VOLUNTARY ANNOUNCEMENT
ANNOUNCEMENT IN RELATION TO THE COMPANY'S DESIGN WIN FOR A NEW INTELLIGENT CABIN PROJECT

This announcement is made by Minieye Technology Co., Ltd (the "**Company**", together with its subsidiaries, the "**Group**") on a voluntary basis.

The board of directors (the "**Board**") of the Company is pleased to announce that the Group has recently received a new project design win notice from a joint venture and luxury brand under a globally renowned automobile enterprise[1] (the "**Customer**"). Together with the project design wins secured during the year, the Company will develop and supply a range of advanced intelligent cabin products for the Customer, including driver monitoring system (DMS), occupant monitoring system (OMS), intelligent cabin, and multi-modal interaction solutions. According to the Customer's projection, the total amount of the entire lifecycle orders for the aforementioned projects is estimated to be approximately RMB320 million, with mass production and delivery scheduled to commence in early 2026.

The Group possesses profound technological expertise and full-stack in-house R&D capabilities in the field of intelligent cabin and automotive-grade hardware-software integration. This design win signifies a major breakthrough for the Group in the intelligent passenger car sector, thereby further validating the Company's leading competitiveness in integrated intelligent cabin solutions. The Group believes that the Customer, with its extensive user base and strong brand influence, will further enhance the Group's market coverage while simultaneously accelerating the iterative advancement of its intelligent cabin technologies.

[1] The Customer's name has been anonymized in this announcement due to confidentiality requirements.

RISK WARNING

1. The aforesaid design win does not reflect the final actual procurement amounts of end customers. Uncertainty still exists in subsequent actual implementation with actual sales amount being determined by the settlement amount of orders.

2. The Group's actual sales amount is directly linked to factors such as the actual production volume of relevant vehicle models by downstream customers. The overall automotive market and macroeconomic environment may affect downstream customers' production scheduling and procurement demands, thereby bringing uncertainty to the supply volume. Although all parties possess the capabilities to fulfill their obligations, however, unforeseen circumstances or force majeure events in the course of fulfilling the obligations may lead to delay, modification, suspension or termination of the design win projects.

ABOUT THE GROUP'S BUSINESS

The Group is committed to shaping an automotive intelligence ecosystem through technological innovations to improve road safety and enhance driving experiences. We focus on the innovation and implementation of technologies in intelligent driving, intelligent cabin, smart mobility, and smart logistics. Leveraging our full-stack in-house platform technology, integrated hardware-software R&D capabilities and advanced mass production capability, and adhering to the strategy of "customer-first, scenario-focused, iterative product development, and boundary expansion", we continue to develop solutions with increased automation level, striving to become a key driver of intelligent transformation in the industry.

By order of the Board
