
REGULATORY OVERVIEW

The major PRC laws, regulations, normative documents and regulatory policies which have impact on our business operations are set out below:

INDUSTRIAL POLICIES AND REGULATORY PROVISIONS

According to the Outline of the 14th Five-Year Plan (2021-2025) for National Economic and Social Development and the Long-Range Objectives Through the Year 2035 of the PRC (《中華人民共和國國民經濟和社會發展第十四個五年規劃和2035年遠景目標綱要》) promulgated by the NPC on March 12, 2021 and came into effect on the same day, China will focus on new energy, new energy vehicles, environmental protection and other emerging industries of strategic importance, and accelerate the innovation and application of core technologies in key fields to enhance the country’s capacity of ensuring the supply of productive factors and foster new drivers for industrial development thereafter.

According to Working Guidance for Carbon Dioxide Peaking and Carbon Neutrality in Full and Faithful Implementation of the New Development Philosophy (《關於完整準確全面貫徹新發展理念做好碳達峰碳中和工作的意見》), which was promulgated by the Central Committee of the Communist Party of China and the State Council on September 22, 2021 and came into effect on the same day, China will accelerate the development of strategic emerging industries in areas such as new energy, new materials, new energy vehicles, and environmental protection. It will carry out initiatives to substitute renewable energy for fossil fuels, vigorously develop wind, solar, biomass, marine and geothermal energy among others, and continuously increase the proportion of non-fossil in total energy consumption. Faster moves must be made to scale up the use of pumped storage hydro power and other new forms of energy storage, accelerate the development of new energy and clean energy vehicles and ships, promote intelligent transportation and accelerate the construction of a convenient, efficient network of battery charging and swapping facilities.

According to the Action Plan for Carbon Dioxide Peaking Before 2030 (《2030年前碳達峰行動方案》) promulgated by the State Council on October 24, 2021 and came into effect on the same day, it is proposed to actively develop the “new energy + energy storage” model, promote coordination of power source-grid-load-storage, use multiple energy sources to supplement each other, and support the deployment of appropriate ESS for distributed new energy sources. It also proposed to speed up the demonstration and application of new types of energy storage.

According to the Implementation Plan on Accelerating the Comprehensive Utilization of Industrial Resources (《關於加快推動工業資源綜合利用的實施方案》) promulgated by eight departments including the Ministry of Finance, the NDRC, the MIIT on January 27, 2022, which took effect on the same day, the management system will be improved so as to strengthen the traceability management of full life cycle of EV batteries for new energy vehicles, while promoting cooperation between upstream and downstream enterprises in the industrial chain to jointly build recycling channels, creating a cross-regional recycling and utilization system, and advancing the safe cascade utilization of waste EV batteries in fields such as backup power and charging and swapping.

According to the 14th Five-Year Plan for Modern Energy System (《“十四五”現代能源體系規劃》) jointly promulgated by the NDRC and the NEA on January 29, 2022 and came into effect on the same day, China will establish and improve the construction standards for

REGULATORY OVERVIEW

electrochemical energy storage and hydrogen energy and accelerate the large-scale application of new energy storage technologies. It will vigorously promote the development of energy storage on the power supply side, ensure reasonable configuration of storage capacity, improve the output characteristics of new energy stations, support the distributed ESS for rational allocation of new energy sources, and optimize the layout of grid-side energy storage, in an effort to leverage its multiple roles in integrating new energy, peak shaving and valley filling, enhancing grid stability and emergency power supply. It will also support the diversified development of user side energy storage, improve power supply reliability for users and encourage the participation of user side energy storage such as electric vehicles and uninterruptible power supplies in peak shaving and frequency regulation. It will conduct focused research and development on key technologies for new energy storage to accelerate the core technology autonomy and promote continuous cost reductions and large-scale applications of energy storage technologies, thereby perfecting technical standards and management systems for energy storage and enhancing the level of safe operation.

According to the 14th Five-Year New Energy Storage Development Plan (《“十四五”新型储能發展實施方案》) jointly promulgated by the NDRC and the NEA on January 29, 2022 and came into effect on the same day, by 2030, new energy storage will be developed on a fully market-oriented basis and will be deeply integrated with various segments of the power system, basically meeting the requirements for building a new type of power system and fully supporting the achievement of carbon peak goals in the energy sector as planned.

According to the 14th Five-Year Renewable Energy Development Plan (《“十四五”可再生能源發展規劃》) jointly promulgated by nine departments including the NDRC, the NEA on June 1, 2022 and became effective on the same day, China will redouble efforts to make breakthroughs in frontier and core technologies for renewable energy and equipment, develop high-energy-density energy storage technologies such as sodium-ion batteries, liquid metal batteries, solid Lithium-Ion batteries, metal-air batteries and lithium-sulfur batteries, establish the independent market status of new energy storage and improve the trading mechanisms and technical standards for energy storage to participate in various power markets, thereby leveraging the multiple functions of energy storage in peak shaving and frequency regulation, emergency backup and capacity support, among others, as well as promoting the multi-scene application of energy storage on the power supply side, power grid side and user side.

According to the Guiding Opinions on Promoting the Development of the Energy Electronics Industry (《關於推動能源電子產業發展的指導意見》), which was promulgated by six departments including the MIIT and the NEA on January 3, 2023 and came into effect on the same day, China will strengthen technical research on the industrialization of new ESS batteries, promote advanced energy storage technologies and products large-scale application, research and make breakthroughs in key technologies such as battery systems with ultra-long life cycle and high safety, efficient energy storage with large scale and capacity, and vehicle mobile energy storage, accelerate the research and development of solid-state batteries, sodium-ion batteries, hydrogen energy storage/fuel cells and other new types of batteries. It will also improve the ability to guarantee key resources such as lithium, nickel, cobalt and platinum, strengthen the development and application of alternative materials, promote hybrid ESS based on complementary power and energy-based electrochemical energy storage

REGULATORY OVERVIEW

technologies, support the establishment of a full-life cycle traceability management platform for lithium batteries, conduct research on the accounting standards and methods for carbon footprint of batteries, and explore the establishment of a carbon emission management system for battery products.

According to the Implementation Opinions on Strengthening the Integration and Interaction between New Energy Vehicles and the Power Grid (《關於加強新能源汽車與電網融合互動的實施意見》), which was promulgated by 4 departments including the NDRC, the NEA and the MITT on December 13, 2023 and came into effect on the same day, it will step up efforts in tackling key technical problems of power batteries. On the basis of no significant increase in cost, it will increase the life cycle of power batteries to 3,000 times or more, and develop battery safety control technologies under the condition of high-frequency charging and discharging.

According to the Guiding Catalog for Industrial Restructuring (2024 Edition) (《產業結構調整指導目錄(2024年本)》), which was last amended by the NDRC on December 27, 2023 and came into effect on February 1, 2024, new lithium primary batteries (lithium iron disulfide and lithium thionyl chloride, among others); Lithium-Ion batteries, semi and solid-state lithium-ion batteries, fuel cells, sodium-ion batteries, flow batteries, new-structure (bipolar, lead mesh horizontal, coiled, tubular, and other) sealed lead-acid batteries, lead-carbon batteries, next-generation hydrogen fuel cells, electrochemical energy storage and other new batteries and new-type power system technologies fall into the state-encouraged industries.

According to the Implementation Plan for the Building of the Carbon Footprint Management System (《關於建立碳足跡管理體系的實施方案》), which was promulgated by 15 departments including the Ministry of Ecology and Environment of PRC, the NDRC and the MITT on May 22, 2024 and came into effect on the same day, it will focus on key products such as power generation, lithium-ion batteries, new energy vehicles, photovoltaics, and electronics and electrical appliances to formulate and publish accounting rules and standards. It will strive to promote the formulation of international carbon footprint standards for product in the fields of lithium-ion batteries, photovoltaics, new energy vehicles, and electronic and electrical appliances.

According to the Opinions on Accelerating Comprehensive Transition Towards Green Economic and Social Development (《中共中央國務院關於加快經濟社會發展全面綠色轉型的意見》) jointly promulgated by the Central Committee of the Communist Party of China and the State Council on July 31, 2024 and came into effect on the same day, China will boost the development of non-fossil energy and the proportion of non-fossil energy in energy consumption will rise to about 25% by 2030. The use of low-carbon transportation vehicles is encouraged. Great efforts will be made to promote new energy vehicles, driving the electrification of urban public service vehicles. It will promote the use of clean power in ships, aircraft, and non-road mobile machinery, accelerate the phase-out of outdated transportation vehicles, advance zero-emission freight transport, strengthen the research, development and

REGULATORY OVERVIEW

application of sustainable aviation fuels and encourage the research, production and application of net-zero emission marine fuels. By 2030, carbon emission intensity of commercial vehicles measured on the basis of converted turnover will be cut by about 9.5% compared with 2020. By 2035, new energy vehicles will become the mainstream in the sales of new vehicles.

LAWS AND REGULATIONS ON PRODUCTION SAFETY, ENVIRONMENTAL PROTECTION AND ENERGY CONSERVATION REVIEW

Production Safety

According to the Production Safety Law of the PRC (《中華人民共和國安全生產法》) or the Production Safety Law, which was last amended by the Standing Committee of the National People’s Congress (“SCNPC”) on June 10, 2021 and came into effect on September 1, 2021, entities engaged in production and business activities within the PRC shall comply with the Production Safety Law and other laws and regulations related to production safety, strengthen production safety management. Entities shall establish and improve a production safety responsibility system and production safety rules, improve production safety conditions, and strengthen the standardization of production safety, raise production safety levels, and ensure production safety. The person in charge of a production and operation entity shall be fully responsible for the production safety of the entity. Violation of the Production Safety Law may result in imposition of fines and penalties, suspension of operation, an order to cease operation, depending on the circumstances of the violation, and criminal liability will be pursued if the violation constitutes a crime. In addition, according to the Mine Safety Law of the PRC, which was amended by the SCNPC on August 27, 2009 and came into effect on the same day, mining enterprises must have facilities to ensure production safety, establish and improve safety management systems, and take effective measures to improve working conditions of employees, strengthen mine safety management, and ensure safe production. Among them, the safety facilities of mine construction projects must be designed, constructed, put into production and use simultaneously with the main project; the conditions for safe production must be met in mining operations, and mine safety regulations and industry specifications for mining different types of minerals must be in place; mining enterprises must establish and improve the responsibility system for safety production.

Environmental Protection

According to the Environmental Protection Law of the PRC (《中華人民共和國環境保護法》) or the Environmental Protection Law, which was last amended by the SCNPC on April 24, 2014 and came into effect on January 1, 2015, any entity that discharges or will discharge pollutants in the course of operation or other activities must implement effective environmental protection measures to control and properly handle hazardous substances such as waste gas, waste water, waste residues, dust, malodorous gases, radioactive substances, noise, vibration and electromagnetic radiation generated in the course of such activities. The State implements a pollutant discharge permit management system in accordance with the law.

REGULATORY OVERVIEW

According to the Environmental Impact Assessment Law of the PRC (《中華人民共和國環境影響評價法》), which was promulgated by the SCNPC on December 29, 2018 and came into effect on the same day, the Regulation on the Administration of Environmental Protection of Construction Projects (《建設項目環境保護管理條例》), which was amended by the State Council on July 16, 2017 and came into effect on October 1, 2017, and the Interim Measures for Environmental Protection Acceptance Inspection Upon Completion of Construction Projects (《建設項目竣工環境保護驗收暫行辦法》), which was promulgated by the former Ministry of Environmental Protection on November 20, 2017 and came into effect on the same day, the PRC implements a system to assess the environmental impact of construction projects. The construction entity shall submit an environmental impact report or an environmental impact statement for approval prior to the commencement of the construction project, or an environmental impact registration form as required by the environmental protection competent administrative department of the State Council for record. In addition, after the completion of a construction project for which an environmental impact report or an environmental impact statement has been prepared, the construction entity shall, in accordance with the standards and procedures prescribed by the competent administrative department of environmental protection under the State Council, conduct acceptance inspection on the supporting environmental protection facilities and prepare an acceptance report. For construction projects that are constructed in phases or put into production or used in phases, the corresponding environmental protection facilities shall be inspected and accepted in phases. The construction projects can only be put into production or use after the completed supporting environmental protection facilities have passed the acceptance inspection. Facilities that have not been carried out or have not passed the acceptance inspection shall not be put into production or use.

According to the Law of the PRC on Prevention and Control of Environmental Pollution Caused by Solid Wastes (《中華人民共和國固體廢物污染環境防治法》) (the “Law of Solid Wastes”), which was last amended on April 29, 2020 by the SCNPC and came into effect on September 1, 2020, any entity or individual that generates, collects, stores, transports, utilizes or disposes of solid waste shall take measures to prevent or reduce the pollution of solid waste to the environment, and shall be responsible for the environmental pollution caused in accordance with the law. Where hazardous waste exists in solid waste, it shall be managed in accordance with hazardous waste management. In addition, the Law of Solid Wastes also, for the first time, incorporated into the law the establishment of an extended producer responsibility system for products such as vehicle EV batteries, and clearly stipulated that producers of EV battery products for vehicles should establish a recycling system for used products that matches the sales volume of their products in accordance with the regulations, either by building it themselves or engaging a contractor, making important arrangements for the establishment of a recycling and disposal system for waste vehicle EV batteries from the top-level design.

According to the Law of the PRC on the Prevention and Control of Water Pollution (《中華人民共和國水污染防治法》), which was last amended on June 27, 2017 by the SCNPC and came into effective on January 1, 2018, the enterprises, institutions and other production and operation units directly or indirectly discharging industrial waste water and medical sewage to water bodies, and the enterprises, institutions and other production and operation units required to obtain pollutant discharging permit before discharging waste water and sewage must obtain

REGULATORY OVERVIEW

the pollutant discharging permit. Furthermore, environmental impact assessment must be carried out in accordance with the law for newly-formed projects and reconstruction, or extensions projects that directly or indirectly discharge pollutants to water bodies and other installations on water. Water pollution prevention and control facilities should be designed, constructed and put into use at the same time as the main construction of the projects.

According to the Law of the PRC on the Prevention and Control of Atmospheric Pollution (《中華人民共和國大氣污染防治法》), which was last amended by the SCNPC on October 26, 2018 and took effect on the same day, enterprises, institutions and other production and operation units shall, in accordance with the relevant national regulations and monitoring standards, monitor their emissions of industrial waste gases or toxic and hazardous air pollutants listed in the catalogue published according to Article 78 of the Law of the PRC on the Prevention and Control of Atmospheric Pollution (《中華人民共和國大氣污染防治法》), and keep the original monitoring records. Enterprises and institutions that emit industrial waste gas or toxic and hazardous air pollutants listed in the above-mentioned catalogue, as well as other units that implement administration of pollution discharge permits in accordance with the law, shall obtain a pollutant discharging permit. In addition, enterprises, institutions and other production and operation units constructing projects that have an impact on the atmospheric environment shall carry out environmental impact assessment and make environmental impact assessment documents public in accordance with the law; the units that emit pollutants into the atmosphere must comply with the discharging standard for atmospheric pollutants as well as the requirements on control of the total discharging amount of key atmospheric pollutants.

According to the Regulations on the Administration of Pollution Discharge Permits (《排污許可管理條例》) promulgated by the State Council on January 24, 2021 and took effect on March 1, 2021, enterprises, institutions and other production and operation units subject to administration of pollution discharge permits shall discharge pollutants in accordance with the Administration of Pollution Discharge Permits (《排污許可管理條例》), and shall not discharge pollutants without obtaining a pollutant discharging permit. Environmental protection authorities impose various administrative penalties, such as fines, order to correct, restriction or suspension of production for rectification, and order to cease operation, etc., on individuals or enterprises that violate the Environmental Protection Law.

Fire Safety

According to the Fire Protection Law of the PRC (《中華人民共和國消防法》), which was last amended by the SCNPC on April 29, 2021 and took effect on the same day, the emergency management department under the State Council and the emergency management department under the local people's governments at or above the county level shall supervise and manage fire protection work. Fire prevention design and construction must comply with national technical standards for fire protection in construction projects.

REGULATORY OVERVIEW

According to the Interim Provisions on the Administration of Fire Protection Design Review and Acceptance of Construction Projects (《建設工程消防設計審查驗收管理暫行規定》) which was last amended by the Ministry of Housing and Urban-Rural Development of PRC on August 21, 2023 and officially came into effect on October 30, 2023, fire prevention design review and acceptance should be carried out for special construction projects. With respect to the construction projects other than special construction projects, the fire protection acceptance of construction projects shall be filed with the competent authorities.

Energy Conservation Review

According to the Energy Conservation Law of the PRC (《中華人民共和國節約能源法》), which was last amended by the SCNPC on October 26, 2018 and came into effect on the same day, the State shall implement an energy conservation assessment and audit system for fixed asset investment projects. For projects which do not meet the compulsory energy conservation standards, the developer shall not commence construction; where the construction is completed, the project shall not be put into production or use. For government investment projects which do not meet the compulsory energy conservation standards, the agency in charge of examination and approval pursuant to the law shall not grant approval for construction. Detailed measures shall be formulated by the department regulating energy conservation under the State Council jointly with other relevant State Council departments.

According to the Measures for the Energy Conservation Review of Fixed Asset Investment Projects (《固定資產投資項目節能審查辦法》) revised by the NDRC on March 28, 2023 and came into effect on June 1, 2023, the review opinions on energy conservation of a fixed asset investment project are an important basis for the commencement of construction, acceptance upon completion as well as operation and management of such project. For a government-invested project, the project owner shall obtain the review opinions on energy conservation issued by the energy conservation review authority prior to submitting its feasibility study report for the project. For an enterprise-invested project, the project owner shall obtain the review opinions on energy conservation issued by the energy conservation review authority prior to the commencement of construction. For a project which has not undergone the energy conservation review or fails to pass the energy conservation review, the project owner shall not commence construction, or the project shall not be put into production or use if it is already completed.

LAWS AND REGULATIONS ON PRODUCT QUALITY

Pursuant to the Product Quality Law of the PRC (《中華人民共和國產品質量法》), which was last amended by the SCNPC on December 29, 2018 and came into effect on the same day, the market supervision and administration department under the State Council is in charge of the national supervision of product quality, a manufacturer is prohibited from producing or selling products that do not meet applicable standards and requirements for safeguarding human health and ensuring human and property safety. Products must be free from unreasonable dangers threatening human and property safety. Where a defective product causes physical injury to a person or property damage, the aggrieved party may make a claim

REGULATORY OVERVIEW

for compensation from the producer or the seller of the product. Producers and sellers of non-compliant products may be ordered to cease the production or sale of the products and could be subject to confiscation of the products and/or fines; earnings from sales in contravention of such standards or requirements, if any, may also be confiscated, and in severe cases, an offender’s business license may be revoked.

LAWS AND REGULATIONS ON IMPORT AND EXPORT OF GOODS

According to the Customs Law of the PRC (《中華人民共和國海關法》) last amended by the SCNPC on April 29, 2021 and came into effect on the same day, the Customs is a governmental organization responsible for supervision and control over all arrivals in and departures from the Customs territory, who is authorized to supervise the transportation vehicles, goods, luggage, postal articles and other articles entering and leaving the country, collects customs duties and other taxes and fees, prevents and combats smuggling, compiles customs statistics and handles other customs operations. Customs declaration entities refer to the consignees and consignors of imported or exported goods and customs declaration enterprises recorded with the Customs. The consignee or the consignor of imported or exported goods may complete the declaration formalities either by themselves or engaging an agent.

According to the Law of the PRC on Import and Export Commodity Inspection (《中華人民共和國進出口商品檢驗法》) last amended by the SCNPC on April 29, 2021 and came into effect on the same day, and the Regulations for the Implementation of the Law of the PRC on Import and Export Commodity Inspection (《中華人民共和國進出口商品檢驗法實施條例》) last amended by the State Council on March 29, 2022 and came into effect on the same day, the General Administration of Customs of PRC (“the General Administration of Customs”) is responsible for inspection of imported and exported commodities nationwide, and its subordinate entry-exit inspection and quarantine authorities shall conduct inspection on the imported and exported commodities listed in the catalogue and other imported and exported commodities that shall be subject to the inspection by the entry-exit inspection and quarantine authorities as prescribed by laws and administrative regulations. For the imported and exported commodities other than those that are subject to inspection as mentioned above, the entry-exit inspection and quarantine authorities may conduct random inspection in accordance with state regulations. No import commodity subject to statutory inspection that has not been inspected could be sold or used. No export commodity subject to statutory inspection that has not been inspected or fails to pass the inspection could be exported. Consignees or consignors of the import and export commodities may complete the inspection procedures themselves, or engage an agent to do this.

According to the Provisions on the Administration of Recordation of Customs Declaration Entities of the PRC (《中華人民共和國海關報關單位備案管理規定》) promulgated by the General Administration of Customs on November 19, 2021 and came into effect on January 1, 2022, customs declaration entities refer to consignees or consignors of imports and exports and customs declaration enterprises which have filed record with the Customs pursuant to these Provisions. Consignees or consignors of imports and exports and customs declaration enterprises applying for filing shall obtain market entity qualification and in the case of consignees or consignors of imports and exports applying for filing, they shall also complete filing formalities for foreign trade business operators.

REGULATORY OVERVIEW

According to the Notice on Matters Concerning the Recordation of the Consignees and Consignors of Imported and Exported Goods (《關於進出口貨物收發貨人備案有關事宜的通知》) issued by the Department of Enterprise Management and Audit-Based Control of the General Administration of Customs on January 3, 2023 and came into effect on the same day, a consignee or consignor of imported or exported goods who applies for filing shall be qualified as a market entity and is not required to be filed as a foreign trade business operator.

LAWS AND REGULATIONS ON LABOR, SOCIAL INSURANCE AND HOUSING PROVIDENT FUND

Labor Law and Labor Contracts Law

According to the Labor Law of the PRC (《中華人民共和國勞動法》) last amended by the SCNPC on December 29, 2018 and came into effect on the same day, the Labor Contract Law of the PRC (《中華人民共和國勞動合同法》) last amended by the SCNPC on December 28, 2012 and came into effect on July 1, 2013, and the Implementing Regulations of the Labor Contracts Law of the PRC (《中華人民共和國勞動合同法實施條例》) promulgated by the State Council on September 18, 2008 and came into effect on the same day, labor contracts must be executed in writing if labor relationships are to be established between employers and employees. Employers are prohibited from forcing employees to work above certain time limits and employers must pay employees for overtime work in accordance with national regulations. In addition, employee wages must not be lower than local standards on minimum wages and must be paid to employees in a timely manner.

Social Insurance and Housing Provident Fund

According to the Social Insurance Law of the PRC (《中華人民共和國社會保險法》) last amended by the SCNPC and came into effect on December 29, 2018, the Regulation on the Administration of Housing Provident Fund (《住房公積金管理條例》) last amended by the State Council and came into effect on March 24, 2019 and other relevant laws and regulations, employers in China are required to provide employees with welfare schemes covering basic pension insurance, basic medical insurance, unemployment insurance, maternity insurance, work-related injury insurance and housing provident fund.

In addition, any employer that fails to make contributions to above-mentioned social insurance and housing provident fund as required may be ordered to pay the required contributions within a prescribed time limit. If the employer still fails to make the relevant contributions within the prescribed time, a fine may be imposed, and for the overdue contribution, the people's court may enforce collection.

REGULATORY OVERVIEW

LAWS AND REGULATIONS ON INTELLECTUAL PROPERTY

Patent

According to the Patent Law of the PRC (《中華人民共和國專利法》) last amended by the SCNPC on October 17, 2020 and came into effect on June 1, 2021, and the Implementation Regulations for the Patent Law of the PRC (《中華人民共和國專利法實施細則》) last amended by the State Council on December 11, 2023 and came into effect on January 20, 2024, patents are divided into 3 categories, i.e. invention patents, utility model patents and design patents. The validity period of patents for inventions is 20 years, while the validity period of patents for utility models is 10 years, and the validity period of patents for designs is 15 years, all starting from the date of application.

Trademark

According to the Trademark Law of the PRC (《中華人民共和國商標法》) last amended by the SCNPC on April 23, 2019 and came into effect on November 1, 2019, and the Implementation Rules of the Trademark Law of the PRC (《中華人民共和國商標法實施條例》) last amended by the State Council on April 29, 2014 and came into effect on May 1, 2014, the trademarks registered with the Trademark Office of China National Intellectual Property Administration are registered trademarks, including commodity trademarks, service trademarks, collective marks and certificate marks. The registration of a trademark shall be valid for ten years from the date of approval. If there is a continued need for the use of the trademark, a renewal shall be made in accordance with requirements within 12 months before the expiry of the trademark registration. Each renewal of registration of a trademark shall be valid for ten years from the date after the expiry of the previous trademark registration.

Copyright

According to the Copyright Law of the PRC (《中華人民共和國著作權法》) last amended by the SCNPC on November 11, 2020 and came into effect on June 1, 2021, works of Chinese citizens, legal persons or unincorporated organizations, i.e. intellectual achievements in the field of literature, art and science that are original and can be expressed in a certain form, whether published or not, are entitled to copyright in accordance with the law. Copyright includes a series of personal and property rights such as the right of publication, the right of authorship, the right of modification, the right to protect the integrity of the work and the right of reproduction.

According to the Measures for the Computer Software Copyright Registration (《計算機軟件著作權登記辦法》) promulgated by the National Copyright Administration on February 20, 2002, and the Regulations on the Computer Software Protection (《計算機軟件保護條例》) amended by the State Council on January 30, 2013 and came into effect on March 1, 2013, the National Copyright Administration shall be the competent governmental authority for the nationwide administration of software copyright registration and the China Copyright Protection Center is designated as the software registration authority which shall grant registration certificates to the computer software copyrights applicants according to the Measures for the Computer Software Copyright Registration and the Regulations on the Computer Software Protection.

REGULATORY OVERVIEW

Domain Names

According to the Administrative Measures on the Internet Domain Names (《互聯網域名管理辦法》) issued by the MIIT on August 24, 2017 and came into effect on November 1, 2017, domain names registrations are handled through domain name service agencies established according to the relevant regulations, and the applicants become domain name holders upon successful registration.

LAWS AND REGULATIONS ON TAXES

EIT

The EIT Law and its implementation rules are the principal laws and regulations governing the EIT in the mainland China. According to the EIT Law and its implementation rules, enterprises are divided into resident enterprises and non-resident enterprises. A resident enterprise refers to an enterprise that is established in the mainland China in accordance with the law, or that is established in accordance with the law of a foreign country (region) but whose actual administration institution is in the mainland China. A non-resident enterprise refers to an enterprise established in accordance with the law of a foreign country (region) and whose actual administration institution is outside the mainland China, but it has institutions or establishments in the mainland China or, if not, it has incomes originating from the mainland China. A uniform income tax rate of 25% applies to all resident enterprises and non-resident enterprises that have set up institutions or establishments in the mainland China to the extent that such incomes are derived from the mainland China, or such incomes are obtained outside the mainland China but have an actual connection with the set-up institutions or establishments, high-tech enterprises in need of support from the State shall be subject to a reduced enterprise income tax rate of 15%. Non-resident enterprises that have not set up institutions or establishments in the mainland China or have set up institutions or establishments but the income obtained by the said enterprises have no actual connection with the set-up institutions or establishments, shall pay enterprise income tax at the rate of 10% in relation to their income sourcing from the mainland China.

VAT

Pursuant to the Interim Regulations of the PRC on Value-added Tax (《中華人民共和國增值稅暫行條例》), which was last amended by the State Council on November 19, 2017 and came into effect on the same day, and the Detailed Rules for the Implementation of the Interim Regulations of the PRC on Value-added Tax (《中華人民共和國增值稅暫行條例實施細則》), which was last amended by the MOF on October 28, 2011 and came into effect on November 1, 2011, all entities and individuals engaged in sale of goods or provision of processing, repair and maintenance services or importation of goods in mainland China are subject to VAT. Unless otherwise specified in the above-mentioned regulations, the VAT rate is generally 17% in respect of the sale or importation of goods by taxpayers.

REGULATORY OVERVIEW

Pursuant to the Notice on the Adjustment to VAT Rates (《關於調整增值稅稅率的通知》) (Cai Shui [2018] No. 32), promulgated by the MOF and the SAT on April 4, 2018, and became effective as of May 1, 2018, the VAT rates of 17% and 11% applicable to the taxpayers who have VAT taxable sales activities or imported goods are adjusted to 16% and 10%, respectively.

Pursuant to the Announcement on Relevant Policies for Deepening VAT Reform (《關於深化增值稅改革有關政策的公告》) (2019 No. 39 of MOF, SAT and General Administration of Customs), promulgated by the MOF, the SAT and the General Administration of Customs on March 20, 2019 and became effective on April 1, 2019, the VAT rates of 16% and 10% applicable to the taxpayers who have VAT taxable sales activities or imported goods are adjusted to 13% and 9%, respectively.

LAWS AND REGULATIONS ON FOREIGN INVESTMENT, OVERSEAS INVESTMENT AND FOREIGN EXCHANGE SUPERVISION

Company Law

The Company Law, last amended by the SCNPC on December 29, 2023 and came into effect on July 1, 2024, provides that companies established in China may take the form of limited liability company or joint stock company with limited liability. Each company has the status of a legal person and owns the assets itself. The Company Law also applies to foreign-invested companies.

Foreign Investment

According to the Foreign Investment Law of the PRC (《中華人民共和國外商投資法》) promulgated by the NPC on March 15, 2019 and the Implementing Rules of the Foreign Investment Law of the PRC (《中華人民共和國外商投資法實施條例》) promulgated by the State Council on December 26, 2019, all of which came into effect on January 1, 2020, the State shall implement the management systems of pre-establishment national treatment and negative list for foreign investment. Foreign investors shall not invest in any field forbidden by the negative list for access of foreign investment; for any field restricted by the negative list, foreign investors shall conform to the investment conditions as required; fields not included in the negative list shall be managed under the principle that domestic investment and foreign investment shall be treated uniformly. Meanwhile, the competent government departments shall, according to the requirements of national economy and social development, formulate a catalogue of industries encouraging foreign investment, stipulating the specific industries, fields and areas in which foreign investors are encouraged and guided to invest.

The current industry entry clearance requirements governing investment activities in the PRC conducted by foreign investors are set out in two catalogues, namely the Special Management Measures for the Entry of Foreign Investment (Negative List) (2024 version) (《外商投資准入特別管理措施(負面清單)(2024年版)》), which was jointly promulgated by the NDRC and the MOFCOM on September 6, 2024 and came into effect on November 1, 2024, and the Encouraged Industry Catalogue for Foreign Investment (2022 version) (《鼓勵

REGULATORY OVERVIEW

外商投資產業目錄(2022年版)》), which was jointly promulgated by the NDRC and the MOFCOM on October 26, 2022 and came into effect on January 1, 2023. These two catalogues further classified businesses into three categories with regard to foreign investment: “encouraged,” “restricted” and “prohibited.” Industries not listed in these three categories are generally deemed as falling into the fourth category, that is “permitted” for foreign investment unless specifically restricted by other PRC laws and regulations. Pursuant to the Encouraged Industry Catalogue for Foreign Investment (2022 version), the manufacturing of EV batteries, supplemental ESS batteries and recycling of batteries involved in our operation fall within the scope of industries encouraging foreign investment.

Overseas Investment

Pursuant to the Administrative Measures for Outbound Investment (《境外投資管理辦法》) promulgated by the MOFCOM on September 6, 2014 and implemented on October 6, 2014, the MOFCOM and provincial competent commerce authorities shall carry out administration either by record-filing or approval, depending on different circumstances of outbound investment by enterprises. Outbound investment by enterprises that involves sensitive countries and regions or sensitive industries shall be subject to administration by approval. Outbound investment by enterprises that falls in any other circumstances shall be subject to administration by record-filing.

Pursuant to the Administrative Measures for Outbound Investment of Enterprises (《企業境外投資管理辦法》) promulgated by the NDRC on December 26, 2017 and implemented on March 1, 2018, a domestic enterprise, or the investor, making an outbound investment shall obtain approval or conduct record-filing for outbound investment projects, or the projects, report relevant information, and cooperate with the supervision and inspection. Sensitive projects carried out by Investors directly or through overseas enterprises controlled by them shall be subject to approval, specifically, including projects involving sensitive countries and regions and sensitive industries; non-sensitive projects directly carried out by investors, namely, non-sensitive projects involving investors’ direct contribution of assets or rights and interests or provision of financing or guarantee shall be subject to record-filing.

Foreign Exchange Regulation

Pursuant to the Administrative Regulations on Foreign Exchange of the PRC (《中華人民共和國外匯管理條例》), which was last amended by the State Council on August 5, 2008 and effective on the same day. Pursuant to the regulations, transactions involving goods, services, income and current transfers in the balance of payments are regarded as current accounts, under which the foreign exchange payments shall, pursuant to the administrative provisions of the foreign exchange control department of the State Council on payments of foreign currencies and purchase of foreign currencies, be made using self-owned foreign currency or foreign currency purchased from financial institutions engaging in conversion and sale of foreign currencies by presenting the valid document; domestic entities and domestic individuals making overseas direct investments or engaging in issuance and trading of overseas securities and derivatives shall process registration formalities pursuant to the provisions of the foreign exchange control department of the State Council.

REGULATORY OVERVIEW

According to the Notice on Relevant Issues Concerning the Administration of Foreign Exchange for Overseas Listing (《關於境外上市外匯管理有關問題的通知》) issued by the SAFE on December 26, 2014 and effective on the same day, a domestic company shall, within 15 business days from the date of the end of its overseas listing and issuance, register the overseas listing with the SAFE’s local branch at the place of its incorporation. The proceeds raised by the domestic companies through overseas listing may be remitted to the domestic account or deposited in an overseas account, provided that the use of the proceeds shall be consistent with the content of the document and other public disclosure documents.

In February 2015, the SAFE issued the Circular of Further Simplifying and Improving Foreign Exchange Administration Policies on Direct Investment (《國家外匯管理局關於進一步簡化和改進直接投資外匯管理政策的通知》), which was partially abolished in December 2019. It stipulates that banks shall directly examine and handle foreign exchange registration under overseas direct investment, and the SAFE and its branches shall implement indirect supervision over foreign exchange registration and examination of overseas direct investment through banks.

LAWS AND REGULATIONS ON ANTI-UNFAIR COMPETITION

According to the Anti-unfair Competition Law of the PRC (《中華人民共和國反不正當競爭法》), or the Anti-unfair Competition Law, lastly amended by the SCNPC on April 23, 2019 and effective on the same day, operators shall comply with the principle of voluntariness, equality, impartiality, integrity and abide by laws and business ethics in market transactions. Under the Anti-unfair Competition Law, unfair competition refers to the circumstance that an operator disrupts the market competition order and damages the legitimate rights and interests of other operators or consumers in violation of the provisions of the Anti-unfair Competition Law in the production and operating activities. Operators who violate the provisions of Anti-unfair Competition Law shall bear corresponding civil, administrative or criminal responsibilities depending on the specific circumstances.

According to the Anti-Monopoly Law of the PRC (《中華人民共和國反壟斷法》), or the Anti-Monopoly Law, lastly amended on June 24, 2022 and effective on the same day, the Anti-Monopoly Law applies to the monopolistic practices in domestic economic activities in the PRC as well as the monopolistic practices outside the PRC which have exclusion or restriction effects on domestic market competitions. The monopolistic practices under the Anti-Monopoly Law include any monopoly agreement reached by any operators, abuse of market-dominating position by any operators and any concentration of operators which has eliminated or limited or may eliminate or limit the market competition. The antimonopoly law enforcement agencies designated by the State Council are responsible for enforcement of the Anti-Monopoly Law in accordance with the provisions of the Anti-Monopoly Law. The antimonopoly law enforcement agencies of the State Council may, according to the needs of their work, authorize the corresponding agencies of the people’s governments of provinces,

REGULATORY OVERVIEW

autonomous regions, and municipalities to be responsible for enforcement of the Anti-Monopoly Law. Operators who violate the provisions of the Anti-Monopoly Law may be subject to fines, confiscation of illegal gains, or cessation of illegal activities by the anti-monopoly law enforcement agencies.

REGULATIONS ON OVERSEAS SECURITIES OFFERING AND LISTING BY DOMESTIC COMPANIES

The Securities Law, which was last revised by the SCNPC on December 28, 2019 and took effect on March 1, 2020, has comprehensively regulated the activities of the securities market in China, including the issuance and trading of securities, the acquisition of listed companies, stock exchanges, securities companies, and the responsibilities of securities regulatory agencies. The Securities Law further stipulates that enterprises in China that directly or indirectly issue securities overseas or list securities overseas shall comply with the relevant provisions of the State Council. The specific measures for subscribing and trading shares of companies in China in foreign currency shall be separately prescribed by the State Council. The CSRC is a securities regulatory agency established by the State Council, responsible for supervising and managing the securities market in accordance with the law, maintaining market order, and ensuring the legal operation of the market. At present, the issuance and trading of H shares are mainly regulated by regulations and rules promulgated by the State Council and the CSRC.

According to the Overseas Listing Trial Measures issued by the CSRC on February 17, 2023 and effective from March 31, 2023, where a domestic company issuer procures an overseas initial public offering or listing, it shall file with the CSRC within three business days after submitting application documents for overseas securities offering and listing.

According to the Provisions on Strengthening Confidentiality and Archives Administration of Overseas Securities Offering and Listing by Domestic Companies (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) jointly issued by the CSRC and other departments on February 24, 2023 and effective on March 31, 2023, in the overseas offering and listing activities of domestic companies, domestic companies, and securities companies and securities service institutions that provide corresponding services shall strictly comply with the applicable laws and regulations of the PRC and satisfy the requirements of these Provisions, enhance the legal awareness of safeguarding state secrets and strengthening archives administration, establish and improve the confidentiality and archives work system, and take necessary measures to fulfill the confidentiality and archives administration obligations, and shall not divulge state secrets or work secrets of state organs, or harm the interests of the state or the public. A domestic company that, either directly or through its overseas listed entity, provides or publicly discloses to relevant securities companies, securities service institutions, overseas regulators, and other entities and individuals, any documents and materials that involve state secrets or work secrets of state organs, shall obtain approval from the competent department with the power of examination and approval according to the law, and report to the administrative department of confidentiality at the same level for filing.
