Board Statement

Dear Stakeholders,

Despite ongoing global and local challenges in 2024, I am pleased to report significant achievements this year. Kerry Properties remains steadfast in its commitment to sustainability and its Environmental, Social, and Governance (“**ESG**”) goals.

Board Oversight and Governance in Driving Sustainability Leadership

Our approach to sustainability is guided by the Sustainability Vision 2030 (“**Vision 2030**”) strategy, emphasising collaboration with stakeholders to enhance our influence and drive progress towards the United Nations Sustainable Development Goals (“**UNSDGs**”). This year we have launched our new mid-term 2030 carbon reduction targets as part of our commitment to achieve carbon neutrality by 2050. We are committed to reducing 2% of our Scope 1 & 2 greenhouse gas (“**GHG**”) emissions intensity on a year-on-year basis starting from this year. To continue efforts in reducing GHG emissions, we are working closely with the entire value chain to foster collaboration and innovation to advance our carbon neutrality roadmap by engaging them in our decarbonisation journey.

Under the Board’s leadership and guidance of Sustainability Council, the Sustainability Steering Committee (“**Committee**”) and its sub-committees offer ongoing support for executing the strategy. In 2024, the Committee strengthened communication and collaboration among management and promoted efficient realisation of the Vision 2030.

Sustainability Actions: Building Resilience and Inspiring Change

A group-level Climate Risk and Vulnerability Assessment (“**CRVA**”) across all managed

investment properties was conducted, to help us identify and mitigate potential risks posed by climate change, positioning us ahead of schedule to meet our Vision 2030 target achieving 100% completion. We also recognise biodiversity as an emerging topic in the real estate industry, Qianhai Kerry Centre and Hong Kong Kerry Centre have piloted on-site biodiversity assessments with reference to the Taskforce on Nature-related Financial Disclosures (“**TNFD**”) guidelines in 2024. The assessment will help us evaluate the microhabitats in these areas and minimise our impact on ecosystems, and we intend to extend this assessment to other properties.

We prioritise stakeholder engagement as a key pillar of our sustainability strategy, aiming to create a meaningful and positive impact on the world. Internally, we have formulated the Sustainable Event Management Guideline to promote internal awareness and integrate sustainable practices into all aspects of event planning and execution to promote waste reduction. We have also organised facilitation training for 14 colleagues as the first batch of Climate Fresk Facilitators to conduct workshop internally and externally as climate resilience programme.

Creating Positive Impact: Promoting Well-being

We continued to promote community and employee well-being and foster a healthier, happier living environment through various initiatives. We have proudly sponsored the "KERRY HONG KONG STREETATHON 2024" for the second consecutive year, solidifying our commitment to promoting wellness. This year, we incorporated UNSDGs elements into the event, targeting to raise community health consciousness as well as sustainability issues.

Meanwhile, our annual Step Challenge has become a flagship charity event, promoting walking habits and embracing healthy lifestyle by turning the steps initiated and accumulated by employees into donations. In 2024, we invested into a fund to sponsor projects on seawater filtration, ocean conservation and biodiversity preservation.

Recognising Our Efforts in Sustainability

Our sustainability performance continues to be recognised in major ESG ratings, reflecting our steadfast commitment to ESG excellence. We achieved a five-star rating in Global Real Estate Sustainability Benchmark (“**GRESB**”) for the fourth consecutive year, and were honoured as Regional Sector Leader and Regional Listed Sector Leader in the Asia Diversified category. Our MSCI ESG rating was elevated from A to AA, CDP ranking maintained at A-, and we have been included in S&P Global Sustainability Yearbook (Global) for the second consecutive year.

As we move into 2025, we remain deeply committed to advancing our Vision 2030. By working closely with our stakeholders, we aim to amplify our collective impact and deliver meaningful progress toward a more sustainable future.

For and on behalf of the Board

Kuok Khoon Hua

Chairman and Chief Executive Officer
Kerry Properties Limited
April 2025

Sustainability at a Glance

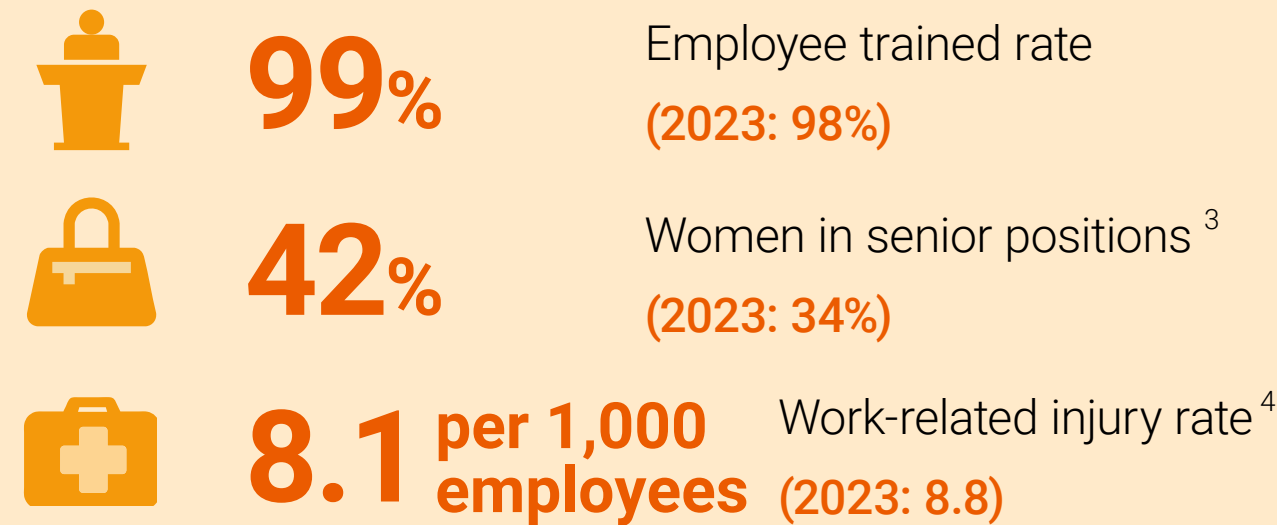

In 2024, we remained dedicated to achieving our sustainability vision targets and advancing along our sustainability roadmap. This section provides an overview of our 2024 sustainability performances highlighting our key ESG achievements and progress.

Environment

People

Community

Value Chain

Sustainable Finance

Sustainable Building

1. "Investment Properties" refer to our owned and managed investment properties in Hong Kong and the Mainland.

2. As compared to baseline year 2019. Performance data covers our Investment Properties. The increase in GHG emissions and energy usage was mainly due to the newly reported energy contributions from projects in Shenyang, Shanghai and Shenzhen.

3. Refer to directors grades or above. The percentage is calculated based on the total number of employees directly employed by the Group (including hotels). The figure is 45% if hotel employees are excluded from the calculation. As at 31 December 2024, the Group (excluding hotels) had 4,719 employees. For 2023 figure, it referred to senior directors' grade or above.

4. Refer to recordable employee work-related injuries that resulted in incapacity for a period of exceeding 3 days.

5. Our satisfaction surveys cover offices, retail, and residential properties managed by the Group.

6. As at 31 December 2024, the Group's total sustainability-linked loan facilities stood at approximately HK\$50,277 million.

7. Sustainable building certifications include BEAM/BEAM Plus, LEED, WELL, and Green Building Evaluation Label.

8. Calculated based on gross floor area ("GFA").

About Kerry Properties

Kerry Properties Limited (“**Kerry Properties**”, “**KPL**” or the “**Company**”, together with its subsidiaries referred to as the “**Group**” or “**we**”) is a well-established property company with significant investments in Asia. Through a focus on premium quality property developments in prime locations in the Mainland and Hong Kong, the Group has developed a successful business model over many years, gaining considerable experience as a developer and manager of quality properties. Acting on principles of fairness and integrity, we value the many relationships forged over our long history with employees, suppliers, partners, government agencies, and other key stakeholders.

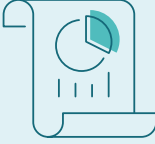

Kerry Properties is listed on The Stock Exchange of Hong Kong Limited (“**SEHK**”). The Group is committed to addressing stakeholders' concerns by maintaining transparent sustainability disclosures. Apart from its annual standalone sustainability report, the Group also shares its sustainability strategies, achievements, and performance through various sustainability benchmarks and indices.

Please refer to page 10 of our Annual Report 2024 for the complete list.

Demonstrate continuous improvement in major sustainability ratings, such as GRESB and Hang Seng Corporate Sustainability Benchmark Index (See section [Sustainability at a Glance](#))

Our Sustainability Journey

Our Sustainability Journey

Striving for a sustainable future with
dedication

Future Trends

- ▶ Stakeholders increasingly expect companies to demonstrate the broader impacts of their operations on society and the environment. This represents a shift from solely assessing how sustainability topics affect enterprise value to evaluating their outward impact on the world.
- ▶ There is an increasing demand for greater accountability in sustainability practices, with organisations being urged to integrate measurable targets and transparent reporting to demonstrate their commitments and progress.

Our Response

- ▶ Conducted double materiality assessment to evaluate our outward impact on society and environment, as well as inward impact on our enterprise value.
- ▶ Aligned ESG-related KPIs with company performance to encourage active engagement in sustainability initiatives and ensure individual contributions align with organisational sustainability goals.

Sustainability Vision

Our sustainability vision statement reflects our unwavering ambition to creating a greener, more sustainable future that benefits not only the present but also generations to come, ensuring lasting positive impacts on the environment and society.

Building Sustainable Future Together

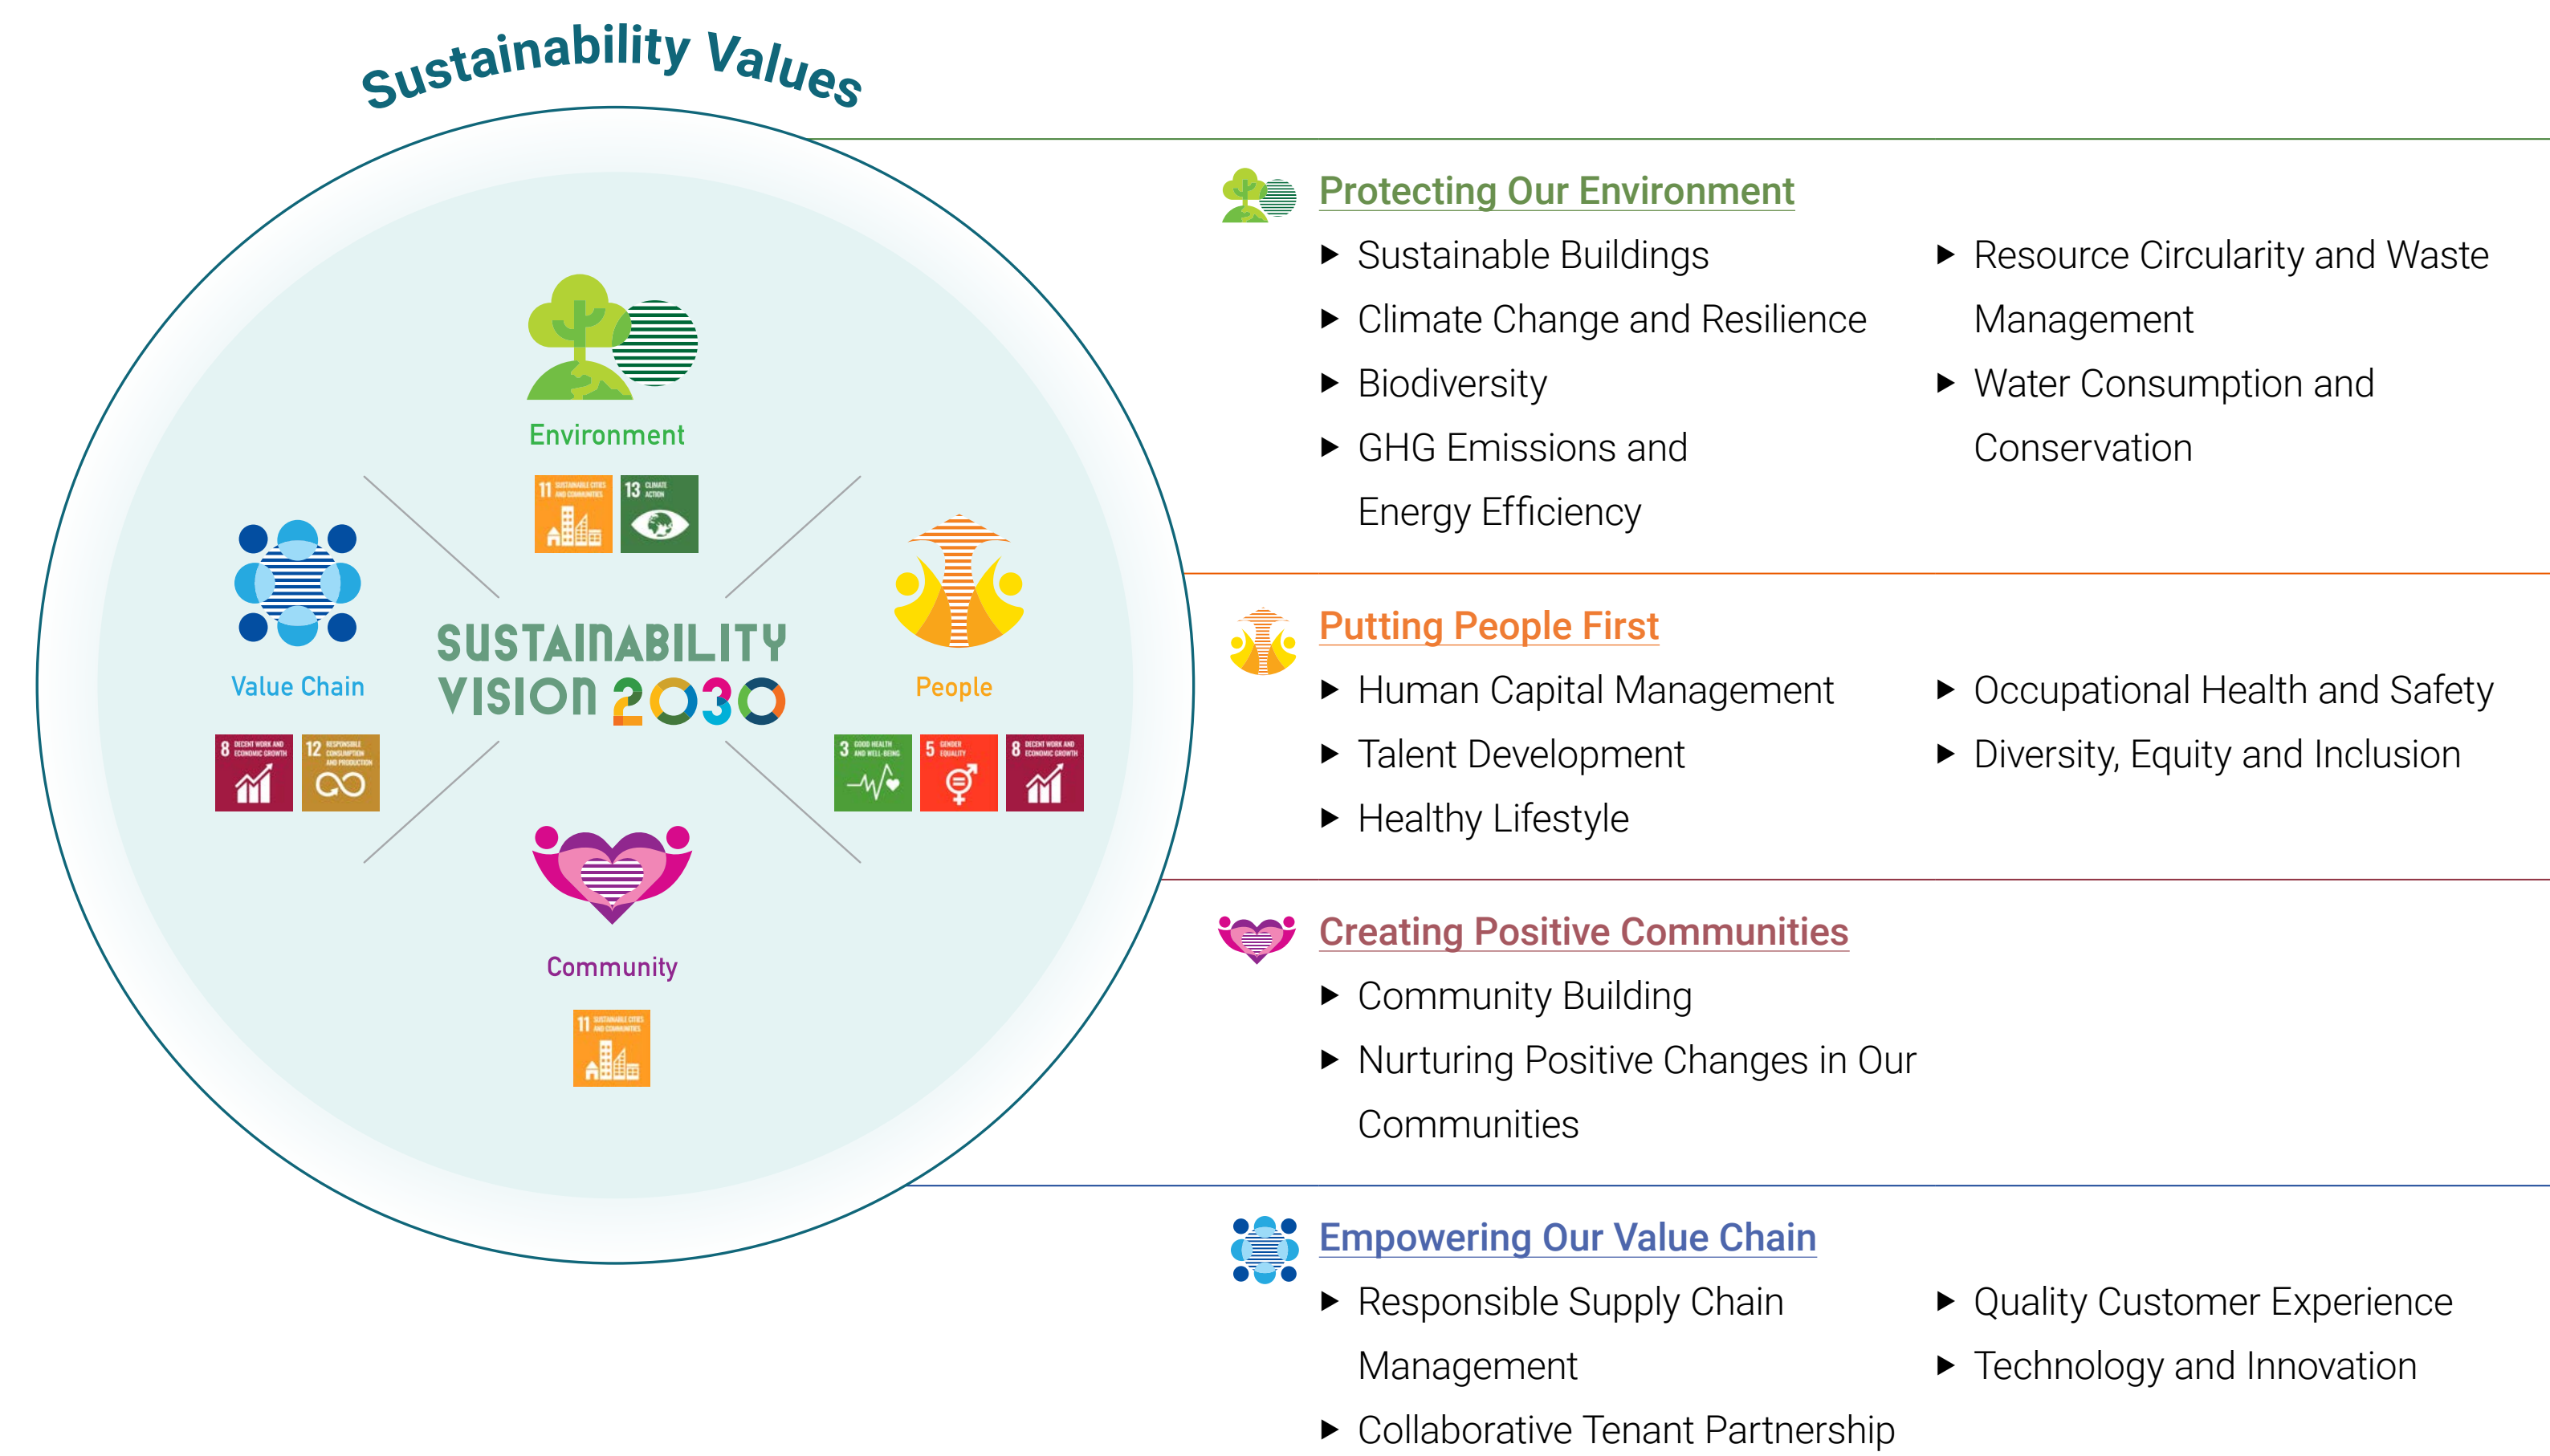

As a strategic sustainable developer, Kerry Properties continues to strive for excellent sustainability standards for our assets and throughout our communities, progressing towards our Vision 2030 and Carbon Neutrality by 2050.

We adopt a holistic approach to embedding sustainability in our business throughout our properties' life cycle: planning, procurement, construction, operations, and maintenance.

By working together with our stakeholders, we amplify the environmental and social impacts of our developments, aligning with our selected six UNSDGs. In the communities where we live, work, and play, we are dedicated to creating 'people-first places' that foster good health and well-being.

At Kerry Properties, we demonstrate our dedication to corporate sustainability by focusing on long-term shareholder value while contributing to a sustainable future for the community. Sustainability is embedded in all our business activities, guided by four core Sustainability Values: Environment, People, Community, and Value Chain.

These values shape the four key pillars highlighted in this Report: Protecting Our Environment, Putting People First, Creating Positive Communities and Empowering Our Value Chain, which provide detailed insights into our sustainability efforts. Through these initiatives, we aim to strengthen our market position and enhance our reputation within the community.

Sustainability Strategy

Sustainability is a core value that shapes our vision and drives our actions. We actively collaborate with stakeholders, leveraging collective influence to create meaningful change. Aligned with the UNSDGs and Vision 2030 targets, our sustainability efforts are guided by a dedicated sub-committee responsible for strategic planning, execution, and monitoring. By embedding sustainability into every phase of our developments – from upstream collaboration to downstream placemaking – we take purposeful action to align with our vision and ambition, ensuring impactful progress towards a sustainable future.

Sustainability Vision 2030 Targets

The Vision 2030 targets are our blueprint for infusing sustainability into every aspect of our operations in a measurable way. These targets undergo a thorough review process by the Sustainability Taskforces, Sub-committees, Convener, and the Committee. Once approved, they are reported to the Sustainability Council ("**Council**"), and subsequently distributed and implemented by respective units to drive our sustainability efforts forward.

As we have achieved our 2025 carbon reduction target ahead of schedule, we proudly announce a more ambitious 2030 carbon reduction target: reducing 2% of our Scope 1 and 2 GHG emissions intensity every year from now until 2030. This target not only demonstrates our commitment to achieving carbon neutrality but also provides transparency on how we shall reduce carbon emissions in our operations every year.

In 2024, apart from seven targets already achieved last year, we completed an additional target by intensifying our efforts to complete CRVA for 100% of our Investment Properties, helping our properties to analyse their climate risk exposure for climate resilience enhancement.

1. This target is newly introduced in 2024 and progress updates will be presented starting in 2025.

2. "**New Investment Properties**" refer to Investment Properties that are completed in or after 2019.

3. Refer to recordable employee work-related injuries that resulted in incapacity for a period of exceeding 3 days.

4. Refer to directors grades or above. The percentage is calculated based on the total number of employees directly employed by the Group (including hotels). The figure is 45% if hotel employees are excluded from the calculation. As at 31 December 2024, the Group (excluding hotels) had 4,719 employees. For 2023 figure, it referred to senior directors' grade or above.

5. "**New MUDs**" refer to MUDs that are completed in or after 2019, please refer to page 10 of our Annual Report 2024 for the complete list of MUDs.

Sustainability Pillars	Sub-category	UNSDG Indicator	Vision 2030 Targets	Target Status	2024 Performance	Compared to 2023

🟡 On track ✔️ Achieved

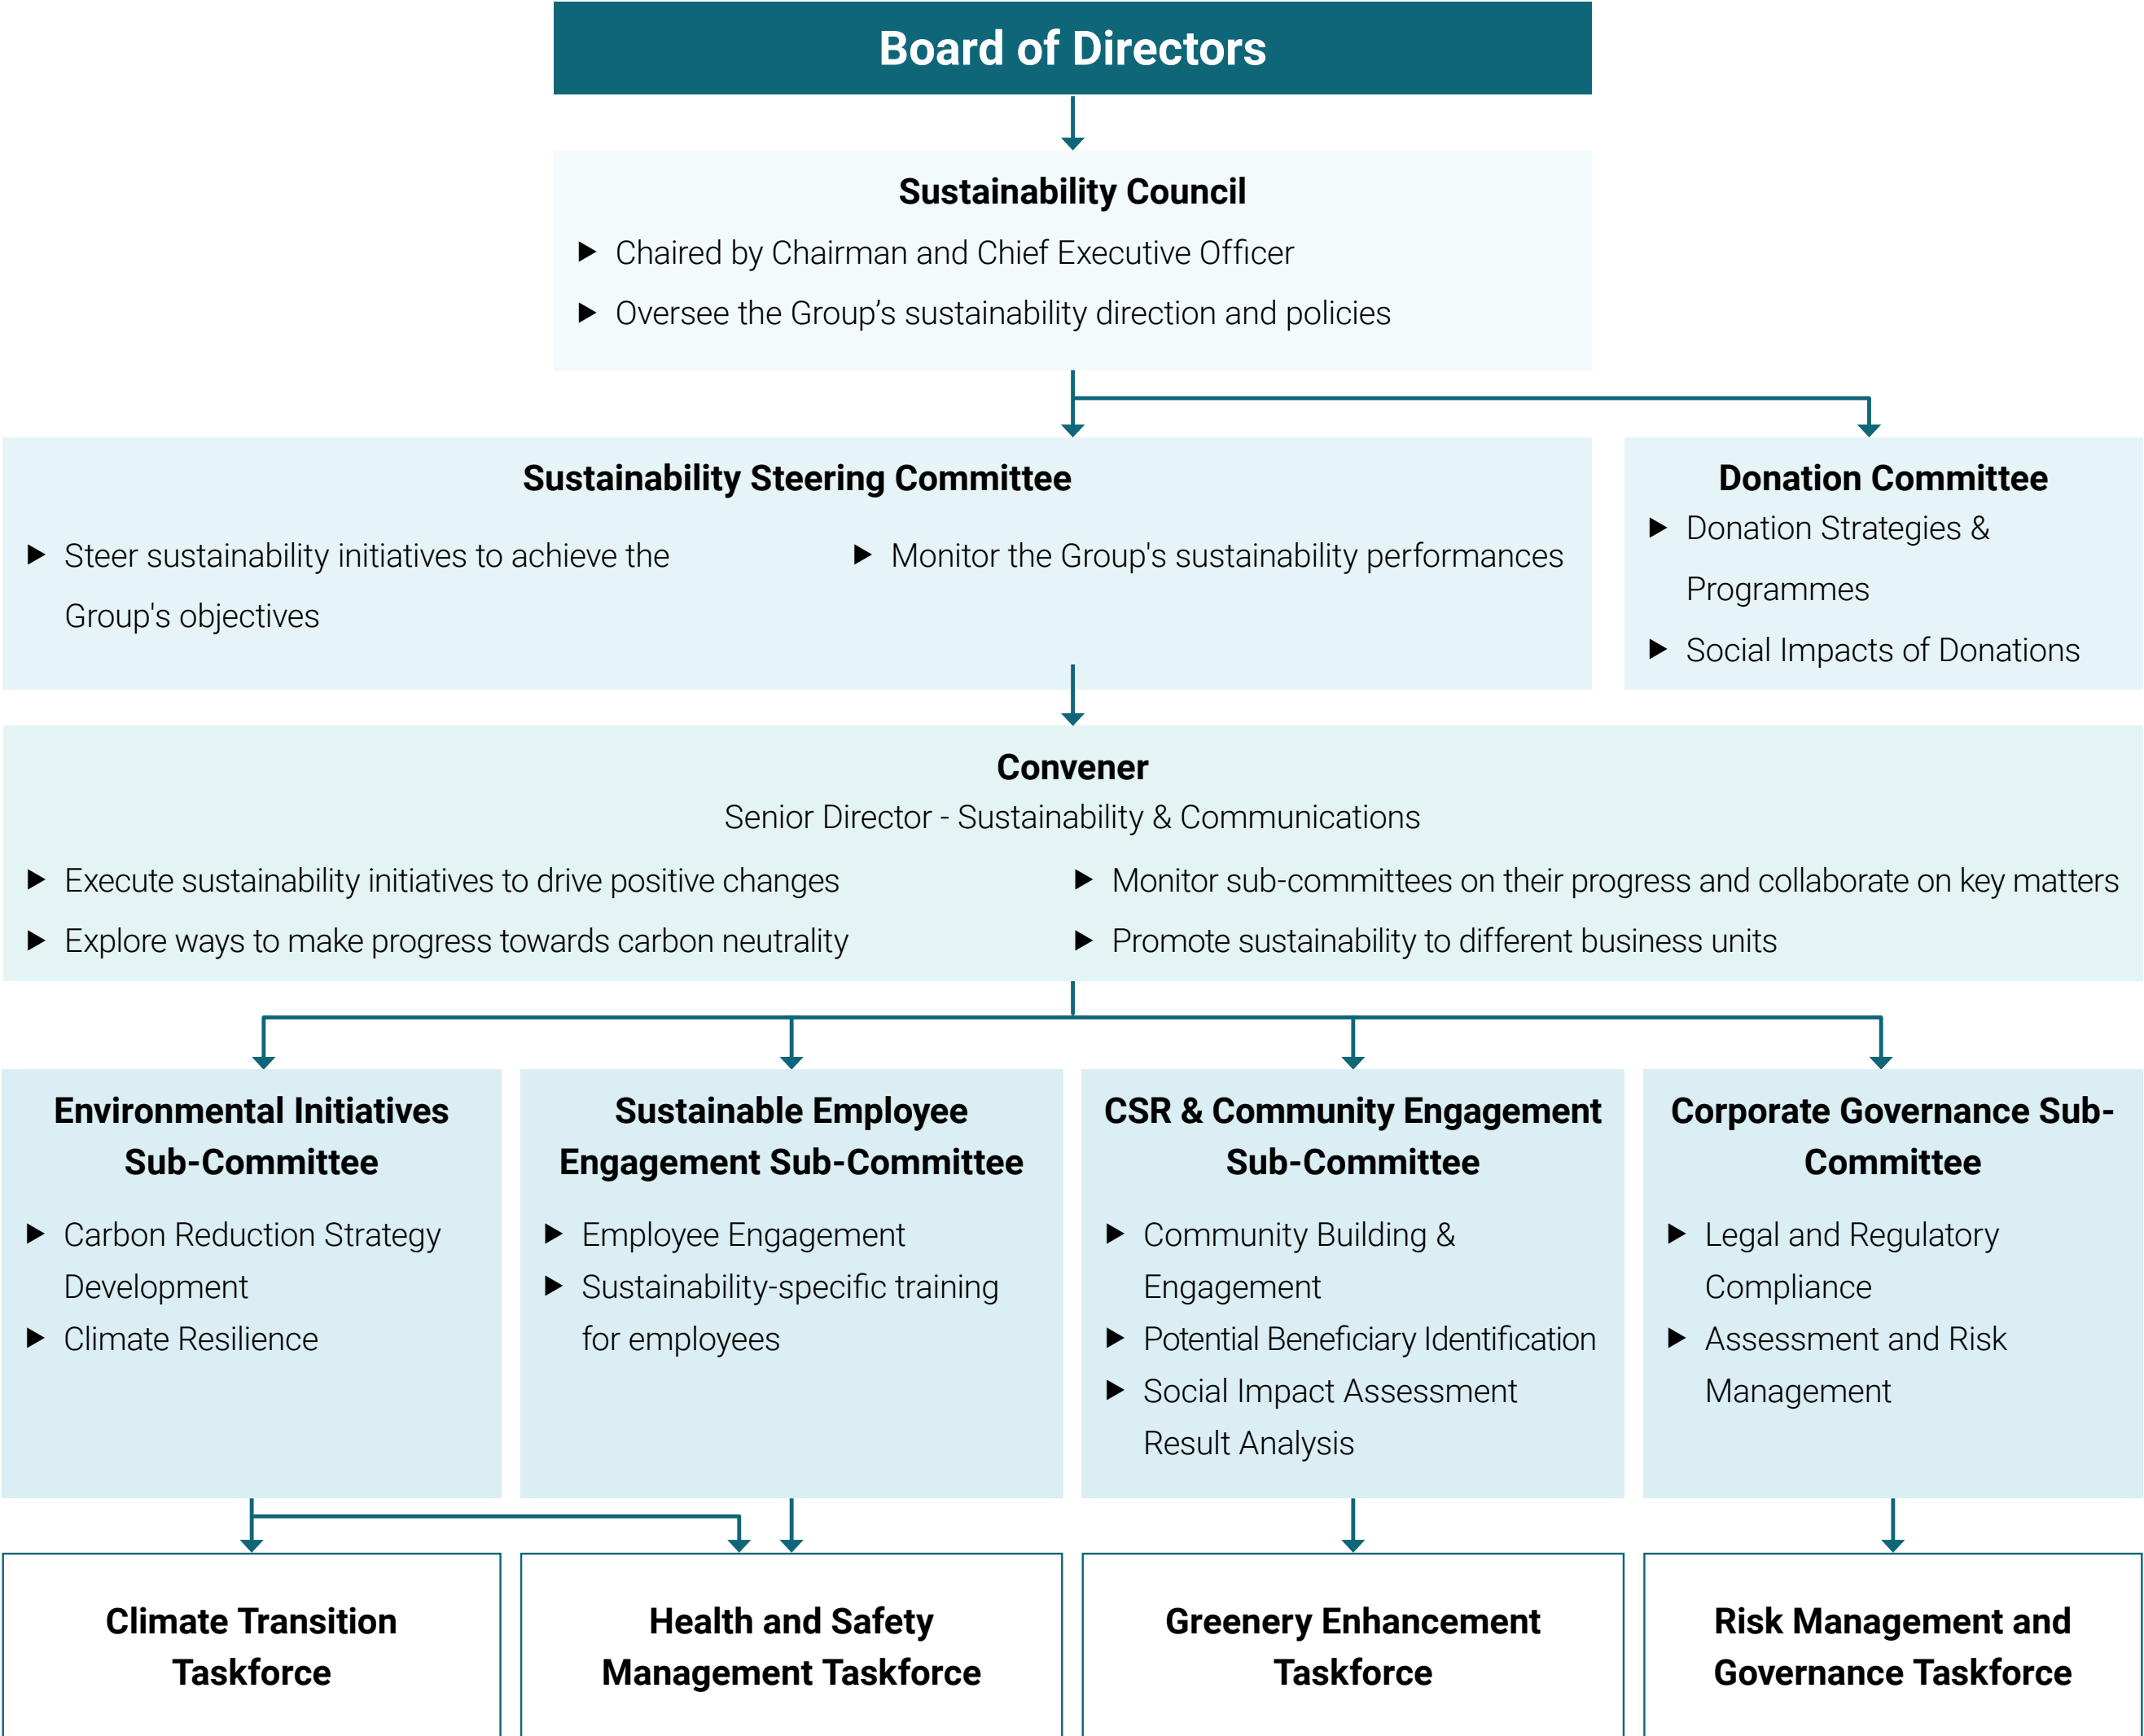

Sustainability Governance and Leadership

Building on the sustainability vision we have established, achieving our sustainability goals requires accountability from the Board of Directors (“**Board**”) alongside the dedication of leaders across the Company. By integrating cross-functional expertise with senior management’s focus and the Board’s oversight, our sustainability governance framework ensures alignment with material topics, initiatives, and overall business strategy.

Sustainability Governance Structure

Our sustainability governance framework relies on a combination of functional expertise, senior management leadership, and Board oversight to align strategies with critical business priorities. By establishing clear accountability, the framework ensures sustainability strategies are deployed in a coordinated and effective manner across our operations.

The Board oversees the Group’s sustainability and climate-related matters, ensuring that these are integral parts of our corporate agenda. The Board formulates a comprehensive strategy annually to harmonise the interests of various stakeholders and to set essential guidelines for all aspects of sustainability management. This annual strategic review ensures that our sustainability targets are consistently aligned with our business operations and stakeholder expectations.

Sustainability Council

Led by our Chairman and Chief Executive Officer, the Council reinforces our dedication to integrating sustainability into the highest levels of our decision-making processes and assists the Board in its sustainability-related duties.

Sustainability Steering Committee

The Committee, appointed by the Board, comprises Board members, senior executives of key functions and business units. The Committee is responsible for sustainability and climate-related matters within the organisation. In addition to sustainable business knowledge and mindset, Committee members are well-equipped to provide valuable insights, guidance, and forward-looking directions on sustainability.

Sustainability Sub-committees and Taskforces

Within the Committee, we have established four specialised sub-committees, each dedicated to tackling different aspects of environmental and social impacts. Their responsibilities include assessing the Company's management strategies for each significant topic, orchestrating stakeholder surveys, and drawing comparisons with both industry peers and best practices.

Regular Review of Sustainability Progress

The Committee has the following roles and responsibilities regarding sustainability:

- ▶ Report the summary of sustainability strategies and plan which are developed in collaboration with the sub-committees and taskforces for the Board's oversight
- ▶ Review performance and propose sustainability-related recommendations and targets to the Council and the Board
- ▶ Facilitate the Board's understanding of the Sustainability Report
- ▶ Review and approve the materiality assessment

2024 Sustainability Meetings

▶ **3** Committee meetings were held in 2024 with a

100% attendance rate

▶ **Monthly meetings among the Committee members**

▶ **Areas of discussion:**

- ▷ Vision and targets review
- ▷ ESG performances tracking
- ▷ Corporate compliance
- ▷ New climate disclosure requirements

ESG Policies

Our Group's policies underline our dedication to responsible practices in workplace quality, environmental protection, community investment, and operations. Regular reviews and updates ensure these policies stay aligned with operational considerations and evolving community needs. In line with upholding good corporate governance, the Board, relevant committees, and senior management carefully evaluate and approve all policies to maintain accountability and relevance.

23 ESG policies in force, including:

Environment

- ▶ Biodiversity Policy
- ▶ Climate Change Policy
- ▶ Environmental Policy
- ▶ Green Procurement Policy
- ▶ Group Environmental Protection Policy
- ▶ Sustainability Policy
- ▶ Water Stewardship Policy

People

- ▶ Corporate Health and Safety Policy
- ▶ Equal Opportunity and Anti-Discrimination Policy
- ▶ Human Rights Policy

Value Chain

- ▶ Personal Data (Privacy) Policy
- ▶ Sustainable Procurement Policy
- ▶ Vendor Code of Conduct

Community

- ▶ Charitable Donations Policy

Governance

- ▶ Anti-Corruption Policy
- ▶ Board Diversity Policy
- ▶ Competition Law Policy Statement
- ▶ Dividend Policy
- ▶ Nomination Policy
- ▶ Policy on Inside Information Disclosure and Insider Dealing
- ▶ Remuneration Policy
- ▶ Shareholders Communication Policy
- ▶ Whistleblowing and Complaints Policy

ESG-related KPIs

As part of our sustainability commitment, we have established ESG-related KPIs tailored to specific departments, ensuring a holistic and integrated approach across all business operations. These KPIs are aligned with the Company's overall ESG strategy and are regularly reviewed to reinforce sustainability as a core aspect of our corporate culture. Additionally, the accomplishment of these KPIs will be linked to company performance, motivating our teams to proactively embrace sustainable practices.

Examples of our KPIs include:

Environmental

- ▶ Obtain green building certificates
- ▶ Adopt low-carbon construction materials
- ▶ Achieve absolute carbon emission reduction

Social

- ▶ Conduct supply chain risk assessment
- ▶ Attend training sessions focused on sustainability topics

Governance

- ▶ Arrange sustainability-related training sessions for senior executives

All sustainability-related policies are publicly disclosed on our [corporate website](#) and [sustainability website](#).

Stakeholder Engagement and Double Materiality Assessment

Stakeholder Engagement Approach

We place significant emphasis on the concerns of relevant stakeholders regarding sustainability and overall strategy. We adopt a comprehensive approach to ensure timely and effective communication with each stakeholder group and integrate feedback into overall risk management. To widen and balance impact, in 2024 we increased the portion of external stakeholders in our surveys. The responses received from downstream and upstream business partners, as well as public stakeholders doubled as compared to last year.

By actively listening to various stakeholders’ feedback and incorporating their insights, we are better positioned to align our sustainability initiatives and strategic goals with the expectations and needs of our stakeholders. For instance, some colleagues reflected that they were looking for better career development through comprehensive training support. In response, new structural enhancements in human resources development was in place to focus more on training and development on cultural transformation.

Materiality Assessment

As part of our annual materiality assessment, in 2024 we engaged an independent consultant to facilitate stakeholder engagement and evaluate the materiality of ESG topics. A double materiality approach was used to evaluate each ESG topic from two perspectives:

Building on the findings of the previous materiality assessment, we strengthened the 2024 assessment by engaging both internal and external stakeholders in deeper discussions around impact and financial materiality. This process offered valuable insights to refine the materiality levels of ESG topics most relevant to the Group.

Process

Double Materiality Matrix

Following the double materiality approach, we identified 11 Material Topics as well as four Moderate Topics and seven Monitored Topics, summarised below:

Tier	Classification
1	Material Topics
Topics that have material impact on the Environment, Society and Enterprise Value of the Company. These topics are closely tied to our business model and must therefore be incorporated into business strategy and targets, with regular follow-up mechanisms in place.	
1	Occupational Health and Safety
2	GHG Emissions and Energy Efficiency
3	Responsible Supply Chain Management
4	Service and Product Quality
5	Sustainable Buildings
6	Climate Change and Resilience
7	Stakeholder Well-being
8	Community Engagement, Development and Investment
9	Business Ethics and Integrity
10	Customer Engagement and Collaboration
11	Innovation

Tier	Classification
2	Moderate Topics
Topics that have moderate impact on the Environment, Society and Enterprise Value of the Company. These topics are being addressed through our policies, ESG target setting, and risk management.	
12	Information Privacy and Security
13	Waste Management
14	Human Capital Management and Development
15	Economic Performance
Tier	Classification
3	Monitored Topics
Topics that have limited impact and are related to emerging issues within the regulatory framework on which we report. These topics are being addressed through compliance, supervision, and ongoing management perspective.	
16	Labour Practices and Human Rights
17	Heritage and Culture
18	Water Consumption and Conservation
19	Risk and Crisis Management
20	Biodiversity
21	Sustainable Finance
22	Diversity, Equity, and Inclusion

Analysis of Tier 1 Material Topics

The Tier 1 Material Topics were assessed based on their impact on enterprise value (i.e. financial materiality) and the impact on environment, economy and society (i.e. impact materiality). By addressing these priority areas, we aim to align our business strategies with stakeholder expectations and create long-term value for the business and the communities we serve.

Environment	
Tier 1 Material Topics	<div><div>► Climate Change and Resilience</div><div>► GHG Emissions and Energy Efficiency</div><div>► Sustainable Buildings</div></div>
Financial Materiality	Facing more frequent and severe extreme weather events, climate-related risks increase development costs for resilient properties. At operational level, energy efficiency measures mitigate financial risks and lower operational costs. Moreover, investing in sustainable buildings offers opportunities to attract like-minded tenants, positioning us to meet future market expectations and stay competitive.
Impact Materiality	Aligning with the Paris Agreement, incorporating climate-resilient features and sustainable practices throughout our buildings’ lifecycle lowers environmental impact and promotes well-being. Adopting energy efficiency and transition measures also reduces adverse effects on tenants, communities and the environment.
Business Strategies to Address the Material Topics	Our strategy includes assessing climate-related risks and emissions reduction potential, adopting energy-efficient design and integrating green building principles in our operations to align with global decarbonisation goals. We also strive to achieve LEED and WELL certifications to enhance environmental performance and occupant well-being.
Key Metrics for Monitoring Material Topics	<div><div>► By 2030, 100% of Investment Properties complete CRVA</div><div>► By 2030, 100% of Investment Properties adopt climate-resilient building features</div><div>► Reduce 2% of our Scope 1 and 2 carbon emission intensity every year</div><div>► By 2030, 100% of Investment Properties adopt wellness features in building design</div><div>► By 2030, 100% of New Investment Properties achieve green certifications</div></div>

People	
Tier 1 Material Topics	<div><div>► Occupational Health and Safety</div></div>
Financial Materiality	Enhancing occupational health and safety reduces operational risks, minimises financial liabilities, and improves employee productivity and morale. Addressing safety is crucial in high-risk industries.
Impact Materiality	Providing a safe and healthy working environment fosters well-being, protects human rights, and enhances job satisfaction, contributing to a stable and productive workforce.
Business Strategies to Address the Material Topics	We prioritise health and safety with rigorous systems, regular training, and continuous monitoring to ensure a zero-incident workplace.
Key Metrics for Monitoring Material Topics	<div><div>► By 2030, reduce work-related injury rate of employees to 10 per 1,000</div><div>► Maintain record of zero work-related fatalities among all our employees</div></div>

Value Chain	
Tier 1 Material Topics	<ul style="list-style-type: none">▶ Customer Engagement and Collaboration▶ Innovation▶ Responsible Supply Chain Management▶ Service and Product Quality▶ Stakeholder Well-being
Financial Materiality	Adopting innovative technologies enhances efficiency and products and services quality, boosting stakeholder well-being, customer satisfaction and loyalty, driving revenue and brand differentiation. In addition, prioritising sustainable suppliers ensures reliable sourcing, reduces disruptions, saves costs, and strengthens our reputation.
Impact Materiality	Collaborating with like-minded customers creates synergy, enabling us to tackle environmental and social challenges through shared goals and efforts. Providing reliable and safe products and services enhances customer well-being and fosters social cohesion in a sustainable community. A responsible supply chain encourages sustainable practices, fosters long-term partnerships, and drives broader ESG adoption.
Business Strategies to Address the Material Topics	We place customers at the centre of our strategy by collaborating with our stakeholder and leveraging innovation driven tools to deliver high-quality developments and services, enhancing satisfaction and strengthening long-term relationships. We also work with suppliers to uphold ethical, environmental, and social standards, ensuring sustainable sourcing and transparency.
Key Metrics for Monitoring Material Topics	<ul style="list-style-type: none">▶ At least 90% customer satisfaction rate▶ At least one new technology and innovation project/application/practice to be implemented annually at operational or business level▶ By 2030, 100% of contractors/suppliers are governed by sustainable procurement guidelines which contain mandatory diversity requirements▶ Maintain zero case of substantial complaints received▶ At least one stakeholder well-being activity or training session is arranged for each property or at group level

Community	
Tier 1 Material Topics	▶ Community Engagement, Development and Investment
Financial Materiality	Engaging with local communities builds trust, increases tenant loyalty, attracts business, and enhances our brand value.
Impact Materiality	Investing in local communities creates jobs, supports businesses, attracts investments, and promotes sustainable development.
Business Strategies to Address the Material Topics	We engage with local communities to understand their needs and invest in economic growth, education, and social welfare.
Key Metrics for Monitoring Material Topics	<ul style="list-style-type: none">▶ By 2030, 100% of New MUDs are planned and designed through a mandatory community engagement process, with but not limited to women, children, elderly, and disabled persons
Governance	
Tier 1 Material Topics	▶ Business Ethics and Integrity
Financial Materiality	Upholding business ethics fosters trust, mitigates risks, safeguards investor confidence, and ensures operational stability.
Impact Materiality	Ethical business practices support a fair marketplace, promoting social equity and confidence.
Business Strategies to Address the Material Topics	We uphold ethical standards with robust governance, compliance training, and zero tolerance for corruption.
Key Metrics for Monitoring Material Topics	<ul style="list-style-type: none">▶ By 2030, 100% of contractors/suppliers are governed by Vendor Code of Conduct which forbids forced labour, slave labour, and child labour▶ 100% employees are trained on business ethics and integrity, and anti-corruption

Protecting Our Environment

Every step towards Kerry Properties' decarbonisation is marked by measurable, multifaceted actions. Beyond reducing emissions, innovations such as climate resilience solutions and enriching local biodiversity are key to driving better performance, with the ultimate aim of creating harmony between nature and mankind.

Protecting Our Environment

Collaborating to achieve environmental sustainability and carbon neutrality

Future Trends

- ▶ A growing emphasis on nature and biodiversity conservation, with increasing awareness of the critical role ecosystems play in maintaining environmental balance and supporting livelihoods.
- ▶ Growing recognition of the importance of climate resilience has led to more comprehensive efforts by businesses and governments to assess climate risks and vulnerabilities, ensuring preparedness for future challenges.
- ▶ Increasing emphasis on corporate responsibility is driving companies to actively reduce GHG emissions and achieve carbon neutrality as part of their commitment to climate action.

Our Response

- ▶ Conducted a pioneering biodiversity assessment at Shenzhen Qianhai Kerry Centre and surrounding areas to identify key species and ecosystems at risk, ensuring informed decisions are made to protect local biodiversity.
- ▶ Completed CRVA across all Investment Properties ahead of our Vision 2030 schedule, allowing us to proactively address potential climate-related impacts across our operations.
- ▶ Beijing Kerry Centre received the Carbon Neutrality Certificate by China Beijing Green Exchange, becoming the first building in our portfolio to attain this milestone. This accomplishment underscores our commitment to reducing GHG emissions and advancing toward long-term carbon neutrality.

Feature Story

Promoting Environmental Stewardship to Achieve Carbon Neutrality

Kerry Properties remains steadfast in driving long-term positive impact and achieving carbon neutrality by 2050 through promoting environmental stewardship. From building resilience against climate risks and integrating proven methods into operations to enhancing biodiversity conservation, our actions go beyond compliance, redefining industry standards for sustainable development. Together with our stakeholders, we are making a tangible difference and shaping a future where people and nature thrive together.

Building Climate Resilience in Our Operation

In an era of increasing unpredictable weather events, Kerry Properties has taken pivotal steps to fortify our assets against extreme weather by conducting CRVA for all Investment Properties. With our pioneering data-driven approach to identify potential vulnerabilities, we are able to inform decision makers and stakeholders ahead of time, ensuring that specific risks are effectively adapted and mitigated throughout the buildings' life cycle.

This year, Kerry Properties carried out a group-wide [CRVA](#) across our Investment Properties and eight

major projects under development. In addition, we also completed a group-wide comprehensive carbon audit in Hong Kong and the Mainland for the first time. By examining the carbon footprint of each property in detail, we tailored specific and effective actions with stakeholders and enhanced our climate resilience strategy. Sharing insights from these assessments and audits increased awareness of precautionary measures to protect our properties and empowered stakeholders to actively foster a resilient operational environment.

Going Above and Beyond in Biodiversity Protection

Kerry Properties believes that we are jointly responsible for protecting the resilience of nature. In 2024, we piloted an on-site biodiversity assessment at Shenzhen Qianhai Kerry Centre and extended it to the neighbouring public space at Qianhai Stone Park. By evaluating the microhabitats in these areas, we aim to avoid and minimise our impact on ecosystems. This assessment demonstrates how the private sector can extend its efforts beyond traditional responsibilities to actively influence the development of biodiversity initiatives and policies of the public sector. Moving forward, we will monitor the outcomes of our mitigation efforts and extend the assessments to other properties as part of our continuous efforts in advancing urban biodiversity.

To raise awareness for biodiversity protection, we also invited our colleagues to participate in our annual Step Challenge where total steps accumulated were converted into donations supporting ocean conservation and biodiversity efforts. By transforming individual efforts into communal impact, the Step Challenge inspires our colleagues to take an active role in protecting the environment while fostering a sense of shared responsibility for nature.

Sustainable Buildings

Our Commitment to Green Building

In embracing sustainable design and innovative materials, we create buildings that are built for the future. Accredited sustainable building certifications achieved for our properties are recognition of our efforts in prioritising energy and water efficiency, reinforcing our commitment to sustainability. Through continuous improvement, we strive to enhance environmental performance of our buildings while delivering long-lasting benefits to the communities we serve.

Our Approach to Sustainable Buildings

Sustainable Design

- Incorporate sustainable, healthy and climate-resilient building design
- Apply Building Information Modelling ("BIM") technologies
- Install energy efficiency measures and solar photovoltaic systems at our properties

Wellness Integration

- Provide open space for the community
- Enhance indoor air quality ("IAQ") through the implementation of quality management systems
- Ensure our properties are accessible to all

Green Renovation Guidelines

- Establish green renovation guidelines encouraging tenants to adopt sustainable practices
- Promote the use of energy-efficient equipment in buildings to support the development of ultra-low energy consumption

95%

Investment Properties obtained sustainable building certifications

100%

Major MUDs achieved 3-STAR/ GOLD or above sustainable building certifications

40%

Investment Properties in the Mainland obtained LEED Platinum, LEED Zero Waste and TRUE Zero Waste sustainable building certifications

Smart Green Solutions

- Utilise the [KERRY+ mobile app](#) to create a zero-waste management system for sorting, collecting, and recycling various types of waste
- Introduce a smart irrigation system to manage plant watering through phone applications using harvested rainwater

Collaborative Community Engagement

- Engage community representatives, property managers, and tenants to address environmental issues collaboratively
- Encourage recycling initiatives and support green practices through tenant engagement programmes

Green Culture Promotion

- Foster a green culture through various communication methods, including videos and promotional materials, to raise awareness of sustainability efforts among tenants
- Document and share the green initiatives to inspire broader community participation in environmental actions

Revitalising Cultural Heritage

We strive to preserve architectural and cultural heritage, integrating historical narratives into modern developments to strengthen community identity. Kerry Properties plays a pivotal role in Shanghai's urban regeneration through its transformative development on Jinling Road with its unique arcade-style architecture. By adopting a 'retaining the shell, renewing the core' approach and advanced modelling, we connect key cultural and commercial hubs, blending Shikumen stone-gate homes and Lilong alleyways with modern urban planning.

Our Shanghai Huangpu Mixed-Use Development has achieved prestigious LEED Communities Platinum and WELL Community Precertification, underscoring our dedication to sustainable urban revitalisation. In preserving the historical façades of the iconic arcade-style buildings, we have created the largest protected area of arcade architecture in Eastern China, ensuring meticulous documentation and conservation of this iconic Shanghai neighbourhood.

Achieving Carbon Neutral in Renovation

In 2024, a renovation project at Beijing Kerry Centre became the first in our portfolio to achieve the leading Carbon Neutrality Certificate issued by China Beijing Green Exchange, setting a benchmark for sustainable development. 100% of the carbon emissions throughout the project's lifecycle – including material production, transportation, and construction – were verified and offset, achieving zero carbon across the entire process.

Integrating Heritage Preservation into Urban Development

Hangzhou Kerry Centre — a living tribute to Hangzhou's history — exemplifies how heritage preservation can integrate harmoniously with modern urban development. To accomplish this, we preserved the original brick craftsmanship and the historic essence of the site, each hand-fired brick reflecting the authenticity of the industrial era of the region.

Apart from consistently engaging stakeholders and implementing innovative strategies, we are dedicated to operational excellence. In recognition, Hangzhou Kerry Centre achieved multiple prestigious certifications in 2024, including LEED Operations and Maintenance Platinum, TRUE Zero Waste Platinum, LEED Zero Waste, and WELL Core Platinum.

Achieving LEED Zero

Shanghai Jing An Kerry Centre showcases our commitment to low-carbon operations with the adoption of energy-efficient measures such as removing excessive decorative lighting fixtures and adopting high-performance chillers and variable frequency drives for fans and water pumps. These measures resulted in a 15% reduction in operational energy consumption at the property as compared to the global office average.

First Property in Asia:

Achieved both LEED Zero Carbon and LEED Zero Waste Certifications

First Property in the Mainland:

Achieved LEED Zero Carbon Certification

Building Wellness Integration

Our property designs, in both new and existing developments, incorporate barrier-free and family-friendly amenities which ensures a secure and inviting atmosphere for all stakeholders. Our properties are conveniently located within a 10-minute walk from public transport, featuring sustainable transport facilities, like smart parking, bicycle amenities and EV charging stations to enhance local communities' accessibility.

As MUDs become increasingly integral to urban life, occupants' wellness emerges as a key priority to Kerry Properties. Over the past three years, we have actively participated in the WELL at scale Programme, underscoring our dedication to creating health-centric environments that seamlessly blend work and life to elevate occupants' satisfaction while delivering tangible business benefits.

A series of seminars and sharing events were held across cities, including STAY WELL @ BKC: Building a Sustainable Future at Beijing Kerry Centre, WELL Carnival at Shenzhen Qianhai Kerry Centre, and WELL 2024 RECHARGE: Nanchang at Nanchang Enterprise Centre. Industry leaders and experts were united to exchange insights and explore best practices of creating healthier office spaces, enhancing occupants' well-being, incorporating sustainable aesthetics, and ultimately achieving zero-waste operations.

Accessibility Features at Our Buildings

- Barrier-free washrooms, dedicated parking spaces, and access ramps for the disabled
- Real-time parking vacancy data and guidance through visual system
- Baby-caring and nursing rooms
- Clear evacuation plans for tenants and visitors

Promoting Wellness at Our Operations

Sustainability goes beyond infrastructure — it is about the people who inhabit these spaces every day. In 2024, we deepened our collaboration with the International WELL Building Institute ("IWBI") to advance the health and well-being for occupants and communities by referencing the WELL Building Standard.

Impacts and Achievement in 2024

Successfully impacted **69,162** people in **34** locations

Commitment and Engagement Award

received from IWBI

“Congratulations to Kerry Properties, a leader among leaders in advancing healthier people, better buildings and stronger organisations. Through their participation in WELL at scale, Kerry Properties demonstrates that they put their people first.”
Rachel Hodgson, President and CEO, IWBI

Improving Indoor Air Quality

The IAQ significantly impacts the health and well-being of building occupants. Maintaining excellent air quality remains a key aspect of our environmental sustainability practices and demonstrates our commitment to creating healthy indoor environments.

To achieve this, we implemented the following measures:

- Adopt building materials with low VOC/formaldehyde content
- Apply MERV-13 air filter with silver ion technology in air handling units
- Install purifiers inside refuse collections rooms to ionise bacteria
- Install CO sensor in carparks to monitor real-time IAQ
- Extend smoke-free environment and conduct regular IAQ sampling and monitoring

95%
Investment Properties adopt wellness features ²

2. Wellness features include IAQ Certification Scheme and RESET™ Air Core & Shell Certification.

Climate Change and Resilience

Strengthening Our Future Against Climate Challenges

Climate change poses significant risks to our business operations, assets, and stakeholders. To address these challenges, we have taken proactive steps to enhance climate resilience across our portfolio. We adopt a structured approach to climate-related risk management and disclosure, as well as establishing and monitoring our Carbon Neutrality Roadmap. This ensures that we remain transparent and accountable to stakeholders while addressing the risks and challenges posed by climate change.

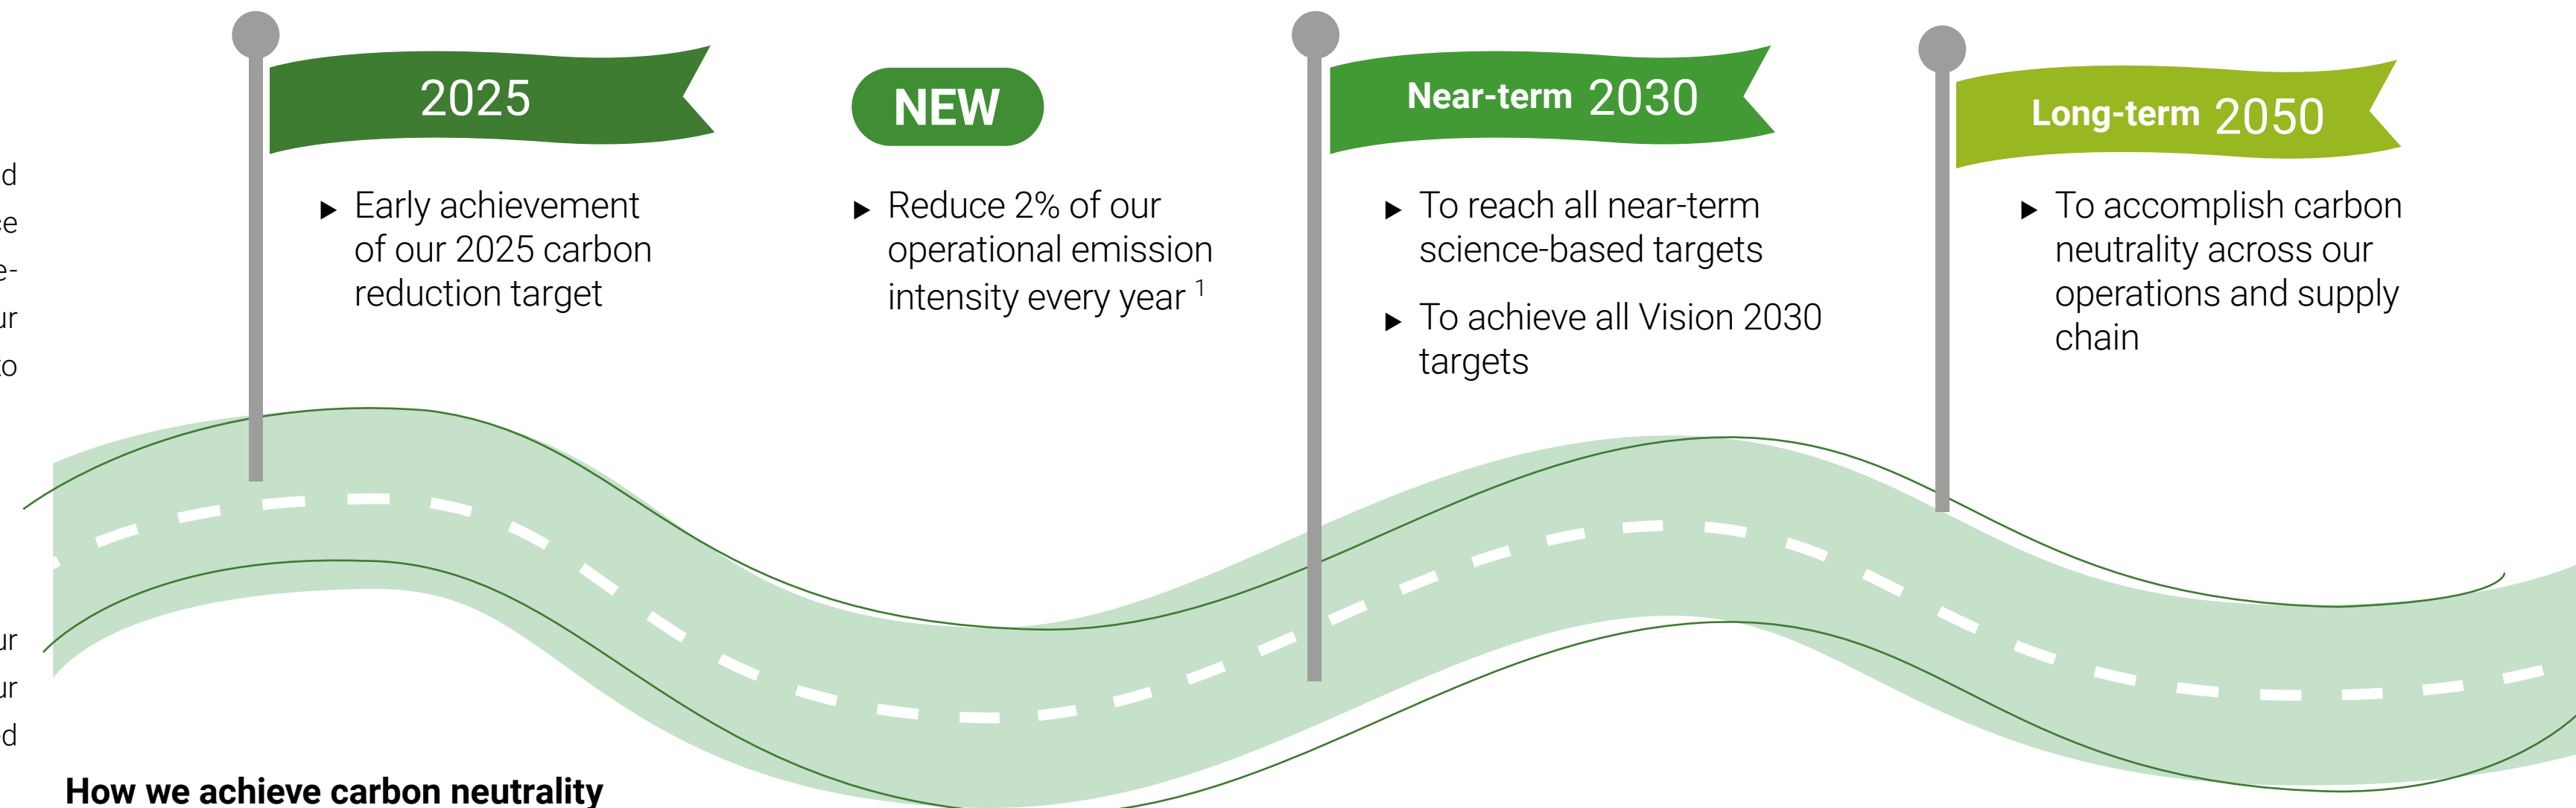

Commitment to Carbon Neutrality

Guided by the Climate Change Policy, a new roadmap has been developed to achieve our carbon neutrality goals. As part of this strategic initiative, we worked actively towards our targets set for 2025 and achieved the targets ahead of schedule. We have also redefined our near-term targets that will guide our ongoing progress.

In 2024, we remained steadfast in our commitment to the Science Based Targets initiative ("SBTi") to establish ambitious GHG emission reduction and net-zero targets, in line with the Paris Agreement's goal of limiting global warming to 1.5°C and achieving carbon neutrality by 2050. Currently, our targets are undergoing validation by SBTi.

In developing these reduction targets, we thoroughly analysed the carbon footprint of our major property developments and management operations in both Hong Kong and the Mainland. This exercise enabled us to pinpoint key areas for improvement in achieving the targets. By proactively engaging with stakeholders across the value chain, we have adopted innovative construction methods and leveraged technological advancements to enhance energy management and building management systems, thereby improving operational efficiency and driving our sustainability agenda.

Our Carbon Neutrality Roadmap

How we achieve carbon neutrality

Near-term Approach

Sustainable Building Design

- Achieve/maintain sustainable building certificates

Climate-resilient Operation

- Assess and manage climate-related risks and opportunities
- Implement smart management
- Source renewable energy alternatives
- Enhance energy efficiency
- Conduct regular group-wide carbon audit

Value Chain Engagement

- Actively engage our tenants, suppliers and contractors
- Adopt the Sustainable Fitting Out Guideline
- Encourage tenants to participate in the Dark Green Leasing Programme

Long-term Approach

- Leverage technology advancement in achieving carbon neutrality
- Explore high-integrity carbon offsetting and removal options for residual emissions

1. New target set to reduce Scope 1&2 emission intensity starting from 2025.

Climate Risk Assessment and Management

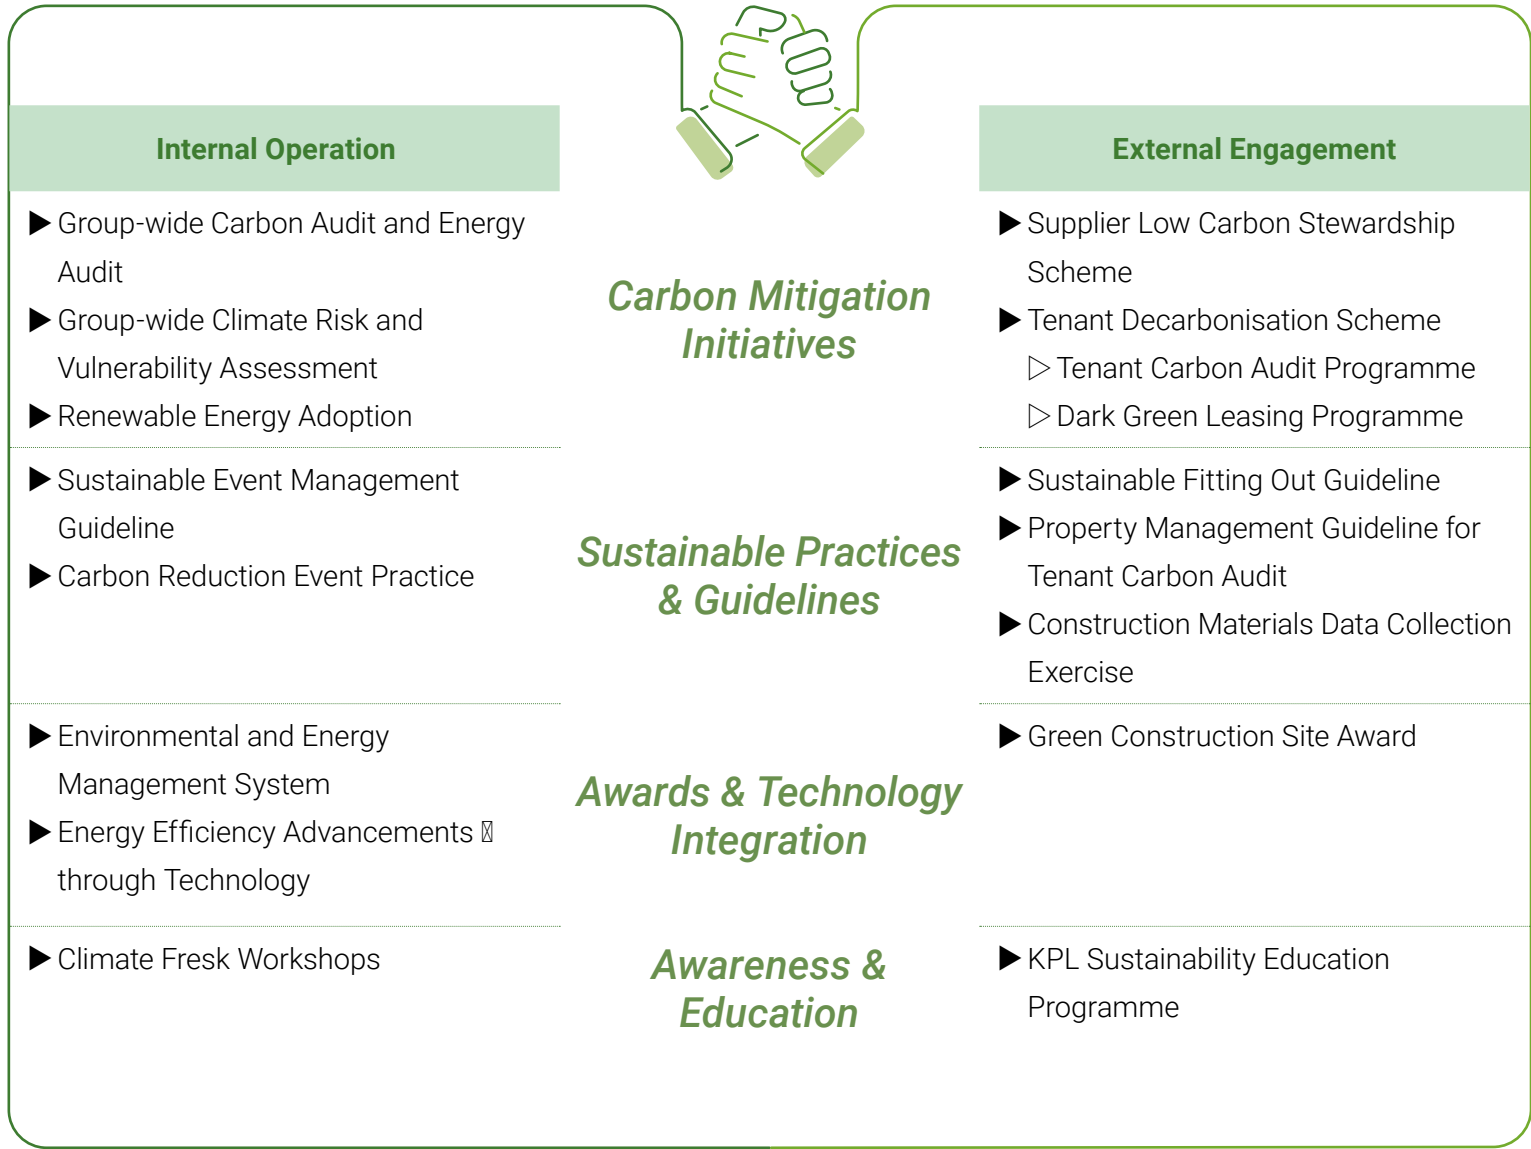

In 2024, we expanded the scope of building-level climate impact assessments across our portfolio and conducted comprehensive group-level CRVA. By understanding the risks associated with extreme weather events, we integrate them into our Carbon Neutrality Roadmap and business strategies, which can enhance the resilience of our properties while reducing carbon footprint.

For a detailed overview of our approach and initiatives, please refer to the [Climate-related Financial Disclosure](#) chapter in this Report.

Strategic Measures to Carbon Neutrality

In our ongoing efforts to reduce carbon emissions, we have launched an array of initiatives throughout our value chain and business sectors, and among our stakeholders. We are adopting a range of innovative approaches that combine improvements to physical infrastructure with various engagement activities.

Approaches Adopted in Recent Years

Group-wide Assessment

In 2024, a group-wide CRVA was conducted to evaluate the potential impacts of climate change on all our Investment Properties and eight major development projects. The study utilised universally recognised climate models under four scenarios: SSP1-RCP2.6, SSP2-RCP4.5, SSP4-RCP6.0, and SSP5-RCP8.5. Using the Atmospheric Circulation Model, Regional Climate Model and Geospatial and Economic data, asset values at risk were analysed for 2050, focusing on eight climate-related risks:

- ▶ Tropical Cyclone
- ▶ River Flood
- ▶ Landslide
- ▶ Wildfire
- ▶ Drought
- ▶ Extreme Heat
- ▶ Extreme Cold
- ▶ Sea Level Rise

The findings provided a comprehensive understanding of vulnerabilities across our portfolio. Given the geographical locations of our properties, the assessment revealed that tropical cyclones and rising sea levels pose the most prevalent risks for our properties. Landslides, river floods, wildfires and extreme heat are some other identified risks that would have impacts across our portfolio.

Biodiversity

Enhancing Biodiversity for a Thriving Ecosystem

We are committed to mitigating the ecological impacts of our operations and addressing stakeholders' expectations. Our Biodiversity Policy provides a robust framework, integrating nature and biodiversity considerations into every operational step. Using tools like the TNFD's LEAP approach, ENCORE Biodiversity Module, and WWF Risk Filter Suite, we assess nature-related dependencies, impacts, risks, and opportunities, enabling us to plan actions that protect biodiversity effectively.

With most of our portfolio in built environments, where green spaces are shrinking and biodiversity loss is escalating, we have been evaluating nature-related opportunities to enhance living environments since 2023. A group-wide biodiversity assessment identified 33 dependency and impact indicators, offering insights into how our operations affect ecosystems and contribute to nature loss, while highlighting opportunities for positive change.

LEAP Nature Risk Assessment Approach

L – Locate

- Prioritise projects under development in Hong Kong and the Mainland based on biodiversity interactions

E – Evaluate

- Assess business dependencies on ecosystem services and exposure to nature-related risks
- Evaluate operational impacts on biodiversity and ecosystems to address nature loss

A – Assess

- Establish a framework to assess nature-related risks and opportunities across key sites
- Understand interactions between our operations and the natural environment
- Benchmark efforts and identify opportunities for biodiversity enhancement
- Set actionable goals to strengthen conservation initiatives

P – Prepare

- Collaborate with stakeholders to design and implement mitigation strategies
- Foster sustainable coexistence between developments and the natural environment

Pioneering Assessment in Qianhai

To better understand and enhance the natural ecosystems within the urban environment near our properties, we conducted a comprehensive pilot biodiversity assessment at Shenzhen Qianhai Kerry Centre and Qianhai Stone Park, in partnership with the Future Ecologies research group at the Southern University of Science and Technology (SUSTech). This collaboration reflects our dedication to leveraging expert knowledge and create a harmonious balance between development, human experience and nature.

In this collaboration, we embarked on a detailed survey of birds, pollinators, and plants, uncovering valuable insights into the ecological potential of our site and identifying actionable steps to foster biodiversity.

Wildlife Findings at Qianhai

The survey revealed diverse bird species with strong ecological connectivity to Qianhai Stone Park, highlighting its role as a key stopover along the East Asian-Australasian Flyway. Pollinators, including dominant insect species, were documented, showing potential for ecological enhancement through targeted improvements. The assessment identified 20 nectar source plant species, mostly non-native, indicating limited food options for wildlife due to aesthetic-focused planting. Introducing more native and fruit-bearing plants could create a more inclusive habitat. Special sightings, such as lizards, bats, and a House Sparrow using plastic for nesting, underscored the site's biodiversity potential and the impact of human activity.

Improvement Actions

Building on the biodiversity assessment, we are taking targeted steps to enhance biodiversity:

For Birds:

- Introduce native fruiting plants for year-round food
- Create accessible water sources and install nest boxes
- Implement bird-friendly designs like patterned glass to reduce collisions

For Pollinators:

- Increase native flowering plants and replace ornamental species
- Ensure continuous seasonal blooms to support diverse pollinator species

Community Involvement:

- Launch citizen science initiatives and educational activities
- Engage the public in biodiversity monitoring and awareness-raising

These efforts aim to transform Qianhai into a thriving urban ecosystem, balancing development with nature. The insights gained will support biodiversity-friendly urban development at our sites across the Southern Region and beyond.

Raising Stakeholders' Biodiversity Protection Awareness

We aim to inspire collective action for biodiversity protection by engaging stakeholders through immersive experiences and conservation initiatives. From educational events and nature explorations to hands-on restoration projects, our efforts aim to deepen understanding, foster appreciation for natural ecosystems, and encourage proactive contributions to preserving biodiversity.

Community Enlightenment Through Nature

Bird Exploration Family Day & International Bird Day Event

In 2024, HABITAT, our property development in Qinhuangdao, collaborated with the Qinhuangdao Beidaihe Bird Rehabilitation Centre to host the Bird Exploration Family Day 2.0. Through interactive activities and educational sessions, children learnt about the importance of bird protection and environmental conservation. These events used engaging and bird-focused activities to highlight how caring for the environment and protecting wildlife are essential for our well-being and the health of the planet.

✓ Qinhuangdao

Protect Wildlife, Save Good Lives

We are proud to sponsor a project to rescue injured and endangered wildlife and help them return to their natural habitat. The project was organised by a professional unit affiliated with the Shenyang Municipal Bureau of Natural Resources.

✓ Shenyang

Biodiversity Photography Expedition

Guided by experts, the biodiversity photography expedition at Shenzhen Kerry Plaza and Shenzhen Qianhai Kerry Centre celebrated the 2024 International Day for Biological Diversity by capturing the beauty of nature through photography.

✓ Shenzhen

Restoring Biodiversity through Native Planting

Biodiversity is restored by our planting of more than 100 local plant species at our buildings in Shanghai, enhancing the landscape's beauty while creating habitats that attract wildlife. This initiative fosters a thriving ecosystem, promoting ecological balance and supporting the preservation of natural habitats.

✓ Shanghai

Lighting Deep: Marine Environmental Art Exhibition

To celebrate World Oceans Day, Shanghai Jing An Kerry Centre held the Lighting Deep: Marine Environmental Art Exhibition inviting visitors to relax, enjoy and intimately interact with the ocean through a variety of artistic expressions and innovative installations.

✓ Shanghai

Step Challenge for Ocean Conservation

✓ Shenzhen

In 2024, our Step Challenge for Ocean Conservation initiative continued to make significant strides in preserving marine biodiversity. This year, the event supported a coral aquaculture and transplantation project in Dapeng Bay, Shenzhen. The removal of abandoned fishing nets from the seabed further enhanced the nearshore marine ecosystem, safeguarding marine life and their habitats.

GHG Emissions and Energy Efficiency

Reducing Our Carbon Footprint

Carbon Emission and Energy Consumption Performance

Ongoing monitoring of our carbon emissions allows us to understand the progress of our decarbonisation efforts. By implementing various energy saving and efficiency measures, we have observed remarkable progress along our emission reduction journey.

GHG Emissions Summary ¹

Energy Consumption Summary ¹

1. Data covers our Investment Properties.

2. As compared to baseline year 2019.

3. 1,039 tCO₂e GHG emissions under Category 1 as reported in page 85 is not listed below.

4. From which 405 tCO₂e GHG emissions were contributed by the Group's operational emissions from Investment Properties.

5. From which 854 tCO₂e GHG emissions were contributed by the Group's operational emissions from Investment Properties.

Scope 3 GHG Emissions along Our Value Chain

Working with our stakeholders is key to gathering activity data for our Scope 3 emissions measurement. Accurate data collection on Scope 3 GHG emissions is challenging due to the varying capabilities and methodologies of our partners, alongside our limited control over these sources. Reducing these emissions requires extensive collaboration with stakeholders and the integration of innovative and sustainable practices throughout the life cycle of our properties. Despite these challenges, we are committed to improving our data collection processes and fostering a collaborative environment.

Material Scope 3 Categories ³

Category 2: Capital goods

588,761 tCO₂e

Category 3: Fuel-and-Energy Related Activities

31,842 tCO₂e

Category 4: Upstream Transportation and Distribution

21,125 ⁴ tCO₂e

Category 5: Waste Generated in Operations

85,644 ⁵ tCO₂e

Category 13: Downstream Leased Assets

123,642 tCO₂e

Decarbonising Our Operation

Environmental and Energy Management System

We have established a robust Environmental Management System (“**EMS**”) and Energy Management System (“**EnMS**”) across our operations. These systems allow us to better understand and mitigate our environmental impacts and associated risks, while also enabling us to monitor performance and achieve sustainability targets. Our EMS and EnMS are certified to the ISO 14001 Environmental Management System and ISO 50001 Energy Management System standards, ensuring adherence to regulatory requirements while facilitating ongoing enhancements in our environmental and energy performance. Regular training on energy efficiency is provided to all employees to raise awareness of energy consumption reduction.

Deployment of a digital data platform for environmental data collection and smart meters for performance tracking, ensures comprehensive coverage across our Investment Properties. The Group’s internal audit team conducts annual environmental data verification. In addition, we have engaged independent external consultants to conduct carbon audits and energy audits. This third-party verification is essential in endorsing the credibility of our reported figures and ensuring the integrity of our environmental data management practices.

Sustainable Event Management Guideline

In 2024, we introduced the Sustainable Event Management Guideline, setting a framework for hosting sustainable events aligned with the Company’s ESG commitments. The guideline provides practical measures to reduce waste and carbon emissions and adopt eco-friendly practices throughout event planning and execution. It emphasises responsible material use, promotes energy-efficient solutions, and supports initiatives such as waste segregation and recycling. By adopting this guideline, we enhance our environmental responsibility and empowers internal teams to organise events that embody corporate values and foster sustainable community engagement.

Renewable Energy

Effective implementation of renewable energy is prioritised at Kerry Properties, where solar photovoltaic systems are installed at our properties. As we develop our Carbon Neutrality Roadmap, we are actively reviewing and refining our renewable energy strategy. Our goal is to facilitate a wider adoption of alternative renewable energy sources, in order to significantly reduce our carbon footprint and contribute to a more sustainable future.

We have successfully secured renewable energy and green electricity supply at our properties, and we target to increase proportion of renewable energy in the future.

On-site Renewable Energy Generation (kWh)

	Area of Solar Panel in Our Properties (ft ²)	2024	2023
The Mainland (2 properties)	12,080	188,982	203,622
Hong Kong (2 properties)	2,320	39,285	42,295

1. Calculated based on GFA.
2. Construction sites refer to projects in Hong Kong and the Mainland that are under development and are managed by the Group.

Energy Efficiency Advancements

Improving energy efficiency is a crucial lever in achieving our carbon reduction targets. Through environmentally responsible operations, we reduce our environmental footprint, while maximising energy efficiency and optimising resources utilisation.

Enhancing Energy Efficiency through Operational Upgrades

Lighting System Upgrade

We improved the lighting design in stairwells, parking lots and swimming pools, and applied more LED lights and sensor lights to improve electricity efficiency.

- Estimated electricity saved per year: 750,034 kWh
- Avoiding 314,353 kg of CO₂e GHG emissions

Heat Insulation Film

Heat insulation films for building surfaces were applied in more properties this year to block UV rays and help maintain indoor coolness.

- Estimated electricity saved per year: 145,178 kWh
- Avoiding 99,650 kg of CO₂e GHG emissions

Water Pump Renovation

Hong Kong properties renovated water pumping houses and installed high-efficiency water pumps to save energy.

- Estimated electricity saved per year: 63,253 kWh
- Avoiding 28,619 kg of CO₂e GHG emissions

Lighting, Heating, Ventilation, and Air Conditioning ("HVAC") System Upgrade

Frequency conversion fan renovations were conducted and the aging air conditioners were replaced with more efficient ones in properties across all regions.

- Estimated electricity saved per year: 767,718 kWh
- Avoiding 439,231 kg of CO₂e GHG emissions

Energy Saving with Balanced Wave Optimisers

More properties in Hong Kong installed Balanced Wave Optimisers for electrical systems to reduce energy loss and further improve electricity efficiency.

- Estimated electricity saved per year: 219,838 kWh
- Avoiding 85,737 kg of CO₂e GHG emissions

Group-wide Carbon Audit and Energy Audit

In 2024, we conducted a group-wide carbon audit covering 100% of our Investment Properties. By adopting a holistic whole-building analysis approach, we gained valuable insights into our overall building performance. These insights have been instrumental in identifying carbon reduction opportunities, actively guiding our ongoing initiatives to lower GHG emissions and shaping our future targets. Additionally, we regularly perform energy audits in our existing properties to evaluate energy consumption patterns. Through on-site evaluations and performing cost-benefit analysis, we uncover practical opportunities to improve energy efficiency across our properties in Hong Kong.

Carbon Reduction Awareness Events

Through a series of campaigns and seminars, such as the Kerry Low-carbon Pioneer programme and the Tree Planting Challenge 2024, we actively engage our stakeholders in promoting carbon reduction. The aim is to empower our stakeholders with knowledge and tools needed to make environmentally conscious decisions, ultimately contributing to a healthier planet for future generations.

In 2024, we hosted tree planting events in multiple cities and sponsored the planting of trees at Tai Lam Country Park in Hong Kong and in Shenyang.

Through the Kerry Low-carbon Pioneer programme, we invited the community to share photos of their healthy vegetable-based meals, promoting a healthier diet and reducing indirect water consumption, greenhouse gas emissions, and land degradation by choosing vegetarian options.

Resource Circularity and Waste Management

Embracing Circularity: Transforming Waste into Valuable Resources

In developing our waste management strategies, we uphold the principles of '4R' (Reduce, Reuse, Recycle, Replace) and embrace circularity throughout our entire value chain. Waste generation is monitored across the value chain using an online platform that allows us to assess our facilities' performance and the effectiveness of our waste management initiatives on a monthly basis. To ensure proper waste treatment, all waste is handled by licensed contractors, with regular qualification reviews conducted to maintain standards. As a result of our comprehensive waste management efforts, properties including Beijing Kerry Centre, Hangzhou Kerry Centre, Shanghai Jing An Kerry Centre and Shanghai Kerry Enterprise Centre Phase III have achieved verification under the LEED Zero Waste certification.

In our pursuit of waste reduction, we have introduced a Green Procurement Policy that prioritises products, materials, and suppliers with environmentally friendly attributes, enabling us to contribute to a more sustainable supply chain while reducing waste.

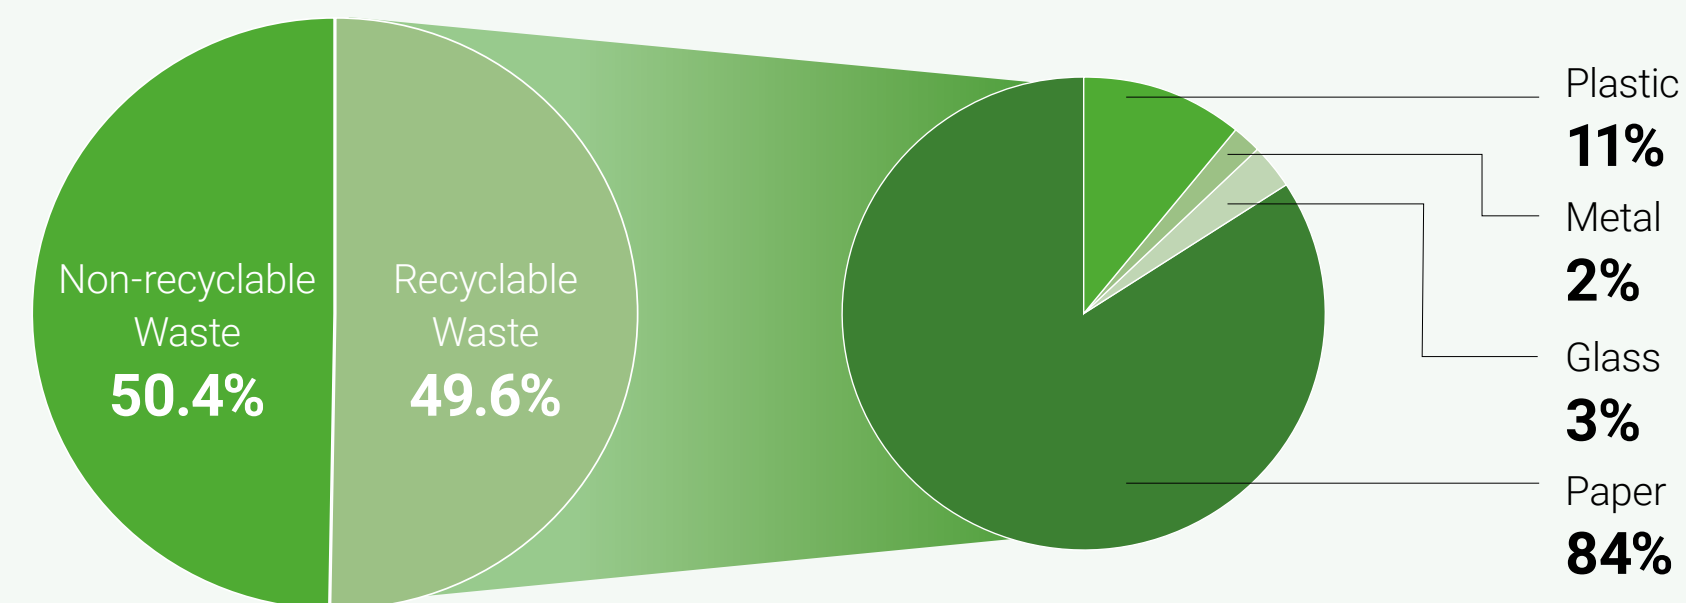

Waste Audit and Statistics

In 2024, we partnered with a social enterprise to employ individuals with hearing impairments to conduct a waste audit at our offices at Hong Kong Kerry Centre over a two-month period.

Besides identifying waste composition and exploring potential waste reduction strategies, a Lunch and Learn session was held to share with our employees effective recycling methods and practical steps to improve their recycling.

By offering ongoing guidance and awareness training to our employees, we have diverted about 50% of our office waste from landfills.

An Overview ¹ of Waste Composition

1. Data generated from our waste audit in Hong Kong.

Waste Reduction Initiatives

The introduction of comprehensive waste reduction initiatives across our operations addresses key areas such as operational waste (including food waste) and construction waste. These initiatives reflect our dedication to environmental responsibility, focusing on minimising waste, promoting recycling, and fostering sustainable practices across different phases of operations.

Monitor Waste Data on the KERRY+

By leveraging Internet of Things ("IoT") technology, we have implemented waste data monitoring through our mobile app, KERRY+. The app is available to all registered customers, tenants and employees, enhancing data transparency and fostering cooperation among stakeholders in our initiatives to reduce waste.

Operational Waste Approach

Smart Recycling Solution

At Mantin Heights, we spearheaded Hong Kong's first IoT-enabled smart recycling system in a residential estate, inspiring tenants and residents to embrace sustainable living. Paired with the [Kerry Living App](#), our user-friendly machines streamline sorting into seven key categories, turning recycling into a rewarding experience. This pioneering effort boosts participation and supports our goals of circular living and waste reduction.

Modern Waste Management

A recycling centre operating for on-site food waste and recyclables treatment at Shanghai Kerry Everbright City Phase III has resulted in:

- 91% of waste recycled
- 100% of food waste processed by the bio-chemical processors on-site

Shanghai Kerry Everbright City Phase III

- First property in Asia to obtain LEED Zero Waste certification
- One of the ten cases of modern environmental governance by Shanghai government

In addition to placing recycling bins across our premises, we actively encourage tenants and occupants to participate in various recycling schemes to minimise environmental impact.

As food waste constitutes a substantial proportion of our overall waste, we are taking proactive measures to address this issue – among them, expanding the availability of food waste collection bins across more properties and enhancing processing systems to improve waste management. Through a pilot initiative with selected food and beverage tenants, we aim to enhance the separation and proper disposal of food waste. Additionally, partnerships with NGOs facilitate the collection of excess food from residents and tenants, promoting waste reduction and sustainable practices.

Black Soldier Fly Food Waste Recycling

We diverted over 700 kg of food waste from landfills in 2024 via the Black Soldier Fly Food Waste Recycling Programme. Recognised for its impact, the Programme received the Galaxy Awards 2024 – Silver Award for Promotion: Sustainability & Legacy, reflecting our ongoing commitment to environmental innovation.

Watch the Video

As we strive to minimise waste generation, operational waste management is evolving to incorporate sustainable daily habits. By integrating individual behavioural changes into operational waste strategies, we can collectively drive progress by turning byproducts into valuable resources and fostering more sustainable consumption patterns at scale.

Home Greening Workshop

Our landscape managers hosted a Home Greening Workshop at Hong Kong Kerry Centre with the Friends of the Earth (HK) to share insights on home plant maintenance, such as reusing coffee grounds as fertiliser.

Zero-waste Gardening Workshop

A Zero-waste Gardening Workshop was organised at Beijing Kerry Centre to introduce zero-waste planting principles, highlighting soil fertility improvement, organic matter recycling, and microclimate benefits.

Food Waste • Way Out Campaign

The launch of the Food Waste • Way Out Campaign at most of our residential and commercial properties in Hong Kong aimed at promoting behavioural change in reducing food waste. Food waste containers sponsored by the KPL Sustainability Sponsorship Fund were provided to participating residents for their daily collection.

Hong Kong

Loop Market

The Loop Market at Shenzhen Kerry Plaza and Shenzhen Qianhai Kerry Centre promotes the principles of the circular economy by encouraging recycling and reuse. Community members can set up stalls to sell or barter pre-owned goods. With carnival game activities and live band performances, the market creates a vibrant space for sustainable living while fostering awareness of resource reuse and second-hand culture.

Reimagining Plastic: A Creative Sustainable Art Exhibition

The Art Exhibition at Shenyang Kerry Centre Enterprise Square showcased creative artworks made from discarded plastic sourced from tenants, transformed it into a nature-inspired ecosystem of trees, flowers and greenery.

Property Development Waste Approach

Prioritising efficiency from the very beginning, we carefully manage resources during the planning and design phases to optimise their use before construction starts. This action not only reduces resource consumption but also helps lower embodied carbon, contributing to our sustainability goals. By setting a strong foundation for resource optimisation, we encourage building contractors to minimise waste during construction. Additionally, we implement various management strategies to control and reduce construction site waste to avoid disposal in landfill.

Resource Circularity: Preserving Architectural Legacies

Old bricks, tiles and stone frames were carefully salvaged from historical buildings in Shanghai Jinling Road area, reflecting a commitment to sustainability and heritage preservation. These construction materials were thoughtfully recovered, upcycled and integrated into the structure of the new buildings, not only reducing waste but also honouring the architectural legacy and cultural significance of the original structures.

Shanghai

Repurposing Construction Waste

Hangzhou

The Construction Waste Repurposing Workshop inspired our colleagues in Hangzhou to turn construction waste into creative artwork.

Hangzhou

Creating Value through Waste Recycling

Deforested trees from Hong Kong Tsuen Wan Development Project were upcycled into a bench and placed at Hong Kong Enterprise Square Five to raise public awareness on sustainability.

Hong Kong

Waste Management Plan

In our construction projects across Hong Kong and the Mainland, we have put in place detailed waste management plans that concentrate on the demolition phase. These plans aim to minimise environmental impact by reducing waste generation, enhancing recycling efforts, and ensuring that any remaining waste is disposed of responsibly throughout the entire building lifecycle.

Notably, our waste recycling programme has been adopted in 100% of construction sites in Hong Kong and the Mainland. Materials that can be easily recycled, such as metals used in the construction process will be collected by contractors for sale or reuse at other construction sites in Hong Kong.

Waste Reduction Target

Under a waste recycling target established for our construction sites in Hong Kong, contractors are mandated to achieve a minimum recycling rate of 60% for construction and demolition (“C&D”) waste.

A tracking system is utilised to monitor the waste management activities of our contractors, ensuring compliance with recycling requirements. Additionally, building contractors that achieve a 70% C&D recycling rate are eligible to receive rewards as a recognition for their environmental stewardship.

Education and Guidelines

In our pursuit of effective waste management, a range of policies and guidelines are specifically tailored for our construction activities in Hong Kong and the Mainland. Furthermore, we provide educational sessions to ensure that building contractors and workers are fully informed and capable of implementing the waste management techniques. Please refer to the [Empowering Our Value Chain](#) chapter for more details.

Practices and Measures

We implement comprehensive recycling and repurposing practices, ensuring materials like broken concrete, metal, timber, plastics, paper, and cardboard are collected and recycled wherever possible. Additionally, excavated soil is reused for on-site backfilling, while residual concrete is utilised to fill gaps on steel platforms, reducing the risk of tripping hazards.

Water Consumption and Conservation

Our Commitment to Water Efficiency and Responsible Consumption

At Kerry Properties, our commitment to responsible water usage is governed by our Water Stewardship Policy, guiding our strategic approach to water management across all operations. This policy is monitored and periodically evaluated by our Sustainability Steering Committee.

Water Consumption and Risk Assessment

Assessment on Water-related Risk

We continued to conduct water stress assessment in 2024 using the World Resources Institute's ("WRI") Aqueduct tool. To ensure a comprehensive result, this tool, underpinned by the Aqueduct Water Risk Atlas, considers various parameters including future water quantities, risks related to water quality, and potential regulatory changes at the local level.

Having assessed most of our operations and existing properties, including offices, retail spaces, and residential buildings, the findings revealed that 49% of these facilities are located in areas that would experience high water stress under the business as usual scenario in 2050. Despite this, we have not faced difficulties in sourcing fresh water. Recognising our responsibility to conserve water, we are dedicated to implementing strategies that enhance water efficiency and reduce consumption across all our properties.

Baseline Water Stress and Risk Analysis

Water Stress Level ¹

1. Data covers our Investment Properties.

Water Management Measures

Conserving Freshwater

We prioritise the implementation of water conservation measures and acknowledge the essential value of freshwater resources. To identify opportunities for water conservation, we conducted a comprehensive assessment of water usage. The initiatives outlined below can help reduce water consumption and enhance water efficiency.

Property Development

- ▶ Provide incentives to contractors who recycle and reuse more than 30% of their wastewater
- ▶ Establish project-specific water consumption quotas
- ▶ Utilise treated wastewater for wheel washing
- ▶ Install rainwater harvesting systems to collect and reuse rainwater for irrigation and cleaning purposes

Property Management

- ▶ Install water recycling systems to collect and reuse rainwater
- ▶ Regularly inspect and maintain water pumps and pipes to prevent leaks
- ▶ Provide employee training on water efficiency and consumption reduction
- ▶ Conduct a feasibility study on using a dry flush waterless toilet

Ensuring Wastewater Discharge Quality

We actively monitor and adjust our wastewater treatment processes to ensure all discharged water meets regulatory requirements. Our compliance measures include:

- ▶ Installation of sedimentation tanks at construction sites to remove suspended solids from wastewater before discharge
- ▶ Installation and regular maintenance of grease traps to prevent grease from food and beverage facilities from flowing directly into public sewage
- ▶ Monthly laboratory testing on effluent discharge and weekly visual check on turbidity and pH tests by contractors
- ▶ Water quality testing prior to discharging swimming pool water to ensure the residual chlorine concentration meets the effluent criteria

Improving Water Quality and Ecosystem Health

One of our goals is to improve water quality and support healthier aquatic ecosystems through targeted initiatives that address water pollution and promote sustainable practices.

Bivalves Seawater Rejuvenation Initiative

To improve seawater quality in Hong Kong, we partnered with a local charitable organisation and introduced 300 oysters in Sai Kung. Each oyster filters up to 200 L of water daily, removing impurities and boost marine health.

Protecting Waterways through River Cleanup

Recognising the importance of clean waterways for ecosystems, we partnered with everwave in 2024 to successfully remove 18,400 kg of river debris in Cambodia.

Putting People First

Putting employee well-being first is deeply rooted in our corporate culture. From providing a health-centric workplace to motivating and enabling each individual's continuous growth and development, we build up our people's capacity to prosper, while doing good for society.

Putting People First

Cultivating stakeholder-centric spaces that put people first

Future Trends

- ▶ With a rising emphasis on employee well-being within organisations, particularly highlighting mental health and overall wellness, a healthy workforce is regarded as essential for productivity and development.
- ▶ Young employees are increasingly drawn to companies that prioritise sustainability and social responsibility, valuing purposeful work that aligns with their personal values and contributes positively to society and the environment.
- ▶ There is an increasing focus on diversity, equity, and inclusion (“**DEI**”) as companies recognise that a diverse workforce drives innovation, enhances problem-solving, and creates a more inclusive and equitable workplace culture.

Our Response

- ▶ Implemented various wellness-focused programmes that promote physical and mental health of our employees as well as their families.
- ▶ ESG Think Tank, comprising 70 employees from 17 departments, organised 16 ESG-related activities in 2024. These events have created a positive impact within the Company and the broader community.
- ▶ Promoting equal opportunities by tracking gender pay equity and ensuring hiring and promotion decisions are based on ability and merit. Activities were held for our employees and their families, and the communities in which we operate to raise awareness of social inclusion.

Feature Story

Nurturing Talent for a Sustainable Future

At Kerry Properties, we are dedicated to empowering our people, nurturing ESG champions, and fostering a collaborative culture. Our commitment to sustainability is embedded within our business objectives and through employee training, partnerships, and youth development programmes, we equip communities with relevant knowledge and tools to tackle sustainability challenges.

Internal Climate Fresk Workshop conducted by employees

Participants gained insights into the impact of climate change through interactive discussions

Group-wide Climate Fresk Workshops were held to raise awareness about climate changes

Educating Climate Champions for Impact

Since 2023, we have been supporting Climate Fresk in raising awareness and building capacity for climate change. Kerry Properties is one of the first property developers in the Mainland to organise facilitation training for employees which helps hone their skills, qualifying them to host workshops internally and externally. Through five additional training workshops held for 67 employees in Hong Kong and the Mainland, we achieved a significant milestone by conducting our first workshop entirely facilitated by our own trained employees. By empowering our people to champion sustainability, we have created a culture of awareness, understanding, and responsibility to create a ripple effect in the fight against climate change.

Overall Training Highlights

20+

Average training hours per employee

Let's see what an impact this initiative has made on participants!

“ I learned the causes of climate change and actions we can take to reduce carbon emissions through the workshop. ”

Sunny Sun,
Human Resources & Administration

“ This is a meaningful workshop! I learned climate knowledge, inspiring me to spread the messages to my connections. ”

Students' visit to Hong Kong Kerry Centre

Winning teams of the sustainability solution challenge for Kerry Properties

Empowering the Next Generation

Our efforts in sustainability education extend beyond our employees as we strive to engage with the wider community, especially to future generations. We recognise that youth play a vital role in shaping a sustainable future and are dedicated to investing resources in their development, empowering them to make meaningful contributions to society.

In collaboration with The Chinese University of Hong Kong (CUHK), we support students from diverse academic backgrounds to pursue their journey in sustainability through a scholarship programme. The programme equips students with practical knowledge, helping them better understand challenges and opportunities in the commercial world. They can also gain insight into real-world applications using Hong Kong Kerry Centre and Hong Kong MegaBox as case studies. This initiative has inspired tailor-made ESG solutions, such as the construction of green roofs and the diversification of items collected at our properties. By nurturing the talent and ideas of the next generation, we can collectively build a sustainable future that benefits all generations.

Volunteer service benefitted
18,000+
children and youths

“ Our students and I benefitted tremendously from the projects and we appreciated the generous donation from Kerry Properties. Our students are very enthusiastic, putting lots of efforts into the projects. I hope their ideas will be valuable for Kerry properties. ”

Prof. YANG Haibin, Programme Director,
MSc in Sustainable Global Business, CUHK

“ It provides a real-life example to practice what we learnt. We are very thankful for this opportunity to have a face-to-face talk with Hong Kong MegaBox's management team and for the site visit. The cooperation between companies and universities is very innovative and meaningful. This not only helps companies address their pain points, but also provides students with an efficient way to learn. ”

CHEN Lijie, Student of MSc in
Sustainable Global Business, CUHK

Human Capital Management

Motivating Our Workforce for Sustainable Growth

We are committed to creating a supportive work environment where employees feel valued and motivated. Motivating our people to achieve their full potential contributes to the Company's continued improvement and success.

To strengthen our foundation in human capital management, we have upgraded our data management system, by establishing a single source of truth that leverages big data to improve talent management processes. This enhancement enables more informed decision-making in nurturing a sustainable workforce.

Our Workforce ¹

By Gender and Region

By Age Group and Region

By Employment Position ² and Gender

Talent Acquisition

Recognising that the recruitment and retention of outstanding talent is crucial for our sustained success, we have developed a talent acquisition framework that aligns closely with our business objectives. This framework enables us to discover, engage, and nurture skilled professionals who not only possess the required qualifications but also demonstrate a passion for our industry.

We are dedicated to sourcing talent through a recruitment plan that adheres to the principles of fairness, transparency, and impartiality. The plan encompasses all aspects of employment, including recruitment, compensation, performance evaluations and rewards. Additionally, the Human Resources Department teams up with a professional agency for strict background checks on new hires, ensuring the integrity of our workforce.

Our Employee Handbook provides essential information on various topics, such as compensation, recruitment, promotion, working hours, equal opportunities, diversity, anti-discrimination, and welfare. We prohibit child and forced labour by performing strict documentation checks, ensuring that our workplace remains ethical and equitable. Upon identification of any non-compliant cases, we will immediately cease the hiring process. We emphasise our core values of transparency and organisational expectations by sharing this handbook with every new team member during their orientation. Furthermore, we extend this practice to our suppliers/contractors by verifying their compliance on our Vendor Code of Conduct to prevent child and forced labour through annual performance review.

Grievances Handling

We are committed to maintaining a fair and inclusive workplace where employees feel safe to voice their concerns. Our structured grievance mechanism ensures all reports are handled confidentially, impartially, and effectively. Investigations are conducted by an impartial panel, with strict safeguards in place to prevent retaliation against those who raise concerns in good faith.

Average Employment Tenure

1. As at 31 December 2024, the Group had approximately 7,500 employees. The reporting scope on people-related data illustrated in this chapter pertains solely to employees directly employed by the Group (excluding hotels).
2. Management refers to employees at director grades or above. Managerial refers to employees at manager grades. General staff refers to employees at professional/associate grades.

Employee Benefits

To nurture our employees’ well-being and cultivate their personal and professional growth, we offer a wide range of benefits. These initiatives are designed to promote work-life balance, enhance health and wellness, and recognise outstanding contributions, promoting a caring and inclusive culture.

**Paid Leaves**

- ▶ Annual leave
- ▶ Compassionate leave
- ▶ Family care leave
- ▶ Examination leave
- ▶ Marriage leave
- ▶ Maternity and paternity leave
- ▶ Sick leave
- ▶ Study leave

**Medical Care**

- ▶ Dental care
- ▶ Free vaccination
- ▶ Health check-up
- ▶ Maternity benefit
- ▶ Medical insurance

**Competency Building**

- ▶ Training sponsorship

**Insurance**

- ▶ Life insurance

**Appreciations**

- ▶ Top Achiever Awards
- ▶ Kerry Service Ambassador
- ▶ Long Service Awards

**Mental Health**

- ▶ 24/7 confidential counselling hotline for employees and immediate family members
- ▶ Comprehensive medical insurance with mental health outpatient coverage

**Perks and Bonuses**

- ▶ Discretionary bonuses
- ▶ Employee discounts

Performance appraisals are conducted annually for all employees to evaluate their performance against set objectives. Through this practice, we aim to identify high achievers, determine compensation based on performance, provide development opportunities, and offer feedback and recognition. Furthermore, employees' involvement in ESG aspects also forms part of their performance review.

Talent Development

Building Skills for a Resilient Workforce

To promote the growth of our employees, we have implemented a variety of training and capacity-building programmes to cultivate highly skilled, versatile, and innovative talents.

Unlocking Potential Across All Stages

Our comprehensive training programmes are designed to support employees at every stage of their career journey. From new joiners to senior leaders, we provide tailored development opportunities that build essential skills, enhance leadership capabilities, and drive professional growth.

ESG Think Tank

Our ESG Think Tank serves as a dynamic platform providing opportunities for members to organise and participate in sustainability-focused activities, in turn driving positive environmental and social change within and beyond the organisation. Please refer to [Management Approach to Community Investment](#) for more details.

Below are some key activities:

Teddy Bear Workshop for Domestic Helpers

Nearly 60 foreign domestic helpers participated in a workshop to handcraft teddy bear clothing and accessories from donated materials. The event featured an ESG talk, promoting sustainability and expressing gratitude for their invaluable contributions to families and the community.

Hong Kong

Recycling and Plastic Sorting Workshop

This workshop provided ESG Think Tank members with a hands-on experience in correctly recycling plastic at the V Cycle facility, an eco-social enterprise that empowers elderly cardboard collectors. Participants learned how to sort plastic and remove labels from bottles, gaining valuable insights into sustainable practices.

Hong Kong

Charity Bazaar

Our Charity Bazaar was more than giving items a second life; it inspired our employees to embrace mindful consumption. This year, the ESG Think Tank collected nearly 300 brand-new and lightly used items donated by our employees, with all proceeds supporting a charitable organisation. By reusing and repurposing these goods, we've made significant strides toward a more sustainable planet.

Hong Kong

Cultivating ESG Champions

Nurturing the next generation of professionals is essential for the long-term success of our business and the communities we serve. By offering a diverse mix of learning opportunities, mentorship, traineeship, and real-world training across various disciplines, we aim to equip young talents with the skills, knowledge, and confidence to thrive in their careers. Through these programmes, we foster personal growth, cultural exchange, and industry expertise, empowering individuals to create meaningful impacts in their respective fields.

Summer Internship Programme

The programme is designed to equip our employees' children and Kerry Group Scholarship recipients with the skills and knowledge they need to thrive in their professional journeys.

It provides them with vocational guidance, training, hands-on experience, and industry insights over eight weeks in Hong Kong and six weeks in the Mainland.

Hong Kong

Transformative Glocal Study Experience

This exchange programme offers our employees' children, aged 15 to 18.5, a chance to embark on a transformative 10-month intercultural study experience abroad. By immersing themselves in diverse cultures, participants develop a global perspective that significantly enriches their personal growth.

France

Youth Climate Action Camp

We organised sustainability-focused camps for our employees' children, aimed at nurturing the next generation of environmental advocates. 30 children participated in the Dual-carbon Science Expedition Summer Camp on Hainan Island, exploring marine ecosystems and tropical rainforests, and engaging in eco-friendly art projects. Meanwhile, we co-hosted the Youth Climate Action

Hainan

Camp with Yunhe Centre and Future Smile Charitable Foundation in Shanghai, providing students with enriching educational tours. These experiences deepened the youth's understanding of environmental conservation and inspired them to champion sustainability in the future.

Shanghai

Healthy Lifestyle

Encouraging Holistic Wellness for All

At Kerry Properties, we believe that well-being is the cornerstone of a thriving community and a productive workplace. Our comprehensive approach focuses on promoting physical health, mental resilience, and strong social connections. Through targeted initiatives and innovative collaborations, we empower our employees and their families to embrace healthier, more fulfilling lives.

From encouraging active lifestyles and fostering health-centric workspaces to supporting family well-being, we are committed to creating an environment where everyone feels valued, supported, and inspired. By prioritising wellness, we contribute to a sustainable future while enhancing quality of life for all stakeholders within our community.

Promoting Active Living

We believe that an active lifestyle is essential for fostering physical and mental well-being. Through engaging activities and events, we encourage colleagues to prioritise their health while contributing to meaningful causes.

Uniting Camaraderie and Fitness

Eight internal teams from across the country joined the 2024 Kerry Properties National Table Tennis Competition featuring seven innovative events, fostering camaraderie and promoting a healthy, active lifestyle among employees.

Stepping Up for Sustainability

Kerry Properties hosts the annual Step Challenge, a charity initiative aimed at encouraging employees in Hong Kong and the Mainland to embrace healthy walking habits. Participants can take part individually or in teams, recording their daily step counts. For every 10,000 steps logged, a donation is made to support organisations dedicated to ocean conservation, coastal cleaning, and biodiversity preservation.

To enhance the experience, we organised a walking tips seminar led by a professional health instructor, offering valuable insights on maximising the health benefits of walking. We also partnered with a social enterprise to create unique shell-shaped medals crafted from 100% recycled plastic shampoo and conditioner bottles, which aligns with our ocean theme and adds meaningful value to the event.

Steps accumulated

Football Challenge Kicks Off

Our Property Management team ignited excitement by forming a dedicated soccer team to compete in the Annual Football Challenge Tournament organised by the Hong Kong Association of Property Management Companies Limited (HKAPMC). This fosters teamwork, promotes a healthy lifestyle, and also provides a great platform for showcasing their athletic skills against peer companies in the sector.

Lunch Learning

We collaborated with guest experts to offer a range of health and well-being seminars and workshops for our employees. Notable sessions included a Chronic Fatigue Management talk and a unique Singing Bowl and Sandalwood Therapy workshop.

Gearing Up for STREETATHON

Running practice sessions, led by an experienced instructor, were held for our employees participating in KERRY HONG KONG STREETATHON 2024. These sessions covered essential skills such as route sketching, correct posture, pacing, and effective warm-up and cool-down techniques.

Tradition Chinese Medicine Sessions

Health consultation sessions were arranged at properties in Shanghai to provide professional Chinese medical advice to 80 employees. Employees also participated in a workshop to create their own scented sachets, which serve the dual purpose of repelling bugs and offering a refreshing aroma.

Chill Office Sports Series

To celebrate the 2024 Paris Olympic Games, we brought the excitement of the Games to life by hosting a series of office sports events at Shenzhen Kerry Plaza. From April to December 2024, these monthly activities are designed to encourage active exercise, reduce prolonged sitting, and enhance employees' overall health.

12-Hour Hike for Children's Cause

Our colleagues and community members joined forces and set off on an exhilarating 12-hour hiking journey as part of the E.G.G. Walkathon, a charity event organised by the Shanghai United Foundation. This initiative aimed to raise funds to support vital children's public welfare projects in Shanghai.

Stress Relief through Sports

To inspire employees to engage in sports and alleviate stress, we hosted the tenth Sports Games in the Southern Region. This lively event featured a variety of fun sports activities, allowing employees to enjoy themselves while strengthening their connections with others.

Caring for Employees' Families

We acknowledge that the wellness of our employees is intimately linked to the happiness and support of their families. Through a variety of family-focused initiatives, we aim to strengthen family bonds and promote connections between each other, ensuring employees and their families feel valued and supported, as a part of our community.

Fun Day Puts Families in Focus

We hosted our Annual Family Day in both Hong Kong and the Mainland, providing employees and their family a delightful day of fun and togetherness. At Kerry Centre in Hong Kong, the event featured engaging activities like balloon twisting, face painting and captivating magic shows. Meanwhile, the fourth Family Open Day at Shenzhen Qianhai Kerry Centre brought employees and their children together for a lively day filled with fun, learning and connection. With creative crafts workshops, exciting game booths and delicious carnival treats, the event fostered a strong sense of community and appreciation among our staff, creating enjoyable and memorable experiences for everyone involved.

Parent-child Learning with Tomatoes

The third Kerry Back-to-School initiative in Shenzhen Kerry Plaza, embraced a tomato theme with a parent-child activity that included home tomato planting. Participants also explored the innovative 'Pomodoro Technique', designed to help children manage their time effectively by breaking tasks into focused intervals.

Occupational Health and Safety

Strengthening Safety Practices for a Healthier Workforce

The Group is dedicated to reducing Occupational Health and Safety ("OHS") risk, improving compliance, and fostering a safe and secure workplace. We have implemented a solid management structure, reinforced by detailed internal guidelines and standards, to ensure that safety measures are effectively communicated to and adhered by all stakeholders. We adopt a proactive approach to identifying and tackling potential hazards and OHS risks in the workplace, cultivating an environment that prioritises safety while continuously improving our OHS practices.

Safety Management System

To guarantee the safety of our operations in property development and management, we have formed dedicated Safety Committees, responsible for identifying potential OHS risks, developing relevant policies, and overseeing performance. Additionally, we have established a Health and Safety Management Taskforce, chaired by our general managers, to ensure that safety practices are effectively implemented.

Policies and Procedures

To manage and minimise risks in all our operations, from construction to daily operations, we consulted and discussed with relevant stakeholder representatives to understand their working conditions and establish a robust Corporate Health and Safety Policy. Covering procedures ² that follow industry-leading practices, this policy is shared with all stakeholders, ensuring everyone is fully informed.

Training and Sharing

All new and existing employees are required to undergo mandatory safety training to promote safe and healthy behaviours in our workplace. Our sharing and training courses cover the following:

- Safety conference to provide employees with knowledge of safety hazards and to share case studies related to safety
- Guidance on the use of personal protective equipment
- Role-specific training for employees conducting high-risk tasks
- Regular drills to test emergency response and preparedness

First Aid and Fire Safety Training

We organised first aid and fire safety training sessions to equip employees and communities with essential lifesaving and emergency response skills. Led by experts, these programmes covered vital topics such as CPR, AED usage and fire safety management, including evacuation protocols. By enhancing safety awareness and preparedness, these initiatives empower participants to effectively protect lives and property during emergencies.

Occupational Health and Safety Training

We regularly conduct OHS training for office and construction site employees. At Shanghai Huangpu Mixed-Use Development, practical safety guidance and tips are provided, helping strengthen employees' health and safety awareness and reducing the likelihood of work-related injuries.

1. Calculated based on GFA.
2. The scope of the policies and procedures encompasses various aspects related to workers, activities, and workplaces in our property management and property development businesses. It includes contractor workers involved in repair and maintenance, construction, cleaning, office work, and shuttle bus services, whose work and/or workplace falls under our control.
3. Refer to recordable employee work-related injuries that resulted in incapacity for a period of exceeding 3 days.

Rescue Team Training for Extreme Weather

With the rising frequency of extreme weather events, we sponsored the Blue Sky Rescue Team, a group of rescuers in the Mainland, to participate in a four-day water training programme to enhance community resilience.

Frontline Staff Trained for Heat Safety

We provided specialised training for frontline staff to prevent heat stroke in hot working environment. This programme focused on recognising symptoms, understanding risks, and implementing effective preventive measures to safeguard employees' safety and well-being.

Highlighting Safety in Construction

A lunch seminar was co-hosted with Construction Industry Council ("CIC") for our contractors to promote best practices and enhance their safety awareness. The Chairman of the CIC was invited to share valuable insights on a strong safety culture, effective leadership, and innovative technologies in improving safety performance.

Executing and Checking

We place a strong emphasis on identifying potential risks and hazards through regular risk assessments and proactive safety inspections. Our dedication stringent safety measures and proactive prevention helps avoid accidents and minimise risks.

Construction Site Operational Safety

- ▶ Integrate safety requirements into tendering process, ensuring building contractors possess valid ISO 45001 certification
- ▶ Require all workers to complete mandatory role-based safety training before entering the sites
- ▶ Deploy safety officers for regular inspections at construction sites
- ▶ Utilise advanced technologies like IoT, artificial intelligence ("AI"), and cloud computing to enhance work safety
- ▶ Issue OHS alerts, for example: prevention of heat stroke at work with guidance notes on heat stress index and rest time arrangement for different work trades

Property and Workplace Safety

- ▶ Deliver prompt and reliable facilities management and maintenance services
- ▶ Ensure a safe, healthy, and productive environment within our properties and workplace
- ▶ Proactively seek feedback from tenants and promptly respond to their safety concerns

Reacting and Reviewing

Safety Committees undertake comprehensive investigations of incidents and ensure appropriate follow-up actions are implemented. It promptly addresses any concerns raised by employees and reviews our OHS risk management controls.

Incident Handling Procedures

- Step 1
- ▶ Gather evidence and carry out interviews for detailed insights on the incident
- Step 2
- ▶ Analyse the evidence thoroughly and compile them to facilitate an in-depth investigation
- Step 3
- ▶ Identify the underlying causes of the incident and recommend preventive measures to mitigate the risk of future occurrences
- Step 4
- ▶ Implement the suggested preventive measures and maintain compliance to avoid similar incidents

All work-related injuries are documented and covered by our insurance policy. We have established a comprehensive programme that ensures injured employees receive appropriate medical treatment and ongoing support during their recovery and rehabilitation process.

Diversity, Equity, and Inclusion

Building an Inclusive Future with Opportunities for All

A strong commitment to DEI is vital to a company's resilience in today's complex business environment. By embedding these values into our culture, we can nurture an inclusive workplace that aligns with societal expectations.

Prioritising diversity in our recruitment and hiring processes ensures equal opportunities for growth and development for all. The Group values and respects individuals from all backgrounds, cultures, and religions, actively cultivating an inclusive workplace where everyone feels supported.

We maintain a strict zero-tolerance policy against discrimination and harassment, supported by robust protocols to address any reported incidents promptly, ensuring the protection of human rights. Comprehensive training programmes equip our employees with knowledge to uphold anti-discrimination laws, foster effective communication, and prevent harassment and unwanted behaviours.

Gender Pay Equity

We also recognise that building a diverse and inclusive culture is essential for attracting and retaining talent. Regular assessments of average pay levels between male and female employees have shown a minimal gender pay gap, reflecting our progress in achieving pay equity. Moving forward, we remain committed to closely monitoring employee compensation and taking proactive measures to address and eliminate any disparities.

Female to Male Employees Remuneration Ratio ¹

Women's Empowerment

As part of our commitment to promote DEI, we ensure that hiring and promotion decisions are based solely on ability and merit, fostering equal opportunities for all employees. We value the unique contributions of women across all levels and actively cultivate a workplace where female thrive. By creating an environment rooted in fairness and respect, we empower women to achieve their full potential while contributing to the success of our organisation. In our workforce, 60% of managerial and higher-level positions in revenue-generating functions ³ are held by women, while 18% of STEM-related positions ⁴ are held by women.

Boosting DEI Knowledge for Employees

In 2024, we introduced comprehensive anti-discrimination training that included workshops on Hong Kong's ordinances in collaboration with the Equal Opportunities Commission. Additionally, our employees in the Mainland accessed online modules focusing on equality, rights, diversity and inclusion.

1. Remuneration ratio = average remuneration of female employees : average remuneration of male employees.
2. Refer to directors grades or above. The percentage is calculated based on the total number of employees directly employed by the Group (including hotels). The figure is 45% if hotel employees are excluded from the calculation. As at 31 December 2024, the Group (excluding hotels) had 4,719 employees. For 2023 figure, it referred to senior directors' grade or above.
3. Including various positions in Leasing and Sales departments.
4. STEM refers to science, technology, engineering and mathematics. The figure includes various technical positions in Project Development, Property Management, and Technology and Innovation functions.

Celebrating International Women's Day

To celebrate International Women's Day, we organised activities in over ten cities, including pilates sessions, wellness workshops, candleholder making, and makeup salons, promoting self-care and expressing appreciation for women's contributions.

Putting Women in the Spotlight

In 2024, we partnered with National Geographic to present the WOMEN: BORN TO SHINE exhibition at Hangzhou Kerry Centre. This captivating event celebrated stories, strengths, and contributions of women, featuring interactive workshops and inspiring themes.

Caring for Teenage Girls in Rural Xinjiang

We organised health education workshops and donated sanitary products to nearly 500 teenage girls in rural areas of Xinjiang, while also working to enhance their learning environment for improved development.

Creating Positive Communities

Creating well-designed spaces that support, engage and are inclusive of everyone who will use them is our goal for all communities in which we operate. We call this community building. In promoting wellness and strengthening connections, we hope to make a lasting, positive impact that will endure for generations to come.

Creating Positive Communities

Fostering vibrant, inclusive, and resilient societies

Future Trends

- ▶ Stakeholders increasingly demand evidence of how projects positively influence local communities. This includes a clear evaluation of social, cultural, and economic benefits to ensure developments align with broader societal goals.
- ▶ There is a growing expectation for developers to respect and protect historical assets and cultural traditions in areas of their operations. This trend highlights the need to integrate cultural preservation, thereby strengthening community identity and fostering a sense of belonging.

Our Response

- ▶ Since 2021, we have implemented Social Impact Assessments ("**SIA**") principles to measure and enhance the positive outcomes of our initiatives. This ensures our efforts deliver quantifiable benefits to the communities we serve.
- ▶ We advocate for the preservation of traditional cultural and historical architecture. By organising workshops and exhibitions, we honour the history of the cities we serve and resonate with their communities.

Topics Related to Community

- ▶ Community Engagement, Development and Investment
- ▶ Heritage and Culture

Our Policies in Response

- ▶ Equal Opportunity and Anti-Discrimination Policy

Feature Story

Running Together, Connecting Communities

At Kerry Properties, we are committed to promoting wellness and strengthening community connections through a wide range of events and initiatives. As the title sponsor of KERRY HONG KONG STREETATHON for the second consecutive year, we proudly support this citywide running event to promote physical well-being and advocate for the UNSDGs.

In 2024, it brought together nearly 20,000 runners, including over 800 of our colleagues and invited guests from Hong Kong and the Mainland. Prior to the event, we hosted month-long training sessions led by professional coaches to help our colleagues prepare for the run.

We strive to make a positive impact on the communities by supporting this citywide running event. To assess its impact, we engaged an independent consultant to conduct a SIA among participants on-site on the event day, focusing on four key areas: health and well-being, corporate image, event sustainability, and social connectedness.

Feedback from participants

“This event was incredibly supportive and beneficial to the participants. I would love to see the company organise more similar activities in the future.”

“I enjoyed the running classes, which better prepared us for the STREETATHON and allowed us to get to know colleagues from different departments.”

Run Well Carnival

Bringing Communities Together through World's Largest Treadmill

Run Well Carnival, a lead-in event for KERRY HONG KONG STREETATHON 2024 at Hong Kong MegaBox, featured the Asian debut of the world's largest 11.7-metre treadmill, previously showcased at major world marathons.

During the two-week carnival, participants of all abilities were invited to take on a two-minute speed challenge on the treadmill. The experience ranged from seasoned marathoners attempting to match world record speeds to casual runners and shoppers of all fitness levels. Various community groups, including office tenants, school children, teenagers and NGOs, were also invited to take part in trial runs.

Sports-Meet-Arts Community Experience

Additionally, in partnership with WestK, the Carnival's Performing Arts Partner, and as a prelude to our support for the WestK Street Performance Scheme under a two-year collaboration starting in 2025, nearly 20 street performances by young talents were showcased during the Carnival, creating a dynamic and enriching sports-meet-arts experience for the community.

Run Well Carnival at Hong Kong MegaBox

Community Building

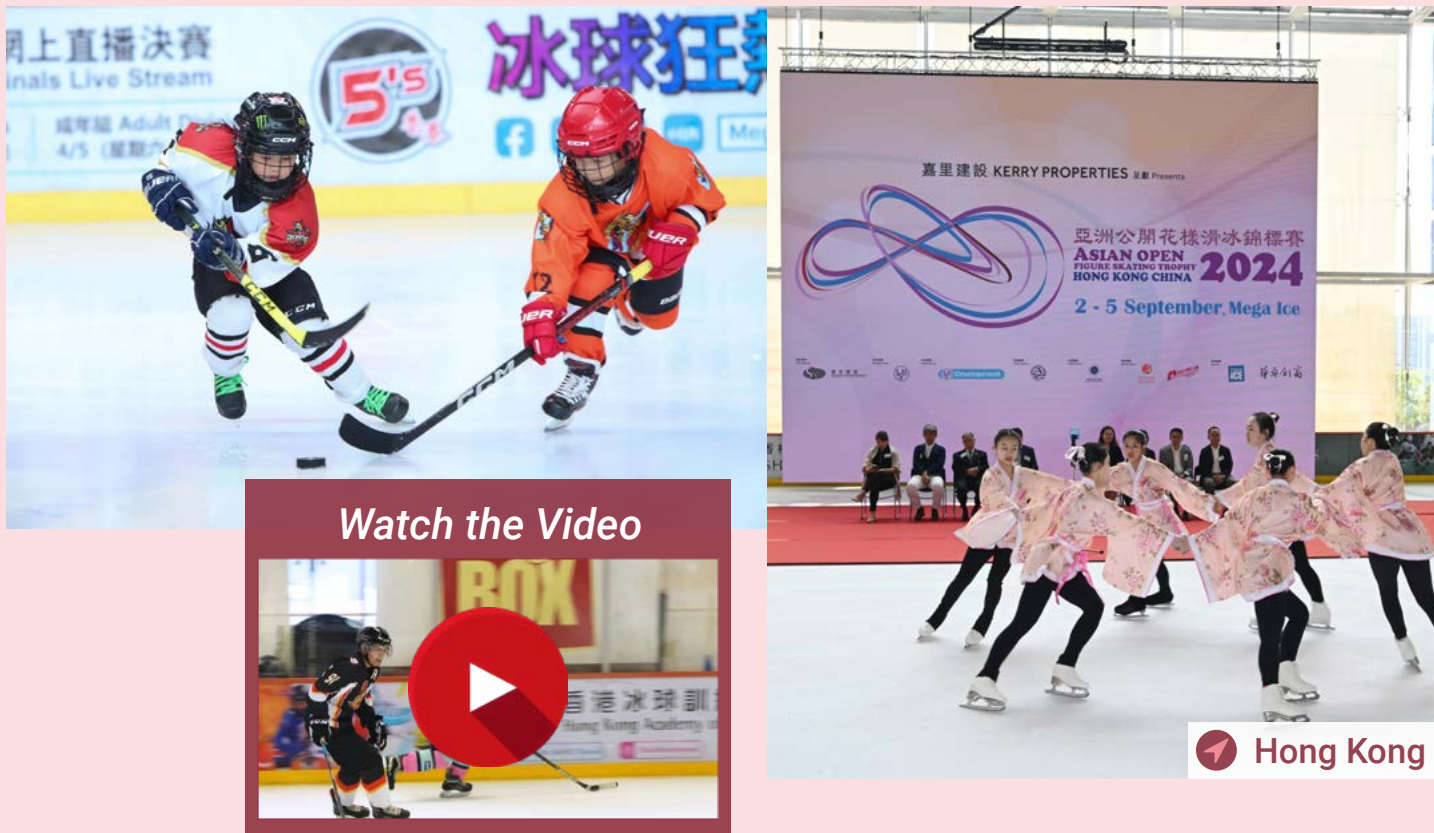

A vibrant community extends beyond its infrastructure — it thrives on shared experiences and meaningful connections. Through a diverse range of thoughtfully curated events and initiatives — from sports tournaments to arts and cultural programmes and leisure activities — we infuse our neighbourhoods with energy and positivity, and nurture communities where people can live happily and flourish.

Advocating Active Lifestyles through Sports

We inspire communities to nourishing active lifestyles through a broad spectrum of sports activities.

Ice Sports Tournaments

We hosted our annual world ice sports tournaments at Hong Kong MegaBox featuring the Mega Ice Hockey 5s, participated by 1,800 players from 100 teams; and the 2024 Asian Open Figure Skating Trophy, brought together athletes from 16 countries and regions across Asia. These events attracted ice sports enthusiasts and audiences from both near and far, offering thrilling moments on the ice.

Basketball Leagues

To enhance teamwork and sportsmanship while fostering community connections, we organised a series of competitive yet inclusive basketball leagues, bringing together our tenants and the wider community.

Themed Sports Games

A diverse range of fun, themed sports activities brought communities together, fostering a sense of camaraderie and enjoyment.

Outdoor Yoga

We partnered with leading sportswear brands to invite community members to outdoor yoga sessions at our properties. These sessions provided perfect opportunities for participants to unwind and relieve stress while immersing themselves in the beauty of nature.

Fun Run Sessions

Enjoyable running activities for individuals and families was held across various regions to promote an active lifestyle within the communities. These events inspired everyone to embrace fitness and well-being while having fun.

Promoting Arts and Culture

Celebrating the richness of art and culture, we organised diverse initiatives to connect communities, inspire creativity, and honour timeless traditions, seamlessly bridging the past and present.

Supporting Street Performances

Beginning in 2025, we will embark on a two-year collaboration with WestK as the Lead Partner of the WestK Street Performance Scheme. This scheme aims to support young artistic talents and promote vibrant street performances. Hong Kong MegaBox will act as an Extended Stage for the collaboration, providing opportunities for street performers and fostering community engagement throughout the East Kowloon district.

Hong Kong

Creating Spaces for Musical Interludes

Many of our properties transformed their shared spaces into vibrant stages for live music performances. These melodious interludes provide individuals and groups with opportunities to showcase their talents. By creating an engaging and inclusive atmosphere with music, occupants and visitors can enjoy a joyful, music-filled respite during the afternoon breaks.

Hangzhou

Exploring Ancient Chinese Inscriptions

Shanghai Kerry Parkside, partnered with the National Museum of Chinese Writing and the Anyang Culture, Radio, Television, Sports and Tourism Bureau to present the Charm of Oracle Bones: Exploring Ancient Scripts exhibition – the first of its kind in a Shanghai commercial complex. This captivating exhibition highlighted oracle bone inscriptions, a 3,000-year-old cultural treasure, through nearly 30 themed activities that seamlessly blended cultural heritage with contemporary experiences.

Shanghai

In Honour of Cultural Heritage

We celebrated cultural heritage through a series of festive activities and exhibitions, such as Dragon Boat Competition with office tenants at Shanghai Kerry Parkside, and Intangible Cultural Heritage Exhibition at Tianjin Kerry Centre Riverview Place. These events educated communities, strengthened cultural identity, and fostered a deep appreciation for the traditions and artistry passed down through generations.

Shanghai

Tianjin

Placemaking that Strengthens Ties via Recreation

A variety of leisure initiatives and recreational activities were organised to cultivate multicultural communities, encouraging individuals from all backgrounds to participate and connect in their community life.

Vintage Street

We revitalised street stores in Shenyang with a vintage theme, featuring artistic installations, food kiosks, and pop-up shops designed to attract foot traffic and support the local economy.

Local Blossom at Flower Market

The Flower Market at Shanghai Kerry Parkside, brought together numerous local and national flower and plant entrepreneurs, providing them with a valuable platform to showcase their products, share knowledge, and attract customers, as well as support the local economy.

Watch the Video

Night Bazaar Offers a Community Escape

The APPLELAY night market at Beijing Kerry Centre embraced the 'tang ping' philosophy, which encourages a laid-back approach to life. Over nine vibrant days, it showcased more than 100 brands offering global cuisine, handcrafted goods, live music performances, outdoor movie screenings, and a lively jazz dancing party.

Engaging Events for Pet Lovers

Connecting pet lovers at our properties fosters a welcoming pet-friendly environment. The Fluffy Green Pet Market at Hangzhou Kerry Centre showcased activities, including dog barrier challenge racing, a pet toy-making workshop, and a swap market – all set in a harmonious and joyful atmosphere. Meanwhile, at Hong Kong MegaBox a lively pet carnival brought together people and their pets for a day of fun-filled events and a delightful stroll in our roof garden pet park.

Circular Economy Takes Centre Stage

Community Loop Markets and themed circular marketplaces featuring engaging workshops and talent performances were held across various regions to promote the idea of circular economy and sustainable environmental practices within local communities.

Nurturing Positive Changes in Our Communitess

Management Approach to Community Investment

Our charitable donation efforts are guided by a clear and collaborative framework to ensure resources are allocated effectively and responsibly, reflecting our commitment to driving positive change in the communities we serve.

Management Structure

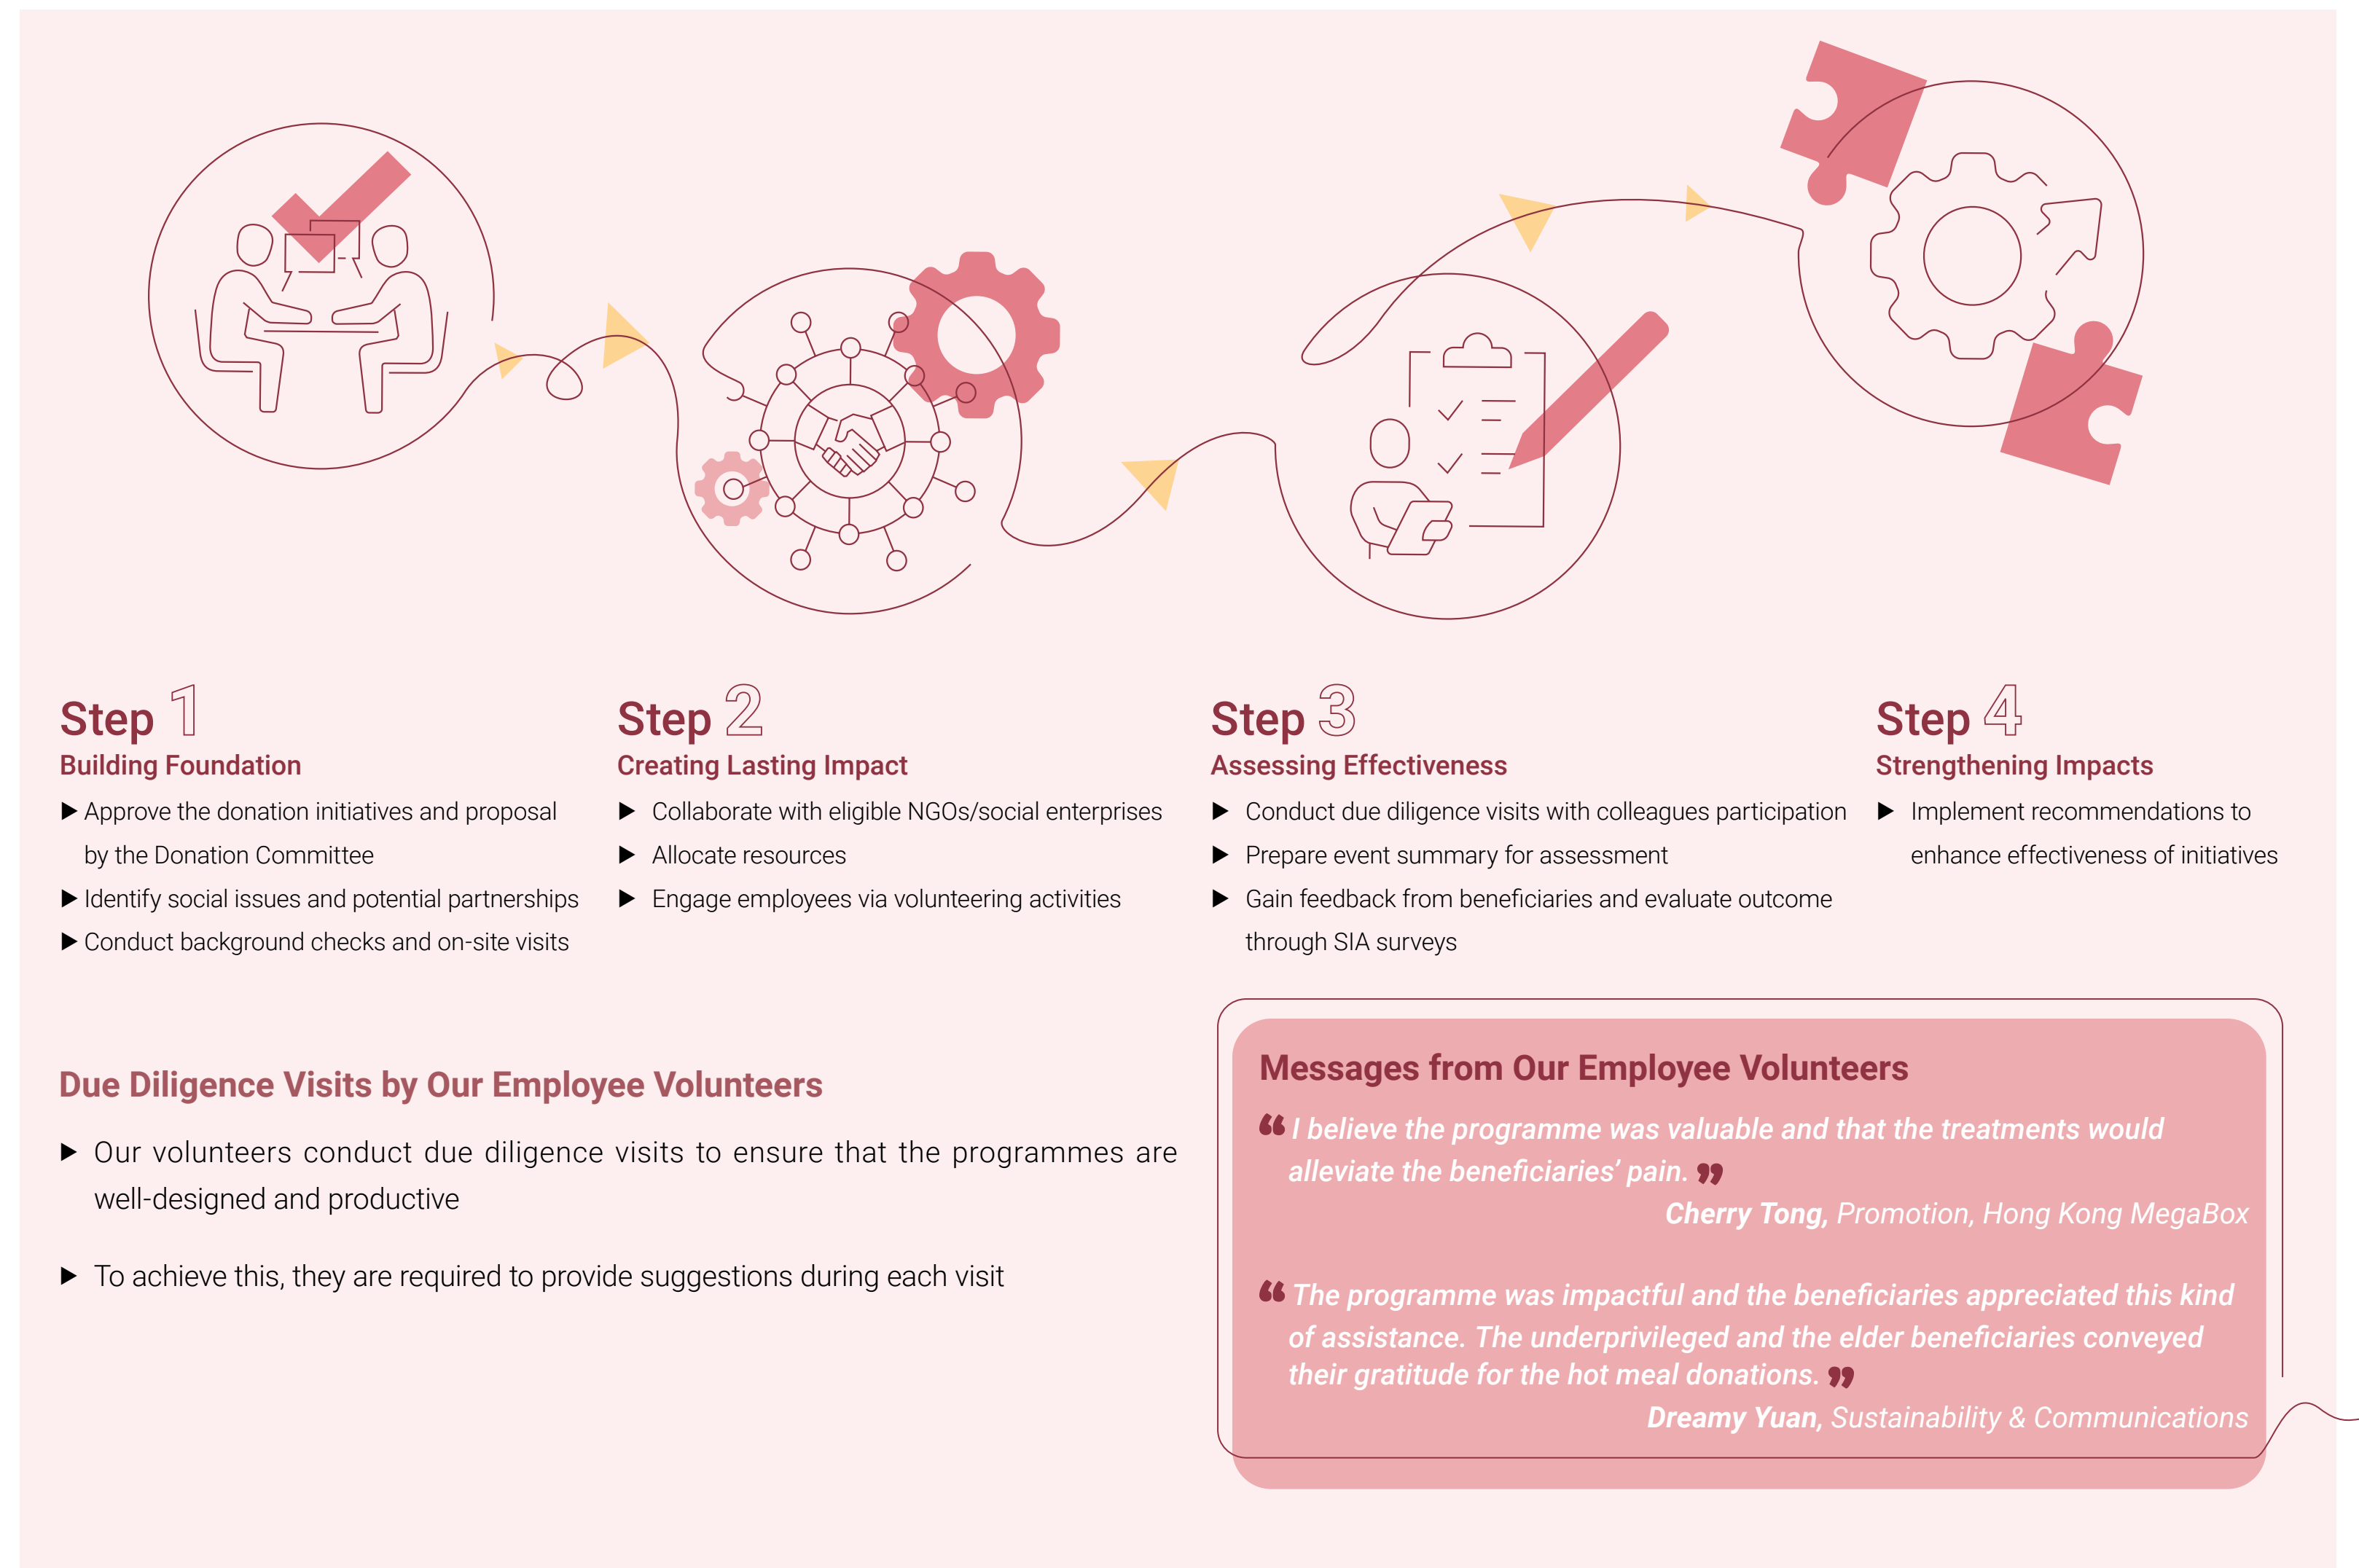

All community investment and partnership strategies are evaluated by our Donation Committee which reports directly to the Chairman and collaborates closely with the Corporate Social Responsibility and Community Engagement Sub-committee, and ESG Think Tank.

Process to Shape Charitable Donation Initiatives

We adopt a step-by-step approach to develop and enhance charitable donation initiatives, focusing on creating meaningful partnerships and delivering long-term benefits to the community.

The Sub-committee, composed of members from various departments, actively engages with community stakeholders while overseeing the implementation of our Corporate Social Responsibility activities. The ESG Think Tank, comprised of colleagues with a passion for sustainability, contributes ideas and mobilises the workforce to organise activities as a bottom-up approach to the organisation.

Our commitment to maximising our impact ensures that the monitoring of our donation processes upholds the principles of accountability, transparency and effectiveness. Updated in 2024, our Charitable Donations Policy provides clear guidance on decision-making, reporting, and approval processes related to community investment.

Our Community Investment

We focus on fostering connections with our stakeholders and gaining a thorough understanding of community needs through active engagement and communication. By utilising our resources and network, we contribute positively through initiatives such as donations, sponsorships, volunteering, and community support. In 2024, our donation amounted to HK\$17 million.

Highlights of Our Donation Initiatives

By leveraging our funding resources and community network, we have identified the key needs of communities where we operate. As a result, the following aspects have been specifically chosen as focal points for our donations.

Promoting Wellness

By addressing critical health and well-being needs, we provide young people with resources, education, and care that require to lead healthier and more empowered lives.

Funding Surgery for Cataract Patients

In 2024, we celebrated our fourth consecutive year of funding 100 cataract operations for individuals living in rural areas.

Shenyang

Carnival with a Heartfelt Mission

We hosted the Love & Lohas Charity Carnival to raise funds in support of surgical procedures for 34 children with congenital heart disease from low-income families.

Beijing

Bringing Healthy Smiles to Rural Communities

Our employee and volunteer dentists organised a dental care initiative in a remote Hebei village, providing check-ups, fluoride treatments, education, and care packages to promote healthy oral habits among children in five schools.

Hebei

Supporting Children with Rare Diseases

We partnered with an organisation that supports children with rare diseases, helping to build their confidence and raise awareness through artistic experiences.

Shanghai

Nourishing Kids Through Daily Nutrition

The Nutrition Every Day initiative delivers fresh eggs to children in rural areas every day. By distributing approximately 5,000 eggs to over 300 children, we significantly enhance their nutrition and enrich their school experience.

Hangzhou

Mitigating Climate Change

A series of environmentally-focused initiatives and educational activities was implemented to raise public awareness about environmental protection, while fostering collective responsibility for creating a greener and more sustainable future.

Coastal Cleaning

Over 500 of our employees, along with their families, students, and teachers, took part in beach cleanup events in Hong Kong and 11 cities across the Mainland.

Shenzhen

Qinhuangdao

Advocating Sustainable Living

We organised a range of engaging initiatives and exhibitions for our customers and local communities to champion green living and showcase Kerry Properties' commitment to creating vibrant, sustainable communities.

Tianjin

Shenzhen

Beijing

Lighting Up Nature for Kids

At the Light of Nature summer camp hosted at Tianmu Mountain, children embarked on a journey through ancient forests, where they discovered ecological principles and participated in a variety of activities. From stargazing to bamboo crafting and observing nocturnal species, the camp offered a unique opportunity for young minds to connect with nature.

Watch the Video

Youth Development

We promote equity and support youth development through year-round activities. By empowering young individuals with skills and interests, we create an environment for personal growth and success.

Harvesting Change with Agriculture

We supported a sustainable agriculture initiative at a local secondary school in Tin Shui Wai, empowering students with the training and resources to implement smart urban farming solutions for cultivating fresh hydroponic produce. Alongside hands-on farming experience, students benefited from STEM education and social entrepreneurship training. The freshly grown vegetables were donated to families in need within the community and sold through charity sales at our properties, with all proceeds directed towards charitable causes.

Watch the Video

Enhancing Science Literacy

In collaboration with an NGO, Beijing Kerry Centre supported a science education initiative in Hebei that benefited 486 students and teachers across ten rural primary schools. This programme aimed to enhance scientific literacy while also supporting teacher development.

Teen Activities Drive Sustainability Awareness

Various summer camps and educational tours on climate action, teamwork, and city transformation were organised with NGOs. This can immerse students and teenagers in engaging activities and visits that promote sustainable development, critical thinking, and a deeper connection to nature.

In Support of Vocational Education

To support vocational education schools in Qinghai in their efforts to raise funds for student development, we sponsored venues for auctions and charity sales featuring student art pieces. This initiative not only provided a platform for showcasing the creativity of the students but also helped generate much-needed resources for their growth and education.

Books Exchange Inspires Young Minds

The collection of pre-owned books in Tianjin and Shenzhen provided knowledge and inspiration to children in need, fostering the passion for reading in underserved communities. A generous library of books was donated to a primary school in Guizhou, and 38 employees from Shanghai volunteered their time to prepare audiobooks for the students.

Building Better Lives for Teachers

in, helping to decorate and enhance these spaces, as well as to create a more welcoming and supportive environment for the teachers.

We transformed unused shipping containers into comfortable dormitories for teachers at rural primary schools, significantly improving their living conditions. Our colleagues and their families from Shanghai enthusiastically joined

Nurturing Hope for Underprivileged Youths

We are dedicated to nurturing and empowering teenagers in rural and underprivileged areas. Our initiatives range from providing care for left-behind children to offering vital sex education and organising charitable programmes in schools. We are committed to creating a safe and supportive environment where every young individual has the opportunity to learn, grow and thrive.

Tianjin

Hangzhou

Supporting The Needy

Our sustainability mission focuses on creating inclusive communities. We support vulnerable populations and ensure everyone feels respected and cared for.

Improving Comfort for Street Cleaners

In our second year of partnership with Caritas Hong Kong, we provided street cleaners with pain assessments and treatment to alleviate discomfort from prolonged standing. Additionally, we distributed sneakers and antibacterial, eco-friendly T-shirts made with patented technology to street cleaners, the homeless, and elderly citizens, ensuring they remain comfortable in the heat of the outdoors.

Hong Kong

Christmas Cheer for Ethnic Minorities

We organised a Christmas volunteer event at the Hoi Lai Children Development Centre, engaging ethnic minorities and families in a fun, interactive card game centred around the UNSDGs.

Hong Kong

Unity for Disabled Support

Our employees and their family members joined a walk with people with disabilities hosted by the Hong Kong Federation of Handicapped Youth. We also sponsored wheelchairs for free rental service and supported sports development for their members.

Hong Kong

Hot Meals for the Elderly

We donated hot meals to elderly individuals in need, demonstrating our commitment to supporting the community and enhancing the well-being of vulnerable populations.

Bringing Fun to Children with Diverse Needs

A variety of fun and impactful activities was organised for children with autism, including baking workshops, charity music performances, painting classes, a Children's Day party, and an inclusive movie day.

Vocational Training for Hearing-impaired Youths

Partnership with our tenants at their coffee shop in Shanghai, we sponsored barista training for youths with hearing impairment, equipping them with valuable skills for employment.

Empowering Our Value Chain

Impactful sustainability strategies encompass every link of the value chain. Through an approach that engages all upstream and downstream business partners, we grow together on our sustainability journey, achieving our shared visions through collaborative actions.

Empowering Our Value Chain

Driving changes with our value chain partners

Future Trends

- ▶ There is an increasing focus on value chain collaboration to address Scope 3 emissions. Companies are fostering deeper partnerships with value chain to ensure alignment on sustainability goals, transparency, and shared accountability.

Our Response

- ▶ We collaborate actively with upstream (suppliers and contractors) and downstream (tenants and customers) partners across our value chain, which is essential in realising our sustainability strategy.
- ▶ ESG principles are embedded in the supplier selection process. After suppliers are onboarded, their ESG performance shall be closely monitored.
- ▶ The KPL Sustainability Education Programme supported our suppliers to enhance their capacity and foster stronger collaboration on our carbon neutral journey.

- ▶ Amidst escalating customer expectations, the imperative for elevated service standards is more pronounced than ever. Meeting these demands has become a critical driver for cultivating trust and fostering enduring customer loyalty.

- ▶ Customer satisfaction surveys are conducted regularly to understand stakeholders' expectations and to improve service quality.
- ▶ ISO 9001:2015 Quality Management Systems are implemented to ensure the consistent delivery of high-standard services.

Topics Related to Value Chain

- ▶ Customer Engagement and Collaboration
- ▶ Innovation
- ▶ Responsible Supply Chain Management
- ▶ Service and Product Quality
- ▶ Stakeholder Well-being

Our Policies in Response

- ▶ Green Procurement Policy
- ▶ Sustainable Procurement Policy
- ▶ Vendor Code of Conduct

Feature Story

Collaborating across the Entire Value Chain

At Kerry Properties, we understand that sustainability is a responsibility we all share that extends beyond our day-to-day operations. By fostering stronger partnerships across the entire value chain, we tackle the shared challenges and navigate the journey towards a more sustainable future together.

Empowering Tenants to Mitigate Climate Impact

Recognising that tenant activities contribute significantly to our downstream emissions, the Tenant Carbon Audit Programme was launched to offer tenants free carbon audits. The Programme has improved tenants' understanding of emissions attributed to their operations, enhancing data accuracy and transparency, which in turn has supported enhancement of their sustainability performance. This year, we welcomed 20 new tenant participants. In response to the growing demand, we are planning to expand the programme in the coming year.

In 2023, a mutually beneficial Dark Green Leasing Programme was introduced for our office tenants in Hong Kong Enterprise Square Five. This year, we have doubled the number of participants in the programme. Tenants who demonstrate meaningful improvements in carbon reduction, energy efficiency, and environmental performance within our permits are offered additional incentives. Through such collaborative efforts, we can build a stronger partnership and drive mutual progress towards achieving carbon neutrality.

“It is our pleasure to join the carbon audit programme provided by Kerry Properties, as a commitment to carbon reduction and green finance. We are glad to work together with Kerry Properties for a more sustainable future.”

China Resources SZITIC Trust Co.Ltd, one of our tenants

Educating Suppliers to Enhance ESG Performance

Our KPL Sustainability Education Programme aims to engage suppliers and contractors who support projects during construction and keep our properties operating seamlessly through daily operations and maintenance. With the support of all teams across our portfolio, the Programme was offered to all our suppliers and contractors with a 25% participation rate.

The programme was offered across **ALL** of our supply chain

The ten episodes of the programme started in 2024 and covered a range of ESG topics. The initial six episodes addressed key topics such as carbon emissions, carbon neutrality, renewable energy, carbon tax and carbon trading, green building and biodiversity. The Programme showcases our dedication to addressing emerging sustainability challenges and equipping our partners with forward-looking knowledge and practical tools. From 2025, we will broaden the coverage to a wider group of stakeholders by disseminating these comprehensive materials through the Kerry Living app.

“We appreciate Kerry Properties' active promotion of green building practices in recent years. It is encouraging to see a leading organisation in the real estate sector taking significant steps towards sustainability.”

Schneider Electric, one of our suppliers

Introducing Supplier Low Carbon Stewardship Scheme

Achieving our carbon reduction targets hinges on close collaboration with our supply chain partners. Through the Supplier Low Carbon Stewardship Scheme, we engaged our value chain with workshops, seminars, e-learning and free carbon audits. In addition, we collaborated with our major suppliers to collect and analyse their carbon emissions data, identify emission hotspots, and thereby support them in reducing their emissions. The Scheme enhances our understanding and transparency of Scope 3 emissions across our supply chain. In 2024, we engaged 20% of key property management suppliers in Hong Kong.

Our stakeholder groups along value chain are engaged to promote ESG practices

Responsible Supply Chain Management

Ensuring Transparency and Responsibility in Our Supply Chain

As a property developer, we are committed to maintaining the integrity of our supply chain and fostering strong relationships with our suppliers. The Board retains ultimate responsibility for overseeing supply chain management and supplier ESG programmes, reflecting its dedication to our sustainability goals.

We have been implementing robust policies and guidelines that prioritise sustainable and green procurement. These efforts are crucial for ensuring our procurement decisions are environmentally friendly and socially aware. We are also committed to equipping our employees with the knowledge to excel in supply chain management and to assess our supply chain to ensure they align with our sustainability objectives.

In addition to delivering internal supply chain management training and conducting service provider evaluations, we uphold compliance by mandating that all suppliers and contractors sign and follow our Contractors' Declaration, ensuring the fairness in the bidding and tendering process while communicating key policies, including the Vendor Code of Conduct which will be periodically revised, to our supply chain.

In 2024, we identified our most significant suppliers ¹ which consist of real estate brokerage, public utilities, and electromechanical engineering companies, taking up around 63% of the total procurement expenses, in order to strengthen our supply chain management.

92%

Contractors/suppliers are governed by Vendor Code of Conduct

87%

Operations are governed by green procurement guidelines

Supply Chain Screening and Assessment

We integrate ESG considerations into our supply chain management process to promote sustainable practices. During the screening and onboarding stage, preference is given to suppliers and contractors with strong ESG performance. The performance is verified through certifications and in compliance with our ESG policies and Vendor Code of Conduct. They are required to sign and adhere to our Contractors' Declaration, which covers ESG and anti-corruption clauses comprehensively, and those who fail to meet these baseline requirements are not considered for tenders or contracts.

Once onboard, suppliers and contractors are assessed regularly to ensure continued adherence to ESG standards and provide technical support to implement improvement actions. Our supply chain risk assessment incorporates risk criteria across our value chain, focusing on country-specific, sector-specific, and commodity-specific impacts. Targeting major suppliers in Hong Kong and the Mainland, the assessment evaluates both technical capacity and key ESG and business relevance factors, including environmental management systems, biodiversity preservation, OHS measures, labour rights protection, equal pay, anti-discrimination measures, sustainability governance, responsible sourcing practices, product safety and quality, and substitutability. We will also provide internal supply chain management training to our employees and conduct service provider evaluations to align supply chain's performance with our sustainability values. Non-compliance on our ESG policies and Vendor Code of Conduct may result in contract termination.

In 2024, 3,011 contractor performance assessments were conducted while warning letter has been issued to three contractors due to underperformance.

100 %

Contractors and suppliers underwent annual performance review ²

Supply Chain Management Process

Step 1 Screening & Onboarding

- ▶ Request suppliers and contractors to submit qualifications and documents through platforms such as the Development Project Online Bidding Supplier Management Platform
- ▶ Require suppliers and contractors to acknowledge our policies on product and service quality and sustainable procurement

Step 2 Performance Review & Management

- ▶ Review process and work initiated by suppliers
- ▶ Conduct Contractor Performance Review and Contractor Response Review regularly

Step 3 Evaluation

- ▶ Evaluate suppliers and contractors' performance focusing on the key aspects:
 - ▷ Environmental Commitment
 - ▷ Technical Capacity
 - ▷ Social Responsibility

1. The most significant suppliers refer to the top 10 suppliers with the largest procurement expenses in Hong Kong operation.
2. Refer to business operation in Hong Kong.

Supply Chain Engagement

A wide range of engagement events are offered to our supply chain stakeholders, including contractors and suppliers, to ensure they are equipped with the knowledge and tools needed to align with our sustainability standards. These efforts enhance their ESG performance and foster a culture of continuous improvement throughout the value chain. Our [KPL Sustainability Education Programme](#) aims to enhance the understanding and management of carbon emissions while incentivising suppliers to adopt more sustainable practices across our supply chain.

Recognising Contractors' Sustainability Performances

We recognised contractors at Shanghai Huangpu Mixed-Use Development who consistently adhere to our health and safety procedures. Through working hand-in-hand with our contractors, we strive to reinforce our commitment to building a sustainable construction environment.

Educating Suppliers on Sustainable Practices

We regularly invite suppliers and contractors to seminars aimed at educating them on sustainable supply chain management practices. These seminars focus on reducing adverse environmental and social impacts within their operations.

Green Award Fosters Creative Collaboration

Entering its 11th year, the 2024 Green Construction Site Award embraced the theme Waste Less Together • Kerry and You. Seven project teams, comprising over 100 members from Kerry Properties, contractors, and consultants, participated in a variety of contests. These included the Family Upcycling Competition, an Upcycling Fair, and a Green Poetry Performance, all aimed at promoting sustainability and creativity within our community.

Contractors Engage in Community Caring

We engaged our contractors not just on a business level but also encouraged them to take an active interest in the community. As part of the Kerry Project – Community Caring Scheme, our Project Development team in Hong Kong hosted three volunteer activities in 2024. Over 30 contractors and consultants joined our employees in initiatives that included tree planting, caring for underprivileged children and those with special educational needs, as well as visiting children with intellectual disabilities.

Knowledge Sharing with Our Supply Chain

By fostering open dialogue and engaging in collaborative initiatives, we aim to empower our supply chain with knowledge and tools necessary to ensure they have enough capacity in understanding and implementing sustainability practices. As part of our ongoing efforts to raise awareness among stakeholders, we collaborate with industry experts and organisations to host seminars for our suppliers and contractors.

Collaborative Tenant Partnership

Collaborative Living, Sustainable Growth

Engaging our tenants is pivotal in advancing our sustainability journey. By fostering partnerships with them, we align our sustainability objectives to drive collective action. Building on our successful implementation in 2023, we have further advanced our [Tenant Carbon Audit Programme](#) under the Tenant Decarbonisation Scheme in 2024. By enhancing these established initiatives, we demonstrate our unwavering commitment to reducing our environmental impact and achieving carbon neutrality. Our joint efforts with tenants have yielded tangible progress as we continue to align our goals and work towards more sustainable property management practices.

In 2024, we have developed two new guidelines, namely the Tenant Carbon Audit Guideline for Property Management and the Sustainable Fitting Out Guideline (Office). These guidelines are designed to streamline our auditing processes, establish standardised methodologies, and promote the use of energy-efficient systems and eco-friendly materials. By implementing these guidelines, we aim to minimise environmental impacts, improve data management, and foster a common understanding of emissions from leased spaces across our portfolio. Our green building ambassadors are also on hand to provide expert technical guidance, ensuring that tenants can effectively adopt and benefit from these sustainable practices.

Tenant Engagement

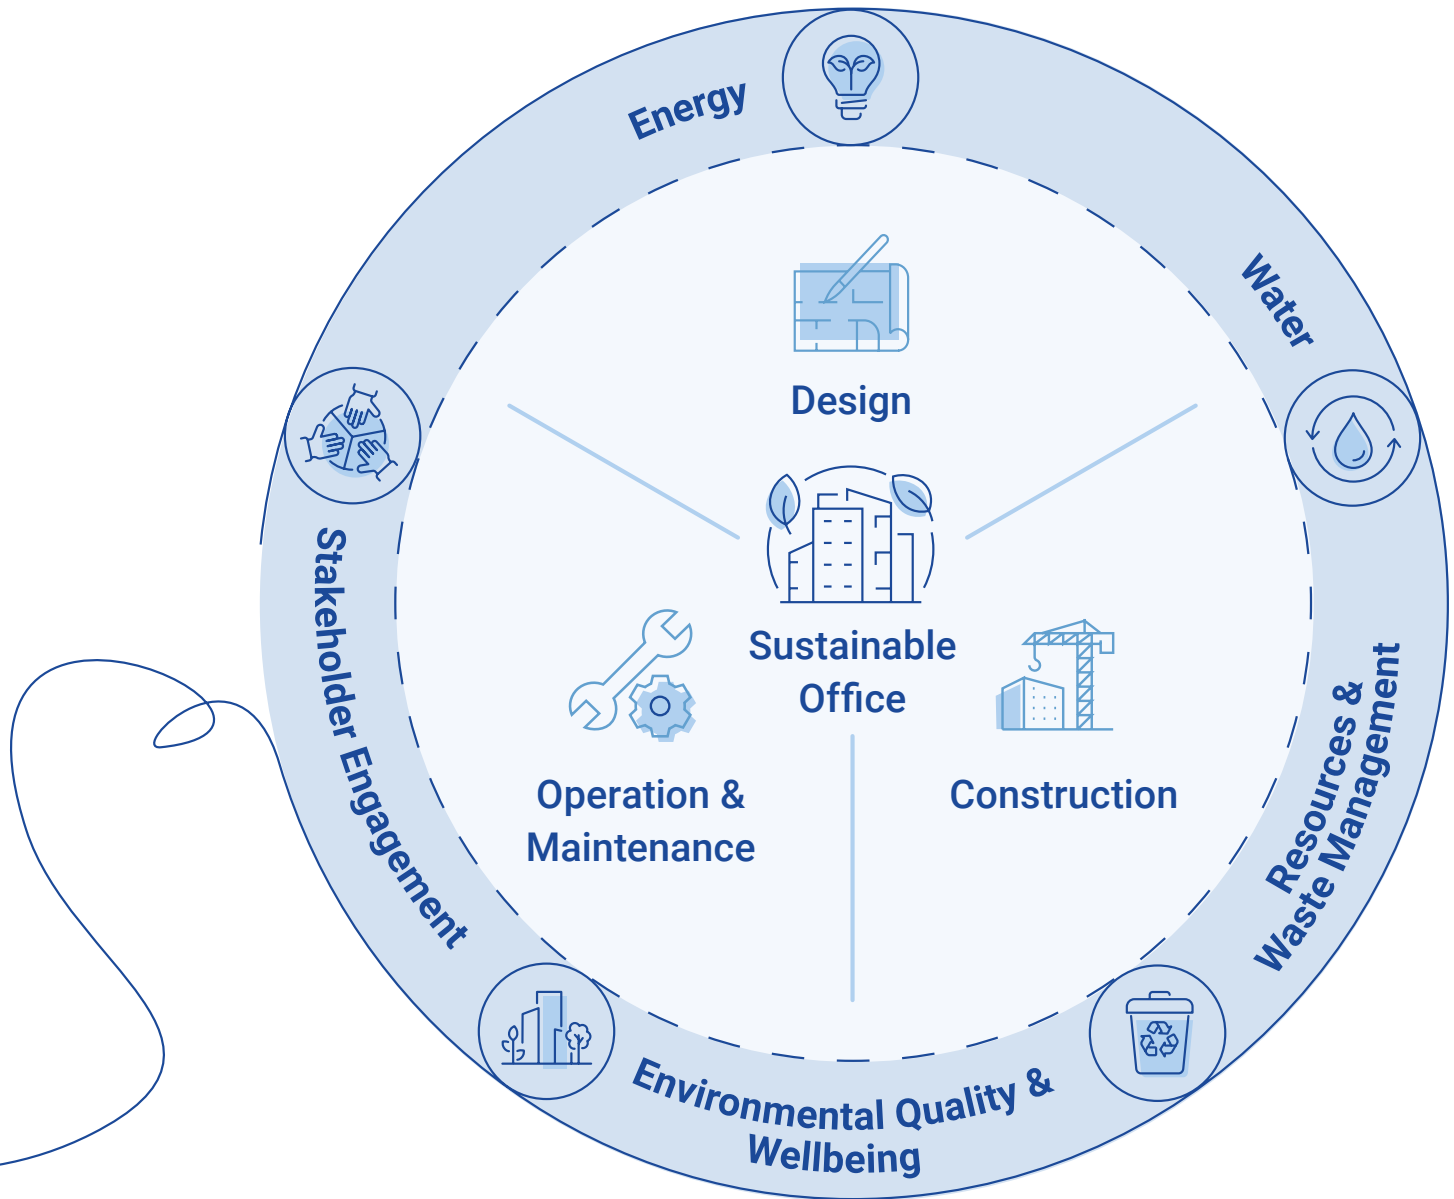

By working together, we ensure that both tenants and we are aligned in our shared vision and efforts to promote eco-friendly practices, ultimately contributing to a healthier planet for future generations.

In Harmony with Nature

Hosted by Shanghai Kerry Everbright City Phase III, the workshop aimed to promote sustainable environmental practices and foster a deeper understanding of harmonious coexistence between humans and nature.

Sustainable Framework for Tenants

Cooking up Sustainability

To celebrate Sustainable Gastronomy Day on 18 June, Beijing Kerry Centre organised a Green Cooking Workshop for tenants, inviting them to create delicious, healthy, and environmentally friendly dishes.

Sports Activities for Tenants

To promote active lifestyles among our tenants, we hosted sports activities for our tenants, such as KERRY UP at Shenzhen Qianhai Kerry Centre and Shenzhen Kerry Plaza, and KEEP WAVE at Tianjin Kerry Centre Riverview Place, and Spring Fun Walk at Shenyang Kerry Centre. We offered a series of events featuring a variety of fitness activities to the tenants, including jogging, Zumba, stretching, frisbee, skateboarding, cycling, and pickleball, encouraging tenants to stay active and explore different ways to stay healthy.

Free Medical Consultation for Residents

Shanghai Central Residences partnered with local hospitals and health centres to host a free healthcare consultation for residents. It offered expert medical consultations, family health guidance, elderly care advice, and vaccination appointments, all conveniently provided within the neighbourhood.

Quality Customer Experience

Engaging Partners, Inspiring Change

We provide premium services to our customers, ensuring quality and excellence in every interaction. We offered regular customer service training for our frontline employees and conducted regular inspections to identify potential deficiencies at our properties. Our commitment to high standards is evident, with approximately 61% of our Investment Properties¹ are certified under ISO 9001:2015 Quality Management Systems.

To effectively address the concerns of our customers, tenants, and residents, we carry out annual satisfaction surveys that cover a broad spectrum of topics, including customer services' communication effectiveness and responsiveness, facility management, maintenance, security, safety, cleanliness as well as sustainability. Through collecting their feedback, we are able to identify areas for enhancement and take the required steps to improve our offerings. Besides, we actively monitor the tenant turnover and the eviction rates. Zero substantiated products and service-related complaints or grievances that significantly impacted our operations were received in 2024.

87%
Customers are satisfied
with our services²

Maintaining service quality is our priority. We have developed mobile apps and management systems that facilitate effective communication and ensure a high-quality experience. These tools enable seamless interactions and timely updates, enhancing overall customer satisfaction and fostering a more connected and responsive service environment.

1. Calculated based on GFA.
2. Our satisfaction surveys cover offices, retail, and residential properties managed by the Group.

KERRY+ & Kerry Living Mobile Apps

We strive to deliver innovative and high-quality experiences for our customers and have established two mobile apps: KERRY+ and Kerry Living. While we have successfully launched the Kerry Living app across 23 properties in Hong Kong as of 2024, we are planning to fully launch the KERRY+ app across our Mainland portfolio in 2025. Through KERRY+ app, we have integrated technology into property services, enabling seamless access with the KERRY+ access code for both office tenants and invited visitors, flexi shared spaces booking, community activities and promotions enrollment, and offering door-to-door robot meal delivery at certain projects for a convenient and smart office experience. Our Kerry Living app serves as an online platform to streamline occupant engagement. Users can receive news updates, privileges, activity enrolment, value-added services, and purchase/redeem products and services, creating a connected and engaging community.

Customer Relationship Management System

Kerry Customer Relationship Management (CRM) System is designed to manage customer engagement across our properties in various regions. This system enables us to streamline and integrate sales, marketing, customer service, technical support, and other digital management processes. By enhancing customer satisfaction and loyalty, it also helps reduce costs and increase profitability.

Key features include:

- ▶ Revamped store navigation system
- ▶ Membership benefits: membership points, e-vouchers, item rental
- ▶ Marketing and event management
- ▶ Smart parking: online payment with discounts
- ▶ Online customer service
- ▶ Membership points as payment

When customers voice their concerns, we address these complaints promptly and professionally with our comprehensive complaint handling procedures.

Process of Customer Complaint Handling

Step 1
We handle complaints received from customers in accordance with the complaint handling procedures to guarantee equitable and consistent outcomes in addressing complaints.

Step 2
Upon receipt of a complaint, the appropriate department employee will conduct a thorough examination.

Step 3
We ensure timely communications with customers and prompt remedial measures will be implemented to avoid the reoccurrence of similar problems in the future.

Technology and Innovation

Harnessing Technology for Sustainable Solutions

Recognising the transformative power of technology, we are dedicated to shaping a smarter, more innovative city. By integrating advanced technologies into our property development process, we aim to create intelligent, efficient, and socially inclusive buildings. Our efforts focus on enhancing property management, streamlining operations, and fostering sustainable urban environments through collaboration with value chain partners. We actively engage with collaborative groups and business partners to foster innovation and knowledge sharing, including:

- ▶ Member of Hong Kong PropTech Alliance & China Working Taskforce on Embodied Carbon
- ▶ Steering Member of the Asian Corporate Coalition for Climate Change Resilience (A4CR)
- ▶ Signatory of Construction Industry Council (CIC) Construction Digitalisation Charter

In 2024, Technology and Innovation Department introduced and adopted generative AI powered tools, such as smart meeting assistant, for improving the daily productivity at work. The department also streamlined multiple manual processes by using Robotic Process Automation tools to emulate repeatable human actions and minimise human errors in business processes.

Digitalised Supply Chain Management Platforms

To strengthen supply chain management and mitigate environmental, social, and economic risks along the supply chain, we have been developing and implementing eTender system and eProcurement system – digitalised platforms that streamline tendering and procurement procedures, respectively.

eTender System

In 2024, we have taken a significant step towards enhancing the procurement processes by embracing digital transformation. We have transitioned to an eTender system to collect data and responses from our suppliers and service providers. This system is designed to promote digitisation by leveraging a platform that manages the tendering process, from vendor management and tender issuance to handling inquiries and awarding contracts. Featuring an automated and auditable platform, it is targeted to highly minimise manual and paper-based procedures, thus raising the standard of procurement while ensuring compliance, efficiency, and sustainability benefits. The system can also be used to disseminate important documents and internal policies to our suppliers, such as our Vendor Code of Conduct, Environmental Guidelines, Sustainable Procurement Policy, etc.

eProcurement System

To strengthen the procurement and supplier management and further digitalise procurement procedures, we have been implementing an eProcurement system for general purchases this year. We are making steady progress and anticipate piloting the system in 2025, expecting it to enhance efficiency and transparency, and provide a solid foundation for establishing a green and sustainable value chain.

Tenant and Customer Comfort Improvement

We have introduced a digitalised central building management system and advanced equipment to enhance the liveability and comfort for tenants and customers.

Smart Tech for Greener Operations

We implemented the Kerry Building Integrated System (KBIS) to optimise building management across properties. To enhance building management efficiency by providing a centralised platform to monitor key building systems such as HVAC, lighting, and power. It enables real-time monitoring of building systems operation and triggers alerts when potential errors or issues are detected.

Key monitoring capabilities:

- ▶ Energy consumption management
- ▶ Smart lighting
- ▶ HVAC control
- ▶ Alert centre for equipment lifecycle tracking

Enhancing Energy Efficiency with iFilm Technology

We applied iFilm to our properties, blocking solar radiation and thermal gain while balancing visible light transmission and UV blocking rate. This reduces air conditioning usage, lowering energy consumption and costs, while ensuring indoor comfort.

Corporate Compliance and Governance Behaviour

Corporate Compliance and Governance Behaviour

Acting ethically in corporate compliance

Future Trends

- ▶ As digitalisation accelerates, cybersecurity threats are rising due to the rapid development of AI.
- ▶ Stakeholders demand greater transparency, diversity, and strategic alignment in board operations. Regular review and continuous training for directors ensure the Board's effectiveness.

Our Response

- ▶ Conducting regular cybersecurity training equips our employees with the knowledge to embrace digitalisation, while safeguarding sensitive data and meeting compliance standards.
- ▶ We have newly established the T&I Resources and Assets End User Usage Policy and the End User Computer Assets Management Policy for governing the information technology resource and asset usage.
- ▶ The Board undergoes annual review guided by the Remuneration Committee and Nomination Committee, ensuring alignment with corporate goals, diversity, and market expectations.
- ▶ To support continuous improvement, the Directors receive training on governance, regulatory updates, sustainability, and monthly updates on business developments. These training programmes are tailored to the Group's needs and strategic objectives.

Topics Related to Governance

- ▶ Business Ethics and Integrity
- ▶ Information Privacy and Security
- ▶ Risk and Crisis Management

Our Policies in Response

- ▶ Anti-Corruption Policy
- ▶ Board Diversity Policy
- ▶ Equal Opportunity and Anti-Discrimination Policy
- ▶ Human Rights Policy
- ▶ Personal Data (Privacy) Policy
- ▶ Whistleblowing and Complaints Policy

Corporate Governance

Upholding Strong Corporate Governance for Sustainable Success

The Board is responsible for establishing and implementing the Group's corporate governance practices. To uphold high standards of governance and accountability across all areas of the Group's operations, the Board has set a clear strategic direction to ensure accountability and sustainability through robust review, challenge, and guidance in collaboration with management.

The Remuneration Committee reviews and advises the Board on the remuneration proposals, including benefits in kind, pension rights and compensation payments, for all Directors and senior management with reference to individual performance, goals and objectives of KPL, market trend and other relevant factors to ensure that the remuneration packages are commensurate with the qualifications and competencies of the Directors and senior management and are appropriate to the best interests of KPL and the Shareholders. Where necessary, independent professional advice regarding remuneration proposals for the executive directors can be sought by the Remuneration Committee. Based on the Nomination Committee's recommendations, the Board may consider any proposed changes to its structure to align with the Company's corporate strategy. This annual review process is typically conducted in January.

For further disclosures on corporate governance, please refer to the [Corporate Governance Report](#) of our [Annual Report 2024](#).

Board Independence, Diversity and Training

The Board consists of five members, each bringing their own unique expertise. To ensure objectivity and independence, more than half of the Board is comprised of independent non-executive directors.

Our Nomination Policy and Board Diversity Policy guide the appointment of Board members. The Nomination Committee conducts annual review of the Board's composition and provides recommendations as needed. The composition of the Board is determined by taking into account various aspects, including gender, age, cultural, educational background, ethnicity, professional experience, skills, knowledge and length of services and other factors that may be relevant from time to time towards achieving a diversified Board.

The Directors receive training on key topics such as governance, regulatory updates, and sustainable developments. Additionally, Directors are provided with monthly updates on business developments in order to stay informed about the Group's operations and performance. Training courses are tailored to the Directors' needs, identified through assessments, and aligned with the Group's strategic development objectives.

Directors' Training Topics

- Sustainability workshops;
- E-learning – Introduction to share repurchase and treasury shares;
- E-learning – Overview of SEHK's new climate disclosure requirements;
- ESG reading materials – Cybersecurity and anti-corruption; and
- Corporate governance updates

Business Ethics and Integrity

Placing a high priority on operating ethically, we have implemented a series of control measures for fair decision-making. Our employees must strictly adhere to the Company's Code of Conduct to protect both personal integrity, as well as the Company's. To support this commitment, we have collated a set of Ethical Guidelines covering essential areas such as anti-corruption, competition law, and whistleblowing. Additionally, we offer online training on these critical topics to ensure that all employees are well-informed and equipped to uphold our ethical standards. Any breach of our Code of Conduct may result in disciplinary action, which could impact performance appraisals and remuneration.

The Code of Conduct, outlined in the Employee Handbook, provides clear guidelines on addressing potential corruption cases, including procedures for obtaining approvals, criteria for decision-making, and internal declarations of interests. These guidelines cover areas such as:

- Prohibited payments and offers (i.e., bribes, kickbacks, fraud, money laundering and insider dealing)
- Gifts, entertainment, and hospitality
- Procurement process
- Handling of Company assets

To uphold ethical standards and ensure effectiveness, the Internal Audit Department conducts regular review, audits and inspections. Recommendations are then provided to the Audit and Corporate Governance Committee ("**ACGC**") to enhance integrity management. During the reporting period ¹, there were no reported breaches on the Code of Conduct.

1. "Reporting period" refers to the financial year from 1 January to 31 December 2024.

Anti-corruption Compliance

Prioritising training as a key preventive measure to combat corruption, we provide all employees and directors with mandatory online courses on corruption, conflicts of interest, and integrity. These training sessions aim to deepen our employees' understanding of business ethics and anti-corruption practices and refresh their knowledge regularly. During the reporting period, there were no legal instances of corruption against the Group or our employees.

2024 Anti-corruption Training

We uphold zero-tolerance for corruption. This year, we partnered with Independent Commission Against Corruption (ICAC) for anti-corruption training for 79 employees. Online training on ethical conduct offered to all employees reached a 93% completion rate.

All relevant competition and anti-trust laws are strictly adhered, including the Hong Kong Competition Ordinance. We provide comprehensive guidelines to help our employees in understanding and complying with these laws, covering areas such as proper interactions with competitors, avoiding abusive market dominance practices, and engaging in trade associations. Additionally, we have implemented a Competition Law training programme for our employees in both Hong Kong and the Mainland. During the reporting period, there were no legal cases against the Company for anti-competition behaviour.

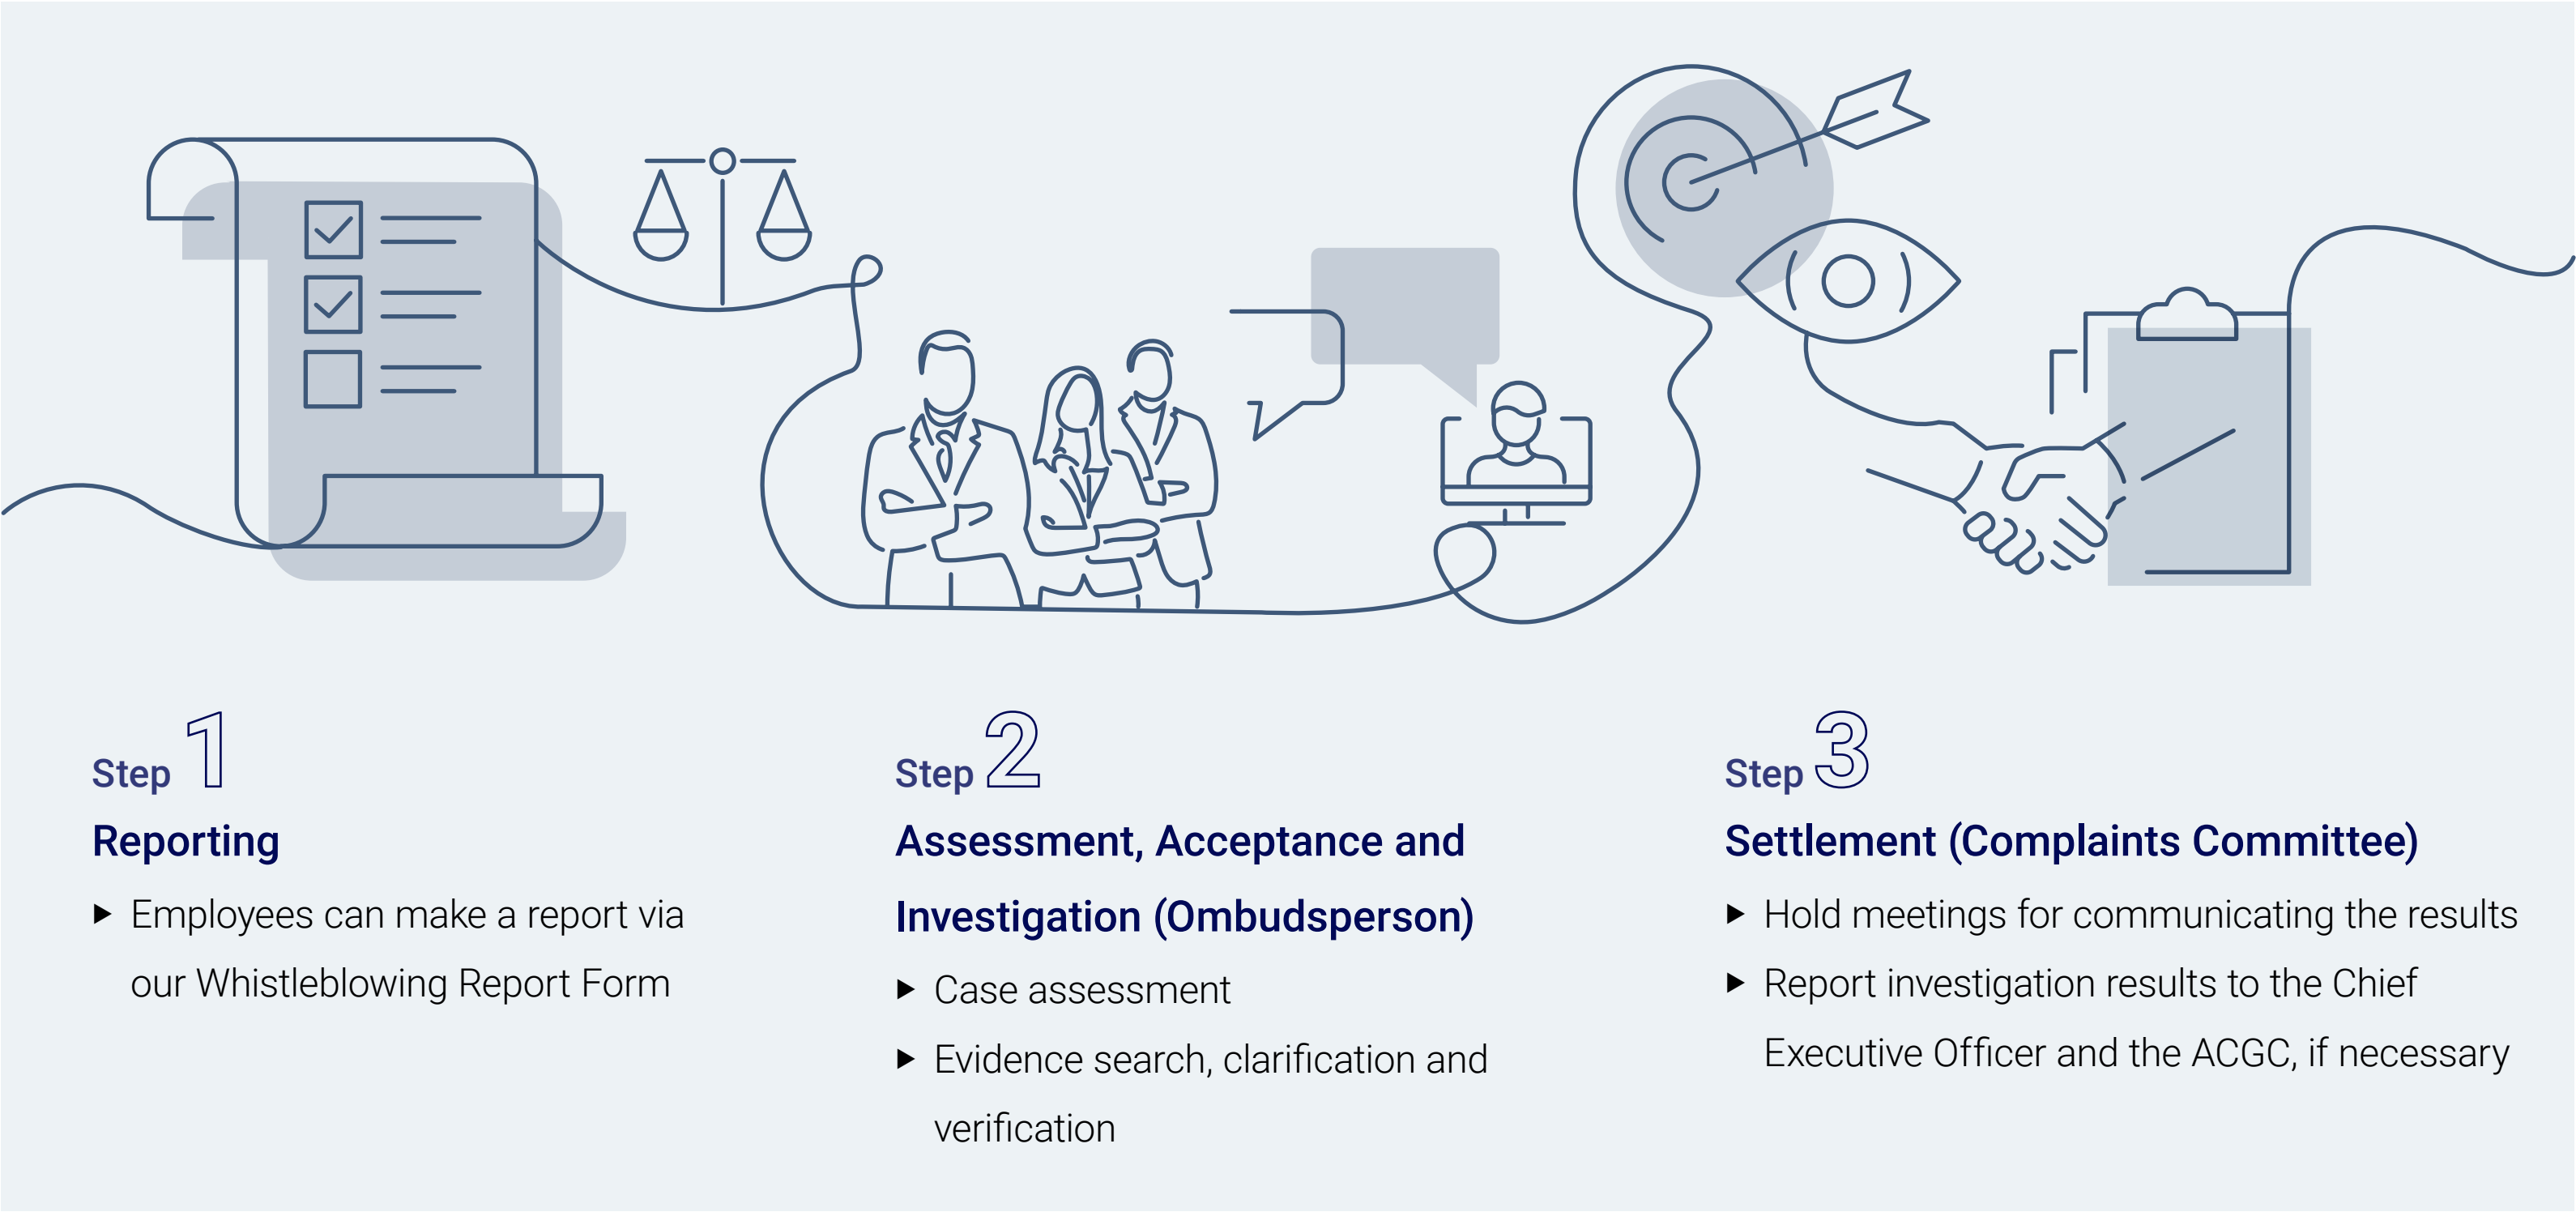

Whistleblowing Mechanism

We encourage employees, suppliers, business partners, customers, and other stakeholders to report to senior management any whistleblowing or complaints, as well as any integrity or operational concerns. Our Whistleblowing and Complaints Policy was reviewed in 2024, which outlines how we maintain the confidentiality of all complainants and details of our investigation procedures. Employees and related parties can raise in confidence and anonymity about any integrity or operational concerns. This process is formalised via a reporting structure that directs concerns through the ACGC to the Board. Upon receipt of any whistleblowing or complaint reports, a thorough assessment will be

conducted to determine if an investigation is warranted. Additionally, we are committed to protecting the confidentiality of whistleblowers and their information. Whistleblowing and complaint reports are handled on an anonymous basis, and we would only disclose details when legally obligated or when reporting to regulators or law enforcement.

The ACGC regularly checks and monitors the Whistleblowing and Complaints Policy to ensure it remains relevant and effective.

Whistleblowing Channels and Procedures

Responsible Marketing

We place a strong emphasis on ethical marketing and communications through our policies and standard operating procedures, which ensure the accuracy of information and compliance with relevant laws and regulations. The marketing materials for our property sales are developed according to our internal guidelines with professional advice from external experts. Our responsible marketing strategy prioritises key areas such as advertising, promotional materials development, privacy considerations, and compliance with applicable local regulations, enabling our customers to make informed decisions in accordance with local and national standards.

In Hong Kong, we have established internal procedures to guide our employees in producing responsible marketing materials. These procedures are regularly audited by the Internal Audit Department to ensure compliance and effectiveness. All property marketing materials require approval from the Head of the Marketing Department prior to release, ensuring truthfulness and compliance with regulations. Additionally, we engage external professional advisors to oversee the content of our sales brochures and marketing materials. To guarantee the data presented is accurate and complies with the Residential Properties (First-hand Sales) Ordinance in Hong Kong, architects, surveyors, and solicitors, are consulted as necessary. A similar practice is maintained throughout our business in the Mainland as well.

Intellectual Property Rights

We uphold the intellectual property ("IP") rights of all parties we work with. Our Ethical Guidelines mandate our employees to protect company assets, respect third-party IP rights and prohibit the misuse, copying, selling, or distribution of any form of IP against local laws or licence agreements. In addition to maintaining the confidentiality of privileged information, our Employee Handbook provides relevant guidance for employees. They are required to acknowledge receipt and understanding of our policies and commit to upholding them.

Cybersecurity

Acknowledging the importance of cybersecurity in today's digital world, robust cybersecurity measures have been implemented to ensure the highest standards of information protection and the compliance with relevant laws and regulations. The ACGC is responsible for overseeing the cybersecurity strategy. This year, we introduced three new policies, including the T&I Resources and Assets End User Usage Policy and the End User Computer Assets Management Policy, which enhanced our commitment to safeguarding sensitive information. Technology Risk Committee, consisting of representatives of Technology and Innovation, Human Resources, Legal, and Internal Audit departments, will be established to conduct regular meetings, review the corporate cybersecurity level and assess our capability to tackle any potential risks.

We were ranked Platinum in the Cyber Security Staff Awareness Recognition Scheme 2024/25, recognising our outstanding effects in safeguarding information security. This award emphasised the importance of establishing a second line of defence for the Company by enhancing employees' cybersecurity awareness.

With the increasing prevalence of cybersecurity threats, our employees' awareness of information security is crucial. To cope with the application of AI technology as a global trend, we provide guidance on the secure use of generative AI tools, permitting only authorised AI tool for work purposes. We have also upgraded our email security solution

that extends the anti-phishing and safe attachment protection from traditional email messaging to internal communication software and cloud data storage.

Further, we have established precautionary measures on information security, integrity, and accountability. The incident management and disaster recovery plan for critical system are reviewed yearly. Practical tips are provided to our employees through emails and the Technology & Information Portal. We have engaged a third-party to conduct a vulnerability analysis, including a penetration test, to assess the effectiveness of our cybersecurity maturity.

- Online training is provided to all employees, with 100% completion rate covering the following topics:
- Spear phishing
 - Safeguard measures regarding password safety and network safety
 - Latest trend of cybersecurity threats

During the reporting period, there were no known issues of data leaks, thefts, losses, or substantial complaints about non-compliance with regulations concerning customer data privacy.

Information and Data Privacy

In maintaining responsible marketing practices, we are dedicated to ensuring the safety and privacy of our stakeholders to strengthen internal control and operation, an internal Personal Data (Privacy) Policy was introduced, applicable across the Company. The guidelines cover the definition, handling procedure and hierarchy of personal data privacy roles, along with a response mechanism for handling any data breach. Each department is required to allocate designated departmental coordinators to keep an inventory record for departmental use.

Our policies are regularly reviewed to enhance customer data privacy and safeguard stakeholders’ interests. We offer all employees necessary annual awareness training, supporting the procedures and guidelines outlined in our Employee Handbook and Personal Privacy Data System Management Standard. Training including Data protection and destruction, and Personally Identifiable Information (PII) handling is arranged for colleagues.

Human Rights

We are committed to respecting human rights across our own activities and in business relationships with our value chain partners. All practices are in accordance with national laws and international norms including the International Labour Organisation’s Declaration on Fundamental Principles and Rights at Work, the Universal Declaration of Human Rights, the UN Guiding Principles of Business and Human Rights, and the UNSDGs. Our Human Rights Policy clearly outlines our commitment to identifying human rights risks in our own operations and supply chain and safeguarding human rights in key areas such as non-discrimination, child rights, forced or compulsory labour, freedom of association and collective bargaining, diversity and inclusion, and health and safety.

To ensure the effective integration of human rights into business operations, we provide regular training for all employees. Additionally, we are dedicated to conducting ongoing assessments of our projects' impact on human rights – both positive and negative – and proactively implement mitigation plans to address any identified risks across all our operations. This holistic approach ensures that we not only comply with legal requirements but also foster a culture of respect for human rights throughout the Group. During the reporting period, we have not caused nor contributed to any human rights violation, thus no remediation actions were taken.

Risk and Crisis Management

Supported by the ACGC, the Board holds ultimate responsibility for overseeing and monitoring the Group's risk management activities.

Our risk management and internal control (“**RMIC**”) framework is based on that of the Committee of Sponsoring Organization of the Treadway Commission (COSO) for internal control. This framework ensures that adequate personnel and processes are in place to identify, assess, and monitor both existing and emerging risks. The Group has implemented a robust risk management process that combines both top-down and bottom-up approaches. Departments conduct quarterly reviews of the risk register and matrix, incorporating risk mapping to identify potential issues, including those related to human rights, and emerging risks. This process helps determine which risks are relevant to specific departments and how they may impact both the department and the Group as a whole. This dual methodology enables the organisation to comprehensively review and communicate risks across all governance levels, ensuring alignment with strategic and operational objectives.

In 2024, we introduced a rating form to evaluate the effectiveness of RMIC and track the enhancement implemented during the testing period. These ratings aim to provide insights on the current situation and development opportunities, without affecting compliance outcomes. The risk management process was further strengthened by conducting assessments within the Group, as well as closely monitoring macroeconomic trends and market changes through periodic market analysis. This includes benchmarking against peer companies to gain deeper insights into industry dynamics, as well as performing regular SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis to maintain a balanced approach between risk and opportunity in business decision-making.

To enhance our risk management capabilities and foster a strong compliance culture throughout all business units, we adopt a Three Lines of Defence model. This helps to effectively manage potential risks and controls, with clearly defined and coordinated responsibilities. Meeting frequency of the ACGC has been increased from at least three times a year, to quarterly.

For more information regarding our risk management, please refer to the Corporate Governance Report in our [Annual Report 2024](#).

Anti-greenwashing Seminar

The World Green Organisation was invited to share insights on greenwashing trends and prevention. Over 20 employees and tenant representatives attended, strengthening compliance and integrity awareness.

Climate-related Financial Disclosure

As we progress towards our goal of achieving carbon neutrality by 2050, our primary focus is on effectively mitigating climate-related risks, seizing emerging opportunities, and enhancing the quality of our reporting in these areas.

In 2024, we have conducted a double materiality assessment and identified that Climate Change and Resilience remained one of our most material topics. Given the significant impact of climate change on our business operations, addressing it is essential as it represents one of our key ESG risks. We report with reference to the TCFD recommendations and the IFRS Sustainability Disclosure Standard S2 (“**IFRS S2**”) Climate-related Disclosures issued by the International Sustainability Standards Board (“**ISSB**”), providing our stakeholders with a clear and comparable understanding of our efforts to manage, adapt to, and mitigate climate-related risks and opportunities.

We maintain transparency in communicating our efforts to the public, covering the four thematic areas from the TCFD recommendations, namely governance, strategy, risk management, and metrics and targets.

As we continue our journey towards carbon neutrality by 2050, we will regularly report on the management of climate-related risks and opportunities.

Governance

Governance

The Board plays a pivotal role in steering the management of climate-related topics, ensuring that adaptation and mitigation measures are seamlessly integrated into the overall business strategy. For further details on our sustainability governance structure, please refer to [Sustainability Governance and Leadership](#).

Board Oversight

The Board assumes ultimate responsibility for overseeing the management of climate-related risks, opportunities, and initiatives aimed at driving climate mitigation and adaptation strategies. At the next level, the Council supervises the Group’s sustainability direction and policies.

The Committee reports to the Council and informs the Board regularly. The Committee is also tasked with overseeing and managing the Group’s sustainability agenda, strategies, policies, and performance. This includes critical activities such as materiality assessments and climate scenario analysis.

Regular updates on sustainability matters, including climate-related targets, are provided to both the Board and the Committee by the Environmental Initiatives Sub-committee and the Sustainability Team at least twice a year.

Management’s Role

The management is responsible for designing and implementing climate-related policies, targets and action plans, with regular progress updates provided to the Board and the Committee. Drawing upon the corporate-level climate risk assessment, strategic responses are coordinated through various bodies.

The Environmental Initiatives Sub-committee, consisting of department heads, supports the Committee in driving and ensuring carbon reduction progress in line with our carbon neutrality goal. Additionally, we have established taskforces under the Environmental Initiatives Sub-committee to implement initiatives at asset level. This ensures that such measures are effectively integrated into our daily operations.

The Climate Transition Taskforce is responsible for formulating transition plans and conducting analysis concerning the implementation of carbon transition strategies, initiatives and our contribution to achieving carbon neutrality.

Informed Decision Making

The established governance structure ensures that the Board can make informed decisions when integrating climate-related considerations into our overall business strategies. To support this, we conduct regular training sessions and workshops to equip the Board and senior management with the latest knowledge on climate change. In addition, Climate Fresk training was provided to the Environmental Initiatives Sub-committee, to deepen understanding of the context of climate change and response actions.

Remark: This section is prepared with reference to IFRS S2 paragraph 6.

Strategy

Keeping up to date with our understanding of climate change on our business is crucial in adapting and mitigating relevant impacts. It also allows us to incorporate climate-related considerations and adjust our business strategies accordingly. We have conducted scenario analysis to understand climate-related physical and transition risks on our business operations in Hong Kong and the Mainland. The assessment analysed the potential risks and opportunities due to climate change under the scenarios from the Shared Socioeconomic Pathways (“**SSP**”) by the Intergovernmental Panel on Climate Change (“**IPCC**”) and the Network for Greening the Financial System (“**NGFS**”). The risks are assessed in selected timeframes from 2030 (short-term), 2050 (medium-term), and 2100 (long-term).

Considering the nature of our business, we anticipate that transition risks will have a more profound impact in the short- to medium-term. These risks include regulatory changes, market shifts towards low-carbon solutions, and evolving stakeholder expectations. In the long term, physical risks, such as rising sea levels and increased temperatures, are expected to become increasingly significant. Recent climate events have underscored the urgency of building resilience against these risks.

By proactively addressing both transition and physical climate risks, our Carbon Neutrality Roadmap ensures that we are well-prepared to navigate the evolving landscape of climate change. This comprehensive strategy not only supports our sustainability goals but also enhances the resilience and longevity of our business operations.

Our Carbon Neutrality Roadmap has set strategic directions in adopting sustainable building design, transitioning to climate-resilient operations and enhancing value chain engagement. We will align our future capital expenditures with our long-term carbon targets to effectively advance our decarbonisation efforts.

Some of our key actions include:

Sustainable Building Design	Climate-resilient Operation	Value Chain Engagement
► Achieve/maintain sustainable building certificates	► Implement smart management ► Assess and manage climate-related risk and opportunities ► Source renewable energy alternatives ► Enhance energy efficiency ► Conduct regular group-wide carbon audit	► Actively engage our tenants, suppliers and contractors ► Adopt the Sustainable Fitting Out Guideline (Office) ► Encourage tenants to participate in Dark Green Leasing Programme

As part of our Vision 2030 in promoting climate resilience, we have been integrating a variety of technologies throughout the entire lifecycle of our buildings. This includes the use of BIM during the construction phase to enhance design accuracy and efficiency. During the operational phase, we incorporate IoT technologies to optimise building performance and energy management.

We are committed to continuously exploring and adopting additional technologies to support our ongoing decarbonisation efforts. This proactive approach ensures that our buildings are not only resilient to climate impacts but also contribute to a sustainable future through reduced carbon emissions and improved energy efficiency.

To further reduce emissions in the long run, we plan to leverage technological advancements and explore high-integrity carbon removal options for residual emissions. This includes exploring options of cutting-edge technologies such as AI, carbon capture and storage, and renewable energy solutions to significantly reduce our carbon footprint. By focusing on both emission reductions and high-integrity carbon removal, we aim to achieve a balanced and effective approach to carbon neutrality by 2050.

At site level, each site is provided with a tailored Climate Checklist for Mitigation Measures, aimed at enhancing awareness about key risks and offering practical ways to prepare for and alleviate the effects of climate change on buildings. The Checklist is structured as follows:

Management Process	Preparedness	Improvement Works
► Highlights management actions to be completed and checked upon to prepare for climate impacts ► Risks covered include for typhoon, black rain, flooding, landslide	► Specific actions to be taken to prepare for extreme weather events, for example checking the availability of valid protective equipment	► Specific actions to be taken to complement Preparedness actions, to bolster as smooth a response as possible to climate impacts

Remark: This section is prepared with reference to IFRS S2 paragraphs 9(a), 9(c), 10(a) – 10(c), 14(a) and 22.

Risk Management

Risk Management

Our Internal Audit Department plays a crucial role by leading regular reviews to evaluate the effectiveness of our overall risk management and internal controls. This process includes identification, assessment, management and monitoring of climate-related risks, as well as broader risks that could impact our business. This ensures that our risk management practices are consistent and aligned with our strategic objectives.

Our proactive approach to climate risk management not only helps us mitigate potential adverse impacts but also positions us to capitalise on emerging opportunities in the transition to a low-carbon economy.

RMIC Systems	Internal Audit
<p>The Group has incorporated climate risk management into the overall risk management through the group-wide RMIC Systems.</p> <p>These systems are used to identify, assess and manage operational, financial, as well as ESG risks. The Board conducts a review of the system on an annual basis to ensure its effectiveness and performance across both management and business unit levels.</p>	<p>In addition to environmental data, the Internal Audit team has expanded its audit scope to include physical risks. This serves to ensure data accuracy and help with preventive measures when encountering physical risks, such as super typhoons and storm surges.</p> <p>For further details regarding risk management, please refer to the Corporate Governance Report in our Annual Report 2024.</p>

Climate Risk Identification and Assessment

In our comprehensive CRVA, we identified both physical and transition risks across our entire value chain through detailed scenario analysis. This analysis spans a timeframe from the near-term to 2030 and extends as far as 2100, taking into account a wide range of relevant climate parameters. While we observe rather homogeneous transition risks across our portfolios, we acknowledge that physical risks could vary based on geographical factors. For example, Shanghai has higher flooding risks while tropical cyclones are more material to our properties in Hong Kong.

Senior executives from various departments, including Project Development, Architecture, Technical Service, and Internal Audit, contribute valuable insights to help map and prioritise our climate-related risks and opportunities.

Recognising that our properties are situated in diverse cities, each subject to distinct local government policies, we are implementing an initiative to gather data at regional or city level. This initiative aims to develop more granular analysis of climate scenarios tailored to our properties. By doing so, we can better understand and address the specific climate risks and opportunities associated with each location.

We are committed to formulating robust action plans that will enhance the disclosure of financial implications linked to climate-related risks and opportunities. This includes improving transparency and communication with our stakeholders about how these risks and opportunities impact our financial performance. At the same time, we strive to integrate climate-related considerations more deeply into our overall business strategy, ensuring that sustainability and resilience are at the core of our decision-making processes.

Physical Risk Assessment

In 2024, we conducted an updated assessment of physical risks to our Investment Properties and selected development projects. We leveraged historical hazard data, including frequency and intensity, for the regions where our properties are located to evaluate the risk exposures. The assessment was conducted based on the SSP, referring to selected scenarios SSP1-RCP2.6, SSP2-RCP4.5, SSP4-RCP6.0 and SSP5-RCP8.5. These scenarios align with the latest international agreements on achieving a lower carbon economy and are widely recognised for global climate projects, incorporating socioeconomic and technological variables into the analysis.

The updated assessment aimed to understand the impacts of extreme weather and shifts in climate patterns on our properties, thereby allowing us to enhance resilience of our properties. We investigated our Investment Properties and projects under development located across 11 cities and identified the most material physical risks associated with climate change.

Transition Risk Assessment

We conducted a transition risk assessment based on scenarios from the orderly pathways and hot house world scenarios by the NGFS. The assessment allowed us to better understand the potential financial impacts during the transition towards a lower carbon business.

Remark: This section is prepared with reference to IFRS S2 paragraphs 10, 13-16, 22(b), 25.

Risk Management

Key risks and opportunities drivers identified are shown below:

Climate Risks and Opportunities		Timeframe	Potential Financial Impacts	Our Response
Physical	Increased severity of extreme weather events, such as tropical cyclone, landslides and flooding	Short-term	<div><div>▶ Increased operational and maintenance expenses</div><div>▶ Increased insurance premiums</div><div>▶ Increased expenses in human resources</div><div>▶ Reduced revenue from delayed service or temporary closure of properties</div></div>	<div><div>▶ Early achievement of our target on conducting CRVA for all our Investment Properties</div><div>▶ Enhance energy efficiency through innovative technologies</div><div>▶ Adopt climate-resilient building features</div></div>
	Rising mean temperatures and occurrences of heatwaves	Long-term	<div><div>▶ Increased expenses incurred by negative impacts on employees' health and safety</div><div>▶ Increased utility expenses</div></div>	<div><div>▶ Roll out of Climate Checklist for Mitigation Measures to each of our sites to mitigate climate impacts</div><div>▶ Internal training sessions to increase our employees' know-how on these topics</div></div>
Transition	Tightened building energy codes and guidelines	Short-term	<div><div>▶ Increased capital investment and expenditures to meet the requirements</div></div>	<div><div>▶ Maintain our target for 100% of New Investment Properties to achieve green certifications</div><div>▶ Keep abreast of regulatory developments</div></div>
	Increased adoption of renewable energy (change in energy mix)	Short-term	<div><div>▶ Increased capital expenditure</div><div>▶ Decreased utility expenses</div></div>	<div><div>▶ Develop green partnerships with tenants e.g. providing free carbon audit/accounting to tenants and Dark Green Leasing Programme</div></div>
	Increased ambition of decarbonisation strategies and roadmaps	Short-term	<div><div>▶ Increased capital expenditure on decarbonisation</div><div>▶ Decreased operating expenses, including utilities</div></div>	<div><div>▶ Engage with our value chain partners on sustainability education to advance our decarbonisation strategy</div><div>▶ Cooperate with Internal Audit Department to audit physical risk responsive measures and environmental data</div></div>
	Increased market demand for climate-resilient properties	Medium-term	<div><div>▶ Increased revenue from attracting high value tenants</div><div>▶ Increased capital expenditure on adopting climate-resilient features</div></div>	<div><div>▶ Retrofit existing buildings to meet the growing appetite for sustainable workplaces and homes</div><div>▶ Increase the use of renewable energy and decarbonisation technologies in our New Investment Properties</div></div>

Metrics and Targets

Metrics and Targets

The primary climate-related metrics we use include Scope 1, 2, and 3 GHG emissions data, along with our progress towards achieving our climate targets. Our GHG emissions calculations follow established standards such as the GHG Protocol, ISO14064-1 and the Guidelines to Account for and Report on Greenhouse Gas Emissions and Removals for Buildings (Commercial, Residential, or Institutional Purposes) in Hong Kong.

Central to our commitment to transparency, we utilise a robust data management system to enhance our capabilities in data collection and target setting, thereby improving our reporting quality. We are committed to enhancing the disclosure of Scope 3 GHG emissions by collecting activity data from our tenants and contractors. This year, we implemented the Tenant Carbon Audit Programme with its scope extend to more properties in the Mainland and initiate the construction materials data collection exercise.

With a more mature Scope 3 GHG dataset collected, we have disclosed material Scope 3 categories in our report for a more comprehensive and transparent view of our environmental performance. For more details on our performance, please refer to the [Carbon Emission and Energy Consumption Performance](#).

We are proud to have achieved our 2025 carbon reduction target ahead of schedule. Building on this success, we have set a new reduction goal of 2% for our Scope 1&2 emission intensity annually. In addition, we have established a science-based target, which is currently undergoing validation by the SBTi. Our engagement targets are designed to enhance both upstream and downstream emission performances. We are committed to building capacity and providing incentives to our tenants and supply chain to achieve these goals.

Our 2030 Decarbonisation Targets

Carbon Intensity Reduction	▶ Reduce 2% of our Scope 1&2 emission intensity annually
Stakeholder Engagement	▶ Offer free carbon audits to office tenants in 100% of our commercial Investment Properties ▶ Provide green leasing as an option to office tenants in 30% of our commercial Investment Properties

Other Key Metrics

95%	94%	87%
of Investment Properties obtained sustainable building certifications	of Investment Properties adopt climate-resilient building features	of operations governed by green procurement guidelines for property development and operation

By continuously refining our strategies and expanding our initiatives, we are committed to leading the way in sustainability and climate action. We will proactively seek and implement initiatives to enhance our current efforts and introduce new and impactful measures within our operations. We believe that through collaboration and innovation, we can achieve our ambitious targets and contribute to a more sustainable future for all.

Remark: This section is prepared with reference to IFRS S2 paragraphs 29(a), 32, 33, 34 and 36(a) – 36(b).

Sustainability Accounting Standard Board (SASB) Real Estate Sector Disclosure

Kerry Properties adopted SASB Real Estate Sustainability Accounting Standard (Version 2023-06) to enhance communication with stakeholders on the financial impacts of industry-specific material issues. The section aligns with the scope of this Report as detailed on page [82](#).

The data and metrics reported in this section covers not only the base building but also the tenant spaces, allowing comprehensive evaluation of overall impact of our entire building.

Energy Management ¹

SASB Code	Accounting Metric	Property Sector	2022	2023	2024
IF-RE-130a.1	Energy consumption data coverage as a percentage of total floor area, by property sector (%)	Office	75.4%	81.1%	81.8%
		Retail	62.3%	66.4%	67.2%
		Residential ²	1.1%	1.1%	1.3%
IF-RE-130a.2	Total energy consumed by portfolio area with data coverage (GJ)	Office	582,038	655,208	767,531
		Retail	579,332	560,641	627,312
		Residential	111,922	109,469	80,848
	Total energy consumed by percentage grid electricity, by property sector (%)	Office	52.9%	61.5%	60.8%
		Retail	79.7%	78.8%	74.6%
		Residential	65.0%	66.7%	78.3%
	Total energy consumed by percentage renewable, by property sector (%)	Office	25.9%	26.0%	21.9%
		Retail	3.6%	11.2%	15.5%
		Residential	10.5%	16.1%	21.0%
IF-RE-130a.3	Like-for-like percentage change in energy consumption for the portfolio area with data coverage, by property sector (%)	Office	-11.7%	12.6%	17.1%
		Retail	-9.8%	-3.2%	11.9%
		Residential	-37.6%	-2.2%	-26.1%

1. It is important to note that while the data presented here represents the whole building, there are limitations in the data coverage, particularly in tenant spaces in Hong Kong as shown in IF-RE-130a.1. We remain committed to addressing these gaps and continuously improving our reporting practices.

2. There is particularly low data coverage in residential properties. This is mainly due to common practices in residential buildings, where occupants pay energy bills directly to the energy providers.

3. There is a lack of energy rating schemes in the Mainland so we excluded the relevant GFA from the denominator as suggested in the Real Estate Sustainability Accounting Standard.

SASB Code	Accounting Metric	Property Sector	2022	2023	2024
IF-RE-130a.4	Percentage of eligible portfolio that has an energy rating, by property sector (%) ³	Office	100%	100%	100%
		Retail	100%	100%	100%
		Residential	91.9%	91.5%	99.7%
	Percentage of eligible portfolio that is certified to ENERGY STAR®, by property sector (%)	Office	Not Applicable to Hong Kong and the Mainland		
		Retail			
		Residential			
IF-RE-130a.5	Description of how building energy management considerations are integrated into property investment analysis and operational strategy				

Adhering to ISO 50001:2018, we have established the Energy Policy and Energy Management System and conducted regular reviews on them. We also regularly conduct energy audits accordingly. We prioritise energy excellence in our new projects, following our Sustainable Building Guidelines, which consider both environmental impacts and energy costs.

In 2024, despite the expanded reporting scope, we successfully achieved a 5.0% reduction in energy intensity, as compared to 2019. Considering our landbank pipeline, we anticipate increased energy consumption in the future, and as a result, we will closely monitor our energy performance.

We place significant emphasis on continuously improving energy performance in our existing buildings and strive to obtain recognised green building certifications for our Investment Properties. To facilitate energy management, we have been developing an integrated building management system and actively

collaborating with stakeholders to raise awareness about energy conservation and to foster behavioural change.

We strive to source renewable energy whenever possible, we have installed solar panels at several properties in Hong Kong and the Mainland. As we develop our Carbon Neutrality Roadmap, we are actively reviewing and refining our renewable energy strategy. Our goal is to facilitate the wider adoption of alternative renewable energy sources, in order to significantly reduce our carbon footprint and contribute to a more sustainable future.

		Retail	79.6%	87.6%	84.5%
		Residential	93.8%	94.3%	96.3%
IF-RE-140a.3	Like-for-like percentage change in water withdrawn for portfolio area with data coverage, by property sector (%)	Office	-5.6%	31.0%	-21.5%
		Retail	-10.7%	10.9%	-19.7%
		Residential	-44.6%	13.6%	-5.2%

1.

It is important to note that while the data presented here represents the whole building, there are limitations in the data coverage, particularly in tenant spaces in Hong Kong as shown in IF-RE-140a.1. We remain committed to addressing these gaps and continuously improving our reporting practices.

2.

There is particularly low data coverage in residential properties. This is mainly due to common practices in residential buildings, where occupants pay water bills directly to the freshwater providers.

SASB Code	Accounting Metric
IF-RE-140a.4	Description of water management risks and discussion of strategies and practices to mitigate those risks

In 2024, we reviewed our baseline water stress at the WRI Water Risk Atlas tool to assess our baseline water stress and the results are consistent with previous results, indicating relatively high baseline stress in our operational areas. However, we have encountered no issues with water sourcing due to our water-efficient designs, water-conserving measures, and robust infrastructure in those areas.

To improve water efficiency and decrease water consumption, we have implemented various measures in our Investment Properties. These include the installation of water-efficient fittings and the incorporation of water reclamation systems, enabling us to reuse greywater and harvest rainwater. Additionally, we conduct regular inspections and maintenance of water supply systems to prevent water leakage and wastage at our Investment Properties.

Our Water Stewardship Policy outlines our strategies for effective water management throughout our operations. To safeguard water resources, we remain committed to reducing water consumption by implementing practical designs such as rainwater harvesting systems. Additionally, we aim to enhance water-saving practices and implement wastewater recycling initiatives at our operational sites.

Regarding construction sites, we establish project-specific water consumption quotas. Furthermore, our Enhanced Safety Performance and Environmental Protection Scheme offers incentives to contractors who recycle and reuse more than 30% of wastewater on-site.

As part of our Vision 2030 targets, we have set a goal of implementing rainwater harvesting systems in 100% of our Investment Properties. Furthermore, we have successfully reduced water consumption intensity by 16.2% compared to the baseline year of 2019.

Management of Tenant Sustainability Impacts

	Percentage of tenants that are separately metered or sub-metered for water withdrawals, by property sector (%) ¹	Office	100%	100%	100%
		Retail	100%	100%	100%
		Residential	100%	100%	100%
IF-RE-410a.3	Discussion of approach to measuring, incentivising, and improving sustainability impacts of tenants				

Consistent interaction with our tenants forms the cornerstone of building trust and fostering collaborative relationships in our business. We have incorporated environment-focus incentive, namely the Dark Green Leasing Programme, to encourage tenants in reducing their carbon and water footprint. Tenants demonstrating measurable year-on-year reductions in energy consumption are eligible for financial incentives.

Upon the arrival of new tenants, we provide them with the Environmental Guideline for Residents and the Sustainable Fitting Out Guideline (Office). These resources aim to encourage their active involvement in sustainability initiatives within our properties.

In addition, the Tenant Carbon Audit Programme was implemented in 2024 to offer complimentary carbon audits for our tenants, allowing enhanced data quality and providing insights for tenant-related engagement and measures.

As a testament to our commitment to raising awareness, we have established the KPL Sustainability Sponsorship Fund and the ESG Event Fund. Through these initiatives, we regularly organise events and implement improvement projects centred around various sustainability themes for the benefit of our tenants.

1. In the regions we operate, submeters are commonly installed for individual occupants, but data may not be available to landlords.

Climate Change Adaptation

SASB Code	Accounting Metric	Property Sector	2022	2023	2024
IF-RE-450a.1	Area of properties located in 100-year flood zones, by property sector (ft ²)	Office	'100-year flood zones' is a U.S. definition and is unavailable in both Hong Kong and the Mainland.		
		Retail			
		Residential	Through the CRVA focusing on physical risks at property level, Investment Properties with flood-related risks are preliminarily identified.		
IF-RE-450a.2	Description of climate change risk exposure analysis, degree of systematic portfolio exposure, and strategies for mitigating risks				

We have identified a list of high-impact climate-related physical and transition risks. The assessment analysed the potential risks and opportunities due to climate change under the scenarios from the SSP by the IPCC and the NGFS. The risks are assessed in selected timeframes from 2030 (short-term), 2050 (medium-term), 2100 (long-term).

In 2024, we have reached our target of completing CRVA at 100% of our Investment Properties. Notably, we have observed variations in high-impact climate risks across different regions, particularly concerning physical risks. The assessments have provided us with detailed and localised insights into regional climate risks, enabling us to develop specialised and localised mitigation plans. Furthermore, we actively engage our stakeholders and communicate the results of the CRVA, sharing our progress and seeking tenants' input on strengthening related measures.

In addition, we have incorporated physical risks into audit engagements. This proactive approach ensures that property management teams effectively implement precautionary actions as required.

Recognising the environmental benefits of technology, we have been integrating various technologies throughout the building life cycle. This includes leveraging BIM during the construction stage and implementing Integrated Building Management Systems during operations. Additionally, we are committed to driving decarbonisation across our upstream and downstream value chain. In 2024, we have enhanced our Scope 3 emissions disclosures with material Scope 3 emissions disclosed. Through an engagement-oriented approach, we provide training, webinars, and pilot programmes to raise awareness and make progress in Scope 3 emissions reduction.

About This Report

This Report covers the Group’s sustainability performance for the financial year from 1 January to 31 December 2024 (“**reporting period**”).

The Report covers the Group’s sustainability strategies, initiatives, and performances, focusing on the Group’s core business operations in Hong Kong and the Mainland. This includes property development, investment, management, and leasing in offices, retails, residential properties, and apartments. Hotel and warehouse businesses, as well as properties not directly managed by the Group are excluded from this Report.

Throughout the Report, “**Investment Properties**” refer to owned and managed investment properties in Hong Kong and the Mainland. “**New Investment Properties**” refer to investment properties that are completed in or after 2019. “**New MUDs**” refer to MUDs that are completed in or after 2019.

The Report provides both qualitative and quantitative information regarding the Group’s approach, initiatives, and priorities for managing material ESG factors. Additional information on corporate governance can be found in the Corporate Governance Report of our [Annual Report 2024](#).

The Board oversees the content of this Report. This Report has been reviewed and approved by the Board.

Reporting Standards and Principles

This Report has been prepared in accordance with the requirements of the Environmental, Social and Governance Reporting Guide (“**ESG Reporting Guide**”), set out in Appendix C2 to the Listing Rules issued by SEHK, the Global Reporting Initiative’s Standards (“**GRI Standards**”) and Sustainability Accounting Standards Board’s (“**SASB**”) Real Estate Sustainability Accounting Standard. Our climate actions are disclosed with reference to the recommendations of the TCFD and the ISSB IFRS S2 Climate-related Disclosures.

To ensure a comprehensive depiction of the Group’s sustainability efforts for our stakeholders, this Report aligns with essential performance indicators from key sustainability benchmarks such as CDP, DJSI, FTSE4Good, GRESB, and MSCI.

In the preparation of this Report, we have made reference to the GRI Standards’ reporting principles and followed the SEHK’s ESG Reporting Guide:

- **Materiality:** Material sustainability topics are identified through diverse stakeholder engagement channels, considering factors such as the Group’s strategic priorities and stakeholders’ concerns. The identified topics are reviewed and endorsed by the Committee and subsequently approved by the Board.
- **Quantitative:** As approved by the Committee, we have established Vision 2030 targets to reduce our operational impact on the ESG aspects. The progress towards these targets are regularly reviewed by the Board.
- **Balance:** We review and disclose our achievements as well as areas for improvement to provide an unbiased picture of our performance.
- **Consistency:** We adopt consistent methodologies to enable meaningful comparisons of sustainability data over time.

Reporting Boundary of Sustainability Data

Our environmental performance data scope as listed below primarily covers Investment Properties in Hong Kong and the Mainland that are owned and managed by the Group. Properties that are being held for sale or with a significant portion sold are not included. The environmental performance data scope also covers new properties which have reached the predetermined occupancy level or operating period. In 2024, we have further disclosed certain environmental performance data (e.g., material Scope 3 GHG emissions) covering our projects under development that are directly managed by the Group.

The Mainland	
Beijing Kerry Centre	Shenyang Kerry Centre Enterprise Square
Hangzhou Kerry Centre	Shenyang Kerry Centre Phase II
Jing An Kerry Centre Phase I	Shenzhen Kerry Plaza Phase I
Jing An Kerry Centre Phase II	Shenzhen Kerry Plaza Phase II
Kerry Everbright City Phase I	Qianhai Kerry Centre Phase I
Kerry Everbright City Phase III	Qianhai Kerry Centre Phase II
Kerry Parkside	Tianjin Kerry Centre Riverview Place
Shanghai Central Residences Phase II Towers 1 and 3	
Hong Kong	
Aigburth	Gladdon
Branksome Crest	Kerry Centre
Branksome Grande	The Bonham
Enterprise Square Five/MegaBox	Tavistock
Enterprise Square Three	

The reporting scope of social performance data covers our managed properties and projects under development in both Hong Kong and the Mainland. People-related data illustrated in this Report pertains solely to employees directly employed by the Group (excluding hotels).

Internal Audit and Independent Assurance

The process of measuring and monitoring various aspects is integral to effective management, and we place great importance on the governance of data and information. We have put in place internal verification, conducted by our Internal Audit and Sustainability teams, as well as engaging a third-party organisation for independent assurance.

The Group’s internal audit team has conducted verification over selected environmental data, covering 89% of the total GFA of Investment Properties in this Report.

Furthermore, this Report has been independently verified by Hong Kong Quality Assurance Agency (HKQAA) in accordance with the ISAE 3000. The independent assurance statement can be found on page [95-96](#) of this Report.

Share Your Thoughts

Thank you for reading Kerry Properties’ Sustainability Report 2024. Your feedback is critical for us to continuously improve our reporting and sustainability practices. As a token of our gratitude, we will donate HK\$100 to provide hot meals and support vulnerable groups for every survey received.

If there is any inconsistency or conflict between the English and the Chinese versions, the English version shall prevail.

1. Numbers may not add up due to rounding.

2. The reporting scope of environmental performance is detailed in Reporting Boundary of Sustainability Data on page [82](#).

3. The calculation methodologies and emission factors for GHG emissions:

- Methodologies are referenced from the GHG Protocol, the ISO14064-1 standard, and the Guidelines to Account for and Report on Greenhouse Gas Emissions and Removals for Buildings (Commercial, Residential or Institutional Purposes) in Hong Kong (2010 edition) published by the Environmental Protection Department (EPD) and the Electrical and Mechanical Services Department (EMSD).
- Hong Kong: The sources of energy conversion and emissions factors for the reporting of GHG emissions include the Guidelines to Account for and Report on Greenhouse Gas Emissions and Removals for Buildings (Commercial, Residential or Institutional Purposes) in Hong Kong (2010 edition), the emissions intensity for electricity sold published by CLP Power Hong Kong Limited and The Hongkong Electric Company, Limited.
- The Mainland: The sources of energy conversion and emissions factors for the reporting of GHG emissions include the emission factors from General Rules for Calculation of the Comprehensive Energy Consumption (GB/T 2589-2020), GHG Protocol Tool for Energy Consumption in China (Version 2.1), Ministry of Ecology and Environment of the People's Republic of China, cooling efficiency from local district cooling facilities, and the Standard for Calculating Carbon Emissions from Building 2019 (GB/T51366-2019).
- Global Warming Potential (GWP) values are referenced from the IPCC Sixth Assessment Report (AR6).
- The GHG calculations cover carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and hydrofluorocarbons (HFCs) while perfluorocarbons (PFCs), sulphur hexafluoride (SF₆) and nitrogen trifluoride (NF₃) are not applicable.
- No biogenic CO₂ emissions in the reporting period.
- The operational control approach was adopted to aggregate the data.

4. The increase in Scope 1 GHG emissions in the Mainland in 2024 is mainly due to the increase in natural gas consumption during several cold waves throughout winter season.

5. The decrease in Scope 1 GHG emissions in Hong Kong in 2024 is primarily attributed to the purchase of refrigerants for our Investment Properties in 2023, which reduced the need for additional refrigerant replenishment in 2024.

6. The increase in Scope 2 GHG emissions in the Mainland in 2024 is mainly due to the newly reported district heating from Investment Properties in Shenyang, the opening of Shanghai Kerry Everbright City Phase I – The Lightbox, and the newly inclusion of Shenzhen Qianhai Kerry Centre Phase II, in the reporting scope.

7. Refer to the Group's Scope 3 operational emissions from Investment Properties, including methane generation at landfill due to disposal of paper waste and GHG emissions due to electricity used for EV-charging stations, electricity used for freshwater and sewage processing, and fuel used for outsourced shuttle bus services.

8. Calculation of GHG emission/intensity cover Scope 1, Scope 2, and Scope 3 (as stated in footnote 7) emissions.

Waste ¹

Indicator	Unit	Total	Hong Kong				The Mainland

Others (clothes and cloth hangers)	Tonnes	1	1	1	1	2	0	1	1	2

1. Including waste and recyclables generated from operational activities under the reporting scope and construction activities in Hong Kong and the Mainland.
2. Including compact fluorescent lamps, fluorescent light tubes, LED tubes, toner cartridges, rechargeable batteries and chemical waste collected by qualified contractors in Hong Kong and the Mainland.
3. The increase in waste generation and disposal in Hong Kong in 2024 is due to the increase in the number of construction sites commencing construction activities, including foundation, superstructure, and renovation, during the year.

Rate (per 200,000 hours worked)	0.02	0.04	0.08	0	0.07	0.13	0.26	0	0	0	0	0
Rate (per 1,000 employees)	0.21	0.41	0.81	0	0.68	1.32	2.58	0	0	0	0	0
Recordable work-related injuries ^{8,9,10}												
Number of recordable work-related injuries reported	38	43	34	29	20	21	17	13	18	22	17	16
Rate (per 200,000 hours worked)	0.81	0.88	0.69	0.61	1.37	1.39	1.10	0.83	0.55	0.65	0.51	0.50
Rate (per 1,000 employees)	8.05	8.80	6.92	6.07	13.66	13.90	10.97	8.34	5.53	6.52	5.05	4.98

1. Calculated based on employment tenure of all employees as at 31 December 2024.

2. Return to work rate of employees that took parental leave = total number of employees that did return to work after parental leave ended / total number of employees that should return to work after parental leave ended x 100%.

3. Work-related fatality rate per 200,000 hours worked = number of fatalities as a result of work-related injury / number of hours worked x 200,000.

4. Work-related fatality rate per 1,000 employees = number of fatalities as a result of work-related injury / total number of employees as at 31 December 2024 x 1,000.

5. High-consequence work-related injuries refer to work-related injuries that resulted in an injury such that a worker cannot, does not or is not expected to recover fully to pre-injury health status within 6 months, excluding fatalities.

6. Rate of high-consequence work-related injuries per 200,000 hours worked = number of high-consequence work-related injuries / number of hours worked x 200,000.

7. Rate of high-consequence work-related injuries per 1,000 employees = number of high-consequence work-related injuries / total number of employees as at 31 December 2024 x 1,000.

8. Recordable work-related injuries refer to work-related injuries that resulted in incapacity for a period exceeding 3 days, excluding fatalities and first-aid level injuries.

9. Rate of recordable work-related injuries per 200,000 hours worked = number of recordable work-related injuries / number of hours worked x 200,000.

10. Rate of recordable work-related injuries per 1,000 employees = number of recordable work-related injuries / total number of employees as at 31 December 2024 x 1,000.

1. For Hong Kong, it is calculated based on calendar days starting from the date of the accident while for the Mainland, it is calculated based on scheduled work days starting from the date of the accident.
2. Lost day rate = lost days / days scheduled to work x 100%.
3. Absent days include days lost due to work-related injuries and other diseases. Reasons for employee's absence include but are not restricted to sick leave and work-related injury.
4. Absentee rate = absent days / days scheduled to work x 100%.
5. The number of hours worked for employees is calculated by the number of employees as at 31 December 2024 x 8 hours per day x 250 days.
6. The number of days scheduled to work per year is 250 days.

Assurance Statement

Verification Statement

Scope and Objective

Hong Kong Quality Assurance Agency (“HKQAA”) was commissioned by Kerry Properties Limited (“KPL”) to conduct an independent verification for its Sustainability Disclosures (the “selected disclosures”) stated in its Sustainability Report 2024 (“the Report”). The selected disclosures covered the period from 1st January 2024 to 31st December 2024 and represented the sustainability performance of KPL.

The objective of this verification is to provide an independent opinion with a limited level of assurance on whether the selected disclosures (including but not limited to the Selected Key Performance Indicators) are prepared in accordance with the following reporting criteria:

- ▶ the Environmental, Social and Governance Reporting Guide (“ESG Guide”) set out in Appendix C2 of the Listing Rules of The Stock Exchange of Hong Kong Limited (version effective from 31st December 2023, which remains applicable to annual reports for financial years commencing before 1st January 2025)
- ▶ the Global Reporting Initiative’s Sustainability Reporting Standards (“GRI Standards”)
- ▶ the Sustainability Accounting Standards Board (“SASB”) industry-specific standards (“SASB Standards”)

The verification team also reviews the disclosures in the Report by making reference to the following disclosure frameworks, as the Report has been prepared with references to:

- ▶ IFRS S2 Climate-related Disclosures (“IFRS S2”)

Selected Key Performance Indicators	
▶ Direct GHG emissions (Scope 1)	▶ Energy consumption intensity
▶ Energy indirect GHG emissions (Scope 2, location-based)	▶ Waste generated (Hazardous)
▶ Energy indirect GHG emissions (Scope 2, market-based)	▶ Waste generated (Non-hazardous)
▶ Material Scope 3 GHG Emissions to Kerry Properties Limited	▶ Waste disposal (Non-hazardous)
▶ Total GHG emissions (Scope 1&2, location-based)	▶ Waste recycled/reused (Non-hazardous)
▶ Total GHG emissions (Scope 1&2, market-based)	▶ Water consumption
▶ GHG intensity (Location-based)	▶ Water consumption intensity
▶ GHG intensity (Market-based)	▶ Absentee rate
▶ Direct energy consumption	▶ Number of fatalities - employee
▶ Indirect energy consumption	▶ Number of work-related injuries - employee
▶ Total energy consumption	▶ New investment properties achieve green certifications
	▶ Hang Seng Corporate Sustainability Benchmark Index

Level of Assurance and Methodology

HKQAA’s verification procedure has been conducted with reference to the International Standard on Assurance Engagements 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information (“ISAE 3000”) issued by the International Auditing and Assurance Standards Board. The evidence gathering process was designed to obtain a limited level of assurance as set out in the ISAE 3000 by using a risk-based approach.

Our verification procedure included, but not limited to:

- ▶ Sampling the sustainability information stated in the Report, e.g. claims and performance data for detail verification;
- ▶ Verifying the raw data and supporting information of the selected samples of the sustainability information;
- ▶ Interviewing responsible personnel; and
- ▶ Checking the internal control mechanism

Roles and Responsibilities

KPL is responsible for the organisation’s information system, the development and maintenance of records and reporting procedures in accordance with the system, including the calculation and determination of sustainability information and performance. HKQAA verification team is responsible for providing an independent verification opinion on the selected disclosures provided by KPL for the reporting period. The verification was based on the verification scope, objectives and criteria as agreed between KPL and HKQAA.

Independence

HKQAA did not involve in collecting and calculating data or compiling the reporting contents. Our verification activities were entirely independent and there was no relationship between HKQAA and KPL that would affect the impartiality of the verification.

Limitation and Exclusion

The following limitations and exclusions were applied to this verification due to the service scope, nature of verification criteria, and characteristics of the verification methodology.

- I. Our verification scope is limited to verifying the transcription/transformation of the raw data or information into the selected disclosures, e.g., Claims and Performance Data stated in the Report. This Sustainability Information may be subject to inherent uncertainty.
- II. Evaluating the quality of execution and implementation effectiveness of the ESG practices, the appropriateness of the assumptions made, and the estimation techniques applied are outside the scope of our verification.
- III. The verification of raw data or information is based on the use of a sampling approach and reliance on the client’s representation. As a result, errors or irregularities may occur and remain undetected.
- IV. Any information outside the established verification period has been excluded.

Conclusion

Based on the evidence obtained and the results of the verification process, it is the opinion of the verification team that, with a limited level of assurance, nothing has come to the team’s attention that the Report has not been prepared, in all material respects, in accordance with the ESG Guide set out in Appendix C2 of the Listing Rules of The Stock Exchange of Hong Kong Limited (former version, which remains applicable to annual reports for financial years commencing before 1st January 2025), GRI Standards, and SASB Standards. In addition, the verification team reviewed the Report with reference to the IFRS S2 Climate-related Disclosures and considered that the Report has been prepared by making reference to the contents or parts of the contents of the aforementioned disclosure frameworks.

Signed on behalf of Hong Kong Quality Assurance Agency

Connie Sham
Head of Audit
April 2025

SEHK ESG Reporting Guide

Mandatory Disclosure Requirements	Description	References and Remarks	Page no.
MD13 Governance Structure	A statement from the board containing the following elements:	► Board Statement	3
		► Our Sustainability Journey	7-17
	(i) a disclosure of the board's oversight of ESG issues;	► Climate-related Financial Disclosure	72-76
	(ii) the board's ESG management approach and strategy, including the process used to evaluate, prioritise, and manage material ESG-related issues (including risks to the issuer's businesses); and		
	(iii) how the board reviews progress made against ESG-related goals and targets with an explanation of how they relate to the issuer's businesses.		

Mandatory Disclosure Requirements	Description	References and Remarks	Page no.
MD14 Reporting Principles	A description of, or an explanation on, the application of the following Reporting Principles in the preparation of the ESG report:	► About This Report	81-82
		► Our Sustainability Journey	7-17
	Materiality: The ESG report should disclose:	► Performance Data Summary – Environmental Performance	85-87
	(i) the process to identify and the criteria for the selection of material ESG factors;		
	(ii) if a stakeholder engagement is conducted, a description of significant stakeholders identified, and the process and results of the issuer's stakeholder engagement.		
	Quantitative: Information on the standards, methodologies, assumptions and/or calculation tools used, and source of conversion factors used, for the reporting of emissions/energy consumption (where applicable) should be disclosed.		
	Consistency: The issuer should disclose in the ESG report any changes to the methods or KPIs used, or any other relevant factors affecting a meaningful comparison.		
MD15 Reporting Boundary	A narrative explaining the reporting boundaries of the ESG report and describing the process used to identify which entities or operations are included in the ESG report. If there is a change in the scope, the issuer should explain the difference and reason for the change.	► About This Report	81-82

Aspects, General Disclosures, KPIs	Description	References and Remarks	Page no.
Aspect A1: Emissions			
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.	► Our Sustainability Journey – Sustainability Governance and Leadership	11-12
		► Climate-related Financial Disclosure	72-76
		► Protecting Our Environment – ▷ Sustainable Buildings	21-23
		▷ Climate Change and Resilience	24-25
		Relevant sustainability policies are available on our Sustainability Website , including: - Climate Change Policy - Group Environmental Protection Policy - Sustainability Policy - Sustainable Procurement Policy - Environmental Policy - Green Procurement Policy In 2024, the Group was not aware of any violation of relevant laws and regulations.	
KPI A1.1	The types of emissions and respective emissions data.	► Performance Data Summary – Environmental Performance Air emissions (e.g., NO _x , SO _x , and other pollutants) are not included in this report as they are not material to our operations.	85-87
KPI A1.2	Direct (Scope 1) and energy indirect (Scope 2) greenhouse gas emissions (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	► Performance Data Summary – Environmental Performance	85-87

Aspects, General Disclosures, KPIs	Description	References and Remarks	Page no.
KPI A1.3	Total hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	► Performance Data Summary – Environmental Performance	85-87
KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	► Performance Data Summary – Environmental Performance	85-87
KPI A1.5	Description of emissions target(s) set, and steps taken to achieve them.	► Our Sustainability Journey – Sustainability Vision 2030 Targets	10
		► Climate-related Financial Disclosure – Metrics and Targets	76
		► Protecting Our Environment – ▷ Climate Change and Resilience ▷ GHG Emissions and Energy Efficiency	24-25 28-30
KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, and a description of reduction target(s) set and steps taken to achieve them.	► Our Sustainability Journey – Sustainability Vision 2030 Targets	10
		► Protecting Our Environment – Resource Circularity and Waste Management	31-33

Aspects, General Disclosures, KPIs	Description	References and Remarks	Page no.
Aspect A2: Use of Resources			
General Disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	<div><div>► Our Sustainability Journey – Sustainability Governance and Leadership</div><div>► Protecting Our Environment –<div>▷ Sustainable Buildings21-23</div><div>▷ Climate Change and Resilience24-25</div><div>▷ GHG Emissions and Energy Efficiency28-30</div><div>▷ Resource Circularity and Waste Management31-33</div><div>▷ Water Consumption and Conservation34</div></div></div>	11-12
		Relevant sustainability policies are available on our Sustainability Website , including <ul style="list-style-type: none">- Climate Change Policy- Group Environmental Protection Policy- Sustainability Policy- Sustainable Procurement Policy- Environmental Policy- Green Procurement Policy- Water Stewardship Policy	
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in '000s) and intensity (e.g. per unit of production volume, per facility).	► Performance Data Summary – Environmental Performance	85-87
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	► Performance Data Summary – Environmental Performance	85-87

Aspects, General Disclosures, KPIs	Description	References and Remarks	Page no.
KPI A2.3	Description of energy use efficiency target(s) set, and steps taken to achieve them.	<div><div>► Our Sustainability Journey – Sustainability Vision 2030 Targets</div><div>► Protecting Our Environment –<div><div>▷ Sustainable Buildings</div><div>▷ Climate Change and Resilience</div><div>▷ GHG Emissions and Energy Efficiency</div></div></div></div>	<div>10</div> <div>21-23</div> <div>24-25</div> <div>28-30</div>
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set, and steps taken to achieve them.	<div><div>► Protecting Our Environment – Water Consumption and Conservation</div><div>► Sustainability Accounting Standard Board (SASB) Real Estate Sector Disclosure</div></div>	<div>34</div> <div>77-80</div>
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	In 2024, there was no massive use of packaging material involved in our products.	-
Aspect A3: The Environment and Natural Resources			
General Disclosure	Policies on minimising the issuer’s significant impacts on the environment and natural resources.	<div><div>► Our Sustainability Journey – Sustainability Governance and Leadership</div><div>► Protecting Our Environment –<div><div>▷ Biodiversity</div><div>▷ Resource Circularity and Waste Management</div></div></div></div> <div>Relevant sustainability policies are available on our Sustainability Website, including:<div><div>- Group Environmental Protection Policy</div><div>- Sustainability Policy</div><div>- Sustainable Procurement Policy</div><div>- Environmental Policy</div><div>- Green Procurement Policy</div><div>- Water Stewardship Policy</div></div></div>	<div>11-12</div> <div>26-27</div> <div>31-33</div>

Aspects, General Disclosures, KPIs	Description	References and Remarks	Page no.
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	<div><div>► Protecting Our Environment – Resource Circularity and Waste Management</div><div>► Climate-related Financial Disclosure</div></div>	<div>31-33</div> <div>72-76</div>
Aspect A4: Climate Change			
General Disclosure	Policies on identification and mitigation of significant climate-related issues which have impacted, and those which may impact, the issuer.	<div><div>► Our Sustainability Journey – Sustainability Governance and Leadership</div><div>► Protecting Our Environment –<div><div>▷ Climate Change and Resilience</div><div>▷ GHG Emissions and Energy Efficiency</div></div></div></div> <div>Relevant sustainability policy is available on our Sustainability Website, including:<div><div>- Climate Change Policy</div></div></div>	<div>11-12</div> <div>24-25</div> <div>28-30</div>
