Guangdong Kanghua Healthcare Group Co., Ltd. Annual Rep

行政總裁報告

Dear Shareholders:

On behalf of the Company, I sincerely express my gratitude to all Shareholders and other community stakeholders for your continuous support to the Group.

In 2024, China's healthcare market was subject to significant development trends and industry changes. Digital transformation has become a focus, and the growing popularity of telemedicine and healthcare management applications has improved patients' medical experience while at the same time reduce medical costs. The aging population is also leading to an increase in demand for chronic disease management and elderly care services. Medical institutions need to strengthen professional services for elderly patients and promote the development of community medical care to achieve more accessible medical services. Consumers' awareness on health has promoted the demand for personalized medical and health management services, and the healthcare market is moving towards a more diversified and patient-centered direction. Overall, China's healthcare industry is moving towards greater efficiency and accessibility.

Furthermore, in 2024, due to the intensified national policy reforms, decrease in post-COVID-19 related demand and industry adjustments, the Group's revenue and total profit attributable to operation of its self-owned hospitals experienced a year-on-year decline, while its operational costs, including employee expenses and other operating expenditures continued to increase. In particular, the changes in healthcare, pharmaceuticals, and healthcare insurance policies (the "Three Medical" policies) have altered the existing management models and performance evaluation systems of healthcare institutions, presenting new opportunities and challenges to the Group.

In 2024, the overall economic development in China remained steady, with the gross domestic product (GDP) reaching RMB134.9 trillion, representing a year-on-year increase of 5.0% at constant price. However, the healthcare industry is still in a critical period of transition and the overall pace of recovery of the healthcare and medical service industry was relatively weak during the Reporting Period. In 2024, the healthcare industry had continued to evolve rapidly, as the comprehensive reforms in the healthcare system reshaped the market and industry players, the Chinese government is implementing policies aimed at improving healthcare accessibility and affordability, including implementing laws and regulations requiring hospitals and healthcare providers to improve price transparency, emphasizing value-based care, reviewing and adjusting payment rates for different Diagnosis-Related Group (DRG) payment groups, expanding insurance coverage and promoting public-private partnerships.

致股東:

本人謹代表本公司衷心感謝全體股東及社會各界其他利益相關人士對本集團的持續支持。

同時,二零二四年,由於國家政策改革力度 加大、COVID-19後相關需求減少及行業調整, 本集團自有醫院收益及經營應佔溢利總額 按年計同比下降,而包括僱員開支及其他經 營開支在內的經營成本持續上升。特別是醫 療、醫藥及醫保政策(「三醫」政策)的變化, 改變醫療機構現有的管理模式及績效考核 體系,為本集團帶來新的機遇和挑戰。

行政總裁報告

The Group's consolidated revenue for the Reporting Period amounted to RMB2,055.7 million (2023: RMB2,041.9 million), representing a year-on-year increase of 0.7%, despite the additional revenue of RMB75.8 million generated from our newly acquired haemodialysis services segment in January 2024. The Group recorded a consolidated profit of RMB10.5 million for the Reporting Period as compared to a profit of RMB91.0 million for last year, representing a year-on-year decrease of 88.5%. The decrease for the Reporting Period is primarily attributable to (i) the general decline in revenue from the Group's self-owned hospitals; (ii) our newly acquired haemodialysis services business in January 2024, which contributed additional revenue to the Group, but was still operating at a loss, which in turn added pressure to the Group's overall results; (iii) Kangxin Hospital continued to operate at a loss; and (iv) a fair value loss of RMB9.4 million in relation to our interest in an investment fund.

The Group's self-owned hospitals, namely, Kanghua Hospital (our approved Grade A Class III standard general hospital), Renkang Hospital (our Grade A Class II standard general hospital) and Kangxin Hospital (our private hospital specializing in cardiovascular discipline), represented our Group's hospital services segment. Our hospital services segment has recorded a revenue for the Reporting Period of RMB1,838.5 million (2023: RMB1,887.9 million), representing a year-on-year decrease of 2.6%.

Under the strong leadership of the Board and through the collective efforts of the entire hospital over the last three years, Kanghua Hospital successfully passed the on-site review for the Grade III Class A Hospital re-evaluation in September 2024 after a series of regulatory and self-initiated measures. On 1 November 2024, the Provincial Health Commission officially announced that Kanghua Hospital had passed the re-evaluation. This achievement reflects Kanghua Hospital's excellence in healthcare quality and hospital management, and during this process, numerous outstanding departments and individuals emerged, demonstrating the hospital's core values, exceptional professional skills and selfless dedication. In December 2024, our General Surgery Department regained the recognition as a Key Clinical Specialty in Dongguan City; the Gastroenterology Department had also officially passed the re-evaluation as a Key Specialty in Dongguan City.

儘管本集團於二零二四年一月新收購的血液透析服務分部產生人民幣75.8百萬元的額外收入,但本集團於報告期間的綜合收入為人民幣2,055.7百萬元(二零二三年:人民幣2,041.9百萬元),按年同比增長0.7%。於報告期間,本集團錄得綜合溢利人民幣10.5百萬元,而去年為溢利人民幣91.0百萬元,而去年為溢利人民幣91.0百萬元,同比下降88.5%。報告期間下降主要由於(i)本集團自有醫院的收入普遍下降;(ii)於零工四年一月新收購的血液透析服務業虧狀心為本集團的整體業績增加壓力;(iii)康於虧損,及(iv)與投資基金權額的公平值虧損人民幣9.4百萬元。

本集團自有的醫院,即康華醫院(我們獲批准的三級甲等標準綜合醫院)、仁康醫院(我們二級甲等標準綜合醫院)及康心醫院(我們心血管科專科私立醫院)代表本集團的醫院服務分部。報告期間,醫院服務分部錄得收入人民幣1,838.5百萬元(二零二三年:人民幣1,887.9百萬元),同比下降2.6%。

在董事會的堅強領導下,經過三年全院上下的共同努力,經過一系列的規範和自主改進措施,康華醫院於二零二四年九月,順利過了三甲複審現場評審。二零二四年十一月一日省衛健委正式宣佈我院通過了三甲複審。這成績的取得體現康華醫院在醫療品質、且完了。 這一過程中,湧現出一大批優秀科室面人,以實際行動踐行了醫院的核心價值觀,展現了高超的專業能力和無私的奉獻精神、二零二四年十二月,普通外科重新取得東莞市臨床重點專科複評。

行政總裁報告

Kanghua Hospital, in conjunction with the Grade III Class A Hospital re-evaluation, has comprehensively implemented the directives of the higher health authorities to strengthen healthcare quality control. In 2024, Kanghua Hospital also received numerous honors at various levels, successfully being recognized as a National Level III Stroke Center, a National Inflammatory Bowel Disease Regional Center, a National Headache Clinic, a Demonstration Unit for Obesity Management by the China Non-public Medical Institutions Association and a Deputy Director Unit. Additionally, it was designated as a Guangdong Province Trauma Center (Level III) and a member of the Guangdong Province Minimally Invasive Endoscopic Neurosurgery Alliance. As a result of the re-evaluation for Grade III Class A status, the Hypertension Control Center (Standard Version) certification, the Heart Failure Center re-certification and the fifth review for "Human Assisted Reproductive Technology", Kanghua Hospital was officially inaugurated as a Teaching Hospital of Guanadong Pharmaceutical University.

康華醫院結合三甲複審工作,全面貫徹落實

In 2024, Renkang Hospital continued to strengthen its healthcare quality control, and enhance its technical capability, comprehensively optimize healthcare service quality, while improving patient experience. Throughout the year, the hospital focused on the development of the "Three Major Centers" to elevate the overall standard of emergency and critical care services. Efforts to refine the establishment of the "Trauma Center, Chest Pain Center and Stroke Center" continued. Renkang Hospital also established a new Internal Medicine Ward, launched Traditional Chinese Medicine (TCM) Daycare and Night Clinics, as well as an Oral Night Clinic, thereby enhancing its core competitiveness with community and neighboring hospitals. In terms of strengthening medical staff training, multiple business knowledge training sessions were conducted throughout the year to improve medical technical standards. Additionally, the hospital implemented "Internet + Nursing Services", providing home nursing care to patients in need.

Our rehabilitation and other related healthcare services segment, represented by the Anhui Hualin Group, had recorded revenue for the Reporting Period of RMB128.4 million (2023: RMB141.2 million), representing a year-on-year decrease of 9.1%. The decrease in revenue was primarily due to decrease in the inpatient intake and patients average spending at our rehabilitation hospitals, but partly offset by the increase in patient visits at our rehabilitation centres. The private rehabilitation market is expanding, driven by an increasing elderly population and shift towards preventive rehabilitation services; however, the competition has also been increasingly intense with more private clinics and facilities emerging to meet the demand. New DRG regulations implemented in 2024 have kept annual social insurance quotas at previous year's levels, impacting revenue in the foreseeable future. Although efforts had been made to attract patients from new regions in Anhui, patient volume remains limited, pressuring revenue growth for 2024.

行政總裁報告

Our haemodialysis services segment, which was the newly acquired business segment in January 2024, had recorded revenue for the Reporting Period of RMB75.8 million (2023: nil). The demand for haemodialysis service in China had experienced significant growth and development in the last decade. As people's income and expectation for quality services increase, patients are seeking alternative options in the private sector for haemodialysis services, where they can enjoy more convenience, flexibility, and personalized care. It is expected that the proportion of patients opting for private sector providers to undergo haemodialysis-related treatments in the PRC will continue to increase. The geographical presence of our haemodialysis outpatient centres aligns with the Group's strategy of expanding and promoting the "Kanghua" brand (which currently operates in the name of Kanghua Sunshine) in the Greater Bay Area. The Kanghua Haemodialysis Group operates in major cities outside of Dongquan, where Kanghua Hospital is located. The acquisition of the Kanghua Haemodialysis Group can strengthen the Group's network and visibility in the region. In the opinion of the Directors, the acquisition will create synergies and economies of scale for the Group, as they can leverage on each other's network, resources, expertise and reputation in the healthcare industry.

Our elderly healthcare services segment had recorded a revenue for the Reporting Period of RMB12.9 million (2023: RMB12.7 million), representing a year-on-year increase of 1.5%. As Renkang Elderly Care Centre is currently operating at close to maximum capacity, the slight increase in revenue for the Reporting Period was mainly due to the improved utilisation during the year. Over the past years, China's elderly care service policies had continued to evolve in response to the growing aging population and the need for diverse care options. The government has been increasingly supportive of private elderly care centers. As the operation matures, Renkang Elderly Care Centre has continues to gain reputation for its elderly healthcare services in the district. Renkang Elderly Care Centre will continue to focus on enhancing service quality and cooperating with the evaluation process of Guangdong Province's Pension Institution, striving to achieve accreditation as a five-star elderly care institution.

The Group's Adjusted EBITDA recorded a year-on-year decrease of 21.2% to RMB229.6 million (2023: RMB291.3 million). Such Adjusted EBITDA indicates that the Group's core operation remained solid, after eliminating the effects of financing, investment-related income, fair value changes of investments, effects of exchange rates, capital expenditures and extraordinary non-cash related losses.

我們的血液透析服務分部為於二零二四年 一月新收購的業務分部,於報告期內錄得收 益人民幣75.8百萬元(二零二三年:無)。中 國的血液透析服務需求在過去十年增長及 發展顯著。隨著人們收入增加且對優質服務 的期望提高,患者正在私營界別尋求血液透 析服務的另類選擇,在私營界別中可享受更 便利、靈活和個性化的護理。預計中國選擇 私營界別提供者進行血液透析相關治療的 患者所佔比例將持續增加。我們的血液透析 門診中心的地理分佈符合本集團在大灣區 拓展及推廣「康華」(現以「康華陽光」之名運 營)品牌的策略。康華血液透析集團於康華 醫院所在市東莞以外的主要城市經營業務。 收購康華血液诱析集團可加強本集團於該 地區的網絡及知名度。董事認為,收購將為 本集團創造協同效應及規模經濟,原因為雙 方可發揮彼此在醫療行業的網絡、資源、專 業知識及聲譽。

本集團的經調整EBITDA按年計同比減少21.2%至人民幣229.6百萬元(二零二三年:人民幣291.3百萬元)。該經調整EBITDA顯示本集團的核心業務於撇除融資、投資相關收入、投資公平值變動、匯率影響、資本支出及重大非現金相關虧損後,仍然穩固。

管理層討論及分析

Our rehabilitation and other related healthcare services segment, with its operations located in Anhui Province, the PRC, mainly consist of two rehabilitation hospitals, namely, Hefei Kanghua Rehabilitation Hospital and Hefei Jingu Hospital, a Grade A Class I general hospital, Bengbu Renkang Hospital and an out-patient centre (these hospitals and out-patient centre represent our rehabilitation hospital and other healthcare services operation), and thirteen rehabilitation centres and one vocational training school (representing our rehabilitation centre services and other services operation). These operations primarily consist of provision of special care services to patients with permanent or long-term physical or mental disabilities and also healthcare and training services for the disabled. These operations signify the Group's offerings into disability rehabilitation services outside of Guangdong Province, and our expansion initiatives and confidence into quality rehabilitation services in the PRC.

Our haemodialysis services segment is principally engaged in the operation of haemodialysis outpatient centres in the PRC. During the Reporting Period, the Group completed the acquisition of 70% equity interest in Dongguan Kanghua Haemodialysis Healthcare Investment Management Co., Ltd.* and its subsidiaries (collectively referred to as the "Kanghua Haemodialysis Group" or "Kanghua Sunshine"). The provision of haemodialysis services generally refers to treatments that replicate kidney's function to remove wastes in blood for patients with kidney conditions. The first outpatient centre of the Kanghua Haemodialysis Group commenced operation in 2016. As at the date of this report, the Group operates 12 (2023: 13) haemodialysis centres, located in Guangzhou (2), Chengdu (3), Shenzhen (1), Foshan (1), Zhongshan (1), Zhuhai (1), Yangjiang (1), Jieyang (1) and Jiangmen (1), serving more than 930 (2023: 730) regular haemodialysis patients. In 2024, the haemodialysis outpatient centres had performed more than 118,000 (2023: 90,000) haemodialysis operations. The Kanghua Haemodialysis Group has introduced advanced concepts and technologies from haemodialysis outpatient centres in Singapore and implemented high-quality dialysis and refined chronic disease management. The Kanghua Haemodialysis Group is a pioneer in introducing "harmless dialysis", which is a protocol significantly more advanced than the prevalent standard in the PRC and has significantly improved the life span and quality of life of kidney patients.

BUSINESS REVIEW AND OUTLOOK

Business Overview for 2024

In 2024, the overall economic development in China remained steady, with the gross domestic product (GDP) reaching RMB134.9 trillion, representing a year-on-year increase of 5.0% at constant price, according to data from the National Bureau of Statistics. With a population of exceeding 1.4 billion and a rapidly ageing population, China is experiencing a surging demand for healthcare services. China's hospital network is one of the largest and most complex globally, including both public and private facilities. Operating under a tiered structure, it addresses a wide range of healthcare needs, with private hospitals increasingly complementing the extensive public infrastructure.

However, the healthcare industry is still in a critical period of transition and the overall recovery of the healthcare and medical service industry is relatively weak during the Reporting Period. In 2024, the healthcare industry has continued to evolve rapidly, as the comprehensive reforms in the healthcare system reshape the market and industry participants, the Chinese government is implementing policies aimed at improving healthcare accessibility and affordability, including implementing laws requiring hospitals and healthcare providers to improve price transparency, emphasizing value-based care, reviewing and adjusting payment rates for different Diagnosis-Related Group (DRG) payment groups, expanding insurance coverage and promoting public-private partnerships.

In 2024, due to the intensified national policy reforms, decrease in post-COVID-19 related demand and industry adjustments, the Group's revenue and total profit attributable to operation of its self-owned hospitals experienced a year-on-year decline, while its operational costs, including employee expenses and other operating expenditures continued to increase. In particular, the changes in healthcare, pharmaceuticals, and healthcare insurance policies (the "Three Medical" policies) have altered the existing management models and performance evaluation systems of healthcare institutions, presenting new opportunities and challenges to the Group.

業務回顧和展望

二零二四年業務概覽

國家統計局數據顯示,二零二四年中國經濟發展整體保持平穩,國內生產總值(GDP)達到人民幣134.9萬億元,按固定價格計算,同比增長5.0%。中國擁有超14億人口,人工老齡化迅速發展,對醫療保健服務的需求激增。中國的醫院網絡是全球規模最大、最複雜的網絡之一,包括公立及私立醫院。該網絡以分級結構運營,可滿足廣泛的醫療保健需求,其中私立醫院日益成為廣泛的公共基礎設施的補充。

然而,醫療保健行業仍處於轉型的關鍵時期,報告期間醫療保健及醫療服務行業的整體復 甦勢頭相對較弱。二零二四年,醫療保健行業持續快速發展,隨著醫療體系的全面改革 重塑市場及行業參與者,中國政府正在實施 旨在提高醫療保健可及性及可負擔性的政策, 包括實施規定醫院及醫療保健提供者提高 價格透明度的法律、強調以價值為基礎的醫療服務、檢討及調整不同診斷相關分組(DRG) 支付組別的支付費率、擴大保險覆蓋範圍及 推動公私合作等。

二零二四年,由於國家政策改革力度加大、COVID-19後相關需求減少及行業調整,本集團自有醫院收益及經營應佔溢利總額按年計同比下降,而包括僱員開支及其他經營開支在內的經營成本持續上升。特別是醫療、醫藥及醫保政策(「三醫」政策)的變化,改變醫療機構現有的管理模式及績效考核體系,為本集團帶來新的機遇與和挑戰。

管理層討論及分析

Amidst this wave of challenges and opportunities, under the leadership of the Board, all employees of the Group have closely followed our development strategy of "Precision healthcare, Efficient Management and Sincere Service", committed to steady progress and determined efforts, we navigate our mission to save lives with professionalism as our oar and conviction as our sail, delivering a track record of solid and impactful achievements.

In 2024, the Group's consolidated revenue for the Reporting Period amounted to RMB2,055.7 million (2023: RMB2,041.9 million), representing a year-on-year increase of 0.7%, despite the additional revenue of RMB75.8 million generated from our newly acquired haemodialysis services segment in January 2024. The Group recorded a consolidated profit of RMB10.5 million for the Reporting Period as compared to a profit of RMB91.0 million for last year, representing a year-on-year decrease of 88.5%. The decrease for the Reporting Period is primarily attributable to (i) the general decline in revenue from the Group's self-owned hospitals; (ii) our newly acquired haemodialysis services business since January 2024, although contribute additional revenue to the Group, however, is still operating at a loss, which added pressure to the Group's overall results; (iii) Kangxin Hospital continues to operate at a loss; and (iv) a fair value loss of RMB9.4 million in relation to our interest in an investment fund.

在這充滿挑戰與機遇的浪潮中,本集團全體員工在董事會的領導下,緊緊圍繞「三精管理」(精準醫療、精益管理、精誠服務)的發展戰略,堅持穩中求進,奮力拼搏,以專業為獎,以信念為帆,在救死扶傷的使命航道上,留下了或深或淺卻堅實有力的奮鬥航跡。

管理層討論及分析

Our hospital services segment has recorded a revenue for the Reporting Period of RMB1,838.5 million (2023: RMB1,887.9 million), representing a year-on-year decrease of 2.6%. In 2024, the overall patient visits of our hospital services segment recorded a mild decrease of 0.9% as compared to 2023, the Group also experienced pressure on patient's average spending on our service offerings. The Group's self-owned hospitals (making up our hospital services segment), Kanghua Hospital, Renkang Hospital and Kangxin Hospital have recorded decrease in revenue of 1.6%, 6.7% and 10.6%, respectively.

Our rehabilitation and other related healthcare services segment, through our ownership of 57% equity interest in Anhui Hualin Medical Investment Co., Ltd.* ("Anhui Hualin") (Anhui Hualin and its subsidiaries, directly and indirectly holds sponsor interests in the managed and controlled entities, certain of which are private non-enterprise entities in Anhui Province, the PRC, collectively the "Anhui Hualin Group"), has recorded revenue for the Reporting Period of RMB128.4 million (2023: RMB141.2 million), representing a year-on-year decrease of 9.1%. Revenue for the Reporting Period from our (i) rehabilitation hospitals and other healthcare services operation and (ii) rehabilitation centre services and other services operation have decreased by 26.4% and increased by 10.0%, respectively. The decrease in revenue is primarily due to decrease in the inpatient intake and patients average spending at our rehabilitation hospitals, but partly offset by the increase in patient visits at our rehabilitation centres. The private rehabilitation market is expanding, driven by an increasing elderly population and shift towards preventive rehabilitation services, however, the competition is also increasingly intense with more private clinics and facilities emerging to meet the demand.

Our haemodialysis services segment, the newly acquired business segment in January 2024, has recorded revenue for the Reporting Period of RMB75.8 million (2023: nil). The demand for haemodialysis service in China had experienced significant growth and development in the last decade, mainly attributable to (i) the rising incidence of chronic kidney disease (CKD) and end-stage renal disease (ESRD) which has increased the demand for dialysis services; (ii) lifestyle changes, urbanization and an aging population; and (iii) the Chinese government has been actively promoting healthcare reforms, including the expansion of dialysis services and policies aimed at improving access to treatment and subsidizing costs for patients are being implemented. As people's income and expectation for quality services increase, patients are seeking alternative options in the private sector for haemodialysis services, where they can enjoy more convenience, flexibility,

報告期間,醫院服務分部錄得收入人民幣1,838.5百萬元(二零二三年:人民幣1,887.9百萬元),同比下降2.6%。二零二四年,醫院服務分部的整體就診人次較二零二三年輕微下降0.9%,本集團對患者就我們服務產品的平均消費亦面臨壓力。本集團自有醫院(構成醫院服務分部)、康華醫院、仁康醫院及康心醫院收入分別錄得1.6%、6.7%及10.6%跌幅。

我們的康復及其他相關醫療服務分部(透過 我們擁有安徽樺霖醫療投資有限公司(「安 徽樺霖1)(安徽樺霖及其附屬公司)57%的股 本權益,安徽樺霖直接及間接持有受管理及 控制實體的舉辦者權益(部份為中國安徽省 的私營非企業實體,統稱「安徽樺霖集團」) 於報告期間錄得收益人民幣128.4百萬元(二 零二三年:人民幣141.2百萬元),按年計同 比減少9.1%。來自我們(i)康復醫院及其他醫 療服務運營及(ii)康復中心服務及其他服務運 營的收益分別減少26.4%及增加10.0%。收益 減少主要由於我們的康復醫院的收治人數 及病人平均開支減少,但部分被我們的康復 中心的患者就診人次增加所抵銷。私立康復 市場在老年人口增加及轉向預防性康復服 務的帶動下正不斷擴大,但隨著出現更多私 立診所及設施滿足需求,市場競爭亦日趨激 列。

and personalized care. It is expected that the proportion of patients opting for private sector providers to undergo haemodialysis-related treatments in the PRC will continue to increase. The geographical presence of our haemodialysis outpatient centres aligns with the Group's strategy of expanding and promoting the "Kanghua" brand (which currently operates in the name of Kanghua Sunshine) in the Greater Bay Area. The Kanghua Haemodialysis Group operates in major cities outside of Dongguan, where Kanghua Hospital is located. The acquisition the Kanghua Haemodialysis Group can strengthen the Group's network and visibility in the region. In the opinion of the Directors, the acquisition will create synergies and economies of scale for the Group, as they can leverage on each other's network, resources, expertise and reputation in the healthcare industry.

Our elderly healthcare services segment has recorded a revenue for the Reporting Period of RMB12.9 million (2023: RMB12.7 million), representing a year-on-year increase of 1.5%. As Renkang Elderly Care Centre is currently operating at close to maximum capacity, the slight increase in revenue for the Reporting Period is mainly due to the improved utilisation during the year. Over the past years, China's elderly care service policies have continued to evolve in response to the growing aging population and the need for diverse care options. The government has been increasingly supportive of private elderly care centers, including (i) allocation of more resources to enhance private elderly care facilities and services, such as grants and incentives for infrastructure development and improvements; (ii) provision of operational subsidies and tax incentives; (iii) stronger emphasis on promoting home-based care; and (iv) efforts to integrate private elderly care services into social security and health insurance systems, making it easier for families to afford private elderly care services.

The Group's Adjusted EBITDA (which is defined as earnings before accounting for bank and other interest income, interest expenses, taxes, depreciation and amortisation, fair value gain/(loss) and investment income from financial assets at FVTPL and net exchange gain/(loss)) recorded a year-on-year decrease of 21.2% to RMB229.6 million (2023: RMB291.3 million), which indicates that the Group's core operation remained solid, after eliminating the effects of financing, investment-related income, fair value changes of investments, effects of exchange rates, capital expenditures and extraordinary non-cash related losses. Details and calculations on Adjusted EBITDA are set out in the section headed "Adjusted EBITDA" in this report.

Renkang Hospital

In 2024, Renkang Hospital continued to strengthen its medical quality control, and enhance its technical levels, fully optimize medical service quality, and improve patient experience. Throughout the year, the hospital focused on the development of the "Three Major Centers" to elevate the overall standard of emergency and critical care services. Efforts to refine the establishment of the "Trauma Center, Chest Pain Center and Stroke Center" continued, and in May 2024, Renkang Hospital received notification from the Dongguan Health Bureau, designating it once again as an emergency medical rescue hospital for road traffic accidents, resuming the treatment of critically injured traffic accident patients. Renkang Hospital also established a new Internal Medicine Ward, launched Traditional Chinese Medicine (TCM) Daycare and Night Clinics, as well as an Oral Night Clinic, thereby enhancing its core competitiveness with community and neighboring hospitals. In terms of strengthening medical staff training, multiple business knowledge training sessions were conducted throughout the year to improve medical technical standards. Additionally, the hospital implemented "Internet + Nursing Services" and in compliance with the city health bureau's management requirements, completed registration and successfully commenced services in December 2024, providing home nursing care to patients in need. Clinical specialty development is fundamental to the hospital's foundation and its strengthening. To bolster specialty development, a Science and Education Department was established this year to formulate, revise and improve regulations and management methods in areas such as discipline construction, research, publications, talent selection, teaching, and continuing education.

During the Reporting Period, Renkang Hospital recorded a revenue of RMB232.2 million (2023: RMB248.9 million), representing a year-on-year decrease of 6.7%. The decrease in revenue was mainly attributable to a drop in patients' average spending and overall decrease in patient visits, which was affected by the local economic environment with the decline in number of local immigrants, and the number of people seeking medical treatment has dropped significantly.

二零二四年,仁康醫院繼續加強醫療品質管 制,提升醫院技術水準,全面優化醫療服務 品質,提升患者就醫體驗。年內繼續加強「三 大中心]的建設工作,提升急診急救整體水 準。持續完善醫院「創傷中心、胸痛中心、 卒中中心]三大中心創建的工作,二零二四 年五月收到東莞市衛生健康局文件,仁康醫 院再次被列入市道路交通事故應急醫療救 治定點醫院,恢復了交通事故危重病人的收 治工作。仁康醫院亦成立內三科病區、開設 中醫日間病房、中醫夜間門診和口腔科夜間 門診,提升與社區及周邊醫院的核心競爭力。 在強化醫務人員能力培訓工作方面,今年陸 續開展了多項業務知識培訓,提高醫療技術 水準。同時開展「互聯網+護理服務」,按市 衛生建康局管理要求,於二零二四年十二月 完成了備案,並順利開展工作,為有需求的 患者提供上門護理服務。臨床專科建設是立 院之本,強院之基,為加強專科建設,今年 成立了科教科,以制定、修訂和完善在學科 建設、科研、論文、人才選拔、教學及繼續 教育等方面的規章制度及管理辦法。

於報告期間,仁康醫院錄得收益人民幣 232.2百萬元(二零二三年:人民幣248.9百 萬元),同比減少6.7%。收益減少主要是由 於受當地經濟環境影響,當地外來人口減少, 門診人次大幅減少,導致患者平均消費金額 下降,整體就診人次減少。

管理層討論及分析

In 2024, the Group performed a total of 53,871 surgeries (2023: 48,105), including 24,031 surgeries (2023: 22,092) with level 3 or level 4 complexities, representing a year-on-year increase of 12.0% and 8.8%, respectively. The increase is primarily attributable to an increase in patient visits which demonstrates the improvements in our medical service quality and capabilities, as well as the growing recognition of our brand and reputation.

During the Reporting Period, the top five revenue-generating disciplines from the Group's hospital services segment accounted for approximately 52.3% of the segment's revenue (2023: 50.9%). Revenue from most of our major disciplines and service offerings has recorded a decline in 2024. The Group only recorded a mild decrease in the overall number of patient visits, however, recent stringent reforms in the social security system, particularly regarding payment rate adjustments and standardized pricing for common procedures, have resulted in a reduction in patients' average spending, and in turn a decline in revenue compared to last year.

VIP Special Services

The Group's special services are high-end healthcare services that extend beyond basic medical services and are specifically catered for more affluent patients who are willing to pay a premium for higher quality and customised services that are not generally available in public hospitals. The Group's special services consist of VIP healthcare services, reproductive medicine, plastic and aesthetic surgery and laser treatment. In 2024, the total revenue derived from special services amounted to RMB149.0 million (2023: RMB159.9 million), representing a year-on-year decrease of 6.8%.

於二零二四年,本集團已施行合共53,871例 (二零二三年:48,105例) 手術,包括24,031 例(二零二三年:22,092例) 三、四級複雜手 術,同比分別增加12.0%及8.8%。該增加主 要歸因患者就診次數增加,足證我們的醫療 服務品質及能力提升,我們的品牌和聲譽也 日益獲得認可。

於報告期間,本集團醫院服務分部產生收益的五大專科佔分部收益約52.3%(二零二三年:50.9%)。二零二四年,本集團大部分主要科室及服務收益均錄得下跌。本集團整體就診人次僅錄得輕微下降,但近期社保制度嚴格改革,尤其是關於支付比率調整及常見手術的標準化定價,導致患者平均支出減少,進而導致收益較去年下降。

VIP特殊服務

本集團的特殊服務是超出基本醫療服務的高端化醫療服務,主要針對高收入患者,彼等願意為普通公立醫院難以提供的高品質及定制化服務支付額外費用。本集團的特殊服務包括貴賓醫療服務、生殖醫學、整形及美容手術及激光治療。於二零二四年,來自特殊服務的總收益為人民幣149.0百萬元(二零二三年:人民幣159.9百萬元),按年計同比下降6.8%。

In 2024, the performance of our VIP healthcare services declined as the number of VIP outpatient visits and inpatient's average spending per visit decreased as compared with last year. The demand (by number of inpatient visits) for our service offerings from Huaxin Building (a complex in Kanghua Hospital dedicated to VIP healthcare services) maintained relatively stable, however, average spending per inpatient visit has significantly decreased. Our revenue from VIP healthcare services (including VIP inpatient and outpatient services and VIP O&G services) amounted to RMB95.0 million for the Reporting Period (2023: RMB100.0 million), representing a year-on-year decrease of 4.9%. The Group believes the decline is related to the staggering economic environment in the Dongguan region.

Our revenue from reproductive medicine decreased to RMB30.6 million (2023: RMB35.7 million), representing a year-on-year decline of 14.4%. This decrease is primarily attributed to the ongoing decline in the general sentiment towards childbirth and the lingering effects of the pandemic.

Rehabilitation and other Healthcare Services

The Group's rehabilitation and healthcare services segment, represented by Anhui Hualin Group, is operated through two rehabilitation hospitals, a general hospital, an outpatient center, thirteen rehabilitation centers, and one vocational training school. During the Reporting Period, the Group's rehabilitation and other related healthcare services segment recorded a revenue of RMB128.4 million (2023: RMB141.2 million), representing a year-on-year decrease of 9.1%.

於二零二四年,我們貴賓醫療服務業績有所降低,原因為貴賓門診人次及每人次住院平均開支較上年減少。華心樓(康華醫院專門用於貴賓醫療服務的綜合大樓)對我們提供服務的需求(按住院人次計)保持相對穩定,然而每住院人次的平均開支卻顯著下降。於報告期內,貴賓醫療服務(包括貴賓住院及門診服務以及貴賓婦產科服務)的收益為人民幣95.0百萬元(二零二三年:人民幣100.0百萬元),按年計同比下降4.9%。本集團認為,下降與東莞地區經濟環境式微有關。

我們的生殖醫學收益減少至人民幣30.6百萬元(二零二三年:人民幣35.7百萬元),同比下降14.4%,主要是由於普遍的生育情緒持續下降及疫情的後遺症造成。

康復及其他醫療服務

本集團以安徽樺霖集團為代表的康復及醫療服務分部透過兩間康復醫院、一間綜合醫院、一個門診中心、十三間康復中心及一間職業培訓學校運營。於報告期間,本集團康復及其他相關醫療服務分部錄得收益人民幣128.4百萬元(二零二三年:人民幣141.2百萬元),同比下降9.1%。

管理層討論及分析

Anhui Hualin Group employs over 1,000 (2023: 980) staff and has a stable cooperation with the Anhui Disabled Persons Federation and local governments in the provision of training services for the disabled. It is also a major organisation offering children rehabilitation services in Auhui Province, the PRC. As at 31 December 2024, Hefei Kanghua Rehabilitation Hospital and Hefei Jingu Hospital operated a total of 260 registered beds (2023: 250). During the Reporting Period, the rehabilitation hospitals recorded 27,988 outpatient visits (2023: 24,434) and 4,624 inpatient visits (2023: 4,614).

In 2024, a full inspection of hemophilia services by the Hefei Municipal Medical Insurance Bureau led to a suspension of these services, significantly impacting revenue generated from Hefei Jingu Hospital. Efforts to restore operations have included promoting special outpatient services, diagnosis and treatment projects, and medical experts, resulting in increased outpatient volume. Notably, traditional Chinese medicine outpatient visits have risen compared to last year.

Inpatient visit growth and revenue have been restrained by social insurance limits and stricter production safety regulations, leading to fewer work-related injury patients. New DRG regulations implemented in 2024 have kept annual social insurance quotas at last year's levels, impacting revenue forecasts. Although efforts have been made to attract patients from new regions in Anhui, patient volume remains limited, pressuring revenue growth for 2024.

The business environment for children's rehabilitation services remains more favorable than for adults. Measures are being implemented to promote the growth and sustainability of children's rehabilitation centers. The Group continues to monitor the market and seek partnerships with suitable local rehabilitation centers. In 2024, the thirteen rehabilitation centers (including the newly established rehabilitation center under the management of the Hefei Disabled Persons' Federation) admitted a total of 3,493 (2023: 3,277) children with cerebral palsy, autism, hearing impairment and mental retardation, with a year-on-year increase of 6.6% compared to 2023.

During the Reporting Period, revenue from rehabilitation hospital and other healthcare services recorded a year-on-year decrease of 26.4% to RMB54.4 million (2023: RMB73.9 million) and revenue from rehabilitation centres services and other services recorded a year-on-year increase of 10.0% to RMB74.1 million (2023: RMB67.4 million).

安徽樺霖集團擁有超過1,000名員工(二零二三年:980名),並與安徽省殘疾人聯合會及當地政府在提供殘疾人培訓服務方面維持穩定的合作關係。其亦為中國安徽省提供兒童康復服務的主要機構。於二零二四年十二月三十一日,合肥康華康復醫院及合肥金谷醫院共經營260張註冊床位(二零二三年:250張)。於報告期間,康復醫院錄得門診人次及住院人次分別達27,988名(二零二三年:24,434名)及4,624名(二零二三年:4,614名)。

於二零二四年,合肥市醫療保障局對血友病服務進行全面檢查,導致該等服務暫停,對合肥金谷醫院產生的收益造成重大影響。恢復運營的工作包括推廣特殊門診服務、診斷及治療項目以及醫療專家,導致門診量增加。值得注意的是,中醫藥門診人次較去年有所上升。

住院人次增長及收益受到社會保險限額及更嚴格的安全生產法規的限制,導致因工受傷患者減少。二零二四年實施的DRG新法規將年度社會保險配額保持在去年的水平,影響收益預測。儘管已作出努力吸引安徽新地區的患者,但患者數量仍然有限,給二零二四年的收益增長帶來壓力。

兒童康復服務的商業環境仍較成人康復服務更為有利。正在採取措施促進兒童康復中心的成長及可持續發展。本集團繼續監控市場並尋求與合適的當地康復中心建立合作夥伴關係。二零二四年,十三所康復中心(含合肥市殘疾人聯合會管理下新成立的康復中心)共收治腦癱、孤獨症、聽障及智障患兒3,493人(二零二三年:3,277人),較二零二三年同比增長6.6%。

於報告期間,康復醫院及其他醫療服務收益 按年計同比下降26.4%至人民幣54.4百萬元 (二零二三年:人民幣73.9百萬元)及康復中 心服務及其他服務收益按年增長10.0%至人 民幣74.1百萬元(二零二三年:人民幣67.4 百萬元)。

Haemodialysis services segment

The Group's haemodialysis services segment represents the operation of haemodialysis outpatient centres in the PRC. During the Reporting Period, the Group completed the acquisition of 70% equity interest in the Kanghua Haemodialysis Group. As at the date of this report, the Kanghua Haemodialysis Group operates 12 haemodialysis centres, located in Guangzhou (2), Chengdu (3), Shenzhen (1), Foshan (1), Zhongshan (1), Zhuhai (1), Yangjiang (1), Jieyang (1) and Jiangmen (1), serving more than 930 (2023: 730) regular haemodialysis patients. In 2024 (since its acquisition), the haemodialysis outpatient centres had performed more than 118,000 haemodialysis operations as compared with approximately 90,000 haemodialysis operations with 2023, representing a year-on-year growth of over 31.1%.

The Kanghua Haemodialysis Group benefits from a strong recurring patient flow and stable income, as haemodialysis requires ongoing and regular sessions rather than being a one-time treatment. The Group plans to increase its service capacity, thereby expanding its revenue base. For the Reporting Period, the Kanghua Haemodialysis Group generated revenue of RMB75.8 million, which has been consolidated into the Group's annual results. The Board is of the view that the acquisition is expected to enhance the profitability and efficiency of the Kanghua Haemodialysis Group. Although currently loss-making, the haemodialysis services segment is anticipated to generate positive returns for the Company and its Shareholders in the long term.

Elderly Healthcare Services

The Group's elderly healthcare services segment comprised our comprehensive elderly healthcare centre located inside Renkang Hospital, namely, Renkang Elderly Care Centre with the vision of providing quality high-end elderly care services to local residents in Houjie Town, Dongguan City, the PRC.

In 2024, Renkang Elderly Care Centre had a total of 108 (2023: 108) beds with an average length of stay of 113.2 days (2023: 118.2 days) and achieved an average annual bed utilisation rate of 91.0% (2023: 87.9%). Revenue from the provision of elderly healthcare services for the Reporting Period amounted to RMB12.9 million (2023: RMB12.7 million), representing a period-on-period increase of 1.5%, primarily due to improved utilisation during the year. As the operation matures, Renkang Elderly Care Centre continues to gain reputation for its elderly healthcare services in the district. In 2024, the center has placed an emphasis on providing high-quality follow-up services for elderly residents, including traditional Chinese medicine physiotherapy and rehabilitation training. Additionally, the center has strengthened internal management, revising and improving safety protocols and other systems for nursing homes to ensure the standardization and institutionalization of all service aspects. Renkang Elderly Care Centre will continue to focus on enhancing service quality and cooperating with the evaluation process of Guangdong Province's Pension Institution, striving to achieve accreditation as a five-star pension institution.

血液透析服務分部

本集團的血液透析服務分部指中國血液透析門診中心的運營。於報告期間,本集團完成收購康華血液透析集團的70%股權。於本報告日期,康華血液透析集團經營12家)、成都(3家)、深圳(1家)、佛山(1家)、中山(1家)、珠海(1家)、陽江(1家)、揭陽(1家)及江門(1家),服務930(二零二三年:730)多名定期血液透析患者。於二零二四年(自收購起),血液透析門診中心已施行血液透析手術超過118,000例,而二零二三年施行的血液透析手術則約為90,000例,同比增長超過31.1%。

康華血液透析集團受益於強勁的複發性患者流及穩定的收入,原因為血液透析需要持續且定期的治療,而非一次性治療。本集團計劃增加其服務能力,從而擴大收益基礎。於報告期間,康華血液透析集團產生收益公民幣75.8百萬元,已於本集團年度業績高康立流透析集團的盈利能力及效率。儘管血液透析服務分部目前處於虧損狀態,但就長期而言,預計將為本公司及其股東產生正回報。

老年醫療服務

本集團的老年醫療服務分部,包括在仁康醫院綜合性的老年保健中心,即仁康護理院, 旨在向中國東莞市厚街鎮的當地居民提供 優質高端養老服務。

於二零二四年,仁康護理院共有床位108張 (二零二三年:108張),平均住院時間113.2 天(二零二三年:118.2天)且獲得床位年均 利用率達到91.0%(二零二三年:87.9%)。報 告期間提供老年醫療服務的收入為人民幣 12.9百萬元(二零二三年:人民幣12.7百萬 元),同比增長1.5%,主要由於年內利用率 提升所致。隨著運營的成熟,仁康護理院持 續在當地的老年醫療服務方面享有盛譽。於 二零二四年,該中心重點為老年居民提供高 質量的後續服務,包括中醫理療及康復訓練。 此外,該中心亦加強內部管理,修訂及完善 療養院安全規程等制度,確保各方面服務規 範化、制度化。仁康護理院將繼續著重提升 服務質量,並配合廣東省養老機構的評估流 程,努力實現五星級養老機構認證。

Industry Outlook and Strategy

China's medical reform is rapidly advancing towards establishing a high-quality and efficient healthcare system with unique Chinese characteristics. As a leading healthcare service provider, the Group embraces these opportunities and challenges by adhering to professional, standardized, and differentiated management services. During the Reporting Period, we focused on enhancing hospital management, improving the quality of comprehensive medical services, and promoting development in standardization, specialization, and branding.

In late June 2024, a national conference on China's health development and healthcare reform discussed topics including public hospital reforms, medicine supply, and social insurance. China aims to improve access to public healthcare services, especially at the primary level, and reduce patients' financial burdens in 2024. The reform tasks include enhancing public healthcare services, developing public hospitals, and reforming medicine-related policies. The current year's reforms have also emphasized medical technological progress, multi-tiered diagnosis and treatment, and digitalized services.

The National Healthcare Security Administration's "Three-Year Action Plan for DRG/DIP Payment Reform" mandates that Diagnosis-Related Groups (DRG)/Diagnosis-Intervention Packet (DIP) payment models have been implemented in all planning areas at the end of 2024 and will cover all qualified medical institutions providing inpatient services by the end of 2025. This plan promotes transparency and efficiency in medical insurance, requiring high standards from private medical institutions and attracting patients with long-term and complex illnesses.

行業前景及策略

中國的醫療改革正朝著建立具有中國特色的優質高效的醫療體系快速推進。作為領先的醫療服務提供商,本集團通過秉承專業化、規範化及差異化的管理服務把握該等機遇及挑戰。於報告期內,我們重點加強醫院管理,提高綜合性醫療服務質量,促進規範化、專業化、品牌化發展。

於二零二四年六月下旬,中國衞生發展和醫療改革全國會議討論公立醫院改革、藥品供應、社會保險等議題。中國旨在於二零二四年改善公共醫療服務的可及性,特別是基層,並減輕患者的經濟負擔。改革任務包括加強公共醫療服務、發展公立醫院、改革醫藥相關政策。今年的改革亦強調醫療技術進步、多層次診斷治療及數位化服務。

國家醫療保障局《DRG/DIP支付方式改革三年行動計劃》要求,二零二四年底在所有規劃區域實施診斷相關分組(DRG)/按病種分值付費(DIP)模式,到二零二五年底,覆蓋所有提供住院服務的合資格醫療機構。該計劃提高了醫療保險的透明度及效率,要求私立醫療機構保持高標準,並吸引長期患有複雜疾病的患者。

管理層討論及分析

Looking forward into 2025, we anticipate that China's hospital reform will continue to focus on:

- Healthcare Accessibility: Improving access to services, particularly in rural and underserved areas, by increasing community health centers and enhancing telemedicine.
- Quality of Care: Standardizing and improving care quality through stricter regulations and performance evaluations.
- Integration of Services: Enhancing integration between primary, secondary, and tertiary healthcare services to improve referral systems and continuity of care.
- Digital Health: Prioritizing the adoption of digital technologies, including electronic health records (EHRs) and Al-driven diagnostics, to streamline operations and improve outcomes.
- Insurance Reforms: Expanding social insurance coverage and improving reimbursement rates to make medical services more affordable and accessible.

Healthcare expenditure in China is projected to reach RMB205 trillion by 2030. Despite recent challenges, the Board is positive on the healthcare sector for 2025.

Our Strategy

In 2025, our Group intends to capitalise on industry opportunities through the following measures:

Continue to strengthen the development of key specialties: Enhance the construction of key specialty departments such as the Cardiovascular Center, Plastic and Cosmetic Surgery, Obstetrics and Gynecology, Health Management Center, Rehabilitation Medicine, Hematology and Lymphoma, Digestive Diseases Center, Laboratory, Oncology Precision Treatment Center, Breast Center, and General Surgery. Introduce and cultivate prominent leaders in these fields, further optimize the specialty layout, build top-notch specialized departments, and lead the hospital's development.

展望二零二五年,我們預計中國的醫院改革將繼續集中在以下方面:

- 醫療可及性:通過增加社區衛生中心及加強遠程醫療,改善服務的可及性, 特別是在農村及服務不足的地區。
- *護理質量*:通過更嚴格的法規及績效 評估來規範及提高護理質量。
- 服務整合:加強一級、二級及三級醫療服務之間的整合,以改善轉診系統及護理的連續性。
- 數字健康:優先採用數字技術,包括 電子健康記錄(EHR)及人工智能驅動 的診斷,以簡化操作及改善結果。
- 保險改革:擴大社會保險的涵蓋範圍並提高報銷率,使醫療服務更實惠且更容易獲得。

預計到二零三零年,中國的醫療開支將達到 人民幣205萬億元。儘管近期面臨挑戰,董 事會對二零二五年的醫療保健行業持樂觀 態度。

我們的策略

二零二五年,本集團擬透過以下措施把握行 業機遇:

繼續加強重點專科的建設。加強心血管中心、整形美容科、婦產醫學科、健康管理中心、康復醫學科、血液淋巴瘤科、消化疾病中心、檢驗科、腫瘤精準診療中心、乳腺中心、普通外科等重點專科的建設;引進與培養學科帶頭人,進一步優化專科佈局,打造高峰學專科,引領醫院發展。

Comprehensively advance the "infection control" initiative to increase healthcare workers' awareness of hospital infections and ensure surgical quality and safety. Enhance the organizational system for nursing quality control and the construction of nursing quality, continuously upgrading nursing standards. Strengthen the management of rational drug use.

Revenue from the Group's hospital services amounted to RMB1,838.5 million (2023: RMB1,887.9 million), representing a year-on-year decrease of 2.6% and accounting for 89.4% (2023: 92.5%) of the total revenue of the Group.

Revenue from hospital services comprised (i) revenue from inpatient healthcare services amounted to RMB1,086.4 million (2023: RMB1,079.6 million), representing a year-on-year increase of 0.6%, accounting for 52.8% (2023: 52.9%) of the total revenue of the Group; (ii) revenue from outpatient healthcare services amounted to RMB644.9 million (2023: RMB656.0 million), representing a yearon-year decrease of 1.7%, accounting for 31.4% (2023: 32.1%) of the total revenue of the Group; and (iii) revenue from physical examination services amounted to RMB107.2 million (2023: RMB152.3 million), representing a year-on-year decrease of 29.6%, accounting for 5.2% (2023: 7.5%) of the total revenue of the Group. The decrease in revenue from hospital services is primarily attributable to (i) the decline in revenue of our major medical disciplines, in particular, physical examination, paediatrics related disciplines, emergency medicine related disciplines, orthopaedics related disciplines and cardiovascular related disciplines; (ii) the decrease in patient average spending across all of our major service offerings; and (iii) despite the increase in the number of inpatient and physical examination visits during the Reporting Period. The decline in average spending is primarily due to downward adjustments in payment rates for different DRG groups and tightened social insurance payment quotas under the DIP model implemented by the Ministry of Human Resources and Social Security. Additionally, the significant drop in revenue from physical examinations is due to fewer examination tasks performed per patient during the Reporting Period. Recent reforms and tightened social insurance payments are expected to continue to put a pressure on our revenue growth. With recent intensified national policy reforms, decrease in post-COVID-19 related demand and industry adjustments, the Group's revenue of our self-owned hospitals experienced a year-on-year decline. In particular, the changes in healthcare, pharmaceuticals, and the "Three Medical" policies have altered the existing management models and performance evaluation systems of healthcare institutions, presenting new opportunities and challenges to the Group.

本集團醫院服務的收益為人民幣1,838.5百萬元(二零二三年:人民幣1,887.9百萬元),按年計同比下降2.6%,佔本集團總收益89.4%(二零二三年:92.5%)。

醫院服務的收益包括:(i)住院醫療服務的 收益人民幣1.086.4百萬元(二零二三年: 人民幣1,079.6百萬元),按年計同比上升 0.6%, 佔本集團總收益52.8%(二零二三 年:52.9%);(ii)門診醫療服務的收益人民幣 644.9 百萬元 (二零二三年: 人民幣 656.0 百 萬元),按年計同比下降1.7%,佔本集團總 收益31.4%(二零二三年:32.1%);及(iii)體檢 服務的收益人民幣107.2百萬元(二零二三 年:人民幣152.3百萬元),按年計同比減少 29.6%, 佔本集團總收益5.2%(二零二三年: 7.5%)。醫院服務收益減少主要由於:(i)我 們主要醫療科室收益減少,特別是體檢、兒 童醫學有關科室、急診有關科室、骨科有關 科室及心血管有關科室;(ii)我們所有主要服 務項目的患者平均開支減少;及(iii)儘管於 報告期間住院及體檢人次增加。平均開支下 降主要是由於人力資源和社會保障部實施 的DIP模式下不同DRG分組的支付費率下調 及社保支付配額收緊。此外,體檢人次的收 益大幅下降乃由於報告期內每名患者進行的 體檢項目減少所致。近期的改革及社會保險 支付收緊預計將繼續使我們的收益增長承壓。 隨著近期國家政策改革力度加大、COVID-19 後相關需求減少及行業調整,本集團自有醫 院收益出現按年計同比下降。尤其是醫療、 醫藥及「三醫」政策變化,改變醫療機構現 有的管理模式及績效考核體系,為本集團帶 來新的機遇與挑戰。

管理層討論及分析

Revenue from rehabilitation and other healthcare services amounted to RMB128.4 million (2023: RMB141.2 million), representing a year-on-year decrease of 9.1%, accounting for 6.2% (2023: 6.9%) of the total revenue of the Group. Revenue from rehabilitation and other healthcare services comprised (i) revenue from rehabilitation hospital and other healthcare services amounted to RMB54.4 million (2023: RMB73.9 million), representing a year-on-year decrease of 26.4% and (ii) revenue from rehabilitation centres services and other services (in particular our children rehabilitation operations) amounted to RMB74.1 million (2023: RMB67.4 million), representing a year-on-year increase of 10.0%. The decrease in revenue is mainly attributable to (i) the suspension of our hemophilia services at our rehabilitation hospitals due to regular inspection by the local government authority; (ii) recent reforms and policy implementation in payment rates adjustments as well as restrictions on annual social insurance payout quotas; and (iii) despite the increase in patient visits and revenue from our children rehabilitation centres operations.

Revenue from haemodialysis services amounted to RMB75.8 million (2023: nil), accounting for 3.7% (2023: nil) of the total revenue of the Group. The haemodialysis services segment was newly acquired by the Group in January 2024 and is still operating at loss. The Board is optimistic that the haemodialysis services segment will be one of the key revenue drivers of the Group in the medium to long term.

Revenue from elderly healthcare services represented the provision of elderly healthcare services at Renkang Elderly Care Centre, which amounted to RMB12.9 million (2023: RMB12.7 million), representing a year-on-year increase of 1.5%, accounting for 0.6% (2023: 0.6%) of the total revenue of the Group. The relatively stable revenue level is mainly attributable to the maturing business operation of Renkang Elderly Care Centre which is already operating at our maximum capacity.

Cost of Revenue

Cost of revenue of the Group's hospital services segment (consisting of inpatient healthcare services, outpatient healthcare services and physical examination services) primarily consisted of cost of pharmaceuticals and medical consumables, staff cost, depreciation and amortisation, service expenses, utilities expenses, rental expenses and other costs. Cost of revenue of the Group's hospital services segment amounted to RMB1,549.8 million (2023: RMB1,554.8 million), representing a year-on-year decrease of 0.3%. The decrease in cost of revenue of our hospital services segment is mainly attributable to the decrease in operation in all of our self-owned hospitals with drop in cost of pharmaceuticals and medical consumables, however, partly offset by the increase in direct staff related costs and rental expenses during the Reporting Period. The rise in direct staff-related costs reflects ongoing pressure in staff retention expenses and a shortage of qualified professionals in the market. Additionally, Kangxin Hospital continued to operate at a negative gross margin during the Reporting Period.

康復及其他醫療服務的收益為人民幣128.4 百萬元(二零二三年:人民幣141.2百萬元), 按年計同比減少9.1%,佔本集團總收益6.2% (二零二三年:6.9%)。康復及其他醫療服務 的收益包括(i)來自康復醫院及其他醫療服務 的收益人民幣54.4百萬元(二零二三年:人 民幣73.9百萬元),按年計同比下降26.4%; 及(ii)康復中心服務及其他服務(尤其是我們 的兒童康復業務)的收益人民幣74.1百萬元 (二零二三年:人民幣67.4百萬元),按年計 同比增加10.0%。收益減少主要是由於(i)我 們康復醫院的血友病服務因當地政府部門 的定期檢查而暫停;(ii)近期在付費費率調整 方面的改革及政策實施以及年度社會保險 賠付額度的限制;及(iii)儘管我們的兒童康 復中心業務的就診人次及收入有所增加。

血液透析服務的收益為人民幣75.8百萬元(二零二三年:無),佔本集團總收益的3.7%(二零二三年:無)。血液透析服務分部為本集團於二零二四年一月新收購的分部,目前仍處於虧損狀態。董事會樂觀認為血液透析服務分部將成為本集團中長期的主要收益來源之一。

來自老年醫療服務的收益指在仁康護理院 提供老年醫療服務的收益人民幣12.9百萬元 (二零二三年:人民幣12.7百萬元),按年計 同比增長1.5%,佔本集團總收益的0.6%(二 零二三年:0.6%)。收益水平相對穩定,主 要歸因於仁康護理院業務運營日趨成熟,已 達到我們的最大運營能力。

管理層討論及分析

Cost of revenue of the Group's rehabilitation and other healthcare services segment amounted to RMB101.8 million (2023: RMB114.4 million), representing a year-on-year decrease of 11.1%, and primarily consisted of staff costs, medical consumables, depreciation, utilities and rental expenses. Staff costs are salaries and benefits for healthcare professionals, including physical therapists, occupational therapists, speech therapists, and nursing staff involved in patient care. Medical consumables are therapeutic supplies associated with purchasing and maintaining rehabilitation equipment (e.g., treadmills, weights and adaptive devices) and consumable supplies. The decrease in the cost of revenue for our rehabilitation and healthcare services segment is primarily due to reduced operations at Hefei Jingu Hospital as a result of the suspension of hemophilia services during the Reporting Period.

Cost of revenue of the Group's haemodialysis services segment amounts to RMB74.3 million (2023: nil) and primarily consisted of staff costs, medical consumables, depreciation, utilities and rental expenses. Direct staff costs include expenses related to the salaries and benefits of healthcare professionals, such as nephrologists, nurses, and technicians who provide dialysis treatments. Medical consumables refer to medical supplies and costs associated with the purchases and maintenance of dialysis machines, tubing, filters, and other consumables necessary for each treatment session. Facility overhead such as utility expenses relates to the operational costs of the dialysis centres, including rent, water and electricity and maintenance of the facility. Other costs are expenses related to ancillary services, such as lab tests and cleaning and waste treatment.

Cost of revenue of the Group's elderly healthcare services represents direct operating costs at Renkang Elderly Care Centre, which amounted to RMB7.9 million (2023: RMB8.2 million), representing a year-on-year decrease of 4.1%, which primarily consisted of cost of services including direct staff cost, consumables and cost of meals incurred at the centre. There were no significant changes in cost of revenue as the centre had been operating at high utilisation.

During the Reporting Period, costs of pharmaceuticals, costs of medical consumables and staff cost accounted for approximately 25.4% (2023: 26.6%), 25.9% (2023: 26.0%) and 34.3% (2023: 33.0%), respectively, of the total cost of revenue of the Group. The proportion of cost of pharmaceuticals and medical consumables as percentage of total cost of revenue recorded a decrease during the Reporting period, which is mainly attributable to the decrease in operations of our hospital services segment. Our total staff-related costs, including salaries, bonuses, and other benefits, increased by 7.4% compared to the prior year. This increase is primarily attributable to (i) higher salary levels, retention costs, and a shortage of professional medical staff in the market; and (ii) the impact in acquisition of the Kanghua Haemodialysis Group during the Reporting Period.

本集團的康復及其他醫療服務分部的收益 成本為人民幣101.8百萬元(二零二三年:人 民幣114.4百萬元),按年計同比減少11.1%, 主要包括員工成本、醫療耗材、折舊、員 費及租金開支。員工成本為醫療專業人員 括物理治療師、職業理療師、語言治療區利 參與患者護理的護理人員)的工資及福利 參療耗材為與購買及維護康復設備(例療 多療耗材為與購買及維護康復設備(例療 步機、舉重器及適應性設備)相關的治治 資及消耗品。我們的康復及醫療服務分部的 收益成本減少乃主要由於報告期間合肥金谷 醫院因血友病服務暫停而導致業務減少所致。

本集團老年醫療服務的收益成本指仁康護理院直接運營成本人民幣7.9百萬元(二零二三年:人民幣8.2百萬元),按年計同比下降4.1%,主要包括服務成本,包括直接員工成本、消耗品及該中心產生的餐費。收益成本並無發生重大變動,乃由於該中心以高利用率營運。

於報告期間,藥品成本、醫療耗材成本及員工成本分別佔本集團總收益成本約25.4%(二零二三年:26.6%)、25.9%(二零二三年:26.0%)及34.3%(二零二三年:33.0%)。於報告期間,藥品及醫療耗材成本佔總收益成本的比例錄得減少,這主要是由於醫院服務分部業務減少。我們的總員工相關成本(包括薪金、花紅及其他福利)較上一年度上升7.4%。該增加乃主要由於報告期內(i)薪金水平、保留成本上升以及市場上專業醫務人員短缺;及(ii)收購康華血液透析集團的影響。

The overall gross profit margin declined to 15.7% (2023: 17.8%), primarily due to: (i) the decrease in revenue from our hospital services segment; (ii) the decrease in the average patient spending from our inpatient and physical examination services; (iii) the impact in acquisition of the haemodialysis services business in January 2024; and (iv) the deterioration in financial performance of Kangxin Hospital, which is still operating at a negative gross margin.

Net Provision of Impairment Losses under Expected Credit Loss (ECL) Model

During the Reporting Period, impairment losses under expected credit loss model recorded a net provision of RMB4.3 million (2023: RMB2.8 million). The net provision for the Reporting Period was mainly attributable to (i) an increase in the overall balance of accounts and other receivables at the end of the Reporting Period (with the effects of acquisition of the Kanghua Haemodialysis Group); and (ii) increases in the Group's accounts receivable aging and deterioration in credit rating of certain corporate customers and outstanding debts from patients. In the past years, the Group has increased its efforts to recover overdue debts, including recovering receivables from patients through legal actions, as well as tightening credit reviews given to corporate customers.

The Group collectively assesses ECL for the accounts and other receivables, except for accounts receivable from the PRC government's social insurance scheme and certain credit impaired debtors which are assessed for ECL individually. The provision rates are based on internal credit ratings as groupings of various receivables that have similar loss patterns. The collective assessment is based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and available without undue costs or effort. At every reporting date, the historically observed default rates are reassessed and changes in the forward-looking information are considered.

The management of the Group closely monitors the credit quality of accounts and other receivables and considers the debts that are neither past due nor impaired to be of a good credit quality. Receivables that were neither past due nor impaired related to the customers and debtors for whom there was no history of default. As part of the Group's credit risk management, the Group uses receivables' ageing to assess the impairment for its receivables except for accounts receivable from the PRC government's social insurance schemes and certain credit impaired debtors of which ECL are assessed individually. These receivables consist of a large number of small patients with common risk characteristics that are representative of the patients' abilities to pay all amounts due in accordance with the contractual terms.

預期信貸虧損模式項下之減值虧損撥備 淨額

於報告期間,預期信貸虧損模式項下之減值 虧損錄得撥備淨額人民幣4.3百萬元(二零 二三年:人民幣2.8百萬元)。報告期間撥備 淨額主要由於(i)報告期間末應收賬款及其機 應收款項的整體結餘增加(收購康華血液 無團的影響);及(ii)本集團應收賬款與 新集團的影響);及(ii)本集團應收賬款 驗增加、部分企業客戶信用等級下降及 大價還債務。於過往年度,本集團加大的應 收回逾期債務,包括透過法律行動收回 患者款項,以及收緊對企業客戶的信貸審查。

本集團就應收賬款及其他應收款項共同評估預期信貸虧損,惟中國政府社會保險計劃及若干獨立評估預期信貸虧損的信貸減值債務人的應收賬款除外。撥備率以內部信貸虧級為基礎,作為具有類似虧損模式的各類應收款項的分組。共同評估以本集團的歷史違約率為基礎,並考慮合理且無需不必要的成本或努力即可獲得之前瞻性資料而作出。在各報告日期,重新評估歷史可觀察的違約率,並考慮前瞻性資料的變動。

- (iv) Exchange (gain)/loss represents the financial impact in movements of exchange rates primarily on the Group's fixed bank deposits which is denominated in Hong Kong dollars. Other than the fixed bank deposits, the Group does not have other significant foreign currency denominated financial assets and liabilities. In the opinion of the Directors, such exchange gains or losses associated with fixed bank deposits are not reflective of the daily business operations of the Group, and the removal exchange gains or losses would enable the users of the financial information to better understand the core operating performance of the Group.

企業管治報告

The Board has in place internal control procedures in ensuring any continuing connected transactions are conducted in compliance with their terms and the applicable requirements under the Hong Kong Listing Rules.

An internal audit function has been established to perform regular financial and operational reviews and recommend necessary actions to the relevant management. The internal audit function is to ensure the risk management and internal control procedures are in place and function properly as intended. The internal audit function also reviews the continuing connected transactions of the Group and the adequacy and effectiveness of the relevant internal control procedures. The results of the internal audit are reported to the Audit Committee. The independent non-executive Directors, in performing their review of the continuing connected transactions of the Group, also take into account the findings of the internal audit function.

Clinical risks are particularly relevant to the Group's hospital operations and a key area of the Group's clinical governance. The Group has adopted a three-tier risk management approach to identify, assess, mitigate and handle these risks. At the first line of defence, the hospitals' front-line staff, guided by clearly defined procedures, are responsible for identifying, assessing and monitoring risks associated with day-to-day operations. The hospital managers and executives, as the second line of defence, implement rules and procedures, provide coaching and support, and deal with, and analyse unusual and unexpected fact patterns and outcomes detected or anticipated by their staff. They ensure that risks are within the acceptable range in the ordinary course of business and that the first line of defence is effective. They also continuously benchmark against international best practice and collate lessons learnt from past incidents to identify areas of improvements. As the final line of defence, the Audit Committee and the internal audit function of the Company ensure that the first and second lines of defence are effective through constant inspection, monitoring and making recommendations to improve the relevant processes. On an ongoing basis, each hospital of the Group reviews and assesses the status of potential risks which may impact on its ability to achieve its business objectives and/or those of the Group. This review process includes assessment as to whether the existing system of internal controls continues to remain relevant, adequately addresses potential risks, and/or should be supplemented. The results of these reviews are regularly reported to the senior management and the Board. Such top-down and company-wide risk management system is intended to cover every aspect of the Group's clinical operations.

The Board from time to time and at least annually reviews the significant risk factors affecting the operations of the Group as a whole and is cognizant that the unprecedented COVID-19 pandemic has become a relevant risk factor to the hospital operations (including, in particular, the health and safety of patients and staff) of the Group. Although the COVID-19 pandemic in the PRC was ended; it remains to be seen whether similar pandemic will emerge in the future, which could result in material and long-term disruptions to the Group's operations.

董事會不時且至少每年審查影響本集團整體運營的重大風險因素,並認識到空前的COVID-19疫情已成為本集團醫院運營的相關風險因素(包括(尤其是)病人及醫護人員的健康及安全)。儘管COVID-19疫情被認為在中國已被遏制/控制,惟日後是否會出現類似疫情,從而嚴重及長期中斷本集團的運營尚待觀察。

2. ENVIRONMENTAL PROTECTION

The Group regularly keeps track of the latest national and regional environmental laws and regulations and adopts all necessary measures to comply with them. The Board considers that wastewaters and solid wastes (particularly medical wastes) produced by the Group's hospitals and operating facilities are particularly relevant to environmental protection. The Group is compliant with applicable laws and regulations, including, the Law of the PRC on the Prevention and Control of Water Pollution, the Regulations on Urban Drainage and Sewage Treatment, the Regulations on the Management of Medical Waste and the Law of the PRC on the Prevention and Control of Environmental Pollution by Solid Waste in all material respects. During the year ended 31 December 2024, the Group had not been subject to any material penalties in relation to environmental protection.

Developing sustainable best practices requires modification of staff behavior, and this occurs most frequently through ongoing staff education. Education and supporting processes are one of the most critical elements to effective implementation of environmental protection initiatives and reduction in environmental footprint.

In particular, with the outstanding performance of Kanghua Hospital in the National Greening Action promoted by the PRC, it was recognised as the "Model National Greening Unit", which is one of the few Grade A Class III hospital in the PRC bestowed with such award. Kanghua Hospital has achieved a green space and greening coverage ratio of over 60%, providing patients with a pleasant hospital environment surrounded by greenery. In 2024, Kanghua Hospital was assessed as Dongguan City's "Guanxianghua" domestic waste classification specialty hospital as a testament to our efforts in environment awareness and protection.

2.1 Wastewaters

Hospitals discharge considerable amounts of chemicals and microbial agents in their wastewaters. Many substances contained in the wastewaters, such as chemicals, medicine residues as well as pathogenic resistant bacteria and viruses, resist normal wastewater treatment and could pose a danger to public health and the environment if released untreated into the public sewer system. Due to the chemical and biochemical contaminants, the wastewaters treatment requires specialised technologies and processes that cannot be feasibly conducted at the source. The Group engages a qualified and licensed service provider to process all of the wastewaters produced by its hospitals. Before the wastewaters are processed by the service provider, they are stored in dedicated facilities to ensure they will not contaminate the primary water supply for human consumption and clinical use.

2. 環境保護

制定可持續最佳做法需要改變員工的行為,而這最常見的方法是持續的員工教育。教育及支持過程是有效實施環保舉措及減少環境足跡的最關鍵因素之一。

尤其是,康華醫院憑借在中國推進國土綠化行動中傑出的表現國內其中學出的表現國內其中學數獲此殊榮的三級甲等醫院.康華醫營造了一個超過60%的綠地了一個超過60%的綠地了一個經濟之一個超過時期,為患者提供了一個綠年的就醫環境。二零香花」生不康華醫院獲評為東莞市「莞香花」生環境意識及保護方面的努力。

2.1 污水

醫院在其污水中排放大量的化學 物質及微生物劑。污水中含有的 許多物質,如化學藥品、藥物殘 留物、致病性耐藥菌及病毒,抵 禦正常的污水處理,如未經處理 進入公共污水系統,可能對公共 衛生及環境造成危害。由於化學 及生物化學污染物,污水處理需 要專門的技術及過程,該等技術 及過程在源頭上或不可行。本集 團委聘合資格且持牌的服務提供 商處理其醫院產生的所有污水。 於污水經服務提供商處理之前, 將其存放在專用設施中,以確保 不會污染用於人類飲用及臨床使 用的原生水供應。

環境、社會及管治報告

The table below sets forth the discharge volume of wastewaters by the Relevant Operations for the years indicated: 下表載列於所示年度有關經營業務的污水排放量:

		Change 變動	2024 二零二四年	2023 二零二三年
Wastewaters discharge (ton)	污水排放(噸)	+29.5%	521,529	402,877
Wastewaters discharge per gross floor area (ton/gross floor area)	每建築面積的污水排放 (噸/建築面積)	+26.2%	0.98	0.77

The increase in wastewaters discharge in 2024 was primarily due to the increase in water usage by the Relevant Operations of the Group in particular due to the acquisition of our haemodialysis services operations in January 2024 which resulted in the increase in the overall water usage during the year.

The discharge of wastewaters is integral to the Group's clinical operations and is generally expected to increase in line with business growth. The management does not currently consider that it is feasible to implement any initiatives or policies to control or reduce the amount of wastewaters discharge without compromising sanity and clinical safety, which are of overriding importance to public health and safety. The Group regularly reviews its wastewaters treatment protocols with a view to ensuring there is no inadvertent contamination of its water supply and that the wastewaters will be properly handled by the hospitals and haemodialysis outpatient centers before treated by the service provider. The management believes that the wastewaters produced by the hospitals and haemodialysis outpatient centers, after properly treated by the service provider, will pose minimal risks to the environment.

於二零二四年的污水排放增加主要由於本集團有關經營業務的 用水量增加,尤其是由於在二零 二四年一月收購血液透析服務業 務,致使年內整體用水量增加。

2.2 Hazardous solid wastes

Hospital operations, in general, generate a variety of solid medical wastes in the diagnosis, treatment or immunization of patients or in research that can pose a danger to public health and the environment if not properly treated and disposed of. Materials containing pathogens are infectious can cause diseases if exposed. These include:

- human anatomical waste: waste from surgery and autopsies on patients with infectious diseases;
- sharps: disposable needles, syringes, saws, blades, broken glasses, nails or any other item that could cause a cut; and
- pathological: tissues, organs, body parts, human flesh, fetuses, blood and body fluids.

Non-infectious but hazardous wastes include:

- pharmaceuticals: drugs and chemicals that are returned from wards, spilled, outdated, contaminated, or are no longer required; and
- radioactive: wastes contaminated with radioactive substances used in diagnosis and treatment of diseases.

The Group's hospitals and haemodialysis outpatient centers have in place a comprehensive medical waste management system:

 Identification and segregation of waste types: segregation of different types of wastes at source (wards, operation theaters, laboratories, examination rooms etc.) with color coding systems and clear operation guidelines and handbooks, supervised by responsible staff. Effective segregation diminishes total waste and the hospital's environmental footprint;

2.2 有害固體廢物

一般而言,醫院業務在患者的診斷、治療或免疫接種或研究中產生各種固體醫療廢物,如不妥善處理及處置,可對公共衛生及環境構成危害。含有病原體的物質具傳染性,如暴露在外,則會造成疾病。該等物質包括:

- 人體解剖廢物:傳染病患 者手術及屍體解剖的廢物;
- 鋭器:一次性針頭、注射器、 鋸、刀片、破碎的玻璃、指 甲或任何可能導致割傷的 物品:及
- 病理:組織、器官、身體部位、人體、胎兒、血液及體液。

非傳染性但有害廢物包括:

- 藥品:從病房退回、溢出、 過期、被污染或不再需要 的藥物及化學藥品;及
- 放射性:用於疾病診斷及 治療的放射性物質污染的 廢物。

本集團醫院及血液透析門診中心 已制定一套全面的醫療廢物管理 制度:

1. 廢物類型的識別及分離: 以顏色編碼系統及明確的 操作指引及手冊在負責監督下從源頭(病房、手 員監督下從源頭(病房室等) 所室、化驗室,檢查室有數 分離不同類型廢物總量及醫 院的環境足跡;

環境、社會及管治報告

- Transport & storage of waste: use of puncture proof and leak proof containers; bags are properly tied and sealed; use of special containers for radioactive wastes; use of designated transport trolleys and timely collection; and storage in covered areas remote from normal passages with security measures to prevent unauthorized tempering;
- 3. Identify the need for use of personal protective equipment: special clothing, gloves, masks and eye protection identified and provided to the healthcare works responsible for waste transportation and disposal; and
- 4. Proper disposal of waste: collection and subsequent disposal by qualified and licensed service provider (including incineration, landfill or chemical/biochemical treatment, as appropriate to the type of wastes) specialized in medical wastes disposal. On account of the hazardous nature of these wastes, they are not typically recycled.

The table below sets forth the volume of hazardous solid medical wastes produced by the Relevant Operations for the years indicated:

- 3. 識別使用個人防護裝備的需要:識別並向負責廢物運輸及處置的醫療人員提供特殊服裝、手套、口罩及眼睛保護;及
- 4. 妥善處理廢物:由專業從 事醫療廢物處理的合資格 且持牌服務提供商(包括適 用廢物類型的焚化、填 或化學/生物化學處理)的 收集及後續處置。由於該 等廢物具有有害性,通常 不可回收再利用。

下表載列於所示年度有關經營業 務產生的有害固體醫療廢物量:

		Change 變動	2024 二零二四年	2023 二零二三年
Hazardous solid wastes (kg) Hazardous solid wastes per gross floor area (kg/gross floor area)	有害固體廢物(公斤) 每建築面積的 有害固體廢物	+1.1%	498,344	492,707
	(公斤/建築面積)	-1.4%	0.933	0.947

The increase in hazardous solid medical wastes produced in 2024 was primarily due to the acquisition of our haemodialysis services operations in January 2024, which increased the use of personal protective equipment and production of medical wastes.

二零二四年產生的有害固體醫療 廢物量增加主要由於在二零二四 年一月收購血液透析服務業務, 增加了個人防護裝備的使用及醫 療廢物的產生。

環境、社會及管治報告

The disposal of hazardous solid medical wastes is integral to the Group's clinical operations and is generally expected to increase in line with business growth. The management does not currently consider that it is feasible to implement any initiatives or policies to control or reduce the production of hazardous solid wastes without compromising sanity and clinical safety, which are of overriding importance. For example, many surgical tools, protective masks and gloves and syringes are strictly for one-time use only; extending their use may reduce waste production but is not clinically acceptable as it significantly increases the risks of cross-infection among patients and staff. The Group regularly reviews its waste management system with a view to ensuring that all of the steps in the chain are properly followed with the safety of the patients and staff as top priority. One of the key steps in managing the hazardous wastes is proper identification and segregation because: (i) this ensures no hazardous wastes are inadvertently mixed with domestic wastes and disposed without proper treatment, potentially posing harm to public safety and environment; and (ii) the service provider processes the wastes collected according to the identification and segregation by the hospitals. The hospitals have a responsibility and accountability system for waste management at the source and provide regular trainings to the front-line staff to ensure that the guidelines and handbooks are strictly adhered. The management believes that the hazardous solid wastes produced by the hospitals and haemodialysis outpatient centers, after properly treated by the service provider, will pose minimal risks to the environment.

棄置有害固體醫療廢物是本集團 臨床業務的組成部分,一般預計 會隨著業務增長而增加。管理層 目前認為,在不影響衛生及臨床 安全(其至關重要)情況下實行任 何舉措或政策來控制或減少有害 固體廢物產牛量不可行。例如, 許多手術工具、防護口罩及手套 和注射器嚴格僅用於一次性使用; 延長其使用可能會減少廢物產生 量,但從臨床上不可接受,因為 這將大幅增加患者與員工之間交 叉感染的風險。本集團定期檢討 其廢物管理制度,確保以患者及 員工安全為首要任務,妥善遵循 整個環節中的所有步驟。管理有 害廢物的關鍵步驟之一是適當識 別及分離,因為:(i)這將確保有 害廢物不會無意中與生活垃圾混 合及在沒有妥善處理情況下進行 處置,可能危及公共安全與環境; 及(ii)服務提供商根據醫院的識別 及分離處理所收集的廢物。醫院 從源頭定有廢物管理責任追究制 度,定期向前線人員進行培訓, 確保嚴格遵守指引及手冊。管理 層認為,醫院及血液透析門診中 心產生的有害固體廢物經服務提 供商妥善處理後,對環境構成的 風險微平其微。

環境、社會及管治報告

2.3 Domestic wastes

The Group's operations generate domestic wastes that are non-infectious and non-hazardous from the offices, dormitories, kitchens, rooms, including bed linens, utensils, paper, etc. These wastes are identified and segregated at source and are eventually collected, treated and recycled by general wastes service providers.

The table below sets forth the volume of domestic wastes produced by the Relevant Operations for the years indicated:

2.3 生活垃圾

本集團的業務從辦公室、宿舍、 廚房、房間產生非傳染性且非有 害性的生活垃圾,包括床上用品、 餐具、紙張等。該等垃圾從源頭 予以識別及分離,最終由一般廢 物服務提供商收集、處理及回收 再利用。

下表載列於所示年度有關經營業 務產生的生活垃圾量:

		Change 變動	2024 二零二四年	2023 二零二三年
Domestic wastes (kg)	生活垃圾(公斤)	-1.7%	2,643,032	2,689,119
Domestic wastes per gross floor area (kg/gross floor area)	每建築面積的生活垃圾 (公斤/建築面積)	-4.2%	4,950	5.166

The decrease in domestic wastes produced in 2024 was primarily due to the decrease in the volume of pandemic prevention materials used by the Relevant Operations of the Group, together with the Group's stringent cost control and waste reduction measures being implemented.

The Group is conscientious about the environment and is committed to the recycling of domestic wastes where feasible. This primarily includes the recycling of paper, plastic, metal and glass. The Group mandates its staff to segregate the domestic wastes into appropriate categories for proper handling by the service provider. The Group also promotes "paper-less" office, including doublesided or secondary paper printing except for official documents, multimedia form of presentation in meetings and increasing the use of office automation system to reduce administrative paperwork. The hospitals have an engineering department to salvage any usable parts or components from decommissioned equipment and furniture, such as televisions, computers and hospital beds, before they are disposed of. The Group may also donate obsolete but functional items, such as computers, to various charitable organisations. The Group will continue to explore feasible initiatives to reduce domestic waste production and enhance its recycling efforts.

二零二四年產生的生活廢棄物減 少主要由於本集團有關經營業務 使用的防疫材料數量減少,加上 本集團現正實施嚴格的成本控制 及減廢措施。

本集團認真對待環境,致力於在 可行的情況下回收再利用生活垃 圾,主要包括紙張、塑料、金屬 及玻璃的回收利用。本集團要求 其員工將生活垃圾分為適當類別, 供服務提供商妥善處理。本集團 亦推崇「無紙化」辦公(包括雙面 或二次印刷,除正式文件外)、 會議的多媒體展示及增加辦公自 動化系統的使用,以減少行政文 書工作。醫院設有一個工程部門, 於報廢設備及傢具(如電視機、 電腦及醫院病床)處置前將其任 何可用零件或部件進行回收。本 集團亦可將過時但可使用的物品 (如電腦)捐贈予各慈善組織。本 集團將繼續探索可行的舉措,減 少生活垃圾產生量並加強回收力 度。

2.4 Energy consumption

Healthcare systems are among a community's largest consumers of energy. Hospitals are generally open 24 hours a day and have sophisticated energy needs, such as particular air flow controls and specialized heating, ventilation and air-conditioning systems. The Group's hospitals' and operating facilities' energy consumption primarily includes electricity and water.

The table below sets forth the consumption of the Relevant Operations for the years indicated:

2.4 能源消耗

醫療系統是社區最大的能源消費機構之一。醫院一般每天24小時開業,具有極為複雜的能源需求,如特定的氣流控制及專門的供暖、通風及空調系統。本集團醫院及營運設施的能源消耗主要包括水雷。

下表載列於所示年度有關經營業 務消耗量:

		Change 變動	2024 二零二四年	2023 二零二三年
Electricity (kilowatt-hours)	電力(千瓦時)	+6.3%	43,080,922	40,541,267
Electricity consumption intensity	電耗強度			
(kilowatt-hours per gross floor	(每建築面積千瓦時)			
area)		+3.6%	80.68	77.88
Water consumption (ton)	水耗(噸)	+17.1%	931,018	794,748
Water consumption intensity	水耗強度			
(ton per gross floor area)	(每建築面積噸)	+14.2%	1.74	1.53

Electricity consumption is primarily attributable to air-conditioning, water heating, lighting and energy demanding medical equipment such as MRI and X-ray. The Group's initiatives aimed at reducing electricity consumption include:

- explore the feasibility of using air heat pump water heater and gas-fired boiler;
- installation of inverter-type air-conditioning systems that are more energy-efficient;
- installation of high efficiency LED light sources;
- promote staff awareness and control measures ensure lights are off when no one is using;
- an energy saving task force is set up to perform regular inspections of air-conditioning systems and other electrical systems to ensure no unintended or unusual usage;

電力消耗主要是由於空調、水暖、 照明及高耗能的醫療設備(如MRI 及X射線)。本集團旨在減少用 電量的舉措包括:

- 探索使用空氣熱泵熱水器 及燃氣鍋爐的可行性;
- 安裝更節能的逆變式空調 系統:
- 安裝高效率LED光源;
- 推動員工的意識及控制措施,確保在沒有人在使用時熄燈:
- 設立一個節能專責小組, 對空調系統及其他電氣系 統進行定期檢查,以確保 不存在無意或異常使用:

環境、社會及管治報告

- installation of motion-triggered lightning systems in escalators and elevators;
- maximize the use of natural sunlight via roof windows;
- implement a system of inspecting office buildings; every administrative department is responsible for the inspection of power consumption and timely turning off related electrical appliances, including lighting, air conditioning and so on;
- installation of automatic door closers in wards with a view to increasing energy efficiency by limiting the amount of air movement required, as well as the space that needs to be cooled; and
- gradually replace obsolete equipment with new equipment that are certified for energy efficiency.

Water consumption is primarily attributable to cooling equipment, plumbing fixtures, landscaping, medical process rinses, pure water systems and domestic uses (sinks, showers, toilets). The Group's initiatives aimed at reducing water consumption include:

- leak detection and repair;
- use of high-efficiency showerheads;
- use of low-flow plumbing fixtures;
- use of motion sensor-activated faucets and flow control;
- use of waterless medical vacuum pumps;
- use of reject water produced in the reverse-osmosis process;
- use full loads in sanitizers, sterilizers and laundry washing machines, consistent with infection control requirements; and
- minimize water use for irrigation with rain/soil moisture controllers and only during times when wind and evaporation are lowest.

- 在自動扶梯及電梯中安裝 運動觸發的照明系統;
- 通過屋頂窗戶最大限度地 利用自然光;
- 實施辦公樓巡查制度,即 各行政部門分區域負責電力使用情況檢查並及時關 閉相關電器,包括電燈、 空調等;
- 將自動閉門器安裝在病房中,以通過限制所需的空氣流動量以及需要冷卻的空間來提高能源效率;及
- 逐步用節能認證的新設備 替代過時的設備。

耗水量主要是由於冷卻設備、水管裝置、景觀美化、醫療過程沖洗、純淨水系統及生活用水(水槽、淋浴、廁所)。本集團旨在減少用水量的舉措包括:

- 洩漏檢測及維修;
- 使用高效噴頭;
- 使用低流量水管裝置;
- 使用運動傳感器啟動的水 龍頭及流量控制;
- 使用無水醫用真空泵;
- 使用在反滲透過程中產生 的廢水;
- 符合感染控制要求情況下 全負荷使用消毒劑、消毒 器及洗衣機;及
- 使用雨水/土壤濕度控制器盡量減少灌溉的用水量, 且只有在風及蒸發量最低的時候才能使用。

環境、社會及管治報告

The Group achieved remarkable water saving on account of, among other water-saving initiatives, the installation of more than 1,500 high-efficiency waterheads at Kanghua Hospital.

In the past, Kanghua Hospital has been awarded by the Dongguan Water Authority under the Dongguan Municipal People's Government, the "Water-Saving Unit of Dongguan" upon passing evaluations on various aspects, including water-saving rules and regulations, water-saving containers and infrastructure, water usage planning and management and water-saving mechanism implementation.

The Group will continue to oversee the effectiveness of the above initiatives and explore new and innovative ways to achieve water saving, which will in turn contribute to electricity saving.

During the Reporting Period, our electricity and water consumption have increased by 6.3% and 17.1%, respectively, which was mainly attributable to expanded scale of operations due to the acquisition of our haemodialysis services operations in January 2024. We will continue to enhance our efforts in minimizing consumption, including more extensive installation of efficient water saving sprinkler systems, electronic lighting sensors and automatic water tap sensors.

2.5 Antibiotics prescription

Antimicrobial resistance is a global public health challenge, which is aggravated by the overuse of antibiotics. Increased antimicrobial resistance is the cause of severe infections, complications, longer hospital stays and increased mortality. Antibiotics over-prescription is also potentially associated with an increased risk of adverse effects, more frequent re-attendance and increased medicalization of self-limiting conditions.

Inevitably, doctors at the Group's hospitals prescribe antibiotics to patients from time to time. The Group is committed to the judicious prescription of antibiotics by eliminating unnecessary or sub-optimal prescriptions. The Group's continuous efforts have maintained antibiotics prescription at a reasonable and acceptable rate.

因在康華醫院安裝了逾1,500個 高效水龍頭等節水措施,本集團 節水成效顯著。

過往,東莞市人民政府屬下的東 莞市水務局通過對節水規章制度、 節水載體建設、用水計劃管理、 節水投入機制等方面的評審,向 康華醫院頒發了「東莞市節水型 單位」。

本集團將繼續監督上述舉措的有 效性,並探尋新的創新方法實現 節水,進而促進節電。

於報告期間,我們的用電量和用水量分別增加6.3%及17.1%,主要由於在二零二四年一月收購血液透析服務業務而擴大營運規模所致。我們將繼續加大力度最大限度地減少消耗,包括更廣泛地安裝節水灑水系統、電子照明傳感器及自動水龍頭傳感器。

2.5 抗生素處方

抗菌素耐藥性是全球公共衛生的 一項挑戰,過度使用抗生素會造成耐藥性加劇。抗菌素耐藥性加 劇是導致嚴重感染、併發症、住院時間延長及死亡率上升的原因。抗生素處方過量亦可能伴隨著不利影響的風險增加,復發頻率增加及自限性條件的醫療化增加。

本集團醫院醫生不時不可避免地 向患者開出抗生素處方。本集團 致力於通過消除不必要或次優處 方審慎開出抗生素處方。本集團 的不懈努力,使抗生素處方使用 率維持在合理且可接受的水平。

環境、社會及管治報告

The Group's clinical governance tracks a number of parameters to gauge the prescription of antibiotics as set forth in the table below (the information below only include those operations that provides hospitalised (inpatient and outpatient) services):

- providing education and clinical decision support to doctors and patients regarding the long-term and community-wide consequences of overusing antibiotics;
- patients should be educated of the importance of following the use of antibiotics according to prescription;
- doctors should always follow the principle of rational, safe and effective antibiotics prescription;
- antibiotics should be prescribed only for bacterial infections whenever possible and in the proper dose for the correct duration;
- narrow spectrum antibiotics should be chosen whenever possible to avoid destroying populations of beneficial bacteria along with the disease-causing bacteria;

本集團倡導審慎開出抗生素處方 的舉措包括:

- 為醫生及患者提供過度使用抗生素的長期及全社會後果的教育及臨床決策支持:
- 教育患者遵照處方使用抗 生素的重要性;
- 醫生應始終遵循合理、安 全及有效的抗生素處方原 則;
- 抗生素盡可能於細菌感染時方可按正確藥效時間的適當劑量開出處方:
- 應盡可能選擇窄譜抗生素, 以避免連同致病細菌一起 破壞有益細菌群;

環境、社會及管治報告

- publish internal clinical guidelines for doctors to follow, especially for common infections, with a view to improving antibiotics use;
- rotating use of different classes of antibiotics where possible;
- accountability systems to prompt responsible prescription of antibiotics by doctors;
- strictly prohibit any form of advantages or rebates provided by pharmaceutical companies to incentivize doctors to prescribe more antibiotics; and
- regular communications with regulators and healthcare organizations, including the Chinese Center for Disease Control and Prevention, to understand the latest community threats and outbreaks with a view to modifying antibiotics prescription strategy as appropriate.

- 發佈醫生遵循的內部臨床 指引,特別是針對常見的 感染,以改善抗生素使用;
- 盡可能交替使用不同類別 的抗生素;
- 制定問責制度,促使醫生 負責任地開出抗生素處方;
- 嚴格禁止製藥公司提供任何形式的好處或回扣鼓勵 醫生開出更多的抗生素處方:及
- 與包括中國疾病預防控制 中心在內的監管機構及醫 療組織定期溝通,了解最 新的社區疾病威脅及爆發 情況,以期酌情修改抗生 素處方策略。

The Group also has in place various referral schemes to identify potential candidates from its existing staff's social networks. Referred staff generally has higher retention rates and increased engagement. The Group audits and verifies staff identify and background as part of the recruitment process to ensure no child labor or forced labour is employed. Depending on the position being hired, the Group also conducts background checks to ensure the veracity of information provided by the potential candidate. The Group has adopted a Recruitment Process Management Policy to standardize its recruitment practice.

The Group strictly abides by the relevant laws and regulations such as the Labor Law of the PRC and the Labor Contract Law of the PRC, and enters into labor contracts with its staff. Each of the Group's hospitals and operating facilities has adopted a labor union to protect the rights and interests of its staff and encourage them to participate in the management of the Group's operations.

3.3 Staff remuneration and retention

The Group's comprehensive staff remuneration and retention policy is designed with a view to rewarding staff performance and long term staff retention. It primarily includes: (i) economic components comprising basic salary determined with reference to the individual's position, seniority and length of service, performance bonus determined with reference to the metrics specific to the individual's job function and other benefits; and (ii) non-economic components comprising personal development, job challenge and satisfaction, recognition, work environment, work safety and career advancement. The Group regularly benchmarks against available market data and adjusts its remuneration structure with a view to remaining competitive. While financial incentives are an important factor in staff retention, the Group recognizes that they alone are not enough to improve recruitment and retention in a sustainable manner. Therefore, the Group places equal emphasis on non-economic factors, in particular personal development, work environment and collegiality. The Group's career advancement track is transparent and achievable. The Group provides a platform and support for its staff to undertake medical education and research in their field of choice

The Group regularly carries out staff appraisals to discuss achievements, strengths, and areas for development, and to set personal objectives with a view to ensuring they feel motivated and appreciated for their contribution. The Group maintains open channels of communication with its staff to keep them informed of the latest developments and provide them with opportunities to voice their opinions. The Group also recognises that its healthcare professionals, in particular doctors and nurses, may be subject to a high pressure and demanding work environment from time to time due to their job nature, which may result in attrition. The Group actively monitors the emotional wellbeing of its staff and provide counselling and supporting arrangements where appropriate. The Group regularly gauges the working hours of its staff to identify any staff with excessive workloads and makes alternative staffing arrangements if necessary. The Group aims to build a strong organisational culture to cultivate a sense of belonging among its staff through various staff functions and events. The Group believes that the creation of a healthy and harmonious working environment will improve staff morale and productivity in the long term.

The decrease in the number of participants was primarily due to the steady normalization of training activities conducted for existing staff (non-newly recruited) as the impact of COVD-19 began to subside in 2023. However, the significant increase in training man-hours was due to the high attrition rate of nurses in 2024 which necessitated more training for newly joined nurses; furthermore, in response to recent national policy changes in the healthcare system, we have provided more trainings to our staff in general to familiarize them with new standards and protocols.

環境、社會及管治報告

The Group continuously review and streamline patient registration process and provide regular staff customer-service training. The hospitals and outpatient centers also conduct patient satisfaction surveys. Such results serve to establish a baseline to monitor changes in patient experience and satisfaction in specific area of service delivery. These surveys primarily include:

- call back interviews with inpatients, outpatients and physical examination patients;
- surveys delivered through short messaging services;
- on-site questionnaires; and
- comments collection boxes.

The Group also cooperates with third parties to conduct comprehensive surveys and analytical studies from time to time.

The subjective nature of the healthcare industry means that the Group occasionally receives patient complaints in the ordinary course of business. The Group has implemented a standardised customer complaint management at each of its hospitals with a view to promptly, accurately and comprehensively collecting feedback from patients, addressing patients' concerns, continuously improving clinical processes and ultimately delivering service of the highest standard to patients. The Group generally classifies patient complaints in three major categories of importance: (i) critical complaints, which may involve deficiencies in clinical quality resulting in adverse effects to patients, medical disputes attracting media attention and intervention from regulatory authorities, extremely poor service attitude, verbal abuses or assaults on patients, or any complaints regarding medical ethics; (ii) regular complaints, which may involve general service attitude, environment, accommodation, hospital or inter-departmental processes resulting in inconvenience to patients, billing error, repeated assessment, pricing or lack of communication or language skills; and (iii) immaterial complaints, which may involve mere service recommendations or trivial comments, or complaints that are frivolous, vexatious or are primarily attributable to the patients' individual condition.

本集團會持續檢討並簡化患者掛號流程,並提供定期員工客戶服務培訓。醫院及門診中心亦會進行患者滿意度調查。有關結果用於建立監控特定服務提供領域內患者體驗及滿意度變化的基準。該等調查主要包括:

- 電話回訪住院患者、門診 患者及體檢患者;
- 通過短信服務進行調查;
- 現場問卷調查;及
- 意見收集箱。

本集團亦會不時與第三方合作進 行全面調查及分析研究。

醫療行業的主觀性意味著本集團 在日常業務過程中會不時收到患 者投訴。本集團已在其各家醫院 實施標準化客戶投訴管理,以快 速、準確及全面收集患者反饋、 解決患者關切、持續改善臨床流 程及最終向患者提供最高水準的 服務。本集團一般將患者投訴分 為三大重要類別:(i)重大投訴, 該等投訴可能涉及導致對患者產 生不利影響的臨床質量缺陷、引 發媒體關注及監管部門干預的醫 療糾紛、服務態度極其惡劣、對 患者進行唇駡或攻擊或涉及醫德 的任何投訴;(ii)一般投訴,該等 投訴可能涉及一般服務態度、環 境、住宿、醫院或院內科室間流 程給患者帶來的不便、計費錯誤、 重複檢查、定價或缺乏溝通或語 言技巧;及(iii)非重要投訴,該等 投訴可能僅涉及服務建議或瑣碎 評論,或屬無聊、無理取鬧或主 要歸因於患者個人狀況的投訴。

The Group has dedicated facilities to record the complaint process on a confidential basis to safeguard the interests of all parties involved and ensure that the complaint processes are conducted fairly with proper records. The hospitals have a complaint office, a unit led by a highly experienced hospital manager and dedicated to the management of patient complainants. The complaint office acts as the complainant point of contact, explains the complaint process to the complainants, directs patient complaints to appropriate departments and governance committees for detailed investigation and root-cause analysis, conducts indepth fact-finding, proactively oversees and manages the complaint processes, coordinates and communicates with the parties involved, accurately records all relevant findings on a confidential basis and formulates the appropriate replies to the complainants. All initial complaints and views will be handled and responded to directly by the complaint office. The Group is committed to resolving all patient complaints in the shortest period of time, or on the spot, if possible, though resolution of critical complaints generally requires a longer period of time. For critical complaints involving clinical safety or possible health implications, the Group proactively takes immediate actions to prevent and minimise adverse effects on patients. The hospital policy mandates every complaint to be properly lodged and processed through the system and prohibits staff from reaching a private settlement with the complainants, which may potentially place the hospital in a disadvantaged situation if such complaints were to escalate further.

環境、社會及管治報告

The Group regards patient complaint management as an important component for the continuous improvement of clinical safety and quality. The Group treats each of the patients' complaints seriously and regards them as the best source for improvement. Complaint reports are regularly reported to senior management for review. For every patient complaint, the Group is committed to understanding its fact pattern and root cause, ascertaining the responsible parties and areas of improvement. The hospitals organise a monthly complaints analysis meeting to identify improvement areas in clinical processes, make recommendations and ensure the relevant administrative and clinical departments implement the necessary improvements promptly. In addition, the hospitals organise a quarterly complaints sharing session on the root cause of the complaints, improvement processes implemented and lessons learnt with a view to cultivating a sense of vigilance among staff.

For critical complaints that may escalate into medical disputes, the complaint office will notify the medical dispute contingency task force, headed by the director and senior management of the hospital, to initiate the medical dispute process involving a highly coordinated effort of various units of the hospital. In 2024, most of the complaints were resolved amicably with only a few of them escalated into medical disputes. In 2024, 6 medical disputes cases (2023: 26) were materialised during the year.

- outcome patient's well-being after receiving service, including efficacy of treatment, recovery progress, health conditions, satisfaction and complications arising from treatments.

對於可能升級為醫療糾紛的重大投訴,投訴辦公室將通知醫療糾紛的醫院董事及高級管理層領導的醫療糾紛程序,由醫院各單位高度協同努紛程序,由醫院各單位高度協同努部分進行處理。二零二四年,大數是新得到友善解決,一零二四年,每數為醫療糾紛。二零二三年:26個)醫療糾紛案件。

4.2 服務質量管理

- 環節一臨床程序,包括臨床手術是否按照相關規範進行、工作流程及醫院感染;及
- 結果一患者接受服務後康復情況,包括治療功效、 恢復過程、健康狀況、滿 意度及治療引起的併發症。

環境、社會及管治報告

The service quality management system has a wide scope. In addition to monitoring the quality of diagnosis (whether it is accurate, comprehensive and prompt), the quality of treatment (whether it is effective, prompt, thorough and of a reasonable duration), nosocomial infections control and clinical deficiency (whether resulting injuries, harm or pain to patients that could otherwise be avoided), the system also monitors clinical efficiency, reasonableness of medical fees, the input-output relationship of applied medical techniques, systematic services and continuum and community feedback. Under this system, each hospital department is given quantifiable service quality targets to achieve and parameters to monitor. Service quality management and improvement is a continuous process. Any deficiency, once identified, will be handled promptly with appropriate level of supervision.

High standard of clinical governance maintains the Group's inpatient fatality rate consistent with the risks inherent in hospital operations and industry. As the Group increases its intake of patients with critical conditions and/or require specialized and complex emergency procedures that carry higher risks of unfavourable clinical outcome, its inpatient fatality rate may increase. The table below sets forth the Group's inpatient fatality rate for the years indicated:

服務質量管理體系範圍廣泛。除 監控診斷質量(診斷是否準確、 周全及快速)、治療質量(治療是 否有效、快速、徹底及期間合理)、 醫院感染控制及臨床缺陷(是否 對患者產生本來可以其他方式避 免的傷害、損害或疼痛)外,該 體系亦監控臨床療效、醫療費用 合理性、所使用醫療技術投入產 出關係、系統化服務及連續性及 社區反饋。在該體系下,醫院各 科室獲提供須達到的可量化服務 質量目標及監控參數。服務質量 管理及改進是一個持續的過程。 任何缺陷 一經發現,即會以適當 監督級別迅速處理。

These protocols are also design to ensure that the records are not accidentally accessed, processed, erased, lost or used without authorization. Patient medical records are generally kept for 15 years. Before access to the relevant medical records is granted, patients or their families will need to produce the original of the patient's identity documents and a signed consent letter. The medical administration department is responsible for overseeing and auditing medical records management.

The Group also promotes patient privacy awareness among staff by conducting regular training and sharing sessions. Hospital staff are sensitive to patient privacy and place additional emphasis on protecting patient privacy during every aspect of the clinical processes. Save as required by applicable laws and regulations, patient information can only be released with consent.

Each of the Group's hospitals has an information technology department responsible for reviewing and implementing data protection measures in accordance with relevant laws and regulations. The hospitals' resources that store and manage patient data are physically disconnected from internet access points to prevent external leakage and tempering activities. The hospitals strictly adhere to grade three security requirements under the Administrative Measures for the Graded Protection of Information Security. The hospitals' network security, system security and database security are reviewed from time to time and are comprehensively audited at least once every year to ensure the required standards are met.

The hospitals have formulated policies for privacy data administration which sets out the overall responsibilities and procedures to ensure that all users adhere to defined standards. The hospitals have promulgated internal instructions setting out specific procedures regarding the handling of documents containing patient data. Staff are also required to observe the hospitals' internal instructions on the security of computer systems (including storage, processing, transmission and management of classified information, data encryption and physical security of computer systems). Violation of the above requirements will result in disciplinary actions. The hospitals provide regular updates and trainings to staff on data protection to cultivate their data protection awareness. Staff who need to have access to sensitive data are also required to enter into a confidential undertaking with respect to any patient data, operational, financial and other sensitive information that they may come across.

The hospitals implement strong access controls to information. The degree of access and control the staff has to sensitive information is determined by reference to the relevance to their role, their post and/or seniority and is reviewed from time to time. Any unnecessary or obsolete access rights will be revoked immediately. All network actions are recorded on the systems and continuously monitored for any irregularity. The Group undertakes reasonable due diligence of its suppliers' qualifications, including:

- suppliers are required to provide all relevant qualification documents and licenses for inspection;

環境、社會及管治報告

The Group has adopted a stringent policy that prohibits suppliers from contacting and offering rebates to doctors to solicit business. If any supplier is found to be in violation, the Group will immediately terminate the business relationship. The Group believes that such practice minimizes the risk of corrupt practices, thereby safeguarding the quality of the supplies.

The Group has an internal rating system for its suppliers, which can broadly be classified into:

- (i) excellent suppliers: the Group should increase purchase volume, and maintain stable relationship with, these suppliers;
- (ii) mediocre suppliers: the Group should gradually reduce purchase volume with, and pay closer scrutiny on, these suppliers; and
- (iii) poor suppliers: these suppliers are blacklisted and the Group should no longer purchase from them. These suppliers typically include those who do not comply with the purchase agreement, have questionable reputation, always misrepresent the product price, do not deliver the required quantity at the required time, deliver supplies with inferior quality, or show no improvement despite repeated warnings.

本集團已採取嚴格政策禁止供應 商接觸及向醫生提供回扣以招攬 業務。倘任何供應商被發現違規, 本集團會立即終止業務關係。本 集團相信,這種做法會盡量減少 出現腐敗行為的風險,從而保證 供應品質量。

本集團就供應商設有內部評級制度,可大致分類為:

- (i) 優秀供應商:本集團將增加向該等供應商的採購量並與其保持穩定關係;
- (ii) 普通供應商:本集團將逐 漸減少向該等供應商的採 購量並對其進行更嚴密審 查:及
- (iii) 不理想供應商:該等供應 商會被列入黑名單,本該等供應 團將不再向其採購。該守供應商通常包括不遵守 供應商通常包括不遵明 協議、聲譽有問題、在 常歪曲產品價格、數量 定時間交付規定數或 で付供應品質量低劣或商。 警告仍未改進的供應商

環境、社會及管治報告

The Group recognizes that purchasing products with reduced environmental and human health impacts is vital to sustainable healthcare. The Group is exploring various ways to achieve "environmentally preferable purchasing" ("EPP"), an act of purchasing products whose environmental impacts have been considered and found to be less damaging to the environment and human health when compared to competing products. EPP may be feasible to achieve overall cost saving and waste reduction while meeting the needs of patients. The Group has begun its EPP efforts with a few carefully targeted purchasing changes, and if feasible, will expand the scope of environmental purchasing to select as many environmentally sound, healthy and safe products as a hospital can use. The Group believes that EPP may become an important part of the process toward sustainable operations. Downstream corrections of environmental or occupational health issues are generally more costly – in terms of money, labor, technical complexity, and adverse publicity – than prevention through EPP. By carefully selecting products, a hospital may achieve:

- a significant reduction in overall impact on the environment, cost reduction with lower purchase prices or changes that reduce or eliminate waste disposal, hazardous waste, and/or the need for worker safety measures;
- a healthier environment for patients and staff through reduced exposure to hazardous substance; and
- opportunities for positive publicity and promotion.

本集團意識到採購對環境及人類 健康影響較低的產品對可持續 醫療發展至關重要。本集團不斷 探索各種途徑,以實現「環保採 購」(「EPP」),一種所購產品在環 境影響方面被視為且獲證實為對 環境及人類健康的破壞作用低於 競爭產品的採購行為。EPP在滿 足病人需求同時實現整體成本節 約及減少垃圾方面不失為可行之 策。本集團的EPP努力始於對精 撰目標採購作出些許調整,如可 行,將會擴大環保採購範圍,甄 選出醫院所能使用的盡可能多的 環保、健康及安全產品。本集團 認為EPP會成為邁向可持續經營 之路的重要組成部分。環保或職 業健康問題的事後糾正一在金錢、 勞工、技術複雜程度及不利的公 眾形象方面一較之於通過EPP進 行預防常常須付出更加昂貴的代 價。在挑選產品中謹慎行事,醫 院可:

- 大大降低對環境的整體影響、以較低的採購價格或較小的價格波動來減少成本,這可減少或消除廢物及有害物質的處理及/或減少員工安全措施需要;
- 通過減少有害物質的曝光 為病人及員工營造更加健 康的環境;及
- 創造正面宣傳及推廣的機會。

環境、社會及管治報告

Any implementation of EPP is expected to be gradual, and may require substantial changes to purchasing and clinical configuration of the hospital. The Group will comprehensively assess the long-term benefits of EPP, clinical feasibility and business considerations when making any purchasing changes.

In addition to the purchase of pharmaceuticals, medical consumables and medical equipment, the Group also relies on various vendors for engineering and renovation services at the hospital premises from time to time. The Group uses its best efforts to ensure that these vendors are properly qualified and will take all appropriate measures to protect the environment both inside and outside the work site and limit harmful effects to the public and property due to wastes, pollution, noise and other nuisances caused by the engineering work. These vendors are expected to satisfy the applicable requirements under the Labor Law of the PRC and the Labor Contract Law of the PRC and provide the workers with adequate social security and benefits under the relevant laws. The Group pays close attention on the engineering work and may from time to time engage thirdparty supervision to ensure that the engineering work meets the applicable national engineering specifications and standards and environmental protection.

實施任何EPP預期均將循序漸進, 且可能需要醫院的採購及臨床 配置作出重大改變。在作出任何 採購變動時,本集團將綜合評估 EPP的長期裨益、臨床可行性及 業務代價。

除採購醫藥、醫療耗材及醫療設 備外,本集團亦需要不同供應商 不時為醫院場所進行工程及翻新 服務。本集團竭力確保該等供應 商屬適當合格,並將採取一切必 要措施保護施工場地內外環境, 限制因工程施工產生的廢物、污 染物、噪音及其他危害對公眾及 物業造成的有害影響。該等供應 商須遵守《中華人民共和國勞動 法》及《中華人民共和國勞動合同 法》的適用規定,根據有關法律 為其工人提供充足的社會保障及 福利。本集團密切關注工程施工 並可能不時委聘第三方監理,確 保工程符合適用國家工程規格及 標準,滿足環保要求。

4.5 Anti-bribery and corruption risks

The PRC government has recently enhanced its anti-bribery efforts to prevent improper payments and other benefits received by doctors, staff and hospital administrators in connection with the procurement of pharmaceutical and medical supplies and the provision of healthcare services. In addition, Grade A Class III hospitals in the PRC, such as the Group's Kanghua Hospital, are subject to particularly stringent requirements, including as part of the criteria for such ratings, requiring all such hospitals to (i) implement internal controls and risk management measures addressing bribery and corruption risks; and (ii) undergo annual inspections from relevant regulatory authorities as to their anti-bribery and corruption status. The Group has implemented the following policies and procedures to address potential bribery and corruption incidents:

• an anti-bribery function at the Group level led by the chief financial officer of the Company. This function is in charge of developing the overall framework of anti-bribery and corruption policies and procedures and providing guidance and supervision towards implementing them across every aspect of the Group's operations. Each of the Group's hospitals will immediately report any suspected incidents of bribery and corruption to the chief financial officer of the Company, who will then carry out any further investigations if necessary and determine the appropriate course of action. From time to time, the Group provides training to its staff and updates on recent anti-bribery and corruption issues and practices as they arise;

These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

關鍵審計事項

Key audit matter 關鍵審計事項 How our audit addressed the key audit matter 本行於審計時如何處理關鍵審計事項

Impairment assessment of property, plant and equipment and right-of-use assets of Chongqing Kanghua Zhonglian Healthcare Management Co., Ltd. ("Chongqing Kanghua Property")
重慶康華眾聯醫療管理有限公司(「重慶康華物業」)的物業、廠房及設備以及使用權資產的減值評估

During the year ended 31 December 2024, Chongqing Kanghua Zhonglian Cardiovascular Hospital Co., Ltd. ("Kangxin Hospital") underwent a demerger conducted under the laws of the People's Republic of China, pursuant to which Chongqing Kanghua Property was established, as a wholly-owned subsidiary of the Company, to hold the land and buildings underlying the operation of Kangxin Hospital.

As at 31 December 2024, Chongqing Kanghua Property had property, plant and equipment and right-of-use assets transferred from Kangxin Hospital with aggregate carrying amount of RMB653,631,000, representing approximately 24% of total assets.

The Group's management considered the future economic benefits arising from Chongqing Kanghua Property's property, plant and equipment and right-of-use assets shall become uncertain following the disposal of Kangxin Hospital and performed an impairment assessment by assessing the recoverable amount of the property, plant and equipment and right-of-use assets of Chongqing Kanghua Property based on valuations of fair value less costs of disposal prepared by an independent external valuer.

Significant unobservable inputs was involved in the assessment of the recoverable amount, including the assumptions on replacement cost, deduction for obsolescence, capitalisation rate and the selection of comparable market transactions. The outcome is sensitive to the expected future market conditions.

The accounting policies, significant accounting judgements and estimates and disclosures for impairment assessments are included in notes 2.4, 3, 14 and 15 to the consolidated financial statements.

We evaluated the methodologies, assumptions and estimates used in the valuation by:

- Obtaining and inspecting the valuation reports prepared by the independent external valuer engaged by the Group and on which the directors' impairment assessment of property, plant and equipment and right-of-use assets of Chongqing Kanghua Property was based on;
- Assessing the independent external valuer's qualifications, experience and expertise in the properties being valued and considering their objectivity; and
- Discussing with the independent external valuer, to understand the valuation methodologies applied and the key estimates and assumptions adopted in their valuations and assess their reasonableness and the consistency with industry norms by comparing the significant unobservable inputs, such as replacement cost, deduction for obsolescence, capitalisation rate and comparable market transactions adopted by the independent external valuer with available market data.

In addition, we evaluated the adequacy of related disclosures in the consolidated financial statements.

The Group's management performed an annual impairment assessment by assessing the recoverable amounts of the Kanghua Haemodialysis CGU based on value in use calculations, with the assistance from an independent external valuer.

- (iii) comparing the long term growth rates to current market condition; and
- (iv) assessing the sensitivity of management estimates and assumptions used in evaluating whether a reasonably possible change in assumptions could cause the carrying amounts to exceed their recoverable amounts

In addition, we assessed the independence, objectivity and competence of the external valuer engaged by management and evaluated the adequacy of related disclosures in the consolidated financial statements.

KEY AUDIT MATTERS (Continued)

關鍵審計事項(續)

Key audit matter 關鍵審計事項 How our audit addressed the key audit matter 本行於審計時如何處理關鍵審計事項

Contingent liabilities arising from medical disputes 醫療糾紛引起的或然負債

As at 31 December 2024, the Group had contingent liabilities arising from medical disputes of RMB14,292,000 and a provision for medical dispute claims of RMB2,885,000.

There are inherent risks associated with the Group's clinical activities which may result in unfavourable medical outcomes not caused by clinical decisions. The Group may be subject to legal proceedings and claims that arise in the ordinary course of business, which primarily include medical dispute claims brought by the former patients.

Provision for medical dispute claims is made based on the status of potential and active claims outstanding at the end of the year, and taking into consideration the assessment and analysis of external experts and the total claim exposure. However, where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

Significant judgements and estimates were involved in the assessment of probability of an outflow of economic benefits to the medical disputes and its financial impact to the consolidated financial statements.

The accounting policies, significant accounting judgements and estimates and disclosures for the provision and contingent liabilities arising from medical disputes are included in notes 2.4, 3, 23 and 31 to the consolidated financial statements.

於二零二四年十二月三十一日, 貴集團因醫療糾紛引起 的或然負債為人民幣14,292,000元,醫療糾紛索賠撥備為 人民幣2,885,000元。

貴集團的臨床活動存在固有風險,可能導致並非臨床決策 引起的不利醫療結果。 貴集團可能會在日常業務過程中 產生的法律訴訟和索賠,主要包括前病人提出的醫療糾紛 索賠。

醫療糾紛索賠撥備是根據該年年底潛在和未了結索賠作出,並考慮到外部專家的評估和分析以及索賠總額。但是,如果可能不需要經濟利益流出,或者無法可靠地估計該金額,則將之披露為或然負債,除非經濟利益流出的可能性極低。

於評估經濟利益流出至醫療糾紛的可能性及其對綜合財務 報表的財務影響過程中涉及重大判斷及估計。

會計政策、重大會計判斷及估計以及醫療糾紛引起的撥備及或然負債的披露計入綜合財務報表附註2.4、3、23及31。

We evaluated management's assessment in respect of medical disputes by:

- obtaining an understanding of management's process in developing the estimation on the outflow of economic benefits;
- obtaining the list of medical disputes from management and arranging litigation search to check for the status of the medical disputes and the completeness of the list of medical disputes;
- (iii) obtaining and reading legal proceeding letters, judicial appraisal reports, expert opinion letters, judgement letters and medical records, if any, relevant to the medical disputes;
- (iv) discussing with management and the Group's legal counsel on the estimated outcome of the pending medical disputes, with reference to legal precedents of any similar cases: and
- evaluating the adequacy of the provision and the disclosure of contingent liabilities.

本行已透過以下方式評估管理層對醫療糾紛的評估:

- (i) 獲得並了解管理層對經濟利益流出的估計;
- (ii) 從管理層獲取醫療糾紛清單,並安排訴訟搜索以檢查 醫療糾紛的狀況及醫療糾紛名單的完整性;
- (iii) 獲得和閱讀與醫療糾紛相關的法律程序函件、司法評估報告、專家意見函件、判決書和醫療記錄(倘有);
- (iv) 參照類似案件的先例,與管理層及 貴集團法律顧問 討論尚未了結的醫療糾紛的估計結果;及

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### CORPORATE AND GROUP INFORMATION

廣東康華醫療集團股份有限公司 Guangdong Kanghua Healthcare Group Co., Ltd. (formerly known as Guangdong Kanghua Healthcare Co., Ltd.) (the "Company") was established as a limited liability company in the People's Republic of China (the "PRC") and its overseas listed ordinary shares (the "H Shares") are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange"). In the opinion of the directors of the Company, the Company's immediate and ultimate holding company is 東莞市康華投資集團有限公司 (Dongguan Kanghua Investment Group Co., Ltd.) ("Kanghua Group"), a limited liability company established in the PRC. The addresses of the registered office and principal place of business in Hong Kong of the Company are disclosed in the corporate information section to the annual report.

The Company and its subsidiaries (collectively referred to as the "Group") are principally engaged in the provision of hospital services, provision of rehabilitation and other healthcare services, provision of haemodialysis service and provision of elderly healthcare services in the PRC. Details of the Company's subsidiaries are set out in note 41 to the consolidated financial statements.

#### 2.1 BASIS OF PREPARATION

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards, issued by the International Accounting Standards Board (the "IASB") and include applicable disclosures required by the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("Listing Rules") and the disclosure requirements of the Hong Kong Companies Ordinance. They have been prepared on a historical cost convention, except for certain financial assets that are measured at fair value. These consolidated financial statements are presented in Renminbi (RMB) and all values are rounded to the nearest thousand (RMB'000), except when otherwise indicated.

#### Basis of consolidation

The consolidated financial statements include the financial statements of the Group for the year ended 31 December 2024. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

#### 1. 公司及集團資料

本公司及其附屬公司(統稱「本集團」) 主要在中國從事提供醫院服務、提供 康復及其他醫療服務、提供血液透析 服務及提供老年護理服務。本公司附 屬公司詳情載於綜合財務報表附註41。

For the Year ended 31 December 2024 截至二零二四年十二月三十一日止年度

#### 2.1 BASIS OF PREPARATION (Continued)

Basis of consolidation (Continued)

Generally, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee:
- (b) rights arising from other contractual arrangements; and
- (c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities and any non-controlling interest; and recognises fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

### 2.1 編製基準(續)

綜合入賬基準(續)

於一般情況下均存在多數投票權形成 控制權之推定。倘本公司擁有少於投 資對象大多數投票或類似權利,則本 集團於評估其是否擁有對投資對象的 權力時會考慮一切相關事實及情況, 包括:

- (a) 與投資對象其他投票持有人的合 約安排;
- (b) 其他合約安排所產生的權利;及
- (c) 本集團的投票權及潛在投票權。

附屬公司與本公司財務報表的報告期間相同,並採用一致會計政策編製。 附屬公司業績自本集團取得控制權之 日起綜合入賬,並持續綜合入賬直至 該控制權終止為止。

損益及其他全面收益各部分乃歸屬於 本集團母公司擁有人及非控股權益, 即使這會使非控股權益產生虧損結餘。 所有集團內公司間資產及負債、權益、 收入、開支及有關本集團成員公司之 間交易的現金流量均於綜合入賬時悉 數對銷。

倘有事實及情況顯示上文所述三項控制權要素有一項或以上出現變動,則本集團會重新評估其是否對投資對象擁有控制權。一間附屬公司之所有權權益變動在並未失去控制權的情況下按權益交易入賬。

倘本集團失去對一間附屬公司之控制權,則其取消確認相關資產(包括商譽)、負債及任何非控股權益;並確認所保留任何投資之公平值及損益中任何因此產生之盈餘或虧絀。先前於其他全面收益確認之本集團分佔部分重新分類為損益或保留溢利(倘適當),倘本集團已直接出售相關資產或負債,則須遵照相同標準。

#### 2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

#### 2.2 會計政策及披露之變動

The Group has adopted the following amendments to IFRS Accounting Standards for the first time for the current year's financial statements.

本集團於本年度財務報表首次採納下 列國際財務報告準則會計準則修訂本。

Amendments to IFRS 16 國際財務報告準則第16號修訂本 Amendments to IAS 1

國際會計準則第1號修訂本 Amendments to IAS 1 國際會計準則第1號修訂本 Amendments to IAS 7 and IFRS 7 國際會計準則第7號及國際財務

國際會計準則第7號及國際財務報告準則第7號修訂本

Lease Liability in a Sale and Leaseback

售後租回的租賃負債

Classification of Liabilities as Current or Non-current (the "2020 Amendments")

將負債分類為流動或非流動(「二零二零年修訂」)

Non-current Liabilities with Covenants (the "2022 Amendments")

附帶契諾的非流動負債(「二零二二年修訂」)

Supplier Finance Arrangements

供應商融資安排

The nature of the impact of the amendments to IFRS Accounting Standards that are applicable to the Group are described below:

- (a) The 2020 Amendments provide clarification and additional guidance on the assessment of right to defer settlement for at least twelve months from reporting date for classification of liabilities as current or non-current, which:
  - specify that the classification of liabilities as current or noncurrent should be based on rights that are in existence at the end of the reporting period. Specifically, the classification should not be affected by management intentions or expectations to settle the liability within 12 months.
  - clarify that the settlement of a liability can be a transfer of cash, goods or services, or the entity's own equity instruments to the counterparty. If a liability has terms that could, at the option of the counterparty, result in its settlement by the transfer of the entity's own equity instruments, these terms do not affect its classification as current or non-current only if the entity recognises the option separately as an equity instrument applying IAS 32 Financial Instruments: Presentation.

適用於本集團的國際財務報告準則會計準則修訂本的性質及影響載述如下:

- (a) 二零二零年修訂本就評估由報告 日期起最少十二個月之遞延結付 權利以分類負債為流動或非流動 作出澄清並提供額外指引,其中:
  - 訂明負債應基於報告期末 存在的權利分類為流動或 非流動。具體而言,分類 不應由管理層於十二個月 內結付負債之意向或預期 所影響。

### 綜合財務報表附註

For the Year ended 31 December 2024 截至二零二四年十二月三十一日止年度

# 2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (Continued)

#### (a) (Continued)

For rights to defer settlement for at least twelve months from reporting date which are conditional on the compliance with covenants, the 2022 Amendments specifically clarify that only covenants that an entity is required to comply with on or before the end of the reporting period affect the entity's right to defer settlement of a liability for at least twelve months after the reporting date, even if compliance with the covenant is assessed only after the reporting date. The 2022 Amendments also specify that covenants with which an entity must comply after the reporting date (i.e. future covenants) do not affect the classification of a liability as current or non-current at the reporting date. However, if the entity's right to defer settlement of a liability is subject to the entity complying with covenants within twelve months after the reporting period, an entity discloses information that enables users of financial statements to understand the risk of the liabilities becoming repayable within twelve months after the reporting period. This would include information about the covenants, the carrying amount of related liabilities and facts and circumstances, if any, that indicate that the entity may have difficulties complying with the covenants.

In accordance with the transition provision, the Group has applied the new accounting policy to the classification of liability as current or non-current retrospectively. The application of the amendments in the current year had no material impact on the consolidated financial statements.

### 2.2 會計政策及披露之變動(續)

#### (a) (續)

二零二二年修訂明確釐清有關將 結算日期推遲至少十二個月的權 利(以遵守契諾為條件),實體須 於報告期末或之前遵守的契諾會 影響實體延期負債結付至報告日 期後至少十二個月的權利。二零 二二年修訂亦訂明,實體在報告 日期後必須遵守的契約(即未來 契約)不會影響於報告日期負債 為流動或非流動的分類。然而, 如果實體延期結付負債的權利 取決於實體在報告日期後十二個 月內是否遵守承諾,則實體應披 露相關資料,以使財務報表使用 者能夠了解該負債在報告日期後 十二個月內償還之風險。此將包 括有關契約、相關負債的賬面價 值以及表明實體可能難以遵守契 約的事實和情況(如有)。

根據過渡規定,本集團對負債分 類為流動或非流動追溯應用新會 計政策。於本年度期間應用修訂 本對綜合財務報表並無重大影響。

# 2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS (Continued)

Further information about those IFRS Accounting Standards that are expected to be applicable to the Group is described below.

(a) The amendments to IFRS 9 clarify the recognition and derecognition for financial asset and financial liability and add an exception which permits an entity to deem a financial liability to be discharged before the settlement date if it is settled in cash using an electronic payment system if, and only if certain conditions are met.

The amendments also provide guidance on the assessment of whether the contractual cash flows of a financial asset are consistent with a basic lending arrangement. The amendments specify that an entity should focus on what an entity is being compensated for rather than the compensation amount. Contractual cash flows are inconsistent with a basic lending arrangement if they are indexed to a variable that is not a basic lending risk or cost. The amendments state that, in some cases, a contingent feature may give rise to contractual cash flows that are consistent with a basic lending arrangement both before and after the change in contractual cash flows, but the nature of the contingent event itself does not relate directly to changes in basic lending risks and costs. Furthermore, the description of the term "non-recourse" is enhanced and the characteristics of "contractually linked instruments" are clarified in the amendments.

The disclosure requirements in IFRS 7 in respect of investments in equity instruments designated at fair value through other comprehensive income are amended. In particular, entities are required to disclose the fair value gain or loss presented in other comprehensive income during the period, showing separately those related to investments derecognised during the reporting period and those related to investments held at the end of the reporting period. An entity is also required to disclose any transfers of the cumulative gain or loss within equity related to the investments derecognised during the reporting period. In addition, the amendments introduce the requirements of qualitative and quantitative disclosure of contractual terms that could affect the contractual cash flow based on a contingent even not directly relating to basic lending risks and cost.

# 2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS (Continued)

#### (a) (Continued)

The amendments are effective for annual reporting periods beginning on or after 1 January 2026, with early application permitted. The application of the amendments is not expected to have significant impact on the financial position and performance of the Group.

(b) IFRS 18 Presentation and Disclosure in Financial Statements, which sets out requirements on presentation and disclosures in financial statements, will replace IAS 1 Presentation of Financial Statements. This new IFRS Accounting Standard, while carrying forward many of the requirements in IAS 1, introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. In addition, some IAS 1 paragraphs have been moved to IAS 8 and IFRS 7. Minor amendments to IAS 7 Statement of Cash Flows and IAS 33 Earnings per Share are also made.

IFRS 18, and amendments to other standards, will be effective for annual periods beginning on or after 1 January 2027, with early application permitted. The application of the new standard is expected to affect the presentation of the statement of profit or loss and disclosures in the future financial statements. The Group is in the process of assessing the detailed impact of IFRS 18 on the Group's consolidated financial statements.

#### 2.4 MATERIAL ACCOUNTING POLICIES

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred in a business combination shall be measured at acquisition date fair value, which shall be calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, the liabilities assumed by the acquirer to the former owners of the acquiree and the equity interests issued by the acquirer in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any fair value of the Group's previous interest held over the identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain on bargain purchase is recognised in profit or loss.

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Business combinations and goodwill (Continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 December. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units ("CGUs"), or groups of CGUs, that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Impairment is determined by assessing the recoverable amount of the CGU (group of CGUs) to which the goodwill relates. Where the recoverable amount of the CGU (group of CGUs) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a CGU (or group of CGUs) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed of in these circumstances is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

減值乃透過評估有關商譽的現金產生單位(現金產生單位組別)可收回款項釐定。倘若現金產生單位(現金產生單位組別)的可收回款項少於賬面值,則確認減值虧損。就商譽確認的減值虧損其後期間不會撥回。

倘商譽分配至現金產生單位(或一組現金產生單位)及單位已出售之部分業務,則於釐定出售盈虧時,將售出業務有關的商譽計入業務賬面值。在此情況下出售的商譽,乃按售出業務與所保留現金產生單位部分的相對價值計量。

Fair value measurement

The Group measures certain of its financial assets at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Fair value measurement (Continued)

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on the valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, deferred tax assets, financial assets and a disposal group classified as held for sale), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or CGU's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the CGU to which the asset belongs. In testing a CGU for impairment, a portion of the carrying amount of a corporate asset is allocated to an individual CGU if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of CGUs.

- 第三級-基於估值技術,其中對公平值計量而言屬重大的最低級別輸入數據為不可觀察

就於綜合財務報表中確認的經常性資產及負債而言,本集團於各報告期末透過重新評估分類確定各層級之間是否發生轉移(根據對公平值計量整體而言屬重大的最低級別輸入數據)。

#### 非金融資產減值

倘存在減值跡象,或當須每年就資產 進行減值測試(存貨、遞延税項資產、 金融資產及分類為持作出售的出售集 團除外),則會估計資產的可收回金額。 資產的可收回金額乃按資產或現金產 生單位的使用價值及其公平值減出售 成本兩者的較高者計算,並按個別資 產釐定,除非資產並不產生明顯獨立 於其他資產或資產組別的現金流入, 於此情況下,則可收回金額按資產所 屬現金產生單位釐定。於測試現金產 生單位減值時,倘現金產生單位可按 合理及一致分配基準分配,公司資產 之部分賬面金額分配至個別現金產生 單位,或分配至現金產生單位內的最 小組別。

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Impairment of non-financial assets (Continued)

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

Property, plant and equipment and depreciation (Continued)

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The estimated useful life of each asset is as follows:

物業、廠房及設備與折舊(續)

折舊乃以直線法按其估計可使用年期 撇銷各項物業、廠房及設備的成本至 其剩餘價值計算。各項資產的估計可 使用年期如下:

Buildings 樓宇 Over the shorter of the lease terms of the related land or 50 years

10-20 years 10至20年 5-10 years 5至10年 5-10 years 5至10年 5 years 5年

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

當一項物業、廠房及設備的各部分有不同可使用年期時,該項目的成本乃按合理基準在各部分之間分配,而各部分須分別折舊。剩餘價值、可使用年期及折舊方法至少於各財政年度末檢討,並作出調整(如適用)。

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

#### Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

#### (a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less accumulated depreciation and any accumulated impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Leasehold landsOver the lease term租賃土地按租期Leased propertiesOver the lease term租賃物業按租期

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future lease payments resulting from a change in an index or rate) or a change in the assessment of an option to purchase the underlying asset.

#### (c) Short-term leases

The Group applies the short-term lease recognition exemption to its short-term leases of leased properties (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases are recognised as an expense on a straight-line basis over the lease term.

Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease terms and is included in revenue in profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee are accounted for as finance leases.

Sale and leaseback transactions

The Group applies the requirements of IFRS 15 Revenue from Contracts with Customers ("IFRS 15") to assess whether sale and leaseback transaction constitutes a sale by the Group. For a transfer that does not satisfy the requirements as a sale, the Group as a seller-lessee accounts for the transfer proceeds as bank loans within the scope of IFRS 9 Financial Instruments ("IFRS 9").

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Investments and other financial assets (Continued)

Initial recognition and measurement (Continued)

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of accounts receivable that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Accounts receivable that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

This category includes equity investments which the Group had not irrevocably elected to classify at fair value through other comprehensive income. Dividends on the equity investments are also recognised as other income in profit or loss when the right of payment has been established.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

#### Derecognition of financial assets (Continued)

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership of the asset. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

#### General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (12-month ECLs). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (lifetime ECLs).

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Impairment of financial assets (Continued)

General approach (Continued)

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Debt investments at fair value through other comprehensive income and financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for accounts receivable and contract assets which apply the simplified approach as detailed below.

- Stage 1 Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
- Stage 2 Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

一般方法(續)

當合約付款逾期90日時,本集團視金融資產出現違約。然而,在若干情況下,當內部或外部資料顯示在不考慮本集團所持的任何信貸升級措施的情況下本集團不大可能悉數收回尚未償還融合約金額,則本集團亦可能將金融資產視為出現違約。倘無合理預期可收回合約現金流量,則撇銷金融資產。

除應收賬款及合約資產應用下文詳述 的簡化方法外,按公平值計入其他全 面收益的債務投資及按攤銷成本列賬 的金融資產按一般方法進行減值,並 按下列階段預期信貸虧損計量分類。

- 第1階段一 自初步確認以來信貸風險 並無顯著增加的金融工 具,其虧損撥備按等於12 個月預期信貸虧損的金額 計量
- 第2階段一 自初步確認以來信貸風險 有顯著增加但屬未出現信 貸減值的金融資產的金融 工具,其虧損撥備按等於 全期預期信貸虧損的金額 計量
- 第3階段一 於報告日期已出現信貸減值(但並非在購買或產生時已出現信貸減值)的金融資產,其虧損撥備按等於全期預期信貸虧損的金額計量

Simplified approach

For accounts receivable that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a ECL model that is based on the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default adjusted for forward-looking factors specific to the debtors and the economic environment.

#### Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as loans and borrowings, or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include accounts and other payables, amount due to the non-controlling shareholder of a subsidiary, bank loans and lease liabilities.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (accounts and other payables and borrowings)

After initial recognition, accounts and other payables and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in profit or loss.

Financial liabilities (Continued)

Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. A financial guarantee contract is recognised initially as a liability at its fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequent to initial recognition, the Group measures the financial guarantee contracts at the higher of: (i) the ECL allowance determined in accordance with the policy as set out in "Impairment of financial assets"; and (ii) the amount initially recognised less, when appropriate, the cumulative amount of income recognised.

#### Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

#### Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of inventories are determined on a first-in, first-out basis. Net realisable value represents the estimated selling price for inventories less costs necessary to make the sale.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

#### **Provisions**

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in profit or loss.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

Income tax (Continued)

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

#### Income tax (Continued)

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

#### Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

#### Revenue recognition

#### Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Revenue recognition (Continued)

Revenue from contracts with customers (Continued)

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Revenue from the provision of hospital services, provision of rehabilitation and other healthcare services, provision of haemodialysis services, provision of elderly healthcare services, clinical trial and related income and local health services income are recognised over time and measured under the output method, because the customer simultaneously receives and consumes the benefits provided by the Group. The progress towards complete satisfaction of a performance obligation is measured based on the output method, which is to recognise revenue on the basis of direct measurements of the value of the goods or services transferred to the customer to date relative to the remaining goods or services promised under the contract, that best depicts the Group's performance in transferring control of goods or services.

Revenue from other sources

Rental income is recognised on a time proportion basis over the lease terms.

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Dividend income is recognised when the shareholders' right to receive payment has been established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

#### Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

#### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, i.e., assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. The capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

#### **Employee benefits**

#### Pension scheme

The employees of the Group are required to participate in a central pension scheme operated by the local municipal government. The Group is required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

The Group's subsidiary in Hong Kong operates a defined contribution MPF Scheme under the Mandatory Provident Fund Schemes Ordinance for all of its employees. Contributions are made based on a percentage of the employees' basic salaries and are charged to profit or loss as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the subsidiary in an independently administered fund. The subsidiary's employer contributions vest fully with the employees when contributed into the MPF Scheme.

Employee benefits (Continued)

Short-term employee benefits

Short-term employee benefits are recognised at the undiscounted amount of the benefits expected to be paid as and when employees rendered the services. All short-term employee benefits are recognised as an expense unless another IFRS requires or permits the inclusion of the benefit in the cost of an asset.

#### Foreign currencies

These consolidated financial statements are presented in Renminbi ("RMB"), which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of advance consideration.

#### 2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Non-current assets and disposal groups held for sale

Non-current assets (and disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in the relevant subsidiary after the sale.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell, except for financial assets within the scope of IFRS 9 and deferred tax assets which continue to be measured in accordance with the accounting policies as set out in respective sections.

持作出售非流動資產及出售組別

倘本集團致力進行涉及失去附屬公司 控制權之出售計劃時,假如符合上述 條件,則該附屬公司之全部資產及負 債均會分類為持作出售,而不論本集 團是否將於出售後保留其於相關附屬 公司之非控股權益。

分類為持作出售的非流動資產(及出售組別)乃按其賬面值與公平值減出售成本兩者之較低者計量,惟國際財務報告準則第9號範圍內的金融資產及遞延稅項資產則繼續根據相關章節所載會計政策計量除外。

#### 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATIONS

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

#### Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

#### Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the CGUs to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the CGUs and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill at 31 December 2024 was RMB143,325,000 (2023: RMB29,101,000). Further details are set out in note 16.

#### Impairment of property, plant and equipment and right-of-use assets

The Group assesses whether there are any indicators of impairment for all property, plant and equipment and right-of-use assets at the end of each reporting period. Property, plant and equipment and right-of-use assets with finite useful lives are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a CGU exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The carrying amounts of non-financial assets with finite useful lives are disclosed in notes 14 and 15.

#### 3. 重大會計判斷及估計

編製本集團的綜合財務報表時,管理 層須作出會影響所呈報收入、開支、 資產與負債的金額及其隨附之披露以 及或然負債披露的判斷、估計及假設。 有關該等假設及估計的不明朗因素可 能導致日後須對受影響資產或負債的 賬面值作出重大調整。

#### 估計不確定因素

有關未來之主要假設以及其他於報告期末會為下一個財政年度資產與負債 賬面值帶來重大調整風險之主要估計 不確定因素概述如下。

#### 商譽減值

本集團至少每年釐定一次商譽是否存在減值。釐定商譽是否減值須對獲定 配商譽之現金產生單位之使用價值計 。本集團就使用價值之來見價值計 對來自現金產生單位之預期未來現 對產進行估算,並選擇適當之縣現 以計算該等現金流量之現值。於面 上四年十二月三十一日之商譽賬二值 為人民幣 143,325,000元(二零二三年 人民幣 29,101,000元)。進一步詳情 於財務報表附註16。

#### 物業、廠房及設備以及使用權資產減值

本集團於各報告期末評估所有物業、廠房及設備以及使用權資產有否可減值跡象。於有跡象顯示賬期有雇的的 無法收回時會對可使用用權資產與 減值檢測。倘資產或現金產生單公的 展面值超逾其可收回金額(即較高者)的 賬面值超逾其使用價值的較高者的 減出售成本與其使用價值的較高者的 則視為已減值。可使用年期有限的 金融資產的賬面值於附註14和15披露。

Estimation uncertainty (Continued)

Provision for medical dispute claims

The Group may be subject to legal proceedings and claims that arise in the ordinary course of business, which primarily include medical dispute claims brought by the former patients. Provision for medical dispute claims is made based on the status of potential and active claims outstanding at the end of each year, and taking into consideration the assessment and analysis of external experts and the total claim exposure. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. As at 31 December 2024, the Group had contingent liabilities arising from medical disputes of RMB14,292,000 (2023: RMB13,949,000).

The situation is closely monitored by the directors of the Company and provision will be made as appropriate. Where the final actual claims are greater than expected, a material dispute claims expense may arise, which would be recognised in profit or loss for the period in which such a claim takes place. The provision for certain medical dispute claims at 31 December 2024 was RMB2,885,000 (2023: RMB1,222,000). Further details are set out in note 23.

估計不確定因素(續)

醫療糾紛索賠撥備

本集團可能面臨日常業務過程中產生的法律訴訟及索賠,主要包括前病別提出的醫療糾紛索賠。醫療糾紛索賠的撥備是根據每年年底潛在及未了結索賠而作出,並考慮到外聘專家的不協力分析及索賠總額。如果可能不可能不可能不過,如果有關責任披露為或然負債,除非經濟利益流出的可能性極低。

或然負債為過往事件產生的可能責任, 或然負債是否存在將僅透過發生或不 發生並非全部屬於本集團控制範圍內 的一項或更多不確定的未來事件所確 認。於二零二四年十二月三十一日, 本集團因醫療糾紛產生的或然負債為 人民幣14,292,000元(二零二三年:人 民幣13,949,000元)。

本公司董事密切監控相關情況及將會適時作出撥備。倘最終實際索賠高於預期,則可能產生重大糾紛索賠開支,而這可能於有關索賠發生期間的損益內確認。於二零二四年十二月三十一日,若干醫療糾紛索賠的撥備為約人民幣2,885,000元(二零二三年:人民幣1,222,000元)。進一步詳情載於附註23。

# 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATIONS (Continued)

Estimation uncertainty (Continued)

Estimated allowance for inventories

Inventories are valued at the lower of cost and net realisable value. The Group regularly reviews its inventory levels in order to identify slow-moving and obsolete inventories. When the Group identifies items of inventories which have a net realisable value that is lower than its carrying amount, the Group estimates the amount of write-down of inventories as allowance for inventories. If the net realisable value of inventories of the Group becomes lower than its carrying amount subsequently, additional allowance may be required. The carrying amount of inventories at 31 December 2024 was approximately RMB66,441,000 (2023: RMB71,975,000).

Provision for ECL for accounts and other receivables

The Group collectively assesses ECLs for accounts and other receivables, except for certain credit-impaired debtors which are assessed for ECLs individually. The measurement of ECL under IFRS 9 for the Group's accounts and other receivables requires judgement on, in particular, the estimation of the amount and timing of future cash flows when determining impairment losses and the assessment of any significant increase in credit risk. These estimates are driven by a number of factors, where the change of the factors which result in different levels of allowances, a lower/higher impairment loss may arise. The Group uses an assessment of both the current and forecast general economic conditions to estimate the probability of default, the loss given default and the impact on the forward-looking information. At the end of each reporting period, the Group assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable, supportable and available information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and also forward-looking analysis.

The information about the ECLs on the Group's accounts and other receivables is set out in note 39(iii).

#### 11. INCOME TAX EXPENSE

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and the Implementation Regulation of the EIT Law, a subsidiary which operates in Mainland China is subject to corporate income tax at a rate of 25% on the taxable income for both years. Certain subsidiaries of the Group in Mainland China are regarded as "small and micro enterprises" and, accordingly, were entitled to a preferential income tax rate of 5.0% (2023: 5.0%) for the year.

Under the two-tiered profits tax rates regime of Hong Kong Profits Tax, the first HK\$2,000,000 of profits of the qualifying group entity are taxed at 8.25% and profits above HK\$2,000,000 are taxed at 16.5%. The profits of group entities not qualifying for the two-tiered profits tax rates regime are taxed at a flat rate of 16.5%.

Accordingly, the Hong Kong Profits Tax for the qualifying group entity is calculated at 8.25% on the first HK\$2,000,000 of the estimated assessable profits and at 16.5% on the estimated assessable profits above HK\$2,000,000. Hong Kong Profits Tax has not been provided as the Group did not generate any assessable profits arising in Hong Kong during the year ended 31 December 2024.

### 11. 所得税開支

根據中國企業所得税法(「企業所得税法」)及企業所得税法的實施條例,於中國內地經營之附屬公司須就兩個年度應課税收入按稅率25%繳納企業所得稅。本集團於中國內地的若干附屬公司被視為「小微企業」,且因此於本年度享有5.0%(二零二三年:5.0%)的優惠所得稅率。

根據香港利得税的利得税兩級制,合資格集團實體首2,000,000港元溢利的税率為8.25%,而超過2,000,000港元溢利的税率為16.5%。不符合利得税兩級制資格的集團實體之溢利按16.5%統一税率納税。

因此,合資格集團實體首2,000,000港元估計應課稅溢利及2,000,000港元以上的估計應課稅溢利乃分別按8.25%及16.5%稅率計算香港利得稅。於截至二零二四年十二月三十一日止年度,由於本集團並無於香港產生任何應課稅溢利,故並無計提香港利得稅撥備。

Kanghua Haemodialysis CGU	康華血液透析現金產生單位	114,224	_
		143,325	29,101

#### Anhui Hualin CGU

The recoverable amount of the Anhui Hualin CGU has been determined based on a value in use calculation by reference to a valuation report prepared by an independent professional valuer. The calculation uses cash flow projections based on financial budgets approved by management for the next five (2023: five) years. Cash flows beyond the five-year (2023: five-year) period are extrapolated using a growth rate of 2.0% (2023: 2.2%). A pre-tax discount rate of 11.8% (2023: 13.4%) is used for this CGU.

Assumptions were used in the value in use calculation of the Anhui Hualin CGU. The following describes each key assumption on which management had based its cash flow projections to undertake impairment testing of goodwill:

Budgeted revenue

The basis used to determine the value assigned to the budgeted revenue was the revenue achieved in the year immediately before the budget year, adjusted for expected economic conditions and market development.

Discount rate

The discount rate used was before tax and reflected specific risks relating to the Anhui Hualin CGU.

In the opinion of the directors of the Company, any reasonably possible change in any of the above assumptions would not cause the carrying amount of the Anhui Hualin CGU to exceed its recoverable amount.

安徽樺霖現金產生單位

安徽樺霖現金產生單位的可收回金額已根據使用價值計算,並參考獨立專業估值師編製的估值報告釐定。該計算使用基於管理層批准的未來五年(二零二三年:五年)財務預算的現金流量預測。超過五年(二零二三年:五年)期的現金流量使用2.0%(二零二三年:2.2%)的增長率推斷。該現金產生單位使用11.8%(二零二三年:13.4%)的税前折現率。

計算安徽樺霖現金產生單位的使用價值時採用假設。下文載列管理層為進行商譽減值檢測而預測現金流量時所倚賴的各項關鍵假設:

預算收益 -

用於釐定分配予預算 收益的價值所採用的 基準為緊接預算年度 前一年內所實現的收 益,並就預期經濟狀 況及市場發展作出調 整。

折現率

所用貼現率並未扣除 税項,並反映安徽樺 霖現金產生單位的特 定風險。

本公司董事認為,上述任何假設的任何合理可能的變化均不會導致安徽樺霖現金產生單位的賬面值超過其可收回金額。

#### 16. GOODWILL (Continued)

Impairment testing of goodwill (Continued)

Kanghua Haemodialysis CGU

The recoverable amount of the Kanghua Haemodialysis CGU has been determined based on a value in use calculation by reference to a valuation report prepared by an independent professional valuer. The calculation uses cash flow projections based on financial budgets approved by management for the next seven years. Management considered that a forecast period of seven years is appropriate because the investment cycle in the healthcare industry is longer than other industries and in consideration of the development plan of the haemodialysis centres. Cash flows beyond the seven-year period are extrapolated using a growth rate of 2%. A pre-tax discount rate of 12.6% is used for this CGU.

Assumptions were used in the value in use calculation of the Kanghua Haemodialysis CGU. The following describes each key assumption on which management had based its cash flow projections to undertake impairment testing of goodwill:

Budgeted revenue

The basis used to determine the value assigned to the budgeted revenue was the revenue achieved in the year immediately before the budget year, adjusted for expected economic conditions and market development.

Discount rate

The discount rate used was before tax and reflected specific risks relating to the Kanghua Haemodialysis CGU.

In the opinion of the directors of the Company, any reasonably possible change in any of the above assumptions would not cause the carrying amount of the Kanghua Haemodialysis CGU to exceed its recoverable amount.

Kangxin Hospital CGU

Due to losses incurred for consecutive years and potential external challenges, including the intense competition for professional staff, in the Chongqing region, the Group had fully impaired the carrying amount of goodwill allocated to the Kangxin Hospital CGU in prior years. The goodwill attributable to Kangxin Hospital CGU was written off during the year ended 31 December 2024 following its classification as a disposal group held for sale (as detailed in note 17).

#### 16. 商譽(續)

商譽減值檢測(續)

康華血液透析現金產生單位

計算康華血液透析現金產生單位的使 用價值時採用假設。下文載列管理層 為進行商譽減值檢測而預測現金流量 時所倚賴的各項關鍵假設:

預算收益 -

用於釐定分配予預算 收益的價值所採用的 基準為緊接預算年度 前一年內所實現的 益,並就預期經濟狀 況及市場發展作出調 整。

折現率

所用貼現率並未扣除 税項,並反映康華血 液透析現金產生單位 的特定風險。

本公司董事認為,上述任何假設的任何合理可能的變化均不會導致康華血液透析現金產生單位的賬面值超過其可收回金額。

康心醫院現金產生單位

由於連續數年產生虧損以及重慶地區潛在的外部挑戰(包括專業人員的激烈競爭),本集團已悉數減值於過往年度分配至康心醫院現金產生單位的商譽版面值。康心醫院現金產生單位應佔商譽於截至二零二四年十二月三十一日止年度被分類為持作出售的出售組別後撇銷(詳情載於附註17)。

#### 17. DISPOSAL GROUP CLASSIFIED AS HELD FOR SALE

On 20 December 2024, the directors of the Company resolved to dispose of 55% equity interests of Kangxin Hospital to Silver Mountain Capital Limited ("Silver Mountain") or its affiliates. As the demerger of Kangxin Hospital (which was conducted under the laws of the PRC, pursuant to which Chongqing Kanghua Property, a wholly-owned subsidiary of the Company has been established to hold the land and buildings underlying the operations of Kangxin Hospital) was completed and the land and buildings were transferred to Chongqing Kanghua Property on 25 December 2024, Kangxin Hospital was in a condition ready for immediate sale.

The following assets and liabilities of Kangxin Hospital have been presented separately in the consolidated statement of financial position and were reclassified as held for sale as at 31 December 2024:

### 17. 分類為持作出售的出售集團

於二零二四年十二月三十一日,康心 醫院的以下資產及負債已於綜合財務 狀況表中單獨呈列,重新分類為持作 出售:

Kangxin Hospital is included in the Group's hospital services for segment reporting purposes (see note 5). As the anticipated net proceeds of the disposal exceed the net carrying amount of the relevant assets and liabilities and accordingly, no impairment loss has been recognised.

On 9 January 2025, the Company entered into a sale and purchase agreement with an independent third party, Beijing Pantheon Health Management Co., Ltd. (the "Purchaser"), a company established in the PRC and is under common control with Silver Mountain, for the disposal of 55% equity interest in Kangxin Hospital at a consideration of RMB34,936,000. The disposal was later completed on 8 February 2025.

就分部報告而言,康心醫院計入本集團的醫院服務(請參閱附註5)。由於預計出售的所得款項淨額超出相關資產及負債的賬面淨值,因此,並無確認減值虧損。

於二零二五年一月九日,本公司與獨立第三方北京鉑頌健康管理有限公司(「買方」,於中國成立的公司及受銀山資本共同控制)就出售康心醫院55%股權訂立買賣協議,代價為人民幣34,936,000元。出售事項其後於二零二五年二月八日完成。

The individual patients of the Group usually settle payments by cash, credit cards and mobile payment or through government's social insurance schemes. For credit card and mobile payments, the banks and counterparties normally settle the amounts approximately 30 days (2023: 30 days) after the transaction date. Payments by the PRC government's social insurance schemes will normally be settled by the local social insurance bureau or similar government departments responsible for reimbursing medical expenses for patients covered by the government's medical insurance scheme, which range from 30 to 180 days (2023: 30 to 180 days) from the transaction date. Corporate customers normally settle the amounts within 90 days (2023: 90 days) after the transaction date via bank transfers.

#### 20. OTHER ASSET (Continued)

Pursuant to the Management Arrangements, Silver Mountain shall provide a series of services with a view to improving and optimising the operations of Kangxin Hospital including the introduction of a German medical group "Artemed" to Kangxin Hospital to participate in daily management and operations, overseas resources, domestic resources, research capabilities, clinical achievement transformation, policy innovation, cooperation with medical colleges, key scientific construction, medical informatics, medical payment system, quality control, expert collaboration and cost control.

In return, Kanaxin Hospital shall pay to Silver Mountain a fee of RMB20 million (the "Brand Introduction Fee") to procure the introduction of "Artemed", and an annual fixed management fee of RMB10 million together with variable management fee which is based on certain percentage of Kangxin Hospital's annual revenue during the Service Period. During the year ended 31 December 2022, Silver Mountain had procured "Artemed" to sign a trademark licensing agreement with Kangxin Hospital for a nonexclusive right to use Artemed brand in Mainland China and the Group paid the Brand Introduction Fee of RMB20 million to Silver Mountain. According to the Management Arrangements, Silver Mountain shall refund a certain portion of the Brand Introduction Fee paid by Kangxin Hospital under certain circumstances, including, among others, in the event that Kangxin Hospital is not able to achieve the growth of audited revenue based on an agreed threshold during the performance period (i.e. the 12-month period beginning from the 1st day of the month after the completion of the transfer of management rights of Kangxin Hospital to Silver Mountain). As Kangxin Hospital met the target growth of revenue for the performance period and hence the Group was not entitled to refund of the Brand Introduction Fee from Silver Mountain.

In the opinion of the Directors, the payment of the Brand Introduction Fee is part of the Management Arrangements with Silver Mountain for its services during the Service Period and the introduction of German medical group "Artemed" brand could bring long-term benefits to the operations of Kangxin Hospital, and accordingly, the Brand Introduction Fee was amortised over the Service Period.

During the year ended 31 December 2024, the Brand Introduction Fee of Kangxin Hospital has been reclassified as asset held for sale in the consolidated statement of financial position upon the Group's commitment to dispose of Kangxin Hospital (as detailed in note 17).

Notes: (Continued)

(b) As at 31 December 2024, the balance comprises one variable-rate unsecured bank loan with an interest rate based on the LPR announced by the People's Bank of China, adjusted annually from the drawdown date. The loan carries an effective interest rate of 4.3% per annum and primarily serves to provide operating cash flow for Kanghua Hospital.

The loan is unsecured and financial guarantees have been provided by the Company and Mr. Wang Junyang, the chairman of the Group.

(c) As at 31 December 2023, the fixed rate secured loan represented a financing arrangement with Industrial and Commercial Bank of China Leasing Co., Ltd., an independent third party. Pursuant to the arrangement, the Group has transferred legal title of certain items of medical equipment to Industrial and Commercial Bank of China Leasing Co., Ltd., which shall then be leased back for use by the Group. The Group continued to recognise the transferred assets under property, plant and equipment and initially recognised a secured loan in an amount equal to the proceeds obtained by the Group. As at 31 December 2023, the loan carried an effective interest rate of 6.74% per annum. During the year, the loan was fully repaid and the legal title of the medical equipment had been transferred back to the Group.

At 31 December 2024, the Group had unused tax losses arising in Mainland China of approximately RMB650,610,000 (2023: RMB567,359,000) available for offsetting against future profits. No deferred tax asset was recognised in respect of tax losses amounted to approximately RMB610,010,000 (2023: RMB567,359,000) as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the tax losses can be utilised. The unused tax losses can be carried forward up to five years from 2026 to 2029 (2023: 2025 to 2028), to offset future taxable profits.

## 38. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

Management has assessed that the fair values of restricted bank balances, fixed bank deposits, bank balances and cash, financial assets included in accounts and other receivables, amount due to a non-controlling shareholder of a subsidiary, financial liabilities included in accounts and other payables and the current portion of bank loans approximate to their carrying amounts.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

The fair value of the non-current portion of bank loans has been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group's own non-performance risk for bank loans as at 31 December 2024 were assessed to be insignificant. In the opinion of the directors of the Company, their carrying amounts are not significantly different from their respective fair values.

The fair value of the Group's financial assets at fair value through profit or loss is determined by reference to recent transaction prices of the investments or carried at valuations performed by management, external valuer or related administrators.

#### 38. 金融工具的公平值及公平值層 級

管理層已評估受限制銀行結餘、定期 銀行存款、銀行結餘及現金、計入應 收賬款及其他應收款項的金融資產、 應付一間附屬公司的非控股股東款項、 計入應付賬款及其他應付款項的金融 負債以及銀行貸款流動部分的公平值 與其賬面值相若。

金融資產及負債的公平值按自願訂約 方之間現時進行交易(強迫或清盤出售 交易除外)中買賣該等工具的金額入賬。

以下方法及假設乃用於估計公平值:

銀行貸款非流動部分的公平值已通過使用目前可用於具有類似條款、信寬風險及剩餘到期日的工具的費率於二點期未來現金流量進行計算。於二點一四年十二月三十一日,本集團不斷,其數面險所導致的公司重數數為,其賬面值與其各自的公平值並無重大差異。

本集團按公平值計入損益的金融資產 之公平值乃參考該等投資之近日成交 價而釐定,或按管理層、外部估值師 或相關行政機構提供之估值列賬。

#### (i) Market risk

Interest rate risk

The Group is exposed to cash flow interest rate risk in relation to variable-rate bank balances and a bank loan due to the fluctuation of the prevailing market interest rate. The Group is also exposed to fair value interest rate risk in relation to fixed-rate fixed bank deposits, restricted bank balances and a fixed-rate bank loan. The Group currently does not have a policy on hedging of interest rate risks. However, management monitors interest rate exposures and will consider hedging significant interest rate risk should the need arise.

The Group's exposure to interest rate risk on financial liabilities is detailed in the liquidity risk management section of this note. The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of benchmark interest rate for loans offered by the People's Bank of China arising from the bank loan.

The sensitivity analysis below has been determined based on the exposure to interest rates for the bank loan and bank balances. The analyses were prepared assuming these balances outstanding at the end of the reporting period were outstanding for the whole year.

50 basis points (2023: 50 basis points) increase represents management's assessment of the reasonably possible change in interest rates. Management does not anticipate a decrease in interest rate for bank loan and bank balances in the next financial year having regard to the trends in benchmark interest rate for the loan offered by the People's Bank of China and global economic environment. Accordingly, sensitivity analysis on a decrease in interest rates is not presented.

If interest rates on the bank loan and bank balances had been 50 basis points (2023: 50 basis points) higher and all other variables were held constant, the profit for the year would increase by approximately RMB68,000 (2023: profit for the year would increase by approximately RMB262,000).

50個基點 (二零二三年:50個基點) 的增加指管理層對於利率合理的可能變動的評估。考慮到中國人民銀行提供的貸款基準利率的趨勢及全球經濟環境,管理層並不預期銀行貸款及銀行結餘的利率會在下個財政年度下調,因此並無呈列利率減少的敏感度分析。

倘銀行貸款及銀行結餘的利率上升50個基點(二零二三年:50個基點)及所有其他變數保持不變,年內溢利將增加約人民幣68,000元(二零二三年:年內溢利將增加約人民幣262,000元)。
