMB1,679 million and RMB1,687 million, respectively.

(ii) Financial investments include financial investments measured at FVTPL, financial investments measured at FVOCI, financial investments measured at amortised cost.

The Group uses sensitivity analysis to measure the potential effect of changes in interest rates on the Group's net interest income and equity. The following table sets forth the effect on the Group's net interest income and equity from possible and reasonable interest rate fluctuations with all other variables held constant. The effect on net interest income refers to the effect of certain interest rate changes on the net interest income generated by financial assets and liabilities that are held at the end of the reporting period and whose interest rate are expected to be repriced within one year. The effect on equity refers to the effect of certain interest rate changes on the fair value change generated by debt investments measured at FVOCI that are held at the end of the reporting period.

Interest rates decrease by 100 bps	961,661	731,924
Changes in annualised equity	31 December 2024	31 December 2023
	(Decrease)/	(Decrease)/
	Increase	Increase
Interest rates increase by 100 bps	(1,895,430)	(2,301,467)
Interest rates decrease by 100 bps	2,009,853	2,465,394

This sensitivity analysis is based on a static interest rate risk profile of the assets and liabilities and certain simplified assumptions. The analysis shows how annualised interest income and equity would have been affected by the repricing of the Group's assets and liabilities. The analysis is based on the following assumptions:

- Regardless of subsequent changes, the analysis is based on the static gap at the end of the reporting period;
- In measuring the effect of changes in interest rates on the Group's net interest income, all assets and liabilities that reprice or mature within three months and after three months but within one year reprice or mature in the beginning of the respective periods;
- Interest rates on deposits with the central bank and demand deposits deposited and absorbed remain unchanged;
- There is a parallel shift in the yield curve and in interest rates;
- There are no other changes to the portfolio and all positions will be retained and rolled over upon maturity;
- other variables (including exchange rates) remain unchanged; and
- no consideration of impact on customers' behavior, market price and off-balance sheet business resulting from interest rate changes.

The analysis does not take into account the effect of risk management measures taken by management. Due to the assumptions adopted, actual changes in the Group's net interest income and equity resulting from increases or decreases in interest rates may differ from the results of this sensitivity analysis.

(b) Currency risk

Currency risk is the risk of losses caused by adverse changes in market exchange rates. The Group's currency risk mainly arises from the foreign currency portfolio within the treasury's proprietary investments, and other foreign currency exposures. The Group manages currency risk by matching its foreign currency denominated assets with corresponding liabilities in the same currencies.

The currency exposures of the Group's assets and liabilities as at the end of the reporting period are as follows:

		31 Decem	ber 2024

Note:

(i) Financial investments include financial investments measured at FVTPL, financial investments measured at FVOCI, and financials investment measured at amortised cost.

The Group uses sensitivity analysis to measure the potential effect of changes in foreign currency on the Group's net profit and equity. The following table sets forth the results of the Group's foreign exchange sensitivity analysis at the end of the reporting period.

Changes in annualised net profit and equity	31 December 2024	31 December 2023
	Increase/	Increase/
	(Decrease)	(Decrease)
Foreign exchange rate increase by 100 bps	91	4
Foreign exchange rate decrease by 100 bps	(91)	(4)

This sensitivity analysis is based on a static foreign exchange exposure profile of assets and liabilities and certain simplified assumptions. The analysis is based on the following assumptions:

- the foreign exchange sensitivity is the gain or loss recognised as a result of 100 basis point fluctuation in the foreign currency exchange rates against RMB;
- the fluctuation of exchange rates by 100 basis points at the reporting date is based on the assumption of exchange rates movement over the next 12 months;
- the exchange rates against RMB for all foreign currencies change in the same direction simultaneously;
- Since the Group's assets and liabilities in other foreign currencies (excluding in USD) are not significant in proportion to the total assets and total liabilities, the possible impact of other foreign currencies on the Group's net profit and equity is calculated at the amount converted into USD in the above sensitivity analysis;
- the foreign exchange exposures calculated include both spot foreign exchange exposures, forward foreign exchange exposures and options, and all positions will be retained and rolled over upon maturity;
- other variables (including interest rates) remain unchanged; and
- no consideration of impact on customers' behavior and market price resulting from exchange rate changes.

The analysis does not take into account the effect of risk management measures taken by management. Due to the assumptions adopted, actual changes in the Group's gain or loss and equity resulting from increases or decreases in foreign exchange rates may differ from the results of this sensitivity analysis.

(3) Liquidity risk

Liquidity risk is the risk that a commercial bank is unable to obtain funds on a timely basis or obtain funds at a reasonable cost to meet repayment obligations or sustain its asset business even if a bank's solvency remains strong. The liquidity risk management is to ensure that the Group has sufficient cash flow to meet payment obligations and fund business operations on a timely basis. To achieve this, the Group should have the ability to make full payment due on demand deposits or early withdrawal of term deposits, make full repayment of placements upon maturity, or meet other payment obligations. The Bank also needs to comply with statutory requirements on liquidity ratios, and actively carry out lending and investment business. The Group monitors the future cash flow according to its liquidity management policies, and keeps its high liquidity assets at an appropriate level.

Under the guidance of the Asset and Liability Management Committee, the Financial Planning Department performs daily management of liquidity risk in accordance with the liquidity management objectives, and to ensure the normal payment of the business.

The Group holds an appropriate amount of liquid assets (such as deposits with the central bank, other short-term deposits and securities) to ensure liquidity needs and unpredictable demand for payment in the ordinary course of business. A substantial portion of the Group's assets are funded by deposits from customers. As a major source of funding, customer deposits have been growing steadily in recent years and are widely diversified in terms of type and duration.

The Group principally uses liquidity gap analysis to measure liquidity risk. Stress testing is also adopted to assess the impact of liquidity risk.

(a) Maturity analysis

The following tables provide an analysis of assets and liabilities of the Group into respective maturity groupings based on the remaining periods to repayment at the end of the reporting period. The actual remaining maturity of the Group's assets and liabilities may vary significantly from the following analysis. For example, demand deposits from customers are expected to maintain a stable or increasing balance although they have been classified as repayable on demand in the following tables.

		31 December 2024

Notes:

(i) Financial investments include financial assets measured at FVTPL, financial investment measured at FVOCI, and financial investment measured at amortised cost.

For cash and deposits with the central bank, the indefinite period amount represents statutory deposit (ii) reserves, fiscal deposits and foreign exchange risk reserves maintained with the PBOC. Other equity instruments are reported under indefinite period. For loans and advances to customers, financial investments and long-term receivables, the "indefinite" period amount represents the balance being credit-impaired or not credit-impaired but overdue for more than one month, and the balance not credit-impaired but overdue within one month is included in "repayable on demand".

(b) Analysis on contractual undiscounted cash flows of non-derivative financial liabilities

The following tables provide an analysis of the contractual undiscounted cash flow of the non-derivative financial liabilities at the end of the reporting period. The Group's actual cash flows on these non-derivative instruments may vary significantly from the following analysis. For example, demand deposits from customers are expected to maintain a stable or increasing balance although they have been classified as repayable on demand in the following tables.

					31 December 20	24

(4) Operational risk

Operational risk refers to the risk of loss arising from problems with internal procedures, employees, information technology systems, and external events, including legal risk, but excluding strategic risk and reputational risk.

The board of directors of our bank undertakes the ultimate responsibility for operational risk management, while the senior management undertakes the responsibility for implementing operational risk management. The Group has established "three lines of defences" to manage operational risk on an end-to-end basis.

(5) Capital management

The Group's capital management mainly includes capital adequacy ratio management, capital financing management and economic capital management. Among them, capital adequacy ratio management is especially important. The Group calculates capital adequacy ratios in accordance with the guidance issued by the former CBRC. The capital of the Group is divided into three pieces: core tier-one capital, additional tier-one capital and tier-two capital.

As the focus of the Group's capital management, capital adequacy ratio management reflects the Group's sound operations and risk management capability. The Group's capital adequacy ratio management objectives are to meet the legal and regulatory requirements, and to prudently determine the capital adequacy ratio under realistic exposures with reference to the capital adequacy ratio levels of leading banks and the Group's operating situations.

The Group considers its strategic development plans, business expansion plans and risk variables in conducting its scenario analysis, stress testing and other measures to forecast, plan and manage capital adequacy ratio. The required information is filed with the regulatory authority by the Group periodically.

The Group calculates the capital adequacy ratio in accordance with the Regulation Governing Capital of Commercial Banks and other relevant requirements as at 31 December 2024. The Group calculates the capital adequacy ratio in accordance with the Regulation Governing Capital of Commercial Banks (Provisional) and other relevant requirements as at 31 December 2023.

	31 December 2024	31 December 2023
Total core tier-one capital	38,016,853	33,328,054
- Share capital	5,820,355	5,820,355
– Eligible portion of capital reserve	10,687,091	10,687,634
 Other comprehensive income 	2,716,533	947,211
- Surplus reserve	3,106,154	2,718,114
- General reserve	8,511,286	7,483,824
 Retained earnings 	6,695,179	5,011,018
 Eligible portion of non-controlling interests 	480,255	659,898
Core tier-one capital deductions	(379,124)	(923,175)
Net core tier-one capital	37,637,729	32,404,879
Other tier-one capital	6,459,817	6,483,769
 Additional tier-one capital instruments and related premium 	6,395,783	6,395,783
 Eligible portion of minority interests 	64,034	87,986
Net tier-one capital	44,097,546	38,888,648
Tier two capital	12,932,928	10,358,946
- Eligible portions of tier-two capital instruments issued	8,000,000	6,000,000
- Surplus allowances for impairment	4,804,860	4,182,973
 Eligible portion of non-controlling interests 	128,068	175,973
Total net capital	57,030,474	49,247,594
Total risk weighted assets	413,212,378	384,977,512
Core tier-one capital adequacy ratio	9.11%	8.42%
Tier-one capital adequacy ratio	10.67%	10.10%
Capital adequacy ratio	13.80%	12.79%

46 FAIR VALUE

(1) Methods and assumptions for measurement of fair value

Fair value estimates are generally subjective in nature, and are made as of a specific point in time based on the characteristics of the financial instruments and relevant market information. The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: techniques for which all inputs that have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs that have a significant effect on the recorded fair value are not based on observable market data.

The Group has established policies and internal controls with respect to the measurement of fair value, specify the framework of fair value measurement of financial instruments, fair value measurement methodologies and procedures.

The Group adopts the following methods and assumptions when evaluating fair value:

(a) Debt securities investments

The fair value of debt securities that are traded in an active market is based on their quoted market prices in an active market at the end of the reporting period.

(b) Other financial investments and other non-derivative financial assets

Fair value is estimated as the present value of the future cash flows, discounted at the market interest rates at the end of the reporting period.

(c) Debt securities issued and other non-derivative financial liabilities

The fair value of debt securities issued is based on their quoted market prices at the end of the reporting period, or the present value of estimated future cash flows. The fair value of other non-derivative financial liabilities is evaluated at the present value of estimated future cash flows. The discount rates are based on the market interest rates at the end of the reporting period.

(d) Derivative financial instruments

Derivative financial instruments valued using a valuation technique with market observable inputs are mainly interest rate swaps, foreign exchange forwards and swaps, etc. The most frequently applied valuation techniques include discounted cash flow model, etc. The models incorporate various inputs including foreign exchange spot and forward rates, foreign exchange rate volatility, interest rate yield curves, etc.

(2) Financial instruments measured at fair value

The following tables show an analysis of financial instruments measured at fair value by level of the fair value hierarchy:

	31 December 2024

Derivative financial liabilities	1,071			683					1,754
Total financial liabilities	1,071			683					1,754

(3) Transfers between levels

For the year ended 31 December 2024 and 31 December 2023, there were no transfers between levels.

(4) Valuation of financial instruments with significant unobservable inputs

A majority of the financial instruments classified as level 3 fair value are discounted bills, asset management plans and trust fund plans. As not all of the inputs needed to estimate the fair value of these assets are observable, the Group classified these underlying assets within Level 3 of the fair value hierarchy. The significant unobservable inputs related to these assets are those parameter relating to credit risk, liquidity and discount rate. Management has made assumptions on unobservable inputs based on observed indicators of impairment, significant changes in yield, external credit ratings and comparable credit spreads, but the fair value of these financial assets could be different from those disclosed.

(5) Level 2 of the fair value hierarchy

A majority of the financial instruments classified as level 2 fair value are RMB bonds. The fair value of these bonds are determined based on the valuation results provided by China Central Depository Trust & Clearing Co., Ltd., which are determined based on a valuation technique for which all significant inputs are observable market data.

(6) Fair value of financial assets and liabilities not measured at fair value

(i) Cash and deposits with the central bank, borrowings from the central bank, deposits and placements with/from banks and other financial institutions, financial assets held under resale agreements and sold under repurchase agreements

Given that these financial assets and financial liabilities mainly mature within one year or adopt floating interest rates, their carrying amounts approximate their fair value.

(ii) Loans and advances to customers measured at amortised cost, non-debt securities financial investments measured at amortised cost and long-term receivables

The estimated fair value of loans and advances to customers measured at amortised cost, non-debt securities financial investments measured at amortised cost and long-term receivables represents the amount of estimated future cash flows expected to be received, discounted at current market rates.

(iii) Debt securities financial investments measured at amortised cost

The fair value for debt securities financial investments measured at amortised cost is based on "bid" market prices or brokers'/dealers' price quotations. If relevant market information is not available, the fair value is based on quoted price of security products with similar characteristics such as credit risk, maturities and yield.

(iv) Deposits from customers

The fair value of current and saving deposits is the amount payable on demand at the end of the reporting period. The fair value of fixed interest-bearing deposits without quoted market prices is estimated based on discounted cash flows using interest rates for new deposits with similar remaining maturities.

(v) Debt securities issued

The fair value of debt securities issued is based on quoted market prices. For debt securities where quoted market prices are not available, a discounted cash flow model is used to calculate their fair value using current market rates appropriate for debt securities with similar remaining maturities.

The following tables summarise the carrying amounts, the fair value and the analysis by level of the fair value hierarchy of debt securities financial instruments measured at amortised cost and debt securities issued:

		31	December 20	24	
	Carrying amount	Fair value	Level 1	Level 2	Level 3

Total	89,269,785	89,587,286		89,587,286	

47 COMMITMENTS AND CONTINGENCIES

(1) Credit commitments

The Group's credit commitments take the form of bank acceptances bills, credit card limits, letters of credit and financial guarantees, etc.

Acceptances comprise of undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be settled simultaneously with the reimbursement from its customers. The contractual amounts of credit card commitments represent the amounts should the credit and facilities be fully drawn upon. The Group provides financial guarantees and letters of credit to guarantee the performance of customers to third parties.

	31 December 2024	31 December 2023
Bank acceptances	48,117,074	30,246,042
Unused credit card commitments	23,799,065	23,106,489
Financing letters of guarantees issued	11,032,397	9,269,141
Usance letters of credit	9,977,991	10,263,325
Non-financing letters of guarantees issued	1,044,271	1,502,597
Sight letters of credit	909,835	906,974
Irrevocable loan commitments	378,000	1,272,714
Total	95,258,633	76,567,282

Irrevocable loan commitments only include unused loan commitments granted to syndicated loans.

The Group may be exposed to credit risk in all the above credit businesses. As the facilities may expire without being drawn upon, the total of the contractual amounts shown above is not representative of expected future cash outflows.

For details of ECL of credit commitments, please refer to Note 37(2).

(2) Credit risk-weighted amount

	31 December 2024	31 December 2023
Credit risk-weighted amount of		
contingent liabilities and commitments	25,534,545	24,236,360

The credit risk-weighted amount represents the amount calculated in accordance with the Regulation Governing Capital of Commercial Banks and other relevant requirements as at 31 December 2024. The credit risk-weighted amount represents the amount calculated in accordance with the Regulation Governing Capital of Commercial Banks (Provisional) and other relevant requirements as at 31 December 2023. The risk weights are determined in accordance with the credit status of the counterparties, the maturity profile and other factors.

(3) Capital commitments

As at the end of the reporting period, the Group's authorised capital commitments are as follows:

	31 December 2024	31 December 2023
Contracted but not paid for	70,458	56,049

(4) Outstanding litigations and disputes

A number of outstanding litigations against the Group had arisen in the normal course of its operation as at 31 December 2024 and 31 December 2023. With the professional advice from counselors, the Group's management believes that the final result of such litigations will not have a material impact on the financial position or operations of the Group.

(5) Bond redemption obligations

As an underwriting agent of PRC government bonds, the Group has the responsibility to buy back those bonds sold by it should the holders decide to early redeem the bonds held. The redemption price for the bonds at any time before their maturity dates is based on the nominal value plus any interest unpaid and accrued up to the redemption date. Accrued interest payables to the bond holders are calculated in accordance with relevant rules of the MOF and the PBOC. The redemption price may be different from the fair value of similar instruments traded at the redemption date. Management of the Group expects the amount of redemption before the maturity dates of these bonds will not be material.

The redemption obligations below represent the nominal value of government bonds underwritten and sold, but not yet matured at the end of the reporting period:

		31 December 2024	31 December 2023
	Bond redemption obligations	4,167,547	3,822,379
(6)	Pledged assets		
		31 December 2024	31 December 2023
	Investment securities Discounted bills	63,543,344 4,110,439	59,141,534 10,072,938
	Total	67,653,783	69,214,472

Some of the Group's assets are pledged as collateral under repurchase agreements, borrowings from the central bank and deposits from customers.

The Group maintains statutory deposit reserves with the PBOC as required (Note 14). These deposits are not available for the Group's daily operations.

The Group's pledged assets in relation to the purchase of bills under resale agreements can be sold or repledged. As at 31 December 2024 and 31 December 2023, the Group did not have these discounted bills under resale agreements. As at 31 December 2024 and 31 December 2023, the Group did not sell or repledge any pledged assets which it has an obligation to repurchase when they are due.

48 INTERESTS IN STRUCTURED ENTITIES

(1) Structured entities sponsored by third party institutions in which the Group holds an interest

The Group holds an interest in some structured entities sponsored by third party institutions through investments in the notes issued by these structured entities. The Group does not consolidate these structured entities. Such structured entities include asset management plans, trust fund plans, asset-backed securities and investment funds. The nature and purpose of these structured entities are to generate fees from managing assets on behalf of investors and are financed through the issue of notes to investors.

The following tables set out an analysis of the carrying amounts of interests held by the Group as at 31 December 2024 and 31 December 2023 in the structured entities sponsored by third party institutions, as well as an analysis of the line items in the statement of financial position in which relevant assets are recognised:

		,	31 December 2024		
	Financial investments measured at FVTPL	Financial investments measured at FVOCI	Financial investments measured at amortised cost	Carrying amount	Maximum exposure
Investment funds Asset management plans Trust fund plans Asset-backed securities	51,184,364 777,284 346,069 720,268	2,492,185	515,175 - 6,192,895	51,184,364 1,292,459 346,069 9,405,348	51,184,364 1,292,459 346,069 9,405,348
Total	53,027,985	2,492,185	6,708,070	62,228,240	62,228,240
			31 December 2023		
	Financial	Financial	Financial		
	investments	investments	investments		
	measured at	measured at	measured at	Carrying	Maximum
	FVTPL	FVOCI	amortised cost	amount	exposure
Investment funds	43,799,513	_	_	43,799,513	43,799,513
Asset management plans	6,895,445	_	1,811,073	8,706,518	8,706,518
Trust fund plans	444,536	_	116,904	561,440	561,440
Asset-backed securities	107,227	4,789,048	922,411	5,818,686	5,818,686
Total	51,246,721	4,789,048	2,850,388	58,886,157	58,886,157

The maximum exposures to loss in the above structured entities are the amortised cost or the fair value of the assets held by the Group at the end of the reporting period in accordance with the line items of these assets recognised in the statement of financial position.

(2) Unconsolidated structured entities sponsored by the Group in which the Group holds an interest

The types of unconsolidated structured entities sponsored by the Group mainly include non-principal-guaranteed wealth management products. The nature and purpose of these structured entities are to generate fees from managing assets on behalf of investors. These structured entities are financed through the issue of notes to investors. Interest held by the Group includes fees charged by providing management services to these structured entities. As at 31 December 2024, the carrying amounts of the management and other service fee receivables being recognised was RMB192 million in the consolidated statement of financial position (31 December 2023: RMB190 million).

As at 31 December 2024, the amount of assets held by the unconsolidated non-principal guaranteed wealth management products, which are sponsored by the Group, was RMB199.326 billion (31 December 2023: RMB208.122 billion).

(3) Unconsolidated structured entities sponsored and issued by the Group after 1 January but matured before 31 December at the end of the reporting period in which the Group no longer holds an interest

During the year ended 31 December 2024, the amount of fee and commission income recognised from the above mentioned structured entities by the Group was RMB14 million (2023: RMB16 million).

During the year ended 31 December 2024, the aggregated amount of the non-principal-guaranteed wealth management products sponsored and issued by the Group after 1 January 2024 but matured before 31 December 2024 was RMB12.915 billion (2023: RMB6.862 billion).

(4) Consolidated structured entities

The consolidated structured entities of the Group are primarily asset-backed securities initiated by the Group and certain asset management plans invested by the Group. The Group controls these entities because the Group has power over, is exposed to, or has rights to variable returns from its involvement with these entities and has the ability to use its power over these entities to affect the amount of the Group's returns.

49 TRANSFERS OF FINANCIAL ASSETS

The Group enters into transactions in the normal course of business by which it transfers recognised financial assets to third parties or to structured entities. In some cases where these transfers may give rise to full or partial derecognition of the financial assets concerned. In other cases where the transferred assets do not qualify for derecognition as the Group has retained substantially all the risks and rewards of these assets, the Group continued to recognise the transferred assets in the statement of financial position.

(1) Repurchase transactions and securities lending transactions

Transfers of financial assets that do not qualify for derecognition mainly include debt securities held by counterparties as collateral under repurchase agreements and debt securities lent to counterparties under securities lending agreements. The counterparties are allowed to sell or repledge those securities sold under repurchase agreements in the absence of default by the Group, but has an obligation to return the securities at the maturity of the contract. The Group has determined that it retains substantially all the risks and rewards of these securities and therefore has not derecognised them.

(2) Asset securitisation

The Group enters into securitisation transactions in the normal course of business by which it transfers credit assets to structured entities which issue asset-backed securities to investors, or carries out trust beneficial rights registration and transfer business in China Credit Assets Registry & Exchange Co., Ltd..

Under the servicing arrangements with the independent trust company, the Group collects the cash flows of the transferred assets on behalf of the unconsolidated securitisation vehicle. In return, the Group receives a service fee that is expected to compensate the Group for servicing the related assets.

For the year ended 31 December 2024 and for the year ended 31 December 2023, the Group did not carry out new asset securitisation business.

(3) Transfer of non-performing loans

For the year ended 31 December 2024, the Group transferred loans and advances to customers to independent third parties with principal amount of RMB11 million (2023: RMB85 million), and with the transfer price (including overdue interest, penalty interest, etc.) of RMB12 million (2023: RMB88 million). The Group carried out an assessment based on the criteria as detailed in Note 2(4)(vii) and concluded that these transferred assets qualified for full derecognition in the statement of financial position.

50 FIDUCIARY ACTIVITIES

The Group commonly acts as a trustee, or in other fiduciary capacities, that result in its holding or managing assets on behalf of individuals, trusts and other institutions. These assets and any gains or losses arising thereon are not included in the statements of financial position as they are not the Group's assets.

As at 31 December 2024, the entrusted loans balance of the Group was RMB5.651 billion (31 December 2023: RMB5.603 billion).

51 COMPANY-LEVEL STATEMENT OF FINANCIAL POSITION

52 POSSIBLE IMPACT OF AMENDMENTS, NEW STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE FOR THE YEAR ENDED 31 DECEMBER 2024

Up to the date of issue of these financial statements, the International Accounting Standards Board has issued a number of new and revised IFRS Accounting Standards. For the purpose of preparing the financial statements, the Group has adopted all the new and revised IFRS Accounting Standards in issue which are relevant to the Group for the reporting period, except for any new standards or interpretations that are not yet effective for the accounting period ended 31 December 2024. The revised and new accounting standards and interpretations which are issued but not yet effective for the accounting period ended 31 December 2024, are set out below:

Effective for accounting periods beginning on or after

Lack of Exchangeability – Amendments to IAS 21	1 January 2025
Classification and Measurement of Financial Instruments	
Amendments to IFRS 9 and IFRS 7	1 January 2026
Annual Improvements to IFRS Accounting Standards - Volume 11	1 January 2026
IFRS 18 Presentation and Disclosure in Financial Statements	1 January 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	1 January 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	1 January

The Group has concluded that the adoption of them is unlikely to have a significant impact on the consolidated financial statements.

53 SUBSEQUENT EVENTS

The profit distribution plan

The profit appropriation of the Bank was proposed in accordance with the resolution of the Bank's board of directors meeting as disclosed in Note 41.

Up to the approval date of the financial statements, except for the above, the Group has no other significant subsequent events for disclosure.

54 COMPARATIVE FIGURES

For financial statements disclosure purpose, the Group made reclassification adjustments to some comparative figures.

UNAUDITED SUPPLEMENTARY FINANCIAL INFORMATION

(Expressed in thousands of Renminbi, unless otherwise stated)

The information set out below does not form part of the audited financial statements, and is included herein for information purposes only.

In accordance with the Listing Rules and Banking (Disclosure) Rules, the Group discloses the unaudited supplementary Financial Information as follows:

1 LIQUIDITY COVERAGE RATIO, LEVERAGE RATIO AND NET STABLE FUNDING RATIO

Liquidity coverage ratio, leverage ratio and net stable funding ratio are calculated in accordance with the relevant regulations promulgated by the National Financial Regulatory Administration and the former CBRC and based on the financial information prepared in accordance with the requirements of the Accounting Standards for Business Enterprises issued by the MOF.

(1) Liquidity coverage ratio

	31 December	31 December
	2024	2023
Qualified and high-quality current assets	95,465,058	75,270,402
Net cash outflows in the next 30 days	47,023,000	47,606,972
Liquidity coverage ratio (RMB and foreign currency)	203.02%	158.11%

Pursuant to the Administrative Measures for Liquidity Risk Management of Commercial Banks, a minimum liquidity coverage ratio of commercial banks 100% is required.

(2) Leverage ratio

	31 December	31 December
	2024	2023
Leverage ratio	5.79%	5.83%

The Group calculates the leverage ratio in accordance with the Regulation Governing Capital of Commercial Banks and other relevant requirements as at 31 December 2024. The Group calculates the leverage ratio in accordance with the Regulation Governing Capital of Commercial Banks (Provisional) and other relevant requirements as at 31 December 2023. According to the above provisions, a minimum leverage ratio 4% is required.

(3) Net stable funding ratio

	31 December	30 September
	2024	2024
Available stable funding	424,164,612	419,235,038
Required stable funding	352,570,107	342,817,507
Net stable funding ratio	120.31%	122.29%

Pursuant to the Administrative Measures for Liquidity Risk Management of Commercial Banks, a minimum net stable funding ratio of commercial banks 100% is required.

3 INTERNATIONAL CLAIMS

The Group regards all claims on third parties outside Chinese Mainland and claims dominated in foreign currency on third parties in Chinese Mainland as international claims.

International claims include loans and advances to customers, deposits with the central bank, deposits and placements with banks and other financial institutions and financial investments, etc.

A country or geographical area is reported where it constitutes 10% or more of the aggregate amount of international claims, after taking into account any risk transfers. Risk transfers are only made if the claims are guaranteed by a party in a country which is different from that of the counterparty or if the claims are on an overseas branch of a bank whose Head Office is located in another country.
