Since 2023, we have structured our ESG initiatives around four pillars: Our Planet, Our Product, Our People, and Our Community. Below are the key highlights of our progress:

自2023年起，我們的環境、社會及管治措施主要圍繞四大支柱：「我們的地球」、「我們的產品」、「我們的員工」及「我們的社區」。我們的主要進展如下：

Our Planet: In alignment with our commitment to environmental stewardship, we have stepped up our efforts to reduce our environmental impact by cutting emissions, optimising resource efficiency, and improving the packaging of our products. Notably, 2024 marks our first year of disclosing Scope 3 value chain emissions, a significant step towards enhancing transparency in our climate reporting. Additionally, we began integrating biomass materials into the production of our Cup Noodles packaging, further reducing reliance on plastics. Moving forward, we will continue refining our Scope 3 reporting and investing in sustainable packaging solutions.

我們的地球：為貫徹我們對環境管理的承諾，我們已加大力度，通過減少排放、優化資源效率以及改善產品的包裝來降低我們的環境影響。值得注意的是，2024年是我們披露範圍3價值鏈排放的第一年，此乃我們在提高氣候報告透明度方面邁出的重要一步。此外，我們開始將生物質材料融入合味道包裝的生產，進一步減少對塑料的依賴。未來，我們將繼續完善範圍3報告，並投資於可持續包裝解決方案。

2024 MATERIALITY ASSESSMENT

2024年重要性評估

Issue and Topic Identification

In 2024, we refined our material sustainability topics through a structured materiality assessment to enhance the relevance and focus of our ESG strategy. By conducting initial research and engaging stakeholders, we identified and prioritized 11 core areas that align with evolving industry trends and market expectations. This year’s assessment also introduced two new topics: *Water and wastewater management*, due to heightened regulatory scrutiny and global concerns over water scarcity, particularly in regions where we operate; and *Selling practices and product labelling*, in response to growing consumer demand for transparency, stricter regulations on marketing claims (e.g., health or sustainability), and the need to build trust through accurate, ethical communication.

Issue Prioritization

Stakeholders took part in an online survey to assess the significance and applicability of various issues affecting Nissin Foods. We created and distributed a set of comprehensive surveys for stakeholder involvement and materiality evaluation to our primary stakeholders. These surveys were crafted to gather their insights regarding the materiality impact and financial implications of each identified ESG issue. Our aim is to comprehend not just how these topics directly affect our operations, but also how important they are seen from the perspective of our stakeholders.

議題識別

於2024年，我們透過結構化重要性評估完善重大可持續發展議題，以提升環境、社會及管治策略的相關性及重點。透過進行初步研究及持份者參與，我們已識別並優先排序符合瞬息萬變的行業趨勢及市場預期的11個核心領域。本年度評估亦引入兩個新議題：水資源及廢水管理，此乃由於監管審查力度加強以及全球對水資源短缺的擔憂，尤其是我們經營所在地區；以及銷售常規及產品標籤，以滿足消費者日益增長的透明度需求、對營銷索賠（例如健康或可持續性）的更嚴格規定，以及透過準確及道德溝通建立信任的需要。

議題優先排序

持份者參與一項線上調查，以評估影響日清食品的多項議題的重要性及適用性。我們制定並向主要持份者發放一套全面的持份者參與及重要性評估問卷。該等調查旨在收集彼等對於各已識別環境、社會及管治議題的重要性影響及財務影響的見解。我們的目標為不僅了解該等議題如何直接影響我們的營運，亦了解該等議題對持份者而言的重要性。

Issue Validation

We held an internal focus group session with the company's leadership and those responsible for managing risks. The purpose was to evaluate and confirm the effects of the highlighted topics. Through these interviews and focus group talks, we achieved a better understanding of how these topics are significant both to our stakeholders (their materiality) and to Nissin Foods's financial performance (its financial materiality). The results of this comprehensive process of identification, prioritization, and validation were combined and considered in the sensing model to create the dual materiality matrix.

Strategic Alignment, Communication and Planning

The materiality assessment verified that the identified sustainability topics are well-aligned with our strategic goals and plans. New priorities, including *Water and wastewater management* and *Selling practices and product labelling*, have emerged from a thorough and inclusive evaluation through the concept of double materiality. Moving forward, we plan to discuss and examine how to effectively integrate these new priorities into our sustainability strategy with Management Committee at the board level for proactive management.

Disclosure of Material Issues

The findings from our materiality assessment guide the content of the disclosures in this ESG report.

Under the new double materiality mechanism*, we identified eleven material topics, summarised below:

* *The double materiality matrix is a commonly adopted framework for identifying and illustrating a company's material ESG topics from both a financial materiality perspective (which considers the economic impact of ESG issues on the company), and an impact materiality perspective (which evaluates the social and environmental impacts of the company's operations). The matrix helps stakeholders understand how ESG factors affect a company's financial performance and its broader societal and environmental impacts.*

議題核證

我們與公司領導層及負責管理風險的人員舉行內部焦點小組會議，旨在評估及確認所強調議題的效果。透過該等面談及焦點小組討論，我們更深入了解該等議題對我們持份者(其重要性)及日清食品的財務表現(其財務重要性)的重要性。我們於感知模型中加入並考慮是項全面識別、優先排序及核證過程的結果，以創建雙重重要性矩陣。

策略調整、溝通及規劃

重要性評估核證，已識別可持續發展議題與我們的策略目標及計劃一致。透過雙重重要性理念進行全面及廣泛評估產生新優先事項，包括水資源及廢水管理以及銷售常規及產品標籤。展望未來，我們計劃與董事會層面的管理委員會討論及審查如何將該等新優先事項有效融入我們的可持續發展策略，從而進行主動管理。

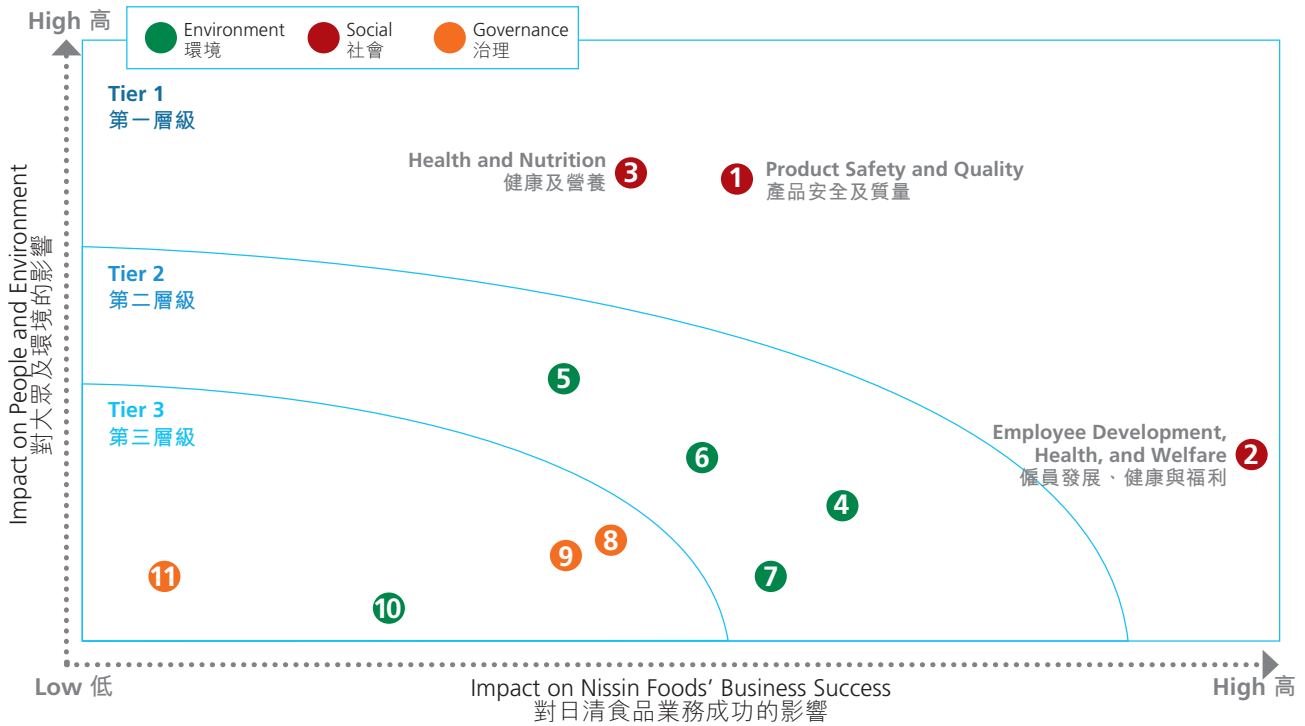

重大議題披露

我們的重要性評估結果為本環境、社會及管治報告所披露的內容提供指引。

在新的雙重重要性矩陣機制*下，我們已識別十一項重大議題，概列如下：

* 雙重重要性矩陣為一種常用框架，用於從財務重要性角度(考慮公司環境、社會及管治議題對經濟的影響)及影響重要性角度(評估公司營運對社會及環境的影響)來識別和說明公司的重大環境、社會及管治議題。此矩陣可幫助持份者了解環境、社會及管治因素如何影響公司的財務表現及其更廣泛的社會及環境影響。

STAKEHOLDER ENGAGEMENT 持份者參與

The eleven topics identified as material ESG issues have received high materiality ratings from both our senior management and other stakeholders. Among these, “Product Safety and Quality,” “Employee Development, Health, and Welfare,” and “Health and Nutrition” stand out as the top three material ESG topics.

- The high ranking of “**Product Safety and Quality**” and “**Health and Nutrition**” underscores the critical importance of product integrity, reliability, and nutritional value in the food industry. This priority aligns with the increasing consumer awareness and expectations regarding food standards and safety, reflecting the enduring importance of these factors to our stakeholders.
- “**Employee Development, Health, and Welfare**” is gaining prominence as a crucial ESG focus area, reflecting a growing interest among stakeholders in the welfare and career development of our employees. With increased societal and regulatory attention on workers’ rights and health, this area is deemed essential for targeted investments and improvements. It aligns with international labour standards and the consumer demand for socially responsible corporate practices.

十一個議題已識別為重大的環境、社會及管治議題，均已獲我們的高級管理層及其他持份者較高的重要性評級。其中，「產品安全及質量」、「僱員發展、健康與福利」以及「健康及營養」成為前三名重大的環境、社會及管治議題。

- 「**產品安全及質量**」及「**健康及營養**」的高排名強調產品完整性、可靠性及營養價值對食品行業至關重要。這項優先順序符合消費者對食品標準及安全日益增強的認識和期望，反映該等因素對我們持份者的持久重要性。
- 「**僱員發展、健康與福利**」作為環境、社會及管治的關鍵關注領域，日漸受到重視，反映持份者對僱員福利及職業發展的關注日益增加。隨著社會及監管機構對員工權利及健康的關注度不斷提高，這一領域被視為對定向投資及改進至關重要。其符合國際勞工標準及消費者對企業社會責任行為的要求。

ADDRESSING THE TWO NEW MATERIAL ESG TOPICS

ESG OVERSIGHT 環境、社會及管治監督

BOARD-LEVEL GOVERNANCE

The framework for our ESG governance is established at the very top, with the Board holding direct responsibility for supervising the Company's ESG strategy, as well as the associated sustainability risks and opportunities. Our governance model, which operates from the top down, guarantees a detailed and strategic focus on ESG issues. The Board has assigned certain ESG duties to the Management Committee, which consists of Executive Directors, senior managers, and the heads of different business units, all led by the Chief Executive Officer. This committee is tasked with conducting a detailed review of the Group's ESG performance and presents its annual conclusions to the Board.

The Board regularly confronts sustainability challenges, setting aside at least one meeting each year to deliberate on important sustainability topics, thereby ensuring that ESG factors are embedded in the Company's strategic decision-making.

To improve the efficacy of our ESG governance, our senior management and Board members are continually updated and trained on the newest ESG and sustainability advancements, such as sessions on the developing ESG criteria for publicly listed companies. This constant educational process ensures that the leaders at Nissin Foods are fully prepared to direct the Company's sustainability initiatives.

During board meetings, the ESG report is put through a thorough review to ensure that every element of the report is in harmony with our sustainability aims and corporate values. Following a meticulous review and discussion, the ESG report gains official approval. Furthermore, the Enterprise Risk Management ("ERM") report, which includes findings from risk interviews with non-independent directors and management from key departments and subsidiaries, is also presented and approved by the Board. This step ensures that ESG risks are properly managed and supervised at the highest organisational level.

MANAGEMENT-LEVEL GOVERNANCE

At the management tier, senior executives are responsible for tackling and guiding the practical aspects of sustainability-related risks and opportunities. Business unit heads and managers are given the task of carrying out the ESG risk management procedures and reduction strategies. Risks related to sustainability are incorporated into our risk register, forming a component of our extensive ERM Policy.

During 2024, we conducted a scrutiny and refresh of our operational risk assessment to make sure that it correctly represents the existing external and internal environment and emerging challenges. Beyond simply ensuring compliance, our detailed examination of the operational risk assessment is also intended to improve our ability to respond to the evolving ESG challenges. We are committed to constantly improving our governance and risk management approaches, keeping them in alignment with worldwide industry standards and the evolving character of ESG matters.

Regarding business ethics, Nissin Foods has put in place a robust system to preserve integrity and fight against corruption. Our dedication to ethical behaviour is shown through extensive policies and proactive steps aimed at cultivating a workplace culture of honesty, openness, and accountability. We take a firm stance on dealing with bribery, fraud, and corruption, implementing a zero-tolerance approach across all our activities. Our Anti-bribery and Corruption guidelines, together with the Whistleblowing Policy, lay the foundation for our ethical actions. These policies not only direct our directors, officers, and staff to comply with legal and ethical norms but also promote responsibility and create a setting where ethical behaviour is of utmost importance.

ANTI-BRIBERY AND CORRUPTION

Our Anti-corruption Policy, in conjunction with the Anti-Bribery Policy, the Employee Handbook, the Nissin Foods Group Code of Conduct, and the Internal Compliance Policy, directs the actions of all directors, officers, and employees. These documents offer straightforward principles for doing business with sincerity and moral uprightness, greatly diminishing the chance of corruption and bribery occurring.

At the heart of our ethical structure is the Internal Audit Department (IAD), which is pivotal in investigating potentially fraudulent activities and strengthening adherence to the rules. The IAD communicates any major violations to the Board on an annual basis, complete with information on notable fraud incidents and the results of the inquiries. It is the Board's ultimate duty to oversee and handle the associated risks effectively.

In 2024, we reinforced our commitment to ethical practices by conducting the Advertising Law-related training and Competition Ordinance sessions for our employees. The training series is part of our ongoing effort to ensure regulatory adherence and maintain high ethical standards in our sales practices and foster compliance and ethical conduct.

Moreover, we keep a close watch on changes in regulations and regularly refresh our ethical guidelines to sustain high levels of integrity throughout our business activities. Over the course of the year, there were no legal proceedings concluded against Nissin Foods or our staff in relation to corrupt activities.

WHISTLEBLOWING

We have established thorough whistleblowing policies to make it easy to report instances of fraud and wrongdoing. The Whistleblowing Policy is applicable to the Company and each of its subsidiaries, and it offers explicit directions for directors, officers, employees, and stakeholders on how to file reports while ensuring their confidentiality. There are several ways to submit a report, including via email to the Human Resources Department, which guarantees that the process is accessible and allows for anonymous reporting.

When a report is submitted, it will either be investigated internally or forwarded to external entities. Following the investigation, the Group's Compliance Committee drafts a report that details the issue's consequences and suggests a course of action. The line management then evaluates the findings and decides if any disciplinary actions are necessary. These decisions are reviewed by the Compliance Committee to ensure proper consideration and fairness before the management team arrives at a final decision.

In 2024, we conducted a comprehensive review of our Whistleblowing Policy to ensure it remains current and incorporates all necessary updates. Regular policy evaluations and enhancements are essential to maintain accountability within our operations and to uphold our core values of honesty and integrity in every aspect of our business.

OUR PLANET

我們的地球

OUR PLANET 我們的地球

As a corporation with a sense of responsibility, we firmly believe in the vital role that sustainable business operations play in protecting our earth for the sake of future generations. Nissin Foods' wide-ranging environmental activities and strategies reflect our deep respect for the natural world and our role within it. In addition to complying with environmental regulations and laws, we actively work to improve our management of the earth's resources. By employing creative solutions, strict policies, and a strong dedication to sustainability, we strive to align our business activities with the goals of environmental safeguarding and preservation, aiming to have a beneficial effect on our planet.

EMISSIONS

Overview of GHG Emissions in Our Operations

In 2024, we have continued our careful tracking and control of Greenhouse Gas ("GHG") emissions, especially those coming from our manufacturing processes. By concentrating on pinpointing significant emissions sources and implementing effective mitigation strategies, we achieved favourable outcomes. We are dedicated to minimizing our greenhouse gas output and making sure our business practices support worldwide sustainability targets.

To ensure the reliability and robustness of our emission data, we have engaged an independent consultant for a detailed carbon assessment. This assessment incorporates international standards such as ISO 14064 and adheres to guidelines set by the National Development and Reform Commission in mainland China, as well as building standards in Hong Kong.

During the year, our Sites of Operation generated a total of 86,720 tonnes of CO₂-equivalent GHG emissions; and a total of 2 tonnes, 0.01 tonnes, and 0.0012 tonnes of NO_x, SO_x, and respirable suspended particles respectively in our Sites of Operation.

Air Quality Control

To make sure the gases released from our production adhere to emission regulations, we strictly maintain a schedule for cleaning our coiled fans and dust collection systems. Keeping the air clean near our plants and cutting down on air pollution depend heavily on this approach.

At the same time, we have acted firmly to control emissions from our private cars. We do regular checks to keep them running efficiently and causing less harm to the environment. Also, we are getting rid of our gasoline-powered vehicles and endeavouring to replace our company-owned general passenger vehicles with electric alternatives.

Reducing Volatile Organic Compounds (VOC) Emissions

When using the dry lamination method, the wrapping process releases volatile organic compounds (VOCs) into the air, contributing to air pollution by forming ground-level ozone and fine particles.

In 2024, we intensified our commitment to reducing our environmental impact by adopting advanced packaging production techniques. We transitioned from dry lamination to solvent-free lamination, which has led to a consistent reduction in VOC emissions over the past three years. Moreover, building on the progress of the additional step we took in 2023 by switching to water-based gravure ink for printing the white areas of the individual packaging for our bag-type instant noodle products, has further decreased our VOC emissions.

作為一家具有責任感的公司，我們堅信可持續業務營運對於為下一代保護我們的地球至關重要。日清食品廣泛的環境活動及策略反映我們對自然世界以及我們於其中所擔任角色的深深敬畏。除遵守環境法規及法律外，我們亦積極致力改善對地球資源的管理。透過採用創造性的解決方案、嚴格的政策及對可持續發展的堅定承諾，我們致力使我們的業務活動與環境保護目標保持一致，旨在對我們的地球產生正面影響。

排放物

我們營運中的溫室氣體排放概要

於2024年，我們繼續審慎追蹤及控制溫室氣體（「GHG」）排放，尤其是製造流程產生的排放。透過專注找出重大排放源並實施有效的緩解策略，我們取得可觀成果。我們致力減少溫室氣體排放，並確保我們的商業慣例符合全球可持續發展目標。

為確保排放數據的可靠性及穩健性，我們已委聘獨立顧問進行詳細的碳評估。該評估納入ISO 14064等國際標準，並符合中國內地國家發展和改革委員會及香港建築標準的指引。

於本年度，我們生產廠房所產生之溫室氣體排放量合共86,720噸二氧化碳當量；生產廠房分別合共產生2噸、0.01噸及0.0012噸氮氧化物、硫氧化物及可吸入懸浮顆粒物。

空氣質量控制

為確保生產排放的廢氣符合排放標準，我們嚴格設立時間表清理風機及除塵系統。該方法很大程度上保持工廠附近的空氣清潔及減少空氣污染物。

同時，我們堅決控制私家車的排放。我們定期檢查以確保車輛有效運作並減少對環境的危害。此外，我們正逐步淘汰汽油車，並致力以電動車取代公司擁有的一般乘用車。

減少揮發性有機化合物排放

當使用乾式覆膜法時，揮發性有機化合物(VOC)於包裝過程中會被排放到空氣中，通過形成地面臭氧與細小顆粒物而造成空氣污染。

於2024年，我們透過採用先進的包裝生產技術，加強減少對環境影響的承諾。我們由乾式覆膜改為使用無溶劑覆膜，使過去三年的VOC排放持續減少。此外，我們於2023年採取的額外措施的基礎上，採用水性凹版油墨印刷袋裝即食麵產品的獨立包裝的白色部分，進一步減少VOC排放。

OUR PLANET 我們的地球

In 2024, we successfully reduced VOC emissions from our operations by 282 tonnes through the use of solvent-free lamination, compared to the traditional dry lamination method. Additionally, the solvent-free lamination process helped us cut energy consumption, resulting in an approximate reduction of 841 tonnes of CO₂ during the reporting year. Furthermore, the adoption of water-based gravure inks in 2024 led to an additional reduction of 48.43 tonnes of VOCs.

Currently, we are diligently investigating ways to expand the application of water-based gravure ink to more colours and a wider variety of packaging materials. This effort aims to lessen our impact on the environment even further. Our enthusiastic embrace of eco-friendly technologies highlights our dedication to minimizing environmental impact and our pledge to consistently enhance our environmental responsibilities.

Rigorous Adherence to Environmental Laws and Regulations

Adhering to the laws and regulations of the regions where we conduct business is of paramount importance. In Hong Kong, we follow various emission-related laws, such as the Ozone Layer Protection Ordinance and the Air Pollution Control Ordinance. Similarly, in Mainland China, we operate in full compliance with the Environmental Protection Law and the Energy Conservation Law. We actively track the development and enactment of new laws to guarantee that we remain ahead in terms of regulatory adherence and can quickly adjust our procedures to meet the latest criteria.

USE OF ENERGY

Our approach to energy efficiency and sustainability encompasses various aspects of energy use, from employee behaviour to operational changes and large-scale infrastructure projects.

Cultivating a Culture of Energy Conservation

Embedding Energy Awareness in our Everyday Lives

We understand how critical it is to foster a mindset of energy efficiency throughout our organization. At Nissin Foods, our guidelines for environmental protection and energy conservation are not just policies; they are integral to our daily operations. We strive to encourage our employees to modify their behaviours in ways that save energy. We believe that simple everyday actions, like using air conditioning, ventilation, and lighting efficiently, can add up to significant energy reductions. To promote this, we regularly conduct training and awareness programmes for our staff. These initiatives are intended to inform and motivate our team to incorporate energy-saving practices into their professional and personal routines.

Renovation for Energy Efficiency

Air Conditioning System Renovation

In 2023, we undertook a renovation of the air conditioning system at one of our plants in Hong Kong, supported by the Eco Building Fund from CLP Power Hong Kong. This project was aimed at enhancing the energy efficiency of our cooling systems. As a result, the renovation has saved approximately 41,558 kWh of electricity in 2024. Similarly, this year, we initiated a similar renovation project at our plant in Fujian, China. Through remodelling the air conditioning system to separate the air conditioner service area in production area at Fujian Nissin, we have already saved 684,396 kWh of electricity in 2024.

於2024年，相較傳統的乾式覆膜法，我們透過使用無溶劑覆膜成功將營運產生的VOC排放減少282噸。此外，無溶劑覆膜流程助力我們減少能源消耗，導致報告年度二氧化碳排放減少約841噸。另外，2024年採用水性凹印油墨將進一步減少排放48.43噸VOC。

目前，我們正致力探求將水性凹印油墨的應用擴展至更多顏色、更廣泛的包裝材料的方法，旨在進一步減少我們對環境的影響。我們積極採用環保技術凸顯我們致力減少環境影響以及不斷加強環境責任的承諾。

嚴格遵守環境法律及法規

遵守我們開展業務所在地區的法律及法規至關重要。在香港，我們遵守各項與排放相關的法規，包括《保護臭氧層條例》及《空氣污染管制條例》。同樣地，在中國內地，我們的營運全面遵守《環境保護法》及《節約能源法》。我們積極追蹤新法律的發展及頒佈，以確保我們一直處於監管合規的最前沿，並可迅速調整我們的程序以符合最新標準。

能源使用

我們的能源效率及可持續發展方針涵蓋能源使用的各個方面，從員工行為至運營變革及大型基礎設施項目。

培養節能文化

將能源意識融入日常生活

我們深知於整個公司內培養節能意識的重要性。在日清食品，我們的環保及節能指引並非僅僅只是政策，亦是我們日常營運不可或缺的一部分。我們致力鼓勵員工改變行為以節約能源。我們相信，日常的微小行動，如有效使用空調、通風及照明，可累積減少大量能源消耗。為此，我們定期為員工提供培訓及宣傳計劃。這些措施旨在告知及鼓勵我們的團隊將節能實踐納入工作及個人日常生活中。

節能翻新

空調系統翻新

於2023年，在中電「綠適樓宇基金」的支持下，我們對香港一家工廠的空調系統進行翻新。該項目旨在提高我們的製冷系統的能源效率。因此，是項翻新於2024年節省電力約41,558千瓦時。同樣地，本年度我們位於中國福建的工廠亦啟動類似翻新項目。透過改造空調系統，福建日清將生產區空調服務區分開，於2024年節省電力684,396千瓦時。

Upgrading of Boilers

In 2024, Zhejiang Nissin took significant steps to optimize its manufacturing processes, focusing on energy efficiency and sustainability. One of the key initiatives was the upgrade of a boiler, which improved efficiency from 92% to 95%. This enhancement resulted in a 4% reduction in natural gas consumption and a substantial decrease in electricity usage, dropping from 20,086 kWh to 13,366 kWh annually per boiler. Furthermore, the introduction of Reverse Osmosis (RO) Systems marked a significant advancement in water management practices. These systems not only enhanced water recycling capabilities but also led to a reduction in wastewater generation from 7% to 2%, underscoring the company's commitment to environmental stewardship.

Similarly, Zhuhai Winner has made notable strides in energy efficiency. The company upgraded its factory boilers, resulting in a 5% reduction in natural gas consumption per ton of steam from August 2024, compared to the average in 2023. This improvement highlights the company's dedication to reducing GHG emissions and achieving significant energy savings.

Shunde Nissin also contributed to these efforts by replacing its 10-ton boilers with four 2-ton units. This upgrade is expected to reduce annual natural gas use by 156,000 cubic meters, a 6.25% decrease. This initiative exemplifies the company's commitment to energy conservation and cost savings, aligning with its broader ESG objectives. These advancements demonstrate our ongoing commitment to sustainable practices and dedication to reducing their environmental impacts.

LED Lighting & Lighting Controls

We have transitioned to LED lighting in all our facilities in Hong Kong, replacing conventional light tubes. Achieving 100% LED coverage has enabled us to reduce our electricity usage by approximately 19,000 kWh annually, contributing to lower energy consumption and a corresponding decrease in CO₂ emissions.

In alignment with our ongoing energy conservation efforts, Winner Food Products Ltd. ("Winner") has continued to implement measures to further optimise electricity usage. In 2024, Winner expanded its lighting control initiatives by installing motion sensors in changing rooms to minimise unnecessary energy consumption. Over the past year, these sensors have successfully reduced electricity usage by an average of 98 kWh per month. Building on this progress, we will continue to explore and implement energy-efficient solutions across our operations to drive further sustainability improvements.

Solar Lighting

In 2024, Zhuhai Winner has embraced renewable energy by installing solar lights across its operational site. These lights harness solar power during the day, storing energy to illuminate the premises at night, thereby reducing overall electricity consumption. Similarly, Nissin Vietnam is exploring energy-saving solutions by trialling solar-powered rechargeable lamps in its factory yard. Following a successful pilot, where brightness and duration meet standards, Nissin Vietnam plans to replace all other yard lighting with these eco-friendly alternatives.

Optimising Steam Consumption

Starting from 2022, we began installing flash steam recovery devices to boost energy efficiency by cutting down on steam usage. Currently, these devices are operational in four of our factories located in Shunde, Zhejiang, Fujian, and Zhuhai. This flash steam recovery system has enabled us to achieve a reduction in steam consumption by 7%-17%. Committed to further enhancing our steam efficiency, we plan to extend the installation of these steam circulation systems to additional plants, contributing to a further decrease in our overall environmental impact.

鍋爐升級

於2024年，浙江日清採取重大措施優化其製造流程，專注能源效率及可持續發展。其中一項重要舉措為升級鍋爐，將效率由92%提升至95%。是次提升使天然氣消耗減少4%及用電量大幅下降，每台鍋爐每年用電量由20,086千瓦時降至13,366千瓦時。此外，反滲透(RO)系統的引入標誌水管理實踐的重大進步。該等系統不僅增強水循環利用能力，同時將廢水產生量從7%減少至2%，彰顯該公司對環境管理的承諾。

同樣地，珠海永南在能源效率方面亦取得顯著進展。該公司對工廠鍋爐進行升級，自2024年8月起，每噸蒸汽的天然氣消耗量較2023年的平均水平減少5%。是項改進凸顯該公司致力減少溫室氣體排放及實現大幅能源節約。

順德日清亦進行鍋爐升級，將其10噸鍋爐更換為四台2噸鍋爐。此次升級預期將減少年天然氣用量156,000立方米，降幅達6.25%。是項舉措體現該公司對能源節約及節省成本的承諾，符合其更廣泛的環境、社會及管治目標。該等進步表明我們踐行可持續發展的持續承諾以及致力減少其環境影響。

LED照明&照明控制

我們位於香港的所有設施已改用LED照明，取代傳統燈管。實現100% LED覆蓋率使我們每年減少用電量約19,000千瓦時，有助降低能源消耗，繼而相應減少二氧化碳排放量。

為配合我們持續進行的節能工作，永南食品有限公司(「永南」)已持續推行措施以進一步優化用電。於2024年，永南擴大照明控制措施，在更衣室安裝動作感應器，以減少不必要的能源消耗。過去一年，該等感應器已成功減少每月平均用電量98千瓦時。在此基礎上，我們將繼續於營運中探索並實施節能解決方案，進一步推動可持續發展。

太陽能照明

於2024年，珠海永南於其整個營運場所安裝太陽能燈，採用再生能源。該等燈具白天利用太陽能，儲存能量以於晚上照亮場所，從而減少整體電力消耗。同樣地，日清越南公司亦於工廠院內試用太陽能充電燈，探索節能解決方案。經成功試點，亮度及持續時間符合標準，日清越南計劃以該等環保燈具取代所有其他庭院照明。

優化蒸汽消耗

自2022年起，我們開始安裝閃蒸蒸汽回收設備，通過減少蒸汽消耗來提高能源效率。目前，該等設備於我們在順德、浙江、福建及珠海的四間廠房投入營運。閃蒸蒸汽回收系統讓我們的蒸汽消耗量降低7%至17%。為進一步提高蒸汽效率，我們計劃在更多廠房安裝該等蒸汽循環系統，從而進一步降低對環境的整體影響。

Scaling up the Use of Renewable Energy in our Operations

A key action in our pursuit of sustainable energy sources has been the deployment of solar panels. In the previous year, we achieved our goal of installing solar panels at Zhuhai Winner, and as a result, we now have over 9,700 solar panels spread across our sites in Hong Kong and Mainland China, with a generating capacity of more than 5,200 MWh in 2024. Every month, we closely track the output and efficiency of these solar panels by examining metrics like electricity consumption, power generated, and financial savings. This detailed monitoring guarantees that we are fully leveraging the advantages of solar power and constantly improving our utilization of renewable energy.

在營運中推廣使用可再生能源

我們尋求可持續能源的關鍵行動便是安裝太陽能電池板。去年，我們實現在珠海永南安裝太陽能電池板的目標，因此，我們當前在香港及中國內地的工廠擁有逾9,700塊太陽能電池板，於2024年的發電量超過5,200兆瓦時。我們每月透過檢查用電量、發電量及財務節省等指標密切監測該等太陽能電池板的發電量及效率。全面監測確保我們充分利用太陽能的優勢並持續提高可再生能源的利用率。

The deployment of solar panels has played a key role in altering our energy use and decreasing our CO₂ output. Through the use of solar energy, we have succeeded in preventing over 2,963 tonnes of CO₂ from being emitted in 2024.

太陽能電池板的安裝在改變我們的能源使用方式及減少二氧化碳排放方面發揮重要作用。透過利用太陽能，我們於2024年成功防止超過2,963噸二氧化碳排放。

Looking ahead, we recognize the vast opportunity in broadening our reliance on solar panels and other forms of renewable energy. Not only will this help us to further reduce our CO₂ emissions, but it will also prepare us for potential future developments, such as the introduction of a carbon tax. Moreover, the evolving preferences of consumers, who are increasingly placing importance on sustainability, may influence our business practices. Consumers' views on environmental issues could affect their buying choices, which in turn encourages us to meet the demands of a customer segment that is committed to environmental responsibility.

展望未來，我們認識到擴大對太陽能電池板及其他形式的可再生能源的依賴具有廣闊機遇。這不僅有助我們進一步減少二氧化碳排放，亦將令我們為未來潛在發展作好準備，如徵收碳稅。此外，消費者越來越重視可持續發展，其不斷變化的喜好可能影響我們的商業實踐。消費者對環境議題的看法可能影響其購買選擇，從而促使我們滿足致力於環境責任的客戶群的需求。

THE ENVIRONMENT AND NATURAL RESOURCES

Our Environmental Management System

We have established a comprehensive framework of environmental governance that revolves around our ISO 14001-certified Environmental Management System (EMS). Our robust policies guide operational decisions with potential environmental impact, ensuring that every action aligns with our commitment to environmental stewardship. The EMS serves as the bedrock of many of our environmental initiatives.

Consistent Legal Compliance

Over the past year, Nissin Foods has remained steadfast in its commitment to environmental regulations, strictly adhering to crucial laws such as the Air Pollution Control Ordinance in Hong Kong and the Environmental Protection Law of the People's Republic of China. Our meticulous attention to detail has resulted in a flawless compliance record, with no violations.

As part of our ongoing efforts to minimize our environmental impacts, all of our production facilities have enthusiastically adopted the ISO 14001 standard, showcasing our dedication and expertise in environmental management. This global certification is more than just a compliance requirement; it represents our proactive strategy for environmental stewardship, which includes regular environmental assessments and setting ambitious goals to reduce our environmental impact.

Our commitment to environmental standards extends to critical areas such as wastewater treatment and waste management. Routine testing for legionella in cooling water towers and strict adherence to water and waste regulations are integral to our operational procedures. These actions go beyond mere regulatory compliance; they are about embedding responsible environmental stewardship into the core of our corporate culture and activities.

Empowered Leadership and Collaborative EMS Oversight

The consistent dedication of our Board to the Environmental Management System demonstrates a yearly renewed promise to its successful execution and ongoing enhancement. Our EMS committee gathers twice a year, concentrating on the newest environmental laws, regulations, and compliance matters. The EMS meetings, which bring together representatives from different departments, highlight our unified strategy to managing environmental issues. All departments collaborate closely, guaranteeing responsibility and coherence in our environmental decisions.

Elements related to the EMS are part of the awareness training for our Nissin Integrated Management System (IMS). This training, which is required for all new employees, covers the Company's EMS policy, goals, and optimal practices. The quiz that follows, along with the follow-up on any cases that do not meet the standards, emphasizes our dedication to a thorough comprehension and compliance with EMS guidelines.

Decision-Making and Programme Implementation in EMS

Inside the EMS, the authority for environmental management decisions lies with the Chief Production Officer, who serves as the Management Representative for the EMS. Decisions concerning the EMS are made through a cooperative effort. Annually, each department suggests goals and strategies for implementation, which are discussed during the 2nd EMS Committee Meeting. Following this, the Management Representatives make the final call on the goals and the execution of associated programmes. Every committee member is accountable for attaining these objectives and overseeing the results.

環境及天然資源

環境管理系統

我們圍繞ISO 14001認證環境管理系統建立全面的環境治理架構。我們依據健全的政策指導可能對環境產生影響的運營決策，確保每項行動均符合我們對環境管理的承諾。環境管理系統乃我們許多環保舉措的基石。

始終遵守法律

過去一年，日清食品堅守環保合規承諾，嚴格遵守香港《空氣污染管制條例》及《中華人民共和國環境保護法》等主要法律。我們精益求精的態度確保締造無懈可擊的合規記錄，概無任何違規。

我們持續努力將環境影響降至最低，所有生產設施均積極採用ISO 14001標準，展現我們在環境管理方面的專注及專長。這項全球認證不僅是一項合規要求；其代表我們積極主動的環境管理策略，其中包括定期進行環境評估及制定遠大目標以減少環境影響。

我們對環境標準的承諾延伸至廢水處理及廢物管理等關鍵領域。定期對冷卻水塔進行退伍軍人菌檢測以及嚴格遵守水和廢物規例乃我們運營程序中不可或缺的組成部分。該等行動不僅是監管合規；更是為將負責任的環境管理融入至企業文化及活動的核心。

增強領導力及協作性環境管理系統監督

董事會對環境管理系統的不懈努力展現其每年對成功執行及持續改進的重新承諾。我們的環境管理系統委員會每年召開兩次會議，重點討論最新環境法律、法規及合規事宜。環境管理體系會議匯集不同部門的代表，強調我們管理環境議題的統一策略。所有部門密切合作，確保我們環境決策的責任及一致性。

與環境管理系統相關的元素為日清綜合管理系統意識培訓的一部分。全體新員工均須參加此項培訓，內容涵蓋本公司的環境管理系統政策、目標及最佳實踐。隨後的測驗以及對任何不符合標準案例的跟進，凸顯我們對全面理解和遵守環境管理系統指引的決心。

環境管理系統決策及方案實施

在環境管理系統內，環境管理決策權在於首席生產官，其擔任環境管理系統的管理代表。有關環境管理系統的決策乃通過協作制定。每年，各部門均會提出實施目標及策略，並在第二屆環境管理系統委員會會議上進行討論。其後，管理代表就目標及相關方案實施作出最終決定。各委員會成員則負責實現該等目標及監督結果。

Environmental Emergency Preparedness and Response

Ensuring Compliance and Emergency Preparedness

At Nissin Foods, we have put in place strong guidelines for Environmental Emergency Preparedness and Response guidelines. These guidelines are created to empower our employees to react efficiently to any incidents that could occur due to our operations. The EMS Committee is central to this system, organizing drills and compiling detailed summary reports for the management to examine. Our specialized emergency response teams are ready to execute the necessary protocols swiftly to deal with and reduce various potential emergencies, such as palm oil spills and chemical explosions. Afterward, a complete analysis is carried out to determine the underlying causes and to establish preventative actions. Additionally, comprehensive accident reports are presented to the management for their review and necessary actions.

Proactive Measures in Raw Material Handling

Understanding the vital role of palm oil as a major ingredient in our products, we have developed and implemented comprehensive procedures to avoid any spillages. These procedures are meticulously planned and executed, featuring explicit directions for the safe transfer of palm oil from the vendor's tanker trucks into our storage tanks at the food production facilities.

Enhanced Inspection and Emergency Drills

This year, we strengthened our dedication to environmental protection and occupational safety by conducting routine checks of our EMS. These EMS inspections are crucial for confirming that our day-to-day activities correspond with our environmental objectives and guidelines. Complementing these inspections, our 2024 emergency preparedness plan included ten emergency drills covering various scenarios such as evacuations and chemical spillages. Arranging drills are essential for ensuring the safety and preparedness of our employees.

環境應急準備和回應

確保合規及應急準備

在日清食品，我們制定嚴格的環境應急準備和回應指引，旨在令員工有效應對因營運而發生的任何事件。環境管理系統委員會為該系統的核心，負責組織演習並準備詳盡總結報告供管理層審查。我們專設的緊急應變組可迅速執行必要協議，以應對及減輕眾多潛在緊急情況，例如棕櫚油泄漏及化學物品爆炸。其後，進行全面分析以確定根本原因及制定預防措施。此外，亦向管理層遞交全面的事務報告，供其審閱及採取必要行動。

積極處理原材料

我們深明棕櫚油作為我們產品主要成分的重要作用，故已制定並實施全面程序以避免任何洩漏。該等程序均為精心設計及實施，包括將棕櫚油由供應商之油罐車轉移至我們食品生產設施之儲油罐之明確指引。

加強檢查和應急演習

本年度，我們透過對環境管理系統進行定期檢查，加強對環境保護及職業安全的投入。該等環境管理系統檢查對於確認我們的日常活動符合環境目標及指引至關重要。除該等檢查外，我們2024年應急準備計劃包括十次應急演習，涵蓋疏散和化學品洩漏等各種情境。對於確保僱員安全及作好準備而言，演習安排至關重要。

PACKAGING AND WASTE

Use Less, Use Better

In response to the growing regulatory and public concerns about single-use packaging waste, we have doubled our efforts to further reduce packaging waste and enhance the sustainability of our packaging solutions. Our approach involves innovative measures to curtail waste and optimise the environmental aspects of our packaging, guided by our “Three-Pillar Containers/Packaging Design Guiding Principles”, which form the cornerstone of our packaging strategy.

包裝與浪費

用少些、更好些

為回應監管和公眾對一次性包裝廢物日益關注，我們加倍努力，進一步減少包裝廢物，提高包裝解決方案的可持續性。在我們的「容器／包裝設計指導原則的三項主軸」指導下，我們採取創新措施，減少浪費，優化包裝環保性，作為我們包裝戰略的基石。

- We prioritise the avoidance of materials that may adversely affect human health or the environment. We advocate for the use of materials that have a lower environmental impact, such as recycled paper.

- (a)根據生命週期評估設計容器及包裝，考慮從原材料到棄置過程對環境的影響；(b)不斷尋找創新方式改善包裝，達到「少用」及「好用」材料之目標。

Redesigning for Waste Reduction

Our Granola Production Department (GPD) undertook a major redesign of the syrup room. The goal was to change the mode of syrup mixing to reduce food waste.

重新設計，減少浪費

我們的穀物麥片生產部對糖漿室進行了一次重大的重新設計，旨在改變糖漿混合模式，減少食物浪費。

Enhancing Packaging Efficiency

Our Demae Ramen Production Department (DRPD) has taken steps to reduce stretch film usage. By installing automatic stretch film wrapping machines, we saved around 27% of stretch film per production pack. This initiative is a step towards not only reducing material usage but also minimising waste.

提高包裝效率

我們的出前拉麵生產部採取措施減少使用拉伸膜。通過安裝自動拉伸膜包裝機，我們每包產品已節省約27%拉伸膜。這一舉措不僅減少了材料用量，亦最大限度地減少浪費。

OUR PLANET 我們的地球

Since 2009, Nissin Foods has undertaken systematic actions to transform its Cup Noodles packaging with an aim to reduce environmental impact. In 2009, the company replaced Styrofoam containers with ECO CUP technology in Hong Kong – a strategy extended to Mainland China in 2010 – which yielded an 87.8% reduction in plastic usage and a 24% decrease in CO₂ emissions per product. In 2021, a redesigned ECO CUP was introduced to optimise space utilisation while maintaining product quality, further reducing plastic consumption by 12.8% and CO₂ emissions by 6.8% compared to its predecessor. By 2022, we eliminated petroleum-based plastics from Regular Size Cup Noodles lids (33.8% plastic reduction), extending this to Big Size Cup Noodles in 2023 (34.3% plastic reduction). In 2024, we started to integrate biomass materials into the production process for one Cup Noodles product, which has further reduced our reliance on petroleum-derived plastics.

我們在 ECO杯包裝中採用生物質材料

自 2009 年以來，日清食品已採取系統行動改造其合味道包裝，旨在減少對環境的影響。2009 年，該公司在香港採用 ECO 杯技術取代了泡沫塑膠容器，這項策略於 2010 年擴展至中國內地，結果使塑膠使用量減少了 87.8%，每件產品的二氧化碳排放量減少了 24%。2021 年，重新設計的 ECO 杯上市，在維持產品品質的同時優化空間利用率，與前代產品相比進一步減少塑膠消耗 12.8%、二氧化碳排放量 6.8%。到 2022 年，我們移除常規尺寸合味道杯蓋中的石油基塑膠（減少 33.8% 的塑膠），並在 2023 年將這一目標擴大到合味道大杯麵（減少 34.3% 的塑膠）。2024 年，我們開始將生物質材料融入一款合味道產品的生產過程中，進一步減少了對石油衍生塑膠的依賴。

Journey to Green Packaging

Phase 1: From Plastic Chips to ECO CUP (2009/2010)

The journey towards green packaging at Nissin Foods began with a significant shift in 2009/2010 in Hong Kong and Mainland China, from petroleum-derived plastic to more environmentally friendly containers, known as the ECO Cup. The ECO Cup, primarily made of paper, emerged as a sustainable alternative to Styrofoam, embodying our ethos “for Ecology, for Customers, for Originality”. This transition not only addressed the issue of CO₂ emissions during production but also tackled the challenge of plastic decomposition in landfills. In Mainland China, this switch led to a 24% reduction in CO₂ emissions and an 87.8% decrease in plastic usage per serving of Cup Noodles.

The design of the ECO Cup also played a crucial role in preserving ingredient quality and maintaining the quality of the noodles, demonstrating that environmental considerations need not compromise product excellence.

綠色包裝之旅

第一階段：自塑料片至 ECO 杯 (2009/2010)

日清食品的綠色包裝之旅始於 2009/2010 年在香港及中國內地的一次重大轉變，即從石油塑膠容器轉變為更環保的容器 – ECO 杯。ECO 杯主要由紙製成，是發泡膠的可持續替代品，體現日清「為了地球、為了顧客、為了原創」的環保理念。這一轉變不僅解決了生產過程中的二氧化碳排放問題，更是化解了塑膠在垃圾堆填區難以分解這一挑戰。這一轉變使中國內地每份合味道的二氧化碳排放量以及塑膠用量分別減少 24% 及 87.8%。

ECO 杯的設計還在保持原料品質及維持麵條品質方面發揮重要作用，切實證明環境因素不一定會影響產品卓越性。

Phase 2: ECO CUP Renewal (2021)

In 2021, to celebrate the 50th anniversary of Cup Noodles, we introduced an upgraded Cup Noodles product in a redesigned ECO Cup. The revamped container not only improved space utilisation and noodle quality but also further reduced CO₂ emissions and plastic use by 6.8% and 12.8% respectively, compared to its predecessor.

The cumulative impact of these initiatives resulted in a 29.16% reduction in CO₂ emissions from our cup containers. Moreover, the downsizing of the container also led to a significant reduction in paper usage and CO₂ emissions related to cardboard and transportation, improving our overall environmental impact.

Phase 3: Less Plastic in ECO CUP Lid – Regular Size Cup Noodles (2022)

In fulfilment of our ongoing commitment to decreasing the use of plastic, we upgraded the ECO Cup lid in 2022 by removing a plastic layer from its upper surface. We continuously made our effort to reduce the plastic usage this year. As the result, this innovation reduced our plastic use in cup lid by 33.8%, marking another milestone in our sustainable packaging journey.

Phase 4: Further CUP Lid plastic reduction – Big Size Cup Noodles (2023)

While the Regular Size Cup Noodles were the first to come with a reduced plastic cup lid in 2022, we expanded our redesign to the Big Size Cup Noodle in 2023, applying the latest advancements in lid design to further reduce plastic usage. The redesign of the Big Size Cup Noodle yielded a 34.3% reduction in plastic use in cup lid. Moving forward, we will continue our efforts to refine and improve our packaging solutions, striving to balance product quality with environmental responsibility.

Phase 5: Biomass PE – Seafood Flavour Cup Noodles (2024)

This year, we have taken our sustainability efforts to the next level by introducing biomass polyethylene (PE) in the production of packaging material for our seafood flavour Cup Noodles. This innovative material, which incorporates plant-derived renewable sugarcane bagasse, has resulted in a reduction of 3.78 tons of greenhouse gas emissions in 2024. We aim to further expand the use of biomass-based packaging materials in the future. By using this eco-friendly material, Nissin Foods not only reduces greenhouse gas emissions from packaging production but also transforms waste material (sugarcane bagasse) into a valuable resource.

Currently, this sustainable packaging is used exclusively for our seafood flavour Cup Noodles. However, given its significant environmental benefits, we are exploring the possibility of expanding its use to other varieties and flavours of Cup Noodles in the future.

第二階段：ECO杯革新(2021)

2021年，為慶祝合味道誕生50週年，我們以重新設計的ECO杯推出生級版合味道產品。改良後的容器不僅提高空間利用率及麵條品質，相較上代產品，亦進一步減少二氧化碳排放量及塑膠用量分別為6.8%及12.8%。

藉助上述措施的累積效應，我們杯型容器的二氧化碳排放量減少了29.16%。此外，容器小型化亦大大減少紙張用量以及與紙板和運輸有關的二氧化碳排放量，從而改善我們對環境的整體影響。

第三階段：ECO杯杯蓋減少塑膠物料－常規尺寸合味道(2022)

為履行我們對減少塑膠使用的承諾，我們於2022年對ECO杯杯蓋進行升級，移除ECO杯杯蓋頂層的塑料層。我們於本年度持續努力將塑膠使用量減少。因此，這一創新將杯蓋塑膠使用量減少33.8%，是我們可持續包裝歷程中又一里程碑。

第四階段：進一步減少杯蓋中的塑膠物料－合味道大杯麵(2023)

隨著我們先於2022年對常規尺寸合味道採用減少塑膠物料的杯蓋，其後於2023年將重新設計的範圍擴大至合味道大杯麵，採用最新的杯蓋設計，進一步減少塑膠用量。合味道大杯麵的重新設計減少34.3%杯蓋塑膠使用量。未來，我們將繼續努力完善及改進包裝解決方案，致力在產品品質和環保責任之間達致平衡。

第五階段：生物質聚乙烯－海鮮風味合味道(2024)

本年度，我們於海鮮味合味道包裝材料的生產中引入生物質聚乙烯，將我們的可持續發展工作提升至新水平。這種創新材料採用植物衍生的可再生甘蔗渣，於2024年減少3.78噸溫室氣體排放。我們旨在未來進一步擴大生物質包裝材料的使用。透過使用這種環保材料，日清食品不僅減少包裝生產過程中的溫室氣體排放，亦將廢棄材料(甘蔗渣)轉化為寶貴資源。

目前，這種可持續包裝專門用於我們的海鮮味合味道。然而，考慮到其顯著環境效益，我們正探索未來將其用途擴展至其他品種及口味的合味道的可能性。

Waste Management

Our Waste Handling and Reduction Strategies

In our commitment to environmental stewardship, we have implemented a rigorous waste management system. This ensures that all hazardous and non-hazardous waste produced through our activities is collected and disposed of correctly by certified contractors. The main types of waste from our manufacturing processes are solid waste and wastewater. To guide our staff on waste classification and the proper disposal of hazardous materials, we have developed Good Practice Guidelines.

In Hong Kong, where food waste poses a major environmental challenge, we have actively worked to decrease waste production. Our system for sharing raw material inventories promotes efficient resource use and cuts down on waste by redistributing materials among different operations as necessary. Moreover, we are involved in the Hong Kong government's "Food Waste/Sewage Sludge Anaerobic Co-Digestion Trial Scheme," which provides an environmentally friendly way to reduce food waste by turning it into compost and biogas, thereby lowering greenhouse gas emissions from landfills.

In addition to our waste reduction efforts, we also recycle noodle waste from our noodle production lines into animal feed. All our electronic waste is gathered by collectors authorized by the Environmental Protection Department (EPD) for recycling purposes.

In our ongoing efforts to minimise waste, we took decisive action in 2024 by modifying our production line at our plants in Hong Kong. In particular, we modified our production line and packing methods. From May to December, we saw a consistent 20% decrease in food waste. Going forward, we are committed to further minimise the waste generation across our operations.

Compliance with Environmental Laws and Regulations

Consistent with our dedication to environmental duty, we strictly follow all pertinent laws and regulations in Mainland China and Hong Kong concerning waste management. This includes adhering to the Waste Disposal Ordinance and the Chemicals Control Ordinance in Hong Kong, as well as the Environmental Protection Law of the People's Republic of China and the Law on the Prevention and Control of Environmental Pollution Caused by Solid Waste in Mainland China.

Throughout the previous year, our business activities have continued to meet all legal and regulatory standards, with no recorded violations. At our operational sites, regular testing of wastewater is carried out. The levels of Biological Oxygen Demand (BOD) and Oil & Grease (O&G) in the wastewater have continually met the stipulated license criteria for the year 2024.

Management of Paper Consumption

In our ongoing efforts to manage and reduce environmental impacts, we fully recognize the significance of cutting down on our paper use. We consistently assess our paper usage and take steps to make it more efficient.

Innovative Hazardous Waste Management

To further improve the sustainability performance of Nissin Fujian, the plant installed a new specialised equipment tailored for the factory's laboratory. The equipment is designed to handle and clean test containers efficiently, thereby reducing the generation of hazardous waste. Compared to 2023, Nissin Fujian has managed to achieve a 50% reduction in experimental fluid waste in 2024.

廢物管理

廢物處理及減少策略

為履行環境管理承諾，我們已實施嚴格的廢物管理系統，確保我們的活動所產生的所有有害及無害廢物均由經認證承包商妥善回收及處理。我們生產過程中產生的主要廢棄物類型為固體廢棄物及廢水。為指導我們的員工進行垃圾分類及妥善處理有害物質，我們已制定良好操作指引。

在香港，廚餘廢物對環境構成重大挑戰，我們積極致力減少廢物產生。我們的原材料庫存共享系統可根據需要在不同業務之間重新分配材料，從而推動有效利用資源並減少浪費。此外，我們亦參與香港政府發起的「廚餘、污泥共厭氧消化試驗計劃」，該計劃通過將廚餘轉化為堆肥和沼氣，減少堆填場的溫室氣體排放，從而為減少廚餘提供環保方式。

除減少廢棄物外，我們亦回收麵條生產線產生的麵條廢物，轉化為動物飼料。我們的所有電子廢物均由環境保護署授權的收集商回收利用。

為持續減少浪費，我們於2024年採取果斷行動，改造我們香港廠房的生產線。尤其是，我們改進生產線及包裝方法。自5月起至12月，我們的廚餘廢物持續減少20%。展望未來，我們致力進一步減少營運過程中的廢物產生。

遵守環保法律及法規

我們始終致力履行環保責任，嚴格遵守中國內地及香港有關廢物管理的所有相關法律法規，包括遵守香港《廢物處置條例》及《化學品管制條例》，以及中國內地的《中華人民共和國環境保護法》及《固體廢物污染環境防治法》。

過去一年，我們的業務活動始終符合所有法律及監管標準，並無任何違規記錄。於我們的營運場所，定期進行廢水檢測。廢水中的生化需氧量(BOD)及油脂(O&G)含量一直符合2024年規定的許可標準。

紙張消耗管理

我們在不斷努力管理及減少環境影響的過程中，深知減少紙張使用的重要性。我們始終評估紙張用量，並採取措施提升其使用效率。

創新有害廢物管理

為進一步提高日清福建的可持續發展表現，工廠安裝專為工廠實驗室定制的新型專用設備。該設備旨在高效處理及清潔測試容器，從而減少危險廢物的產生。相較2023年，日清福建於2024年已成功實現實驗流體廢物減少50%。

Water Management 水管理

The Essential Role of Water in Our Operations and Ecosystem

At Nissin Foods, we understand the essential function water serves, not just in manufacturing our products but also in supporting the ecosystems we belong to. We have always made implementing strong water management practices a primary focus. Making sure we use water efficiently in our processes and reducing our effect on the environment's water systems are key parts of this effort. Our strategy is guided by the knowledge that careful water management is crucial for sustainable business operations and environmental care, especially within the food sector.

Water Consumption and Efficiency Efforts

In the past year, our Sites of Operation recorded a total water consumption of 468,827 cubic meters, corresponding to a water intensity of 0.123 cubic meters per HK\$1,000 of revenue. We are actively working towards reducing our absolute water consumption and water intensity.

On our path to achieving efficient water usage, we have installed steam circulation systems designed to enhance the efficiency of steam utilization. Furthermore, the hot water produced by our steaming processes is now being redirected for use in the employee shower rooms. We have also fitted automatic taps in our sanitary facilities to regulate water usage without compromising on cleanliness.

Adherence to Water Management Regulations

In keeping with our pledge to manage water responsibly, we adhere strictly to all applicable environmental laws in both Mainland China and Hong Kong. Our business practices are in line with the Water Pollution Control Ordinance of Hong Kong and the Law on the Prevention and Control of Water Pollution in Mainland China.

CLIMATE CHANGE MANAGEMENT

We completely understand the evolving global climate and how climate-related risks and opportunities could affect our companies. This year, following the introduction of the first IFRS S2 standard, we improved our disclosure of climate-related information by consistently revealing it in accordance with the Part D of ESG Reporting Code released by HKEX, Implementation Guidance for Climate Disclosures under HKEX ESG reporting framework and the IFRS S2 standard. Aligning with ESG Reporting Code, four-pillared framework-Governance, Strategy, Risk Management and Metrics and Targets-we assist our investors and other interested parties in gaining a stronger and more comprehensive insight into our climate actions and the possible effects of climate change on our operations.

Governance

At Nissin Foods, the Board holds direct responsibility for overseeing climate-related risks and opportunities. Our Board's focused oversight on climate issues reflects our approach to integrating climate considerations seamlessly into our Company-level decision-making processes from the very top.

Senior Management's Role in Climate Strategy Implementation

The Board directs our Senior Management, which is key in handling risks and opportunities associated with climate change. The Management Committee, which includes Executive Directors, top-level company managers, and leaders of business divisions, is led by the Chief Executive Officer and participates actively in these discussions. This committee is tasked with assessing Nissin Foods' progress in ESG areas, paying particular attention to climate matters. Annually, the Management Committee updates the Board on significant sustainability and climate-related topics.

水管理

水在我們的運營和生態系統中發揮重要作用

在日清食品，我們深明水的基本功能，不僅在生產產品方面，而且在支持我們所處生態系統方面。我們始終將實施強有力的水資源管理當作首要任務之一。確保我們於生產過程中有效用水並減少對環境水系統的影響是這項努力的關鍵部分。我們深知謹慎的水管理對於可持續業務營運及環境保護至關重要(尤其是食品業)，而我們的策略以此為指引。

耗水量及高效用水

過去一年，我們生產廠房的總耗水量為468,827立方米，耗水密度為每千港元收入0.123立方米。我們正積極致力於減少絕對耗水量和耗水密度。

在實現高效用水的過程中，我們安裝了蒸汽循環系統，旨在提高蒸汽利用效率。此外，我們蒸氣過程產生的熱水現被重新用於員工淋浴室。我們亦於衛生設施安裝自動水龍頭，以調節用水量，而不影響清潔度。

遵守水管理條例

為履行我們負責任管理水資源的承諾，我們嚴格遵守中國內地及香港的所有適用環境法。我們的業務活動符合香港《水污染管制條例》及中國內地的《水污染防治法》。

氣候變化管理

我們充分了解全球氣候變化以及與氣候相關的風險及機遇如何影響本公司。本年度，隨著首次推出國際財務報告可持續披露準則第2號標準，我們透過持續根據香港交易所發佈《環境、社會及管治報告守則》D部分、香港交易所環境、社會及管治報告框架下的氣候披露實施指引及國際財務報告可持續披露準則第2號標準披露氣候相關資料，完善相關披露。根據環境、社會及管治報告守則，四大支柱架構(治理、戰略、風險管理以及指標和目標)，我們協助投資者及其他關聯方更深入、更全面了解我們的氣候行動以及氣候變化對我們營運的潛在影響。

治理

在日清食品，董事會直接負責監督與氣候相關的風險及機遇。董事會對氣候議題的重點監督反映了我們從最高層開始便將氣候因素無縫納入本公司決策過程。

高級管理層在氣候戰略實施中的作用

董事會指導我們的高級管理層，這對於處理與氣候變化相關的風險及機遇至關重要。管理委員會由執行董事、公司高級主管及業務部門負責人組成，由首席執行官擔任主席，且積極參與該等討論。該委員會負責評估日清食品於環境、社會及管治方面的進展，尤其關注氣候議題。管理委員會每年向董事會報告重大可持續發展及氣候相關議題。

Execution of Climate Risk Management Processes

To effectively incorporate climate risk factors into our enterprise risk assessments and analysis processes, the responsibility for executing ESG and climate-related risk management processes rests with the heads and managers of our different business units, who are responsible for implementing mitigation plans that address the relevant risks.

Continuous Learning and Adaptation to Climate-Related Developments

To remain at the forefront of climate governance, Nissin Foods' senior management and the Board are consistently informed about the latest updates in ESG and climate-related matters. Relevant training sessions have been arranged for the Board, including trainings on emerging climate-related disclosure requirements. Such educational initiatives ensure that our leadership remains equipped with the knowledge and skills necessary to navigate the evolving landscape of climate governance.

Strategy

In the year 2024, in line with the Hong Kong Exchanges and Clearing Limited ("HKEX") guidelines on climate-related disclosures, we chose and applied two specific climate scenarios: Turquoise, indicating a sharp decline in emissions and a global average temperature rise significantly less than 1.5°C to 2°C by the year 2100, and Brown, indicating an increasing emissions trend and a global average temperature increase exceeding 3°C by 2100. We used these scenarios to evaluate the effects of climate change on Nissin Foods' business activities, referencing publicly accessible pathways. Additionally, we conducted an extensive analysis of city-level scenarios for our primary asset locations in Hong Kong, Mainland China, and Vietnam.

Climate-Related Risks

Climate risks consist of physical and transition risks. Physical risks refer to the immediate impacts of climate change, both acute and chronic. Acute physical risks encompass more sudden events, such as extreme weather events, wildfires, or flooding, resulting in property damage and operational interruptions. Chronic physical risks manifest over the long term, such as rising sea levels, changing precipitation patterns, and gradual temperature increases, leading to shifts in ecosystems and resource availability.

Transition risks, on the other hand, arise from transitioning to a low-carbon economy and adapting to climate change. These risks include policy and legal changes, market shifts, technological advancements, and reputational factors. Organisations may face stranded assets, unanticipated costs, regulatory challenges, or market volatility in the trend towards decarbonisation and sustainability.

執行氣候風險管理流程

為了有效地將氣候風險因素納入我們的企業風險評估及分析流程，執行環境、社會及管治和氣候相關風險管理流程的責任便落到各業務部門負責人及經理，彼等負責實施應對相關風險的緩解計劃。

不斷學習，適應氣候相關發展

為了於氣候治理方面維持領先地位，日清食品高級管理層及董事會始終了解環境、社會及管治和氣候相關事宜的最新動態。亦為董事會安排相關培訓課程，包括關於新發佈之氣候相關披露要求的培訓。此類教育活動確保了領導層隨時掌握必要的知識和技能，以駕馭不斷變化的氣候治理環境。

戰略

2024年，根據香港交易及結算所有限公司（「香港交易所」）氣候信息披露的指引，我們選擇並應用兩種具體的氣候情景：青綠色，表示排放量急劇下跌，於2100年，全球平均氣溫上升幅度明顯低於1.5攝氏度至2攝氏度；及棕色，表示排放量呈上升趨勢，於2100年全球平均氣溫將上升超過3攝氏度。經參考公開途徑，我們利用該等情境以評估氣候變化對日清食品業務活動的影響。此外，我們亦對香港、中國內地及越南的主要資產所在地的城市層級情境進行廣泛的分析。

氣候相關風險

氣候風險包括實體風險及轉型風險。實體風險指氣候變化的直接影響，包括急性及慢性影響。急性實體風險包括更多突發事件，例如極端天氣事件、野火或洪水，導致財產損失及營運中斷。慢性實體風險乃長期顯現，例如海平面上升、降水類型變化及氣溫逐漸升高，導致生態系統及資源可用性發生變化。

另一方面，轉型風險來自向低碳經濟轉型及適應氣候變化。該等風險包括政策及法律變動、市場變化、技術進步及聲譽因素。在脫碳及可持續發展趨勢中，企業可能面臨擱淺資產、未預期成本、監管挑戰或市場波動。

OUR PLANET 我們的地球

The identified climate-related risks that are considered potentially material to our business and value chain are summarised as follows, referring to Implementation Guidance for Climate Disclosures under HKEX ESG reporting framework.

參考香港交易所環境、社會及管治框架下氣候信息披露的實施指引，被視為可能對我們的業務及價值鏈至關重要的已識別氣候相關風險概述如下。

Risk Management

Managing risks associated with climate change is a crucial part of our sustainability plan. Acknowledging the increasing significance of climate-related threats, we are actively working to improve how we incorporate these factors into the Group's overall risk governance and management structure.

To better understand and handle climate-related risks, we hired an independent external consultant this year. Their role was to help us pinpoint and evaluate potential climate risks and to gain a thorough comprehension of them. This insight will enable us to adjust our risk management tactics appropriately. The process included a detailed examination of how climate-related effects could impact our operations, supply chain, and market conditions.

Metrics and Targets

We understand the essential need to set up and stick to certain climate-related measurements and goals as we move towards adopting more sustainable environmental practices. While we are in the process of finalizing these measurements and goals, our current actions are directed at the key areas that will most significantly lessen our environmental impact. Our goal is to help create a more sustainable packaging system. This includes a continuous effort to decrease the use of plastics derived from petroleum in our packaging. Additionally, we are stepping up our work on lowering VOC emissions and plan to broaden the scope of our operations that are targeted for emission reductions.

Moreover, we are continually looking for ways to improve energy efficiency throughout our operations. Moving forward, we will keep pushing ahead with our energy initiatives, with a concentration on improving and making the most of our energy efficiency and usage.

風險管理

管理氣候變化相關風險是我們可持續發展策略不可或缺的一部分。我們意識到氣候相關威脅日益重要，當前正致力將該等因素與本集團的整體風險管治及管理框架整合。

為加強我們對氣候相關風險的了解及處理，我們於本年度委聘獨立外部顧問。該顧問協助我們識別及評估潛在氣候風險，並全面了解該等風險，令我們可適當地調整風險管理策略。這個過程需要詳細分析氣候相關影響如何影響我們的營運、供應鏈及市場情況。

指標及目標

我們明白到，隨著我們採取更可持續的環境慣例，制定並遵守特定氣候相關措施及目標至關重要。我們落實該等措施及目標時，我們目前的行動針對能夠最顯著減少我們環境影響的關鍵領域。我們旨在貢獻於發展更可持續的包裝系統。這包括不斷努力減少我們包裝中石油衍生塑膠的使用。此外，我們正推動減少VOC排放的工作，並計劃進一步擴大減排目標業務範圍。

此外，我們亦不斷尋求提高整個營運能源效率的方法。未來，我們將繼續推動能源倡議，專注提升及優化能源效率及使用。

Food Safety Management

Rigorous Inspections of raw materials and final products

At Nissin Foods, ensuring the quality and safety our raw materials is paramount. We implement a rigorous verification program that involves random testing of raw materials to ensure they are free from harmful substances such as pesticides, heavy metals, and ethylene oxide. In response to news alerts and outbreak notifications, we also conduct targeted checks to safeguard against potential contaminants. Furthermore, our commitment to product safety extends to the final stages of production. We perform comprehensive tests on finished goods to detect genetically modified organisms, preservatives, and allergens, thereby ensuring the highest level of safety and quality for our consumers.

Rigorous Pre-Delivery Inspections

Prior to being delivered to our customers, each product must pass through multiple rigorous checks before shipping. These pre-shipment inspections involve a range of quality control measures and examinations, which include microbiological testing, weight verification, visual inspection, and sensory reviews, all performed by qualified experts.

Certification and Continual Improvement

Our commitment to maintaining food safety and quality is highlighted by the certifications our food manufacturing facilities have obtained. Every one of our food production sites is certified to ISO 22000 (International Organization for Standardization) and FSSC 22000 (Food Safety System Certification 22000) standards, which are widely accepted international indicators of robust food safety management systems within organizations. Additionally, our food production sites have adopted the HACCP (Hazard Analysis and Critical Control Points) management system. This system adds value by methodically pinpointing and managing food safety risks, thereby guaranteeing the manufacture of safe and top-quality food products.

Accreditation and Certification Achievements

The Institute's dedication to superior quality assurance is demonstrated through its accomplishments in gaining accreditations and certifications. In November 2010, it was awarded accreditation by the China National Accreditation Service for Conformity Assessment (CNAS). Then, in May 2020, it reached another important achievement by obtaining the China Inspection Body and Laboratory Mandatory Approval (CMA). The CMA certification greatly boosts our company's reputation in quality assurance by undergoing a stringent evaluation process. This process includes the assessment of our testing capabilities and the reliability of our inspection and testing laboratories by the provincial and higher-level Administration for Market Regulation, following the Evaluation Criteria for Certification of Inspection and Testing Laboratories (RB/T 214-2017), thus reinforcing stakeholders' confidence in us.

Continuous Improvement and Global Standards Compliance

Looking to the future, our quality assurance processes are constantly being refined, incorporating a commitment to ongoing betterment and harmony with international standards. The quest for excellence is a continuous venture for us, and we are steadfast in our resolve to introduce ground-breaking methods and technologies to ensure the highest degree of food safety and quality.

Management of Advertising and Product Labelling

We acknowledge the significant influence that advertising and product labelling have on consumer opinion and confidence. Bearing this in mind, we have established thorough instructions for our advertising and promotional efforts to guarantee clarity and deliver accurate information to our customers, maintaining the highest standards of ethical advertising and clear product labelling.

Ethical Advertising Practices

Our core belief is to stay honest and refrain from exaggerating the features of our products. We hold that advertising comes with a moral duty, and we are convinced that this duty necessitates all promotional material to be factual and not deceptive, which is how we establish and preserve trust with our clientele. In line with this, Nissin Foods has continually championed the value of clarity in all its advertising activities. Our ads are designed to accurately depict our products, resonate with our brand's ethos, and remain coherent across different media channels. This strategy protects against false representation, making certain that our customers gain an accurate and truthful appreciation of our products' benefits.

Monitoring and Updating Product Labels

Within our organization, we have implemented robust procedures to monitor and regularly update the information on our product labels. This is crucial to ensure that the labels are always accurate, up-to-date, and compliant with the latest regulations. A key component of this process is our Inspection Procedures for Finished Products, which involve thorough checks of the quantity, packaging, labelling, and overall quality of the products. These inspections guarantee that every aspect of our product presentation is meticulously reviewed for accuracy and regulatory compliance.

認可及認證成果

食安研對卓越質量保證的承諾體現在其取得的認可及認證成就中。於2010年11月，其獲得中國合格評定國家認可委員會(CNAS)認可。其後，於2020年5月，其取得另一項重要成就，獲得中國檢測機構和實驗室強制認證(CMA)認可。透過嚴格的評估過程，CMA認證顯著提高本公司質量保證的聲譽。該過程包括省級及以上市場監督管理局按檢驗檢測實驗室認證標準(RB/T214-2017)對我們的檢測能力及檢驗檢測實驗室的可靠性進行評估，並因而提升持份者對我們的信心。

持續改善及全球標準合規

展望未來，我們的質量保證體系不斷完善，承諾持續改進並與國際標準保持一致。追求卓越是我們不斷追求的事業，我們堅定不移地決心引進突破性的方法及技術，以確保最高水平的食品安全及質量。

Health-oriented Beverages

The Green Juice, which is made in Japan, adds to our range of health-centric products. Each packet contains 100 grams of green vegetables like spinach, cabbage, kale, and baby cabbage mixed with an equal portion of tasty fruit. This special mix not only provides a full-bodied flavor but also delivers essential nutrients such as dietary fiber, potassium, folic acid, and polyphenols. It enhances the natural sweetness of the vegetables and fruits without adding sugar or artificial sweeteners, aligning with our promise to promote a light, healthy, and fat-free way of life.

In 2023, the launch of Green Juice offered a delightful twist to the traditional green juice perception, featuring “Rich White Peach” and “Refreshing Apple” flavors. This broke the common notion of green juice being bitter, with both variants quickly gaining popularity. Providing a convenient way to incorporate vegetable nutrients into a healthy lifestyle, Nissin Foods further expanded the Green Juice line in 2024 with a new “Lucious White Grape” flavor, offering a fragrant and delicate experience to cater to the discerning palates of health-conscious consumers.

RESPONSIBLE VALUE CHAIN

The production and delivery of our products rely on a supply chain that sources top-notch agricultural raw materials, ingredients, and packaging materials. We utilize an extensive strategy for managing a sustainable supply chain, which includes our strict standards for choosing suppliers, improved processes within the supply chain, and an increasing dedication to environmentally friendly purchasing methods. Our approaches in this area guarantee that each phase of our value chain, starting from acquiring raw materials to delivering the final product, follows the highest levels of environmental stewardship and ethical behaviour.

負責任的價值鏈

我們產品的生產及交付有賴於能夠提供一流農業原材料、配料及包裝材料的供應鏈。我們利用廣泛策略管理可持續供應鏈，包括嚴格供應商篩選標準、強化供應鏈流程，以及堅持環保採購方式。我們就此而採取的方針保證我們價值鏈從原材料採購到最終產品交付的每一環節均遵守最高規格的環境責任及道德行為標準。

SUPPLIER SELECTION AND MANAGEMENT

Our approach to supplier selection and management is grounded in a rigorous and multi-faceted framework, ensuring not only the quality and efficiency of our supply chain but also its alignment with our sustainability commitments. Central to our supply chain management framework are the Materials Procurement Policy, designed to guide our supplier selection process, and the Material Purchase Policy, introduced as a comprehensive protocol for material purchasing activities. In the past year, our global network encompassed a total of 890 suppliers.

供應商篩選及管理

我們的供應商篩選及管理方法以嚴格的多層面框架為基礎，不僅確保供應鏈的質量及效率，而且確保其符合我們的可持續發展承諾。我們供應鏈管理框架的核心乃物料採購守則及物料購買守則，物料採購守則旨在為我們的供應商篩選流程提供指引，而物料購買守則則是對物料採購活動進行全方位規範。去年，我們的全球網絡涵蓋合共890家供應商。

OUR PRODUCT 我們的產品

Selecting Suppliers for Quality and Sustainability

During the procurement phase, we require all our suppliers to meet the necessary safety and quality regulations for raw materials, packaging materials, and final products. Our series of evaluations ensures that everything that enters our production process adheres to our strict safety and quality benchmarks.

When choosing suppliers, we look at more than just the conventional measures of product quality, pricing, and delivery abilities. Over the years, we have been giving more importance to sustainability aspects, which include environmental conservation and social accountability. Suppliers must follow our internal environmental guidelines and performance targets, ensuring that our supply chain is not only effective but also ethical and environmentally sustainable.

Annual Performance Reviews and Logistics Management

Annually, we conduct a thorough evaluation of the performance of all our suppliers. This evaluation process uses a meticulous scoring method that considers various elements such as overall performance, product delivery, and adherence to regulations. Suppliers that satisfy our exacting standards remain on our list of approved vendors, whereas those that do not meet the mark receive helpful feedback to aid in their improvement. Concurrently, our specialized operations team works on enhancing logistics management to guarantee that products are delivered to our clients promptly and in excellent condition. We have also established performance metrics for logistics companies to motivate and track their punctual and accurate deliveries.

Our storage facilities are fitted with the essential infrastructure and temperature control to maintain the integrity and quality of our products. In addition, stringent security protocols are in place, including round-the-clock supervision, and alarm systems, all of which ensure the protection and safety of our production materials.

Enhanced Procedures for Key Suppliers

Choosing our main raw material suppliers demands a very careful process, which involves a comprehensive assessment of their financial trustworthiness, supply capabilities, quality standards, and environmental practices. This ensures that they can fulfil our requirements and also conform to our environmental and safety standards.

Our “Major Material Suppliers,” who are those raw material suppliers from whom we purchase more than a specific amount annually, are required to go through an annual credit review. This review is conducted by our Finance Department to confirm their financial solidity and dependability. Our Purchasing Department then examines these reviews and processes the necessary approvals, keeping a keen eye on any shifts in their credit standings.

基於質量及可持續發展標準選擇供應商

在採購階段，我們規定所有供應商遵守原材料、包裝材料及最終產品方面的必要安全及質量監管規定。我們一系列評估確保進入我們生產流程的所有材料均符合我們嚴格的安全及質量基準。

我們選擇供應商的標準並非局限於產品質量、價格及交付能力等傳統指標。多年來，我們越來越重視可持續發展因素，包括環保及社會責任。供應商必須遵守我們的內部環境指引及績效目標，確保我們的供應鏈不僅有效，而且符合道德及環境可持續發展。

年度表現審查及物流管理

我們每年均會對所有供應商進行全面的表現評估。評估過程採用詳細的評分方法，考慮整體表現、產品交付及合規性等多個因素。符合我們嚴格標準的供應商將被保留在我們獲批准供應商名單上，而不符合標準的供應商則會得到建設性的改進意見。同時，我們設有專門的運營團隊，致力於提升物流管理，保證及時、優質地向客戶交付產品。我們亦制定物流公司績效指標，以鼓勵及監督其及時、準確地交付產品。

我們的倉儲設施配有必要的基礎設施及溫度控制系統，以保持產品的完整性及質量。此外，我們實施嚴格的安全規範，包括全天候監督及警報系統，這些措施全部確保我們生產物料受到保障及安全。

完善主要供應商程序

選擇我們的主要原材料供應商需要採用極其嚴格的程序，包括對其財務信譽、供應能力、質量標準及環保常規進行全面評估。這確保彼等不僅能夠滿足我們的規定，而且還能符合我們的環境及安全標準。

我們「主要物料供應商」(年採購量超過特定限額的原材料供應商)必須接受年度信用審查。該審查由我們的財務部進行，以確認其財務穩定性及可靠性。我們的採購部其後檢查該等審查，並擬定必要的批復，同時密切關注其信用評級的任何變化。

OUR PRODUCT 我們的產品

ISO 45001 Compliance for Environmental and Occupational Health and Safety

As we strive for excellence in supply chain management, we follow a detailed set of protocols that correspond with ISO standards, particularly in the areas of Material Purchase and Supplier Selection. To advance environmental conservation and workplace health and safety, we have established an integrated management system that meets the ISO 45001 criteria. Our suppliers must meet our occupational health and safety standards, abide by the relevant laws in Hong Kong, and observe our Visitor Guidelines during their visits. Furthermore, suppliers are essential in recognizing and reporting any potential workplace dangers, which aids in the ongoing enhancement of our working conditions.

Optimising Delivery

We exercise additional care when handling delivery delays. For suppliers facing such delays, we conduct a detailed review of their main production processes to pinpoint and fix the underlying issues. Furthermore, we actively perform on-site assessments and provide recommendations for enhancements at the suppliers' facility, particularly focusing on those supplying essential raw materials. When suppliers repeatedly miss delivery targets, we take firm steps, including sending out warnings and lowering order volumes, to prevent future occurrences. Moreover, we calculate and convey the financial effects of any delays to the suppliers, prompting them to make essential changes.

Ensuring Accuracy in Order Quantities

It is crucial to guarantee the precision of order amounts. We consistently check to make sure that our suppliers of materials are efficiently operating their equipment and accurately communicating the amounts of finished and semi-finished products. This involves collecting data in real time, which allows us to make educated decisions and keep our supply chain running smoothly. Furthermore, we evaluate our suppliers' capacity to deal with any differences in quantities. We require our material suppliers to have solid systems and guidelines for solving these problems. When these standards are not fulfilled, we offer detailed advice and directions. If a supplier repeatedly fails to meet expectations, we might investigate using other suppliers to uphold the quality and effectiveness of our supply chain.

Commitment to Sustainable Procurement

Understanding the profound effect that our choices in procurement can have on the environment and our communities, we are stepping up our initiatives in sustainable procurement, making it a central pillar of our corporate responsibility. At Nissin Foods, we strongly endorse and promote the purchase of products and materials that are eco-friendly and produced in a responsible manner. We are convinced that embracing sustainable procurement will not only benefit the environment and society but also meet the changing expectations of our consumers and stakeholders. We are increasingly focusing on working with suppliers who implement sustainable practices in their business and provide products that are environmentally and socially responsible.

符合ISO 45001環境與職業健康安全標準

我們致力實踐卓越供應鏈管理，在此過程中，我們遵守一套符合ISO標準的詳盡程序，特別是在物料採購及供應商篩選方面。為加強環保及工作場所健康與安全，我們制定一套符合ISO 45001準則的綜合管理制度。供應商必須遵守我們的職業健康及安全標準，遵守相關香港法例，並且實地遵循我們的訪客指引。再者供應商在確認及報告任何潛在工作場所危害方面發揮至關重要的作用，助力我們持續改善工作狀況。

優化交付

我們額外關注交貨延誤問題。對於出現延遲的供應商，我們會對其主要生產流程進行詳盡審查，找出根本原因並糾正相關問題。再者，我們積極主動地進行現場評估，並為供應商工廠的改進提供建議，尤其是供應必要原材料的工廠。當供應商一再無法按期交貨，我們會採取果斷步驟，包括發出警告及減少訂單數量，以避免此類問題再次發生。此外，我們計算任何延誤所造成的財務影響，並將其告知供應商，促使其作出必要變動。

確保訂單數量的準確性

保證訂單數量的準確性至關重要。我們定期檢查確保物料供應商高效運行其設備，並準確報告成品及半成品數量。該過程涉及實時收集數據，以便做出明智決策，保持供應鏈順暢運行。再者，我們亦會評估供應商處理數量差異的能力。我們規定物料供應商針對此類問題制定完善的制度及指引。當無法滿足上述標準，我們會提供詳盡建議及方向。倘供應商多次未能滿足期望，我們可能考慮使用其他供應商，以保持供應鏈的質量及成效。

堅持可持續採購

我們深明，採購決策可能對我們的環境及社區產生深遠影響，因此我們正在推進可持續採購工作，這將成為我們企業責任的另一個核心支柱。在日清食品，我們大力支持及推廣採購以環保及負責任方式製造的產品及物料。我們相信，支持可持續採購不僅有利於環境及社會，亦可滿足消費者及利益持份者不斷變化的期望。我們日益重視與在運營中實施可持續發展常規並提供對環境及社會負責任的產品的供應商合作。

Compliance with Local Laws and Regulations

Our activities in Mainland China and Hong Kong strictly conform to the pertinent local laws and regulations. We adopt a zero-tolerance stance against any type of child or forced labour, as explicitly outlined in our Employee Handbook and other internal policies. To prevent child and forced labour, we carry out routine audits and evaluations of our supply chain and internal workings to pinpoint any possible risks or breaches concerning labour standards. Should we find any instances of child or forced labour, we act promptly and firmly to address the issue. In Hong Kong, we abide by the Employment Ordinance, the Minimum Wage Ordinance, and the Employees' Compensation Ordinance, while in Mainland China, we follow the Labour Law, the Social Insurance Law, the Employment Promotion Law, and the Labour Contract Law. These legal frameworks direct our operational and employment procedures, and we are dedicated to upholding the legal structures within the regions where we are active.

To address the updates to the Personal Information Protection Law of Mainland China in 2023, Nissin Foods conducted a security evaluation and enhancement initiative, prioritizing the management of employee personal information. In 2024, we engaged a third-party expert to verify and assess our internal systems and management practices against the law's requirements. The joint report by Nissin Foods and the external consultant confirms that all our mainland China subsidiaries are in full compliance with the Personal Information Protection Law, posing a minimal risk of overseas data transfer.

Throughout the previous year, we have preserved an impeccable record of alignment with all relevant employment and labour laws and regulations in the countries and regions where we operate. Within the reporting period, there were no cases of non-compliance with employment or labour laws within our operations.

OCCUPATIONAL SAFETY AND HEALTH

At our company, Occupational Safety and Health (OSH) is always treated as a top priority. Our strategy for maintaining operational safety and health at Nissin Foods is extensive and diverse, covering a range of aspects from enforcing policies to educating employees and preparing for emergencies. We have developed a strong OSH management system along with relevant policies that are specifically designed to tackle all relevant issues effectively. Our dedication to meeting international standards is evident through our ISO 45001 certification for all our operational facilities in Hong Kong and Vietnam, and most of operational facilities in Mainland China.

OSH Policy and Management System

Our Occupational Safety and Health Policy serves as the fundamental directive for our staff, outlining explicit procedures that require strict compliance with the policy across all our operational functions. The OSH management system, with its distinct processes, guarantees that the policy is correctly implemented in our operations. We regularly and meticulously examine our OSH practices to promote ongoing enhancements.

遵守當地法律法規

我們於中國內地及香港的營運均嚴格遵守當地相關法律法規。我們對任何形式的童工或強迫勞動行為均採取零容忍態度，我們員工手冊及其他內部政策均對此作出明確規定。為防止出現童工及強迫勞動，我們定期對供應鏈及內部營運進行檢討及評估，旨在識別與勞工標準相關的任何潛在風險或違規行為。一旦發現任何童工或強迫勞動行為，我們會立即採取果斷措施予以糾正。於香港，我們遵守《僱傭條例》、《最低工資條例》及《僱員補償條例》，而於中國內地，我們遵守《勞動法》、《社會保險法》、《就業促進法》及《勞動合同法》。該等法律框架為我們的營運及僱傭程序提供方針，並且我們致力於維護我們營運所在地區的法律結構。

為應對2023年中國內地的《個人信息保護法》更新，日清食品進行安全評估及強化舉措，優先管理員工的個人資訊。於2024年，我們委聘第三方專家驗證及評估我們的內部系統及管理常規是否符合法律規定。日清食品與外部顧問的聯合報告確認，我們所有中國內地附屬公司均全面遵守《個人信息保護法》，海外資料傳輸風險極小。

去年，我們嚴格遵守營運所在國家及地區的所有相關僱傭及勞工法律法規。於報告期間，我們的營運過程中並無出現任何違反僱傭或勞工法律的情形。

OSH Compliance and Audits

From the outset of Nissin Foods, conducting stringent checks of our sites has been a customary activity to confirm our commitment to OSH standards. The OSH Committee holds periodic sessions to evaluate our OSH track record and to propose betterments to management. Furthermore, external specialists perform yearly OSH evaluations, suggesting improvements for any deficiencies noticed in our routines.

Enhancing OSH Culture and Training

In our ongoing effort to improve the overall OSH culture, we supply all employees with pertinent information, guidance, training, and oversight to ensure they are capable of managing day-to-day operational safety and upholding the efficiency of the OSH management system. The functionality of the OSH management system is regularly assessed, and any essential measures are carried out to enhance the system continually. We stress the importance of every employee, regardless of their level, taking charge of their own safety and health, as well as that of others around them.

Safety Management Rules and Health Regulations

We rigidly follow certain safety rules to guarantee the health and safety of our staff. This includes making sure that employees are aware of the locations of emergency exits and fire doors, that they inform their supervisors of any issues with the company's electrical devices, and that fire doors remain clear and firefighting equipment is in working order. Additionally, all staff are required to uphold the Company's workplace hygiene standards to maintain a safe and sanitary environment for both personnel and products.

Influenza Contingency and Risk Management

The Influenza Contingency Committee (ICC) at our organisation is tasked with reviewing our existing emergency response plans and processes. It evaluates appropriate strategies for risk management and workplace hygiene, aiming to maintain continuous operations. Additionally, the ICC pinpoints areas ripe for enhancement and promotes open dialogue with staff regarding disease prevention techniques, thereby protecting both our business activities and employees.

職安健合規性及審核

自日清食品成立之初，嚴格的實地視察便已成為例行做法，以確認對職安健標準的遵守情況。職安健委員會定期召開會議，評估我們的職安健往績，並向管理層提出改進建議。再者，外部專家每年亦會進行職安健評估，針對日常工作中發現的不足之處提出建議。

加強職安健文化及培訓

為持續改善整體職安健文化，我們向所有員工提供相關資訊、指導、培訓及監督，確保彼等能夠勝任日常的安全作業，並維持職安健管理制度的效率。我們會定期評估職安健管理制度功能性，並採取必要措施持續改進制度。我們強調，各級員工均應為自身及相關人員的安全及健康負責。

安全管理規則及健康規定

我們嚴格遵守若干安全規則，以保證員工的健康及安全。這包括確保員工得悉緊急出口及防火門的位置，當公司電器出現任何問題時須即時向主管報告，時刻保持防火門暢通無阻，以及消防設備正常運作。此外，所有員工均須遵守本公司的工作場所衛生標準，以維持員工及產品的安全及衛生環境。

流感應變及風險管理

我們組織的流感應變委員會(流感應變委員會)負責檢討現行應變方案及程序。其評估合適的風險管理策略及工作場所的衛生情況，旨在維持持續營運。此外，流感應變委員會找出改進空間，就疾病管控方式促進與僱員進行公開交流，從而保障我們業務營運及保護僱員。

我們認識到投資員工潛力的重要性，就此制訂多項培訓及發展管理制度。該等制度經過精心設計，可協助設計培訓計劃和目標、監控員工培訓進度以及評估績效結果。我們的全面培訓及發展計劃專為促進僱員的專業發展而量身訂製，與本公司的策略目標一致。

提升企業管治

於2024年，我們的董事會成員已參加年度培訓課程，專門針對市場趨勢及情境分析開設培訓。此方式旨在加深董事會成員對當地市場營運的了解，使彼等能夠在我們的業務活動中挖掘機會並降低財務風險。培訓強調市場洞察力與企業策略、業務模式及文化相結合，並強調將該等領域與我們的核心價值相結合以強化風險管理及內部控制的重要性。我們非常重視培養與該等價值觀產生共鳴的企業文化，營造具備誠信及道德行為的環境。此外，培訓課程強調穩健的企業管治與環境、社會及管治原則之間的聯繫，同時探討董事會獨立性及定期更新的必要性等關鍵因素，從而確保我們的領導層時刻具備應對瞬息萬變的商業格局的適應力。

綜合入職計劃

我們已為全體僱員提供全面的綜合管理系統意識培訓，涵蓋ISO 22000/FSSC 22000食品安全管理系統、ISO 14001環境管理系統及ISO 45001職業健康及安全管理系統的關鍵知識。此外，營運場所的僱員定期接收有關食品安全、工作場所安全、食品生產衛生管理及環境保護的技術知識更新。我們高度重視新員工的貢獻及潛力。我們的員工入職培訓讓新僱員透徹理解日清食品的歷史、文化、發展及產品組合，為新僱員融入公司文化提供重要的知識基礎。

Continuous Professional Development

We have a proactive approach to developing our professionals. We constantly refine and assess the skills of our employees by tailoring training programmes, which include assistance from in-house trainers and expert corporate educators. This promotes a cooperative atmosphere where ideas are shared, and insights are gained from industry practices. Every year, each business division establishes strategic goals along with corresponding action plans. The leaders of these units work together with employees to review their developmental progress and the fulfilment of objectives, which is then communicated to upper management for additional assessment and endorsement. Throughout this entire process, we prioritise employee opinions and actively encourage open dialogue.

Specialised Training Initiatives

With the goal of boosting productivity and efficiency, we organise an annual Excel training course for employees who have recently joined the company. In addition, we offer Online Security Awareness Training to our staff to heighten their understanding of cybersecurity. Two key e-learning modules were delivered in 2024: “Ransomware Foundations” in July and “Safe Surfing” in November. These modules covered ransomware prevention and safe internet practices. Furthermore, regular security alerts on phishing emails reinforce employee awareness, demonstrating our commitment to data protection and cybersecurity.

Overview of Training Conducted in 2024

Occupational Health and Safety Training

At Nissin Foods, we are dedicated to fostering a robust culture of occupational safety and health (OSH). To achieve this, we provide comprehensive support to our employees, which includes delivering relevant information, clear instructions, regular training, and stringent supervision. These measures ensure that our staff possess the necessary skills to manage daily operational safety and to uphold the integrity of our OSH management system.

We conduct periodic evaluations of our OSH management system to assess its effectiveness and implement any required actions to enhance its performance. It is our core belief that every employee, regardless of level, must assume responsibility for their own safety and health, as well as for that of their colleagues. This shared accountability underpins our ongoing efforts to maintain a safe and healthy work environment.

Development Training

Throughout the year, a collection of targeted internal and external development courses was made available to employees in several departments. These included training such as the Food Defence Training, Food Allergen Training, Critical Control Point (CCP) Training, FSSC 22000 Version 6 Awareness Training and Director Training.

持續專業發展

我們積極主動地培養專業人才。我們透過量身訂製培訓課程，包括在內部培訓人員及企業教育專家的協助下，不斷精進、評估僱員的技能。此舉有助營造合作氛圍，藉此交流各種想法，並從行業實踐中獲得洞察力。每年，各業務部門均會制定戰略目標以及相應的行動計劃。有關單位主管與僱員共同檢視彼等的發展進度和目標達成情況，然後再傳達至上層管理人員進行進一步評估及審批。於整個過程中，我們會優先考慮僱員意見，並積極鼓勵開放式對話。

專業培訓計劃

為提高生產力及效率，我們每年均會為新加入公司的僱員開辦Excel培訓課程。此外，我們亦為僱員提供線上安全意識培訓，提高彼等對網路安全的了解。我們於2024年推出兩項重要的線上學習單元，分別為七月的「勒索軟件基礎知識(Ransomware Foundations)」及十一月的「安全上網(Safe Surfing)」。學習單元涵蓋勒索軟體預防及安全網路實務。此外，我們定期針對釣魚郵件發出安全警示，加強僱員警覺性，以彰顯我們對數據保護及網路安全的堅定承諾。

我們定期評估職安健管理系統，以評估其有效性，並採取任何必要行動來提升其表現。作為我們的核心理念，每位僱員不論職級高低，均須對本人及同仁的安全與健康負責。共責制乃我們持續努力維護安全與健康工作環境的基石。

Another highly anticipated event is our Annual Dinner, an annual event that brings together employees from across the Company to celebrate another year of achievements and success. More than just a gathering, the Annual Dinner serves as a platform for strengthening team spirit and reinforcing the strong bonds that define our workplace. The event provides the opportunity for employees to connect beyond their day-to-day responsibilities, fostering camaraderie, appreciation, and shared pride in our accomplishments. In 2024, the Annual Dinner once again recognised employees' hard work and created an enjoyable and memorable experience for all.

Skilled healthcare practitioners are scheduled to give the vaccinations at our premises for the convenience of our employees. Through these extensive health and wellness benefits, we strive to guarantee that all our staff can obtain the essential health screenings and preventative care.

Family-Friendly Initiatives

Understanding the diverse requirements of our employees, we have introduced adaptable working schedules and leave policies that accommodate family needs. On different occasions, staff members are also granted cash bonuses by the Company to celebrate weddings and births, or to offer sympathy for the passing of immediate family members. These measures are put in place to help our employees balance their work commitments with their personal and family duties more comfortably and with reduced anxiety. In January 2023, Nissin Foods announced the extension of its sponsorship of Hong Kong tennis player Cody WONG for a period of three years from 2023 to 2025. Having sponsored Cody since 2021, Nissin Foods has levelled up its sponsorship support for the 22-year-old star as she continues to make strides on the professional circuit, in the hope that Cody will garner even more honours for herself and Hong Kong in the international arena.

Cody Wong picked up five doubles titles in 2024, winning the W50 Caloundra, W35 Kunshan, W35 Hong Kong, W35 Santo Domingo, and W15 Nakhon Si Thammarat with her partners. She is currently ranked number 2 as of the end of 2024 among women's singles and doubles players from Hong Kong. We will continue our efforts to groom budding athletes in local tournaments while sponsoring local elite athletes in international games.

2 In 2024, Nissin Foods acquired Gaemi Foods in South Korea and ABC Pastry in Australia. As these acquisitions were completed late in the year and Nissin Foods' ownership in these companies was less than a quarter during the Reporting Period, their environmental and social KPI data are not included in this year's ESG report. Relevant data will be incorporated in future disclosures as appropriate.

3 In 2024, Nissin Foods expanded its reporting boundary to include three additional representative plants – Zhuhai Nissin, Dongguan Nissin, and Nissin Vietnam – which results in notable changes in environmental performance compared to the previous year, while enhancing the comprehensiveness and accuracy of our environmental disclosures. Additionally, environmental KPIs for the previous two reporting periods have been updated to reflect revisions in certain emission and conversion factors, ensuring greater accuracy and alignment with the latest assessment methodologies.

4 The emission factors for calculating the indirect emissions from the consumption of town gas and electricity have been updated to align with the most recent data. Performance over the previous two reporting periods is also restated based on the refreshed calculation.

5 The reported Scope 3 emissions, totaling 292,425 tonnes of CO₂e, cover nine categories: Purchased goods and services, Fuel- and energy-related activities, Upstream transportation and distribution, Waste generated in operations, Business travel, Employee commuting, Downstream transportation and distribution, Use of sold products, and End-of-life treatment of sold products. As this is the initial year of Scope 3 emission disclosure, some of the data is still under collection and not ready to be disclosed this year. Additional categories will be incorporated in future reporting as data availability improves.

2 2024年，日清食品收購韓國Gaemi Foods及澳洲ABC Pastry。由於該等收購均於年末完成，且於報告期間，日清食品所持該等公司的所有權不足四分之一，因此其環境及社會關鍵績效指標數據未包含於本年度的環境、社會及管治報告中。相關數據將視情況納入未來的披露中。

3 2024年，日清食品擴大其報告範圍，新增三家代表性工廠—珠海日清、東莞日清及越南日清，導致環境表現與上一年相比發生顯著變化，同時提高本公司環境披露的全面性及準確性。此外，前兩個報告期間的環境關鍵績效指標已經更新，以反映若干排放和轉換係數的修訂，確保更高的準確性，並與最新的評估方法保持一致。

4 計算煤氣及電力消耗間接排放的排放係數已更新，以與最新數據保持一致。先前兩個報告期間的表現亦已根據更新後的計算方法重列。

5 報告的範圍3排放總量為292,425噸二氧化碳當量，涵蓋九個類別：購買的商品及服務、燃料及能源相關活動、上游運輸及配送、運營過程中產生的廢棄物、商務差旅、員工通勤、下游運輸及配送、已銷售產品的使用，以及已銷售產品的廢棄處理。由於今年乃範圍3排放披露的第一年，部分數據仍在收集中，今年尚未準備好披露。隨著數據可用性的提高，將在未來的報告中納入更多類別。

6 The notable increase in non-hazardous waste generation this year can be attributed to the operations of our new subsidiary, Zhuhai Nissin Packaging Co., Ltd. The startup of this facility has introduced additional waste streams associated with its industrial processes, which include the handling of materials that contribute to non-hazardous waste. As the subsidiary ramps up its production, it has temporarily led to a higher volume of non-hazardous waste. We are actively working on implementing robust waste management systems and exploring opportunities for waste reduction and recycling to mitigate this impact going forward.

6 本年度產生的無害廢物顯著增加，乃由於我們新成立的附屬公司珠海日清包裝有限公司的營運所致。啟動該廠房增加了與其工業流程相關的廢物來源，其中包括處理造成無害廢物的物料。隨著該附屬公司加大產量，所產生的無害廢物量暫時增加。我們正積極致力實施健全的廢物管理制度，並探索減廢及回收的機會，以減輕未來的影響。
