VOLUNTARY ANNOUNCEMENT

LATEST BUSINESS DEVELOPMENTS

This announcement is made by Unisound AI Technology Co., Ltd. (the “**Company**”) on a voluntary basis to inform the shareholders and potential investors of the Company of its latest business developments.

The board of directors (the “**Board**”) of the Company is pleased to announce that, the Company has successfully won the bid for several AI Agent projects including the AI capability platform of Beijing Friendship Hospital of Capital Medical University (“**Beijing Friendship Hospital**”), further deepening the service relationship with Beijing Friendship Hospital based on the existing cooperation, and also marking a substantial progress in its implementation and commercial application of the Company’s technology in the field of intelligent healthcare. Leveraging the Company’s self-developed core technology such as medical large models, multimodal data identification and governance, and text reasoning, such project has constructed an intelligent service platform that can be operated independently by the hospital, and formed a medical vertical large model by integrating the hospital’s knowledge bank, thereby breaking through the traditional medical informatization construction model. With the basis of such platform, the Company has achieved uniform management of multiple models and the smart connection with business systems, and has also significantly improved the hospital’s data value exploration and diagnostic and treatment efficiency in various scenarios such as wound image recognition, infection risk assessment, AI-generated medical records, and follow-up management. For instance, in the practice in Beijing Friendship Hospital, the clinic medical record generation system has improved the efficiency of medical record entry by 80% and saved consultation time by 15%, thus significantly increased patient satisfaction.

This project is the Company's crucial measure in adherence to the national policy guidance of healthcare empowered by artificial intelligence, promoting the upgrade of smart healthcare from single-scenario intelligence to digital intelligence solutions of the entire diagnostic and treatment process. Leveraging UniGPT's leading medical professional capabilities under authoritative evaluation such as MedBench, as well as its solution experience covering over 30% of the top 100 tertiary hospitals across the country, the Company has further strengthened its leading position in the competition of healthcare intelligence.
