PROSPECTS

Since the implementation of the 14th Five-Year Plan, investment in new energy projects has held a key position in the development strategies of provinces, autonomous regions, and municipalities. This year marks the final year of the 14th Five-Year Plan. Over this period, China has made significant progress in high-quality energy development, and the construction of a new energy system has achieved a promising start. The upcoming 15th Five-Year Plan period will be a crucial phase in advancing socialist modernization, deepening the implementation of the new energy security strategy, comprehensively promoting the construction of a new energy system, and accelerating the development of China as an energy powerhouse. The release of the 15th Five-Year Plan is expected to bring positive momentum to the energy market.

The Group has not applied the new HKFRSs that have been issued but are not yet effective. The Group has already commenced an assessment of the impact of these new HKFRSs but is not yet in a position to state whether these new HKFRSs would have a material impact on its results of operations and financial position.
