VOLUNTARY ANNOUNCEMENT – MEDICAL DEVICE REGISTRATION CERTIFICATE OBTAINED FROM THE NATIONAL MEDICAL PRODUCTS ADMINISTRATION FOR TONO-i FOR INTRAOCULAR PRESSURE MEASUREMENT

This announcement is made by the board of directors (the "**Board**") of Zhaoke Ophthalmology Limited (the "**Company**") on a voluntary basis.

The Board of the Company is pleased to announce that the Company has obtained the medical device registration certificate for TONO-i from the National Medical Products Administration.

TONO-i is an innovative tonometer designed to be contactless, portable, and convenient. Unlike conventional contact-type tonometer, TONO-i is safe to use without the need for anaesthesia, pain nor the risk of contamination.

TONO-i will become an integral part of the Company's glaucoma franchise to address the unmet need of low diagnosis and treatment rates in China. It provides a tool for ophthalmologists to monitor patients' IOP conveniently, accurately and thoroughly through measurement. It will likely improve patient compliance for glaucoma drug treatment by giving instant and continuous feedback on its efficacy. Inclusion of TONO-i in the Company's glaucoma franchise signifies the Company's commitment in glaucoma management in both treatment and diagnosis.

In November 2022, the Company reached an exclusive distribution agreement on TONO-i with C&V Tech, a leading company in the development of medical devices for the diagnosis, treatment, and prevention of glaucoma. Under the terms of the agreement, the Company has exclusive rights to register, import, promote, distribute, market and sell TONO-i in Greater China. These rights have since been extended through contractual amendment to include Thailand and Malaysia, effective August 2024.

ABOUT GLAUCOMA

According to China Insights Consultancy, glaucoma, the second-leading cause of blindness worldwide, is a chronic and progressive disease associated with high IOP, resulting in optic nerve damage. The IOP is determined by the balance of the rate of fluid production versus fluid drainage in the eye. Substantially all the glaucoma cases are primary glaucoma, which can be generally classified into two types, open-angle glaucoma and angle-closure glaucoma.

ABOUT C&V TECH

C&V Tech was founded by Dr. Jin-Hue Kang at Wonju Medical Device Techno-Valley in South Korea in 2015. C&V Tech received major investments from Daewoo Pharmaceutical Co. ("**Daewoo Pharma**") as a strategic partner, and Dr. Yong-Hoon Ji, an ophthalmologist from Seoul National University and now the CEO of Daewoo Pharma. Dr. Kang, with over 25 years' experience in biotech research and entrepreneurship, including leading positions at Samsung Medical Center Life Science Research Institute, focused on the unmet needs in glaucoma patient care and invented a contactless tonometer, TONO-i. Daewoo Pharma, with its specialization in ophthalmology, has assisted in the development of TONO-i by C&V Tech, and is actively marketing this innovative product internationally.

By order of the Board
Zhaoke Ophthalmology Limited
Dr. Li Xiaoyi
Chairman and Executive Director

Hong Kong, August 4, 2025
