SUSTAINABLE DEVELOPMENT OF BEIJING HEALTH

北京健康的可持續發展

The Third Plenary Session of the 20th Central Committee clearly proposed to improve the social security system, deepen the reform of the medical and health system, and improve the support and service system for population development. Among them, population aging and the silver economy will be important links in China's population development and service system. During the Reporting Period, the State Council issued the "Opinions on Promoting High-Quality Development of Service Consumption", advocating for the vigorous development of the silver economy, promoting the development of the smart health and geriatric care industry, supporting financial institutions to optimize risk management, actively providing financial products and services suitable for the project funding needs of inclusive geriatric care and childcare institutions, accelerating the development of a multi-tiered pension insurance system, and continuously improving the support system for elderly health.

The Group firmly follows and responds to national policies, seizes the favorable external environment and opportunities for geriatric care, medical care and health in Mainland China, and continues to fulfill its corporate social responsibility. It remains committed to promoting sustainable development of the environment and society through its own comprehensive health industry chain resources. During the Reporting Period, we continued to implement sustainable development principles and promote relevant policies from the following six dimensions. Beijing Vissam has signed a social responsibility commitment letter during the Reporting Period, demonstrating its determination and commitment to promote sustainable development.

第二十屆中央委員會第三次全體會議明確提出健全社會保障體系，深化醫藥衛生體制改革，健全人口發展支持和服務體系。其中人口老齡化和銀髮經濟將是中國人口發展和服務體系的重要環節。國務院於報告期內發佈《關於促進服務消費高品質發展的意見》，主張大力發展銀髮經濟，促進智慧健康養老產業發展，支持金融機構優化風險管理，積極提供適合普惠性養老託育機構項目資金需求特點的金融產品和服務，加快發展多層次養老保險體系，持續完善老年健康的支撐體系。

本集團堅定跟隨及響應國家政策，抓緊中國內地養老、醫療和健康的良好外部環境及機會，並持續履行企業社會責任，致力透過自身的大健康產業鏈資源，推動環境和社會的可持續發展。報告期內，我們繼續從以下六個維度中實踐可持續發展方針及推動相關政策。北京偉森已於報告期內簽署社會責任承諾書，彰顯其推動可持續發展的決心及承諾。

SUSTAINABLE DEVELOPMENT GOVERNANCE

The Group has established a sound sustainable development framework and management procedures, and adopts a top-down management approach. As the highest-level decision-making body, the Board strictly monitors the Group's environmental, social and governance risk management activities and remains ultimately responsible for overseeing the Group's material risks. Apart from taking initiatives in formulating management policies and identifying the environmental, social and governance risk issues that are crucial to the Group, the Board also collects internal and external data and stakeholders' opinions in various ways, including but not limited to relevant reference cases, information from other relevant domestic and overseas companies, historical data and future forecasts, so as to formulate measures to minimize risks.

The Board has established an ESG Working Group, which is responsible for promoting and assisting in the implementation of ESG-related matters and reports to the Board from time to time. The Group will continue to follow up with the situation and review the issues involved after receiving advice from the ESG Working Group in order to continue to move towards objective of sustainable development.

Meanwhile, the Board also appointed Riskory Consultancy Limited as its Independent Sustainability Consultant to provide consulting services on ESG and carbon neutrality.

董事會下設ESG工作小組。該小組負責推動及協助實施ESG相關事宜，並不定期向董事會匯報。董事會在聽取意見後會持續跟進情況，檢討相關事宜，從而持續向可持續發展的目標邁進。

Safety of the Elderly

The safety and well-being of the elderly is our top priority. The Group is committed to ensuring that comprehensive safety and health measures are effectively implemented in the elderly care system so that the elderly can enjoy a happy and secure life with peace of mind. We guarantee that the safety of the elderly is our first priority. Our nursing homes have formulated a number of policies and measures to strictly manage and control multiple service processes. In accordance with the relevant laws of the Emergency Response Law of the PRC, we formulated a comprehensive emergency response plan covering multiple areas, which played an important role in daily operations and management, safety of the elderly and risk prevention. The six major working principles we adopt in handling emergencies are as follows:

長者安全

長者的安全與福祉是我們的首要任務。本集團致力確保全面的安全及健康措施於養老體系有效實施，讓長者能幸福和放心的生活。我們承諾把長者的安全放在首位，旗下養老機構已制定多項政策和措施，嚴格管理及控制多個服務流程。我們根據《中華人民共和國突發事件應對法》的相關法律規定，制定完善及全面的應急預案，其對日常運營管理、老人生命 safety 及防範風險都起著非常重要的作用。我們在處理突發事件時堅守以下六大工作原則：

Our contingency plan mainly involves areas such as support services, medical and nursing, and situations such as fire, aspiration and food poisoning of the elderly. All care workers have received basic first-aid trainings. They conduct initial treatment in accordance with internal policy immediately once they discover that an elder is injured, after which the elder will be taken to medical room for further treatment by medical professional. After that, care workers will continue treatment following doctors' instructions, closely monitor the elderly's recovery situation and notify his/her family. To avoid recurrence, the injury of the elderly will then be recorded to remind care workers to pay more attention.

應急預案主要涉及後勤、醫療、護理等幾個方面，例如火警、長者發生誤吸、食物中毒等各種情況。護理員均接受過基本的急救訓練，在發現長者受傷時，會即時按內部守則作初步處理，然後帶長者到醫務室由專業的醫護人員作進一步治療。護理員之後會根據醫生意見對老人進行護理，密切監測復原的情況，並通知其家人。為避免日後出現同樣情況，我們會將長者的受傷情況記錄在案，以提醒護理員多加留意。

The supplier is required to fill in the “Supplier Qualification Review Basic Information Sheet”, and onsite inspections and evaluations will be conducted. After passing the review, they will be accepted and added into the company’s supplier database and become a potential supplier. We will conduct regular assessments and irregular visits to maintain and update the supplier database in a timely manner. We hold supplier meeting and supplier review every year. The Procurement Department is responsible for comprehensive evaluation of the supplier’s product quality, service standard, production capacity and collaboration. Each department can give feedback to the supplier and review the issues occurred in terms of the products supplied. According to the evaluation indicators, the supplier will be evaluated whether it is qualified. If supplier fails the assessment, we will issue a rectification notice to them. If such supplier fails to make improvement, we will consider disqualifying the supplier. During the Reporting Period, we have conducted assessments and reviews on 20 suppliers.

In addition, to ensure the normal operation of the supply chain, we conduct environmental and social risk assessments when selecting suppliers to identify the risks faced by the suppliers and the potential impact of adopting such suppliers.

供應商需要填寫《供應商資格審查基本情況表》，並需接受實地考察和評估，成功經過審核方可進入公司供應商庫，成為潛在供應商。我們會以定期評估及不定期訪查形式及時維護並更新供應商庫。我們每年舉行一次供應商會議和供應商評審，採購部負責對供應商的產品質量、服務水平、生產能力及配合等方面進行綜合評估。各部門可於此階段向供應商反饋及審視供貨時出現的問題。其後根據各項審核指標評估供應商是否及格。如有供應商不及格，我們會向他們發出整改通知。如該供應商並未作出改善，我們會考慮取消供應商資格。報告期內，我們已向20家供應商進行評估及審查。

除此之外，為確保供應鏈運作正常，我們在選擇供應商時會進行環境及社會的風險評估，識別其所面對的風險及採用該等供應商的潛在影響。

GREEN PROCUREMENT

- Standard of Packaging Bags, Containers and Warning Symbols Specific to Medical Waste; and
- Jinghu District Medical Waste Treatment Interim Measures.

The Group has appointed qualified third-party recyclers to properly dispose hazardous wastes. We set up special storage spots to collect all kinds of medical wastes. All medical wastes are strictly disinfected and placed in double-layer thick plastic bags designed for medical wastes according to regulations. Qualified third-party recyclers will collect, transport and dispose hazardous waste regularly.

We will continue to aim at reducing waste in the future, and explore more feasible waste reduction measures.

Sewage Discharge

The Group mainly produces domestic sewage and hospital sewage in its business activities. We have properly treated sewage through targeted measures. Domestic sewage is collected by the urban drainage pipe network and transported to the sewage treatment plant for handling. Hospital sewage is treated in accordance with the requirements of the “Technical Guidelines for Hospital Sewage Treatment”, and needs to adopt the primary treatment process – chlorine disinfection process. In order to improve and enhance the operation process, we require the operators of sewage treatment facilities to receive relevant training.

為有效減少廢棄物，我們已制定完善的垃圾管理制度，並嚴格實施辦公室垃圾分類政策，積極響應《北京市生活垃圾管理條例》，將垃圾分類成可回收垃圾、廚餘垃圾、有害垃圾及其他垃圾。我們組織相關職能部門和負責人處理生活垃圾分類。行政人力部負責垃圾分類宣傳、設備設施管理與維護，以加強員工的環保意識。每一名員工均需要從垃圾產生源頭做好垃圾分類工作。公司在辦公區的每層樓梯間根據上述提及的類別設有分類垃圾桶。分揀負責人負責每層保潔和垃圾最後的分揀工作，將垃圾分類投入相對應的垃圾桶內。為減少紙張浪費，我們鼓勵員工雙面打印文件，盡量將使用過的紙張循環再用，以達到物盡其用。

辦公室的廢棄墨盒及養老業務產生的醫療廢棄物是本集團主要有害廢棄物來源。我們按照國家相關法律及法規對有害廢棄物進行妥善處理，包括但不限於：

- 《醫療廢物管理條例》；
- 《醫療廢物專用包裝袋、容器和警示標誌標準》；及
- 《鏡湖區醫療廢物處理暫行辦法》。

本集團已委託具備認可資格的第三方回收商妥善處理有害廢棄物。我們設有收集各類醫療廢物的專用存放點。所有醫療廢棄物將進行嚴格消毒並按照規定將其裝入雙層厚實醫療垃圾專用塑料袋。合資格的第三方回收商會定期收集、運輸及處置醫療廢棄物。

我們未來將持續減少廢棄物為目標，並持續探索更多可行的減廢措施。

污水排放

本集團於業務活動中主要產生生活污水及醫院污水。我們已通過針對性措施妥善處理污水。生活污水由城市排水管網匯集並輸送到污水處理廠進行處理。而醫院污水方面會按照《醫院污水處理技術指南》的要求執行，並需採用一級處理流程—氯消毒工藝。為改善及健全崗位操作流程，我們要求污水處理設施的操作人員進行相關培訓。

We attach great importance to energy conservation and emission reduction, and have laid the foundation for a cleaner and greener model of operation through a number of measures, including but not limited to:

- Turn off all electrical equipment when getting off work to minimize electricity consumption;
- Use energy-saving lamps whenever possible and cultivate the habit of turning off the lights when leaving the office;
- Place labels on office equipment, such as reminding the employee to turn off all electrical appliances before leaving offices or after used; and
- The temperature of the air conditioning is controlled at 26°C, and the air conditioning in geriatric care institutions will be turned off between 9:00–11:00 a.m. and 2:00–4:00 a.m..

我們高度重視節能減排，通過多項措施為更潔淨、更綠色的運營模式奠定基礎，包括但不限於：

- 下班時關閉所有用電設備，減少電力消耗；
- 盡量採用節能燈具，培養員工在離開辦公室時關燈的習慣；
- 在辦公室設備上貼上標貼，提醒員工在離開前或使用後關閉電器設備；及
- 空調溫度控制在26°C，養老機構在日間9–11時及晚間2–4時關掉空調。

We will continue to focus on improving energy efficiency and reducing energy consumption as our main objectives in the future, and explore more feasible energy saving measures.

我們未來將繼續以提高能源效益及減少能源消耗為主要目標，並探索更多可行的節能措施。

Water

The water usage of the Group is mainly for domestic use from business operations, which is provided by municipal water supply agencies. The business of which involves the geriatric care industry, including the establishment of residential care homes for the elderly, resulting in high water consumption. During the Reporting Period, we have not encountered any problems in finding suitable water sources.

To improving our water efficiency, we have formulated a series of measures according to the nature and needs of our business, including but not limited to:

- Enhance the awareness of water saving among employees in daily business;
- Require employees to strictly avoid turning on the water tap for long time, and turn off the tap consciously after use;
- Regularly inspect and maintain water equipment; and
- When damage is found, immediately notify the worker to repair it on the same day within 12 hours.

We will continue to aim at enhancing water efficiency and explore more feasible water conservation measures in the future.

用水

本集團的用水主要來自業務運營的生活用水，由市政供水機構提供。當中業務涉及的養老產業設有安老院舍，故耗水量較高。報告期內，我們在求取適用水源上並無遇到任何問題。

報告期內，本集團的用水數據如下：

為提高用水效益，我們已根據業務性質及需要制定一系列措施，包括但不限於：

- 於日常業務中提升員工惜水概念；
- 嚴禁員工長流水，使用後須自覺關掉水龍頭；
- 定期檢查及維護用水設備；及
- 若發現設備損壞時會立即安排水工於當日12小時內進行維修。

我們未來將繼續以提升用水效益為目標，並探索更多可行的節水措施。

ENVIRONMENT AND NATURAL RESOURCES

By upholding of the culture of environmental protection and the appreciation of natural resources, the Group is committed to promoting environmental protection for achieving sustainable development and setting a benchmark for environmental protection in the industry, thereby inspiring more enterprises and individuals to promote environmental protection together, and to continuously conserve and improve the environment. Despite the Group's business activities have a limited impact on the environment, we are always committed to fulfilling our social responsibilities by implementing environmental protection measures and actively responding to various environmental protection activities such as "Earth Day" and "Earth Hour", advocating the concepts of low-carbon living, energy conservation, reduction of the use of disposable products and the protection of the natural ecosystems, so as to enhance the profound environmental protection awareness of our staff.

Green Products and Certifications

With the increasingly scarce of resources and the ongoing outbreak of environmental issues, the Group firmly believes that green operation is the key to sustainable development. Although the business does not involve production and does not have a significant impact on the environment and natural resources, the Group is still committed to supporting global sustainability objectives through responsible operations. We have established and continued to improve the environmental management system to enhance our environmental performance in terms of product life cycle. At the same time, we actively monitor our daily emissions and resource consumption to minimize the impact on the natural environment. Beijing Vissam is engaged in the furniture sales business and has obtained a number of green certificates for its corporate management activities and products:

Use of Green and Eco-Friendly Materials to Meet the Needs of Cleaning

As the public's requirement for hygiene and cleanliness increases, Beijing Vissam recognizes the impact of product materials on the environment and the safety and health of user, and is committed to meeting the dual needs of the customers of health and environmental protection. Our plastic chairs for sale are made of all-plastic structure, using polypropylene (PP5), which does not release toxic substances and 100% recyclable as material, can withstand even high temperatures and can be sterilized with 75% alcohol, in order to meet the needs of users for frequent cleaning and disinfection and at the same time minimize the negative impact on their health.

採用綠色環保材料迎合清潔需求

隨著公眾對衛生和清潔的要求越來越高，北京偉森深明產品物料對環境及使用者安全健康的影響，因此致力滿足客戶對健康與環保的雙重需求。旗下銷售的塑膠椅採用全塑膠架構，使用不會釋放有毒物質及可100%回收的聚丙烯(PP5)作為物料，更可以耐受高溫及使用75%的酒精消毒，務求在符合用家常清潔、常消毒需求的同時，對其健康的負面影響減至最低。

Promotion of Carbon Reduction Projects

While investing in clean energy and energy efficiency measures, companies can balance remaining emissions by funding carbon reduction projects. Therefore, we have chosen to purchase carbon credits to reduce its carbon footprint by offsetting the greenhouse gas emissions generated by its operating activities. The carbon offset project we have utilized is the Hebei ChengAn Biomass Cogeneration Project (Project ID: 3797) from the United Nations Clean Development Mechanism ("CDM"), which focuses on generating electricity by utilizing local straw from cotton. The electricity generated from this project is sold to the Hebei Provincial Power Grid, replacing the capacity of coal-fired power plants. The project does not only reduce greenhouse gas emissions but also promotes resource efficiency, environmental conservation, and socioeconomic benefits for local communities. The Certified Emission Reductions (CERs) acquired from this project were instrumental in achieving carbon neutrality for the 19th Asian Games held in Hangzhou in 2022.

推動碳減排項目

企業在投資清潔能源和提高能效措施的同時，可通過資助碳減排項目來平衡剩餘的排放量。因此，我們選擇購買碳信用額，通過抵銷其運營活動產生的溫室氣體排放來減少其碳足跡。此碳信用來自聯合國清潔發展機制(「CDM」)的河北成安生物質熱電聯產專案(專案編號：3797)，該專案的重點是利用當地棉花秸稈發電。產生的電力會出售給河北省電網，取代了燃煤電廠的發電。該專案不僅減少了溫室氣體排放，還促進了當地社區的資源效率、環境保護和社會經濟效益。該專案獲得的核證減排量(CERs)用於幫助2022年在杭州舉行的第19屆亞運會實現碳中和。

CLIMATE CHANGE

Climate change is increasingly becoming a serious concern and has posed an unprecedented threat to the planet, enterprises and individuals. The Group recognizes the importance of addressing climate change, and is committed to implementing various emission reduction measures to contribute to the mitigation of global warming. We are dedicated to fully responding to and promoting the national carbon peaking and carbon neutrality goal, actively understanding and identifying the risks arising from climate change and incorporating them into the risk management and strategic planning. By the collaboration across departments and implementing solutions, we have steadily reduced the carbon footprint and continued to strengthen our resilience to climate change and achieve sustainable development.

Risk Management

The Group has identified physical risks associated with climate change and mitigated the impact on the business through the development of contingency plans and measures. Extreme weather events including typhoon and rainstorm will lead to damage to buildings at the operation site, significantly increasing the risk of injury to employees and customers. In the event of water leakage due to heavy rainfall, we immediately arrange for maintenance staff to carry out repair work to minimize the subsequent impact of water leakage.

In addition, the increasing frequency of high temperature heat waves and low temperature cold spells in recent years has increased the risk of discomfort for the elderly or chronic patients. The Group's geriatric care institutions have implemented a number of measures in response to the high temperature heat wave and cold weather conditions, including but not limited to:

- Purchase cooling drugs in advance and distribute herbal tea, barley tea and other beverages to the elderly, as well as watermelon, mung bean soup and other cooling food;
- Install fans or air conditioners in every room of the elderly homes;
- The command group conducts regular checks on heat prevention measures by various departments in order to protect the elderly suffered from high temperature;
- Ensure that staffs acquired knowledge of warm keeping during the cold weather; and
- Equip every room of the elderly homes with central heating system in order to maintain a comfortable temperature.

氣候變化

氣候變化問題日益加劇，並對地球、企業及個人構成前所未有的威脅。本集團深明應對氣候變化的重要，並致力推行各項減排措施，為減緩全球暖化盡一份力。我們全力響應及推動國家「雙碳」目標，積極了解和識別因氣候變化所衍生的風險，並將其納入風險管理和策略規劃。我們通過部門合作及實行解決方案，穩定降低碳足跡，持續強化對氣候變化的適應能力，實現可持續發展。

風險管理

本集團已識別氣候變化相關的實體風險，並通過制定應對方案及措施來減輕對企業的影響。颱風、暴雨等極端天氣事件會導致營運地點的建築物受損，大大提升了員工及客戶受傷的風險。當遇到因暴雨而造成漏水問題時，我們立刻安排維修人員進行修復工作，將漏水所帶來的後續影響減至最低。

另外，近年來高溫熱浪及低溫寒冷天氣漸趨頻繁，加大了長者或長期病患不適的風險。本集團的養老機構已針對高溫熱浪及寒冷天氣的情況執行多項措施，包括但不限於：

- 預先採購降溫藥品，並向長者派發涼茶、大麥茶等飲品，以及西瓜、綠豆湯等降溫食品；
- 院舍內的每個房間亦會配置風扇或空調；
- 指揮小組定期檢查各部門的防暑措施，做好長者的防暑降溫工作；
- 確保員工均掌握充足的防寒保暖常識；及
- 為院舍內的每個房間配置中央暖氣，保持舒適的溫度。

During the Reporting Period, Beijing Vissam teamed up with the Social Education Program Center of China Television Group to launch a charity event in Xide County, Liangshan Yi Autonomous Prefecture, Sichuan Province under the theme of "'Helping Hand' – Working Together for the Common Good, Let's Spread the Love". Leveraging our expertise in this charity event, we improved the safety and convenience of life by adopting practical measures of installing bedside assistive devices and wall handles in toilets for underprivileged families in Tak County, including the elderly living alone, the disables with limited mobility, pregnant women and children in need. When installing the wall handles, the volunteers of Beijing Vissam patiently and carefully asked the elderly about their living conditions to understand their actual needs, and provide them with as much help as they could. 報告期內，北京偉森與中央廣播電視總台社教節目中心攜手合作，於四川省涼山彝族自治州喜德縣開展以「『搭把手』—攜手公益，讓愛傳遞」為主題的公益活動。我們於是次公益活動中發揮所長，為德縣獨居老人、行動不便的殘疾人、孕期婦女及有需要的兒童等弱勢家庭安裝床邊輔助設施及於衛生間貼牆把手等實際措施，提升彼等生活安全性和便利性。北京偉森愛心志願者們在安裝貼牆把手時會耐心細緻地詢問老人的生活情況，了解他們的實際需求，並提供力所能及的幫助。同時，北京偉森承諾將繼續關注和支持喜德縣的公益事業。
