Forward-Looking Statements

- This presentation may contain certain “forward-looking statements” which are not historical facts, but instead are predictions about future events based on our beliefs as well as assumptions made by and information currently available to our management. Although we believe that our predictions are reasonable, future events are inherently uncertain and our forward-looking statements may turn out to be incorrect. Our forward-looking statements are subject to risks relating to, among other things, the ability of our in-network hospitals to compete effectively and the change of external environment which could have a material adverse effect on our business operations and future expansion. Our forward-looking statements in this presentation speak only as of the date on which they are made, and we assume no obligation to update any forward-looking statements except as required by applicable law or listing rules. Accordingly, you are strongly cautioned that reliance on any forward-looking statements involves known and unknown risks and uncertainties. All forward-looking statements contained herein are qualified by reference to the cautionary statements set forth in this section.

Use of Adjusted Financial Measures (Non-IFRS Measures)

- We have provided adjusted non-IFRS financial measures for the corresponding periods, which are not required by, or presented in accordance with, IFRS, and did not reflect our financial and operating performance from period to period. We believe that the non-IFRS adjusted financial measures provide useful information to investors in understanding and evaluating our financial and operating performance in the same manner as they helped the Company’s management, and that management and investors may benefit from referring to these adjusted non-IFRS financial measures in assessing indicative of our operating performance. However, the presentation of these non-IFRS financial measures may not be comparable to similarly titled measures presented by other companies as they do not share a standardized meaning. The use of these non-IFRS measures has limitations as an analytical tool, as such, they should not be considered in isolation from, or as substitute for analysis of, our interim condensed consolidated statement of comprehensive income as reported under IFRS. You should not view the non-IFRS adjusted results on a stand-alone basis or as a substitute for results under IFRS.
