2024 marks a pivotal year for MINISO. Standing at the dawn of a new decade, we embark on a new chapter with courageous hearts. Despite the numerous shifts and challenges in the external environment over the past year, MINISO's overall performance has outpaced the industry. This success is attributed to our unwavering strategic focus on becoming "the World's NO.1 IP Design Retail Group". Meanwhile, we have earned high recognition from several authoritative assessment standards and indices as we have actively amplified our influence in sustainable development. We have obtained an "AA" rating in the MSCI ESG Ratings and an "AA" rating in the Wind ESG Ratings, ranking first in the industry.

Actions speak louder than words. Robust corporate governance forms the foundation of the trust we build with our shareholders and stakeholders. We consistently uphold the highest governance standards and regularly review related initiatives. With the support of the Board, ESG Working Group, and all employees, we incorporate ESG principles into every facet of our business and operations to create long-term, sustainable value for society.

We dedicate ourselves to bringing fun and happiness to consumers. In 2024, we introduced "Fun Plus", which focuses on our new brand positioning as a global IP collaboration collection store, and launched No.1 MINISO LAND. By bringing together top global IPs, we created IP wonderlands in trendy commercial districts such as Nanjing Road in Shanghai and Chunxi Road in Chengdu. Furthermore, we continue to propel the development of Chinese brands, actively participate in global competition, and constantly break through in a fiercely competitive market. From "MINISO China" to "MINISO Global", we have successfully achieved global recognition as a Chinese brand. 2024年是名創優品的跨越之年。我們站在新十年的起點,用勇敢的心,開啟新篇章。在過去一年,儘管外部環境面臨諸多變化和挑戰,名創優品總體業績依然跑贏行業,這得益於我們始終戰略聚焦於——成為「世界第一的IP設計零售集團」。與此同時,我們在可持續發展方面積極發揮影響,獲得了多個權威評估標準和指數的高度認可。在MSCI環境、社會及治理指數中,我們取得了「AA」評級;Wind ESG評級獲得「AA」評級,並在行業中名列第一。

行勝於言,穩健的公司治理是我們與股東和持份 者之間建立信任的基礎。我們始終恪守最高的治 理標準,並定期審視相關舉措。在董事會、ESG 工作組以及全體僱員的支持下,我們將ESG理念 融入業務和運營的各個層面,致力於為社會創造 長期且可持續的價值。

我們始終致力於讓消費者開心、愉悦。2024年, 我們創造了「開心Plus」,專注於全球IP聯名集合 店這一全新品牌地位,打造了名創優品MINISO LAND全球壹號店。通過將全球頂級IP聚合於一 體,我們在上海南京路、成都春熙路等城市潮流 商圈打造了IP樂園。此外,我們持續推動中國品 牌的發展,積極參與全球競爭,並在激烈的市場 環境中不斷突破,從「中國名創」到「世界名創」, 成功實現了中國品牌的全球化突圍。

Climate change remains a critical global concern. Facing the climate crisis and a changing ecological environment, we actively seek solutions to enhance business resilience. In 2024, we conducted our first scenario analysis based on internationally recognized climate scenario models. By integrating our business model and value chain, we assessed the risks under different climate scenarios to strengthen MINISO's ability to identify, assess, and manage climate-related risks and opportunities.

We firmly believe that joy in work and life originates from inner passion and dedication. To this end, we actively promote diversity, equity, and inclusion within our workforce, enhance our benefits system, and offer more training and learning opportunities. We initiated a marriage and childbirth incentive fund of RMB10 million within the industry, hoping that everyone at MINISO can enjoy their work, live happily, and achieve progress and fulfillment.

All of MINISO's achievements are attributable to the unwavering support of our stakeholders. On behalf of the Company, I express sincere gratitude to each stakeholder. Upholding our mission of "life is for fun", we will continue to leverage our strengths and contribute to a sustainable future. In 2025, we will embrace new opportunities and challenges with courageous hearts, optimistic spirits, and extraordinary bravery! 氣候變化是全球關注的重要議題之一,面對氣候 危機與不斷變化的生態環境,我們正積極尋求提 升業務韌性的解決方式。2024年,我們首次依據 國際權威氣候情景模型進行情景分析,結合集團 的業務模式與價值鏈,對不同氣候情景進行了風 險評估,以增強名創優品在識別、評估及管理氣 候相關風險與機遇方面的能力。

ESG Material Topics

Materiality Analysis, Review and Confirmation of Topics

Based on the *Code*, we have identified 22 ESG material topics in the three major areas of environment, society and governance, taking into account our own business model, industry development, external ESG rating and relevant policies in various operating locations. Based on the materiality principle and the results of the ESG material topics questionnaire of MINISO, we ranked ESG topics on the dimensions of "materiality to the Company" and "materiality to stakeholders" to draw a materiality analysis matrix of topics.

During the Reporting Period, we conducted a materiality review of topics. By analyzing industry trends, industry concerns and stakeholder expectations, we added two topics, i.e., "Product Innovation" and "Retail Partner and Distributor Management". We expanded the scope of the topic "Green Packaging" and renamed it as "Green Products". Additionally, we raised the materiality level of several topics such as "Response to Climate Change", "Energy Management" and "Chemical Safety".

The Board and the management have reviewed the results of the materiality analysis and confirmed the materiality of ESG topics and topic matrices for the Reporting Period.

Management Concept

Innovation is the eternal driving force for the development of MINISO. While firmly sticking to value-for-money proposition, we hope to take IP design as the feature, continuously deepen the high-quality IP cooperation, and keep producing high-quality innovative products to make daily necessities more fashionable and trendier. MINISO started its IP strategic layout in 2016, and has entered into cooperation with multiple famous IP licensors around the world. In the future, we will continue to upgrade our three major innovation capabilities, namely insight, design, and technology, and strive to bring better products to global consumers.

Management Structure

In order to continuously empower product innovation and provide more professional design output for markets in different regions, we have upgraded our "Global Product Innovation Center" and constantly enhanced the construction of our global design capabilities, which are centered around China and supported by three overseas design centers in Korea, Japan, and the United States. Among them, the Korean design center was established during the Reporting Period and will launch a number of original design products in the global market. In the product development process, we have established standardized and strict internal collaboration processes, and continuously pay attention to the latest developments of international regulations. We maintain close collaboration among teams such as product managers, designers, IP licensors, and suppliers to ensure that our products comply with the laws and regulations of the markets where we sell our products.

We implement the "711 Philosophy" (that is, carefully selecting from a large product idea library containing 10,000 product plans and launching approximately 100 new MINISO SKUs every 7 days) to ensure rapid product innovation and continuous iteration. In addition, we also carry out IP licensing cooperation with globally renowned IP licensors, adding IP elements to product designs to increase product diversity and meet consumers' needs. Meanwhile, we constantly improve our global supply chain system. In addition to relying on high-quality Chinese supply chains, we are also continuously exploring overseas supply chains that meet the needs of globalization and localization development, and are committed to quickly transforming innovative designs into high-quality products and rolling out in the global market.

管理理念

創新,是名創優品發展的永恆動力。在始終堅持 性價比基本盤不動搖的同時,我們希望以IP設計 為特色,不斷深化優質IP合作,持續產出優質創 新產品,讓生活好物更加時尚潮流。名創優品自 2016年開啟IP戰略佈局,至今已與多個知名IP 在全球範圍內開展合作。未來,我們將圍繞洞察 能力、設計能力、技術能力三大創新能力持續升 級,致力於為全球消費者帶來更美好的產品。

管理架構

為持續賦能產品創新、針對不同區域的市場提供 更為專業的設計輸出,我們已全新升級「全球產 品創新中心」,並不斷提升以中國為中心,韓國、 日本、美國三大海外設計中心為支撐的全球設計 能力建設。其中,韓國設計中心已於報告期內落 地,並將在全球市場推出多款原創設計產品。在 產品的開發過程中,我們已設立規範、嚴格的內 部協作流程,並持續關注國際法規的最新動態, 保持產品經理、設計師、IP版權方和供應商等團 隊之間的緊密協同,使產品符合銷售地法律法規 要求。

我們實行「711哲學」(即從包含10,000個產品方案 的大型產品創意庫中精心挑選,每7天推出約100 個新的名創優品SKU),以保證產品的快速創新 和持續迭代。此外,我們亦與全球知名的IP授權 方進行IP授權合作,通過在產品設計中添加IP元 素來增加產品的多樣性、滿足消費者的需求。同 時,我們不斷完善全球供應鏈體系,除了背靠優 質的中國供應鏈,我們亦不斷開拓適應全球化、 本土化發展需求的海外供應鏈,致力於將創新設 計快速轉化為優質產品推向全球市場。

Management Practice

Consumer Insights

Product development is based on the premise of consumer insights. Therefore, quickly sensing and keeping up with consumer needs is crucial to product innovation. With our intelligent consumer analytics technology and data analysis capabilities, we capture the latest consumer trends and generate consumer insights that can guide and test our product design and assortments of products. We actively engage with consumers through multiple channels, including the MINISO membership program, WeChat mini program, third-party e-commerce platform, O2O platforms, and store-based communities on WeChat. Moreover, the regular weekly store visits by our R&D team also enable us to promptly understand consumers' needs, preferences, and popular trends. Besides, in key categories or segments, we also hire external professional research institutions to conduct in-depth analysis and provide professional advice.

Work Together with Our Partners

Our co-branding relationships with IP licensors of popular brands have opened up more diversified product design and development directions. Combined with profound insights of fan base, we create products that precisely meet consumers' emotional needs. Meanwhile, we have also collaborated with talented independent artists to develop new IPs characters into trendy IP products.

We have established in-depth cooperative relationships with many well-known suppliers across various categories. Our suppliers' rich experience in their respective professional fields enables them to provide us with real-time trends in the consumer market, which helps our company to achieve dynamic product development and frequent launches of new products. We continue to expand our cooperation with top-tier upstream supply chains. For example, we have reached a strategic cooperation with a world-renowned century-old fiber chemical brand, and jointly launched a number of apparel and accessory products made from patented fabrics, bringing high-quality product experiences to global consumers.

Focus on the Experience Enhancement

We continuously innovate, explore and apply cutting-edge product forms and manufacturing technologies during the product development process, as well as unremittingly expanding and strengthening strategic categories through consumption scenarios. For example, in the Sanrio Family steampunk figurines and Xiaodouni toys of the TOP TOY brand, we have developed a wind-up movable play feature, providing customers with a stronger interactive experience. In addition, we have developed a new type of movable joint structure in the Ultraman building blocks, enhancing the fit of the internal building block assembly and improving the playability of these large-scale building block figures.

管理實踐

Case: Innovative Category "Vinyl Plush" 案例:創新品類「搪膠毛絨」

In the manufacturing process of plush toys in the IP retail field, it is difficult for traditional cotton materials to accurately present facial details. With the continuous innovation of manufacturing technology, the emergence of vinyl plush products has brought about a major breakthrough in the presentation of IP on plush materials. Vinyl materials are smooth and sturdy, suitable for depicting the facial features and other details of characters; while plush materials are soft and comfortable, suitable for the body parts. This combination of materials not only enhances the texture and durability of products, but also improves the diversity of the tactile experience, meeting consumers' dual needs for both the handfeel and visual appeal.

In 2024, MINISO brand and TOP TOY brand, in collaboration with IP licensors, launched a number of vinyl plush products, which were widely welcomed by consumers.

在IP零售領域毛絨玩具的製作過程中,傳統棉 花材質難以精確呈現面部細節。隨著工藝技術 的持續創新,搪膠毛絨產品的出現為IP在毛絨 材質上的呈現帶來了重大突破。搪膠材料具有 光滑、堅固的特點,適用於表現角色的面部和 其他細節;而毛絨材料則柔軟舒適,適合用於 身體部分。這種材料組合不僅增強了產品的質 感和耐用性,還提升了觸感的多樣性,滿足了 消費者對手感和視覺的雙重需求。

2024年,「名創優品」品牌及「TOP TOY」品牌 聯合IP版權方推出多款搪膠毛絨產品,廣受消 費者歡迎。

Product Quality Management

Our quality control team is involved in the entire product development process and performs multiple rounds of quality checks. To ensure systematic quality management, we have developed and fully implemented an online guality control system. This system integrates all steps of product lifecycle quality management, achieving standardization and visualization of quality inspection procedures. We have established "1+1+1" Quality Control Mechanism to triple-check the quality of our products to ensure that the products we sell meet safety and quality standards. For example, for some categories, we require suppliers to regularly conduct sample tests and verify raw materials and accessories, and provide test reports to our quality department for record keeping; when submitting return applications, suppliers are also required to provide documents such as raw material test reports, same material declarations, supplier self-inspection reports and quality assurance letters. Furthermore, we mandate that all third-party brands sold in our stores must provide qualification reports from accredited testing authorities.

To enhance our quality management efforts, we aim to continually increase the frequency and number of quality audits across all product categories each year. During the Reporting Period, our products underwent external quality audits, with a total of 5.89 million items subjected to comprehensive third-party inspections.

Enhancement of Product Quality

We have attentively listened to consumer feedback and are committed to refining product quality and enhancing user experience. For instance, in the third quarter of 2024, we have successfully implemented quality improvements across 37 strategic categories, covering over 2,400 SKUs, which effectively elevates both product standards and consumer satisfaction.

產品質量管理

我們的質量控制團隊參與整個產品開發流程,並 執行多輪質量檢驗。為更系統地進行產品質量管 理,我們開發並全面應用數字化質量控制系統, 將產品全生命週期質量管理的各個步驟整合至線 上質量控制系統,實現質量檢查程序的標準化與 可視化。我們建立「1+1+1」質量管控機制,對產 品質量進行三重把關,以確保所銷售的產品均均 合安全和質量標準。例如,對於部分品類,我們 要求供應商須定期抽樣檢測與驗證原料和配件, 並向我們的質量部提供檢測報告備案存檔。在提 交回貨申請時,供應商亦需要提供原料檢測報 告、同材質聲明、供應商自檢報告以及質量保證 函等文件。此外,我們要求門店內銷售的所有他 牌產品,均須提供第三方權威機構檢測的合格報 告。

為更好地管控產品質量,我們目標每年持續增加 各產品品類的質量稽核頻率及次數。於報告期 內,我們的產品接受外部質量稽核(第三方驗貨全 檢)共計589萬個。

產品質量提升

我們悉心聽取消費者心聲,持續致力於優化產品 品質,提升用戶使用體驗。例如,於2024年第三 季度,我們已完成37個戰略細類品質改善,覆蓋 超過2,400個SKU,有效提升產品品質及消費者 體驗。

For our super categories and key product lines, we continuously improve product quality in collaboration with various partners. This includes requiring suppliers of disposable pants to obtain medical-grade/care-level certifications and implementing millimetre-level inspection processes for the facial features of IP plush products. Beyond elevating our own quality benchmarks, we have engaged Intertek Testing Services, an internationally recognized testing institution, to conduct the "Shamrock Shield" safety certification logo for select product categories sold in China. As of the end of the Reporting Period, 287 SKUs have been awarded the safety certification logo.

Furthermore, we have been actively participating in the formulation of various industry-wide group standards, continually enhancing MINISO's influence in the realm of quality. During the Reporting Period, our Group's Quality Manager was successfully elected as a member of the National Technical Committee for Standardization of Daily-Use Miscellaneous Products, contributing to the healthy development of the industry.

Product Recall

We maintain ongoing quality monitoring for all sold products while continuously improving our product recall mechanism. Should we identify any quality issues or potential adverse effects on consumer safety and health due to design or manufacturing defects in the products, we will recall in accordance with the MINISO Product Recall Management Procedures to avoid or minimize consumer losses. Upon receiving information about the problematic product, the product quality control team will organize an inter-departmental product assessment, determine the recall level for the products and activate the recall within 48 hours. Meanwhile, our customer service team will communicate with consumers in a timely manner, the operations team will quickly address the recalled products in stores, and the logistics team will ensure the recalled products are properly inventoried. Additionally, the product quality control team is responsible for leading quality incident investigations and conducting post-mortem reviews to prevent the recurrence of similar issues, ensuring continuous improvement in product quality.

對於超級品類及重點類目產品,我們攜手各合作 方不斷提升產品品質,如要求日拋褲供應商須獲 得醫療級別/醫護級別認證,對IP毛絨產品五 官制定毫米級檢測流程等。除提升自身質量標準 外,我們邀請國際權威檢測機構Intertek天祥集團 對公司於中國市場銷售的部分產品品類開展「盾形 三葉草」安心標識檢測認證。截至報告期末,我們 已有287個SKU獲得安心標識。

此外,我們積極參與行業內各項團體標準的制定 工作,不斷提升名創優品品牌在質量方面的影響 力。於報告期內,本集團質量經理成功當選全國 日用雜品標準化技術委員會委員,為行業的健康 發展積極貢獻力量。

產品召回

我們對售出產品的質量持續進行跟蹤管理,不斷 完善產品召回機制。一旦發現流通產品存在質量 問題,或因設計、製造缺陷而對消費者的安全、 健康造成潛在不利影響,我們會根據《名創優品商 品召回管理程序》進行召回處理,盡量避免或減 少消費者損失。在獲得問題產品信息後,商品質 量控制團隊會組織跨部門產品評估,對需要召回 處理的產品確定召回等級,並在48小時內啓動召 回。同時,我們的客服團隊將及時與消費者進行 溝通,運營團隊將快速對接門店處理需召回的產 品,而物流團隊會對召回產品進行盤點。此外, 商品質量控制團隊負責主導質量事件調查並進行 復盤總結,避免類似問題重複發生,確保產品質 量獲得持續改善。

亮點及案例

案例:IP毛絨產品五官毫米級別檢測

To ensure the quality of IP products and enhance consumer experience, we have established a comprehensive quality control process for key IP plush products. First of all, only designated selected suppliers are authorized to manufacture these products. Prior to production, product engineers conduct preliminary assessments to identify potential manufacturing issues and provide specialized quality training to IP product suppliers. In 2024, we organized 17 quality training sessions for IP product suppliers. Furthermore, during production, engineers conduct random unannounced inspections to ensure consistency between bulk products and samples. Additionally, we engage third-party inspectors to inspect each plush toy. During the Reporting Period, more than 5.89 million IP plush toys underwent thorough third-party inspections, significantly reducing the occurrence of major aesthetic defects and lowering the defect rate.

For example, in the CHIIKAWA project, quality engineers develop customized product specification sheets for each item based on pre-production samples approved by the copyright holder and the R&D team. These specifications include but not limited to main body fabric, filling material, reinforcement straps, facial embroidery spacing, embroidery and stitching colours, hand-stitching positions, stitch spacing, and seam allowances, standardising the full-chain process, including raw materials, production techniques, functional testing, compliance testing, packaging labels, and packaging methods, etc. 為夯實IP產品質量、提升消費者產品體驗,我 們已制定重點IP毛絨產品質量控制流程。首 先,僅特定優選供應商可生產相關產品。其 次,在生產前,產品工程師開展前期評估、識 別產品可能發生的工藝問題,並且對IP產品供 應商開展專項質量培訓。2024年,共組織了 17次IP供應商質量培訓。此外,在生產過程 中,工程師不定期開展飛行檢查,確保大貨與 樣品一致。我們還額外聘請第三方對每一隻毛 絨公仔進行檢查。於報告期內,經過第三方全 面檢查的IP毛絨公仔數量超589萬個,避免了 重大外觀質量缺陷發生,大幅降低了次品率。

例如,在CHIIKAWA項目上,質量部工程師會 根據版權方與研發組確認後的產前樣對每款產 品定制產品規格書,包括但不限於主身面料、 填充物、加強帶、臉部繡片五官距離、繡花及 縫線顏色、手縫位、針距、止口寬度等等,從 產品原材料、生產工藝、功能性測試、合規測 試、包裝標籤、包裝方式等進行全鏈條規範。

In July 2024, the TOP TOY brand invited SGS, a globally renowned inspection and certification laboratory, to conduct training on overseas regulations for toy exports. The training aimed to enhance employees' understanding of the differences between EU toy standards (EN 71.1-3), US toy standards (ASTM F963), and Chinese national standards, particularly regarding compliance issues related to chemical substances and electronic components. This training programme enhanced the compliance awareness of procurement and engineering teams of TOP TOY, further elevating internal product safety and quality control standards.

2024年7月,TOP TOY品牌邀請國際知名檢 測認證機構SGS實驗室開展有關玩具出海海外 細則的培訓,旨在加強有關僱員對歐盟玩具標 準EN71.1-3、美國玩具標準ASTM F963與中 國國家標準差異的理解,尤其是化學物質和電 子元件的合規出口問題。此次培訓加強了TOP TOY採購部和工程部等相關人員的合規意識, 進一步提升了內部產品安全與質量管控水平。

Case: TOP TOY Brand Improving Its Quality Management System 案例: TOP TOY品牌完善質量管理體系

To improve product quality and safety, the TOP TOY brand has placed significant emphasis on building a robust talent system for its engineering and quality sectors. During the Reporting Period, TOP TOY established an engineering team to address gaps in the design process. During product development, the engineering team verifies and adjusts the development of parts and components, product assembly structures, and construction sequences. Before mass production, the team provides optimal product structure solutions to minimise the risk of irreparable quality issues post-production. 為提升產品質量和安全,TOP TOY品牌十分重 視工程及質量板塊人才體系的搭建。於報告期 內,TOP TOY品牌通過搭建工程組團隊以補充 設計師的短板。在產品開發階段,工程組對零 件及補件的開發、產品搭建結構和產品結構順 序進行驗證和調整。在產品正式生產前,工程 組會提供最優的產品結構方案,最大程度避免 產品在量產後出現不可彌補的質量問題。

Chemical Safety 化學品安全

Management Concept

MINISO is well aware of the importance of chemical safety management and takes effective control measures throughout the product design, development, and manufacturing processes, therefore we strictly manage the use of chemicals. Meanwhile, we prohibit suppliers from using hazardous chemicals in the production process, and we hope to actively promote the use of environmentally friendly materials in collaboration with our production partners to reduce health, safety, and environmental risks associated with chemicals, fulfilling our commitment to quality and sustainable development.

Management Policy

We strictly comply with applicable chemical safety management regulations and standards, as well as the chemical product safety laws and norms in the countries or regions where we operate and sell our products, such as the *EU Regulation (EC) No 1907/2006* – *Registration, Evaluation, Authorisation and Restriction of Chemicals* ("REACH"), the *Restriction of Hazardous Substances Directive* ("ROHS"), the *California Proposition 65* ("CA65"), the Washington State Children's Safe Products Act, and the *EU Cosmetics Regulation (EC) No 1223/2009* concerning the labelling of fragrance allergens in cosmetics, which regulate the standards of prohibition and restriction of chemicals, to provide consumers with healthy and safe products. At the same time, we actively focus on the environmental impact of chemicals and strive to prevent and mitigate environmental pollution.

As we operate in multiple countries and regions globally, to better advance the process and standardized management of MINISO's chemical substance, we have compiled and updated policies such as the *Testing Manual*, the *MINISO Prohibited and Restricted Substances List in Cosmetics Products*, and the *MINISO International Cosmetic Quality Standards – Risk Substance Control Manual*, based on the highest requirements in the relevant regulations and standards of different countries and regions. In 2024, TOP TOY established the corporate standard Q/TOPTOY 002-2024 for blind box – style trendy toys and figurines, to impose stricter restrictions on known toxic chemical substances, which further enhanced product safety and environmental performance.

管理理念

名創優品深知化學品安全管理的重要性,在產品的 設計開發以及製造過程中採取有效的管控措施, 對化學品的使用進行嚴格管理。同時,我們禁止供 應商在生產過程中使用有害化學品,並希望與我們 的生產合作夥伴一同積極推動環境友好型材料的使 用,以降低化學品相關的健康、安全和環境風險, 實現我們對品質和可持續發展的承諾。

管理政策

我們嚴格遵守適用的有關化學品安全管理法規 和標準,以及我們所運營和銷售的國家或地 區適用的化學產品安全法規及規範,如歐盟 EC/1907/2006《關於化學品註冊、評估、授權和 限制的法規》(「REACH」)、《關於限制在電子電 氣設備中使用某些有害成分的指令》(「RoHS」) 及《加州第65號提案》(「CA65」)、美國《華 盛頓州兒童產品安全法案》、歐盟化妝品法規 (EC)1223/2009關於化妝品中香精香料過敏原標籤 的規定等有關化學品禁用、限用的標準,為消費 者提供健康安全的產品。同時,我們積極關注化 學品對環境的影響,努力防止和減輕環境污染。

由於我們在全球多個國家和地區開展經營活動, 為更好地推進名創優品化學品物質流程化和規 範化管理,我們參照不同國家和地區相關法規 及標準中的最高要求編製與更新名創優品《檢 測手冊》、《MINISO化妝品禁限用物質清單》及 《MINISO國際化妝品質量標準一風險物質管 控手冊》等制度。2024年,TOP TOY針對盲盒 類潮流玩具及擺件制定了企業標準Q/TOPTOY 002-2024,以增加對已知有毒化學物質的嚴格限 制,進一步提升產品的安全性和環保性能。

Management Practice

Chemical Identification

MINISO is committed to comprehensively identifying and managing regulated and potentially regulated chemical substances in our products. We strictly comply with relevant chemical management regulations in the regions where we operate and sell our products, and we scientifically identify and rigorously control all high-concern chemicals based on industry standards.

With reference to international mainstream industry standards, we have established and continuously refined a list of high-concern chemicals, covering prohibited substances, restricted substances, and potentially high-risk substances, to ensure compliance with relevant standards for prohibited and restricted chemicals and provide consumers with healthy and safe products.

Additionally, we have systematically listed and managed the chemical substances that are prohibited or restricted in relevant product categories through our internal systems, such as *Testing Manual, MINISO Prohibited and Restricted Substances List in Cosmetics Products*, and *MINISO International Cosmetic Quality Standards – Risk Substance Control Manual.* In 2024, TOP TOY set migration limits for eight heavy metals in accessible materials and stipulated that the content of three plasticisers in accessible plastic materials shall not exceed 0.1%. Furthermore, TOP TOY adopted the testing methods as specified in the most stringent international standards, such as the EN 71 Testing requirements by the EU, to ensure the chemical safety of products and protect the health of consumers.

As of the end of the Reporting Period, we have identified 1,828 prohibited substances, 632 restricted substances, and 415 high-concern substances.

管理實踐

化學品識別

名創優品致力於全面識別和管理產品中受監管及 潛在受監管的化學物質,嚴格遵守運營和銷售所 在地的化學品管理有關法規,基於行業標準對所 有高關注化學品進行科學識別和嚴格管控。

我們參照國際主流行業標準建立並持續完善高關 注化學品清單,涵蓋禁用物質、限用物質和潛在 高風險物質,以確保產品符合化學品禁限用的相 關標準,為消費者提供健康、安全的產品。

此外,我們通過《檢測手冊》、《MINISO化妝品 禁限用物質清單》及《MINISO國際化妝品質量標 準一風險物質管控手冊》等內部制度系統性地列 舉與管理相關產品品類中禁止或限制使用的化學 物質。2024年,TOP TOY針對可觸及材料規定了 8種重金屬的可遷移元素限值,並明確可觸及塑化 材料中3種增塑劑的含量不得超過0.1%。同時, TOP TOY參照國際最嚴格標準指定檢測方式,如 歐盟EN71檢測要求,以確保產品的化學安全性、 保障消費者健康。

截至報告期末,我們共識別出1,828種禁用物質, 632種限用物質,以及415種高關注物質。

Hazardous Chemical Assessment

During the product development and design stage, MINISO incorporates the safety risks of chemicals to consumers into its scope of core assessments, and has established a rigorous assessment mechanism to ensure the safety and environmental friendliness of product ingredients.

Digital System Support

In the product development process, we require suppliers to report a list of chemical materials used through the digital system. If the product involves the use of prohibited hazardous chemical substances, the system will automatically alert that such substances cannot be used in this category. This mechanism ensures that high-risk chemical substances are identified and eliminated before mass production, mitigating potential hazards at the source.

危害化學品評估

在產品開發與設計階段,名創優品將化學品對消費 者的安全風險納入核心評估範疇,並制定了一套嚴 格的評估機制,以確保產品的成分安全和環保。

數字化系統支持

在產品開發過程中,我們要求供應商通過數字 化系統上報所用化學材料清單。如果產品中涉 及禁用化學物質,系統會自動提示該成分不可 在此品類中使用。這一機製得以確保我們在產 品量產前識別並剔除高風險化學物質,從源頭 上消除潛在危害。

High-risk Product Control	高風險產品管控
For high-risk products, we require suppliers to provide Material Safety Data Sheet ("MSDS"), Certificates of Analysis ("COA"), and, where applicable, International Fragrance Association (IFRA) certificates and allergen certificates for fragrances (where applicable), to ensure compliance and safety of product ingredients.	對於高風險產品,我們要求供應商提供化 學品安全説明書(「MSDS」)、成分分析證書 (「COA」)以及香精香料IFRA證書和過敏原證書 (如適用),以確保產品成分的合規性與安全性。
Additionally, we require suppliers to strictly adhere to applicable	此外,我們要求供應商嚴格遵守適用的禁用物質

Additionally, we require suppliers to strictly adhere to applicable prohibited and restricted substance lists, provide stability and compatibility test reports for raw materials, and eliminate the use of any banned chemical substances. 此外,我們要求供應商嚴格遵守適用的禁用物質 清單及限用物質清單要求,提供原材料的穩定性 和兼容性測試報告,並杜絕任何違禁化學物質的 使用。

Chemical Substance Disclosure and Phase-out

MINISO is committed to transparent disclosure of chemical information and ensures the safety and environmental friendliness of product ingredients through strict compliance management.

化學品披露與淘汰

名創優品始終致力於化學品信息的透明披露,並 通過嚴格的合規管理確保產品成分的安全性和環 保性。

Disclosure of Primary Materials and Formulas 主要材質與配方披露

We disclose the main materials and complete formulas for most of our products and clearly label any potential high-concern substances contained in the product to enhance product transparency. Furthermore, products of TOP TOY brand have a 10-year environmental use period, and the labels of electronic products detail the list of hazardous substances, ensuring consumers are fully informed about the environmental attributes of the products.

我們對大多數產品的主要材質及完整配方進行 披露,並明確標識產品中可能存在的高關注 物,以提升產品透明度。此外,TOP TOY品牌 產品已設置10年的環保使用期限,並在其電子 產品的標識上詳細標註有害物質成分表,確保 消費者清晰瞭解產品的環保特性。 EQ M

We strictly comply with cosmetic registration and certification requirements in all operating regions. For example, in the EU market, all our cosmetics are certified through the Cosmetic Products Notification Portal ("CPNP"), and full ingredient information is disclosed using International Nomenclature of Cosmetic Ingredients ("INCI") to ensure professional and clear disclosure.

我們嚴格遵守各運營地的化妝品註冊和認證 要求。如在歐盟市場,我們的所有化妝品均 通過化妝品產品通知門戶(「CPNP」)認證, 並按照國際通用名稱(「INCI」)標示披露完整 成分信息,確保披露內容專業、清晰。

> Full Ingredient Disclosure for Cosmetics 化妝品的完整成分披露

In accordance with applicable regulations and industry standards, we have compiled a list of high-risk chemical categories that need to be reduced or prohibited, including lead, cadmium, formaldehyde, flame retardants, and allergenic disperse dyes. Additionally, we commit to not developing products and accessories using melamine materials (such as melamine and melamine ware), not using PC plastic in children's food contact products and accessories, and require suppliers to sign corresponding commitments.

Furthermore, we are committed to gradually reducing and ultimately eliminating the use of hazardous and restricted chemicals, promoting the substitution of high-concern substances, and introducing safer and more environmentally friendly materials through research and innovation. 我們按照適用的相關法規及行業標準,列舉出須減少或禁用的高風險化學品類目清單,包括鉛、 鎘、甲醛、阻燃劑及致敏分散染料等。同時,我 們承諾不開發密胺材料(如三聚氰胺、美耐皿)的 產品及配件,在兒童食品接觸類產品及配件中不 使用PC塑料,並要求供應商簽署相應承諾。

此外,我們致力於逐步減少直至停止使用有害及 受限化學品,並推動高關注物質的替代工作,通 過研發與創新引入更安全環保的材料。

Substituting PC with Tritan Plastic 使用Tritan塑料替代PC

We plan to gradually phase out the use of PC plastics and substitute them with Tritan plastic, which is safer and free of bisphenol A, to promote green ecological development and health of consumers. As of the end of the Reporting Period, we have developed 26 SKUs of Tritan plastic cup. At the development stage of plastic cups, the proportion of Tritan products has exceeded that of PC products.

我們計劃逐步淘汰PC塑料,並更換為成分更安全、不含雙酚A的Tritan塑料,以促進環境生態的綠色發展及消費者健康。截至報告期末,我們已開發26款SKU的Tritan塑料杯,在塑料杯開發階段,Tritan產品佔比已超過了PC產品。

SPM 微塑膠

In October 2023, with the official effectiveness of the Annex XVII of the REACH Regulation (EC) No 1907/2006, the European Union redefined Synthetic Polymer Microparticles ("SPM") and stipulated prohibited and restricted scenarios, as well as transition periods. The updated regulation aims to limit the release of SPM and related products within the EU to reduce environmental pollution caused by SPM. MINISO conducted a comprehensive review of the products affected by the regulation, and established effective formulas and material transition plans, ensuring the products sold in European Union strictly in line with the new requirements.

2023年10月,REACH法規(EC)No 1907/2006的附錄XVII正式生效,歐盟對合成聚合物微粒(「微塑膠」)進行了重新 定義,並規定了禁限用情況及過渡時間。該法規更新旨在限制微塑膠本身及其相關產品在歐盟範圍內的投放,從而減 少微塑膠對環境的污染。名創優品對法規所涉產品進行全成分複盤,制定了切實有效的配方、材料切換計劃,使銷售 至歐盟的產品嚴格按新規要求執行。

> Per- and Polyfluoroalkyl Substances ("PFAS") 全氟和多氟烷基物質(「PFAS」)

In 2024, MINISO proactively phased out PFAS from cosmetic formulas. PFAS, known for their thermal stability and resistance to degradation, are widely used in daily cosmetic products. However, their persistence, long-range transport, bioaccumulation, and toxicity pose long-term adverse effects on ecosystems and human health.

2024年,名創優品主動淘汰化妝品配方中的全氟和多氟烷基物質(PFAS)。PFAS因其卓越的熱穩定性和耐降解性,廣 泛應用於日化用品中。然而,其持久性、遠距離遷移性、生物累積性和生物毒性會對生態環境和人體健康造成長期不 良影響。

We specify the content of our audits in the *Factory Inspection Guideline*. We conduct a detailed supplier access review from multiple dimensions, including supplier scale, quality organization independence, equipment adequacy, and social responsibility, to verify the performance capabilities of potential suppliers.

During the Reporting Period, we conducted on-site audits for all new suppliers and their production factories, and updated our factory inspection rules. We strengthened surprise audits and raised the entry threshold to promote suppliers' enhancement of daily management and quality control efforts. The TOP TOY brand also implemented standardized internal audits, further improving supplier qualification requirements and strengthening the expiration date constraints for food suppliers. 我們實行內部評估與第三方獨立審核相結 合的准入審核機制,對潛在供應商的資質 進行層層把關,所有供應商均需接受此類 審核(2024年:1,804家)。我們在供應商 的驗廠指引《驗廠須知》中明確我們的審核 內容,從供應商規模、質量組織獨立性、 設備設施完備性以及社會責任等多個維度 開展細緻的供應商准入審查,核實潛在供 應商的履約能力。

供應商管理體系

於報告期內,我們對所有首次合作的供應 商開展供應商及其生產工廠的現場審核, 並對驗廠規則進行更新,強化突擊審核、 提高准入門檻,促進供應商加強日常管理 及質量管控力度。TOP TOY品牌亦落實內 部審計規範化,進一步提高供應商資質要 求,並對食品類供應商加強保質期約束。

Supplier Supervision Mechanism 供應商監督機制

We implement dynamic management of suppliers, conduct regular supplier assessments, and carry out random unannounced inspections for key suppliers. Based on the assessment results, we promptly adjust our cooperative relationships with suppliers. During the Reporting Period, we increased the weight and scope of social responsibility-related factors in the supplier evaluation process. We assessed suppliers' compliance with red-line clauses in areas such as child labor, forced labor, harassment and abuse, discrimination, fire safety facilities, emergency exits and evacuation routes, fire drills, and the treatment of the "three wastes." Suppliers found to be non-compliant with these red-line clauses were directly deemed as unqualified. 我們對供應商實行動態管理,定期開展供 應商考核,並針對重點供應商開展隨機飛 行檢查。根據考核結果,我們會及時調整 與供應商的合作關係。於報告期內,我們 提升了供應商評估過程中社會責任相關因 素的比重和內涵,考核其在童工、強迫勞 動、騷擾和虐待、歧視、消防設施、安全 出口和疏散通道、消防演習、「三廢」處理 等維度的紅綫條款滿足程度,針對紅綫條 款不合規的供應商直接計為不合格。

We conduct quarterly assessments of suppliers on quality, R&D, cost and delivery, and adopt a one-vote veto system for quality assessment. We classify suppliers into A, B and C levels according to the assessment results, and strengthen the cooperation with A-level suppliers while reducing or terminating the cooperation with C-level suppliers accordingly.

我們從質量、研發、成本、交付等維度對供應商開展季度考核,針對質量維度實行一 票否決制。我們將根據評估結果對供應商分為A、B、C三級,繼而加強與A級供應商 的合作,減少或停止與C級供應商的合作。

We conduct unannounced inspections and issue internal assessment reports for suppliers in high-risk categories or suppliers with product quality problems or customer complaints. For suppliers with serious non-conformities, we require them to take immediate rectification actions.

我們針對高風險類目供應商或出現產品質量問題、客戶投訴事件的供應商開展飛行檢 查並出具內部評估報告。針對存在嚴重不符合項目的供應商,我們會要求其立即整改。

Supplier Unannounced Inspection 供應商飛行檢查

Supplier Grading 供應商分級評定 with our five-star suppliers. 根據供應商的產品質量、交付情況、研發水平及服務質量等廣泛標準,我們對供應商 開展季度及年度評估,並按照評估結果按「一星」至「五星」實行供應商分級。於報告 期內,我們更新了與五星供應商的合作規則。

Based on extensive criteria such as product quality, delivery performance, R&D capabilities, and service quality, we conduct quarterly and annual assessments of our suppliers and classify them according to the results, ranging from "one-star" to "five-star". During the Reporting Period, we revised the collaboration guidelines

Supplier Supervision Mechanism 供應商監督機制

Supplier Capability Enhancement 供應商能力提升

We strive to help our suppliers improve their supply capability. According to different product categories, we formulate the Supplier Instruction to provide process standards, production norms and optimization suggestions for aspects such as new product testing, sample management, and material testing. We conduct multiple supplier empowerment training sessions each year and offer targeted training for all new suppliers, sharing industry experience and inviting third-party organizations to empower them. At the same time, we provide rectification directions and suggestions to suppliers with problems to continuously improve the supply quality. During the Reporting Period, we held 147 training sessions for suppliers and the Company's R&D team, covering topics such as updates and interpretations of national regulations, compliance knowledge and operational guidelines, guality standards requirements, quality issue prevention suggestions, quality requirements promotion, and common questions and answers, ensuring alignment of standards between suppliers and relevant company personnel.

我們努力幫助供應商提升其供應能力。 根據不同產品品類,我們制定《供應商須 知》,在新品測試、樣品管理、材料檢測 等方面提供流程標準、生產規範和優化建 議。我們每年開展多次供應商賦能專題培 訓,並面向所有新供應商開展針對性培 訓,分享行業經驗並邀請第三方機構為其 賦能。同時,針對存在問題的供應商,我 們為其提供整改方向和建議,以不斷提升 供應質量。於報告期內,我們面向供應 商及公司研發團隊等人員開展了147場培 訓,內容包括國家法規動態更新解讀、合 規知識與操作指引、質量標準要求、質量 問題預防建議、質量要求宣導及常見問題 答疑等,確保供應商與公司相關人員之間 標準對齊。

Supplier Elimination 供應商淘汰

For suppliers identified with quality issues that breach the red line requirements during the assessment or product sampling inspection, we will hold them accountable for their quality breaches and consider terminating our cooperation with them. For example, in the supply chain management system of TOP TOY, we require suppliers with quality problems to complete rectification within one week. In severe cases, we will shorten the rectification period to two days. We will terminate the cooperation if the supplier fails to complete the rectification within the set time. 針對在考核過程或產品抽檢過程中被發現 質量觸及紅綫要求的供應商,我們將對其 進行質量違約追責,並考慮終止與該供應 商的合作。例如,在TOP TOY品牌的供 應鏈管理體系中,我們會要求出現質量問 題的供應商在一周內完成整改。若情況嚴 重,我們會將整改期限縮短至兩日。若供 應商未在既定時間內完成整改,我們將會 終止合作。

Continuing to Build a Responsible Supply Chain

The Group actively implements various measures to encourage and advocate for domestic and international supply chain partners to maintain compliant operations, strengthen environmental protection, and fulfill their social responsibilities. To ensure the reliability and sustainability of supply chain product quality, we continuously enhance our social responsibility assessment requirements for the supply chain and confirm the ESG compliance of suppliers through audits.

持續打造負責任供應鏈

本集團積極採取多種措施,鼓勵和倡導海內外供 應鏈合作夥伴持續合規經營、加強環境保護和踐 行社會責任。為確保供應鏈產品質量的可靠性與 可持續性,我們持續強化供應鏈社會責任考核要 求,並通過審查確認其ESG合規性。 For suppliers we cooperate with for the first time, we conduct on-site factory inspections, including audits performed by MINISO and third-party organizations. According to the *Factory Inspection Guideline*, if ESG-related violations are found, we will reject them on a one-vote basis. For existing suppliers, we conduct periodic audits based on supplier levels, which also include ESG assessments. A-level suppliers are audited biennially, while B-level and C-level suppliers are audited annually. In addition to the audits initiated by MINISO, some IP licensors with whom we have established co-branding relationships also conduct ESG audits for A-level suppliers.

During the Reporting Period, in response to energy-saving and emission-reduction policies, TOP TOY requires its suppliers to hold qualifications such as ISO 9001 Quality Management System Certification, ISO 14001 Environmental Management System Certification, and ISO 45001 Occupational Health and Safety Management System Certification. Additionally, suppliers are required to provide carbon footprint emission data for at least two products. 對於首次合作的供應商,我們會開展現場驗廠審 核,包括公司內部審核及第三方機構審核。根據 《驗廠須知》,如發現與ESG相關的違規事項我們 會進行一票否決。對於現有供應商,我們根據供 應商等級開展周期性審核,其中也包含ESG維度 的考察。針對A類供應商,我們會每兩年開展一次 審核;而針對B類及C類供應商,審核頻率為每年 一次。除名創優品發起的審核外,部分與我們建 立品牌聯名關係的IP授權商亦會對A類供應商開展 ESG審核。

於報告期內,為響應節能減排政策,TOP TOY要 求其供應商須具備ISO 9001質量管理體系認證、 ISO 14001環境管理體系認證和ISO 45001職業健 康安全管理體系認證等資格,並要求其提供2款以 上產品碳足跡排放資料。

Mechanisms for Improving Suppliers' Social Responsibility Performance 供應商社會責任表現提升機制

Compulsory 強制性

We have incorporated social responsibility requirements into our supplier access standards, and listed labor rights protection, environmental standards (requiring all types of pollutants to be treated in compliance before discharge), and health and safety as key elements of social responsibility in the *Factory Inspection Guideline* for audits performed by MINISO and third-party organizations. We regard a supplier's compliance with social responsibility to be of equal importance to quality, price, and other assessment factors in terms of importance. Should any violation be detected, we will apply a veto to the supplier.

我們將社會責任要求納入供應商准入門檻考 察,並將勞工權益保護、環境(各類污染物排放 前須經合規處理)及健康安全等社會責任要求列 為《驗廠須知》中公司內部審核及第三方機構審 核的主要審核內容。我們視供應商的社會責任 合規情況與質量、價格等評估因素為同等重要 水平,一旦發現違規情況,我們會對供應商採 取一票否決。

Compulsory 強制性

We include relevant clauses regarding the code of conduct for social responsibility in our supplier cooperation agreements, such as the *Supplier Code of Conduct*. Suppliers are required to sign and adhere to these provisions.

我們在供應商合作協議(如《供應商經營行為協 議》)中納入社會責任行為守則相關條款,供應 商必須簽署並遵循相關規定。

Encouraging 鼓勵性

We encourage suppliers to obtain certifications such as ISO 45001, ISO 14000, and BSCI, and we require suppliers to provide ISO 9001 certification before formal product delivery.

我們鼓勵供應商取得ISO 45001、ISO 14000、 BSCI等認證,並要求供應商在正式交付產品前 必須提供ISO 9001認證。

Encouraging 鼓勵性

We encourage suppliers to enhance their social responsibility performance through incentive policies, such as prioritizing the launch of products related to green procurement.

Labor Rights Protection in the Supply Chain

We actively pay attention to the labor rights protection in the supply chain, establishing requirements for supplier labor management and conduct audits. We have specified detailed requirements on supplier labor management, including working hours, minimum wage, overtime wage, occupational health and safety protection and other key contents. During the Reporting Period, we audited the labor management of all new suppliers and existing core suppliers, covering 58 suppliers. All suppliers subject to the review successfully passed the labor management audit. 我們通過鼓勵性政策推動供應商提升社會責任 表現,例如優先推動開展綠色採購的相關產品 上市。

供應鏈勞工權益保障

我們積極關注供應鏈勞工權益保障,制定供應商 勞工管理要求並開展審查工作。我們明確供應商 勞工管理詳細要求,其中包含工作時數、最低工 資、加班工資及職業健康安全保障等重點內容。 於報告期內,我們對所有新增供應商及現有核心 供應商的勞工管理狀況進行審查,覆蓋58家供應 商,所有接受審查的供應商均通過勞工管理狀況 審查。

Management Concept

MINISO deeply values the impact of climate change on our business operations and society, and aspires to collaborate with a broad range of stakeholders, including consumers and suppliers to jointly build a sustainable society. In 2023, we actively followed *the Guidance on Climate Disclosures* issued by the Hong Kong Stock Exchange and disclosed our climate-related priorities in core areas such as governance, strategy, risk management, indicators, and targets. Moving forward, we will continue to respond to Hong Kong Stock Exchange's further requirements regarding climate-related information. We will continuously enhance our scenario analysis of climate risks, identify climate risks and potential opportunities faced by different business segments under various scenarios, enhance the effectiveness of our climate risk management and actively respond to climate change.

Governance

The Board, as the highest governing body for the Group's ESG matters, is fully responsible for climate change-related work, including assessing and defining the climate risks the Company is willing to undertake to achieve its strategic objectives. The Board also formulates effective risk response measures and internal control systems to actively address climate change. The Board oversees climate risk management through the Audit Committee and senior management to ensure the robustness of the Group's operations under different climate scenarios. For details on the responsibilities and division of labor at various management levels, please refer to the ESG Governance section of this Report.

In the future, we will require Board members to participate in annual ESG-related training and will also periodically invite external experts to share the latest trends and insights on climate change-related topics with the Board and senior management, enhancing their awareness and understanding of climate issues and keeping them updated on the latest developments in the field of climate change.

未來,我們將每年要求董事會成員參與ESG主題 相關培訓,同時不定期邀請外部專家為董事會及 高級管理層分享氣候變化相關議題的最新趨勢及 洞察,增強董事會對氣候問題的認識和理解,掌 握氣候變化領域的最新動態。

Strategy

MINISO places a high priority on climate-related risks and systematically identifies the potential impacts on our business and financials. To identify and assess potential risks and opportunities across the Company and its value chain under different climate conditions, we conduct scenario analysis across three time horizons: short-term (within the next year), mid-term (from the next year to 2030), and long-term (from 2031 to 2050). During the Reporting Period, we conducted our first scenario analysis based on the Shared Socioeconomic Pathways (SSPs) adopted by the Intergovernmental Panel on Climate Change (IPCC). We selected two future scenarios – SSP1 and SSP5 – to assess potential impacts.

策略

名創優品高度重視氣候相關的風險,並系統化識 別對公司業務以及可能對財務帶來影響的氣候變 化風險。為識別及評估公司及價值鏈在不同氣候 條件下的潛在風險與機遇,我們根據時間維度, 對短期(未來1年內發生)、中期(未來1年至2030 年)及長期(2031年至2050年)三個時間範圍進行 後續分析。於報告期內,我們首次根據聯合國政 府間氣候變遷專門委員會(IPCC)採用的共享社會 經濟路徑(SSPs)假設,選擇SSP1和SSP5兩種未 來情景模式進行情境分析。

Applicable Scenario 適用情景	Scenario Selection 情景選擇	Scenario Assumptions & Analysis 情景假設及分析	Projected Temperature Increase by the End of the Century 本世紀末預計升溫
Constant Moderate Emissions Scenario 中低排放情景	SSP1-2.6	Assumes the implementation of stringent climate change mitigation policies and aggressive measures, with significant investment in low-carbon technology transitions and renewable energy. For MINISO, this scenario could create new market opportunities, such as increased consumer demand and the formation of a green supply chain. 假設全球實施了嚴格的氣候變化減排政 策及激進的措施,積極投資低碳技術轉 型和可再生能源。對於本集團而言,此 情景可能帶來新的市場機會,如消費者 需求增加及綠色供應鍵的形成。	~2°C
High Emissions Scenario 高排放情景	SSP5-8.5	Assumes no climate change policy interventions, business-as-usual operations, and failure to implement effective climate actions. According to the IPCC model, this scenario would lead to more frequent extreme weather events, rising sea levels, and significant ecological disruptions. For MINISO, this could result in higher operational costs, supply chain disruptions, and substantial shifts in market demand. 假設全球無氣候變化政策干預,照常運 營,未能有效實施氣候行動。根據IPCC 模型,極端天氣事件增加、海平面上升 以及生態系統劇烈變化。對於本集團而 言,此情景可能導致更高的運營成本、 供應鏈中斷以及市場需求的重大變化。	>4°C

Considering the Group's business model and value chain, we conducted a physical risk scenario analysis on eight categories of climate hazards across different climate scenarios and time horizons. This scenario analysis covers the Chinese mainland market, including all warehouses and directly operated stores under the MINISO and TOP TOY brands. Model analysis indicates that, under the current warehouse and store distribution, our operations are most significantly affected by typhoons, heavy rainfall, and strong wind events. By 2030, due to the concentration of stores and warehouses in southeastern coastal cities, typhoon impact will be the most pronounced. By 2050, the impact of heavy rainfall risk is expected to increase.

Case: Weather Alert System Enhancing Store Resilience Against Extreme Climate Risks 案例:天氣預警系統助力門店應對極端氣候風險

To address the challenges posed by global climate change, we have developed and deployed an intelligent weather alert system in the Chinese mainland market. This system automatically retrieves real-time data from multiple authoritative meteorological sources and conducts precise city-level analyses. When extreme weather conditions – such as typhoons, heavy rainfall, or cold waves – are detected in a specific region, the system promptly activates a predefined mechanism, issuing detailed weather alerts to stores in the affected area.

For instance, during periods of intense rainfall, the system sends alerts to store managers in relevant cities, enabling them to take proactive measures. These include reinforcing store infrastructure inspections, adjusting product displays as needed, and stocking emergency supplies to mitigate potential property damage. Through the implementation of this intelligent weather alert system, we continuously enhance our stores' ability to manage climate risks, leveraging technology to build climate resilience and drive a green transition. 為應對全球氣候變化帶來的挑戰,我們在中國 內地市場開發並部署了一套智能天氣預警系 統。該系統通過自動抓取多個權威氣象網站的 即時資料,按照城市維度進行精準分析。當檢 測到某地區即將出現極端天氣(包括颱風、暴 雨、寒潮等)時,系統會立即觸發預設機制, 向該區域內的門店發送詳細的天氣預警信息。

例如,在強降雨天氣中,系統能夠發送預警給 相關城市的門店負責人員,使其能夠提前採取 措施,包括加強店舖設施檢查、適當調整商品 陳列以及儲備應急物資,有效避免了潛在的財 產損失。通過智能天氣預警系統,我們持續提 升門店的應對氣候風險能力,通過科技手段構 建氣候韌性和推動綠色轉型。

Management Practice

Carbon Footprint Assessment in the Production Phase

MINISO places great importance on assessing the environmental impact of its products throughout their design, production, and sales processes. We are committed to fulfilling our corporate social responsibility for low-carbon and eco-friendly operations by focusing on the carbon footprint across the entire product lifecycle.

In particular, our TOP TOY brand requires suppliers to independently conduct carbon footprint assessments during production and provide relevant carbon emission data for laboratory verification, ensuring compliance with our established carbon emission standards. Additionally, after suppliers complete production and delivery, TOP TOY collects and reviews their carbon emission data, comprehensively monitoring emissions throughout the production process. During supplier selection, TOP TOY considers the implementation of emission reduction measures as a key evaluation criterion, conducting on-site inspections of production processes. Only factories that meet our standards are included in our supplier list. As of the end of the Reporting Period, 88% of TOP TOY's suppliers have actively cooperated in providing carbon emission data, covering both core suppliers and the largest suppliers within our network.

Looking ahead, MINISO plans to further conduct product carbon footprint assessments to identify the potential for emission reduction throughout the product lifecycle, from production to disposal ("Cradle to Grave"). This will enable us to understand the current carbon emission status of our products, implement effectively control and reduce emissions and enhance the lowcarbon attributes of our products.

Sustainable Materials

MINISO is committed to promoting environmentally friendly production practices on a global scale by prioritizing the use of more sustainable materials, providing consumers with highquality, eco-friendly products. When selecting sustainable materials, we take a comprehensive approach, considering both technological maturity and cost-effectiveness. This ensures that while advocating for eco-friendly materials, we do not compromise the consumer experience, seamlessly integrating sustainability into an effortless and enjoyable lifestyle.

管理實踐

生產階段碳足跡評估

名創優品高度重視我們的產品在設計、生產與銷 售過程中對環境造成的影響,並致力於通過關注 產品全生命周期的碳足跡來為企業履行低碳、環 保的社會責任做出自己的貢獻。

其中,我們的TOP TOY品牌要求供應商在生產 過程中自行完成產品碳足跡評估,並提供相關碳 排放數據供實驗室核查,以確保其符合我們設定 的碳排放標準。同時,其在供應商生產交付後會 對供應商的碳排放數據進行收集與覆盤,全面監 測生產過程中的碳排放情況。在供應商篩選過程 中,TOP TOY亦將是否具備減排措施作為其核 心評估指標,實地考察生產環節,只有達標的工 廠才能被納入供應商名單。截至報告期末,已有 88%供應商積極配合我們的TOP TOY品牌進行碳 排放數據收集工作,已覆蓋核心以及最大的供應 商。

未來,我們將進一步開展產品碳足跡評估工作, 識別產品從「搖籃到墳墓」全生命週期的減排潛 力,以瞭解自身產品碳排放現狀,有效控排並採 取減排措施,提升我們產品的低碳屬性。

可持續材料

名創優品致力於在全球範圍內推動環境友好的生 產實踐,優先採用更具可持續性的材料,為消費 者提供環保且高品質的產品。在選擇可持續材料 時,我們將綜合考慮技術的成熟度和成本效益, 確保在推廣環保材料的同時不影響消費者的使用 體驗,讓環保融入輕鬆美好的生活。 In the future, we will continue to advance the following initiatives and create more eco-friendly products across various categories, including beauty tools, home decor, stationery, and toys:

- We are committed to developing products using 100% recycled materials or natural materials, and we prioritize selecting suppliers certified by the Forest Stewardship Council ("FSC").
- We have developed the "MINISO ECO" label for products that are plastic-free, easily recyclable, renewable, reusable, BPA-free, and/or lead-free, and we widely apply this label to an increasing number of environmentally friendly products.

At the same time, we are committed to aligning with internationally recognized standards, continuously optimizing raw material traceability and process management mechanisms, and leveraging technological solutions to track the origins of raw materials. Our specific measures include further promoting certification and origin traceability for raw materials such as wood, paper, cotton, and leather. For TOP TOY, all wood and paper materials used in product development, production, and packaging must come from upstream suppliers that prioritize materials sourced from forests certified under the Forest Stewardship Council (FSC) standards. When selecting suppliers, TOP TOY also enforces stringent standards, requiring suppliers to provide detailed information on the regional origins, brands, and specifications of their raw materials, ensuring full transparency and control over their upstream supply chains. 未來,我們會繼續努力推進以下措施,並在包括 美妝工具、生活家居、文具、玩具等品類打造更 多的環保產品:

- 產品使用100%回收材料或天然材料,並盡可能選擇森林管理委員會(「FSC」)認證的供應商。
- 為不含塑料、易於回收、可再生、可重複使用、不含BPA(雙酚A)及/無鉛產品開發「MINISO ECO」標誌,並廣泛應用於更多環保的產品。

同時,我們也致力於與國際領先標準保持一致, 不斷優化原材料溯源及過程管理機制,通過技術 手段探索追蹤原材料來源。具體措施包括推動更 多木材、紙張、棉花和皮革等原材料的認證與原 產地溯源工作。TOP TOY品牌在產品開發、生產 和包裝中涉及的木材和紙張,均要求上遊供應商 優先採用來自通過FSC森林經營標準認證的林場 材料進行生產。在選擇供應商時,TOP TOY亦嚴 格執行標準,要求供應商提供其採購原材料的區 域來源、品牌和型號,確保供應商的上遊供應鏈 透明可控。

Highlights and Cases

Case: "Biodegradable" Certified Products 案例:「可生物降解」認證產品

In recent years, non-woven materials have flourished in the field of disposable sanitary products. Various disposable wipes and dry towels are gradually replacing conventional towel products, becoming emerging products used in wiping, skincare, cleaning care, travel, and other scenarios. MINISO remains committed to promoting green consumption and driving innovation in eco-friendly products. To support sustainable development, we have introduced multiple ecofriendly personal care and travel products that have obtained "Biodegradable" certification. 近年來,非織造材料在一次性衛生用品領域蓬 勃發展,各類一次性柔巾、乾巾等產品逐步替 代常規毛巾類產品,成為應用於擦拭、潔膚、 清潔護理、旅行出差等多個場景的新興產品。 名創優品始終致力於推動綠色消費與環保產品 的創新,圍繞個人護理及旅行系列用品,推出 多款通過「可生物降解」認證的環保產品,積極 踐行可持續發展理念。

For personal care and travel essentials – such as facial towels, disposable bath towels, and hand towels – we use biodegradable materials. These products have been certified under the "Biodegradable" standard issued by the Green Development and Innovation Alliance of the China Nonwoven & Industrial Textiles Association ("Green Alliance"). This certification follows rigorous industry standards to ensure the products' environmental performance and biodegradability. By utilizing biodegradable materials in disposable hygiene products, we minimize long-term ecological impact. These products naturally decompose under specific conditions, reducing plastic pollution and promoting resource recycling, thereby mitigating environmental harm. As of the end of the Reporting Period, 29 SKUs of our products have been awarded the Green Alliance "Biodegradable" certification.

[&]quot;Biodegradable" Certified Products 獲得「可生物降解」認證的產品

在個人護理及旅行系列用品(如洗臉巾、一次性浴巾、毛巾等)中,我們採用可生物降解材質。這些產品均通過了 由中國產業用紡織品行業協會綠色發展創新聯盟(「綠盟」)推出的「可生物降解」認證。該認證依據嚴格的行業標準 確保產品的環保性能和可降解特性。我們的一次性衛生用品通過使用可生物降解材質,減少了對生態環境的長期影響。這些產品能夠在特定條件下自然降解,降低塑料污染,同時促進資源的循環利用,減少對環境的負面影響。截 至報告期末,我們已有29款SKU產品獲得綠盟「可生物降解」認證。

Case: Introducing Eco-Friendly Materials to Drive Green Product Upgrades 案例:引入環保材料,推動產品綠色升級

MINISO is continuously exploring the application of sustainable materials in its products to reduce resource consumption and environmental impact while promoting green consumption. To date, we have successfully launched two representative categories of eco-friendly products:

PEN PEN Plush Toy Made from Recycled Materials

• 以環保再生材料打造的PEN PEN玩偶

We have introduced the ECO-friendly PEN PEN plush toy, made with Global Recycled Standard (GRS) certified materials. Both the fabric and filling of this plush toy are produced from recycled PET plastic bottles. This design not only meets environmental requirements in material selection but also embodies circular economy principles by repurposing waste into high-quality products, reducing reliance on virgin resources. 名創優品持續探索環保材料在產品中的應用, 以減少資源消耗和環境影響,推動綠色消費。 目前,我們已成功推出了兩類具有代表性的環 保材質產品:

我們推出了通過全球回收標準(「GRS」)認證的ECO環保材質PEN PEN公仔,其面料和填充物均採用回收的PET塑料瓶製成。這一設計不僅在材料選擇上符合環保要求,更通過資源回收利用,將廢棄物轉化為高品質產品,減少對原生資源的依賴,積極踐行循環經濟理念。

Eco-Friendly Data Cable Infused with Natural Plant Fibers 加入天然植物纖維的環保數據線

In the digital accessories sector, we have launched an ecofriendly data cable, incorporating natural plant fibers (such as straw powder) into its TPE coating as a degradable material. This innovative technology significantly enhances the environmental attributes of the data cables, extending their product lifespan while markedly reducing the potential environmental impact of the materials used. 在數碼配件領域,我們推出了環保材質數 據線,其TPE膠料中加入了天然植物纖維 (如稭稈粉)作為降解材料。這一技術有效 提升了數據線的環保特性,在延長產品使 用壽命的同時,顯著降低了材料對環境的 潛在影響。

Our TOP TOY brand is committed to reducing resource waste through continuous packaging design optimization. We ensure that the actual product is a 1:1 match with its packaging design illustration, providing consumers with an intuitive visual experience while strictly controlling packaging dimensions to prevent excessive packaging – an issue commonly seen in the market.

Furthermore, we have implemented clear packaging guidelines based on product weight: For products weighing less than 300g, we use single-layer paper packaging. For products over 300g, we adopt a more durable corrugated box structure for enhanced stability. Through these measures, we have effectively reduced packaging material consumption while maintaining product quality, reinforcing our commitment to sustainable development. 我們的TOP TOY品牌持續通過優化包裝設計 減少資源浪費。我們要求產品實物與包裝設計 圖1:1還原,在為消費者提供直觀感官體驗的 同時,嚴格限定包裝體積,避免市場上常見的 過度包裝現象。

此外,我們根據產品重量制定了明確的包裝方 案:對於重量低於300g的產品,採用單層紙 包裝;對於重於300g的產品,則選用更穩固 的坑盒結構包裝。通過這一系列舉措,我們有 效地減少了包裝材料的使用,在保障產品品質 的同時,積極踐行綠色發展理念。

Emissions and Waste Management

排放物與廢棄物管理

Moving forward, we will ensure a 100% compliant recycling rate for hazardous waste and 100% standard-compliant wastewater discharge.

未來,我們將確保有害廢棄物合規回收率 100%,污水排放100%達標。

The emissions involved by our company mainly include waste used in retail stores and warehouses, exhaust gases from company vehicles and waste such as spent light bulbs, used printer cartridges, and ink cartridges generated during office operations, as well as domestic and kitchen waste produced at office premises. We strictly adhere to local regulations regarding the management and classification of emissions and waste, ensuring the compliant management and disposal of pollutants and waste in our operational processes. 本公司涉及的排放物主要包括零售門店及倉庫物 料使用的廢棄物,公司車輛使用過程中排放的廢 氣,辦公運營過程中產生的廢燈管、廢打印機硒 鼓及墨盒等廢棄物,辦公場所產生的生活及廚餘 垃圾等。我們嚴格遵守各地區有關排放物及廢棄 物管理分類的相關管控條例,對運營過程中的污 染物和廢棄物進行合規管理和處置。 Hazardous Waste Managemen 針對有害 廢棄物 We will collect, safely store, and manage these items separately before handing them over to qualified professional third parties for unified treatment, with a focus on controlling and supervising the recycling and disposal of hazardous waste. 我們會單獨收集並進行安全存放和管理,再交 由具備資質的專業第三方進行統一處理,重點 控制及監督有害廢棄物的回收處理情況。

Non-Hazardous Waste Management 針對無害 廢棄物 For non-hazardous waste, separate collection will be made and the non-hazardous waste will be handed over to external designated organizations for recycling. In the warehouse logistics process, we use suppliers' original packaging for secondary use. The recycled cartons are handed over to resource recycling providers for further processing to ensure regeneration. In the retail stores, waste is mainly composed of cardboard, of which over 90% can be returned to the warehouse for recycling, effectively promoting efficient waste management and operational sustainability. 我們實施分類收集,並將其交由外部指定機構 進行回收再利用。在倉庫物流環節,我們使用 供應商原箱出貨實現二次利用,回收的紙箱則 交由資源回收商處理,以確保再生利用。在門 店環節,廢棄物主要以紙箱為主,其中90%以 上可實現回倉循環利用,有效推動廢棄物管理 的高效化和運營的可持續性。

Additionally, we actively guide and urge our employees to practice waste segregation in office areas. Through initiatives such as promoting waste segregation in the workplace, posting educational posters on waste classification, and increasing the number of categorized trash bins on each floor, we fully engage our employees' proactive participation in waste management, thereby motivating them to actively implement waste segregation. 此外,我們也積極引導和敦促僱員在辦公區域進 行垃圾分類,通過開展辦公區域垃圾分類普及、 張貼垃圾分類宣傳海報、增加各樓層分類垃圾桶 數量等方式,充分調動僱員對於垃圾分類管理工 作的主觀能動性,驅動僱員積極落實垃圾分類。
