To the Shareholders

Dear Sir or Madam,

(1) MAJOR AND CONNECTED TRANSACTION RELATING TO THE ACQUISITION OF TARGET ASSETS
AND
(2) PROPOSED ISSUANCE OF A SHARES

INTRODUCTION

References are made to the announcements of the Company dated 1 August 2025, 15 August 2025 and 19 December 2025, in relation to, among other things, the Transaction and the Proposed Issuance of A Shares.

The purpose of this circular is to provide the Shareholders with information reasonably necessary to enable Shareholders to make an informed decision on whether to vote for or against the resolutions to be proposed at the EGM, including:

(i) details of the Transaction and the Proposed Issuance of A Shares;

(ii) the letter from Somerley to the Independent Board Committee and the Independent Shareholders regarding the Transaction; and

(iii) the notice of the EGM at which relevant resolutions will be proposed to consider and approve the Transaction and the Proposed Issuance of A Shares.

MAJOR AND CONNECTED TRANSACTION

References are made to the announcements of the Company dated 1 August 2025, 15 August 2025 and 19 December 2025 in relation to the proposed acquisition of assets by way of issuance of A Shares and payment in cash by the Company and raising supporting funds through A Share market.

On 15 August 2025, the Company entered into the Asset Purchase Agreement with China Energy and its wholly-owned subsidiary, Western Energy, pursuant to which, the Company conditionally agreed to (i) acquire 100% equity interest in Guoyuan Power, 100% equity interest in Xinjiang Energy, 100% equity interest in Chemical Company, 100% equity interest in Wuhai Energy, 100% equity interest in Pingzhuang Coal, 41% equity interest in Shenyan Coal, 49% equity interest in Jinshen Energy, 100% equity interest in Baotou Mining, 100% equity interest in Shipping Company, 100% equity interest in Coal Trading Company, 100% equity interest in E-commerce Company and 100% equity interest in Port Company held by China Energy by way of issuance of Consideration Shares and payment in cash; and (ii) acquire 100% equity interest in Inner Mongolia Construction Investment held by Western Energy by way of payment in cash.

On 19 December 2025, the Company entered into the Supplemental Asset Purchase Agreement with China Energy and Western Energy, pursuant to which (i) the Target Assets under the Transaction were revised to exclude the 100% equity interest in E-commerce Company held by China Energy, while all other Target Assets remained unchanged; and (ii) certain terms of the Transaction, including the transaction consideration and payment arrangements, were further amended and supplemented.

1. Principal Terms of the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement)

Date	15 August 2025 (as supplemented by the Supplemental Asset Purchase Agreement on 19 December 2025)
Parties	The Company (as the buyer); and China Energy and Western Energy (as the sellers).
Transaction Structure	The Company shall (i) acquire 100% equity interest in Guoyuan Power, 100% equity interest in Xinjiang Energy, 100% equity interest in Chemical Company, 100% equity interest in Wuhai Energy, 100% equity interest in Pingzhuang Coal, 41% equity interest in Shenyan Coal, 49% equity interest in Jinshen Energy, 100% equity interest in Baotou Mining, 100% equity interest in Shipping Company, 100% equity interest in Coal Trading Company and 100% equity interest in Port Company held by China Energy by way of issuance of Consideration Shares and payment in cash; and (ii) acquire 100% equity interest in Inner Mongolia Construction Investment held by Western Energy by way of payment in cash. Except for Jinshen Energy, in which the Company will hold 49% equity interest, each of the other Target Companies will become a subsidiary of the Company upon completion of the Transaction.

Transaction Price and Payment Method

The transaction price is determined based on the valuation results set out in the Asset Valuation Reports issued respectively by China Enterprise Appraisal and China United Appraisal, both of which are qualified securities appraisal institutions, in respect of the value as at the Valuation Benchmark Date of 31 July 2025, and filed by China Energy, and was agreed upon by the parties to the Transaction on the basis of such filed valuation results.

The transaction price payable by the Company to China Energy for the acquisition of 100% equity in Guoyuan Power, 100% equity in Xinjiang Energy, 100% equity in Chemical Company, 100% equity in Wuhai Energy, 100% equity in Pingzhuang Coal, 41% equity in Shenyan Coal, 49% equity in Jinshen Energy, 100% equity in Baotou Mining, 100% equity in Shipping Company, 100% equity in Coal Trading Company, and 100% equity in Port Company has been set to be satisfied by way of issuance of Consideration Shares and payment in cash. Accordingly, the Company will pay in aggregate RMB40,080 million by way of issuing shares and RMB85,791 million in cash. The Company will pay the transaction consideration of RMB7,728 million in cash for its acquisition of 100% equity in Inner Mongolia Construction Investment from Western Energy. In aggregate, 30% of the total consideration for the transaction will be settled by issuing Consideration Shares, and the remaining 70% will be settled in cash.

The allocation between settlement by Consideration Shares and cash represents a commercial judgment made after taking into account a number of factors, including the Company's share capital structure, protection of shareholders' interests, the Company's financial soundness and the overall feasibility of implementing the Transaction. The arrangement to settle approximately 30% of the consideration by way of Consideration Shares and approximately 70% in cash is primarily based on the following considerations:

Firstly, to maintain a reasonable and balanced shareholding structure of the Company and to ensure an appropriate level of shareholding concentration following the Transaction, the Company has taken into account the public float requirement, share liquidity and the balance of the corporate governance structure upon completion of the Transaction. A prudent approach to controlling the scale of share issuance helps ensure a more balanced shareholding structure and a stable level of public float, thereby facilitating orderly trading in the market and supporting sound corporate governance.

Secondly, a moderate level of share issuance mitigates potential dilution effects and is conducive to maintaining the Company's earnings per share profile after completion of the Transaction, which aligns with the overall interests of all Shareholders, including minority shareholders.

Thirdly, in determining the proportion of cash settlement, the Company has taken into consideration its funding resources with a view to ensuring that the cash consideration will not adversely affect the Company's financial position, liquidity or daily operations. The Company has sufficient funding arrangements in place and does not expect any difficulty in meeting the cash payment obligations.

Having considered the above factors in aggregate, and following arm's-length negotiations with the Counterparties, the parties agreed that approximately 30% of the consideration will be settled by way of Consideration Shares and approximately 70% in cash. The settlement structure represents an appropriate balance among shareholder interest protection, shareholding structure considerations, financial prudence and the overall feasibility of implementing the Transaction.

The appraised value of the Target Assets, the transaction price and the payment arrangements are as follows:

(Unit: RMB'000)

		Payment Method		
No.	**Target Assets**	**Issuance of Shares as Consideration**	**Cash as Consideration**	**Total Consideration**
1	100% equity interest in Guoyuan Power	14,195,709.5	30,386,283.4	44,581,992.9
2	100% equity interest in Xinjiang Energy	3,859,680.9	8,261,746.7	12,121,427.6
3	100% equity interest in Chemical Company	9,513,608.7	20,364,125.4	29,877,734.1
4	100% equity interest in Wuhai Energy	4,526,087.0	9,688,206.3	14,214,293.3
5	100% equity interest in Pingzhuang Coal	1,777,985.5	3,805,823.8	5,583,809.3
6	100% equity interest in Inner Mongolia Construction Investment	–	7,727,627.8	7,727,627.8
7	41% equity interest in Shenyan Coal	2,449,177.9	5,242,528.7	7,691,706.6
8	49% equity interest in Jinshen Energy	1,203,850.1	2,576,872.2	3,780,722.3
9	100% equity interest in Baotou Mining	1,446,449.7	3,096,163.1	4,542,612.8
10	100% equity interest in Shipping Company	681,986.6	1,459,809.9	2,141,796.5
11	100% equity interest in Coal Trading Company	274,166.2	586,859.9	861,026.1
12	100% equity interest in Port Company	150,802.3	322,796.2	473,598.5
Total		**40,079,504.3**	**93,518,843.5**	**133,598,347.8**

Western Energy, being the sole shareholder of Inner Mongolia Construction Investment, is a wholly-owned subsidiary of China Energy. According to China Energy's internal planning for the shareholding and management structure of its business segments, there is no plan or arrangement for Western Energy to hold any shares of the Company. Taking into account such overall governance considerations and the shareholding structure arrangements within China Energy Group, the consideration for the acquisition of Inner Mongolia Construction Investment will therefore be settled in cash rather than by way of issuance of Consideration Shares.

The appraised value of the entire equity interests of the twelve Target Companies involved in the Transaction is RMB143.675 billion. Taking into account the respective equity interest percentages in each of the Target Companies proposed to be acquired under the Transaction, the transaction price has been determined at RMB128.671 billion.

Subsequent to the Valuation Benchmark Date, China Energy made a capital contribution of RMB4.927 billion to the Chemical Company. Such post-valuation capital contribution was fully subscribed and has been paid up by China Energy. This post-valuation capital contribution was not included in the scope of appraisal nor the valuation conclusion of the relevant asset valuation report.

Accordingly, the final transaction price for the Transaction shall be the filed valuation results plus the post-valuation capital contribution amount (RMB4.927 billion). The adjusted final transaction price has therefore been determined at RMB133.598 billion.

Attribution of Profits and losses for the Transition Period

During the Transition Period, for those Target Companies and their respective subsidiaries and investee companies in which equity interests or mining rights are valued using the income approach and adopted as the pricing basis (the "**Income Approach Assets**"), any profits generated during the Transition Period shall be enjoyed by the Company. If any loss is incurred by the Income Approach Assets during the Transition Period, the Counterparties who directly or indirectly hold the Income Approach Assets shall bear the obligation to make up such loss in proportion to their respective direct or indirect equity interest in the relevant Target Company as at the effective date of the agreement for the Transaction. For the Income Approach Assets with forecasted losses during the Transition Period, such obligation shall be capped at the forecasted amount, and any additional losses exceeding the forecasted amount shall be borne by the Counterparties in proportion to their respective direct or indirect equity interest in the relevant Target Company as at the effective date of the agreement for the Transaction.

For the avoidance of doubt, when calculating the profit or loss of the Income Approach Assets held by a Target Company, the aggregate profit or loss arising from all Income Approach Assets held by such Target Company shall be applied. Where the Transition Period overlaps with the performance compensation period stipulated under the Performance Compensation Agreement entered into among the parties, the Counterparties shall comply with the relevant provisions under the Performance Compensation Agreement, and shall not be required to bear any responsibility under the profit and loss arrangement for the Transition Period as set out in the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement).

Apart from the Income Approach Assets, any profits or losses arising from the other assets of the Target Companies during the Transition Period shall be enjoyed or borne by the Company.

Closing

The parties agree that, after completion of the Transaction, the profits and losses of the Target Assets for the Transition Period shall be determined as follows:

the Company shall engage an accounting firm that meets the requirements of the Securities Law of the PRC to conduct a completion audit, with the last day of the month in which the closing date falls as the audit reference date, on the profits and losses of the Target Assets for the period from (but excluding) the Valuation Benchmark Date to (and including) the closing date, and to issue a completion audit report; or any other approach as may be mutually agreed by the parties at the relevant time.

After the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement) becomes effective, all parties shall promptly implement the transaction proposal thereunder and actively cooperate with each other in going through all necessary closing procedures for the Transaction in accordance with the law.

The Counterparties shall, immediately after the Effective Date, procure the Target Companies to perform necessary procedures, amend the articles of association and other documents, and complete the industrial and commercial registration of change for the transfer of the Target Assets to the Company within 20 working days after the Effective Date. The Company shall, within 20 working days after the completion of the aforesaid equity transfer procedures, apply to CSDC for the registration of the Consideration Shares.

Conditions Precedent for Effectiveness of the Asset Purchase Agreement and the Supplemental Asset Purchase Agreement

The Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement) shall be established on the date when the legal representatives or authorised representatives of all parties sign and affix their seals thereto. Except for the confidentiality clauses, which shall take effect as at the date of signing the Asset Purchase Agreement, all other clauses shall come into force after all of the following conditions are satisfied:

(1) The Transaction has been considered and approved by the Board and the general meeting of the Company;

(2) The necessary internal approvals of the Counterparties in respect of the Transaction have been obtained;

(3) The Asset Valuation Reports involved in the Transaction has been filed with the state-owned assets supervision and administration department or its authorised institution;

(4) The Transaction has been approved by the state-owned assets supervision and administration department or its authorised institution;

(5) The Transaction has been reviewed and approved by the SSE and registered and consented to by the CSRC; and

(6) Other approvals or consents required by relevant laws and regulations (if any) have been obtained.

As at the Latest Practicable Date, save for the satisfaction of condition (1) to the extent of the Board's approval, and conditions (2) and (3), none of the other conditions precedent had been fulfilled.

2. Plan for the Issuance of Consideration Shares

Type, Par Value and Listing Venue of Consideration Shares to be Issued	Domestic listed ordinary shares denominated in RMB (A Shares) with a par value of RMB1.00 per Share, which will be listed on the SSE. The Consideration Shares, upon issuance, will rank *pari passu* in all respects with the A Shares in issue at the time of the issuance of such Consideration Shares.
Target Subscriber	China Energy
Pricing Basis, Pricing Benchmark Date, and Issuance Price of Consideration Shares	The Pricing Benchmark date for the issuance of Consideration Shares is the date of the announcement of the resolution of the 12th meeting of the sixth session of the Board of the Company (i.e., 16 August 2025). The issuance price of the Consideration Shares is RMB30.38 per share, which complies with the Administrative Measures for Restructuring, and shall not be lower than the audited net assets per share attributable to shareholders of the Company, after giving effect to any ex-rights or ex-dividend adjustments, as at the end of the latest period prior to the disclosure of the proposal for the issuance of Consideration Shares (i.e. 31 December 2024), being RMB21.48 per share as calculated in accordance with the PRC Accounting Standards for Business Enterprises.

Pursuant to Article 46 of the Administrative Measures for the Major Asset Restructuring of Listed Companies, the issuance price of shares by a listed company shall not be lower than 80% of the market reference price. The market reference price refers to one of the average trading prices of the shares of the listed company for the 20, 60 or 120 trading days preceding the date of the announcement of the board resolution in relation to the issuance of shares for the purchase of assets. In this regard, as the announcement date of the resolution of the 12th meeting of the sixth session of the Board (i.e., 16 August 2025) was the announcement date of the board resolution at which the issuance of Consideration Shares was first considered and approved, such date was required, in accordance with the applicable regulatory requirements, to be used as the pricing benchmark date. Accordingly, the final issuance price was not lower than 80% of the average trading price of the Company's shares for the relevant 20, 60 or 120 trading-day period preceding such pricing benchmark date. For illustration purposes, details of the average trading prices of the Shares over the 20 trading days, 60 trading days and 120 trading days immediately preceding the Pricing Benchmark Date (adjusted for any ex-rights and ex-dividend effects during the respective periods), together with 80% of such average trading prices, are set out in the table below:

Calculation period of the average trading price of the Shares	**Average trading prices** *(RMB/Share)*	**80% of the Average trading prices average trading prices** *(RMB/Share)*
Last 20 trading days	38.07	30.46
Last 60 trading days	37.69	30.16
Last 120 trading days	36.17	28.94

Note: The average trading price for the preceding N trading days is calculated by dividing the total trading value over the preceding N trading days by the total trading volume over the same period. The data for 80% of the average trading prices are rounded up to the nearest two decimal places.

Such pricing mechanism is formulated in compliance with the applicable regulatory requirements and is determined with reference to prevailing market practice and regulatory precedents, including comparable major asset restructurings of listed companies. The Company considers that, having taken into account the above factors, the pricing mechanism is fair and reasonable so far as the Company and its Shareholders as a whole are concerned.

The issuance price of RMB30.38 per share represents:

(a) a discount of approximately 25.15% to the closing price of RMB40.59 per A Share as quoted on the SSE on the Latest Practicable Date;

(b) a discount of approximately 19.12% to the closing price of RMB37.56 per A Share as quoted on the SSE on 1 August 2025 (being the Last Trading Day);

(c) a discount of approximately 19.99% to the average closing price of RMB37.97 per A Share for the five consecutive trading days up to and including the Last Trading Day;

(d) a discount of approximately 21.52% to the average closing price of RMB38.71 per A Share for the thirty consecutive trading days up to and including the Last Trading Day;

(e) a discount of approximately 22.24% to the average closing price of RMB39.07 per A Share for the sixty consecutive trading days up to and including the Last Trading Day;

(f) a premium of approximately 40.52% over the audited consolidated net asset value attributable to shareholders of RMB21.62 per Share as at 31 December 2024 as extracted from the Company's latest annual report published on the Hong Kong Stock Exchange; and

(g) a premium of approximately 49.21% over the unaudited consolidated net asset value attributable to shareholders of RMB20.36 per Share as at 30 June 2025 as extracted from the Company's latest interim report published on the Hong Kong Stock Exchange.

During the period between the Pricing Benchmark Date and the issuance date, if there are any ex-rights or ex-dividend events of the Company, such as distribution of dividend, issue of bonus share, rights issue or capitalisation issue, the issuance price will be adjusted according to the following formula, and the calculation result will be rounded up to the nearest two decimal places. The adjustment formula for the issuance price is as follows:

In the event of bonus issue or capitalisation issue: $P_1=P_0/(1+n)$;

In the event of rights issue: $P_1=(P_0+A\times k)/(1+k)$;

In the event of the above two items implemented simultaneously: $P_1=(P_0+A\times k)/(1+n+k)$;

In the event of distribution of cash dividend: $P_1=P_0-D$;

In the event that the above three items are implemented simultaneously: $P_1=(P_0-D+A\times k)/(1+n+k)$.

Where, "P_0" is the issuance price of the Consideration Shares before adjustment; "n" is the rate of bonus issue or rate of capitalisation issue; "k" is the rights issue ratio; "A" is the subscription price for the rights issue; "D" is the amount of cash dividend per share; and "P_1" is the adjusted issuance price.

Except for the adjustment of the issuance price resulting from the aforesaid ex-rights and ex-dividend events, no issuance price adjustment mechanism is set for the Transaction for the time being.

On 24 October 2025, the Company convened the second extraordinary general meeting of 2025, at which the Resolution regarding the "Interim Profit Distribution Plan of China Shenhua Energy Company Limited for 2025 was considered and approved, pursuant to which, the Company declared a cash dividend of RMB0.98 (tax inclusive) per Share, based on the total share capital of the Company (i.e. 19,868,519,955 shares) prior to the implementation of the distribution. The Company will complete the distribution of the 2025 interim dividend around 24 December 2025.

As the Company has implemented the 2025 interim profit distribution and in accordance with the pricing principles set out above, the issuance price for the Consideration Shares has been adjusted from RMB30.38 per Share to RMB29.40 per Share.

Number of Consideration Shares to be Issued

The number of Consideration Shares to be issued shall be determined according to the following formula: Total number of the Consideration Shares to be issued = The portion of the transaction consideration corresponding to the issuance of Consideration Shares/ issuance price.

The number of new Shares to be acquired by China Energy, as calculated according to the above formula, shall be rounded down to the nearest whole Share, and any fractional Share shall be deemed as a donation to the Company and directly included in the capital reserve of the Company. The final number of the Consideration Shares to be issued shall be the number as approved by the EGM, reviewed and approved by the SSE and registered with the CSRC.

Based on the transaction price of the Target Assets, the issuance price of the Consideration Shares and the proportion of share consideration, the number of Consideration Shares to be issued is 1,363,248,446 A Shares, accounting for approximately 6.42 % of the total share capital of the Company after the completion of the Transaction. The specific details are as follows:

No.	**Target Assets**	**Issuance of the Shares as consideration** *(RMB'000)*	**Number of the Issuance of the Shares** *('000 Shares)*
1	100% equity interest in Guoyuan Power	14,195,709.5	482,847.3
2	100% equity interest in Xinjiang Energy	3,859,680.9	131,281.7
3	100% equity interest in Chemical Company	9,513,608.7	323,592.1
4	100% equity interest in Wuhai Energy	4,526,087.0	153,948.5
5	100% equity interest in Pingzhuang Coal	1,777,985.5	60,475.7
6	41% equity interest in Shenyan Coal	2,449,177.9	83,305.4
7	49% equity interest in Jinshen Energy	1,203,850.1	40,947.3
8	100% equity interest in Baotou Mining	1,446,449.7	49,199.0
9	100% equity interest in Shipping Company	681,986.6	23,196.8
10	100% equity interest in Coal Trading Company	274,166.2	9,325.4
11	100% equity interest in Port Company	150,802.3	5,129.3
Total		**40,079,504.3**	**1,363,248.4**

During the period between the Pricing Benchmark Date and the Issuance Date, if there are any ex-rights and ex-dividend events of the Company, such as distribution of dividend, bonus issue, rights issue or capitalisation issue, or the issuance price is adjusted according to the abovementioned issuance price adjustment mechanism, the number of Consideration Shares to be issued will also be adjusted accordingly according to the adjustment of the issue price.

Lock-up Period

China Energy shall not transfer the Shares of the Company acquired under the Transaction within 36 months from the date of the completion of the issuance of Consideration Shares. If additional Shares are allotted or issued due to, among others, the bonus issue, capitalisation issue or rights issue of the Company, any additional Shares so allotted or issued will also be subject to the above-mentioned lock-up period. However, transfers permitted under applicable laws, regulations and regulatory documents are not subject to such restrictions.

Where the closing price of the Shares of the Company is lower than the issue price for 20 consecutive trading days during the 6 months after completion of the Transaction or the closing price is lower than the issue price at the end of the 6 months after completion of the Transaction, the lock-up period of such Shares of the Company held by China Energy will be automatically extended for another 6 months.

The Shares of the Company already held by China Energy and its concert party, Capital Holdings, prior to the Transaction shall not be transferred within 18 months after completion of the Transaction. If additional Shares are allotted or issued due to the Company's bonus issue, capitalisation of capital reserves or rights issue, any such additional Shares shall also be subject to the same lock-up period. However, transfers permitted under applicable laws, regulations and normative documents shall not be subject to such restriction.

Arrangements for Undistributed Accumulated Profit

The Company's accumulated undistributed profits accrued prior to the issuance of the Consideration Shares shall, from the date of completion of the issuance of the Consideration Shares, be jointly shared by the existing and new Shareholders of the Company after such issuance in proportion to their respective shareholdings as registered with CSDC.

General Mandate The Consideration Shares will be issued pursuant to the General Mandate. The maximum number of A Shares that can be issued under the General Mandate is 3,298,207,591 A Shares. As at the Latest Practicable Date, (i) no A Shares have been issued pursuant to the General Mandate; and (ii) the General Mandate is sufficient for the issue of the Consideration Shares.

The validity period of the plan for the Transaction is twelve months from the date on which the Shareholders approve the resolution relating to the Transaction. If the Company obtains the approval from the CSRC for the Transaction within such validity period, the validity period shall automatically extend to the date of completion of the Transaction.

3. Information on the Parties to the Transaction and the Target Companies

Information on the Parties to the Transaction

(1) The Group

The Company is a world-leading coal-based integrated energy company. The main business of the Group includes production and sales of coal and power, railway, port and ship transportation, and coal-to-olefins and other related chemical processing business. As at the Latest Practicable Date, China Energy directly holds 13,812,709,196 A Shares of the Company and indirectly holds 11,593,528 A Shares of the Company through Capital Holdings, in aggregate representing 69.5789% of the total number of issued shares of the Company.

(2) China Energy

China Energy and its subsidiaries have various industrial sectors, including coal, thermal power, new energy, hydropower, transportation, chemical, technology and environmental protection and finance, and are mainly engaged in coal production, power generation, transportation and coal based chemical processing as well as investment and financing activities. China Energy is a controlling Shareholder of the Company. The ultimate beneficial owner of China Energy is the SASAC.

(3) Western Energy

Western Energy is a company established in the PRC with limited liability in 2024 and mainly engaged in coal mining, power generation, power transmission, power supply (distribution), road freight transportation, coal washing and processing, sales of coal and coal products, etc. As at the Latest Practicable Date, Western Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

Information on the Target Companies

(1) Guoyuan Power

Guoyuan Power, formerly known as State Grid Energy Development Co., Ltd. (國網能源開發有限公司), is a company established in the PRC with limited liability in 2008. It became a wholly-owned subsidiary of China Energy (which at that time was Shenhua Group Corporation Limited神華集團有限責任公司) in 2012 through the acquisition of 100% equity from State Grid Corporation of China. At the time of the transfer, the registered capital was RMB7 billion. Following the completion of the equity transfer, China Energy made several capital injections into Guoyuan Power, increasing its registered capital to approximately RMB47.26 billion in 2024. Guoyuan Power operates in the power, heat production, and supply industry as well as coal mining and washing industry and is mainly engaged in, among others, coal mining, washing, processing and sales, pithead coal-fired power generation business, heat supply and construction of power transmission and distribution facilities. As at the Latest Practicable Date, Guoyuan Power is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Guoyuan Power's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	60,066	61,030	63,610	60,151
Equity attributable to equity holders of the Company	26,775	24,925	20,941	19,554

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	12,468	25,844	31,096	30,050
Profit before income tax	3,541	4,206	4,025	3,560
Profit for the year/period	2,913	3,375	3,029	2,394
Profit attributable to equity holders of the Company	2,378	2,232	1,997	1,537

(2) Xinjiang Energy

Xinjiang Energy is a company established in the PRC with limited liability in 2000. China Energy (which at that time was Shenhua Group Corporation Limited) acquired 51% equity interest in Xinjiang Energy in 2005 by contributing RMB645 million in cash. In 2007, China Energy made an additional cash capital contribution, increasing its shareholding to 68.46%. In 2010, China Energy acquired a further 23.80% equity interest from Xinjiang Investment Development (Group) Co., Ltd. (新疆投資發展(集團)有限責任公司) for RMB650 million, increasing its interest to 92.26%. In 2011, China Energy acquired an additional 2.20% equity interest from China Cinda Asset Management Co., Ltd. (中國信達資產管理公司) for approximately RMB65 million and subscribed for new registered capital, increasing the registered capital to approximately RMB3.76 billion. In 2013, China Energy acquired a further 2.89% equity interest from China Huarong Asset Management Co., Ltd. (中國華融資產管理公司) for approximately RMB161 million. Through subsequent rounds of capital restructuring, the registered capital of Xinjiang Energy was gradually increased to approximately RMB9.12 billion by 2023. It operates in the coal mining and washing industry and is mainly engaged in, among others, coal mining, washing and processing, and sales. As at the Latest Practicable Date, Xinjiang Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Xinjiang Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	31,095	30,858	26,723	21,566
Equity attributable to equity holders of the Company	10,322	10,310	9,055	7,410

	Seven months ended 31 July 2025 *(Audited)*	Year ended 31 December 2024 *(Audited)*	Year ended 31 December 2023 *(Audited)*	Year ended 31 December 2022 *(Audited)*
Revenue	6,990	18,232	19,423	18,543
Profit before income tax	357	2,702	3,294	6,205
Profit for the year/period	176	2,145	2,611	5,225
Profit attributable to equity holders of the Company	140	1,940	2,147	4,464

(3) Chemical Company

Chemical Company is a company established in the PRC with limited liability in 2003. It was established through capital contributions by China Energy (which at that time was Shenhua Group Corporation Limited) and its wholly-owned subsidiary, Guohua Energy Investment Co., Ltd. (國華能源投資有限公司), with initial registered capital of RMB2 billion (China Energy contributing RMB1.8 billion and Guohua contributing RMB0.2 billion) in 2003. In 2008, the registered capital was increased to RMB10.6 billion, with China Energy's contribution increased to RMB9.75 billion. Between 2008 and 2023, Chemical Company underwent multiple rounds of capital restructuring, increasing its registered capital to approximately RMB31.24 billion. Subsequent to the Valuation Benchmark Date, Chemical Company also received an additional capital contribution of RMB4,927.20 million from China Energy. As at the Latest Practicable Date, the relevant change registration formalities with the PRC company registration authority has not yet been completed.

It operates in the petroleum, coal, and other fuel processing industry and is mainly engaged in the production, processing, and sale of coal chemical products, as well as the businesses related to the clean conversion and utilisation of coal. As at the Latest Practicable Date, Chemical Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Chemical Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	40,757	37,071	35,754	37,515
Equity attributable to equity holders of the Company	17,143	17,593	16,181	15,890

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	11,962	26,429	25,651	27,982
Profit/(loss) before income tax	(489)	1,323	318	2,326
Profit/(loss) for the year/period	(550)	1,265	278	2,224
Profit/(loss) attributable to equity holders of the Company	(527)	1,363	283	2,231

Chemical Company recorded a loss for the seven months ended 31 July 2025 primarily due to the temporary shutdown of the coal-to-liquids project operated by its Ordos Coal-to-Liquids Branch. The production units of the coal-to-liquids project were taken offline in November 2024 for a process upgrade and transformation, and remained under suspension during January to July 2025, resulting in operating losses for the period.

The upgrade works have now been substantially completed and the relevant units are currently in trial operation. The coal-to-liquids project recorded satisfactory profitability in 2024 prior to the commencement of the upgrade works, and the completion of the technological upgrade is expected to further improve production efficiency.

(4) Wuhai Energy

Wuhai Energy is a company established in the PRC with limited liability in 2002. It was founded in April 2002 by China Energy (which at that time was Shenhua Group Corporation Limited) as a wholly-owned subsidiary with an initial registered capital of RMB202 million. It subsequently underwent capital increases in 2009, 2018 and 2021, raising its registered capital to approximately RMB2.69 billion. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Wuhai Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Wuhai Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	23,407	23,401	22,502	20,941
Equity attributable to equity holders of the Company	12,316	12,299	11,205	10,518

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	4,040	9,770	10,744	12,606
Profit before income tax	44	1,623	1,467	5,841
Profit/(loss) for the year/ period	(77)	1,241	972	4,632
Profit attributable to equity holders of the Company	24	1,197	712	4,340

Wuhai Energy recorded a loss for the seven months ended 31 July 2025 mainly due to weaker downstream demand. A slowdown in the real estate sector and related industries resulted in subdued steel demand and a decline in coking coal prices during the period. On

the production side, coal output decreased at certain mines of Wuhai Energy, including Gongwusu Mine and Laoshidan Mine, leading to an overall reduction in production and a slight decrease in sales volume.

(5) Pingzhuang Coal

Pingzhuang Coal is a company established in the PRC with limited liability in 2000. It was originally a local state-owned enterprise. In April 2008, Chifeng Municipal Bureau of Industry and Information Technology transferred 48% equity to China Guodian Corporation (中國國電集團有限公司) for RMB2.091 billion. Shortly thereafter, Chifeng Municipal Bureau of Industry and Information Technology transferred an additional 3% equity to China Guodian Corporation without consideration, raising the shareholding of China Guodian Corporation to 51%. In 2009, China Guodian Corporation transferred its 51% equity interest to its subsidiary, Guodian Inner Mongolia Power Co., Ltd. (國電內蒙古電力有限公司) Pingzhuang Coal increased its registered capital to approximately RMB2.35 billion in 2011. Separately, Chifeng Municipal Bureau of Industry and Information Technology transferred 31.82% equity to China Cinda Asset Management Co., Ltd., which was subsequently transferred to China Energy in 2020 for approximately RMB1.60 billion. In 2021, Guodian Inner Mongolia Power Co., Ltd. transferred its 51% equity interest to China Energy without consideration, increasing the shareholding of China Energy to 82.82%. Other local state-owned entities and China Huarong Asset Management Co., Ltd. transferred the remaining 17.18% equity to China Energy. After completing registration changes in January 2022, China Energy became the only shareholder of Pingzhuang Coal, whose registered capital was subsequently increased to approximately RMB4.35 billion. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Pingzhuang Coal is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Pingzhuang Coal's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	35,794	34,354	33,693	32,892
Equity attributable to equity holders of the Company	3,437	2,632	5,586	5,366

	Seven months ended 31 July 2025 *(Audited)*	Year ended 31 December 2024 *(Audited)*	Year ended 31 December 2023 *(Audited)*	Year ended 31 December 2022 *(Audited)*
Revenue	5,905	10,045	9,199	9,837
Profit/(loss) before income tax	1,340	(3,019)	1,837	1,695
Profit/(loss) for the year/ period	1,023	(3,389)	1,292	1,035
Profit/(loss) attributable to equity holders of the Company	672	(1,615)	533	738

Pingzhuang Coal recorded a loss for the year ended 31 December 2024 despite maintaining stable year-on-year revenue growth. The decline in profitability was primarily attributable to a one-off donation made in 2024 by its subsidiary, Inner Mongolia Xilinhe Coal Chemical Co., Ltd. (內蒙古錫林河煤化工有限責任公司), through the Public Welfare Foundation of China Energy Group to the Inner Mongolia Autonomous Region Government for comprehensive ecological governance in Inner Mongolia. No such donation was made in 2025. Excluding this non-recurring item, Pingzhuang Coal's underlying operations remained stable, and Pingzhuang Coal returned to profitability for the seven months ended 31 July 2025.

(6) Inner Mongolia Construction Investment

Inner Mongolia Construction Investment is a company established in the PRC with limited liability in 2005. It was founded through joint capital contributions by China Guodian Corporation (which was subsequently merged into Shenhua Group Corporation Limited, and is now part of China Energy) and Hebei Construction & Investment Group Co., Ltd. (河北建投集團股份有限公司), with each party contributing RMB10 million and holding 50% equity interest in 2005. In 2008, China Guodian Corporation transferred its 50% equity interest to GD Power Development Co., Ltd. (國電電力發展股份有限公司). Inner Mongolia Construction Investment subsequently completed two rounds of capital increases in 2010 and 2014, raising its registered capital to RMB4,135 million, with both shareholders making further capital contributions in cash in proportion to their respective shareholdings. In 2024, Western Energy acquired the 50% equity interest held by GD Power Development Co., Ltd. and the 50% equity interest held by Hebei Construction & Investment Group Co., Ltd., for consideration of approximately RMB6,740 million for each acquisition. Following completion of the registration update on 23 April 2025, Western Energy became the sole

shareholder of Inner Mongolia Construction Investment. It operates in the power, heat production and supply industry as well as coal mining and washing industry and is mainly engaged in pithead coal-fired power generation, coal mining, washing, processing, and sales. As at the Latest Practicable Date, Inner Mongolia Construction Investment is a wholly-owned subsidiary of Western Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Inner Mongolia Construction Investment's audited financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	15,040	15,003	14,687	15,595
Equity/(deficit) attributable to equity holders of the Company	(1,162)	(2,197)	4,940	6,220

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	2,872	3,066	2,705	7,307
Profit/(loss) before income tax	964	(7,105)	(522)	1,497
Profit/(loss) for the year/ period	1,035	(7,126)	(547)	985
Profit/(loss) attributable to equity holders of the Company	1,035	(7,126)	(547)	985

Inner Mongolia Construction Investment recorded a net loss for the year ended 31 December 2023 mainly because its coal mine operations were suspended in the second half of the year pending completion of procedures relating to the renewal of its mining licence, resulting in the absence of external coal sales during the period.

For the year ended 31 December 2024, Inner Mongolia Construction Investment again recorded a net loss, primarily because mining operations continued to be suspended in the first half of the year pending completion of the mining licence procedures, and due to a significant increase in non-operating expenses arising from a donation made through the Public Welfare Foundation of China Energy Group to the Inner Mongolia Autonomous Region Government for comprehensive ecological governance in Inner Mongolia.

For the seven months ended 31 July 2025, Inner Mongolia Construction Investment had resumed normal production and operations, resulting in a return to normal profitability levels.

(7) Shenyan Coal

Shenyan Coal is a company established in the PRC with limited liability in 2009. It was originally formed with registered capital of RMB1.44 billion, jointly invested by China Energy (which at that time was Shenhua Group Corporation Limited) (RMB734 million, 51%) and Shaanxi Yanchang Petroleum (Group) Co., Ltd. (陝西延長石油(集團)有限責任公司) (RMB706 million, 49%). In 2013, registered capital was increased to RMB2.18 billion, with China Energy contributing an additional RMB38 million, maintaining its 51% shareholding. In 2023, Shenyan Coal further increased its registered capital to approximately RMB2.74 billion with the introduction of external investors. China Energy made a simultaneous contribution of approximately RMB36 million, after which its holding was adjusted to 41%. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Shenyan Coal is held by China Energy, Shaanxi Yanchang Petroleum Mining Co., Ltd.* (陝西延長石油礦業有限責任公司), Shenmu State-Owned Capital Investment and Operation Group Co., Ltd.* (神木市國有資本投資運營集團有限公司), Shaanxi Yushen Energy Development and Construction Group Co., Ltd.* (陝西榆神能源開發建設集團有限公司), and Yulin Yuyang District Energy Investment Co., Ltd.* (榆林市榆陽區能源投資有限責任公司) as to approximately 41.00%, 39.00%, 7.50%, 7.00%, and 5.50% equity interest, respectively. The ultimate beneficial owners of China Energy and Shaanxi Yanchang Petroleum Mining Co., Ltd. are the SASAC and the State-owned Assets Supervision and Administration Commission of the People's Government of Shaanxi Province, respectively.

The key financial data of Shenyan Coal's audited financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	12,898	11,671	11,710	12,208
Equity attributable to equity holders of the Company	11,100	9,625	6,723	9,614

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*

Profit attributable to equity holders of the Company	1,475	2,973	2,846	3,601

(8) Jinshen Energy

Jinshen Energy is a company established in the PRC with limited liability in 2004. It was initially formed through capital contributions by Shanxi Coal Sales Corporation (山西省煤炭運銷總公司) and China Energy (which at that time was Shenhua Group Corporation Limited), with capital contributions of RMB15.30 million (51%) and RMB14.70 million (49%), respectively. Jinshen Energy subsequently completed capital increases in 2005, 2009, and 2011, raising its registered capital to RMB574 million, with China Energy's cumulative capital contributions totaling approximately RMB267 million. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing, processing and sales, and a small amount of coal distribution. As at the Latest Practicable Date, Jinshen Energy is held by Shanxi Coal Transportation and Sales Group Co., Ltd.* (山西煤炭運銷集團有限公司) and China Energy as to 51.00% and 49.00% equity interest, respectively. The ultimate beneficial owners of Shanxi Coal Transportation and Sales Group Co., Ltd. and China Energy are the State-owned Assets Supervision and Administration Commission of the People's Government of Shanxi Province and the SASAC, respectively.

The key financial data of Jinshen Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*

Profit for the year/period	96	649	2,044	2,312
Profit attributable to equity holders of the Company	59	395	1,564	1,848

(9) Baotou Mining

Baotou Mining is a company established in the PRC with limited liability. Baotou Mining originated as Baotou Mining Bureau of Inner Mongolia Autonomous Region, established on 4 September 1980. In 1999, the entire Baotou Mining Bureau was transferred to China Energy (which at that time was Shenhua Group Corporation Limited) without consideration for unified management. On 18 January 2001, China Energy approved its restructuring into a limited liability company. Baotou Mining completed registration as a limited liability company on 20 April 2004 with registered capital of RMB67 million, and later increased its registered capital to approximately RMB2.38 billion. It operates in the road transportation industry and is mainly engaged in road transportation. As at the Latest Practicable Date, Baotou Mining is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Baotou Mining's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*

(10) Shipping Company

Shipping Company is a company established in the PRC with limited liability. In 2023, China Energy established its Shipping Company as a wholly-owned subsidiary with registered capital of RMB1 billion. It operates in the water transportation industry and is mainly engaged in water transportation. As at the Latest Practicable Date, Shipping Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Shipping Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	5,339	3,926	2,448	2,392
Equity attributable to equity holders of the Company	1,819	1,136	936	910

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	2,858	4,160	2,466	3,076
Profit/(loss) before income tax	245	267	(74)	263
Profit/(loss) for the year/ period	183	220	(76)	197
Profit/(loss) attributable to equity holders of the Company	183	200	(76)	127

(11) Coal Trading Company

Coal Trading Company is a company established in the PRC with limited liability. Coal Trading Company originated as the China Clean Coal Company Transportation & Sales Branch (中國精煤公司運銷分公司), established on 8 April 1985 with approval of the former State Planning Commission. It was renamed Huaneng Clean Coal Transportation & Sales Branch (華能精煤公司運銷分公司) in 1987 and re-registered in 1993 as an enterprise with registered capital of RMB8 million funded entirely by Huaneng Clean Coal Company (華能精煤公司). Following structural adjustments within China Energy (which at that time was Shenhua Group Corporation Limited), the company's affiliation was transferred to China Energy in 1995. The company undertook several rounds of capital increases and reductions. In 2013, it was converted into a single-shareholder limited liability company, with registered

and paid-in capital of RMB323 million, wholly owned by China Energy. It operates in the wholesale industry and is mainly engaged in coal sales and import/export, comprehensive utilisation and deep processing of coal, etc. As at the Latest Practicable Date, Coal Trading Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Coal Trading Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*	**As at 31 December 2022** *(Audited)*
Total assets	4,343	2,161	1,271	830

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*	**Year ended 31 December 2022** *(Audited)*
Revenue	2,432	9,124	5,433	3,773
Profit before income tax	40	91	59	74
Profit for the year/period	28	58	40	54
Profit attributable to equity holders of the Company	28	58	40	54

(12) Port Company

Port Company is a company established in the PRC with limited liability. In 2023, China Energy established Port Company as a wholly-owned subsidiary with registered capital of RMB100 million. It operates in the cargo handling and warehousing industry and is mainly engaged in removal of residual coal from railcars, coal sampling and sample preparation, and rapid coal quality testing. As at the Latest Practicable Date, Port Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Port Company's audited consolidated financial statements for the two financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 *(Audited)*	**As at 31 December 2024** *(Audited)*	**As at 31 December 2023** *(Audited)*

	Seven months ended 31 July 2025 *(Audited)*	**Year ended 31 December 2024** *(Audited)*	**Year ended 31 December 2023** *(Audited)*
Revenue	65	112	77
Profit before income tax	26	57	41
Profit for the year/period	20	42	30
Profit attributable to equity holders of the Company	20	42	30

Valuation and Pricing of the Target Companies

The transaction price is determined based on the valuation results set out in the Asset Valuation Reports issued respectively by China Enterprise Appraisal and China United Appraisal, both of which are qualified securities appraisal institutions, in respect of the value as at the Valuation Benchmark Date of 31 July 2025, and filed by China Energy, and was agreed upon by the parties to the Transaction on the basis of such filed valuation results. For further details of the Asset Valuation Reports of the Target Assets, please refer to the Appendix V.

Unit: RMB'000

Target Companies	Book Value A	Appraised Value of Total Shareholders' Equity B	Increase/ (Decrease) C=B-A	Appreciation Rate D=C/A	Equity Interest Percentage to be Transferred	Appraised Value of the Target Assets	Valuation Approach Adopted	Valuation Approach for Underlying Assets
Guoyuan Power	27,568,283.5	44,581,992.9	17,013,709.4	61.71%	100%	44,581,992.9	Asset-based approach	Long-term equity investments valued using asset-based approach or book value; buildings valued using cost and market approaches; equipment valued using replacement cost and market approaches; mining rights valued using discounted cash flow method; other assets and liabilities valued based on book values or actual obligations/rights.
Xinjiang Energy	9,491,294.8	12,121,427.6	2,630,132.8	27.71%	100%	12,121,427.6	Asset-based approach	Long-term equity investments valued using asset-based approach, quoted prices or net assets × shareholding ratio; buildings valued using cost and market approaches; equipment valued using cost method; construction in progress valued using cost method; land use rights valued using market comparison, cost and benchmark land price methods; mining rights valued using discounted cash flow method; other assets and liabilities based on book values or actual obligations/rights.
Chemical Company	17,114,677.5	24,950,534.1	7,835,856.6	45.78%	100%	24,950,534.1	Asset-based approach	Long-term equity investments valued using asset-based approach, income approach or book value; buildings valued using cost and market approaches; construction in progress valued using cost method; equipment valued using replacement cost and market approaches; intangible assets (land) valued using market comparison and cost approaches; other assets and liabilities based on book values or actual obligations/rights.

Target Companies	Book Value A	Appraised Value of Total Shareholders' Equity B	Increase/ (Decrease) C=B-A	Appreciation Rate D=C/A	Equity Interest Percentage to be Transferred	Appraised Value of the Target Assets	Valuation Approach Adopted	Valuation Approach for Underlying Assets
Wuhai Energy	11,621,321.4	14,214,293.3	2,592,971.9	22.31%	100%	14,214,293.3	Asset-based approach	Long-term equity investments valued using asset-based approach; buildings valued using cost and market approaches; shaft construction assets valued using cost method; equipment valued using cost method; construction in progress valued using cost method; land use rights valued using market comparison and benchmark land price adjustment methods; mining rights valued using discounted cash flow method; other assets and liabilities based on book values or actual obligations/ rights.
Pingzhuang Coal	2,284,963.9	5,583,809.3	3,298,845.4	144.37%	100%	5,583,809.3	Asset-based approach	Long-term equity investments valued using asset-based approach; buildings valued using cost method; shaft construction assets valued using cost method; equipment valued using cost method; construction in progress valued using cost method; land use rights valued using market comparison, cost and benchmark land price methods; mining rights valued using discounted cash flow method; other assets and liabilities based on book values or actual obligations/rights.

Target Companies	Book Value A	Appraised Value of Total Shareholders' Equity B	Increase/ (Decrease) C=B-A	Appreciation Rate D=C/A	Equity Interest Percentage to be Transferred	Appraised Value of the Target Assets	Valuation Approach Adopted	Valuation Approach for Underlying Assets
Inner Mongolia Construction Investment	-1,162,363.4	7,727,627.8	8,889,991.2	764.82%	100%	7,727,627.8	Asset-based approach	Equity investments valued using asset-based approach or book value; buildings valued using cost method; shaft construction assets valued using cost method; equipment valued using cost method; construction in progress valued using cost method; land use rights valued using market comparison and benchmark land price methods; mining rights valued using discounted cash flow method; other assets and liabilities based on book values or actual obligations/rights.
Shenyan Coal	10,749,924.1	18,760,260.1	8,010,336.0	74.52%	41%	7,691,706.6	Asset-based approach	Long-term equity investments valued using income approach; buildings valued using cost method; equipment valued using cost method; construction in progress valued using cost method; land use rights valued using market approach; mining rights valued using discounted cash flow method; other assets and liabilities based on book values or actual obligations/rights.
Jinshen Energy	5,233,925.0	7,715,759.7	2,481,834.7	47.42%	49%	3,780,722.3	Asset-based approach	Long-term equity investments valued using asset-based approach or net assets × shareholding ratio; buildings valued using cost and market approaches; equipment valued using cost method; other assets and liabilities based on book values or actual obligations/rights.
Baotou Mining	4,404,800.4	4,542,612.8	137,812.4	3.13%	100%	4,542,612.8	Income approach	/

Target Companies	Book Value A	Appraised Value of Total Shareholders' Equity B	Increase/ (Decrease) C=B-A	Appreciation Rate D=C/A	Equity Interest Percentage to be Transferred	Appraised Value of the Target Assets	Valuation Approach Adopted	Valuation Approach for Underlying Assets
Shipping Company	1,818,825.8	2,141,796.5	322,970.7	17.76%	100%	2,141,796.5	Asset-based approach	Long-term equity investments valued using asset-based approach; equipment valued using replacement cost and market approaches; other assets and liabilities based on book values or actual obligations/rights.
Coal Trading Company	750,560.8	861,026.1	110,465.3	14.72%	100%	861,026.1	Asset-based approach	Long-term equity investments valued using asset-based approach; buildings valued using market approach or book value; other assets and liabilities based on book values or actual obligations/rights.
Port Company	191,699.0	473,598.5	281,899.5	147.05%	100%	473,598.5	Income approach	/
Total	90,067,912.8	143,674,738.7	53,606,825.9	59.52%	/	128,671,147.8		

The valuations of the Target Companies were each, in principle, conducted by adopting the asset-based approach and income approach. Having taken into account the applicability of the appraisal methodology and the purpose of such valuation, the value conclusions of Baotou Mining and Port Company were selected based on the valuation results under the income approach, while the value conclusions of the remaining Target Companies were selected based on the valuation results under the asset-based approach (under which the discounted cash flow method was applied for certain core assets). As both the asset-based approach (which involved the use of the discounted cash flow method for certain core assets) and the income approach were adopted in the valuations, the valuations constitute profit forecast under Rule 14.61 of the Hong Kong Listing Rules ("**Profit Forecast**"), and the Company has fully complied with Rule 14.60A of the Hong Kong Listing Rules.

The principal assumptions underlying the Profit Forecast are set out in the Asset Valuation Reports included in Appendix V to this circular. Ernst & Young, the reporting accountant of this Transaction, issued a report on the arithmetical accuracy of the calculation of the discounted future cash flow contained in the valuation reports. The report from Ernst & Young was set out in the section headed "Further Information in Relation to the Target Assets". The Board also confirmed that Profit Forecast was made after due and careful enquiry, and the Board's letter regarding this forecast was set out on page 88 in the section headed "Further Information in Relation to the Target Assets".

4. Performance Commitment and Compensation Arrangements

On 19 December 2025, the Company, China Energy and Western Energy entered into the Performance Compensation Agreement in respect of the mining rights assets and the equity interests in certain subsidiaries and associates which were valued and priced using the income approach for the purposes of the Transaction. In addition, for those assets valued using the market approach under the Transaction, such as buildings and other assets, China Energy and Western Energy issued to the Company the Impairment Compensation Undertaking Letter dated 19 December 2025. Further details of the performance commitments and the related compensation arrangements are set out below.

A. Performance Commitment and Compensation Arrangements for the Income Approach-Priced Portion

(A) Scope and Term of Performance Commitment

According to the Performance Compensation Agreement, except for the mining rights asset groups under Xinjiang Energy, Wuhai Energy and Jinshen Energy, the performance commitment period (the "**Performance Commitment Period**") under the Transaction shall be the year in which the Transaction is completed (i.e., the year in which the industrial and commercial registration of the change in equity interests of the Target Companies is completed), and the two subsequent financial years, namely 2026, 2027 and 2028. To fully protect the interests of minority Shareholders, the Performance Commitment Period for the mining rights asset groups under Xinjiang Energy, Wuhai Energy and Jinshen Energy shall comprise the year in which the Transaction is completed (i.e., the year in which the industrial and commercial registration of the change in equity interests of the Target Companies is completed) and the subsequent five financial years, being 2026, 2027, 2028, 2029, 2030 and 2031. If the completion of the Transaction is delayed, the Performance Commitment Period shall be correspondingly extended.

The scope of the performance undertakings under the Transaction covers the mining rights asset groups, the equity interests in controlling subsidiaries and the equity interests in associates that were valued and priced using the income approach. The details are as follows:

Unit: RMB'000

No.	Target Companies	Performance Commitment Assets	Transaction Consideration
1	Guoyuan Power	Mining rights asset group	13,501,916.7
2	Xinjiang Energy	Mining rights asset group	4,665,266.9
3	Chemical Company	Equity asset: 30% equity interest in Shaanxi Energy Liangshuijing Mining Co., Ltd. (陝西能源涼水井礦業有限責任公司) held by Chemical Company	3,824,441.0
		Mining rights asset: the 35% mining right interest in the Chaoyang open-pit coal mine (朝陽露天煤礦) of Guoneng Baoqing Coal, Power and Chemical Co., Ltd. (國能寶清煤電化有限公司) held by Chemical Company	503,907.3
		Chemical Company subtotal	4,328,348.3
4	Wuhai Energy	Mining rights asset group	4,673,488.8
5	Pingzhuang Coal	Mining rights asset group	6,653,527.0
6	Inner Mongolia Construction Investment	Mining rights asset: Chahasu Coal Mine (察哈素煤礦)	9,405,929.3
7	Shenyan Coal	Mining rights asset: Xiwan open-pit coal mine in Shenmu City (神木市西灣露天煤礦)	3,941,253.7
		Equity asset: 30% equity interest in Shaanxi Hongqi Shenyan Chemical Engineering Co., Ltd. (陝西紅旗神延化工工程有限公司) held by Shenyan Coal	5,555.3
		Shenyan Coal subtotal	3,946,809.0
8	Jinshen Energy	Mining rights asset group	1,186,555.4
9	Baotou Mining	Equity asset:100% equity interest in Baotou Mining	4,542,612.8
10	Port Company	Equity asset:100% equity interest in Port Company	473,598.5

Note: For the performance commitment assets mentioned above, the transaction consideration attributable to the assets held by Shenyan Coal and Jinshen Energy has already taken into account the equity impact arising from their indirect shareholdings.

(B) Parties to the Performance Commitment

The parties to the performance commitments for the Transaction are China Energy and Western Energy (the "**Performance Commitment Parties**"). Among them, in respect of the performance commitment assets relating to Guoyuan Power, Xinjiang Energy, Chemical Company, Wuhai Energy, Pingzhuang Coal, Shenyan Coal, Jinshen Energy, Baotou Mining and Port Company, the obligations for performance compensation and impairment compensation shall be borne by China Energy as the compensating obligor. For the performance commitment assets relating to Inner Mongolia Construction Investment, the obligations for performance compensation and impairment test compensation shall be borne by Western Energy as the compensating obligor.

(C) Performance Commitment Amount

(1) Mining Rights Asset Group

The performance commitment for the mining rights asset group under the Transaction shall adopts the method of committing to the cumulative forecasted net profit. Based on the valuation results under the asset-based approach in the Asset Valuation Reports and the corresponding valuation situation in the Mining Right Valuation Report, and as confirmed by the valuation institutions, the arrangement for the performance commitment amounts in respect of the mining rights asset group is as follows: if the Transaction is completed in 2026, China Energy and Western Energy commit that, except for Xinjiang Energy, Wuhai Energy and Jinshen Energy, the cumulative net profits achieved by each mining right asset group of the other Target Companies during the Performance Commitment Period is as follows:

Unit: RMB'000

No.	Target Companies	Performance Commitment Assets	2026	2027	2028	Cumulative Committed Net Profits of Mining Rights
1	Guoyuan Power	Mining rights asset group	1,507,243.5	1,623,700.8	1,539,016.5	4,669,960.8
2	Chemical Company	Mining rights asset: the 35% mining right interest in the Chaoyang open-pit coal mine of Guoneng Baoqing Coal, Power and Chemical Co., Ltd. held by Chemical Company	58,274.8	65,701.9	73,343.6	197,320.3

No.	Target Companies	Performance Commitment Assets	2026	2027	2028	Cumulative Committed Net Profits of Mining Rights
3	Pingzhuang Coal	Mining rights asset group	867,649.8	909,911.0	1,447,155.4	3,224,716.2
4	Inner Mongolia Construction Investment	Mining right asset: Chahasu Coal Mine	679,216.0	814,448.1	949,584.1	2,443,248.2
5	Shenyan Coal	Mining right asset: Xiwan open-pit coal mine in Shenmu City	553,273.1	576,456.3	559,122.1	1,688,851.5

Note 1: The committed net profit for the current period of the mining rights asset group for the current period = ∑ (the forecast net profit for the current year of the mining rights asset within the scope of the performance commitment assets (being the net profit after deducting non-recurring gains and losses) × the percentage of equity interest to be injected into the company to which such mining rights asset belongs under the Transaction), and the same shall apply below. In addition, for the assets held by Shenyan Coal within the above performance commitment assets, the committed net profit amounts have taken into account the equity impact under the indirect shareholding scenario.

Note 2: The forecast net profit of each mining rights asset for the current year = the operating revenue for the year that is directly related to the mining rights – the total costs directly related to the mining rights (including operating costs, period expenses and depreciation and amortisation, etc.) – the sales taxes and surcharges directly related to the mining rights – the income tax expenses directly related to the mining rights. The relevant parameters are estimated in accordance with the Guiding Opinions on the Determination of Parameters for Mining Rights Valuation. The amortisation referred to above includes only the amortisation expenses related to mining rights (such as land use rights) and does not include the amortisation of the mining rights assets themselves or the authorisation of the costs of coal production capacity replacement indicators. The same shall apply below.

If the Transaction is completed in 2026, China Energy undertakes that the cumulative net profits to be achieved during the Performance Commitment Period by each mining rights asset group under Xinjiang Energy, Wuhai Energy and Jinshen Energy shall be as follows:

Unit: RMB'000

No.	Target Companies	Performance Commitment Assets	2026	2027	2028	2029	2030	2031	Cumulative Committed Net Profits of Mining Rights
1	Xinjiang Energy	Mining rights asset group	-727,543.2	176,790.4	812,877.6	1,131,521.6	1,460,560.7	2,404,683.2	5,258,890.2
2	Wuhai Energy	Mining rights asset group	-169,897.7	20,500.7	628,765.9	596,057.5	862,361.5	686,783.9	2,624,571.8
3	Jinshen Energy	Mining rights asset group	-140,681.0	-7,298.7	230,540.6	357,726.6	357,726.6	357,726.6	1,155,740.6

Note: For the assets held by Jinshen Energy within the above performance commitment assets, the committed net profit amounts have taken into account the equity impact under the indirect shareholding scenario.

(2) Equity Asset Group

The performance commitment amount for the equity assets is as follows: if this Transaction is completed in 2026, China Energy commits that the net profits to be achieved by each equity asset in 2026, 2027 and 2028 shall be as follows:

Unit: RMB'000

No.	Target Companies	Performance Commitment Assets	2026	2027	2028
1	Chemical Company	30% equity interest in Shaanxi Energy Liangshuijing Mining Co., Ltd. held by Chemical Company	253,270.2	294,336.8	335,765.6
2	Shenyan Coal	30% equity interest in Shaanxi Hongqi Shenyan Chemical Engineering Co., Ltd. held by Shenyan Coal	1,575.2	1,588.9	1,600.9
3	Baotou Mining	100% equity interest in Baotou Mining	40,548.9	35,649.7	32,992.5

No.	Target Companies	Performance Commitment Assets	2026	2027	2028
4	Port Company	100% equity interest in Port Company	34,670.1	33,441.8	32,151.9

Note: The committed net profit amount for the equity assets for the current year = the forecast net profit for the current year of the company within the scope of the performance commitment assets (being the net profit after deducting non-recurring gains and losses) × the equity interest percentage injected into such company under the Transaction. In addition, for the assets held by Shenyan Coal within the above performance commitment assets, the committed net profit amount has taken into account the equity impact under the indirect shareholding scenario.

(D) Performance Compensation and Impairment Test for the Income Approach-Priced Portion

(1) Determination of Realised Net Profit for the Current Period

For the mining rights asset group, after the completion of the Transaction, the Company shall, at the end of the last accounting year of the Performance Commitment Period, engage a qualified accounting firm to conduct a special audit of the actual cumulative realised net profit, after deducting non-recurring gains and losses, of each mining rights asset group prepared with reference to the calibre adopted in the mining rights valuation reports (the "**Actual Cumulative Realised Net Profit of the Mining Rights Asset Groups**") and issue a special audit report. Based on such report, the parties shall determine the difference between the cumulative realised net profit of each mining rights asset group and its cumulative committed net profit amount. In addition, after the end of each accounting year during the Performance Commitment Period of the Transaction, the Company shall engage a qualified accounting firm to review the difference between the actual net profit for the year and the committed net profit for the year for each mining rights asset group during the Performance Commitment Period and issue a special audit report. The Performance Commitment Parties shall, based on the results of the special audit report, bear the corresponding performance compensation obligations and compensate the Company in accordance with the agreed compensation method.

For the equity assets, after the completion of the Transaction, the Company shall, at the end of each accounting year during the Performance Commitment Period, engage a qualified accounting firm to conduct a special audit of the realised net profit for the current period of each equity asset and issue a special

audit report. Based on such report, the parties shall determine the difference between the cumulative realised net profit of each equity asset up to the end of the current period and the cumulative committed net profit of each equity asset up to the end of the current period. The Performance Commitment Parties shall, based on the results of the special audit report, bear the corresponding performance compensation obligations and compensate the Company in accordance with the agreed compensation method.

(2) Method of Performance Compensation

After the completion of the Transaction, for the mining rights asset group, if, at the end of the last accounting year of the Performance Commitment Period, the cumulative realised net profit of any mining rights asset group fails to reach the cumulative committed net profit, the Performance Commitment Parties shall compensate the Company in accordance with the provisions of the Performance Compensation Agreement. For the equity assets, if, at the end of each accounting year during the Performance Commitment Period, the cumulative realised net profit of any equity asset up to the end of the current period fails to reach its cumulative committed net profit up to the end of the current period, the Performance Commitment Parties shall compensate the Company in accordance with the provisions of the Performance Compensation Agreement.

Among them, China Energy shall first compensate the Company with the Shares of the Company it acquires under the Transaction, and any shortfall shall be compensated in cash. Western Energy shall compensate the Company in cash.

(a) Share Compensation

Where the Performance Commitment Parties compensate the Company with the Shares of the Company obtained under the Transaction, the number of Shares to be compensated shall be calculated as follows:

For any mining rights asset group: Number of Shares to be compensated by the Performance Commitment Parties = (cumulative committed net profit – cumulative realised net profit) ÷ cumulative committed net profit × the transaction consideration of the relevant performance commitment asset held by the Performance Commitment Parties ÷ the issuance price of the Consideration Shares under the Transaction;

For any equity asset: Number of Shares to be compensated by the Performance Commitment Parties for the current period = (cumulative committed net profit up to the end of the current period – cumulative realised net profit up to the end of the current period) ÷ the total committed net profit × the transaction consideration of the relevant performance commitment asset held by the Performance Commitment Parties ÷ the issuance price of the Consideration Shares under the Transaction – the number of Shares already compensated.

In the case of annual compensation, if the calculated number of Shares to be compensated for any period is less than zero, such number shall be taken as zero, and no Shares already compensated shall be reversed.

(b) Cash Compensation

Where China Energy, as a Performance Commitment Party, is unable to fully compensate with the Shares of the Company it holds (including but not limited to reasons such as the Company's shares being frozen, subject to compulsory enforcement, restricted from transfer or non-transferable for other reasons or the transfer of corresponding shares resulting in insufficient holdings) leading to inadequate compensation, the shortfall shall be compensated to the Company in cash. The calculation method for the cash compensation is as follows:

For any mining rights asset group: Cash compensation amount payable by the Performance Commitment Party = (cumulative committed net profit – cumulative realised net profit) ÷ cumulative committed net profit × the transaction consideration of the relevant performance commitment asset held by the Performance Commitment Party – (number of Shares already compensated × the issuance price of the Consideration Shares under the Transaction);

For any equity asset: Cash compensation amount payable by the Performance Commitment Party for the current period = (cumulative committed net profit up to the end of the current period – cumulative realised net profit up to the end of the current period) ÷ the total committed net profit × the transaction consideration of the relevant performance commitment assets held by the Performance Commitment Party – (number of Shares already compensated × the issuance price of the Consideration Shares under the Transaction) – the cash amount already compensated.

Where Western Energy is the Performance Commitment Party, the calculation method for cash compensation is as follows:

Cash compensation amount payable by the Performance Commitment Party = (cumulative committed net profit – cumulative realised net profit) ÷ cumulative committed net profit × the transaction consideration of the relevant performance commitment asset held by the Performance Commitment Party.

When performing calculations according to the above formulas, the following shall be followed:

The portion of cash dividends attributable to the Shares that are required to be compensated by the Performance Commitment Parties and received during the period from the completion date of the Transaction to the date of share compensation shall also be compensated to the Company.

If, during the Performance Commitment Period, the Company distributes bonus Shares or converts capital reserves into share capital, resulting in a change in the number of Shares held by the Performance Commitment Parties, the number of Shares required to be compensated shall be adjusted accordingly: The number of Shares to be compensated by the Performance Commitment Parties for the current period (after adjustment) = the number of Shares to be compensated for the current period (before adjustment) × (1 + bonus share issuance or conversion ratio).

The number of Shares to be compensated for the current year calculated under the above formulas shall be accurate to a whole Share. If the calculation result contains any decimal portion, such decimal portion shall be discarded and the integer part shall be taken, and any remaining consideration corresponding to less than one Share shall be compensated in cash by the Performance Commitment Parties.

(3) Implementation of Compensation

(a) Share Compensation

After the issuance of the special audit report for the current year of the performance commitment assets (for mining right assets, this refers to the last accounting year of the Performance Commitment Period; for equity assets, this refers to each accounting year of the Performance Commitment Period; the same applies below), if circumstances specified in the Performance Compensation Agreement occur that require the Performance Commitment Parties to compensate the Company with shares, within 10 working days after the disclosure of the special audit report, the Board of the Company shall calculate and determine the number of Shares to be compensated by each compensating obligor in accordance with the Performance Compensation Agreement, and shall notify the Performance Commitment Parties in writing.

The Company shall, within 30 days after the publication of the annual report for the year in which the Performance Commitment Parties are required to make compensation, convene a meeting of the Board to resolve that the compensation Shares held by the Performance Commitment Parties shall be repurchased by the Company at a total consideration of RMB1.00 and cancelled. After the Board has passed such resolution, the Company shall promptly issue a notice to convene a Shareholders' meeting.

If the Shareholders' meeting of the Company approves the share repurchase and cancellation plan, the Board of the Company shall calculate and determine the number of shares to be compensated by the Performance Commitment Parties for the current year according to the prescribed formula, and simultaneously issue a written notice to the Performance Commitment Parties regarding the performance of the compensation obligation. The corresponding compensation shares shall be repurchased at a total price of RMB1.00 and subsequently cancelled. The Performance Commitment Parties shall, within 20 working days from the date of receiving the written notice from the Board of the Company, transfer all the shares to be compensated to the dedicated account designated by the Board of the Company, and cooperate with the Company in the cancellation of such shares. If circumstances specified in the Performance Compensation Agreement occur requiring the simultaneous compensation of cash dividends, the

Performance Commitment Parties shall, on the same day as transferring the compensation shares to the dedicated account designated by the Board of the Company pursuant to the foregoing provision, pay the cash dividends corresponding to the number of compensation shares for the current period to the bank account designated by the Company.

If the Shareholders' meeting of the Company does not approve the share repurchase and cancellation plan and decides not to repurchase the compensation shares, then the Board of the Company shall, within 10 working days after the announcement of the Shareholders' meeting resolution, issue a written notice to the Performance Commitment Parties. The Performance Commitment Parties shall, within 20 working days after receiving the written notice from the Board of the Company, and on the premise of complying with relevant securities regulatory laws, rules and regulatory requirements, donate all the shares to be compensated to the other Shareholders of the Company (excluding the Performance Commitment Parties) as registered on the record date determined by the Board of the Company at that time. The other Shareholders shall receive the donated shares in proportion to their respective shareholdings in the issued Shares of the Company on the record date after deducting the Shares held by the Performance Commitment Parties. If laws, regulations or regulatory authorities have other provisions or requirements regarding the repurchase of compensation shares at that time, such provisions or requirements shall be followed.

The Performance Commitment Parties shall, according to the requirements of the Company, sign relevant written documents and cooperate with the Company in handling matters related to the share repurchase and cancellation under the Performance Compensation Agreement, including but not limited to the Performance Commitment Parties assisting the Company in notifying the securities depository and clearing corporation, etc.

The Performance Commitment Parties commit to ensuring that the Consideration Shares are prioritised for fulfilling the Performance Compensation obligations, and shall not evade compensation obligations through means such as pledging shares. If the Consideration Shares are pledged in the future, the Performance Commitment Parties shall provide written notice to the pledgee regarding the potential Performance Compensation obligation attached to the Consideration Shares under the Performance Compensation Agreement, and shall make clear agreements with the pledgee in the pledge agreement regarding the use of the Consideration Shares for paying Performance Compensation.

(b) Cash Compensation

If it is determined pursuant to the Performance Compensation Agreement that the Performance Commitment Parties, as the compensating obligors, need to provide cash compensation to the Company, within 10 working days after the disclosure of the special audit report for the current year, the Board of the Company shall calculate and determine the cash compensation amount in accordance with the Performance Compensation Agreement and notify the Performance Commitment Parties in writing. The Performance Commitment Parties shall, within 10 working days from the date of receiving the written notice for cash compensation issued by the Company, remit the cash compensation amount in a lump sum to the bank account designated by the Company.

(4) Impairment Test

Upon the expiry of the Performance Commitment Period, the Company shall conduct an impairment test on the performance commitment assets, and an auditing institution with the corresponding qualifications shall issue a special audit opinion on the results of such impairment test. If, at the end of the Performance Commitment Period, the impairment amount of any performance commitment asset > the total number of Shares already compensated during the Performance Commitment Period × the issuance price of the Consideration Shares under the Transaction + the total cash amount already compensated during the Performance Commitment Period, the Performance Commitment Parties shall additionally compensate the Company for the difference.

The impairment amount of any performance commitment asset shall be calculated as the transaction consideration of such performance commitment asset minus its assessed value at the end of the period, and adjusted for the impact of capital increases, capital reductions, donations received and profit distributions related to such performance commitment asset during the Performance Commitment Period. Where the cumulative present value of net cash flows of a mining rights asset is negative, the impairment amount shall be calculated as the actual present value of net cash flows minus the appraised value of the relevant performance commitment asset at the end of the period, after adjusting for the effects of capital increases, capital reductions, donations received and profit distributions relating to such asset during the Performance Commitment Period.

The assessed value of the performance commitment assets at the end of the period = ∑ (the assessed value of each individual mining right/each individual company within the scope of the performance commitment assets at the end of the period × the equity interest percentage held in such asset by the Target Company to which the asset belongs). The impairment amount of the performance commitment assets held by the Performance Commitment Parties at the end of the period = the impairment amount of the performance commitment asset at the end of the period × the relevant counterparty's shareholding ratio in the Target Company prior to the Transaction.

When making additional compensation, China Energy shall first compensate with the Shares it obtains in the Transaction, and any shortfall shall be compensated in cash. Western Energy shall compensate in cash.

The number of shares requiring additional compensation = impairment amount of the performance commitment assets held by the Performance Commitment Parties at the end of the period ÷ the issuance price of the Consideration Shares under the Transaction– the total number of shares already compensated during the Performance Commitment Period.

The cash amount requiring additional compensation = impairment amount of the performance commitment assets held by the Performance Commitment Parties at the end of the period – the issuance price of the Consideration Shares under the Transaction × the total number of Shares already compensated during the Performance Commitment Period – the total cash amount already compensated during the Performance Commitment Period.

The Company shall conduct the impairment test within 30 working days after the disclosure of the annual report for the final year of the Performance Commitment Period. The Performance Commitment Parties shall, after the formal issuance of the special audit opinion on the impairment test, perform the relevant compensation in accordance with the implementation arrangements for performance compensation.

(5) Compensation Cap

The number of Shares to be compensated by the Performance Commitment Parties for any Performance Commitment Asset shall be capped at the total number of Shares of the Company obtained by the Performance Commitment Parties under the Transaction in respect of the disposal of the equity interest in the Target Company to which such performance commitment asset belongs (including any additional Shares of the Company obtained by the Performance Commitment Parties during the Performance Commitment Period as a result of bonus issue, capitalisation of capital reserves or similar events implemented by the Company).

The aggregate value of the Share compensation and cash compensation paid by the Performance Commitment Parties to the Company for any performance commitment asset shall not exceed the transaction consideration of such performance commitment asset (excluding the circumstances where the Performance Commitment Parties compensate the Company with the additional Shares of the Company acquired during the Performance Commitment Period as a result of dividend distributions, bonus issue or capitalisation of capital reserves by the Company, and the cash dividends received during the Performance Commitment Period).

(6) Liability for Late Payment

If the Performance Commitment Parties fail to complete the compensation within the prescribed period as agreed in the Performance Compensation Agreement, they shall continue to perform their compensation obligations and shall pay to the Company interest on the overdue compensation amount at a daily rate of 0.05%.

B. Impairment Compensation Arrangement for the Market Approach-Priced Portion

Given that certain assets of the Target Companies which were assessed under the asset-based approach were valued using the market approach (the "**Target Tested Assets**"), and in order to fully protect the interests of the Company, China Energy and Western Energy have provided the Company with the Impairment Compensation Undertaking Letter regarding in respect of certain assets valued using the market approach in the Transaction, including buildings and other relevant assets:

(A) Scope of Impairment Compensation Assets

The asset groups comprising the Target Tested Assets are as follows:

Unit: RMB'000

Target Companies	Shareholding Percentage of the Counterparty in the Target Company	Assets Type	Book Value	Assessed Value	Assessed Value Calculated Based on the Target Company's Equity Interest Percentage in the Underlying Impairment Compensation Assets
Guoyuan Power	100%	Asset group 1: 13 items of buildings	200,423.4	1,159,432.7	1,089,147.1
		Asset group 2: 1 item of land	74,967.3	49,254.6	34,478.2
Xinjiang Energy	100%	Asset group 1: 19 items of buildings	447,836.7	591,048.3	591,048.3
		Asset group 2: 63 items of land	490,620.0	517,104.6	409,268.7
Chemical Company	100%	Asset group 1: 5 items of buildings	318,328.7	404,416.6	319,887.8
		Asset group 2: 10 items of land	1,413,483.0	1,623,618.4	1,570,318.2
Wuhai Energy	100%	Asset group 1: 5 items of buildings	1,492.4	7,385.6	7,385.6
		Asset group 2: 21 items of land	124,144.7	112,233.9	97,446.9
Pingzhuang Coal	100%	Asset group 1: 1 items of buildings	995.5	938.4	478.6
		Asset group 2: 10 items of land	2,494,759.5	2,511,600.9	1,280,916.5

Target Companies	Shareholding Percentage of the Counterparty in the Target Company	Assets Type	Book Value	Assessed Value	Assessed Value Calculated Based on the Target Company's Equity Interest Percentage in the Underlying Impairment Compensation Assets
Inner Mongolia Construction Investment	100%	Asset group: 14 items of land	461,449.5	460,064.5	460,064.5
Shenyan Coal	41%	Asset group: 2 item of land	151,053.4	167,647.8	68,735.6
Jinshen Energy	49%	Asset group 1: 2 items of buildings	9,985.8	15,513.1	7,601.4
		Asset group 2: 24 items of land	66,973.6	125,629.6	55,729.2
Shipping Company	100%	Asset group 1: 24 items for buildings	24,209.3	35,627.4	21,376.4
		Asset group 2: 27 items for ships	3,091,207.0	3,408,670.0	2,979,770.0
Coal Trading Company	100%	Asset group: 34 items of buildings	22,160.7	122,676.6	122,676.6

Note 1: In calculating the assessed value corresponding to the Target Company's equity interest percentage in the underlying impairment compensation assets, the equity impact arising from the Counterparties' non-wholly-owned shareholding in Shenyan Coal and Jinshen Energy has been taken into account.

Note 2: Guoyuan Power and the Chemical Company hold 55% and 35% equity interests, respectively, in Guoneng Baoqing Coal Power & Chemical Co., Ltd. In the table above, for the single building asset located in Baoqing County, Shuangyashan City, Heilongjiang Province, which is held under Guoneng Baoqing Coal Power & Chemical Co., Ltd., the undertaking for impairment compensation is presented separately based on their respective equity interest percentages. Substantively, it relates to the same building asset.

(B) Impairment Compensation Commitment Parties

The parties undertaking the impairment compensation are China Energy and Western Energy.

(C) Impairment Compensation Period

The year in which the Transaction is completed and the two subsequent accounting years shall constitute the impairment compensation period (the "**Impairment Compensation Period**").

(D) Impairment Compensation Amount

At the end of each accounting year during the Compensation Period, China Energy and Western Energy agree that the Company shall conduct impairment testing on the Target Tested Assets, with impairment testing carried out separately for each asset group. A qualified intermediary institution shall be engaged to issue an impairment test report, and the results of the asset impairment test shall be based on such impairment test report. The impairment amount of each asset group of the Target Tested Assets at the end of the period = the transaction consideration of the relevant asset group – the assessed value of the asset group during the Impairment Compensation Period. The impairment amount at the end of the period equals the aggregate impairment amount at the end of the period for all asset groups of the Target Tested Assets. The aforementioned impairment amount at the end of the period shall take into account the relevant shareholding ratio and shall be adjusted for the impact of capital increases, capital reductions, donations received, profit distributions and the natural reduction in useful life of the Target Tested Assets.

If any asset group of the Target Tested Assets transferred by China Energy and Western Energy incurs an impairment amount at the end of the period (for the avoidance of doubt, the impairment of assets within any asset group shall be calculated on a consolidated basis), China Energy and Western Energy shall compensate the Company. The compensation amount payable for the current year = the impairment amount at the end of the current period (after taking into account the shareholding ratio) – the amount already compensated during the Impairment Compensation Period. The cumulative amount of impairment compensation payable by China Energy and Western Energy in respect of the Target Tested Assets shall not exceed the transaction consideration obtained by China Energy and Western Energy for such Target Tested Assets under the Transaction.

(E) Method of Impairment Compensation

China Energy shall first use the Shares issued to China Energy by the Company under the Transaction for compensation. If such Shares are insufficient, China Energy shall compensate in cash. Western Energy shall compensate in cash. If Shares are used for compensation, the number of Shares to be compensated by China Energy for the current year = the compensation amount payable by China Energy for the current year/ the issuance price of the Consideration Shares under the Transaction. If the Company undergoes ex-rights, ex-dividends or other similar events during the Impairment Compensation Period, the number of Shares or the price used for compensation shall be adjusted accordingly. If compensation is made in Shares, the Company has the right, upon the Board/Shareholders' approval of the repurchase and cancellation plan, to repurchase and cancel the Shares to be compensated by China Energy at a consideration of RMB1.00. If the repurchase and cancellation of such shares cannot be implemented (including due to failure to obtain approval from the Board/ Shareholders), the Company shall have the right to require China Energy to donate the compensation shares to other Shareholders of the Company or to adopt other compensation methods.

The Company will comply with the applicable disclosure requirements under Rule 14.36B and Rule 14A.63 of the Hong Kong Listing Rules in the event that any performance commitments set out in the Performance Compensation Agreement is not met by China Energy and Western Energy.

5. Pre-reorganisation

To enhance the quality of the Target Companies, focus their operations on core businesses, improve synergies with the Company, and protect the interests of all Shareholders, a series of pre-reorganisation measures were implemented prior to the Transaction under the overall planning of China Energy. Specifically, China Energy has resolved to divest certain low-efficiency assets or assets with limited relevance to the principal businesses held by Guoyuan Power, Xinjiang Energy, Wuhai Energy, Pingzhuang Coal and Baotou Mining. The divested assets mainly include closed or low-efficiency mining rights and new energy assets. In addition, the E-commerce Company is no longer included in the scope of the Target Assets for the Transaction.

As at 31 July 2025, the divested assets had an aggregate net asset value of RMB15,427.30 million; and for the year ended 31 December 2024, the divested assets recorded an aggregate net loss of RMB889.24 million (the above figures are unaudited and calculated in accordance with the PRC Accounting Standards for Business Enterprises).

PROPOSED ISSUANCE OF A SHARES TO RAISE SUPPORTING FUNDS

The Company proposes to issue New A Shares to no more than 35 qualified specific investors. The total amount of supporting funds to be raised shall not exceed 100% of the consideration to be paid by way of issuance of A Shares under the Transaction and the number of New A Shares to be issued shall not exceed 30% of the total share capital of the Company upon completion of the issuance of Consideration Shares. All target subscribers shall subscribe for New A Shares to be issued under the Proposed Issuance of A Shares at the same price in cash. After review by the SSE and registration approval by the CSRC, the number of A Shares to be issued will be determined based on the results of price inquiry.

The Proposed Issuance of A Shares is conditional on the implementation of the Transaction while the Transaction is not conditional on the completion of the Proposed Issuance of A Shares.

The details of the Proposed Issuance of A Shares are as follows:

Type, Par Value and Listing Venue of Shares to be Issued	Domestic listed ordinary shares denominated in RMB (A Shares) with a par value of RMB1.00 per Share, which will be listed on the SSE. New A Shares to be issued will rank pari passu in all respects with the A Shares in issue at the time of the issuance of such New A Shares.
Issue Method, Target Subscriber, and Subscription Method	The Company intends to issue New A Shares to no more than 35 specific subscribers by way of price enquiry to raise supporting funds. The target subscribers are legal persons, natural persons, or other legitimate investment organisations that meet the conditions specified by the CSRC. As at the Latest Practicable Date, the Company expected that the New A Shares will be issued to subscribers who and whose ultimate beneficial owners are third parties independent of the Company and its connected persons, and none of them will become substantial Shareholders upon completion of their respective subscriptions of New A Shares. The Proposed Issuance of A Shares will be subject to compliance with the public float requirements under the Hong Kong Listing Rules.

Pricing Basis, Pricing Benchmark Date and Issuance Price for Shares to be Issued

Pursuant to the Administrative Measures for the Registration of Securities Offerings of Listed Companies and other applicable regulatory requirements, the pricing benchmark date for the Proposed Issuance of A Shares is the first day of the issuance period of New A Shares as required under the applicable regulatory provisions, and the issuance price will not be less than 80% of the average trading price of the Company's A Shares for the 20 trading days prior to the pricing benchmark date, and shall not be less than the latest audited net assets per Share attributable to shareholders of the Company as at the time of issuance as calculated in accordance with the PRC Accounting Standards for Business Enterprises (subject to corresponding adjustments if the Company has any ex-rights and ex-dividend events, such as distribution of dividend, bonus issue, capitalisation issue or rights issue, during the period from the balance sheet date for its latest audited financial report to the pricing benchmark date). After the Proposed Issuance of A Shares has been reviewed by the SSE and registered and consented with the CSRC, the specific issuance price will be determined by the Board with the authorisation of the general meeting in accordance with the requirements of the relevant laws, administrative regulations and normative documents and in consultation with the financial adviser (being lead underwriter) for the Proposed Issuance of A Shares based on price enquiry.

The Board will ensure that the issuance price of the New A Shares, as well as the adjusted issue price (if applicable), shall under no circumstances represent a discount of 20% or more to the benchmarked price as defined under Rule 13.36(5) of the Hong Kong Listing Rules.

Number of Shares to be Issued

The number of New A Shares to be issued = The amount of supporting funds to be raised ÷ The issuance price per New A Share. If the calculation result of the number of Shares to be issued is less than one Share, it shall be rounded down.

The total amount of supporting funds to be raised shall not exceed RMB20,000 million and the number of New A Shares to be issued shall not exceed 30% of the total share capital of the Company upon completion of the Transaction, such 30% cap being a regulatory upper limit prescribed under the Administrative Measures for the Registration of Securities Offerings of Listed Companies (《上市公司證券發行註冊管理辦法》) and not implying that the Company intends to issue New A Shares up to such level. All target subscribers shall subscribe for New A Shares to be issued under the Proposed Issuance of A Shares at the same price in cash. After being reviewed by the SSE and registered with the CSRC, the number of shares to be issued under the Proposed Issuance of A Shares will be determined based on the results of price inquiry.

Lock-up Period

The target subscribers under the Proposed Issuance of A Shares shall not transfer the New A Shares within six months from the completion date of issuance of the New A Shares. From the listing date of the A Shares issued to the unlocking date of such shares, if the target subscribers acquire additional Shares of the Company as a result of the ex-rights and ex-dividend events of the Company, such as capitalisation of capital reserve, capitalisation of retained profit, share split, merger, rights issue, and distribution of dividend, any such additional Shares shall also be subject to the above lock-up arrangement. Upon the expiry of the above lock-up period, the transfer and trading of such Shares shall be conducted in accordance with the then applicable laws and the rules of the SSE.

If the lock-up requirements applicable to the Shares subscribed for under the Transaction are inconsistent with the latest regulatory opinions of the securities regulatory authorities, the Company and the subscribers shall make corresponding adjustments in accordance with such regulatory opinions.

Use of Proceeds to be Raised

The proposed size of the supporting funds to be raised shall not exceed RMB20,000 million, all of which will be used to pay the cash consideration for the Transaction, as well as intermediary fees and relevant taxes.

The Transaction is not conditional on the implementation of the Proposed Issuance of A Shares and its implementation is also not subject to whether or not New A Shares are ultimately issued to raise supporting funds. If the Company fails in successfully implementing the Proposed Issuance of A Shares to raise supporting funds or the actual proceeds raised is less than the fund requirements for the use of proceeds to be raised, the Company will address the shortfall through its own or self-financing funds.

Prior to the receipt of the supporting funds, the Company may make advance payments using its self-financing funds for the intended uses of the supporting funds, and such amounts will be replaced upon the actual receipt of the raised funds.

Arrangements for Accumulated Undistributed Profits

The Company's accumulated undistributed profits accrued prior to the issuance of the New A Shares shall, from the date of completion of the issuance of the New A Shares, be jointly shared by the existing and new Shareholders of the Company after such issuance in proportion to their respective shareholdings as registered with CSDC.

General Mandate

The New A Shares to be issued under the Proposed Issuance of A Shares will be issued pursuant to the General Mandate. The maximum number of A Shares that can be issued under the General Mandate is 3,298,207,591 A Shares. As at the Latest Practicable Date, (i) no A Shares have been issued pursuant to the General Mandate; and (ii) the General Mandate is expected to be sufficient for the issuance of both the Consideration Shares and the New A Shares to be issued under the Proposed Issuance of A Shares.

In forming this expectation, the Company notes that, after issuing the Consideration Shares, the remaining capacity under the General Mandate will be approximately 1,934,959,145 A Shares. The Company has also taken into account (a) the proposed fundraising cap of RMB20,000 million for the Proposed Issuance of A Shares; and (b) the minimum issuance price requirements and other restrictions under the applicable laws and regulations, which collectively limit the maximum number of New A Shares that may ultimately be issued. Based on these factors, the Company does not expect the number of New A Shares to exceed the remaining capacity under the General Mandate.

However, if the number of new A Shares to be issued exceeds the maximum number available for issue under the General Mandate, the Company will seek a separate specific mandate from its Shareholders to approve the issuance accordingly.

The validity period of the Proposed Issuance of A Shares is twelve months from the date on which the Shareholders approve the relevant resolution. If the Company obtains the approval from the CSRC for the Proposed Issuance of A Shares within such validity period, the validity period shall automatically extend to the date of completion of the Proposed Issuance of A Shares.

REASONS AND BENEFITS OF THE TRANSACTION AND THE PROPOSED ISSUANCE OF A SHARES

1. The Transaction

Background of the Transaction

The coal industry has entered a new stage of high-quality development: As the "ballast stone" for national energy security, coal plays an important role in the supply assurance system. In its Guiding Opinions on Energy Work (《能源工作指導意見》) for 2025, the National Energy Administration proposed enhancing intensive and large-scale development, promoting the construction of coal supply assurance bases, and further advancing clean and efficient utilisation and intelligent development, marking the industry's entry into a new stage of safe, intelligent and green development. The Company's mergers and acquisitions (M&A) and restructuring will help integrate resources, build a resilient supply system, and promote transformation and upgrading.

Favourable policy and market environment for M&A and restructuring: In recent years, the CPC Central Committee and the State Council have attached great importance to capital market reform and the improvement of the quality of listed companies. Accordingly, the authorities have issued policies such as the Opinions on Further Improving the Quality of Listed Companies (《關於進一步提高上市公司質量的意見》) and the Several Opinions on Strengthening Supervision and Preventing Risks to Promote the High-quality Development of the Capital Market (《關於加強監管防範風險推動資本市場高質量發展的若干意見》), which encourage listed companies to focus on their principal businesses and integrate premium resources. In September 2024, the CSRC issued the Opinions on Deepening the Reform of the M&A and Restructuring Market of Listed Companies (《關於深化上市公司併購重組市場改革的意見》) to support the consolidation of listed companies in line with the country's strategic emerging industries and industry chains, and in May 2025 revised the Administrative Measures for the Major Asset Restructuring of Listed Companies (《上市公司重大資產重組管理辦法》) to streamline the review and registration processes. The SASAC has also reiterated on multiple occasions that central state-owned enterprises ("**SOEs**") should focus on their principal businesses and promote M&A and restructuring activities that are conducive to enhancing investment value.

Mature conditions for non-competition commitment: Since 2005, China Energy and the Company have entered into multiple Non-Competition Agreements and relevant supplemental agreement, which set out the arrangements and deadline (27 August 2028) for asset injection. As at the Latest Practicable Date, the Company has progressively completed a series of asset consolidations related to the avoidance of competition, achieving phased progress in the relevant integration efforts. Currently, the remaining assets within the scope of China Energy's commitment that have not yet been injected have largely met the conditions for injection. The Transaction is an important move by China Energy to honour its commitments to the capital market and further resolve the issue of competition in the same industry.

Purposes of the Transaction

Act on energy security strategies and improve the supply assurance system: The Company will consolidate the assets of resource bases in Xinjiang, Inner Mongolia, Shaanxi and Shanxi as well as port shipping and logistics assets, to boost collaboration among regions, enhance emergency supply capabilities during critical periods such as summer (for cooling) and winter (for heating), and shape a more reliable national system for emergency energy assurance.

Act on reform requirements and serve as a model for central SOE restructuring: The Company will purchase the premium coal, pithead coal power and coal chemical assets of China Energy. The move will consolidate and optimise resources across the industry chain, lift asset quality, economies of scale, risk resilience and profitability, demonstrate the support of the controlling shareholder, and serve as a model for SOE restructuring.

Address competition in the same industry and protect minority shareholders: The Company will make a one-off injection of premium core assets to eliminate business overlaps with the controlling shareholder, enhance scale and profitability, regulate the governance structure, and effectively safeguard the legitimate rights and interests of minority shareholders.

Enhance core functions and competitiveness: The Company will consolidate the coal, pithead coal power, coal chemical, and logistics business, improve resource reserves and core production capacity, optimise the layout across the industry chain, and pursue lower costs and higher profitability. As such, the Company will deliver the "1+1>2" effect and help build a world-class integrated energy firm as a competitive listed company on the global stage.

Upon completion of the Transaction, the scale of the Company's operations will be substantially enlarged, with a material increase in coal recoverable reserves and coal production capacity. The nationwide layout of premium coal resources will be further enhanced, enabling the Company to better respond to potential future growth in coal demand. Through the integration of high-quality resource bases and related supporting assets, the Company's integrated operational advantages will be further strengthened, its core business scale will continue to expand, and its overall asset quality and profitability will be enhanced, thereby generating more stable and long-term returns for the Shareholders.

In the course of planning the Transaction, the Board of the Company also gave due consideration to the feasibility of acquiring similar high-quality resources held by other third parties or industry peers through market-oriented transactions. However, due to factors including the relative scarcity of premium coal resources, the concentration of such resources within large energy groups, the absence of clear disposal intentions on the part of certain potential targets, as well as the higher pricing uncertainty and greater execution complexity associated with market-based transactions, such alternative options were subject to significant constraints in terms of feasibility and certainty and did not result in a practicable implementation pathway.

After prudently considering the potential impact of different financing methods on the Company's capital structure, financial prudence and future operational flexibility, the Board is of the view that sole reliance on debt financing could, to a certain extent, increase the Company's financial burden and operational constraints. Taking into account considerations relating to financial costs, potential earnings per share dilution and the post-Transaction impact on the Company's profitability, the Board ultimately adopted the Transaction structure comprising a combination of share and cash consideration, supplemented by necessary supporting financing, with a view to enhancing earnings per share and creating higher returns for Shareholders. The Board considers that such arrangement is conducive to achieving a balanced enhancement of asset scale and profitability while maintaining prudent financial risk management, and is in the interests of the Company and its Shareholders as a whole.

2. Proposed Issuance of A Shares

The proceeds from the Proposed Issuance of A Shares will be used entirely to pay the cash consideration for the Transaction, as well as the intermediary fees and relevant taxes incurred in connection with the Transaction.

IMPACT ON THE COMPANY'S EQUITY STRUCTURE

As at the Latest Practicable Date, the total issued share capital of the Company is 19,868,519,955 Shares, which comprises 16,491,037,955 A Shares and 3,377,482,000 H Shares.

As the number and price of New A Shares to be issued under the Proposed Issuance of A Shares has not been determined as at the Latest Practicable Date, its impact on the shareholding structure of the Company cannot be accurately assessed.

For illustration purpose, set out below is the shareholding structure of the Company:

(i) as at the Latest Practicable Date; and

(ii) immediately after completion of the Transaction (on the basis that the consideration for the purchase of Target Assets to be settled by way of issuance of Consideration Shares is RMB40,080 million, and assuming that (a) there will not be any further adjustments to the issue price of the Consideration Shares of RMB29.40 per Consideration Share; and (b) there will be no change in the total issued share capital of the Company since the Latest Practicable Date save for the issuance of the A Shares pursuant to the Asset Purchase Agreement (as supplemented by the Supplemental Agreement).

		Shareholding as at the Latest Practicable Date			**Shareholding immediately after completion of the Transaction**		
Name of Shareholder	**Class of Shares**	**Number of Shares** *(share)*	**Approximate percentage of the issued share capital of the relevant class** *(%)*	**Approximate percentage of the total issued share capital** *(%)*	**Number of Shares** *(share)*	**Approximate percentage of the issued share capital of the relevant class** *(%)*	**Approximate percentage of the total issued share capital** *(%)*
China Energy Group *(Note 1)*	A Shares	13,824,302,724	83.83	69.58	15,187,551,170	85.06	71.53

Total		19,868,519,955	–	100.00	21,231,768,401	–	100.00

Notes:

1. As at the Latest Practicable Date and immediately after the completion of the Transaction, Capital Holdings, a wholly-owned subsidiary of China Energy, directly held 11,593,528 A Shares of the Company.

2. The approximate percentage figures are rounded to the nearest two decimal places and therefore, may not add up to 100% due to rounding.

IMPACT ON THE KEY FINANCIAL INDICATORS OF THE COMPANY

Based on the financial information of the Company prepared in accordance with the PRC Accounting Standards for Business Enterprises on a consolidated basis, including the audited financial statements for the year 2024, the unaudited financial data for the period from January to July 2025, and the pro forma financial information of the Enlarged Group, and without taking into account the supporting funds to be raised under the Proposed Issuance of A Shares, the financial data of the Company before and after the completion of the Transaction are as follows:

Unit: RMB100 million

	For the period from January to July 2025/As at 31 July 2025		**For the year of 2024/ As at 31 December 2024**	
Items	**Before completion of the Transaction**	**After completion of the Transaction**	**Before completion of the Transaction**	**After completion of the Transaction**
Total assets	6,359	8,966	6,680	9,167

Gearing ratio *(%)*	25.11	43.55	25.65	43.60
Basic earnings per Share after excluding non-recurring items *(RMB/Share)*	1.47	1.54	2.97	3.15

HONG KONG LISTING RULES IMPLICATIONS

Pursuant to Rule 14.22 of the Hong Kong Listing Rules, if a series of connected transactions are all entered into or completed within a same 12-month period or are otherwise related with each other, such transactions shall be calculated on an aggregate basis and treated as a single transaction. Having considered the transactions of the same nature between the Company and its subsidiaries and China Energy and its associates which were entered into within the past 12 months, as one or more of the applicable percentage ratios calculated on an aggregated basis exceed 25% but are less than 100%, the Transaction constitutes a major transaction of the Company which is subject to the reporting, announcement and Shareholders' approval requirements under Chapter 14 of the Hong Kong Listing Rules.

As at the Latest Practicable Date, China Energy is the controlling shareholder of the Company, and Western Energy is a wholly-owned subsidiary of China Energy and hence an associate of China Energy. Therefore, China Energy and Western Energy are connected persons of the Company. The Transaction constitutes a connected transaction of the Company under the Hong Kong Listing Rules and is subject to the report, announcement and Independent Shareholders' approval requirements under Chapter 14A of the Hong Kong Listing Rules. The completion of the Transaction will not result in a change in control of the Company and China Energy is expected to remain the controlling shareholder of the Company upon completion of the Transaction.

FUND-RAISING ACTIVITIES IN THE PAST 12 MONTHS

The Company has not conducted any fund-raising activities during the period of 12 months preceding the Latest Practicable Date.

RESOLUTIONS PROPOSED TO BE CONSIDERED AT THE EGM

The following resolutions in relation to the Transaction and the Proposed Issuance of A Shares will be proposed at the EGM:

1. **Resolution on the Transaction and the Proposed Issuance of A Shares complying with the relevant laws and regulations**

   In respect of the Transaction and the Proposed Issuance of A Shares, having conducted prudent self-inspection and demonstration based on the Company Law of the People's Republic of China, the Securities Law of the People's Republic of China, the Administrative Measures for the Major Asset Restructuring of Listed Companies (《上市公司重大資產重組管理辦法》), the Administrative Measures for the Registration of Securities Offerings of Listed Companies (《上市公司證券發行註冊管理辦法》), the Regulatory Guidelines for Listed Companies No. 9 – Regulatory Requirements for the Planning and Implementation of Major Assets Restructurings by Listed Companies (《上市公司監管指引第9號––上市公司籌劃和實施重大資產重組的監管要求》), and other applicable laws, regulations and normative documents, and taking into full account the actual circumstances of the Company and the relevant matters, the Board considers that the Transaction and the Proposed Issuance of A Shares comply with the conditions stipulated under the aforesaid laws, regulations and normative documents.

   This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

2. Resolution on the proposal in respect of the Transaction and the Proposed Issuance of A Shares

Details of the proposal in respect of the Transaction and the Proposed Issuance of A Shares are set out in the sections headed "Major and Connected Transaction" and "Proposed Issuance of A Shares to Raise Supporting Funds" in this circular.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

3. Resolution on the "Report (Draft) of China Shenhua on the Purchase of Assets through the Issuance of Shares and Cash Payment, the Raising of Supporting Funds, and the Related Transaction" and its summary

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

4. Resolution on the adjustments to the proposal in respect of the Transaction and the Proposed Issuance of A Shares not constituting material adjustments

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

5. Resolution on the Transaction and the Proposed Issuance of A Shares constituting related transaction

Details are set out in the section headed "Major and Connected Transaction" in this circular.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

6. Resolution on the Transaction and the Proposed Issuance of A Shares not constituting major asset restructuring

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

7. Resolution on the Transaction and the Proposed Issuance of A Shares not constituting reorganisation and listing

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

8. Resolution on the execution of conditional agreements with the Counterparties to the Transaction

Details are set out in the section headed "Major and Connected Transaction" in this circular.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

9. Resolution on the independence of the valuation institutions, the reasonableness of the valuation assumptions, the relevance of the valuation methodologies to the valuation purposes, and the fairness of the valuation pricing

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

10. Resolution on the review reports, audit reports and asset valuation reports relating to the Transaction and the Proposed Issuance of A Shares

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

11. Resolution on the circumstances regarding the dilution of immediate return arising from the Transaction and the remedial measures

(1) Impact of the Transaction on the dilution of the Company's earnings per share for the current period

According to the Review Report of the Pro Forma Financial Information of the Enlarged Group issued by Ernst & Young Hua Ming LLP, the major financial data of the Company before and after the completion of the Transaction prepared by the PRC Accounting Standards for Business Enterprises are as follows:

Unit: RMB/share

	January–July 2025		**2024**	
Item	**Prior to the Transaction**	**Upon completion of the Transaction (pro forma)**	**Prior to the Transaction**	**Upon completion of the Transaction (pro forma)**
Basic earnings per share after excluding non-recurring items	1.47	1.54	2.97	3.15

Note: To more clearly reflect the impact of the Transaction and the relevant data before and after the Transaction, the Company has restated the relevant 2024 figures, on a basis before and after completion of the Transaction, in respect of the acquisition of 100% equity interest in China Energy Hangjin Energy Co., Ltd.

According to the Review Report of the Pro Forma Financial Information of the Enlarged Group, excluding the raising of supporting funds, upon completion of the Transaction, the net profit attributable to the shareholders of the Company will increase, and the Company's earnings per share after excluding non-recurring items for year 2024 and January–July 2025 will increase. Therefore, the Transaction will not result in the dilution of the Company's immediate earnings per share.

(2) Measures to be taken by the Company to mitigate any potential dilution of immediate return and to enhance future returns

According to the Review Report of the Pro Forma Financial Information of the Enlarged Group, the Transaction are not expected to result in any dilution of the Company's immediate return.

After the completion of the Transaction, in order to reduce the risk of any future dilution of immediate return, the Company will continue to improve its corporate governance structure, strengthen its internal control systems, optimize cost management, and enhance its profitability. To safeguard the interests of investors and enhance shareholder return capability, the Company proposes to adopt the following remedial measures:

A. Accelerate the integration of the Target Companies and enhance the Company's profitability

Upon completion of the Transaction, and on the premise of ensuring the stability of the Target Companies' operations, the Company will expedite the comprehensive review and integration of procurement, sales, finance, information systems and day-to-day operational management of the Target Companies, maximize economies of scale and business synergies, improve operating efficiency, and enhance the Company's competitiveness and profitability.

B. Improve profit distribution policies and strengthen the mechanism for shareholder returns

To further improve the Company's profit distribution system and establish a more scientific and reasonable mechanism for profit distribution and decision-making, thereby better safeguarding the interests of Shareholders and investors, the Company has clarified the provisions regarding profit distribution policies and cash dividends in its Articles of Association, in accordance with the Regulatory Guidelines for Listed Companies No. 3 – Cash Dividends of Listed Companies (CSRC Announcement [2025] No. 5), other applicable laws, regulations and normative documents, and based on the actual circumstances. The Company will strictly implement the relevant profit distribution policies, attach importance to providing reasonable returns to investors, and balance the overall interests of all Shareholders and the sustainable development of the Company.

(3) Undertakings of the controlling Shareholder, Directors and senior management regarding the dilution of immediate return and the remedial measures

A. Undertakings of the controlling Shareholder regarding remedial measures for the dilution of immediate return arising from the Transaction and the Proposed Issuance of A Shares

China Energy, the controlling shareholder of the Company, and its parties acting in concert undertake as follows:

(a) China Energy undertakes that it will not interfere in the Company's operational management beyond its authority and will not encroach upon the interests of the Company;

(b) China Energy undertakes that it will not provide benefits to other entities or individuals without compensation or on unfair terms, nor will it adopt any other means to prejudice the interests of the Company;

(c) If China Energy violates or refuses to perform the above undertakings, China Energy shall make explanations and apologies publicly at the general meeting of the Company and in the designated media of the CSRC; China Energy voluntarily accepts the regulatory measures imposed by the SSE, the CSRC and other regulatory authorities; if losses are caused to the Company or its Shareholders as a result of such breach, China Energy is willing to bear legal liability in accordance with the law.

B. Undertakings of Directors and senior management regarding remedial measures for the dilution of immediate return

The Directors and senior management of the Company undertake as follows:

(a) I undertake that I will not provide benefits to other entities or individuals without compensation or on unfair terms, nor will I adopt any other means to prejudice the interests of the Company;

(b) I undertake to regulate my consumption behaviour arising from my position;

(c) I undertake that I will not use the Company's assets to engage in investment or consumption activities unrelated to the performance of my duties;

(d) I undertake to support the linkage of the Company's remuneration system formulated by the Board or the Remuneration and Appraisal Committee with the implementation of the Company's remedial measures;

(e) If the Company implements an equity incentive scheme in the future, I undertake to support the linkage between the exercise conditions of such equity incentive scheme and the implementation of the Company's remedial measures.

I undertake to conscientiously perform the remedial measures adopted by the Company and any undertakings I have made in this regard. If I breach such undertakings and cause losses to the Company or its investors, I am willing to assume liability for compensation in accordance with the law.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

12. Resolution on the Transaction and the Proposed Issuance of A Shares complying with Articles 11, 43 and 44 of the Administrative Measures for the Major Asset Restructuring of Listed Companies

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

13. Resolution on the Transaction and the Proposed Issuance of A Shares complying with Article 4 of the Regulatory Guidelines for Listed Companies No. 9 – Regulatory Requirements for the Planning and Implementation of Major Assets Restructurings by Listed Companies

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

14. Resolution on the confirmation that none of the relevant parties to the Transaction and the Proposed Issuance of A Shares falls within the circumstances under Article 12 of the Regulatory Guidelines for Listed Companies No. 7 that would prohibit participation in major asset restructuring of a listed company

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

15. Resolution on the confirmation that the Company does not fall within the circumstance under Article 11 of the Administrative Measures for the Registration of Securities Offerings of Listed Companies that would prohibit the issuance of shares to specific targets

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

16. Resolution on the price movement of the Company's Shares prior to the information disclosure in relation to the Transaction and the Proposed Issuance of A Shares

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 15 August 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

17. Resolution on the confidentiality measures and confidentiality procedures adopted in connection with the Transaction and the Proposed Issuance of A Shares

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 15 August 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

18. Resolution on the circumstances of the Company's purchase and sale of assets within 12 months prior to the Transaction and the Proposed Issuance of A Shares

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

19. Resolution on the explanation regarding the completeness and compliance of the statutory procedures performed for the Transaction and the Proposed Issuance of A Shares and the validity of the legal documents submitted

Details are set out in the overseas regulatory announcement of the Company published on the website of Hong Kong Stock Exchange on 19 December 2025.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

20. Resolution on proposing to the general meeting of the Company to authorise the Board and its authorised persons to handle, with full discretion, all matters relating to the Transaction and the Proposed Issuance of A Shares

To ensure the smooth implementation of the Transaction and the Proposed Issuance of A Shares, it is proposed that the EGM grant authorisation to the Board and such persons as authorised by the Board to have full authority, within the scope permitted by applicable laws, regulations and normative documents, to handle all matters relating to the Transaction and the Proposed Issuance of A Shares, including:

(1) formulating and implementing specific plans for the Transaction and the Proposed Issuance of A Shares within the scope of laws, administrative regulations, departmental rules and other normative documents, including but not limited to determining or adjusting, based on the specific circumstances, the scope of the Target Assets, the counterparties, the issue price, the number of Shares to be issued, the transaction consideration, the method of payment, and formulating, adjusting and implementing the specific plan for the raising of supporting funds;

(2) handling and deciding on specific matters relating to the Transaction and the Proposed Issuance of A Shares in accordance with the regulatory requirements of securities regulatory authorities and market conditions, based on the proposal approved at the EGM;

(3) signing the transaction agreements and making corresponding amendments thereto based on actual circumstances, reaching agreement with the counterparties and signing the relevant transaction agreements, and making disclosures and completing other necessary procedures and formalities in accordance with the listing rules;

(4) adjusting or revising the plan for the Transaction and the Proposed Issuance of A Shares and the relevant documents in accordance with the requirements or feedback of the relevant securities regulatory authorities, if such authorities require amendments or improvements to the plan;

(5) authorising the Board to adjust, suspend or terminate the specific plan and relevant documents for the Transaction and the Proposed Issuance of A Shares, within the validity period of the EGM resolution, if required by changes in regulatory policies of securities regulatory authorities or market conditions, and based on the new policies and actual conditions of the securities market;

(6) approving and signing audit reports, valuation reports and other agreements and documents (including their amendments and supplements) relating to the Transaction and the Proposed Issuance of A Shares;

(7) being responsible for the specific execution and implementation of the plan for the Transaction and the Proposed Issuance of A Shares in accordance with laws, regulations and other normative documents and the EGM resolution, including but not limited to performing obligations under the transaction agreements, signing relevant legal documents, handling the delivery of the Target Assets and the registration and listing of the Shares to be issued, and handling matters relating to implementation of the Transaction and the Proposed Issuance of A Shares;

(8) opening a dedicated bank account for the proceeds, entering into a tripartite supervision agreement in respect of the proceeds, and handling other related matters;

(9) handling other matters relating to the Transaction and the Proposed Issuance of A Shares within the scope permitted by laws, administrative regulations, departmental rules, other normative documents and the Articles of Association.

The authorisation shall be valid for 12 months from the date of approval of this resolution at the EGM.

If the Company obtains all approvals required for the implementation of the Transaction and the Proposed Issuance of A Shares within such validity period, the validity period shall automatically extend to the date of completion of the implementation of the Transaction and the Proposed Issuance of A Shares.

This resolution will be proposed to the Independent Shareholders at the EGM for consideration and approval by way of a special resolution.

THE EGM

A notice convening the EGM to be held 2:30 p.m. on Friday, 23 January 2026 at He Meeting Room, 2F, Gehua New Century Hotel Beijing, 19 Gulouwai Avenue, Chaoyang District, Beijing, the People's Republic of China is set out in this circular.

According to the Listing Rules, any vote in the EGM must be taken by poll.

As at the Latest Practicable Date, China Energy and its wholly-owned subsidiary, Capital Holdings, together owned 13,824,302,724 Shares, representing approximately 69.58% of the total issued Shares. To the best of the Directors' knowledge, information and belief, and having made all reasonable enquiries, China Energy and its associates have a material interest in the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement) and the Proposed Issuance of A Shares. Accordingly, China Energy and its associates are required to abstain from voting in favour of the resolutions approving the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement), the transactions contemplated thereunder and the Proposed Issuance of A Shares. As such, save for China Energy and its associates, none of the Shareholders is required to abstain from voting in favour of the resolutions approving the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement), the transactions contemplated thereunder and the Proposed Issuance of A Shares.

A form of proxy for use at the EGM is also enclosed. Such form of proxy is also published on the website of The Stock Exchange of Hong Kong Limited at www.hkexnews.hk and the website of the Company at www.csec.com. Whether or not you are able to attend the EGM, you are requested to complete the form of proxy in accordance with the instructions printed thereon and return it to the Hong Kong branch share registrar and transfer office of the Company, Computershare Hong Kong Investor Services Limited, at 17M Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong as soon as possible but in any event not less than 24 hours before the time appointed for the holding of the EGM or any adjournment thereof. Completion and return of the form of proxy will not preclude shareholders from attending and voting in person at the EGM or any adjourned meeting thereof if they so wish.

RECOMMENDATION

Given that Abstained Directors were deemed to have a material interest in the Transaction and the Proposed Issuance of A Shares due to their employment with China Energy, and abstained from voting on the resolutions regarding the Transaction and the Proposed Issuance of A Shares at the fifteenth meeting of the sixth session of the Board. Save as mentioned above, no other Directors have any material interest in the matters contained in this circular and therefore no other Directors have abstained from voting on relevant Board resolutions.

The Board (including the independent non-executive Directors) considers that (i) the Transaction and the Proposed Issuance of A Shares are on normal commercial terms or better, (ii) the Transaction and the Proposed Issuance of A Shares are fair and reasonable so far as the Company and the Shareholders are concerned and in the interests of the Company and the Shareholders as a whole.

Somerley has been appointed as the Independent Financial Adviser to advise the Independent Board Committee and the Independent Shareholders in respect of the Transaction. Your attention is drawn to the letter of advice from the Independent Financial Adviser to the Independent Board Committee and Independent Shareholders set out on pages 91 to 188 of this circular in connection with the Transaction, and the principal factors and reasons considered by the Independent Financial Adviser in arriving at such advice. The Board (including members of the Independent Board Committee whose view is set out in the letter from the Independent Board Committee on pages 89 to 90 of this circular) is of the view that (i) the Transaction and the Proposed Issuance of A Shares are on normal commercial terms or better, (ii) the Transaction and the Proposed Issuance of A Shares are fair and reasonable so far as the Company and the Shareholders are concerned and in the interests of the Company and the Shareholders as a whole.

Accordingly, the Board (including the independent non-executive Directors) recommends the Shareholders to vote in favour of the resolutions as set out in the notice of the EGM.

ADDITIONAL INFORMATION

Your attention is drawn to the additional information set out in the appendices to this circular.

By order of the Board
China Shenhua Energy Company Limited
Song Jinggang
Chief Financial Officer and Secretary to the Board of Directors

FURTHER INFORMATION IN RELATION TO THE TARGET ASSETS

I. Target Coal Mines and Exploration Right Areas

(i) Introduction

The forty-seven (47) coal mines and coal exploration right areas covered in BOYD's CPR are currently held by multiple subsidiaries of China Energy Investment Corporation Limited (China Energy). The subject properties, twenty-eight (28) coal mines including eleven (11) open-pit operations and seventeen (17) underground operations, and nineteen (19) coal exploration right areas are located in various coal-producing provinces (regions) of the People's Republic of China (PRC) including Heilongjiang, Inner Mongolia, Ningxia, Shaanxi, Shanxi and Xinjiang.

The coal bearing strata of the mines in these regions were formed during the Late Carboniferous to Early Permian and the Jurassic to Early Cretaceous periods, except for the younger Paleogene and Neogene lignite seams in Heilongjiang Province. The strata are typically interbedded with numerous coal seams, separated by shale, siltstone, sandstone, and limestone. The coalfields are covered by poorly consolidated Quaternary alluvial deposits ranging in depth from 0 m to 120 m.

On a global basis, the geologic settings, or nature, of the mining/exploration rights areas are judged to vary from simple to complex. At most of the mines, the coal seams have a moderate dip of between 5 and 20 degrees. However, in some areas of the Zhundong and Zhunnan coalfields in Xinjiang Autonomous Region, the coal seams dip increase to 30 degrees or higher due to folding. The Wudong Coal Mine is an isolated case. The coal seams within this area form a large syncline between the northern and southern regions. The coal seams in the northern region have dips between 40 and 50 degrees, whereas in the southern region the dips reach up to 85 degrees. Typically, the mines in Heilongjiang, Shanxi, Shaanxi and Erdos area of the Inner Mongolia Autonomous Region have favorable geologic settings, with gentle seam dips and less faulting and folds. The mines in other areas typically have moderate to complex geologic settings due to faulting, seam splitting and thinning and sand channel erosion. The presence of burnt areas in coal seams near outcrops is common in Xinjiang coal mines. It is also one of the factors that complicate the occurrence of coal seams.

Among the twenty-eight (28) coal mines, except for the Chaoyang Open-pit located at Baoqing, Heilongjiang and the Xiwan Open-pit located at Yulin, Shaanxi, most of the open-pit mines are located in eastern Inner Mongolia and eastern Xinjiang. Most of the open-pit mines have experienced several rounds of expansions to reach their current output capacities. In most cases, the stripping work is outsourced to third-party contractors, while the coal mining is performed in-house. Shovel (excavator)-truck, and semi-mobile crushing/belt

transportation are the mostly adopted open-pit mining technologies, with larger capacities averaging approximately 16 Mtpa for the subject open-pit mines. For the underground operations, FM LW (sometimes with SLC capability) is the only mining method used, which is typical of Chinese underground coal mines. The modern underground FM LW coal mining method has been widely used in nearly every major coal-producing region in China and under the various geological conditions encountered in the subject mines. Generally, the mines in Shaanxi and Inner Mongolia have geologic settings which are highly favorable for LW mining methods. Some of the mines in this region are among the most productive and efficient coal mines in the world. In most cases, the major FM LW mining equipment is manufactured domestically. Typically, the threshold seam thickness for sublevel caving mining is approximately 4.5-6.0 m, although sometimes the decision is made upon other factors. China is the country with most FM LW SLC mining operations. As observed during this study, the FM LW SLC method is adopted in most of the subsidiary companies of China Energy, including Guoyuan Power, Wuhai Energy, Xinjiang Energy, Pingzhuang Coal and Jinshen Energy.

The open-pit mines, characterized by their large-scale operations, accounted for approximately 71% of total production. The average output capacity of the subject open-pit mines is approximately 16.7 Mtpa, considerably higher than that of underground mines, which average approximately 4.0 Mtpa. Most of the large open-pit operations are located in eastern Inner Mongolia and Xinjiang, where the coal seams feature shallow occurrence and substantial thickness. In contrast, Wuhai Energy's underground operations have remained relatively small in scale, mainly due to the limitations resulting from the historical consolidation from smaller mines. The Renjiazhuang, Sandaogou and Chahasu underground mines have relatively high output capacities and are located in the well-known Ningdong, Shenfu and Dongsheng coalfields, respectively, where the most of China's large underground coal mines are concentrated. The Ciyaogou and Shaping mines of Jinshen Energy are well-equipped modern underground operations located in Shanxi Province.

Except for the mines of Wuhai Energy, for which the coal products fall into the coking coal category and can be used for coking industry, the coal products from the other mines are mainly thermal coal, which are widely used for power generation, chemical industry and domestic heating. In coal-electricity integrated projects, coal products are prioritized for supply to the associated power plants. Any surplus coal is sold to surrounding markets or transported out through other sales channels.

(ii) Competent Person's Report

The Competent Person's Report on the forty-seven coal mines and exploration right areas was prepared by BOYD in accordance with the recommended guidelines of the JORC Code 2012. Please refer to Part A of Appendix VI to this circular for details.

(iii) Competent Person's Valuation Report

The Competent Person's Valuation Report was prepared by BOYD in compliance with the Australasian Code for Public Reporting of Technical Assessment and Valuations of Mineral Assets – The VALMIN Code (2015 Edition).

Based on the type of mineral rights (mining rights or exploration rights) and status of the subject mining operations, different valuation approaches were adopted in the Valuation Report. For the coal mines with established (fully developed) and active producing status, or under technical upgrading construction, BOYD selected the Income Method of mineral valuation as the preferred and appropriate method. The Market Approach (Market Transaction/Comparable Sales) was used for the exploration right areas where comparable transaction cases are available. The Hybrid Approach was adopted for the exploration right areas where limited comparable transaction data are accessible, but detailed information for mine operations in the same area is available. Together with the consideration of the rating of the mining operations as among the best in terms of productivity and operating costs, in China, BOYD concludes the derived Technical Value of the existing operation is the same as Market Value (i.e., no further adjustments are warranted). In addition to the value assigned to the existing operations, we opine it is appropriate to recognize and assign Indicative Market Value to the large tonnage of additional resources and reserves which are not considered in the DCF-NPV analysis (Technical Value). Please refer to Part B of Appendix VI to this circular for details.

II. No Material Adverse Change

No material adverse changes have occurred from the effective date of the Competent Person's Report (i.e. 31 July 2025) up to the Last Practicable Date.

III. No Legal Claims or Litigation Proceedings

As at the Latest Practicable Date, the Directors are not aware of any legal claims or litigation currently in progress or pending that could materially affect the mining and exploration rights of the mineral assets owned by the forty-seven coal mines, or the business operations and financial condition of the forty-seven coal mines, nor are they aware of any third parties that may initiate such claims or litigation against the forty-seven coal mines, or vice versa.

Furthermore, there are no material disputes over land mining rights in respect of the land where exploration or mining activities are being designed for the forty-seven coal mines.

IV. Other Matters Relating to the Subject Coal Mines and Coal Exploration Right Areas

(i) Mining rights and other licenses/permits required under the laws

As at the Latest Practicable Date, the mining right information of the forty-nine subject mines and exploration right areas are summarized in below table.

Mining/Exploration Right Area	Mining/Exploration Right Certificate Number	Authorized Output Capacity *(Mtpa)*		Authorized Mining Elevation *(m)*	Current Term

According to the Measures for the Administration of the Registration of Mining Mineral Resources (2014 Edition), the mining right for a particular mine will be renewed upon application after paying the mining right fee.

(ii) Environmental, social, health and safety issues

Mining and related activities are inherently disruptive to the environment. Impacts include both environmental pollution and ecological disruption, including delayed influences on ecological environment and ground water, dynamic change of the magnitude and extent of the impact, and sustained period of impact during the whole LOM (Life-of-Mine) operation. Major influence factors include: fugitive dust, noise, wastewater and solid wastes pollution, as well as the sustained and cumulative impact of surface subsidence on landform, surface structures, the ecological environment and ground water. The environmental aspects related to coal exploration, mining, and processing activities in China are subject to both national and local laws and regulations.

BOYD has completed an overview of the subject mines' environmental practices and policies and opines that the subject China Energy mines generally operate in compliance with environmental protection laws and statutes, although some individual mines were reported being subject to minor administrative penalties related to environmental protection. The mines corrected their practices after paying the penalties. There were not any other significant environmental pollutions, environmental protection claims, petitions due to environmental pollution matters.

Health and safety aspects are major core concerns of the coal mining industry in China and the world. BOYD is of the opinion that such aspects have been properly addressed in the mine design documents and safety protocols for mining and development operations.

(iii) Violations of Chinese Laws, Regulations, and Permits That May Have Material Adverse Effects

To the best of the Directors' knowledge, as at the Latest Practicable Date, there were no incidents of violations of PRC laws, regulations, and permits that could have a material adverse effect on the mining and operational activities of the forty-seven coal mines.

(iv) Key risks identified to the subject coal mines

In accordance with Chapter 18 of the Listing Rules, BOYD identified in its Competent Person's Report certain risks relating to the subject coal mines. Such risks are ranked as high, medium or low based on Guidance Note 7 issued by the Stock Exchange. Please refer to the Chapter 7 "Risk Assessment" of the Competent Person's Report in Part A of Appendix VI to this circular for details. The following table shows the summary of BOYD's risk assessment for the period 2025 to 2031.

		Risk Assessment	
Hazard/Risk Issue	**Severity**	**Probability**	**Overall**
Geologic			
Overall (General)	Minor to Major	Possible to Likely	Medium
Unforeseen Anomalies	Minor to Moderate	Possible	Low to Medium
Reserve Availability	Minor	Likely	Medium to High
Naturally Occurring Events			
Weather	Minor to Major	Possible	Low
Earthquakes	Minor to Major	Possible	Low
Operational Productional			
Routine Operational Risks	Minor to Moderate	Possible	Medium
LW Subsidence	Minor to Moderate	Possible	Low to Medium
Major Events			
Major Equipment Fire	Minor to Major	Possible	Low
Explosions	Minor to Major	Unlikely	Low
Floods	Minor to Major	Unlikely	Low
Bumps/Pit Wall Failures	Moderate to Major	Possible	Low to Medium
Flooding of Pit	Minor	Possible	Low
External – Regulation	Moderate to Major	Possible	Medium to High
Market – Commercial	Moderate to Major	Possible	Medium

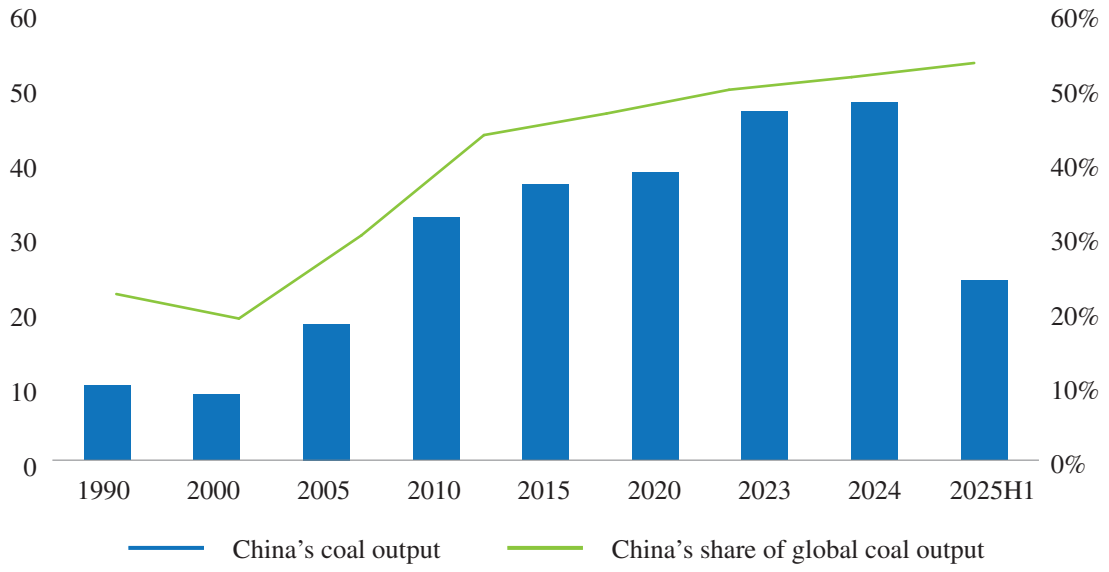
Summary of Coal Industry

Supply situation in the coal industry

Coal is the major source of energy and an important industrial raw material in China. Among the proven reserves of fossil energy in China, coal, petroleum and natural gas account for 94%, 5.4% and 0.6%, respectively, reflecting an energy endowment characterized by "rich in coal, scarcity of oil, shortage in gas". As a crucial basic industry, the coal industry has strongly supported the steady and rapid development of the national economy and society.

In recent years, China's overall coal production has maintained steady growth, and China has become the world's largest coal producer. Since the second half of 2021, influenced by the requirements for ensuring coal supply, the production has experienced relatively rapid growth. In 2024, the national raw coal output reached 4.781 billion tonnes, representing a year-on-year increase of 1.24%.

Changes in China's coal output (Unit: 100 million tonnes)



Source: Wind, General Administration of Customs of the PRC, Info Bank

Demand situation in the coal industry

China is the world's largest consumer of coal. In 2024, the country accounted for approximately 55.2% of global coal consumption. With the development of new energy and adjustments in the energy structure, the proportion of coal consumption in China's total energy consumption has been continuously declining. However, within China's primary energy consumption structure in 2024, raw coal, crude oil, natural gas, hydropower, nuclear power, wind power and solar power accounted for 53.2%, 18.8%, 8.7% and 19.3%, respectively. Coal will maintain its dominant position in the consumption structure in the future, ensuring the sustained demand for coal.

To the Directors

China Shenhua Energy Company Limited

REPORT FROM REPORTING ACCOUNTANTS ON THE DISCOUNTED CASH FLOW FORECAST IN CONNECTION WITH THE VALUATION OF EQUITY INTERESTS IN TARGET COMPANIES

We have been engaged to report on the arithmetical accuracy of the calculations of the discounted cash flow Forecast (the "**Forecast**") on which the valuation dated 16 December 2025 prepared by China Enterprise Appraisals Co., Ltd. in respect of certain assets of China Energy Xinjiang Energy & Chemical Co., Ltd., certain assets of China Energy Wuhai Coal Group Corporation Limited, certain assets of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., certain assets of Guodian Construction and Investment Inner Mongolia Energy Co., Ltd., certain assets of China Energy Shaanxi Shenyan Coal Co., Ltd., certain assets of Shanxi Province Jinshen Energy Co., Ltd. and the equity interest of China Energy Baotou Mining Co., Ltd., and China United Assets Appraisal Group Co., Ltd. in respect of certain assets of Guoyuan Electric Power Co., Ltd., certain assets of China Shenhua Coal Liquefaction and Chemical Company Limited and equity interest of China Energy Port Co., Ltd. (collectively referred to as the "**Target Companies**") as at 31 July 2025 is based. The valuation is set out in the announcement of China Shenhua Energy Company Limited (the "**Company**") dated 19 December 2025 (the "**Announcement**") in connection with the proposed acquisition of equity interests in the Target Companies. The valuation based on the Forecast is regarded by The Stock Exchange of Hong Kong Limited as a profit forecast under paragraph 14.61 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**").

Directors' responsibilities

The directors of the Company (the "**Directors**") are solely responsible for the preparation of the Forecast in accordance with the bases and assumptions (the "**Assumptions**") determined by the Directors and as set out in the section headed" Principal Assumptions Underlying the Profit Forecast" of the Announcement. This responsibility includes carrying out appropriate procedures relevant to the preparation of the discounted future cash flows for the Forecast and applying an appropriate basis of preparation; and making estimates that are reasonable in the circumstances.

Our independence and quality management

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**"), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

Our firm applies Hong Kong Standard on Quality Management 1 *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements* which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Reporting accountants' responsibilities

Our responsibility is to express an opinion on the arithmetical accuracy of the calculations of the Forecast based on our work. The Forecast does not involve the adoption of accounting policies.

We conducted our engagement in accordance with Hong Kong Standard on Assurance Engagements 3000 (Revised) Assurance Engagements Other Than Audits or Reviews of Historical Financial Information issued by the HKICPA. This standard requires that we plan and perform our work to obtain reasonable assurance as to whether, so far as the arithmetical accuracy of the calculations are concerned, the Directors have properly compiled the Forecast, in all material respects, in accordance with the Assumptions adopted by the Directors. Our work consisted primarily of checking the arithmetical accuracy of the calculations of the Forecast prepared based on the Assumptions made by the Directors. Our work is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing issued by the HKICPA. Accordingly, we do not express an audit opinion.

We are not reporting on the appropriateness and validity of the Assumptions on which the Forecast are based and thus express no opinion whatsoever thereon. Our work does not constitute any valuation of the Target Companies. The Assumptions used in the preparation of the Forecast include hypothetical assumptions about future events and management actions that may or may not occur. Even if the events and actions anticipated do occur, actual results are still likely to be different from the Forecast and the variation may be material. Our work has been undertaken for the purpose of reporting solely to you under paragraph 14.60A(2) of the Listing Rules and for no other purpose. We accept no responsibility to any other person in respect of our work, or arising out of or in connection with our work.

Opinion

Based on the foregoing, in our opinion, so far as the arithmetical accuracy of the calculations of the Forecast is concerned, the Forecast has been properly compiled in all material respects in accordance with the Assumptions adopted by the Directors.

FULL TEXT OF THE LETTER FROM THE BOARD ON THE DISCOUNTED CASH FLOW FORECAST IN CONNECTION WITH THE VALUATION OF EQUITY INTERESTS IN TARGET COMPANIES

Dear Sir or Madam,

Re: Major and Connected Transaction Relating to the Acquisition of Target Assets and Proposed Issuance of A Shares

Reference is made to the announcement (the "**Announcement**") of China Shenhua Energy Company Limited (the "**Company**") dated 19 December 2025, of which this letter forms part. The terms used in this letter shall have the same meanings as defined in the Announcement unless the context otherwise requires.

Reference is made to the twelve asset valuation reports (collectively, the "**Asset Valuation Reports**") issued on 16 December 2025 in respect of the valuation of the equity interests in the target companies, including Guoyuan Electric Power Co., Ltd., China Energy Xinjiang Energy & Chemical Co., Ltd., China Shenhua Coal Liquefaction and Chemical Company Limited, China Energy Wuhai Coal Group Corporation Limited, Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., Guodian Construction and Investment Inner Mongolia Energy Co., Ltd., China Energy Shaanxi Shenyan Coal Co., Ltd., Shanxi Province Jinshen Energy Co., Ltd., China Energy Baotou Mining Co., Ltd., China Energy Shipping Co., Ltd., Shenhua Coal Trading Co., Ltd., and China Energy Port Co., Ltd. (the "**Target Companies**"), which were prepared respectively by China Enterprise Appraisals Co. Ltd. and China United Assets Appraisal Group Co., Ltd., both being independent valuers (collectively, the "**Valuers**").

As the valuation contained in the Asset Valuation Reports adopts both the asset-based approach (under which the discounted cash flow method was applied for the valuation of certain assets) and the income approach, such valuations constitute profit forecast (the "**Profit Forecast**") under Rule 14.61 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

We have discussed with the Valuers and reviewed the basis and assumptions upon which the Profit Forecast was prepared. We have also engaged Ernst & Young to report on the calculation of the discounted future cash flows used in the Valuation Report and considered the report from Ernst & Young. Based on the aforesaid, we confirm that the Profit Forecast as contained in the Asset Valuation Reports have been made after due and careful inquiry.

On behalf of the Board
China Shenhua Energy Company Limited
Zhang Changyan
Executive Director and Chief Executive Officer

24 December 2025

To the Independent Shareholders

Dear Sir or Madam,

MAJOR AND CONNECTED TRANSACTION IN RELATION TO THE ACQUISITION OF TARGET ASSETS

We refer to the circular of the Company dated 24 December 2025 (the "**Circular**") of which this letter forms part. Terms defined in the Circular shall have the same meanings when used herein unless the context requires otherwise.

We have been appointed by the Board as to form the Independent Board Committee to consider and advise the Independent Shareholders as to whether, in our opinion, the Transaction is fair and reasonable and in the interests of the Company and the Shareholders as a whole. Somerley has been appointed by the Company to advise the Independent Board Committee and the Independent Shareholders.

We wish to draw your attention to the letter from the Board as set out on pages 1 to 75 of the Circular and the letter of advice from Somerley as set out on pages 91 to 188 of the Circular.

Having considered the information contained in the letter from the Board, the terms of the Asset Purchase Agreement and the Supplemental Asset Purchase Agreement and the transactions contemplated thereunder, and the advice of Somerley, we concur with Somerley's view and consider that the Transaction is fair and reasonable so far as the Company and the Shareholders are concerned, on normal commercial terms or better and in the interests of the Company and the Shareholders as a whole.

Accordingly, we recommend the Independent Shareholders to vote in favour of the resolutions to be proposed at the EGM to approve the Transaction.

Yours faithfully,
For and on behalf of the Independent Board Committee

Dr. Yuen Kwok Keung	**Dr. Chen Hanwen**	**Mr. Wang Hong**
Independent non-executive Director	*Independent non-executive Director*	*Independent non-executive Director*

The following is the text of the letter of advice from Somerley Capital Limited, the Independent Financial Adviser, to the Independent Board Committee and the Independent Shareholders, which has been prepared for the purpose of inclusion in this circular.

SOMERLEY CAPITAL LIMITED
20th Floor
China Building
29 Queen's Road Central
Hong Kong

24 December 2025

To: the Independent Board Committee and Independent Shareholders

Dear Sirs,

MAJOR AND CONNECTED TRANSACTION IN RELATION TO THE ACQUISITION OF TARGET ASSETS

INTRODUCTION

We refer to our appointment to advise the Independent Board Committee and the Independent Shareholders in connection with the Transaction, details of which are set out in the letter from the Board of the circular of the Company dated 24 December 2025 (the "**Circular**"), of which this letter forms a part. Terms used in this letter shall have the same meanings as those defined in the Circular unless the context otherwise requires.

On 15 August 2025, the Company entered into the Asset Purchase Agreement with China Energy and its wholly-owned subsidiary, Western Energy, pursuant to which, the Company conditionally agreed to (i) acquire 100% equity interest in Guoyuan Power, 100% equity interest in Xinjiang Energy, 100% equity interest in Chemical Company, 100% equity interest in Wuhai Energy, 100% equity interest in Pingzhuang Coal, 41% equity interest in Shenyan Coal, 49% equity interest in Jinshen Energy, 100% equity interest in Baotou Mining, 100% equity interest in Shipping Company, 100% equity interest in Coal Trading Company, 100% equity interest in E-commerce Company and 100% equity interest in Port Company held by China Energy by way of issuance of Consideration Shares and payment in cash; and (ii) acquire 100% equity interest in Inner Mongolia Construction Investment held by Western Energy by way of payment in cash.

On 19 December 2025, the Company entered into the Supplemental Asset Purchase Agreement with China Energy and Western Energy, pursuant to which (i) the Target Assets under the Transaction were revised to exclude the 100% equity interest in E-commerce Company held by China Energy, while all other Target Assets remained unchanged; and (ii) certain terms of the Transaction, including the transaction consideration and payment arrangements, were further amended and supplemented.

Pursuant to Rule 14.22 of the Hong Kong Listing Rules, if a series of connected transactions are all entered into or completed within a same 12-month period or are otherwise related with each other, such transactions shall be calculated on an aggregate basis and treated as a single transaction. Having considered the transactions of the same nature between the Company and its subsidiaries and China Energy and its associates which were entered into within the past 12 months, as one or more of the applicable percentage ratios calculated on an aggregated basis exceed 25% but are less than 100%, the Transaction constitutes a major transaction of the Company which is subject to the reporting, announcement and Shareholders' approval requirements under Chapter 14 of the Hong Kong Listing Rules.

As at the Latest Practicable Date, China Energy is the controlling shareholder of the Company, and Western Energy is a wholly-owned subsidiary of China Energy and hence an associate of China Energy. Therefore, China Energy and Western Energy are connected persons of the Company. The Transaction constitutes a connected transaction of the Company under the Hong Kong Listing Rules and is subject to the report, announcement and Independent Shareholders' approval requirements under Chapter 14A of the Hong Kong Listing Rules. The completion of the Transaction will not result in a change in control of the Company and China Energy is expected to remain the controlling shareholder of the Company upon completion of the Transaction.

An Independent Board Committee comprising all independent non-executive Directors, namely Dr. Yuen Kwok Keung, Dr. Chen Hanwen and Mr. Wang Hong, has been formed to advise the Independent Shareholders on the Transaction. We, Somerley Capital Limited, have been appointed as the independent financial adviser to advise the Independent Board Committee and Independent Shareholders in this regard.

We are not associated or connected with the Company, China Energy and Western Energy or their respective close associates or core connected persons and, accordingly, are considered eligible to give independent advice on the Transaction. In the past two years, there was no engagement between the Group and us. Apart from normal professional fees payable to us in connection with this appointment, no arrangement exists whereby we will receive any fees or benefits from the Company, China Energy, and Western Energy or their respective close associates or core connected persons.

In formulating our opinion and advice, we have relied on the information and facts supplied, and the opinions expressed, by the Directors and management of the Company, which we have assumed to be true, accurate and complete in all material aspects. We have reviewed the information of the Company, including, among other things, (i) the annual reports of the Company for the year ended 31 December 2023 ("**FY2023**") ("**2023 AR**") and 31 December 2024 ("**FY2024**") ("**2024 AR**"); (ii) the interim reports of the Company for six months ended 30 June 2024 ("**1H2024**") ("**2024 IR**") and 30 June 2025 ("**1H2025**") ("**2025 IR**"); (iii) the announcements of the Company dated 15 August 2025 and 19 December 2025 in relation to, among others, the Transaction; (iv) the asset valuation reports on the Target Companies and Target Assets (the "**Valuation Reports**"); and (v) other information contained in the Circular. We also have sought and received confirmation from the Company that no material facts have been omitted from the information supplied and opinions expressed to us were not misleading in any material aspects. We

consider that the information we have received is sufficient for us to reach our opinion and give our advice and recommendation set out in this letter. We have no reason to believe that any material information has been omitted or withheld, or to doubt the truth or accuracy of the information provided. We have, however, not conducted any independent investigation into the business and affairs of the Group, China Energy, Western Energy or any of their respective associates or any party acting, or presumed to be acting, in concert with any of them, nor have we carried out any independent verification of the information supplied. We have also assumed that all representations contained or referred to in the Circular were true at the time they were made and at the date of the Circular and will continue to be true up to the time of the EGM, and Shareholders will be informed of any material change as soon as possible.

1. Information of the parties

1.1 Information of the Group

The Company is a world-leading coal-based integrated energy company. The main business of the Group includes production and sales of coal and power, railway, port and ship transportation, and coal-to-olefins and other coal related chemical processing business. As at the Latest Practicable Date, China Energy directly holds 13,812,709,196 A Shares of the Company and indirectly holds 11,593,528 A Shares of the Company through Capital Holdings, in aggregate representing 69.5789% of the total number of issued shares of the Company.

Set out below is the summary of the financial information of the Group for the six months ended 30 June 2025 and 30 June 2024 and the two years ended 31 December 2023 and 2024 as extracted from the2024 AR and 2025 IR:

	For the six months ended 30 June		**For the year ended 31 December**	
	2025	**2024**	**2024**	**2023**
	RMB million	*RMB million*	*RMB million*	*RMB million*
	(Unaudited)	(Unaudited) (Restated)	(Audited)	(Audited)
Revenue				
– Coal	86,722	113,787	223,753	228,149
– Power	40,451	45,062	94,012	92,202
– Others	10,936	10,272	20,610	22,723
Revenue	**138,109**	**169,121**	**338,375**	**343,074**
Gross profit	**43,735**	**50,213**	**101,820**	**110,537**
Profit for the period/year attributable to equity holders of the Company	**26,706**	**31,356**	**62,421**	**64,625**

For the six months ended 30 June 2024 and 2025

Revenue of the Group for 1H2025 was approximately RMB138,109 million, representing a year-on-year decrease of approximately 18.3% as compared with that of approximately RMB169,121 million for 1H2024. Based on the 2025 IR, revenue from coal segment and power segment amounted to approximately RMB86,722 million and RMB40,451 million, accounting for approximately 62.8% and approximately 29.3% to the revenue of the Group for 1H2025, and represented a year-on-year decrease of approximately 23.8% and approximately 10.2% compared with that in 1H2024, respectively. As disclosed in the 2025 IR, the main reasons for the decreased in such segments were: (i) sales and average selling price of coal of the Group decreased by 10.9% and 12.9%, respectively, resulting in a decrease in the sales revenue of coal as compared with that in 1H2024; and (ii) electricity sales and average electricity selling price of the Group decreased by 7.3% and 4.2%, respectively, resulting in a decrease in revenue from power sales as compared with that in 1H2024.

Gross profit of the Group for 1H2025 amounted to approximately RMB43,735 million, representing a decrease of approximately 12.9% as compared to that of approximately RMB50,213 million for 1H2024. Overall gross profit margin of the Group increase from approximately 29.7% for 1H2024 to approximately 31.7% for 1H2025.

Profit for the period attributable to equity holders of the Company amounted to approximately RMB26,706 million for 1H2025, representing a decrease of approximately 14.8% compared with that of approximately RMB31,356 million for 1H2024, mainly due to the decreased revenue in such aforementioned segments.

For the two years ended 31 December 2023 and 2024

According to the 2024 AR, revenue of the Group for FY2024 was approximately RMB338,375 million, representing a slight year-on-year decrease of approximately 1.4% as compared with approximately RMB343,074 million in FY2023. Based on the 2024AR, revenue from the coal segment and power segment accounted for approximately 66.1% and approximately 27.8% to the revenue of the Group for FY2024, respectively, which represented a year-on-year decrease of approximately 1.9% and an increase of approximately 2.0% compared with those in FY2023, respectively. The main reasons for the slight decrease of revenue were: (i) the average coal sales price of the Group decreased by 3.4% year-on-year and the revenue from coal sales decreased year-on-year; and (ii) the Group's sales volume of polyethylene and polypropylene decreased by 8.8% and 8.2% year-on-year, respectively, and sales revenue from the coal chemical segment decreased year-on-year resulting from the planned overhaul of the coal-to-olefin production equipment.

Gross profit of the Group for FY2024 amounted to approximately RMB101,820 million, representing a decrease of approximately 7.9% as compared to that of approximately RMB110,537 million for FY2023. Overall gross profit margin of the Group decreased from approximately 32.2% for FY2023 to approximately 30.1% for FY2024.

Profit for the year attributable to equity holders of the Company amounted to approximately RMB62,421 million for FY2024, representing a decrease of approximately 3.4% compared with that of approximately RMB64,625 million for FY2023, mainly due to the aforementioned decrease in revenue and modest rise in general and administrative expenses.

Set out below is the summary of the financial position of the Group as at 31 December 2023, 31 December 2024 and 30 June 2025 as extracted from the 2024 AR and 2025 IR:

	As at 30 June 2025	**2024**	**As at 31 December 2023**
	RMB million	*RMB million*	*RMB million*
	(Unaudited)	(Audited) (Restated)	(Audited)
Total assets	686,068	671,639	633,412
Total liabilities	212,433	171,377	151,761
Equity attributable to equity holders of the Company	404,527	422,595	411,478

As at 30 June 2025, the Group's total assets amounted to approximately RMB686,068 million, mainly comprised of (i) property, plant and equipment of approximately RMB293,410 million; and (ii) cash and cash equivalents of approximately RMB79,785 million.

As at 30 June 2025, the Group's total liabilities amounted to approximately RMB212,433 million, mainly comprised of (i) accrued expenses and other payables of approximately RMB102,550 million; and (ii) borrowings of approximately RMB35,429 million.

As at 30 June 2025 and 31 December 2024, the Group's total equity attributable to equity holders of the Company amounted to approximately RMB404,527 million and RMB422,595 million (restated), respectively, representing a slight decrease of approximately 4.3%.

1.2 Information of China Energy

China Energy and its subsidiaries have various industrial sectors, including coal, thermal power, new energy, hydropower, transportation, chemical, technology and environmental protection and finance, and are mainly engaged in coal production, power generation, transportation and coal based chemical processing as well as investment and financing activities. China Energy is a controlling Shareholder of the Company. The ultimate beneficial owner of China Energy is the SASAC.

1.3 Information of Western Energy

Western Energy is a company established in the PRC with limited liability in 2024 and mainly engaged in coal mining, power generation, power transmission, power supply (distribution), road freight transportation, coal washing and processing, sales of coal and coal products, etc. As at the Latest Practicable Date, Western Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

1.4 Information on the Target Companies

1.4.1 Guoyuan Power

Guoyuan Power, formerly known as State Grid Energy Development Co., Ltd. (國網能源開發有限公司), is a company established in the PRC with limited liability in 2008. It became a wholly-owned subsidiary of China Energy (which at that time was Shenhua Group Corporation Limited 神華集團有限公司) in 2012 through the acquisition of 100% equity from State Grid Corporation of China. At the time of the transfer, the registered capital was RMB7 billion. Following the completion of the equity transfer, China Energy made several capital injections into Guoyuan Power, increasing its registered capital to approximately RMB47.26 billion in 2024. Guoyuan Power operates in the power, heat production, and supply industry as well as coal mining and washing industry and is mainly engaged in, among others, coal mining, washing, processing and sales, pithead coal-fired power generation business, heat supply and construction of power transmission and distribution facilities. As at the Latest Practicable Date, Guoyuan Power is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Guoyuan Power's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	60,066	61,030	63,610	60,151
Equity attributable to equity holders of the Company	26,775	24,925	20,941	19,554

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	12,468	25,844	31,096	30,050
Profit before income tax	3,541	4,206	4,025	3,560
Profit for the year/period	2,913	3,375	3,029	2,394
Profit attributable to equity holders of the Company	2,378	2,232	1,997	1,537

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Guoyuan Power amounted to approximately RMB30,050 million, RMB31,096 million and RMB25,844 million, respectively. The revenue in 2023 remained relatively stable compared to that in 2022. The decrease in revenue in 2024 was mainly due to the deconsolidation of two subsidiaries in January 2024 and August 2024, respectively, which reduced Guoyuan Power's consolidated revenue base. For the seven months ended 31 July 2024 and 2025, the revenue of Guoyuan Power decreased from approximately RMB15,586 million to RMB12,468 million, primarily due to the deconsolidation of a subsidiary in August 2024, which reduced Guoyuan Power's consolidated revenue in the seven months ended 31 July 2025.

For the two years ended 31 December 2023 and 2024, the profit for the year of Guoyuan Power amounted to approximately RMB3,029 million and RMB3,375 million, respectively, representing an increase of approximately 11.42%.

1.4.2 Xinjiang Energy

Xinjiang Energy is a company established in the PRC with limited liability in 2000. China Energy (which at that time was Shenhua Group Corporation Limited) acquired 51% equity interest in Xinjiang Energy in 2005 by contributing RMB645 million in cash. In 2007, China Energy made an additional cash capital contribution, increasing its shareholding to 68.46%. In 2010, China Energy acquired a further 23.80% equity interest from Xinjiang Investment Development (Group) Co., Ltd. (新疆投資發展(集團)有限責任公司) for RMB650 million, increasing its interest to 92.26%. In 2011, China Energy acquired an additional 2.20% equity interest from China Cinda Asset Management Co., Ltd. (中國信達資產管理公司) for approximately RMB65 million and subscribed for new registered capital, increasing the registered capital to approximately RMB3.76 billion. In 2013, China Energy acquired a further 2.89% equity interest from China Huarong Asset Management Co., Ltd. (中國華融資產管理公司) for approximately RMB161 million. Through subsequent rounds of capital restructuring, the registered capital of Xinjiang Energy was gradually increased to approximately RMB9.12 billion by 2023. It operates in the coal mining and washing industry and is mainly engaged in, among others, coal mining, washing and processing, and sales. As at the Latest Practicable Date, Xinjiang Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Xinjiang Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025	**As at 31 December 2024**	**As at 31 December 2023**	**As at 31 December 2022**
	(Audited)	(Audited)	(Audited)	(Audited)
Total assets	31,095	30,858	26,723	21,566
Equity attributable to equity holders of the Company	10,322	10,310	9,055	7,410

	Seven months ended 31 July 2025 (Audited)	Year ended 31 December 2024 (Audited)	Year ended 31 December 2023 (Audited)	Year ended 31 December 2022 (Audited)
Revenue	6,990	18,232	19,423	18,543
Profit before income tax	357	2,702	3,294	6,205
Profit for the year/period	176	2,145	2,611	5,225
Profit attributable to equity holders of the Company	140	1,940	2,147	4,464

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Xinjiang Energy amounted to approximately RMB18,543 million, RMB19,423 million and RMB18,232 million, respectively. The increase in 2023 was mainly due to the increase in coal sales volume. The decrease in 2024 was mainly due to the decline in coal prices. For the seven months ended 31 July 2024 and 2025, the revenue of Xinjiang Energy decreased from approximately RMB10,443 million to RMB6,990 million, respectively, primarily due to the decrease in both coal prices and coal sales volume.

For the two years ended 31 December 2023 and 2024, the profit for the year of Xinjiang Energy amounted to approximately RMB2,611 million and RMB2,145 million, respectively, representing a decrease of approximately 17.85%.

1.4.3 Chemical Company

Chemical Company is a company establishedin the PRC with limited liability in 2003. It was established through capital contributions by China Energy (which at that time was Shenhua Group Corporation Limited) and its wholly-owned subsidiary, Guohua Energy Investment Co., Ltd. (國華能源投資有限公司), with initial registered capital of RMB2 billion (China Energy contributing RMB1.8 billion and Guohua contributing RMB0.2 billion) in 2003. In 2008, the registered capital was increased to RMB10.6 billion, with China Energy's contribution increased to RMB9.75 billion. Between 2008 and 2023, Chemical Company underwent multiple rounds of capital restructuring, increasing its registered capital to approximately RMB31.24 billion. Subsequent to the Valuation Benchmark Date, Chemical Company also received an additional capital contribution of RMB4,927.20 million from China Energy. As at the Latest Practicable Date, the relevant change registration formalities with the PRC company registration authority has not yet been completed. It operates in the petroleum, coal, and other fuel

processing industry and is mainly engaged in the production, processing, and sale of coal chemical products, as well as the businesses related to the clean conversion and utilisation of coal. As at the Latest Practicable Date, Chemical Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Chemical Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	40,757	37,071	35,754	37,515
Equity attributable to equity holders of the Company	17,143	17,593	16,181	15,890

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	11,962	26,429	25,651	27,982
(Loss)/Profit before income tax	(489)	1,323	318	2,326
(Loss)/Profit for the year/period	(550)	1,265	278	2,224
(Loss)/Profit attributable to equity holders of the Company	(527)	1,363	283	2,231

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Chemical Company amounted to approximately RMB27,982 million, RMB25,651 million and RMB26,429 million, respectively. The decrease in 2023 was mainly due to the overall downward adjustment in coal-chemical product prices as the market retreated from the unusually high price levels in 2022. The increase in 2024 was mainly due to a recovery in market prices of polyolefin. For the seven months ended 31 July 2024 and 2025, the revenue of Chemical Company decreased from approximately RMB15,767 million to RMB11,962 million, mainly due to the decline in production volume resulting from the suspension of certain major production units for technological upgrades.

For the two years ended 31 December 2023 and 2024, the profit for the year of Chemical Company amounted to approximately RMB278 million and RMB1,265 million, respectively, representing an increase of approximately 355.04%.

As disclosed in the letter from the Board of the Circular, Chemical Company recorded a loss for the seven months ended 31 July 2025 primarily due to the temporary shutdown of the coal-to-liquids project operated by its Ordos Coal-to-Liquids Branch. The production units of the coal-to-liquids project were taken offline in November 2024 for a process upgrade and transformation, and remained under suspension during January to July 2025, resulting in operating losses for the period. The upgrade works have now been substantially completed and the relevant units are currently in trial operation. The coal-to-liquids project recorded satisfactory profitability in 2024 prior to the commencement of the upgrade works, and the completion of the technological upgrade is expected to further improve production efficiency.

1.4.4 Wuhai Energy

Wuhai Energy is a company established in the PRC with limited liability in 2002. It was founded in April 2002 by China Energy (which at that time was Shenhua Group Corporation Limited) as a wholly-owned subsidiary with an initial registered capital of RMB202 million. It subsequently underwent capital increases in 2009, 2018 and 2021, raising its registered capital to approximately RMB2.69 billion. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Wuhai Energy is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Wuhai Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	23,407	23,401	22,502	20,941
Equity attributable to equity holders of the Company	12,316	12,299	11,205	10,518

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	4,040	9,770	10,744	12,606
Profit before income tax	44	1,623	1,467	5,841
(Loss)/Profit for the year/period	(77)	1,241	972	4,632
Profit attributable to equity holders of the Company	24	1,197	712	4,340

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Wuhai Energy amounted to approximately RMB12,606 million, RMB10,744 million and RMB9,770 million, respectively. The decrease in 2023 was mainly due to the decline in coking coal prices and the further decrease in 2024 was mainly due to the continued downward trend in coking coal prices. For the seven months ended 31 July 2024 and 2025, the revenue of Wuhai Energy decreased from approximately RMB6,459 million to RMB4,040 million, primarily due to the continued decline in coking coal prices.

For the two years ended 31 December 2023 and 2024, the profit for the year of Wuhai Energy amounted approximately RMB972 million and RMB1,241 million, respectively, representing an increase of approximately 27.67%.

As disclosed in the letter from the Board of the Circular, Wuhai Energy recorded a loss for the seven months ended 31 July 2025 mainly due to weaker downstream demand. A slowdown in the real estate sector and related industries resulted in subdued steel demand and a decline in coking coal prices during the period. On the production side, coal output decreased at certain mines of Wuhai Energy, including Gongwusu Mine and Laoshidan Mine, leading to an overall reduction in production and a slight decrease in sales volume.

1.4.5 Pingzhuang Coal

Pingzhuang Coal is a company established in the PRC with limited liability in 2000. It was originally a local state-owned enterprise. In April 2008, Chifeng Municipal Bureau of Industry and Information Technology transferred 48% equity to China Guodian Corporation (中國國電集團有限公司) for RMB2.091 billion. Shortly thereafter, Chifeng Municipal Bureau of Industry and Information Technology transferred an additional 3% equity to China Guodian Corporation without consideration, raising the shareholding of China Guodian Corporation to 51%. In 2009, China Guodian Corporation transferred its 51% equity interest to its subsidiary, Guodian Inner Mongolia Power Co., Ltd. (國電內蒙古電力有限公司) Pingzhuang Coal increased its registered capital to approximately RMB2.35 billion in 2011. Separately, Chifeng Municipal Bureau of Industry and Information Technology transferred 31.82% equity to China Cinda Asset Management Co., Ltd., which was subsequently transferred to China Energy in 2020 for approximately RMB1.60 billion. In 2021, Guodian Inner Mongolia Power Co., Ltd. transferred its 51% equity interest to China Energy without consideration, increasing the shareholding of China Energy to 82.82%. Other local state-owned entities and China Huarong Asset Management Co., Ltd. transferred the remaining 17.18% equity to China Energy. After completing registration changes in January 2022, China Energy became the only shareholder of Pingzhuang Coal, whose registered capital was subsequently increased to approximately RMB4.35 billion. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Pingzhuang Coal is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Pingzhuang Coal's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	35,794	34,354	33,693	32,892
Equity attributable to equity holders of the Company	3,437	2,632	5,586	5,366

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	5,905	10,045	9,199	9,837
Profit/(Loss) before income tax	1,340	(3,019)	1,837	1,695
Profit/(Loss) for the year/period	1,023	(3,389)	1,292	1,035
Profit/(Loss) attributable to equity holders of the Company	672	(1,615)	533	738

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Pingzhuang Coal amounted to approximately RMB9,837 million, RMB9,199 million and RMB10,045 million, respectively. The decrease in 2023 was primarily attributable to lower coal output during the year, which resulted from the river diversion project undertaken at Pingzhuang Coal Group's Yuanbaoshan open-pit coal mine to facilitate production continuity. The increase in 2024 was primarily attributable to the completion of the river diversion project in May 2024, following which coal production resumed to normal levels. For the seven months ended 31 July 2024 and 2025, the revenue of Pingzhuang Coal Group increased slightly from approximately RMB5,744 million to RMB5,905 million, resulting from the increase of production of coal.

As disclosed in the letter from the Board of the Circular, Pingzhuang Coal recorded a loss for the year ended 31 December 2024 despite maintaining stable year-on-year revenue growth. The decline in profitability was primarily attributable to a one-off donation made in 2024 by its subsidiary, Inner Mongolia Xilinhe Coal Chemical Co., Ltd. (內蒙古錫林河煤化工有限責任公司), through the Public Welfare Foundation of China Energy Group to the Inner Mongolia Autonomous Region Government for comprehensive ecological governance in Inner Mongolia. No such donation was made in 2025. Excluding this non-recurring item, Pingzhuang Coal's underlying operations remained stable and would have been profit making for the seven months ended 31 July 2025.

1.4.6 Inner Mongolia Construction Investment

Inner Mongolia Construction Investment is a company established in the PRC with limited liability in 2005. It was founded through joint capital contributions by China Guodian Corporation (which was subsequently merged into Shenhua Group Corporation Limited, and is now part of China Energy) and Hebei Construction & Investment Group Co., Ltd. (河北建投集團股份有限公司), with each party contributing RMB10 million and holding 50% equity interest in 2005. In 2008, China Guodian Corporation transferred its 50% equity interest to GD Power Development Co., Ltd. (國電電力發展股份有限公司). Inner Mongolia Construction Investment subsequently completed two rounds of capital increases in 2010 and 2014, raising its registered capital to RMB4,135 million, with both shareholders making further capital contributions in cash in proportion to their respective shareholdings. In 2024, Western Energy acquired the 50% equity interest held by GD Power Development Co., Ltd. and the 50% equity interest held by Hebei Construction & Investment Group Co., Ltd., for consideration of approximately RMB6,740 million for each acquisition. Following completion of the registration update on 23 April 2025, Western Energy became the sole shareholder of Inner Mongolia Construction Investment. It operates in the power, heat production and supply industry as well as coal mining and washing industry and is mainly engaged in pithead coal-fired power generation, coal mining, washing, processing, and sales. As at the Latest Practicable Date, Inner Mongolia Construction Investment is a wholly-owned subsidiary of Western Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Inner Mongolia Construction Investment's audited financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	15,040	15,003	14,687	15,595
Equity/(deficit) attributable to equity holders of the Company	(1,162)	(2,197)	4,940	6,220

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	2,872	3,066	2,705	7,307
Profit/(Loss) before income tax	964	(7,105)	(522)	1,497
Profit/(Loss) for the year/period	1,035	(7,126)	(547)	985
Profit/(Loss) attributable to equity holders of the Company	1,035	(7,126)	(547)	985

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Inner Mongolia Construction Investment amounted to approximately RMB7,307 million, RMB2,705 million and RMB3,066 million, respectively. The significant decrease in revenue for the year ended 31 December 2023 was mainly due to the suspension of coal operations during the conversion of exploration rights to mining rights, coupled with a decline in power generation. For the seven months ended 31 July 2024 and 2025, the revenue of Inner Mongolia Construction Investment increased from approximately RMB1,131 million to RMB2,872 million, primarily due to the resumption of coal operations.

As disclosed in the letter from the Board of the Circular, Inner Mongolia Construction Investment recorded a net loss for the year ended 31 December 2023 mainly because its coal mine operations were suspended in the second half of the year pending completion of procedures relating to the renewal of its mining licence, resulting in the absence of external coal sales during the period. For the year ended 31 December 2024, Inner Mongolia Construction Investment again recorded a net loss, primarily because mining operations continued to be suspended in the first half of the year pending completion of the mining licence procedures, and due to a significant increase in non-operating expenses arising from a donation made through the Public Welfare Foundation of China Energy Group to the Inner Mongolia Autonomous Region Government for comprehensive ecological governance in Inner Mongolia. For the seven months ended 31 July 2025, Inner Mongolia Construction Investment had resumed normal production and operations and return to normal profitability levels.

1.4.7 Shenyan Coal

Shenyan Coal is a company established in the PRC with limited liability in 2009. It was originally formed with registered capital of RMB1.44 billion, jointly invested by China Energy (which at that time was Shenhua Group Corporation Limited) (RMB734 million, 51%) and Shaanxi Yanchang Petroleum (Group) Co., Ltd. (陝西延長石油(集團)有限責任公司) (RMB706 million, 49%). In 2013, registered capital was increased to RMB2.18 billion, with China Energy contributing an additional RMB38 million, maintaining its 51% shareholding. In 2023, Shenyan Coal further increased its registered capital to approximately RMB2.74 billion with the introduction of external investors. China Energy made a simultaneous contribution of approximately RMB36 million, after which its holding was adjusted to 41%. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing and processing, and sales. As at the Latest Practicable Date, Shenyan Coal is held by China Energy, Shaanxi Yanchang Petroleum Mining Co., Ltd.* (陝西延長石油礦業有限責任公司), Shenmu State-Owned Capital Investment and Operation Group Co., Ltd.* (神木市國有資本投資運營集團有限公司), Shaanxi Yushen Energy Development and Construction Group Co., Ltd.* (陝西榆神能源開發建設集團有限公司), and Yulin Yuyang District Energy Investment Co., Ltd.* (榆林市榆陽區能源投資有限責任公司) as to approximately 41.00%, 39.00%, 7.50%, 7.00%, and 5.50% equity interest, respectively. The ultimate beneficial owners of China Energy and Shaanxi Yanchang Petroleum Mining Co., Ltd. are the SASAC and the State-owned Assets Supervision and Administration Commission of the People's Government of Shaanxi Province, respectively.

The key financial data of Shenyan Coal's audited financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	12,898	11,671	11,710	12,208
Equity attributable to equity holders of the Company	11,100	9,625	6,723	9,614

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	3,585	7,059	6,824	7,137
Profit before income tax	1,737	3,533	3,356	4,270
Profit for the year/period	1,475	2,973	2,846	3,601
Profit attributable to equity holders of the Company	1,475	2,973	2,846	3,601

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Shenyan Coal amounted to approximately RMB7,137 million, RMB6,824 million and RMB7,059 million, respectively. The revenue remained relatively stable in 2022, 2023 and 2024. For the seven months ended 31 July 2024 and 2025, the revenue of Shenyan Coal decreased from approximately RMB4,244 million to RMB3,585 million, primarily due to the decrease in coal prices in 2025 as compared with 2024.

For the two years ended 31 December 2023 and 2024, the profit for the year of Shenyan Coal amounted to approximately RMB2,846 million and RMB2,973 million, respectively, representing an increase of approximately 4.46%.

1.4.8 Jinshen Energy

Jinshen Energy is a company established in the PRC with limited liability in 2004. It was initially formed through capital contributions by Shanxi Coal Sales Corporation (山西省煤炭運銷總公司) and China Energy (which at that time was Shenhua Group Corporation Limited), with capital contributions of RMB15.3 million (51%) and RMB14.70 million (49%), respectively. Jinshen Energy subsequently completed capital increases in 2005, 2009, and 2011, raising its registered capital to RMB574 million, with China Energy's cumulative capital contributions totaling approximately RMB267 million. It operates in the coal mining and washing industry and is mainly engaged in coal mining, washing, processing and sales, and a small amount of coal distribution. As at the Latest Practicable Date, Jinshen Energy is held by Shanxi Coal Transportation and Sales Group Co., Ltd.* (山西煤炭運銷集團有限公司) and China Energy as to 51.00% and 49.00% equity interest, respectively. The ultimate beneficial owners of Shanxi Coal Transportation and Sales Group Co., Ltd. and China Energy are the State-owned Assets Supervision and Administration Commission of the People's Government of Shanxi Province and the SASAC, respectively.

The key financial data of Jinshen Energy's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	7,703	8,330	8,116	8,019
Equity attributable to equity holders of the Company	5,233	5,174	5,065	4,616

	Seven months ended 31 July 2025 (Audited)	Year ended 31 December 2024 (Audited)	Year ended 31 December 2023 (Audited)	Year ended 31 December 2022 (Audited)
Revenue	1,771	3,060	5,625	5,917
Profit before income tax	154	885	2,742	3,132
Profit for the year/period	96	649	2,044	2,312
Profit attributable to equity holders of the Company	59	395	1,564	1,848

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Jinshen Energy amounted to approximately RMB5,917 million, RMB5,625 million and RMB3,060 million, respectively. The revenue remained stable for the two years ended 31 December 2022 and 2023. The decrease in revenue for the year ended 31 December 2024 was primarily due to the temporary shutdown of one of Jinshen Energy coal mines for rectification. For the seven months ended 31 July 2024 and 2025, the revenue of Jinshen Energy decreased from approximately RMB2,006 million to RMB1,771 million, primarily driven by a decline in the average selling price per ton of coal.

For the two years ended 31 December 2023 and 2024, the profit for the year of Jinshen Energy amounted to approximately RMB2,044 million and RMB649 million, respectively, representing a decrease of approximately 68.25%.

1.4.9 Baotou Mining

Baotou Mining is a company established in the PRC with limited liability. Baotou Mining originated as Baotou Mining Bureau of Inner Mongolia Autonomous Region, established on 4 September 1980. In 1999, the entire Baotou Mining Bureau was transferred to China Energy (which at that time was Shenhua Group Corporation Limited) without consideration for unified management. On 18 January 2001, China Energy approved its restructuring into a limited liability company. Baotou Mining completed registration as a limited liability company on 20 April 2004 with registered capital of RMB67 million, and later increased its registered capital to approximately RMB2.38 billion. It operates in the road transportation industry and is mainly engaged in road transportation. As at the Latest Practicable Date, Baotou Mining is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Baotou Mining's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	4,574	4,979	5,451	1,592
Equity attributable to equity holders of the Company	4,405	4,415	1,349	1,247

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	93	132	168	182
Profit/(Loss) before income tax	107	5,016	52	(52)
(Loss)/Profit for the year/period	(10)	3,747	51	(23)
(Loss)/Profit attributable to equity holders of the Company	(10)	3,022	55	(23)

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Baotou Mining amounted to approximately RMB182 million, RMB168 million and RMB132 million, respectively. The decrease in 2023 was mainly due to the decrease in the construction and installation service revenue as its business volume decreased in 2023 and the further decrease in 2024 was mainly due to the continued decline in construction and installation service revenue and the decrease in toll revenue due to reduced traffic volume amid the downturn of the coal market. For the seven months ended 31 July 2024 and 2025, the revenue of Baotou Mining amounted to approximately RMB73 million and RMB93 million, respectively. The increase was mainly due to the increase of the local coal production volumes in 2025, which led to increased traffic volume and higher toll revenue.

For the two years ended 31 December 2023 and 2024, the profit for the year of Baotou Mining amounted to approximately RMB51 million and RMB3,747 million, respectively, representing an increase of approximately 7,247.06%.

1.4.10 Shipping Company

Shipping Company is a company established in the PRC with limited liability. In 2023, China Energy established its Shipping Company as a wholly-owned subsidiary with registered capital of RMB1 billion. It operates in the water transportation industry and is mainly engaged in water transportation. As at the Latest Practicable Date, Shipping Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Shipping Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	5,339	3,926	2,448	2,392
Equity attributable to equity holders of the Company	1,819	1,136	936	910

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	2,858	4,160	2,466	3,076
Profit/(Loss) before income tax	245	267	(74)	263
Profit/(Loss) for the year/period	183	220	(76)	197
Profit/(Loss) attributable to equity holders of the Company	183	200	(76)	127

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Shipping Company amounted to approximately RMB3,076 million, RMB2,466 million and RMB4,160 million, respectively. The decrease in revenue for the year ended 31 December 2023 was driven by a market-driven downturn in freight rates and an unfavorable change in the pricing model. The recovery in 2024 was fueled by the introduction of a revised, more favorable pricing formula and a significant expansion of the fleet's transport capacity. For the seven months ended 31 July 2024 and 2025, the revenue of Shipping Company increased from approximately RMB2,257 million to RMB2,858 million, primarily driven by expanded transport capacity, coupled with market-driven price adjustments for chartered vessels.

The profit for the year of Shipping Company was approximately RMB220 million for the year ended 2024, compared with a loss for the year of approximately RMB76 million for the year ended 31 December 2023.

1.4.11 Coal Trading Company

Coal Trading Company is a company established in the PRC with limited liability. Coal Trading Company originated as the China Clean Coal Company Transportation & Sales Branch (中國精煤公司運銷分公司), established on 8 April 1985 with approval of the former State Planning Commission. It was renamed Huaneng Clean Coal Transportation & Sales Branch (華能精煤公司運銷分公司) in 1987 and re-registered in 1993 as an enterprise with registered capital of RMB8 million funded entirely by Huaneng Clean Coal Company (華能精煤公司). Following structural adjustments within China Energy (which at that time was Shenhua Group Corporation Limited), the company's affiliation was transferred to China Energy in 1995. The company undertook several rounds of capital increases and reductions. In 2013, it was converted into a single-shareholder limited liability company, with registered and paid-in capital of RMB323 million, wholly owned by China Energy. It operates in the wholesale industry and is mainly engaged in coal sales and import/export, comprehensive utilisation and deep processing of coal, etc. As at the Latest Practicable Date, Coal Trading Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Coal Trading Company's audited consolidated financial statements for the three financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)	**As at 31 December 2022** (Audited)
Total assets	4,343	2,161	1,271	830
Equity attributable to equity holders of the Company	751	765	492	452

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)	**Year ended 31 December 2022** (Audited)
Revenue	2,432	9,124	5,433	3,773
Profit before income tax	40	91	59	74
Profit for the year/period	28	58	40	54
Profit attributable to equity holders of the Company	28	58	40	54

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the three years ended 31 December 2022, 2023 and 2024, the revenue of Coal Trading Company amounted to approximately RMB3,773 million, RMB5,433 million and RMB9,124 million, respectively. The increase in revenue was mainly due to the increase in sales volume of imported coal. For the seven months ended 31 July 2024 and 2025, the revenue of Coal Trading Company decreased from approximately RMB4,833 million to RMB2,432 million, primarily due to a decrease in both the sales volume and selling price of coal compared to the prior period.

For the two years ended 31 December 2023 and 2024, the profit for the year of Coal Trading Company amounted to approximately RMB40 million and RMB58 million, respectively, representing an increase of approximately 45.00%.

1.4.12 Port Company

Port Company is a company established in the PRC with limited liability. In 2023, China Energy established the Port Company as a wholly-owned subsidiary with registered capital of RMB100 million. It operates in the cargo handling and warehousing industry and is mainly engaged in removal of residual coal from railcars, coal sampling and sample preparation, and rapid coal quality testing. As at the Latest Practicable Date, Port Company is a wholly-owned subsidiary of China Energy and its ultimate beneficial owner is the SASAC.

The key financial data of Port Company's audited consolidated financial statements for the two financial years ended 31 December 2024 and the seven months ended 31 July 2025, prepared in accordance with the IFRS Accounting Standards are set out below:

Unit: RMB million

	As at 31 July 2025 (Audited)	**As at 31 December 2024** (Audited)	**As at 31 December 2023** (Audited)
Total assets	254	231	174
Equity attributable to equity holders of the Company	192	172	130

	Seven months ended 31 July 2025 (Audited)	**Year ended 31 December 2024** (Audited)	**Year ended 31 December 2023** (Audited)
Revenue	65	112	77
Profit before income tax	26	57	41
Profit for the year/period	20	42	30
Profit attributable to equity holders of the Company	20	42	30

As disclosed in the Appendix IV- MANAGEMENT DISCUSSION AND ANALYSIS OF THE TARGET COMPANIES of the Circular, for the two years ended 31 December 2023 and 2024, the revenue of Port Company amounted to approximately RMB76.8 million and RMB112.4 million, respectively. The significant increase in revenue for the year ended 31 December 2024 was primarily due to Port Company's operational ramp-up. Having only commenced operations in May 2023, the business was in its initial stage with a limited scale during that year. For the seven months ended 31 July 2024 and 2025, the revenue of Port Company decreased from approximately RMB74.7 million to RMB64.6 million, primarily due to weaker market demand from key downstream industries such as power and steel, coupled with a structural shift in China's energy mix towards renewables like wind and photovoltaic power, which has reduced coal consumption and subsequently lowered demand for coal transportation and sampling services.

For the two years ended 31 December 2023 and 2024, the profit for the year of Port Company amounted to approximately RMB30 million and RMB42 million, respectively, representing an increase of approximately 40.00%.

2. Reasons for and benefits of the Transaction

2.1 Background of the Transaction

As set out in the letter from the Board of the Circular, the coal industry has entered a new stage of high-quality development: As the "ballast stone" for national energy security, coal plays an important role in the supply assurance system. In its Guiding Opinions on Energy Work (《能源工作指導意見》) for 2025, the National Energy Administration proposed enhancing intensive and large-scale development, promoting the construction of coal supply assurance bases, and further advancing clean and efficient utilisation and intelligent development, marking the industry's entry into a new stage of safe, intelligent and green development. The Company's mergers and acquisitions (M&A) and restructuring will help integrate resources, build a resilient supply system, and promote transformation and upgrading.

Favourable policy and market environment for M&A and restructuring: In recent years, the CPC Central Committee and the State Council have attached great importance to capital market reform and the improvement of the quality of listed companies. Accordingly, the authorities have issued policies such as the Opinions on Further Improving the Quality of Listed Companies (《關於進一步提高上市公司質量的意見》) and the Several Opinions on Strengthening Supervision and Preventing Risks to Promote the High-quality Development of the Capital Market (《關於加強監管防範風險推動資本市場高質量發展的若干意見》), which encourage listed companies to focus on their principal businesses and integrate

premium resources. In September 2024, the CSRC issued the Opinions on Deepening the Reform of the M&A and Restructuring Market of Listed Companies (《關於深化上市公司併購重組市場改革的意見》) to support the consolidation of listed companies in line with the country's strategic emerging industries and industry chains, and in May 2025 revised the Administrative Measures for the Major Asset Restructuring of Listed Companies (《上市公司重大資產重組管理辦法》) to streamline the review and registration processes. The SASAC has also reiterated on multiple occasions that central state-owned enterprises should focus on their principal businesses and promote M&A and restructuring activities that are conducive to enhancing investment value.

Mature conditions for non-competition commitment: Since 2005, China Energy and the Company have entered into multiple Non-Competition Agreements and relevant supplemental agreement, which set out the arrangements and deadline (27 August 2028) for asset injection. As at the Latest Practicable Date, the Company has progressively completed a series of asset consolidations related to the avoidance of competition, achieving phased progress in the relevant integration efforts. Currently, the remaining assets within the scope of China Energy's commitment that have not yet been injected have largely met the conditions for injection. The Transaction is an important move by China Energy to honour its commitments to the capital market and further resolve the issue of competition in the same industry.

2.2 Purpose of the Transaction

As set out in the letter from the Board of the Circular, the purpose of the Transaction includes the following:

Act on energy security strategies and improve the supply assurance system:

The Company will consolidate the assets of resource bases in Xinjiang, Inner Mongolia, Shaanxi and Shanxi as well as port shipping and logistics assets, to boost collaboration among regions, enhance emergency supply capabilities during critical periods such as summer (for cooling) and winter (for heating), and shape a more reliable national system for emergency energy assurance.

Act on reform requirements and serve as a model for central SOE restructuring:

The Company will invest in the premium coal, pithead coal power and coal chemical assets of China Energy. The move will consolidate and optimise resources across the industry chain, lift asset quality, economies of scale, risk resilience and profitability, demonstrate the support of the controlling shareholder, and serve as a model for SOE restructuring.

Address competition in the same industry and protect minority shareholders:

The Company will make a one-off injection of premium core assets to eliminate business overlaps with the controlling shareholder, enhance scale and profitability, regulate the governance structure, and effectively safeguard the legitimate rights and interests of minority shareholders.

Enhance core functions and competitiveness:

The Company will consolidate the coal, pithead coal power, coal chemical, and logistics business, improve resource reserves and core production capacity, optimise the layout across the industry chain, and pursue lower costs and higher profitability. As such, the Company will deliver the "1+1>2" effect and help build a world-class integrated energy firm as a competitive listed company on the global stage.

Upon completion of the Transaction, the scale of the Company's operations will be substantially enlarged, with a material increase in coal recoverable reserves and coal production capacity. The nationwide layout of premium coal resources will be further enhanced, enabling the Company to better respond to potential future growth in coal demand. Through the integration of high-quality resource bases and related supporting assets, the Company's integrated operational advantages will be further strengthened, its core business scale will continue to expand, and its overall asset quality and profitability will be enhanced, thereby generating more stable and long-term returns for the Shareholders.

In the course of planning the Transaction, the Board of the Company also gave due consideration to the feasibility of acquiring similar high-quality resources held by other third parties or industry peers through market-oriented transactions. However, due to factors including the relative scarcity of premium coal resources, the concentration of such resources within large energy groups, the absence of clear disposal intentions on the part of certain potential targets, as well as the higher pricing uncertainty and greater execution complexity associated with market-based transactions, such alternative options were subject to significant constraints in terms of feasibility and certainty and did not result in a practicable implementation pathway.

After prudently considering the potential impact of different financing methods on the Company's capital structure, financial prudence and future operational flexibility, the Board is of the view that sole reliance on debt financing could, to a certain extent, increase the Company's financial burden and operational constraints. Taking into account considerations relating to financial costs, potential earnings per share dilution and the post-Transaction impact on the Company's profitability, the Board ultimately adopted the Transaction structure comprising a combination of share and cash consideration, supplemented by necessary supporting financing, with a view to enhancing earnings per share and creating higher returns for Shareholders. The Board considers that such arrangement is conducive to achieving a balanced enhancement of asset scale and profitability while maintaining prudent financial risk management, and is in the interests of the Company and its Shareholders as a whole.

2.3 Industry overview and prospects of the coal industry in China

As set out in the section headed "Further Information in Relation to the Target Assets" of the Circular, coal is the major source of energy and an important industrial raw material in China. Among the proven reserves of fossil energy in China, coal, petroleum and natural gas account for 94%, 5.4% and 0.6%, respectively, reflecting an energy endowment characterized by "rich in coal, scarcity of oil, shortage in gas". As a crucial basic industry, the coal industry has strongly supported the steady and rapid development of the national economy and society. In recent years, China's overall coal production has maintained steady growth, and China has become the world's largest coal producer. Since the second half of 2021, influenced by the requirements for ensuring coal supply, the production has experienced relatively rapid growth.

As China's primary energy source and a key industrial raw material, the coal sector has provided strong support for the development of China's economy and society. China is the world's largest consumer of coal. In 2024, the country accounted for approximately 55.2% of global coal consumption. With the development of new energy and adjustments in the energy structure, the proportion of coal consumption in China's total energy consumption has been continuously declining. However, within China's primary energy consumption structure in 2024, raw coal, crude oil, natural gas, hydropower, nuclear power, wind power and solar power accounted for 53.2%, 18.8%, 8.7% and 19.3%, respectively. Coal will maintain its dominant position in the consumption structure in the future, ensuring the sustained demand for coal. According to the China Energy Data Report (2025) (《中國能源數據報告(2025)》) released by the National Energy Research Institute, the share of coal in China's primary energy consumption mix has been declining steadily due to the rapid development of new energy sources and ongoing energy structure adjustments. Nevertheless, China's raw coal production reached 4.78 billion tonnes in 2024, representing an increase of approximately 1.2%. Based on the data from the China Coal Industry Association, over the past four years,

China has cumulatively produced 18.18 billion tonnes of coal, accounting for approximately 66.6% of the China's total primary energy production. In the process of diversifying the energy mix, it is expected that coal will remain the primary source of energy in order to ensure stable energy supply in the foreseeable future.

Thermal power generation is the major consumer of the national coal demand in the PRC. In terms of installed capacity, it had an accumulated installed capacity of 1,444 GW by the end of 2024, accounting for 43.14% of the total installed capacity. As of the end of June 2025, the installed capacity of thermal power reached 1,470 GW, representing a year-on-year increase of 4.7%, accounting for 40.4% of the total installed capacity of power generation (of which, 1,210 GW was coal power, accounting for 33.2% of the total installed capacity of power generation).

In terms of electricity generation, the proportion of thermal power in total electricity generation decreased from 72.35% in 2016 to 67.36% in 2024. Despite the rising proportion of new energy installed capacity and the declining share of thermal power installed capacity since 2021, the proportion of thermal power generation has remained relatively stable, with no significant downward trend. In 2024, while thermal power installed capacity represented only 43.14% of the nation's total installed capacity, thermal power generation still accounted for a substantial 67.36% of total electricity generation. This demonstrates that thermal power continues to serve as the backbone of China's power generation structure.

According to the research on the 14th Five-Year Plan for the Power Industry (《電力行業「十四五」發展規劃研究》) released by the China Electricity Council (CEC), the total electricity consumption across the nation is expected to reach 9,500 billion kWh by 2025, reflecting an average annual growth rate of 5% over the period from 2021 to 2025. The Global Energy Interconnection Development and Cooperation Organization predicts that the total electricity consumption in the PRC will increase from 8,300 billion kWh in 2021 to 160,000 billion kWh by 2050 and 170,000 billion kWh by 2060, indicating a substantial rise in electricity demand. In the future, coal is expected to remain as the primary source of China's energy generation and China's abundant coal reserves will continue to provide a solid foundation for the growth of the national economy.

Taking into account the above and the fact that the principal terms of the Transaction, including the consideration of the Target Assets, are fair and reasonable as far as the Independent Shareholders are concerned (as set out in our analysis in the section headed "3. Principal terms of the Asset Purchase Agreement" below), we are of the view that, despite the Transaction is not conducted in the ordinary and usual course of business of the Group, it is in the interests of the Company and the Independent Shareholders as a whole.

3. Principal terms of the Asset Purchase Agreement

Terms of the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement) are set out in the section headed "1. Principal Terms of the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement)" in the letter from the Board of the Circular. The major terms of the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement) are set out as follows:

Date	15 August 2025 (as supplemented by the Supplemental Asset Purchase Agreement on 19 December 2025)
Parties	The Company (as the buyer); and China Energy and Western Energy (as the sellers).
Transaction Structure	The Company shall (i) acquire 100% equity interest in Guoyuan Power, 100% equity interest in Xinjiang Energy, 100% equity interest in Chemical Company, 100% equity interest in Wuhai Energy, 100% equity interest in Pingzhuang Coal, 41% equity interest in Shenyan Coal, 49% equity interest in Jinshen Energy, 100% equity interest in Baotou Mining, 100% equity interest in Shipping Company, 100% equity interest in Coal Trading Company and 100% equity interest in Port Company held by China Energy by way of issuance of Consideration Shares and payment in cash; and (ii) acquire 100% equity interest in Inner Mongolia Construction Investment held by Western Energy by way of payment in cash. Except for Jinshen Energy, in which the Company will hold 49% equity interest, each of the other Target Companies will become a subsidiary of the Company upon completion of the Transaction.
Transaction Price and Payment Method	The transaction price is determined based on the valuation results set out in the Asset Valuation Reports issued respectively by China Enterprise Appraisal and China United Appraisal, both of which are qualified securities appraisal institutions, in respect of the value as of the Valuation Benchmark Date of 31 July 2025, and filed by China Energy, and was agreed upon by the parties to the Transaction on the basis of such filed valuation results.

The transaction price payable by the Company to China Energy for the acquisition of 100% equity in Guoyuan Power, 100% equity in Xinjiang Energy, 100% equity in Chemical Company, 100% equity in Wuhai Energy, 100% equity in Pingzhuang Coal, 41% equity in Shenyan Coal, 49% equity in Jinshen Energy, 100% equity in Baotou Mining, 100% equity in Shipping Company, 100% equity in Coal Trading Company, and 100% equity in Port Company has been set to be satisfied by way of issuance of Consideration Shares and payment in cash.

Accordingly, the Company will pay in aggregate RMB40,080 million by way of issuing Consideration Shares and RMB85,791 million in cash. The Company will pay the transaction consideration of RMB7,728 million in cash for its acquisition of 100% equity in Inner Mongolia Construction Investment from Western Energy. In aggregate, 30% of the total consideration for the transaction will be settled by issuing Consideration Shares, and the remaining 70% will be settled in cash.

The appraised value of the Target Assets, the transaction price and the payment arrangements are as follows:

(Unit: RMB'000)

		Payment Method		Total Consideration
No.	**Target Assets**	**Issuance of Shares as Consideration**	**Cash as Consideration**	
1	100% equity interest in Guoyuan Power	14,195,709.5	30,386,283.4	44,581,992.9
2	100% equity interest in Xinjiang Energy	3,859,680.9	8,261,746.7	12,121,427.6
3	100% equity interest in Chemical Company	9,513,608.7	20,364,125.4	29,877,734.1
4	100% equity interest in Wuhai Energy	4,526,087.0	9,688,206.3	14,214,293.3
5	100% equity interest in Pingzhuang Coal	1,777,985.5	3,805,823.8	5,583,809.3

No.	Target Assets	Payment Method		Total Consideration
		Issuance of Shares as Consideration	Cash as Consideration	
6	100% equity interest in Inner Mongolia Construction Investment	–	7,727,627.8	7,727,627.8
7	41% equity interest in Shenyan Coal	2,449,177.9	5,242,528.7	7,691,706.6
8	49% equity interest in Jinshen Energy	1,203,850.1	2,576,872.2	3,780,722.3
9	100% equity interest in Baotou Mining	1,446,449.7	3,096,163.1	4,542,612.8
10	100% equity interest in Shipping Company	681,986.6	1,459,809.9	2,141,796.5
11	100% equity interest in Coal Trading Company	274,166.2	586,859.9	861,026.1
12	100% equity interest in Port Company	150,802.3	322,796.2	473,598.5
Total		**40,079,504.3**	**93,518,843.5**	**133,598,347.8**

The appraised value of the entire equity interests of the twelve Target Companies involved in the Transaction is RMB143.675 billion. Taking into account the respective equity interest percentages in each of the Target Companies proposed to be acquired under the Transaction, the transaction price has been determined at RMB128.671 billion.

Subsequent to the Valuation Benchmark Date, China Energy made a capital contribution of RMB4.927 billion to the Chemical Company. Such post-valuation capital contribution was fully subscribed and has been paid up by China Energy. This post-valuation capital contribution was not included in the scope of appraisal nor the valuation conclusion of the relevant asset valuation report.

Accordingly, the final transaction price for the Transaction shall be the filed valuation results plus the post-valuation capital contribution amount (RMB4.927 billion). The adjusted final transaction price has therefore been determined at RMB133.598 billion.

Attribution of Profits and Losses for the Transition Period

During the Transition Period, for those Target Companies and their respective subsidiaries and investee companies in which equity interests or mining rights are valued using the income approach and adopted as the pricing basis (the "**Income Approach Assets**"), any profits generated during the Transition Period shall be enjoyed by the Company. If any loss is incurred by the Income Approach Assets during the Transition Period, the Counterparties who directly or indirectly hold the Income Approach Assets shall bear the obligation to make up such loss in proportion to their respective direct or indirect equity interest in the relevant Target Company as at the effective date of the agreement for the Transaction. For the Income Approach Assets with forecasted losses during the Transition Period, such obligation shall be capped at the forecasted amount, and any additional losses exceeding the forecasted amount shall be borne by the Counterparties in proportion to their respective direct or indirect equity interest in the relevant Target Company as at the effective date of the agreement for the Transaction.

For the avoidance of doubt, when calculating the profit or loss of the Income Approach Assets held by a Target Company, the aggregate profit or loss arising from all Income Approach Assets held by such Target Company shall be applied. Where the Transition Period overlaps with the performance compensation period stipulated under the Performance Compensation Agreement entered into among the parties, the Counterparties shall comply with the relevant provisions under the Performance Compensation Agreement, and shall not be required to bear any responsibility under the profit and loss arrangement for the Transition Period as set out in the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement).

Apart from the Income Approach Assets, any profits or losses arising from the other assets of the Target Companies during the Transition Period shall be enjoyed or borne by the Company.

The parties agree that, after completion of the Transaction, the profits and losses of the Target Assets for the Transition Period shall be determined as follows:

the Company shall engage an accounting firm that meets the requirements of the Securities Law of the PRC to conduct a completion audit, with the last day of the month in which the closing date falls as the audit reference date, on the profits and losses of the Target Assets for the period from (but excluding) the Valuation Benchmark Date to (and including) the closing date, and to issue a completion audit report; or any other approach as may be mutually agreed by the parties at the relevant time.

3.1 Our assessment on the consideration of the Target Assets

As set out above, the consideration of the Target Assets is determined based on the valuation results set out in the Asset Valuation Reports issued by China Enterprise Appraisal and China United Appraisal (each a "**Valuer**", and collectively, the "**Valuers**") as of 31 July 2025. According to the Asset Valuation Reports, the aggregate appraised value of the 12 Target Assets is RMB128.671 billion (the "**Valuation**"), and the transaction price is therefore determined to be the same. The following table sets forth a summary of the appraised value and the consideration of the Target Assets. Please refer to Appendix V of the Circular for a summary of the Asset Valuation Reports.

(Unit: RMB0'000)

No.	Target Assets	Total Consideration
1	100% equity interest in Guoyuan Power	4,458,199.29
2	100% equity interest in Xinjiang Energy	1,212,142.76
3	100% equity interest in Chemical Company	2,495,053.41
4	100% equity interest in Wuhai Energy	1,421,429.33
5	100% equity interest in Pingzhuang Coal	558,380.93
6	100% equity interest in Inner Mongolia Construction Investment	772,762.78
7	41% equity interest in Shenyan Coal	769,170.66
8	49% equity interest in Jinshen Energy	378,072.23
9	100% equity interest in Baotou Mining	454,261.28
10	100% equity interest in Shipping Company	214,179.65
11	100% equity interest in Coal Trading Company	86,102.61
12	100% equity interest in Port Company	47,359.85
Total		**12,867,114.78**

3.1.1 Scope of work and qualifications of the Valuers

We have performed the work as required under Rule 13.80(2) (b) Note 1(d) of the Listing Rules in relation to both Valuers. In particular, we have reviewed the Asset Valuation Reports and relevant documents obtained from both Valuers and interviewed them with particular attention to (i) the terms of engagement of the Valuers with the Company in relation to the Assets Valuation Reports; (ii) the certificates of qualifications and experience of the Valuer; and (iii) the valuation methodologies and assumptions used by the Valuers in formulating the Asset Valuation Reports.

We have obtained and reviewed the credentials of the Valuers and understand that both Valuers are qualified securities appraisal institutions certified with relevant professional qualifications required to perform the Valuation, including qualification to provide appraisal services for listed companies (the Valuers have completed relevant fillings with the Ministry of Finance of the People's Republic of China and CSRC), and qualification on the valuation of mining assets issued by Chinese Association of Mineral Resources Appraisers. The persons from China Enterprise Appraisal and China United Appraisal who are in-charge of the Valuation has over 20 years and 18 years of experience in the provision of valuation services to a wide range of clients in various industries, respectively, including the valuation of state-owned

enterprises for similar restructuring projects, as well as companies listed on the Stock Exchange and A-share companies. Both Valuers also confirmed to us that they were not involved in any incidents of non-compliance or investigation by regulators in the past two years. We have also conducted a desktop search on both Valuers and noted no irregularities.

Based on our review of the terms of engagement with the Company in relation to the Valuation for both Valuers and the discussion with the Valuers on the work performed in formulating the Asset Valuation Reports, we noted that the scope of work is appropriate for arriving at the Valuation and we are not aware of any limitations on the scope of work which might adversely impact on the degree of assurance given by the Asset Valuation Reports. Nothing has come to our attention that the parties to the Transaction had made formal or informal representation to both Valuers that contravenes with our understanding of the information, to a material extent, as set out in the Circular. Furthermore, both Valuers have confirmed their independence from the parties of the Transaction.

Furthermore, we noted from both Valuers that they have carried out on-site inspections and made relevant enquiries and searches for the preparation of the Asset Valuation Reports. The Valuers have also relied and made enquiries on (i) information provided by the Company, such as the financial information of the Target Companies, and have assumed the accuracy and completeness of such information; (ii) publicly available information from official sources for market data; and (iii) internal database in formulating the Asset Valuation Reports. Based on our review of the Asset Valuation Reports, nothing has come to our attention on the accuracy and completeness of the information relied on by the Valuers.

In light of the above, we are not aware of any matters that would cause us to question the Valuers' competence and independence, and we consider that the Valuer has sufficient expertise to perform the Valuation.

3.1.2 Valuation methodologies

We have reviewed the Asset Valuation Reports and discussed with both Valuers methodologies of, and bases and assumptions adopted for the valuations, and adjustments made to arrive at the Valuations. As advised by the Valuers, according to the relevant Valuation standards, the fundamental valuation approaches of valuation of enterprise include income approach, market approach and asset-based approach. The Valuers shall analyse the applicability of these three appraisal methods and properly select one or more appraisal method(s). Based on our discussion with the Valuers, we understood that:

(i) the income approach represents the quantified present value of the expected profitability of total assets, with an emphasis on overall expected profitability of the enterprise;

(ii) the market approach assesses the current fair market value of the valuation subject with reference to comparables on the market, with the characteristics of directly sourcing valuation data from market and convincing valuation conclusion; and

(iii) the asset-based approach refers to the valuation approach that determines the value of the valuation subject by reasonably assessing the value of various assets and liabilities included in the scope of valuation based on the balance sheet of the appraised entity as at the evaluation base date.

The following table sets forth the valuation methodologies applicable to each of the Target Companies and the valuation approach selected by the Valuer in determining the final appraised value:

	Applicable valuation approach				
Target Companies	**Asset-based approach**	**Income approach**	**Market approach**	**Selected approach**	**Reasons for the selected approach as advised by the Valuers**
Guoyuan Power	✓	✓		Asset-based approach	Guoyuan Power is a capital-intensive enterprise in the power and energy sector with clear asset structure. Its core value lies in tangible assets such as power generation units, transmission networks, land, and buildings. The company provided detailed asset and liability information, and the Valuer collected sufficient external data. A comprehensive inventory and appraisal of assets and liabilities was conducted. Therefore, the asset-based approach result is comparatively more reliable.
Xinjiang Energy	✓	✓		Asset-based approach	Xinjiang Energy's core business is coal mining and sales, with mining rights as its key assets. In this appraisal, the asset-based approach values mining rights using the discounted cash flow method, which is consistent with the income approach. The mining rights appraisal is based on objective coal market conditions. Thus, the asset-based approach more objectively reflects the market value of the entity.
Chemical Company	✓	✓		Asset-based approach	Chemical Company is a heavy-asset entity. It provided detailed asset and liability information, and the Valuer collected necessary external data. A full inventory and appraisal of the entity's assets and liabilities was performed. Therefore, the asset-based approach is relatively reliable.

	Applicable valuation approach				
Target Companies	**Asset-based approach**	**Income approach**	**Market approach**	**Selected approach**	**Reasons for the selected approach as advised by the Valuers**
Wuhai Energy	✓	✓		Asset-based approach	Wuhai Energy is a coal mining enterprise. Coal prices are highly affected by national policies and supply-demand conditions, bringing significant uncertainty to the income approach. The coal mining sector is capital-intensive, and the company's value mainly depends on mineable reserves and previously appraised mining rights. Therefore, the asset-based approach better reflects the enterprise value.
Pingzhuang Coal	✓	✓		Asset-based approach	Pingzhuang Coal's core business is coal mining and sales, with mining rights as key assets. The asset-based approach values mining rights using the discounted cash flow method, consistent with the income approach, and based on objective coal market conditions. Thus, the asset-based approach more objectively reflects the market value of the entity.
Inner Mongolia Construction Investment	✓	✓		Asset-based approach	Inner Mongolia Construction Investment is a coal-power integrated enterprise heavily reliant on coal sales. Coal prices and the thermal power business face considerable uncertainty due to national policies, supply-demand dynamics, and the "carbon peak and carbon neutrality" goals. The coal mining segment is capital-intensive and depends on mineable reserves and previously appraised mining rights. Therefore, the asset-based approach better reflects the enterprise value.

	Applicable valuation approach				
Target Companies	**Asset-based approach**	**Income approach**	**Market approach**	**Selected approach**	**Reasons for the selected approach as advised by the Valuers**
Shenyan Coal	✓	✓		Asset-based approach	Shenyan Coal's core business is coal mining and sales, with mining rights as key assets. The asset-based approach values mining rights using the discounted cash flow method, consistent with the income approach and based on objective market conditions. Thus, the asset-based approach more objectively reflects the market value of the entity.
Jinshen Energy	✓	✓		Asset-based approach	Jinshen Energy is a platform company engaged in unified management. The coal purchase and sales business it operates is primarily aimed at maintaining the normal operation of the platform company and is not for profit purposes. Therefore, the result from the income approach is not adopted as the appraisal conclusion. Under the asset-based approach, all assets and liabilities within the appraisal scope as of the appraisal base date have been appraised using appropriate methods. The appraisal results can objectively reflect the market value of the appraised entity's net assets.
Baotou Mining	✓	✓		Income approach	Since the core assets under the asset-based approach are also appraised using the income approach, the final results of the income approach and the asset-based approach differ slightly. Considering that the income approach appraises the value of the Baotou Mining based on its future profitability, it more intuitively reflects Baotou Mining's value.

	Applicable valuation approach				
Target Companies	**Asset-based approach**	**Income approach**	**Market approach**	**Selected approach**	**Reasons for the selected approach as advised by the Valuers**
Shipping Company	✓	✓		Asset-based approach	Shipping Company provided comprehensive asset and liability data, and the Valuer collected necessary external information. A thorough inventory and appraisal of assets and liabilities was conducted. Therefore, the asset-based approach results are comparatively more reliable.
Coal Trading Company	✓	✓		Asset-based approach	Coal Trading Company provided comprehensive asset and liability data, and the Valuer collected necessary external information. A thorough inventory and appraisal of assets and liabilities was performed. Therefore, the asset-based approach results are comparatively more reliable.
Port Company	✓	✓		Income approach	Port Company has relatively stable future revenue that can be reasonably estimated. The income approach can capture intangible value from management experience, market channels, and customer relationships that the asset-based approach cannot reflect. Therefore, the income approach better reflects the enterprise value.

As set out above, both the asset-based approach and the income approach are applicable in the valuation of each of the Target Companies. As advised by China Enterprise Appraisal, the reason for not adopting the market approach for the valuation of Xinjiang Energy, Wuhai Energy, Pingzhuang Coal, Inner Mongolia Construction Investment, Shenyan Coal, Jinshen Energy and Baotou Mining was mainly due to the fact that the market approach relies on the existence of an active public market with sufficient market data and comparable transaction cases. The appraised entities are non-listed companies and listed companies in the same industry differ significantly from the appraised enterprise in terms of business structure, corporate scale, asset allocation and utilisation, operational stage, growth potential, operational risks, financial risks, and others. Furthermore, there were few comparable transactions, mergers, or acquisitions within the same industry near the appraisal base date. Reliable operational and financial data from comparable transactions are difficult to obtain, making it impossible to calculate appropriate value ratios. As advised by China United Appraisal, the reason for not adopting the market approach for the valuation of Guoyuan Power, Chemical Company, Shipping Company, Coal Trading Company and Port Company was mainly due to the fact that recent transaction cases involving enterprises of comparable scale are unavailable, and there are few comparable listed companies with similar scale and business structure in the market.

We have reviewed the historical financial information and the management discussion and analysis of each of the Target Companies as set out in appendices II and IV of the Circular, respectively. From our review, we noted that each of the Target Companies appraised using the asset-based approach by the Valuers has significant fixed assets and intangible assets, such as mining rights and structures, machinery and equipment, land and buildings, etc.. Conversely, those valued using an income-based approach exhibit relatively predictable revenue streams, which can be reasonably projected based on their operational nature and income composition.

Furthermore, we noted that the Target Companies appraised using the asset-based approach are mainly conducting coal-related business. In such regards, we have conducted a research on the website of the Stock Exchange and identified an exhaustive list of two transactions involving (i) the acquisition of entities principally engaged in the coal-related business, (ii) with the valuation approach of the subject entity disclosed; and (iii) announced by a listed company on the Main Board of the Stock Exchange principally engaged in the coal-related business during the period

from 1 August 2023 and up to the date of the Asset Purchase Agreement (i.e., 15 August 2025) (the "**Comparable Acquisitions**"). Detailed of the Comparable Acquisitions are set out below:

Announcement date	Company (stock code)	Target	Target principal business	Consideration	Valuation approach of the target
8 Apr 2025	Yankuang Energy Group Company Limited (1171.HK)	Shandong Energy Group Xibei Mining Co., Ltd.	Coal mining, washing, processing and sales operations	RMB4,748.3 million	Asset-based approach
21 Jan 2025	The Company (1088.HK)	China Energy Hangjin Energy Co., Ltd.	Investment and construction of coal field, sales of purchased coal, coal mining and sales, and coal-electricity integrated project	RMB852.6 million	Asset-based approach

As set out above, the consideration of both of the Comparable Transactions has taken reference to a valuation report based on the asset-based approach. Given that (i) the research period covered a period of approximately two years prior to the date of the Asset Purchase Agreement, and (ii) the Comparable Transactions identified represent an exhaustive list of recent transactions involving listed companies on the Main Board of the Stock Exchange principally engaged in the coal-related business acquiring equity interests in coal-related entities, we consider the Comparable Transactions to be sufficient and representative for the purpose of evaluating whether the use of the asset-based approach for valuing companies in this sector is fair and reasonable. Nevertheless, it should be noted that the selection of a valuation approach is subject to, even for companies in the same sector, the specific financial conditions and unique circumstances of the entity being valued.

Based on the above, in particular that (i) the Valuation was conducted in compliance with relevant valuation standards; (ii) the Target Companies appraised by the asset-based approach have significant fixed assets and those appraised by the income approach have relatively stable income that could be reasonably estimated; and (iii) the valuation approach adopted by the Comparable Acquisitions, we concur with the Valuers that the selected valuation approach for each Target Companies is the most suitable approach in their valuation.

Valuation of Target Companies using asset-based approach

(i) Guoyuan Power

As stated in the Asset Valuation Report of Guoyuan Power, the valuation of 100% equity interest of Guoyuan Power as at 31 July 2025 based on the asset-based approach was RMB44,581.9929 million, representing an appreciation of approximately 86.15% or approximately RMB20,633.0183 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Guoyuan Power, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	2,003,662.96	3,978,677.56	1,975,014.60	The increase in net asset value of the subsidiaries/ associates due to (i) the strong business performance; (ii) the appreciation of the mining rights reflected in the book value.
Property, plant, and equipment	10,799.74	99,941.44	89,141.70	The cost of labour, machineries, and materials have significantly increased since the establishment of the properties and plant; and the useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the machineries and equipment.
Intangible assets	2,328.74	1,474.27	-854.47	Due to the depreciation of land use right.
– Land use right	927.29	–	-927.29	The corresponding valuation transferred into property, plant and equipment.
Total Assets	**2,780,969.62**	**4,844,271.45**	**2,063,301.83**	
Total liabilities	**386,072.16**	**386,072.16**	**–**	
Net Assets	**2,394,897.46**	**4,458,199.29**	**2,063,301.83**	

(ii) Xinjiang Energy

As stated in the Asset Valuation Report of Xinjiang Energy, the valuation of 100% equity interest of Xinjiang Energy as at 31 July 2025 based on the asset-based approach was RMB12,121.4276 million, representing an appreciation of approximately 106.58% or approximately RMB6,253.8890 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Xinjiang Energy, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	668,275.86	1,228,100.56	559,824.70	The increase in net asset value of the subsidiaries/ associates due to (i) the strong business performance; and (ii) the appreciation of the mining rights reflected in the book value.
Construction in progress	30,258.65	29,622.58	-636.07	Decreased as the relevant assets have been transferred from the construction in progress to the fixed assets.
Intangible assets	181,541.12	298,422.80	116,881.68	Due to the appreciation of land use rights.
– Land use right	8,468.35	174,033.44	165,565.09	Increase in market value with reference to the market price as of the Valuation Benchmark Date.
Total Assets	**1,914,656.73**	**2,528,307.06**	**613,650.33**	
Total Liabilities	**1,327,902.87**	**1,316,164.30**	**-11,738.57**	Due to adjustments on long-term payable resulting from the deferred income.
Net Assets	**586,753.86**	**1,212,142.76**	**625,388.90**	

(iii) Chemical Company

As stated in the Asset Valuation Report of Chemical Company, the valuation of 100% equity interest of Chemical Company as at 31 July 2025 based on the asset-based approach was RMB24,950.5341 million, representing an appreciation of approximately 81.41% or approximately RMB11,197.0431 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the long-term equity investments of Chemical Company, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	1,352,581.99	2,128,380.86	775,798.87	Due to the poor market performance of the coal chemical business, the book value was written down resulting from relevant impairment.
Property, plant, and equipment	189,727.72	393,781.55	204,053.83	Due to the poor market performance of the coal chemical business, the book value was written down resulting from relevant impairment.
Construction in progress	107,605.97	109,077.00	1,471.03	Appreciation taking into account the cost of capital.
Intangible assets	41,590.06	176,579.76	134,989.70	Due to the appreciation of land use rights.
– Land use right	36,493.00	163,319.92	126,826.92	Increase in market value with reference to the market price as of the Valuation Benchmark Date.
Total Assets	**2,424,434.58**	**3,544,138.89**	**1,119,704.31**	
Total Liabilities	**1,049,085.48**	**1,049,085.48**	**–**	
Net Assets	**1,375,349.10**	**2,495,053.41**	**1,119,704.31**	

(iv) Wuhai Energy

As stated in the Asset Valuation Report of Wuhai Energy, the valuation of 100% equity interest of Wuhai Energy as at 31 July 2025 based on the asset-based approach was RMB14,214.2933 million, representing an appreciation of approximately 38.85% or approximately RMB3,977.1897 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Wuhai Energy, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	125,990.36	396,045.89	270,055.53	The increase in net asset value of the subsidiaries/ associates due to the appreciation of the mining rights reflected in the book value.
Property, plant, and equipment	155,308.85	55,772.58	-99,536.27	Depreciation mainly due to write off of relevant mining rights that have no economic benefits.
Construction in progress	109,147.43	111,189.62	2,042.19	Appreciation taking into account the cost of capital.
Intangible assets	244,435.09	463,883.47	219,448.38	Mainly due to the appreciation of the mining rights.
– Land use right	20,449.34	19,920.53	-528.81	Due to the shorter actual remaining usable life of certain land parcels than the term stated on their land use right certificates.
Total Assets	**2,203,361.57**	**2,593,890.65**	**390,529.08**	
Total Liabilities	**1,179,651.21**	**1,172,461.32**	**-7,189.89**	Due to adjustments on long-term payable resulting from the deferred income.
Net Assets	**1,023,710.36**	**1,421,429.33**	**397,718.97**	

(v) Pingzhuang Coal

As stated in the Asset Valuation Report of Pingzhuang Coal, the valuation of 100% equity interest of Pingzhuang Coal as at 31 July 2025 based on the asset-based approach was RMB5,583.8093 million, representing an appreciation of approximately 685.44% or approximately RMB6,537.5897 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Pingzhuang Coal, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	280,285.01	805,199.44	524,914.43	The increase in net asset value of the subsidiaries/ associates due to the appreciation of the mining rights reflected in the book value.
Property, plant, and equipment	187,382.03	227,004.08	39,622.05	The cost of labour, machineries, and materials have significantly increased since the establishment of the properties and plant; and the useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the machineries and equipment.
Construction in progress	27,182.53	27,128.31	-54.22	Depreciation due to the removal cost.
Intangible assets	555,446.80	639,416.69	83,969.89	Mainly due to the appreciation of land use right.
– Land use right	6,136.92	128,803.12	122,666.20	Increase in market value with reference to the market price as of the Valuation Benchmark Date.
Total Assets	**1,817,123.39**	**2,465,612.28**	**648,488.89**	
Total liabilities	**1,912,501.43**	**1,907,231.35**	**-5,270.08**	Due to adjustments on long-term payable resulting from the deferred income.
Net Assets	**-95,378.04**	**558,380.93**	**653,758.97**	

(vi) Inner Mongolia Construction Investment

As stated in the Asset Valuation Report of Inner Mongolia Construction Investment, the valuation of 100% equity interest of Inner Mongolia Construction Investment as at 31 July 2025 based on the asset-based approach was RMB7,727.6278 million, representing an appreciation of approximately 764.82% or approximately RMB8,889.9912 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Inner Mongolia Construction Investment, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	31,045.32	31,702.92	657.60	The increase is mainly due to the appreciation of construction in progress of subsidiaries.
Property, plant, and equipment	652,074.95	732,939.65	80,864.70	The cost of labour, machineries, and materials have significantly increased since the establishment of the properties and plant; and the useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the machineries and equipment.
Construction in progress	148,736.73	155,232.89	6,496.16	The appreciation of construction in progress is due to the increase in cost of construction, cost of capital, and other expenditures.
Intangible assets	224,424.75	1,023,970.93	799,546.17	Mainly due to the appreciation of mining rights.
– Land use right	72,838.02	73,755.47	917.45	Increase in market value with reference to the market price as of the Valuation Benchmark Date.
Total Assets	**1,503,944.37**	**2,392,718.49**	**888,774.12**	
Total liabilities	**1,620,180.71**	**1,619,955.71**	**-225.00**	Due to adjustments on long-term payable resulting from the deferred income.
Net Assets	**-116,236.34**	**772,762.78**	**888,999.12**	

(vii) Shenyan Coal

As stated in the Asset Valuation Report of Shenyan Coal, the valuation of 100% equity interest of Shenyan Coal as at 31 July 2025 based on the asset-based approach was RMB18,760.2601 million, representing an appreciation of approximately 74.52% or approximately RMB8,010.3360 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Shenyan Coal, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	3,382.89	4,516.50	1,133.61	The net asset value of the associates increased due to the strong business performance.
Property, plant, and equipment	214,055.14	289,709.61	75,654.47	The cost of labour, machineries, and materials have significantly increased since the establishment of the properties and plant; and the useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the machineries and equipment.
Construction in progress	2,953.49	2,974.74	21.25	The assessed value takes into account the cost of capital.
Intangible assets	255,125.51	979,221.00	724,095.49	Mainly due to the appreciation of mining rights.
– Land use right	15,105.34	16,764.78	1,659.44	The useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the land use right.
Total Asset	**1,254,752.20**	**2,055,785.80**	**801,033.60**	
Total liabilities	**179,759.79**	**179,759.79**	**–**	
Net Asset	**1,074,992.41**	**1,876,026.01**	**801,033.60**	

(viii) Jinshen Energy

As stated in the Asset Valuation Report of Jinshen Energy, the valuation of 100% equity interest of Jinshen Energy as at 31 July 2025 based on the asset-based approach was RMB7,715.7597 million, representing an appreciation of approximately 695.57% or approximately RMB6,745.9240 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the mining rights of Jinshen Energy, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	81,854.81	756,099.46	674,244.65	The increase in net asset value of the subsidiaries/ associates due to (i) the strong business performance; and (ii) the appreciation of the mining rights reflected in the book value.
Property, plant, and equipment	1,874.29	2,226.99	352.70	The cost of labour, machineries, and materials have significantly increased since the establishment of the properties and plant; and the useful life adopted under the relevant accounting policy is shorter than the actual expected useful life of the machineries and equipment.
Intangible assets	18.09	30.33	12.24	The assessed value is based on the market value as of the Valuation Benchmark Date compared to the book value based on the amortized value.
Total Assets	**334,923.46**	**1,009,515.86**	**674,592.40**	
Total liabilities	**237,939.89**	**237,939.89**	**–**	
Net Assets	**96,983.57**	**771,575.97**	**674,592.40**	

(ix) Shipping Company

As stated in the Asset Valuation Report of Shipping Company, the valuation of 100% equity interest of Shipping Company as at 31 July 2025 based on the asset-based approach was RMB2,141.7965 million, representing an appreciation of approximately 19.24% or approximately RMB345.5781 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the long-term equity investment and fixed assets of Shipping Company, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	136,795.59	154,773.55	17,977.96	Fixed assets (primarily vessels) have appreciated due to improved market conditions, whereas their book value continues to reflect only historical cost.
Property, plant, and equipment	97,760.51	114,221.13	16,460.62	Principally due to the increase in market price of vessels.
Intangible assets	874.52	965.59	91.07	Appreciation of professional software under the replacement cost method as at the Valuation Benchmark Date.
Total Assets	**335,174.26**	**369,732.07**	**34,557.81**	
Total liabilities	**155,552.42**	**155,552.42**	**–**	
Net Assets	**179,621.84**	**214,179.65**	**34,557.81**	

(x) Coal Trading Company

As stated in the Asset Valuation Report of Coal Trading Company, the valuation of 100% equity interest of Coal Trading Company as at 31 July 2025 based on the asset-based approach was RMB861.0261 million, representing an appreciation of approximately 20.38% or approximately RMB145.7560 million from the book value. We have discussed with the Valuer and noted that the appreciation was mainly attributable to the increase in the appraised value of the long-term equity investments and fixed assets of Coal Trading Company, details of which have been set out in the table below:

	As at 31 July 2025			
Items	**Book Value under China Accounting Standards ("CAS")** **A** *RMB0'000*	**Appraised value** **B** *RMB0'000*	**Variance between the net book value and appraised value** **C=B-A** *RMB0'000*	**Reason for the increase/decrease in the appraised value as advised by the Valuer**
Long-term equity investments	38,899.80	44,204.02	5,304.22	Fixed assets (primarily vessels) have appreciated due to improved market conditions, whereas their book value continues to reflect only historical cost.
Property, plant, and equipment	2,328.12	11,697.63	9,369.51	Due to the appreciation of real estate located in Beijing, Shanghai and Guangzhou.
Total Assets	**383,729.73**	**398,305.33**	**14,575.60**	
Total liabilities	**312,202.72**	**312,202.72**	**–**	
Net Assets	**71,527.01**	**86,102.61**	**14,575.60**	

Valuation of Target Companies using income approach

(i) Baotou Mining

As noted from the Valuer, the income approach was adopted for Baotou Mining as it has the foundation and conditions for ongoing operations, with standardised accounting practices, clear management, stable and defined business sources. The management has detailed plans for the current operations and future development of Baotou Mining. The future expected income and operational risks can be reasonably predicted, meeting the conditions for using the income approach for appraisal. The Valuer has adopted the discounted cash flow model, and selected the free cash flow of the enterprise to indirectly determine the entire shareholders' equity by evaluating the overall value of the enterprise.

With reference to the letters from Ernst & Young, the reporting accountant of this Transaction, and the Board on the calculations of the discounted cash flow forecasts of Baotou Mining in the section headed "Further Information in Relation to the Target Assets" of the Circular, we understand that Ernst & Young is of the view that, so far as the arithmetical accuracy of the calculations of the forecast is concerned, the forecast has been properly compiled in all material respects, and the Board confirmed that the forecast as contained in the Asset Valuation Reports has been made after due and careful inquiry.

(a) Discount rate

When applying the income approach using the discounted cash flow model ("**DCF model**"), it is necessary to determine an appropriate discount rate. We noted that the Valuer has used the weighted average cost of capital ("**WACC**") to estimate the required rate of return of Baotou Mining, which we understand from the Valuer, is widely adopted for the purpose of estimating the required rate of return of a company under the DCF model. As advised by the Valuer, as Baotou Mining is principally engaged in the logistic business and expressway business in the transportation industry, a single discount rate could be applied in formulating the DCF model of Baotou Mining. Based on the assumptions and bases as discussed below, a discount rate of 9.01% was applied to the DCF model of Baotou Mining.

WACC is calculated based on the (i) cost of debt, (ii) cost of equity, and (iii) debt-to-equity ratio. Cost of debt was based on interest rate on debt after income tax; and the cost of equity was determined using the Capital Asset Pricing Model ("**CAPM**"), being the widely accepted model for the purpose of estimating the required rate of return on equity, after taking into account the risk-free rate, market risk premium, expected equity risk coefficient and specific risk premium. As advised by the Valuer, Baotou Mining has no debt and therefore its WACC only consist of cost of equity. We have obtained and reviewed the financial reports of the Baotou Mining and noted it has no interest-bearing borrowings in the past three years. The Valuer has assumed Baotou Mining to maintain such capital structure in formulating the DCF model.

In arriving the cost of equity using CAPM, we noted that the Valuer has adopted a risk-free rate of approximately 1.7%, being the yield to maturity of 10-year treasury bonds in the PRC as at the Valuation Benchmark Date. We understand from the Valuer that the 10-year yield to maturity of treasury bonds was adopted as it is a common market practice and the term of 10-year could mitigate and normalise market fluctuations in short term. From our review of the financial information of Baotou Mining, we noted that the revenue was mainly contributed by the toll revenue from the expressway business. In respect of the expressway business, we have reviewed the notice issued by local transportation department and noted that the operation period is over 10 years. Given Baotou Mining is principally operating in the PRC, and the expected prolonged operation of the major business segments of Baotou Mining, we concur with the Valuer that the adoption of the yield-to-maturity of 10-year PRC government bonds as the risk-free rate is appropriate. We have also (i) cross-checked such a rate from the website of "ChinaBond.com.cn" operated by the Central Depository and Clearing Corporation and noted that it is consistent with the rate adopted by the Valuer, and (ii) obtained information on Bloomberg and noted that the risk-free rate in China in 2025 up to the Valuation Benchmark Date ranged from approximately 1.6% to 1.9% with an average of approximately 1.7%.

On the other hand, the Valuer has derived the market risk premium with reference to the long-term average yield of the Chinese equity market, which is justifiable as Baotou Mining is principally operating in the PRC. In respect of equity risk coefficient for the transportation industry, we noted that the Valuer has made reference to the average beta coefficients of 36 comparable listed companies in the A-share market. We have

reviewed and discussed with the Valuer on the selection criteria of above mentioned comparable companies to determine the market beta and were given to understand that the selected comparable companies are mainly engaged in the same core business as the respective business sectors of Baotou Mining, being (i) listed on the main board of SSE or the Shenzhen Stock Exchange, (ii) principally engaged in transportation business in the PRC, (iii) excluded unrelated industries such as ports, public transportation, air transportation, cross-border logistics and consumer goods supply chain services, etc, and (iv) at least 40% revenue generated from such business as abovementioned in their respective latest financial year. Under the CAPM, beta measures the systematic risk of the company relative to the overall market. For a private company, beta was often derived with reference to the betas of listed companies in the same industry, which are considered to have similar operational and financial risks. Based on the same selection criteria, we have performed our independent research on the iFinD Financial Data Terminal and identified the same set of comparable companies used by the Valuer, and reviewed the principal business of such comparable companies based on publicly disclosed information. Given (i) the selection criteria are tailored to identify the betas of listed companies principally engaged in similar business to Baotou Mining, which represents the closest available parameters to be serve as proxies to the derive the beta of Baotou Mining, being a private company; and (ii) and the result from our independent research is consistent with those of the Valuer, we are of the view that the selected comparable companies in determining the market beta are appropriate. The Valuer has also taken into consideration the specific situation of Baotou Mining in determining the specific risk adjustment of 3% based on the differences in terms of enterprise scale, enterprise operational performance, industry positioning, operation capabilities, competitiveness etc. between Baotou Mining and comparable companies. Based on the above and the formula of CAPM, the cost of equity used for Baotou Mining was 9.51%. We have reviewed the data published in January 2025 by Aswath Damodaran, a professor at Stern School of Business at New York University whose work in equity risk premium is often adopted by the valuation industry internationally. From such information, we noted that the cost of equity for the transportation industry in the PRC ranged from 8.58% to 10.32% with an average of approximately 9.45%, which is comparable to that used by the Valuer.

Based on the above, we consider that the discount rate of Baotou Mining was determined based on reasonable estimation and after due and careful consideration and the discount rate adopted by the Valuer for Baotou Mining is fair and reasonable.

(b) Cash flow forecast

We have reviewed the analysis and factors considered by the Valuer in formulating the cash flow forecast of Baotou Mining, which mainly includes (i) forecast of operating income, (ii) forecast of operating costs; and (iii) forecast of capital expenditure and working capital requirements. The Valuer has also assumed that Baotou Mining will continue to maintain the existing business and management model in the future operating period.

The projected operating income was derived based on the expected toll income from expressway business and the rental income from logistics business. We have obtained and reviewed historical financials of the expressway business and logistics business of Baotou Mining and noted that (i) the toll income was calculated based on the traffic volume and the toll rate; (ii) the toll rate is expected to be consistent with the historical rate; and (iii) the traffic volume is expected to be stable, save for the slight decrease from the year end of 2026 taking into account a new expressway that would commence operation and might divert current traffic volume.

For our due diligence purposes to analyze the fairness and the reasonableness of the assumptions and the key inputs adopted by the Valuer, we also conducted the following work:

- We have obtained and review the toll rates standards issued by the local transportation department and noted that the toll rates applied in the abovementioned projection was in line with the toll rates in the Inner Mongolia Autonomous Region.

- We have reviewed the historical traffic volume of Baotou Mining for the two years ended 31 December 2024 and noted that (i) the estimated traffic volume for the year ending 31 December 2025 was in line with the average traffic volume in the previous years; and (ii) the traffic volume is expected to decrease by approximately 2% to 8% per year taking into account the potential negative impact from the new expressway that would commence operation.

The projected operating costs mainly includes maintenance and repair costs, depreciation and amortization, and employee remuneration. We have cross-checked the projection with the historical information and noted that they were in line with the respective average of such costs. The forecasted depreciation is generally in line with the historical data after considering the reasonable remaining life. The projected capital expenditure are mainly based on the estimated inputs for renewal of existing assets, and the acquisition of equipment required for continued operation.

(ii) Port Company

As noted from the Valuer, the income approach was adopted for Port Company as it has an established operating track record. Given the relatively stable income from the port-related services, including the truck coal clearance business, mechanical sampling business, and coal quality quick inspection business, it has a relatively stable revenue foundation in the future, and its future earnings and risks can be estimated. The Valuer has adopted the discounted cash flow model, and selected the free cash flow of the enterprise to indirectly determine the entire shareholders' equity by evaluating the overall value of the enterprise.

With reference to the letters from Ernst & Young, the reporting accountant of this Transaction, and the Board on the calculations of the discounted cash flow forecasts of Port Company in the section headed "Further Information in Relation to the Target Assets" of the Circular, we understand that Ernst & Young is of the view that, so far as the arithmetical accuracy of the calculations of the forecast is concerned, the forecast has been properly compiled in all material respects, and the Board confirmed that the forecast as contained in the Asset Valuation Reports has been made after due and careful inquiry.

(a) Discount rate

As mentioned above, when applying the income approach using the DCF model, it is necessary to determine an appropriate discount rate. We noted that the Valuer has used the WACC to estimate the required rate of return of Port Company, which we understand from the Valuer, is widely adopted for the purpose of estimating the required rate of return of a company under the DCF model. As advised by the Valuer, as Port Company is principally engaged in the truck coal clearance business, mechanical sampling business, and coal quality quick inspection business in the port-related service industry, a single discount rate could be applied in formulating the DCF model of Port Company. Based on the assumptions and bases as discussed below, a discount rate of 10.21% was applied to the DCF model of Port Company.

As discussed above, WACC is calculated based on the (i) cost of debt, (ii) cost of equity, and (iii) debt-to-equity ratio. Cost of debt was based on interest rate on debt after income tax; and the cost of equity was determined using the CAPM, being the widely accepted model for the purpose of estimating the required rate of return on equity, after taking into account the risk-free rate, market risk premium, expected equity risk coefficient and specific risk premium.

As set out in the Asset Valuation Report, the cost of debt of Port Company was determined with reference to the 5-year Loan Prime Rate (LPR) of 3.50% as announced by the People's Bank of China on 21 July 2025. We noted from the Valuer that the selection of the 5-year LPR, being the longest term for LPR was mainly due to the fact that LPR reflects the market's general interest rate level and is a common market practice to adopt such rates in similar valuation exercises. We performed checking on the data published on the website of the People's Bank of China and noted that the LPR adopted by the Valuer was consistent with the latest published 5-year LPR prior to the Valuation Benchmark Date. We also noted that such rate is within the range of interest rates of the Group's RMB denominated long-term borrowings of 1.80% to 4.41% or LPR-3.22% to LPR-0.56%, as disclosed in the 2024 AR. Given the above and that Port Company is principally operating in the PRC, we believe that it is fair and reasonable to adopt the 5-year LPR as the cost of debt.

In arriving the cost of equity using CAPM, we noted that the Valuer has adopted a risk-free rate of approximately 1.7%, being the yield to maturity of 10-year treasury bonds in the PRC as at the Valuation Benchmark Date. We understand from the Valuer that the 10-year yield to maturity of treasury bonds was adopted as it is a common market practice and the term of 10-year could mitigate and normalise market fluctuations in short term. Given Port Company is principally operating in the PRC, and the expected prolonged operation of the port business, we concur with the Valuer that the adoption of the yield-to-maturity of 10-year PRC government bonds as the risk-free rate is appropriate. We have also (i) cross-checked such a rate from the website of "ChinaBond.com.cn" operated by the Central Depository and Clearing Corporation and noted that it is consistent with the rate adopted by the Valuer, and (ii) obtained information on Bloomberg and noted that the risk-free rate in China in 2025 up to the Valuation Benchmark Date ranged from approximately 1.6% to 1.9% with an average of approximately 1.7%.

On the other hand, the Valuer has derived the market risk premium with reference to the long-term average yield of the Shanghai Composite Index, which is justifiable as Port Company is principally operating in the PRC. In respect of equity risk coefficient for the port-related service industry, we noted that the Valuer has made reference to the average beta coefficients of 16 comparable listed companies in the A-share market. We have reviewed and discussed with the Valuer on the selection criteria of above-mentioned comparable companies to determine the market beta and were given to understand that the selected comparable companies are mainly engaged in the same core business as the respective business sectors of Port Company, being (i) listed on the main board of SSE or the Shenzhen Stock Exchange, and (ii) principally engaged in provision of port-related services in the PRC with at least 40% of revenue generated from such business in their respective latest financial year. Under the CAPM, beta measures the systematic risk of the company relative to the overall market. For a private company, beta was often derived with reference to the betas of listed companies in the same industry, which are considered to have similar operational and financial risks. Based on the same selection criteria, we have performed our independent research on the iFinD Financial Data Terminal and identified the same set of comparable companies used by the Valuer, and reviewed the principal business of such comparable companies based on publicly disclosed information. Given (i) the selection criteria are tailored to identify the betas of listed companies principally engaged in similar business to

Port Company, which represents the closest available parameters to be serve as proxies to the derive the beta of Port Company, being a private company; and (ii) and the result from our independent research is consistent with those of the Valuer, we are of the view that the selected comparable companies in determining the market beta are appropriate. The Valuer has also taken into consideration the specific situation of Port Company in determining the specific risk adjustment of 5% based on the differences in terms of enterprise scale, enterprise development stage, competitiveness, reliance on key customers and suppliers, financing capabilities and financial stabilities etc. between Port Company and comparable companies. Based on the above and the formula of CAPM, the cost of equity used for Port Company was 13.01%. We have reviewed the data published in January 2025 by Aswath Damodaran, a professor at Stern School of Business at New York University whose work in equity risk premium is often adopted by the valuation industry internationally. From such information, we noted that the average cost of equity for the packaging and container, auto and truck and trucking industry in the PRC ranged from approximately 10.75% to 13.85% with an average of approximately 11.81%, and the cost of equity adopted by the Valuer is within the range of such data.

Based on the above, we consider that the discount rate of Port Company was determined based on reasonable estimation and after due and careful consideration and the discount rate adopted by the Valuer for Port Company is fair and reasonable.

(b) Cash flow forecast

We have reviewed the analysis and factors considered by the Valuer in formulating the cash flow forecast of Port Company, which mainly includes (i) forecast of operating income, and (ii) forecast of operating costs. The Valuer has also assumed that Port Company will continue to maintain the existing business and management model in the future operating period.

The projected operating income was derived based on the expected revenue from its coal unloading business, mechanised sampling business, and rapid coal quality inspection business. We have obtained and reviewed historical financials of Port Company and noted that (i) the income was derived based on the processing volume and the unit price; and (ii) the unit price is expected to remain constant with the historical rate.

For our due diligence purposes to analyze the fairness and the reasonableness of the assumptions and the key inputs adopted by the Valuer, we also conducted the following work:

- We have obtained and reviewed two contracts entered between the Port Company and its major clients, being all of the existing contracts of the Port Company as at the Latest Practicable Date. We noted that the projected unit price is in line with the historical price based on such contracts and is expected to remain constant. As the contracts reviewed represents all of the existing contracts on hand of the Port Company, we consider the contracts reviewed are sufficient and representative in evaluating the projected unit price.

- We have obtained and reviewed the budget plan of Port Company for the years ending 31 December 2025 and 2026 and noted that the processing volume adopted in the cash flow forecast used by the Valuers is in line with such plan, and is expected to remain constant since then.

The projected operating costs mainly includes employee remuneration, lease expense, depreciation and amortization, and intermediary service fee. We have cross-checked the projection with the historical information and noted that they were based on the historical average data and terms of existing contracts. The forecasted depreciation is generally in line with the historical data after considering the reasonable remaining life. The Valuer assumed no further capital investment is required for Port Company's existing operating capacity. The projected capital expenditure are mainly based on the estimated inputs for renewal of existing assets and additional working capital required for continued operation.

We have reviewed the Asset Valuation Reports and discussed with the Valuers in respect of the key assumptions adopted for performing the Valuation. We understand from the Valuer that the assumptions are commonly adopted in other valuations of similar assets and there is no unusual assumption which has been adopted during the Valuation. We also consider the assumptions adopted in the Asset Valuation Reports are general in nature and are not aware of any material facts which lead us to doubt the assumptions adopted by the Valuers.

Having taken into account the above, we are of the view that the key inputs and assumptions used in the Asset Valuation Reports were arrived at after due and careful consideration and we concur with the Valuers on the methodologies, key assumptions and input adopted for deriving the appraised value of each of the Target Companies. On this basis, we consider the consideration of the Target Assets, which were based on the respective appraised value, to be fair and reasonable.

3.1.3 Comparable Companies

In order to cross check the appraised value, we have, as part of our independent work done, further assess the fairness and reasonableness of the Valuation of the Target Companies, we have conducted independent research, for reference only, to cross-check the implied valuation multiples of the Target Companies to the comparable companies of the Target Companies. We have conducted research on iFinD Financial Data Terminal to identify comparable companies for Target Companies (collectively, the "**Comparable Companies**") and compared the price-to-earnings multiples (the "**P/E Ratio(s)**") and the price-to-book multiples (the "**P/B Ratio(s)**") of the Target Companies based on the consideration of the Target Companies with those of the Comparable Companies. The P/E Ratios and the P/B Ratios are adopted because they are two of the most widely accepted multiples for valuing businesses and are appropriate multiples to be adopted in this case considering the Target Companies' financial conditions.

Taking into account the different business nature of the Target Companies, we have categorized the Target Companies into 3 groups based on their principal business as follow:

(i) Companies principally engaged in the coal mining, washing and/or processing, distribution and/or sales of coal, power supply and related business: Guoyuan Power, Xinjiang Energy, Chemical Company, Wuhai Energy, Pinzhuang Coal, Inner Mongolia Construction Investment, Shenyan Coal, Jinshen Energy and Coal Trading Company (collectively, the "C**oal-related Group**"). As Inner Mongolia Construction Investment recorded a loss in the recent financial year and is in a net liability position, we have extended our research to include price-to-sales multiples (the "**P/S Ratio(s)**") for comparability between Inner Mongolia Construction Investment and the Comparable Companies under the Coal-related Group;

(ii) Companies principally engaged in the transportation industry: Baotou Mining and Shipping Company (collectively, the "**Transportation Group**"); and

(iii) Port Company, which is principally engaged in the cargo handling and warehousing industry.

(a) Coal-related Group

We have identified an exhaustive list of 18 companies which (i) are listed on the main board of SSE or the Shenzhen Stock Exchange; and (ii) principally engaged in coal mining, washing and/or processing, distribution and/or sales of coal, power supply and related business in the PRC with at least 80% of revenue generated from such business in their respective latest financial year:

Notes:

1. *The market capitalisation of the Comparable Companies were based on their respective market capitalisation as at the date of the Asset Purchase Agreement (i.e. 15 August 2025), as extracted from iFinD Financial Data Terminal.*

2. *P/S Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective revenue on their latest published annual results.*

3. *P/E Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective net profit attributable to equity shareholders on their latest published annual results.*

4. *P/B Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective net assets attributable to equity shareholders on their latest published financial results as at 30 June 2025.*

5. *The implied P/S Ratios, P/E Ratios and P/B Ratios of the Target Companies in the Coal-related Group was calculated based on the implied valuation for 100% equity interest of the Target Companies derived from the respective consideration, the respective revenue and respective net profit attributable to equity shareholders for the year ended 31 December 2024, and the net assets attributable to equity shareholders as at 31 July 2025.*

For Inner Mongolia Construction Investment, as mentioned above, the P/E Ratio and P/B Ratio analysis is not applicable. We have conducted the research for the P/S Ratios with the Comparable Companies under the Coal-related Group and the P/S ratios of Inner Mongolia Construction Investment of approximately 2.5 times is within the range of the P/S Ratios of the Comparable Companies from 0.2 times to 4.6 times.

As set out in the table above, the P/E Ratios of the Comparable Companies for the Coal-related Group ranged from approximately 7.9 times to 18.2 times. The average and median of P/E Ratios are approximately 11.8 times and 10.7 times, respectively. Save for Jinshen Energy and Chemical Company, each of the P/E Ratios of the Target Companies under the Coal-related Group is within or below the range of P/E Ratios of the Comparable Companies. The P/E Ratios of Jinshen Energy and Chemical Energy of approximately 19.5 times and 18.3 times, respectively, are slightly higher than the maximum of the P/E Ratios of the Comparable Companies.

The P/B Ratios of the Comparable Companies for the Coal-related Group ranged from approximately 0.6 times to 22.0 times. Excluding the outlier with P/B ratio of over 20 times, the average and median P/B Ratios are approximately 1.3 times and 1.2 times, respectively. Each of the P/B Ratios of the Target Companies under the Coal-related Group is within the range of P/B Ratios of the Comparable Companies, excluding the outlier. As such, we are of the view that the consideration of Target Companies under the Coal-related Group are reasonable.

(b) Transportation Group

We have identified an exhaustive list of 23 companies which (i) are listed on the main board of SSE or the Shenzhen Stock Exchange, (ii) principally engaged in transportation business in the PRC with at least 80% of revenue generated from such business in their respective latest financial year:

Stock code	**Company name**	**Principal business**	**Market capitalisation** *(RMB million)* *(Note 1)*	**P/E Ratio** *(times)* *(Note 2)*	**P/B Ratio** *(times)* *(Note 3)*
601816. SH	Beijing-Shanghai High Speed Railway Co., Ltd.	Freight transportation business and railway operation services	263,709.4	20.7	1.3

3. *P/B Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective net assets attributable to equity shareholders on their latest published financial results as at 30 June 2025.*

4. *The implied P/E Ratios and P/B Ratios of the Target Companies in the Transportation Group was calculated based on the implied valuation for 100% equity interest of the Target Companies derived from the respective consideration, the respective revenue and respective net profit attributable to equity shareholders for the year ended 31 December 2024, and the net assets attributable to equity shareholders as at 31 July 2025.*

As set out in the table above, the P/E Ratios of the Comparable Companies for the Transportation Group ranged from approximately 4.7 times to 220.9 times. Excluding outliers of over 50 times, the average and median P/E Ratios are approximately 16.6 times and 15.2 times, respectively. Each of the P/E Ratios of the Target Companies under the Transportation Group is below the average and median of P/E Ratios of the Comparable Companies, excluding outliers.

The P/B Ratios of the Comparable Companies for the Transportation Group ranged from approximately 0.7 times to 10.7 times. Excluding outliers of over 10 times, the average and median P/B Ratios are approximately 1.5 times and 1.3 times, respectively. Each of the P/B Ratios of the Target Companies under the Transportation Group is below the average and median of P/B Ratios of the Comparable Companies, excluding outliers. As such, we are of the view that the consideration of Target Companies under the Transportation Group are reasonable.

(c) Port Company

We have identified an exhaustive list of 14 companies which (i) are listed on the main board of SSE or the Shenzhen Stock Exchange, (ii) principally engaged in provision of port-related services in the PRC with at least 80% of revenue generated from such business in their respective latest financial year:

Stock code	Company name	Principal business	Market capitalisation *(RMB million)* *(Note 1)*	P/E Ratio *(times)* *(Note 2)*	P/B Ratio *(times)* *(Note 3)*
S600018. SH	Shanghai International Port (Group) Co., Ltd.	Provision of port-related services	133,169.4	8.9	1.0
601018. SH	Ningbo Zhoushan Port Company Limited	Provision of port-related services	70,814.0	14.5	0.9
601298. SH	Qingdao Port International Co., Ltd.	Provision of port-related services	56,667.3	10.8	1.3
001872. SZ	China Merchants Port Group Co., Ltd.	Provision of port-related services	50,980.7	11.3	0.8
601880. SH	Liaoning Port Co., Ltd.	Provision of port-related services	38,487.8	33.6	1.0
601228. SH	Guangzhou Port Company Limited	Provision of port-related services	25,576.0	26.5	1.2
601000. SH	Tangshan Port Group Co., Ltd.	Provision of port-related services	23,881.5	12.1	1.2
000582. SZ	Beibu Gulf Port Co., Ltd.	Provision of port-related services	19,620.7	16.1	1.0
601326. SH	Qinhuangdao Port Co., Ltd.	Provision of port-related services	18,717.8	12.0	0.9

Port Company		Cargo handling and warehousing industry	473.6	11.3	2.5

Notes:

1. *The market capitalisation of the Comparable Companies were based on their respective market capitalisation as at the date of the Asset Purchase Agreement (i.e. 15 August 2025), as extracted from iFinD Financial Data Terminal.*

2. *P/E Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective net profit attributable to equity shareholders on their latest published annual results.*

3. *P/B Ratios of the Comparable Companies were calculated based on their market capitalisation as mentioned in note 1, divided by their respective net assets attributable to equity shareholders on their latest published financial results as at 30 June 2025.*

4. *The implied P/E Ratios and P/B Ratios of the Target Companies in the Port Group was calculated based on the implied valuation for 100% equity interest of the Target Companies derived from the respective consideration, the respective revenue and respective net profit attributable to equity shareholders for the year ended 31 December 2024, and the net assets attributable to equity shareholders as at 31 July 2025.*

The P/E Ratios of the Comparable Companies for Port Company ranged from approximately 8.9 times to 39.2 times. The average and median P/E Ratios are approximately 19.7 times and 14.8 times, respectively. The P/E Ratios of Port Company is below the average and median of P/E Ratios of the Comparable Companies for Port Company.

The P/B Ratios of the Comparable Companies for Port Company ranged from approximately 0.7 times to 1.8 times, with an average of approximately 1.1 times and a median of approximately 1.0 times. The implied P/B Ratio of the Port Company exceeds those of the Comparable Companies. As noted earlier, the Port Company benefits from relatively stable future income streams, enhanced by intangible assets such as management expertise, established market channels, and strong customer relationships. Furthermore, since the Valuer employed an income approach to value the Port Company, which inherently focuses on future profitability and cash generation, we place greater reliance on the P/E Ratio, given its direct alignment with profitability metrics. In summary, although the P/B Ratio of the Port Company is higher than those of the Comparable Companies, the supportive P/E Ratio affirms the valuation of the Port Company. Accordingly, we are of the view that the consideration of the Port Company remains reasonable.

4. Principal terms of the Consideration Shares

Details of the plan for the issuance of Consideration Shares are set out in the section headed "2. Plan for the Issuance of Consideration Shares" in the letter from the Board of the Circular. Principal terms of the Consideration Shares are set out as follows:

Type, Par Value and Listing Venue of Consideration Shares to be Issued	Domestic listed ordinary shares denominated in RMB (A Shares) with a par value of RMB1.00 per Share, which will be listed on the SSE. The Consideration Shares, upon issuance, will rank pari passu in all respects with the A Shares in issue at the time of the issuance of such Consideration Shares.
Target Subscriber	China Energy
Pricing Basis, Pricing Benchmark Date, and Issuance Price of Consideration Shares	The Pricing Benchmark date for the issuance of Consideration Shares is the date of the announcement of the resolution of the 12th meeting of the sixth session of the Board of the Company (i.e., 16 August 2025). The issuance price of the Consideration Shares is RMB30.38 per share, which complies with the Administrative Measures for Restructuring, and shall not be lower than the audited net assets per share attributable to shareholders of the Company, after giving effect to any ex-rights or ex-dividend adjustments, as at the end of the latest period prior to the disclosure of the proposal for the issuance of Consideration Shares (i.e. 31 December 2024), being RMB21.48 per share as calculated in accordance with the PRC Accounting Standards for Business Enterprises.

Pursuant to Article 46 of the Administrative Measures for the Major Asset Restructuring of Listed Companies, the issuance price of shares by a listed company shall not be lower than 80% of the market reference price. The market reference price refers to one of the average trading prices of the shares of the listed company for the 20, 60 or 120 trading days preceding the date of the announcement of the board resolution in relation to the issuance of shares for the purchase of assets. In this regard, as the announcement date of the resolution of the 12th meeting of the sixth session of the Board (i.e., 16 August 2025) was the announcement date of the board resolution at which the issuance of Consideration Shares was first considered and approved, such date was required, in accordance with the applicable regulatory requirements, to be used as the pricing benchmark date. Accordingly, the final issuance price was not lower than 80% of the average trading price of the Company's shares for the relevant 20, 60 or 120 trading-day period preceding such pricing benchmark date. For illustration purposes, details of the average trading prices of the Shares over the 20 trading days, 60 trading days and 120 trading days immediately preceding the Pricing Benchmark Date (adjusted for any ex-rights and ex-dividend effects during the respective periods), together with 80% of such average trading prices, are set out in the table below:

Calculation period of the average trading price of the Shares	**Average trading prices** *(RMB/Share)*	**80% of the Average trading prices** *(RMB/Share)*
Last 20 trading days	38.07	30.46
Last 60 trading days	37.69	30.16
Last 120 trading days	36.17	28.94

Note: The average trading price for the preceding N trading days is calculated by dividing the total trading value over the preceding N trading days by the total trading volume over the same period. The data for 80% of the average trading prices are rounded up to the nearest two decimal places.

Such pricing mechanism is formulated in compliance with the applicable regulatory requirements and is determined with reference to prevailing market practice and regulatory precedents, including comparable major asset restructurings of listed companies. The Company considers that, having taken into account the above factors, the pricing mechanism is fair and reasonable so far as the Company and its Shareholders as a whole are concerned.

The issuance price of RMB30.38 per share represents:

(a) a discount of approximately 25.15% to the closing price of RMB40.59 per A Share as quoted on the SSE on the Latest Practicable Date;

(b) a discount of approximately 19.12% to the closing price of RMB37.56 per A Share as quoted on the SSE on 1 August 2025 (being the Last Trading Day);

(c) a discount of approximately 19.99% to the average closing price of RMB37.97 per A Share for the five consecutive trading days up to and including the Last Trading Day;

(d) a discount of approximately 21.52% to the average closing price of RMB38.71 per A Share for the thirty consecutive trading days up to and including the Last Trading Day;

(e) a discount of approximately 22.24% to the average closing price of RMB39.07 per A Share for the sixty consecutive trading days up to and including the Last Trading Day;

(f) a premium of approximately 40.52% over the audited consolidated net asset value attributable to shareholders of RMB21.62 per Share as at 31 December 2024 as extracted from the Company's latest annual report published on the Hong Kong Stock Exchange; and

(g) a premium of approximately 49.21% over the unaudited consolidated net asset value attributable to shareholders of RMB20.36 per Share as at 30 June 2025 as extracted from the Company's latest interim report published on the Hong Kong Stock Exchange.

During the period between the Pricing Benchmark Date and the issuance date, if there are any ex-rights or ex-dividend events of the Company, such as distribution of dividend, issue of bonus share, rights issue or capitalisation issue, the issuance price will be adjusted according to the following formula, and the calculation result will be rounded up to the nearest two decimal places. The adjustment formula for the issuance price is as follows:

In the event of bonus issue or capitalisation issue: $P_1=P_0/(1+n)$;

In the event of rights issue: $P_1=(P_0+A\times k)/(1+k)$;

In the event of the above two items implemented simultaneously: $P_1=(P_0+A\times k)/(1+n+k)$;

In the event of distribution of cash dividend: $P_1=P_0-D$;

In the event that the above three items are implemented simultaneously: $P_1=(P_0-D+A\times k)/(1+n+k)$.

Where, "P_0" is the issuance price of the Consideration Shares before adjustment; "n" is the rate of bonus issue or rate of capitalisation issue; "k" is the rights issue ratio; "A" is the subscription price for the rights issue; "D" is the amount of cash dividend per share; and "P_1" is the adjusted issuance price. Except for the adjustment of the issuance price resulting from the aforesaid ex-rights and ex-dividend events, no issuance price adjustment mechanism is set for the Transaction for the time being.

On 24 October 2025, the Company convened the second extraordinary general meeting of 2025, at which the Resolution regarding the "Interim Profit Distribution Plan of China Shenhua Energy Company Limited for 2025" was considered and approved, pursuant to which, the Company declared a cash dividend of RMB0.98 (tax inclusive) per Share, based on the total share capital of the Company prior to the implementation of the distribution. The Company will complete the distribution of the 2025 interim dividend around 24 December 2025.

As the Company has implemented the 2025 interim profit distribution and in accordance with the pricing principles set out above, the issuance price for the Consideration Shares has been adjusted from RMB30.38 per Share to RMB29.40 per Share.

Number of Consideration Shares to be Issued

The number of Consideration Shares to be issued shall be determined according to the following formula: Total number of the Consideration Shares to be issued = The portion of the transaction consideration corresponding to the issuance of Consideration Shares/issuance price.

The number of new Shares to be acquired by China Energy, as calculated according to the above formula, shall be rounded down to the nearest whole Share, and any fractional Share shall be deemed as a donation to the Company and directly included in the capital reserve of the Company. The final number of the Consideration Shares to be issued shall be the number as approved by the EGM, reviewed and approved by the SSE and registered with the CSRC.

Based on the transaction price of the Target Assets, the issuance price of the Consideration Shares and the proportion of share consideration, the number of Consideration Shares to be issued is 1,363,248,446 A Shares, accounting for approximately 6.42% of the total share capital of the Company after the completion of the Transaction. The specific details are as follows:

No.	Target Assets	Issuance of the Shares as consideration *(RMB'000)*	Number of the Issuance of the Shares *('000 Shares)*
1	100% equity interest in Guoyuan Power	14,195,709.5	482,847.3
2	100% equity interest in Xinjiang Energy	3,859,680.9	131,281.7
3	100% equity interest in Chemical Company	9,513,608.7	323,592.1
4	100% equity interest in Wuhai Energy	4,526,087.0	153,948.5
5	100% equity interest in Pingzhuang Coal	1,777,985.5	60,475.7
6	41% equity interest in Shenyan Coal	2,449,177.9	83,305.4
7	49% equity interest in Jinshen Energy	1,203,850.1	40,947.3
8	100% equity interest in Baotou Mining	1,446,449.7	49,199.0
9	100% equity interest in Shipping Company	681,986.6	23,196.8
10	100% equity interest in Coal Trading Company	274,166.2	9,325.4
11	100% equity interest in Port Company	150,802.3	5,129.3
Total		**40,079,504.3**	**1,363,248.4**

During the period between the Pricing Benchmark Date and the Issuance Date, if there are any ex-rights and ex-dividend events of the Company, such as distribution of dividend, bonus issue, rights issue or capitalisation issue, or the issuance price is adjusted according to the abovementioned issuance price adjustment mechanism, the number of Consideration Shares to be issued will also be adjusted accordingly according to the adjustment of the issue price.

Lock-up Period

China Energy shall not transfer the Shares of the Company acquired under the Transaction within 36 months from the date of the completion of the issuance of Consideration Shares. If additional Shares are allotted or issued due to, among others, the bonus issue, capitalisation issue or rights issue of the Company, any additional Shares so allotted or issued will also be subject to the above-mentioned lock-up period. However, transfers permitted under applicable laws, regulations and regulatory documents are not subject to such restrictions.

Where the closing price of the Shares of the Company is lower than the issue price for 20 consecutive trading days during the 6 months after completion of the Transaction or the closing price is lower than the issue price at the end of the 6 months after completion of the Transaction, the lock-up period of such Shares of the Company held by China Energy will be automatically extended for another 6 months.

The Shares of the Company already held by China Energy and its concert party, Capital Holdings, prior to the Transaction shall not be transferred within 18 months after completion of the Transaction. If additional Shares are allotted or issued due to the Company's bonus issue, capitalisation of capital reserves or rights issue, any such additional Shares shall also be subject to the same lock-up period. However, transfers permitted under applicable laws, regulations and normative documents shall not be subject to such restriction.

Arrangements for Undistributed Accumulated Profit

The Company's accumulated undistributed profits accrued prior to the issuance of the Consideration Shares shall, from the date of completion of the issuance of the Consideration Shares, be jointly shared by the existing and new Shareholders of the Company after such issuance in proportion to their respective shareholdings as registered with CSDC.

General Mandate

The Consideration Shares will be issued pursuant to the General Mandate. The maximum number of A Shares that can be issued under the General Mandate is 3,298,207,591 A Shares. As at the Latest Practicable Date, (i) no A Shares have been issued pursuant to the General Mandate; and (ii) the General Mandate is sufficient for the issue of the Consideration Shares.

The validity period of the plan for the Transaction is twelve months from the date on which the Shareholders approve the resolution relating to the Transaction. If the Company obtains the approval from the CSRC for the Transaction within such validity period, the validity period shall automatically be extended to the date of completion of the Transaction.

4.1 Our assessment on the terms of the Consideration Shares

4.1.1 The issuance price

As set out above, issuance price of the Consideration Shares is RMB30.38 per share, which complies with the Administrative Measures for Restructuring, and shall not be lower than the audited net assets per share attributable to shareholders of the listed company, after giving effect to any ex-rights or ex-dividend adjustments, as at the end of the latest period prior to the disclosure of the proposal for the issuance of Consideration Shares (i.e. 31 December 2024), being RMB21.48 per share as calculated in accordance with the PRC Accounting Standards for Business Enterprises. As the Company has implemented the 2025 interim profit distribution, pursuant to which, the Company declared a cash dividend of RMB0.98 (tax inclusive) per Share, based on the total share capital of the Company prior to the implementation of the distribution and in accordance with the pricing principles set out above, the issuance price for the Consideration Shares has been adjusted from RMB30.38 per Share to RMB29.40 per Share.

The issuance price of the Consideration Shares of RMB29.40 per share represented:

i. a discount of approximately 12.54% to the closing price of HK$36.92 per H Share* on the Hong Kong Stock Exchange on 15 August 2025, being the last trading day immediately prior to the Pricing Benchmark Date;

ii. a discount of approximately 13.57% to the average closing price of HK$37.36 per H Share* on the Hong Kong Stock Exchange for the 5 consecutive trading days immediately prior to the Pricing Benchmark Date;

iii. a discount of approximately 12.09% to the average closing price of HK$36.73 per H Share* on the Hong Kong Stock Exchange for the 10 consecutive trading days immediately prior to the Pricing Benchmark Date;

iv. a discount of approximately 5.76% to the average closing price of HK$34.26 per H Share* on the Hong Kong Stock Exchange for the 30 consecutive trading days immediately prior to the Pricing Benchmark Date;

v. a discount of approximately 4.33% to the average closing price of HK$33.75 per H Share* on the Hong Kong Stock Exchange for the 60 consecutive trading days immediately prior to the Pricing Benchmark Date;

vi. a discount of approximately 0.24% to the average closing price of HK$32.37 per H Share* on the Hong Kong Stock Exchange for the 120 consecutive trading days immediately prior to the Pricing Benchmark Date;

vii. a discount of approximately 18.63% to the closing price of HK$39.68 per H Share* on the Hong Kong Stock Exchange on the Latest Practicable Date;

viii. a discount of approximately 21.73% to the closing price of RMB37.56 per A Share as quoted on the SSE on 1 August 2025*, being the last trading day prior to the Pricing Benchmark Date;

ix. a discount of approximately 22.57% to the average closing price of RMB37.97 per A Share on the SSE for the 5 consecutive trading days immediately prior to the Pricing Benchmark Date;

x. a discount of approximately 23.27% to the average closing price of RMB38.32 per A Share on the SSE for the 10 consecutive trading days immediately prior to the Pricing Benchmark Date;

xi. a discount of approximately 24.05% to the average closing price of RMB38.71 per A Share on the SSE for the 30 consecutive trading days immediately prior to the Pricing Benchmark Date;

xii. a discount of approximately 24.76% to the average closing price of RMB39.07 per A Share on the SSE for the 60 consecutive trading days immediately prior to the Pricing Benchmark Date;

xiii. a discount of approximately 23.23% to the average closing price of RMB38.30 per A Share on the SSE for the 120 consecutive trading days immediately prior to the Pricing Benchmark Date;

xiv. a discount of approximately 27.57% to the closing price of RMB40.59 per A Share on the SSE on the Latest Practicable Date;

xv. a premium of approximately 35.99% over the audited consolidated net asset value attributable to shareholders of RMB21.62 per Share as at 31 December 2024 as extracted from the Company's latest annual report; and

xvi. a premium of approximately 44.40% over the unaudited consolidated net asset value attributable to shareholders of RMB20.36 per Share as at 30 June 2025 as extracted from the Company's latest interim report.

* *Exchange rate of HKD:RMB at 1:0.91054, being the central parity rate on 15 August 2025 quoted from the People's Bank of China, was adopted in the calculation of the value comparison.*

4.1.2 Comparable issuance

To assess the fairness and reasonableness of the issuance price and the lock-up period of the Consideration Shares, we have conducted our independent research based on comparable analysis through identifying comparable transactions conducted by companies listed on the main board of the SSE, which (i) were first announced during the period from 1 January 2025 up to and including the Pricing Benchmark Date (being 16 August 2025); and (ii) involved issuance of consideration shares (with cash payments) to connected parties of the relevant listed company. Based on the aforementioned criteria, we have identified an exhaustive list of 12 comparable transactions (together as the "**Comparable Issuances"**) and we consider it is sufficient for the purpose of this analysis and reflects the prevailing market environment at the time of entering into the Asset Purchase Agreement, including the determination of the issue price. As the review period chosen, being approximately eight-month period immediately prior to the date of the Asset Purchase Agreement reflects the prevailing market environment at the time of entering into the Asset Purchase Agreement, we consider the selection criteria of the Comparable Issuances to be fair and reasonable. Notwithstanding that the subject companies constituting the Comparable Issuances may have different principal activities, market capitalization, profitability and financial position as compared with those of the Company, we would still consider, in light of our selection criteria, capturing recent issues of consideration shares to connected parties by listed companies on the main board of the SSE under similar market conditions and sentiments can provide Shareholders with a broad perspective of the recent market trend of this type of transaction (which is similar to that of the issuance of the Consideration Shares).

Date of announcement	Company (Stock code)	Basis of issue price of consideration shares	Premium/ (Discount) of the issue price to the closing price immediately before the price benchmark date *(%)*	Lock-up period

Source: cninfo.com.cn

Note: the revised announcement was identified as there were significant adjustments in the issuance proposal compared with the first announcement in respect of the relevant comparable transaction.

According to the Measures for the Administration of the Material Asset Restructurings of Listed Companies (《上市公司重大資產重組管理辦法》) as amended by the CSRC on 16 May 2025, (i) the issue price of issuance of consideration shares to target subscribers should not be lower than 80% of the 20-day, 60-day or 120-day average trading price of the shares immediately preceding the price benchmark date (the "**Basic Pricing Criteria**"); and (ii) the lock-up period for issuance of consideration shares to vendor(s) shall be at least 12 months for all vendor(s) and 36 months for vendor(s) who (a) is a controlling shareholder, actual controller, or related party controlled by it; (b) obtains right of actual control of the listed company through the consideration shares; or (c) has less than 12 months ownership on the asset subject to the consideration shares prior to the issuance of shares (the "**Minimum Lock-up Requirement**").

As set out in the table above, all the bases of the issue price of the consideration shares of the Comparable Issuances were in line with the Basic Pricing Criteria. We noted that the issuance price of the Consideration Share of RMB30.38 per share was not less than 80% of the average trading price of the shares of the Company for the 60 trading days and 120 trading days prior to the Pricing Benchmark Date and not lower than the audited net assets per share attributable to shareholders of the Company, after giving effect to any ex-rights or ex-dividend adjustments, as at the end of the latest period prior to the disclosure of the proposal for the issuance of Consideration Shares (i.e. 31 December 2024), being RMB21.48 per share as calculated in accordance with the PRC Accounting Standards for Business Enterprises, such pricing basis is in full compliance with the Basic Pricing Criteria. As the Company has implemented the 2025 interim profit distribution and in accordance with the pricing principles set out above, the issuance price for the Consideration Shares has been adjusted from RMB30.38 per Share to RMB29.40 per Share. We further observed that the discount of approximately 21.7% of the issuance price of the Consideration Shares to the closing price of the A share of the Company immediately prior to the Pricing Benchmark Date is close to the average discount of approximately 21.9% of the issue price of the consideration shares of the Comparable Issuances to the closing price immediately prior to their respective price benchmark date of the Comparable Issuances. Such discount also within the range of discount/premium of the issue price of the consideration shares of the Comparable Issuances to the closing price immediately prior to their respective price benchmark date of the Comparable Issuances.

In view of the reasons including that (i) the basis of issuance price is generally in line with market practice; (ii) the pricing basis for arriving at the issuance price is in full compliance with the Basic Pricing Criteria and the applicable regulatory requirements; (iii) the additional pricing criteria with reference to the audited net assets per share attributable to shareholders of the listed company as at the end of the latest period before the disclosure of the proposal for the issuance of Consideration Shares after ex-dividend adjustment by the Company is in the interest of the Company and the Independent Shareholders as a whole; and (iv) the discount of approximately 21.7% of the issuance price of the Consideration Shares to the closing price of A Share immediately prior to the Price Benchmark Date is close to the average and within the range of those Comparable Issuances, we are of the view that the issuance price of the Consideration Shares and its pricing basis are fair and reasonable.

We also noted that the use of "lock-up" mechanism is common amongst the Comparable Issuances and the range of lock-up periods of the Comparable Issuances is generally between 12 months to 36 months. Since the Consideration Shares imposes a lock-up period requirement of 36 months to the Company, which is in line with that of the Comparable Issuances and satisfy the Minimum Lock-up Requirement, we are therefore of the view that such lock-up period is fair and reasonable.

In light of the above, we are of the view that key terms of the issuance of Consideration Shares, including the Issuance price and lock-up period, are fair and reasonable and in line with the general market.

5. The Performance Compensation Agreement and the Impairment Compensation Undertaking Letter

On 19 December 2025, the Company, China Energy and Western Energy entered into the Performance Compensation Agreement in respect of the mining rights assets and the equity interests in certain subsidiaries and associates which were valued and priced using the income approach for the purposes of the Transaction. In addition, for those assets valued using the market approach under the Transaction, such as buildings and other assets China Energy and Western Energy issued to the Company the Impairment Compensation Undertaking Letter dated 19 December 2025.

5.1 The Performance Compensation Agreement

The following sets forth a summary of the principal terms of the Performance Compensation Agreement. Detailed terms of the Performance Compensation Agreement are set out in the section headed "4. Performance Commitment and Compensation Arrangements" in the letter from the Board of the Circular.

According to the Performance Compensation Agreement, except for the mining rights asset groups under Xinjiang Energy, Wuhai Energy and Jinshen Energy, the Performance Commitment Period under the Transaction shall be the year in which the Transaction is completed (i.e., the year in which the industrial and commercial registration of the change in equity interests of the Target Companies is completed), and the two subsequent financial years, namely 2026, 2027 and 2028. The Performance Commitment Period for the mining rights asset groups under Xinjiang Energy, Wuhai Energy and Jinshen Energy shall comprise the year in which the Transaction is completed (i.e., the year in which the industrial and commercial registration of the change in equity interests of the Target Companies is completed) and the subsequent five financial years, being 2026, 2027, 2028, 2029, 2030 and 2031. If the completion of the Transaction is delayed, the Performance Commitment Period shall be correspondingly extended.

The scope of the performance undertakings under the Transaction covers the mining rights asset groups, the equity interests in controlling subsidiaries and the equity interests in associates that were valued and priced using the income approach. The details are as follows:

Unit: RMB'000

No.	Target Companies	Performance Commitment Assets	Transaction Consideration
1	Guoyuan Power	Mining rights asset group	13,501,916.7
2	Xinjiang Energy	Mining rights asset group	4,665,266.9
3	Chemical Company	Equity asset: 30% equity interest in Shaanxi Energy Liangshuijing Mining Co., Ltd. (陝西能源涼水井礦業有限責任公司) held by Chemical Company	3,824,441.0
		Mining rights asset: the 35% mining right interest in the Chaoyang open-pit coal mine (朝陽露天煤礦) of Guoneng Baoqing Coal, Power and Chemical Co., Ltd. (國能寶清煤電化有限公司) held by Chemical Company	503,907.3
		Chemical Company subtotal	4,328,348.3
4	Wuhai Energy	Mining rights asset group	4,673,488.8
5	Pingzhuang Coal	Mining rights asset group	6,653,527.0
6	Inner Mongolia Construction Investment	Mining rights asset: Chahasu Coal Mine (察哈素煤礦)	9,405,929.3
7	Shenyan Coal	Mining rights asset: Xiwan open-pit coal mine in Shenmu City (神木市西灣露天煤礦)	3,941,253.7
		Equity asset: 30% equity interest in Shaanxi Hongqi Shenyan Chemical Engineering Co., Ltd. (陝西紅旗神延化工工程有限公司) held by Shenyan Coal	5,555.3
		Shenyan Coal subtotal	3,946,809.0
8	Jinshen Energy	Mining rights asset group	1,186,555.4
9	Baotou Mining	Equity asset:100% equity interest in Baotou Mining	4,542,612.8
10	Port Company	Equity asset:100% equity interest in Port Company	473,598.5

Note: For the performance commitment assets mentioned above, the transaction consideration attributable to the assets held by Shenyan Coal and Jinshen Energy has already taken into account the equity impact arising from their indirect shareholdings.

As set out in the letter from the Board of the Circular, if the Transaction is completed in 2026, (i) for the other Target Companies under the mining rights asset group, except for Xinjiang Energy, Wuhai Energy and Jinshen Energy, China Energy and Western Energy committed to the cumulative net profits achieved by each mining right for the year in which the Transaction is completed and the two subsequent financial years, namely 2026, 2027 and 2028; (ii) for Xinjiang Energy, Wuhai Energy and Jinshen Energy, China Energy and Western Energy committed to the cumulative net profits achieved by each mining right for the year in which the Transaction is completed and the subsequent five financial years, being 2026, 2027, 2028, 2029, 2030 and 2031. For the Target Companies under the equity interest-based group, China Energy committed to the net profits to be achieved by each equity assets for each of the three years during the Performance Commitment Period.

If the Target Companies failed to reach the cumulative committed net profit at the end of the last accounting year of the Performance Commitment Period (for mining rights asset group) or the cumulative realised net profit for each accounting year during the Performance Commitment Period (for equity interest-based group), the Performance Commitment Parties shall compensate the Company in accordance with the provisions of the Performance Compensation Agreement. Among them, China Energy shall first compensate the Company with the Shares of the Company it acquires under the Transaction, and if the number of the Shares of the Company held by China Energy is insufficient (including but not limited to reasons such as the Company's shares being frozen, subject to compulsory enforcement, restricted from transfer or non-transferable for other reasons or the transfer of corresponding shares resulting in insufficient holdings), leading to inadequate compensation, the shortfall shall be compensated to the Company in cash. Western Energy shall compensate the Company in cash. Detailed determination, calculation and implementation method for the compensation are set out in the section headed "4. Performance Commitment and Compensation Arrangements – (D) Performance Compensation and Impairment Test for the Income Approach-Priced Portion" in the letter from the Board of the Circular.

5.2 The Impairment Compensation Undertaking Letter

The following sets forth a summary of the principal terms of the Impairment Compensation Undertaking Letter. Detailed terms of the Impairment Compensation Undertaking Letter are set out in the section headed "4. Performance Commitment and Compensation Arrangements" in the letter from the Board of the Circular.

Given that certain assets of the Target Companies which were assessed under the asset-based approach were valued using the market approach (i.e. Target Tested Assets), and in order to fully protect the interests of the Company, China Energy and Western Energy have provided the Company with the Impairment Compensation Undertaking Letter regarding in respect of certain assets valued using the market approach in the Transaction, including buildings and other relevant assets:

Unit: RMB'000

Target Companies	Shareholding Percentage of the Counterparty in the Target Company	Assets Type	Book Value	Assessed Value	Assessed Value Calculated Based on the Target Company's Equity Interest Percentage in the Underlying Impairment Compensation Assets
Guoyuan Power	100%	Asset group 1: 13 items of buildings	200,423.4	1,159,432.7	1,089,147.1
		Asset group 2: 1 item of land	74,967.3	49,254.6	34,478.2
Xinjiang Energy	100%	Asset group 1: 19 items of buildings	447,836.7	591,048.3	591,048.3
		Asset group 2: 63 items of land	490,620.0	517,104.6	409,268.7
Chemical Company	100%	Asset group 1: 5 items of buildings	318,328.7	404,416.6	319,887.8
		Asset group 2: 10 items of land	1,413,483.0	1,623,618.4	1,570,318.2
Wuhai Energy	100%	Asset group 1: 5 items of buildings	1,492.4	7,385.6	7,385.6
		Asset group 2: 21 items of land	124,144.7	112,233.9	97,446.9

Target Companies	Shareholding Percentage of the Counterparty in the Target Company	Assets Type	Book Value	Assessed Value	Assessed Value Calculated Based on the Target Company's Equity Interest Percentage in the Underlying Impairment Compensation Assets
Pingzhuang Coal	100%	Asset group 1: 1 items of buildings	995.5	938.4	478.6
		Asset group 2: 10 items of land	2,494,759.5	2,511,600.9	1,280,916.5
Inner Mongolia Construction Investment	100%	Asset group:14 items of land	461,449.5	460,064.5	460,064.5
Shenyan Coal	41%	Asset group: 2 item of land	151,053.4	167,647.8	68,735.6
Jinshen Energy	49%	Asset group 1: 2 items of buildings	9,985.8	15,513.1	7,601.4
		Asset group 2: 24 items of land	66,973.6	125,629.6	55,729.2
Shipping Company	100%	Asset group 1: 24 items for buildings	24,209.3	35,627.4	21,376.4
		Asset group 2: 27 items for ships	3,091,207.0	3,408,670.0	2,979,770.0
Coal Trading Company	100%	Asset group: 34 items of buildings	22,160.7	122,676.6	122,676.6

Note 1: *In calculating the assessed value corresponding to the Target Company's equity interest percentage in the underlying impairment compensation assets, the equity impact arising from the Counterparties' non-wholly-owned shareholding in Shenyan Coal and Jinshen Energy has been taken into account.*

Note 2: *Guoyuan Power and the Chemical Company hold 55% and 35% equity interests, respectively, in Guoneng Baoqing Coal Power & Chemical Co., Ltd. In the table above, for the single building asset located in Baoqing County, Shuangyashan City, Heilongjiang Province, which is held under Guoneng Baoqing Coal Power & Chemical Co., Ltd., the undertaking for impairment compensation is presented separately based on their respective equity interest percentages. Substantively, it relates to the same building asset.*

As set out in the letter from the Board of the Circular, the year in which the Transaction is completed and the two subsequent accounting years shall constitute the Impairment Compensation Period.

At the end of each accounting year during the Impairment Compensation Period, China Energy and Western Energy agree that the Company shall conduct an impairment testing on the Target Tested Assets, with impairment testing carried out separately for each asset group. A qualified intermediary institution shall be engaged to issue an impairment test report, and the results of the asset impairment test shall be based on such impairment test report. The impairment amount of each asset group of the Target Tested Assets at the end of the period = the transaction consideration of the relevant asset group – the assessed value of the asset group during the Impairment Compensation Period. The impairment amount at the end of the period equals the aggregate impairment amount at the end of the period for all asset groups of the Target Tested Assets. The aforementioned impairment amount at the end of the period shall take into account the relevant shareholding ratio and shall be adjusted for the impact of capital increases, capital reductions, donations received, profit distributions and the natural reduction in useful life of the Target Tested Assets.

If any asset group of the Target Tested Assets transferred by China Energy and Western Energy incurs an impairment amount at the end of the period (for the avoidance of doubt, the impairment of assets within any asset group shall be calculated on a consolidated basis), China Energy and Western Energy shall compensate the Company. The compensation amount payable for the current year = the impairment amount at the end of the current period (after taking into account the shareholding ratio) – the amount already compensated during the Impairment Compensation Period. The cumulative amount of impairment compensation payable by China Energy and Western Energy in respect of the Target Tested Assets shall not exceed the transaction consideration obtained by China Energy and Western Energy for such Target Tested Assets under the Transaction.

China Energy shall first use the Shares issued to China Energy by the Company under the Transaction for compensation. If such Shares are insufficient, China Energy shall compensate in cash. Western Energy shall compensate in cash. Detailed determination, calculation and implementation method for the compensation are set out in the section headed "4. Performance Commitment and Compensation Arrangements – B. Impairment Compensation Arrangement for the Market Approach-Priced Portion" in the letter from the Board of the Circular.

5.3 Our view on the compensation arrangement

As advised by the management of the Company, the Performance Compensation Agreement is made pursuant to the requirements of Article 35 of the Administrative Measures for Material Asset Restructuring of Listed Companies (the "**Guidelines**") (which are applicable to the Transaction). We have reviewed the Guidelines and noted that, among others, when the transaction consideration is determined based on income approach and under which certain assets(s) is/are valued based on future expected income, the seller shall enter into a compensation agreement with the acquirer regarding any shortfalls of the forecasted profit. As at least part of valuation, and hence the consideration, of each of Guoyuan Power, Xinjiang Energy, Chemical Company, Wuhai Energy, Pingzhuang Coal, Inner Mongolia Construction Investment, Shenyan Coal, Jinshen Energy, Baotou Mining and Port Company was derived based on the income approach, the acquisition of each of such Target Companies is subject to the Guidelines.

For certain assets of the Target Companies which were assessed under the asset-based approach were valued using the market approach, China Energy and Western Energy have provided the Company with the Impairment Compensation Undertaking Letter in order to fully protect the interests of the Company.

As set out in the letter from the Board of the Circular, the Company will comply with the applicable disclosure requirements under Rule 14.36B and Rule 14A.63 of the Hong Kong Listing Rules in the event that any performance commitments set out in the Performance Compensation Agreement and the Impairment Compensation Undertaking Letter are not met by China Energy and Western Energy.

Having considered that (i) the compensation arrangement under the Performance Compensation Agreement and the Impairment Compensation Undertaking Letter safeguards the interest of the Company as China Energy and Western Energy undertakes to compensate the Company if the net profit used in formulating the valuation cannot be achieved/the Transaction incurs an impairment amount (as the case may be) during a period of around three years upon completion of the Transaction; (ii) the compensation arrangement under the Performance Compensation Agreement is in accordance with relevant rules and regulations in the PRC; and (iii) the Company will comply with the applicable disclosure requirements under the Hong Kong Listing Rules in the event that any performance commitments set out in the Performance Compensation Agreement and the Impairment Compensation Undertaking Letter are not met by China Energy and Western Energy, we consider serves as an additional favourable term of the Transaction to the Company and the Shareholders as a whole.

6. Impact of the Transaction on the Group

6.1 Impact on the Company's equity structure

As at the Latest Practicable Date, the total issued share capital of the Company is 19,868,519,955 Shares, which comprises 16,491,037,955 A Shares and 3,377,482,000 H Shares.

For illustration purpose, as set out in the letter from the Board of the Circular, set out below is the shareholding structure of the Company (i) as at the Latest Practicable Date; and (ii) immediately after completion of the Transaction (on the basis that the consideration for the purchase of Target Assets to be settled by way of issuance of Consideration Shares is RMB40,079,504.3 thousand, and assuming that (a) there will not be any further adjustments to the issuance price of the Consideration Shares of RMB29.40 per Consideration Share; and (b) there will be no change in the total issued share capital of the Company since the Latest Practicable Date save for the issuance of the A Shares pursuant to the Asset Purchase Agreement (as supplemented by the Supplemental Agreement)):

		Shareholding as at the Latest Practicable Date			Shareholding immediately after completion of the Transaction		
Name of Shareholder	Class of Shares	Number of Shares (share)	Approximate percentage of the issued share capital of the relevant class (%)	Approximate percentage of the total issued share capital (%)	Number of Shares (share)	Approximate percentage of the issued share capital of the relevant class (%)	Approximate percentage of the total issued share capital (%)
China Energy Group *(Note 1)*	A Shares	13,824,302,724	83.83	69.58	15,187,551,170	85.06	71.53
Public A Shareholders	A Shares	2,666,735,231	16.17	13.42	2,666,735,231	14.94	12.56
Public H Shareholders	H Shares	3,377,482,000	100.00	17.00	3,377,482,000	100.00	15.91
Total		19,868,519,955	–	100.00	21,231,768,401	–	100.00

Notes:

1. *As at the Latest Practicable Date and immediately after the completion of the Transaction, Capital Holdings., a wholly-owned subsidiary of China Energy, directly held 11,593,528 A Shares of the Company.*

2. *The approximate percentage figures are rounded to the nearest two decimal places and therefore, may not add up to 100% due to rounding.*

As set out in the table above, immediately after the completion of the Transaction, (i) China Energy will remain as the single largest controlling shareholder of the Company, with its shareholding increasing from approximately 69.58% to approximately 71.53%; (ii) the shareholding of the public A Shareholders will be diluted from approximately 13.42% to approximately 12.56%; and (iii) the shareholding of the public H Shareholders will be diluted from approximately 17.0% to approximately 15.91%.

Although there will be a dilution to the shareholding interest of existing public shareholders as a result of the Transaction as a result of the issuance of the Consideration Shares, taken into account (i) the reasons for and benefits of the Transaction as set out in the section headed "2. Reasons for and benefits of the Transaction", (ii) the fairness and reasonableness of the basis of determining the consideration of the Target Assets as set out in section headed "3.1 Our assessment on the consideration of the Target Assets", and (iii) the fairness and reasonableness on the issuance price of the Consideration Shares as set out in the sections headed "4.1 Our assessment on the terms of the Consideration Shares", we consider that the issuance of the Consideration Shares is an acceptable means for the settlement of part of the consideration payable for the Transaction and the shareholding dilution effects upon completion of the Transaction is acceptable.

6.2 Financial impact of the Transaction

Upon completion of the Transaction, except for Jinshen Energy, each of the Target Companies will become a subsidiary of the Company and their financial statements will be included into the consolidated financial statements of the Group. Jinshen Energy will be recognised as interest in associate of the Company, in which the Company will hold 49% equity interest.

The following sets forth a summary of the key financial impact based on the unaudited pro forma financial information prepared by the Directors for the purpose of illustrating the effects of the Transaction. The unaudited pro forma financial information report of the Enlarged Group is set out in Appendix III to the Circular, and the Independent Shareholders are recommended to read in full.

Assets and liabilities

As set out in the section headed "IMPACT ON THE KEY FINANCIAL INDICATORS OF THE COMPANY" in the letter from the Board of the Circular, for illustrative purposes only, total assets of the Group as at 31 July 2025 would increase by approximately 41.0% from approximately RMB635.9 billion to approximately RMB896.6 billion for the Enlarged Group. Total liabilities of the Group as at 31 July 2025 would increase by approximately 144.5% from approximately RMB159.7 billion to approximately RMB390.5 billion for the Enlarged Group. Equity attributable to equity holders of the Company as at 31 July 2025 would increase by approximately 3.1% from approximately RMB406.5 billion to approximately RMB419.0 billion for the Enlarged Group.

Revenue and earnings

As disclosed in the section headed "1.4 Information on the Target Companies", each of the Target Companies are revenue generating for the year ended 31 December 2024. As set out in the section headed "IMPACT ON THE KEY FINANCIAL INDICATORS OF THE COMPANY" in the letter from the Board of the Circular, for illustrative purposes only, (i) total revenue of the Group would increase by approximately 27.2% from approximately RMB339.7 billion to approximately RMB432.2 billion for the year ended 31 December 2024; and (ii) net profit attributable to equity holders of the Company after excluding non-recurring items would increase by approximately 13.4% from approximately RMB59.0 billion to approximately RMB66.9 billion for the year ended 31 December 2024, after the completion of the Transaction.

It should be noted that the aforementioned analyses are for illustrative purposes only and do not purport to represent how the financial results and financial position of the Group will be upon the completion of the Transaction.

OPINION AND RECOMMENDATIONS

Having taken into account the above principal factors and reasons, we consider that, despite the Transaction is not entered into in the ordinary and usual course of business of the Group, the terms of the Transaction are on normal commercial terms and are fair and reasonable so far as the Independent Shareholders are concerned, and the Transaction is in the interests of the Company and the Shareholders as a whole.

Accordingly, we advise the Independent Board Committee to recommend, and we ourselves recommend, the Independent Shareholders to vote in favour of the resolutions in relation to the Transaction to be proposed at the EGM.

Yours faithfully,
for and on behalf of
SOMERLEY CAPITAL LIMITED
Calvin Leung
Director

INDEBTEDNESS

As of 31 October 2025, the Enlarged Group had total issued debts of RMB120,593 million. Details of which are as follows:

1. Borrowings and other loans

The Enlarged Group's borrowings and other loans are as follows:

	31 October 2025 *RMB million*
Borrowing – unsecured	
- Unguaranteed	84,441
Subtotal	84,441
Borrowing – secured	
- Guaranteed *(note1)*	5,802
- Unguaranteed *(note2)*	7,020
Subtotal	12,822
Other loans *(note3)*	1,043
Total	98,306

Note 1: as at 31 October 2025, certain borrowings were guaranteed by China Energy.

Note 2: as at 31 October 2025, borrowings of RMB7,020 million were secured by certain property, plant and equipment, future revenue from electricity and future revenue from coal.

Note 3: other loans were mainly comprised of short-term financing bills.

Note4: as at 31 October 2025, the Enlarged Group's borrowings were with interest rates ranging from 1.82% to 3.45% per annum.

2. Lease liabilities

As at 31 October 2025, The Enlarged Group had lease liabilities of approximately RMB1,586 million.

3. Payables for acquisition of mining rights

As at 31 October 2025, The Enlarged Group had payables for acquisition of mining rights of approximately RMB20,701 million. The payables for acquisition of mining rights is the present value of the payable mining rights. The mining rights payable shall be paid annually during the execution of the contract.

4. Contingent liabilities

(1) Financial guarantees issued

As at 31 October 2025, the Enlarged Group had issued certain guarantees in respect of certain banking facilities granted to an entity which the Enlarged Group held less than 20% equity interest. The maximum amount guaranteed is RMB67 million and will be matured in 2029.

(2) Legal contingencies

The Enlarged Group is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Enlarged Group.

(3) Environmental contingencies

As at the Latest Practicable Date, the Enlarged Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Group. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Enlarged Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required, Accordingly, the outcome of environmental labilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

(4) Other contingencies

In September 2025, Inner Mongolia Construction Investment received a notice from the Ordos Bureau of Natural Resources requiring it to carry out with the payment procedures for the mining rights grant proceeds in respect of the Chahasu Coal Mine. Inner Mongolia Construction Investment and China Energy Investment Corporation Limited ("**China Energy**") are currently engaged in ongoing discussions with the relevant authorities regarding this matter. China Energy has further confirmed that, should Inner Mongolia Construction Investment be required to make any additional payment of mining rights grant proceeds for the Chahasu Coal Mine (License No.: C1500002024071210157148), China Energy will be responsible for coordinating the resolution of such payment obligation.

Save as disclosed above, As of 31 October 2025, the Enlarged Group did not have other debt securities issued and outstanding, and authorised or otherwise created but unissued, outstanding mortgages, charges, debentures or other loan capital, bank overdrafts or loans, other similar indebtedness, finance leases or hire purchase commitments, liabilities under acceptance (other than normal trade bills) or acceptance credits, guarantees or material contingent liabilities, guaranteed, unguaranteed, secured or unsecured borrowings and debt.

WORKING CAPITAL SUFFICIENCY

The Directors are of the opinion that taking into account the cash flows generated from the operating activities, the financial resources available to the Enlarged Group including internally generated funds, the effect of the Acquisition and credit facilities available to the Enlarged Group, the working capital available to the Enlarged Group is sufficient for the Enlarged Group's requirements for at least 12 months from the Latest Practicable Date.

MATERIAL ADVERSE CHANGE

As at the Latest Practicable Date, the Directors were not aware of any material adverse change in the financial operating position of the Group since 31 December 2024, being the date to which the latest published audited consolidated financial statements of the Group were made up.

FINANCIAL AND TRADING PROSPECTS OF THE GROUP

Based on the consolidated financial information of the Group as at 30 June 2025 (prior to the Transaction) and the aggregated financial information of the Group and the Target Companies as at 31 July 2025 on the assumption that the Transaction had been completed, the Transaction would result in a substantial expansion of the Enlarged Group's resource reserves and operating scale. The proved coal resource reserves will increase from 41.58 billion tonnes to 68.49 billion tonnes, coal reserves will increase from 17.45 billion tonnes to 34.50 billion tonnes, coal production will increase from 327 million tonnes to 512 million tonnes, installed power generation capacity will increase from 47,632 MW to 60,881 MW, and polyolefin production capacity will increase from 0.6 million tonnes to 1.88 million tonnes. The Transaction would therefore significantly enhance the scale of the Group's principal operations and strengthen its overall resource base.

The Enlarged Group's financial performance indicators would also improve, without taking into account the Proposed Issuance of A Shares to raise supporting funds, based on the Review Report of the Pro Forma Financial Information of the Enlarged Group issued by Ernst & Young Hua Ming LLP. For the seven months ended 31 July 2025, according to the financial information prepared in accordance with PRC Accounting Standards for Business Enterprises, revenue would increase from approximately RMB162.3 billion to approximately RMB206.5 billion, and profit attributable to equity holders of the Company after deducting non-recurring gains or losses would increase from approximately RMB29.3 billion to approximately RMB32.6 billion. Basic earnings per Share after deducting non-recurring gains or losses would rise from RMB1.47 to RMB1.54. These enhancements reflect stronger operating scale, improved profitability and greater financial resilience following consolidation of the Target Assets.

The Enlarged Group operates in industries subject to intensive regulatory oversight and cyclical market conditions, and its future profitability may be influenced by a range of special factors. Coal mining, mine-mouth coal-fired power generation and coal-chemical operations are highly regulated sectors, and changes to policy requirements concerning production capacity, energy or water consumption, environmental emissions or electricity pricing may affect project timelines, utilisation levels, cost structures and cash flows. The Group's major products, including coal, electricity and polyolefins, are cyclical, and price movements are affected by macroeconomic trends, supply and demand dynamics, seasonal patterns and market-based trading mechanisms. Declines in product prices without corresponding reductions in operating costs may exert pressure on profit margins.

Operational and safety risks are inherent in coal mining, thermal power generation and coal-chemical facilities. Equipment failures, shortcomings in operational management or deficiencies in emergency response mechanisms may lead to production interruptions or safety incidents. Environmental and energy-consumption requirements are expected to tighten further under China's "dual-carbon" objectives, which may require additional investment or result in temporary production adjustments. As the Group's power generation capacity increases, earnings will become more sensitive to utilisation hours and electricity offtake conditions. Variability in renewable energy output, rapid expansion of regional installed capacity or constraints in transmission infrastructure may result in lower utilisation hours. In addition, given the enlarged fixed-asset base, weaker product prices, adverse industry conditions or policy changes that reduce expected future cash flows may trigger asset impairments and adversely affect financial results.

Currently, the world's profound changes unseen in a century has been accelerating, with increasing uncertainty in the external environment and intensified competition among major powers. The supporting conditions and fundamental trends for the long-term economic growth in China remain unchanged amid unstable foundation for this upward trend, and some deep-seated structural contradictions that have accumulated over time remain to be resolved. From the perspective of industrial development trends, the comprehensive green and low-carbon transformation of economic and social development is driving the accelerated transition of the energy industry towards a low-carbon, diversified, and market-oriented development for the rest of this year. The Company will carefully assess the market and operating conditions, confront challenges with strengthened confidence, and overcome difficulties head-on. Adhering to sustainable growth and promoting high-quality development, the Company will make every effort to achieve its annual goals and tasks with "stabilizing operations, pursuing innovation, optimising investment, strengthening management, and ensuring safety" as its core work guidelines.

Firstly, the Company must firmly secure supply and deepen operation to create efficiency. The Company will continuously optimise the mechanism of securing constant and long-term supply of energy and fully strengthen our integrated advantage in order to ensure stable production and supply of coal. The Company will give full play to our bottom-line guarantee role of coal-fired power, strengthen control of production and operation scheduling, as well as improve reliability management, to ensure stable supply of power and heat. The Company will carefully study the conditions of the market and operation for the rest of this year, respond actively to changes in the situation, and make every effort to expand the market, increase revenue, reduce costs, enhance efficiency, explore potential and create efficacy.

Secondly, the Company will focus on green development and optimise the coal-based industry. Anchoring our "dual carbon" goals, the Company will strengthen the clean and efficient utilisation of coal, systematically promote the greening of the whole chain for coal mining, production, storage, transportation, and utilisation, vigorously develop green mines, low-carbon coal power, high-end chemical industry, and green logistics, and scientifically coordinate efficient production and high-level environmental protection. The Company will actively follow up on capital injection and accelerate the construction of major projects, in an effort to achieve the optimal resource allocation along the industry chain.

Thirdly, the Company will insist on planning as the first priority and emphasise innovation leadership. The Company will strengthen the development of our philosophy that "innovation is the primary driving force of the enterprise" and advocate profound integration of technological innovation and industrial innovation, with focus on cultivating and developing new quality productive forces in the energy sector. The Company will formulate the 15th Five-Year Plan in a scientific way, improve the technological innovation system, make breakthroughs in key core technologies and cutting-edge technologies, and strategically prioritise the development of new quality productive forces based on local conditions.

Fourthly, the Company will enhance benchmarking analysis and improve operation capability. By enhancing the construction of management system and management capability, focusing on key points, making up for weaknesses, strengthening weak points, and promoting improvement, the Company will fully push forward the transformation of quality, efficiency and driving force of enterprises, while benchmarking with regional and industrial advanced and world-class enterprises, identifying the gaps, and implementing targeted policies to comprehensively enhance the value creation capability. The Company will strengthen lean management and adhere to prioritising efficiency and cost, so as to achieve continuous improvement in operation quality.

Fifthly, the Company will firmly build a strong defence line to prevent and resolve risks. The Company will practise the overall national security concept in all aspects such as, strengthening the safety barrier in production, operation and ecology, and escort high-quality development with high-standard safety. The Company will continue to deepen the three-year action of tackling root causes, focus on the implementation of safety production management system, and deepen and implement rectification for safe production project. The Company will strengthen the awareness of risks, compliance and security by reinforcing corporate governance, compliance management and internal control system construction continuously, practically fulfilling regulatory requirements and market rules and actively promoting sustainable corporate development.

GUOYUAN ELECTRIC POWER CO., LTD.

Accountants' Report on Historical Financial Information

31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025

The following is the text of a report on the Target Company's reporting accountants, Ernst & Young, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this circular.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF GUOYUAN ELECTRIC POWER CO., LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of Guoyuan Electric Power Co., Ltd. (the "Target Company") and its subsidiaries except for the Excluded Business as defined in note 2.1 to the Historical Financial Information (together, the "Target Group") set out on pages II-A-3 to II-A-123, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-A-3 to II-A-123 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-A-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.

Ernst & Young

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

Principal activities

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at No. 26, Finance Street, Xicheng District, Beijing, the PRC.

During the Relevant Periods, the Target Group was involved in integrated coal mining and coal-powered electricity generation business as well as coal-powered and solar-powered electricity generation business in the PRC.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company is China Energy Investment Corporation Limited ("China Energy Group"), which is established in the PRC.

As at the date of this report, the Target Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies, the particulars of which are set out below:

Name	Place and date of registration and place of operations	Registered /paid-up capital RMB million	Proportion of ownership interest held by the Target Group (%)	Principal activities
Shaanxi Deyuan Fugu Energy Co., Ltd. 陝西德源府穀能源有限公司	PRC /Mainland China 23 Aug 2005	2,620	70	Integrated coal mining and coal-powered electricity generation business
Qinhuangdao Power Generation Co., Ltd. 秦皇島發電有限責任公司	PRC /Mainland China 18 Feb 1998	680	50	Integrated coal mining and coal-powered electricity generation business

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PRESENTATION

Pursuant to the Acquisition, as more fully explained in the paragraph headed "Pre-reorganisation" in the section headed "MAJOR AND CONNECTED TRANSACTION" in the Circular, the Target Company agreed to dispose of its entire equity interests in Guoneng Power Technology Engineering Co., Ltd., Shenhua Guoneng Bayannur Coal Power Co., Ltd., Baotou Luneng Baiyunebo Wind Power Co., Ltd., Urad Zhongqi Luneng Wind Power Co., Ltd., Guoyuan Bayannur Energy Co., Ltd., Guoneng Shanxi Kelan New Energy Co., Ltd., Shanxi Lujin Wangqu Power Generation Co., Ltd. Kang Bao Wind Power Branch, State Grid Energy Xinjiang Zhundong Coal and Electricity Co., Ltd., State Grid Energy HeFeng Coal Power Co., Ltd., Guoneng (Gaomi) New Energy Co., Ltd., State Grid Energy Hami Coal power Co., Ltd. Dananhu Power Plant and State Grid Energy Hami Coal Power Co., Ltd. Coal Mine 1# (collectively, the "Excluded Business") before the Acquisition (the "Disposal"). The Target Group then comprised the Target Company and its subsidiaries except the Excluded Businesses.

The Historical Financial Information excludes the Excluded Business, which are under the control of the ultimate holding company, but are not strategically complementary for the Acquisition purpose. In evaluating whether the Historical Financial Information fairly presents the history of the Target Group's businesses, the directors considered, among others, the following:

1) whether the Excluded Business was in dissimilar businesses;
2) whether the Excluded Business was and would be operated autonomously both before and after the Disposal; and
3) whether the Excluded Business had no more than incidental common facilities and costs.

The Historical Financial Information has been prepared as if the Disposal had been completed at the beginning of the Relevant Periods and accounted for as a distribution to the holding company of Target Company. The Historical Financial Information does not include the assets, liabilities, results of the operations and cash flows of the Excluded Business. The transactions and balances between the Target Group and the Excluded Business have not been eliminated.

2.2 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) as issued by the International Accounting Standards Board (the "IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared under the going concern basis notwithstanding the fact that, as at 31 July 2025, the Target Group recorded net current liabilities amounting to RMB4,050 million because there were unutilised banking facilities of RMB8 billion available to the Target Group as at 31 July 2025. In view of the above, the directors of the Target Company consider it is appropriate to prepare the Historical Financial Information on a going concern basis.

The Historical Financial Information has been prepared under the historical cost basis, except for certain financial instruments as disclosed in note 36.3 to the Historical Financial Information which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 BASIS OF PREPARATION (CONTINUED)

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS (CONTINUED)

The Target Group is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. The application of IFRS 18 is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

2.4 MATERIAL ACCOUNTING POLICIES

Basis of combination

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries except the Excluded Business. Control is achieved when the Target Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to equity holder of the Target Company.

Business combinations

Acquisitions of businesses, other than business combination under common control are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*, respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Investments in associates

An associate is an entity over which the Target Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the associate. When the Target Group's share of losses of an associate exceeds the Target Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Group's net investment in the associate, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in an associate but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate of the Target Group, profits and losses resulting from the transactions with the associate are recognised in the Historical Financial Information only to the extent of interests in the associate that are not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than entity's functional currencies (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Taxation (Continued)

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investment in subsidiaries, associates and joint venture to the extent that the Target Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (the "OECD").

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, joint ventures and associates, except where the Target Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment

Property, plant and equipment, which consists of buildings, mining structures and mining rights, mining related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation (year)
Buildings	10 – 55 years
Mining related machinery and equipment	5 – 20 years
Generators related machinery and equipment	5 – 20 years
Furniture, fixtures, motor vehicles and other equipment	5 – 20 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment (Continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Group's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and does not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Exploration and evaluation assets

Exploration and evaluation assets comprise costs which are directly attributable to the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource:

- researching and analysing historical exploration data;
- gathering exploration data through topographical, geochemical and geophysical studies;
- exploratory drilling, trenching and sampling;
- determining and examining the volume and grade of the resource;
- surveying transportation and infrastructure requirements; and
- conducting market and finance studies.

Expenditure during the initial exploration preparation stage of a project is charged to profit or loss as incurred. Exploration and evaluation costs, including the costs of acquiring licenses, are capitalised as exploration and evaluation assets on a project-by-project basis pending determination of the technical feasibility and commercial viability of the project.

Once the final feasibility study has been completed and a development decision has been taken, accumulated capitalised exploration and evaluation expenditures in respect of an area of interest are transferred to property, plant and equipment. In circumstances when an area of interest is abandoned or management decides it is not commercially viable, any accumulated costs in respect of that area are written off in the period the decision is made.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment (Continued)

Obligations for land reclamation

The Target Group's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Group estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Group records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Intangible assets (Continued)

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets (Continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method, first-in first-out method, as well as specific identification method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

– the financial asset is held within a business model whose objective is to collect contractual cash flows; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income (the "FVTOCI"):

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Financial assets (Continued)

Classification and subsequent measurement of financial assets (Continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets

The Target Group recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable, other receivables, etc.). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. The ECL on these assets are assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Impairment of financial assets (Continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Impairment of financial assets (Continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collaterals held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concessions that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Impairment of financial assets (Continued)

(v) Measurement and recognition of ECL (Continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e. the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (Continued)

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables and other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person:

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group.

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2.4 to the Historical Financial Information, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are critical judgements, apart from those involving estimation (see note 3.2 to the Historical Financial Information below), that the Directors have made in the process of applying the Target Group's accounting policies and that have the most significant effect on the amounts recognised in the Historical Financial Information.

Going concern

As described in note 2.2 to the Historical Financial Information, the Target Group's ability to continue as a going concern is dependent on obtaining cash inflows from borrowings to ensure sufficient cash flow to meet its liabilities as they fall due. Should the Target Group be unable to obtain adequate funding, there exists a material uncertainty regarding the Target Group's ability to continue as a going concern. The Historical Financial Information does not include any adjustments that would be necessary to the carrying amounts and classification of assets and liabilities should the Target Group be unable to continue as a going concern.

3.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Group's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.2 Key sources of estimation uncertainty (Continued)

Impairment losses

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, exploration and evaluation assets, intangible assets, right-of-use assets, interests in joint ventures and associates and other non-current assets, the recoverable amount of the asset needs to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs and future returns.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The Target Group recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 27 to the Historical Financial Information.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Group considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Group and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Group may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 33 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	7,161	6,162	5,026	3,419	1,924
– Power	22,286	24,121	20,589	12,016	10,482
– Others	295	60	50	66	1
Others	308	753	179	85	61
	30,050	31,096	25,844	15,586	12,468

The Target Group's revenues from contracts with customers are RMB30,038 million, RMB31,085 million, RMB25,819 million, RMB15,580 million (unaudited) and RMB12,464 million for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025, respectively.

The Target Group produces and sells coal to customers at spot market. For sales of coal, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return occurred. There is no sales-related warranties associated with coal.

For sales of power, revenue is recognised upon the transmission of electric power to the power grid companies. Power could not be returned or exchanged and there is also no warranties associated with power sales.

All performance obligations of sales of coal and power are part of contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group only has one reportable operating segment. Management monitors the operating results of the Target Group's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Group's revenue from external customers was from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of the Target Group's non-current non-financial assets (excluding deferred tax assets) were located in Mainland China as at the end of each of the Relevant Periods.

Revenue derived from single customers which accounted for 10% or more of the Target Group's total revenue is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Customer A	21,794	23,549	19,930	11,627	10,117
Customer B	3,635	4,877	3,252	2,282	1,917

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Materials, fuel and power	11,712	11,948	9,626	5,615	4,275

Claim income	5	1	3	3	1
Carbon emission quota income	-	57	57	-	-
Others	30	48	187	96	55
	79	139	264	110	61

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	24	37	23	14	6
Total interest income	24	37	23	14	6
Interest on:					
– borrowings	1,133	833	554	352	202
– lease liabilities	5	6	6	4	1
Total finance costs on financial liabilities	1,138	839	560	356	203
Less: Amount capitalised	(210)	(127)	(99)	(62)	(42)
	928	712	461	294	161
Others	3	3	9	3	5
Unwinding of discount	60	81	174	83	68
Exchange loss, net	(25)	(15)	(14)	-	7
Total finance costs	966	781	630	380	241
Net finance costs	942	744	607	366	235

Note:

Borrowing costs capitalised during the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025 arose on the general borrowing pools and were calculated by applying capitalisation rates from 2.3% to 3.6%, from 2.3% to 3.6%, from 2.3% to 4%, from 2.3% to 4% (unaudited) and from 1.86% to 3.6%, respectively, per annum to expenditure on qualifying assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	971	1,179	835	977	610
Deferred tax	195	(183)	(4)	(472)	18
	1,166	996	831	505	628

The tax charge for the year/period can be reconciled to the profit before income tax per consolidated statement of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit before income tax	3,560	4,025	4,206	2,808	3,541
Tax at the PRC income tax rate of 25%	890	1,006	1,052	702	885
Tax effects of:					
– different tax rates of subsidiaries	(239)	(463)	(389)	(287)	(306)
– non-deductible expenses	83	120	134	103	37
– share of results of joint ventures and associates	(108)	(58)	(132)	(116)	(45)
– utilisation of tax losses and deductible temporary difference previously not recognised	(6)	(7)	(8)	(18)	(28)
– tax losses and deductible temporary difference not recognised	546	398	174	121	85
Income tax expense	1,166	996	831	505	628

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate applicable for the PRC group entities were 25% for the Relevant Periods and for the seven months ended 2024 except for subsidiaries operating in the Western developing region of the PRC which are qualified to be entitled to a preferential tax rate of 15% from 2021 to 2030.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR/PREIOD

Profit for the year/period has been arrived at after charging/(crediting)

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR (CONTINUED)

Note:

The Target Group has recorded impairment losses for certain long-term assets.

The recoverable amount is the higher of the fair value of the cash generating units ("CGU") less costs to sell and value in use ("VIU") of the CGUs.

Recoverable amount by calculating fair value less costs to sell:

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had determined the recoverable amount by using fair value less cost of disposal. Certain assets had been valued via market method. The fair value was categorised into Level 3 measurement.

Recoverable amount by calculating present value of estimated future cash flow:

The Target Group had treated companies with impairment indicators as individual cash-generating units and had made relevant impairment assessment by calculating the present value of estimated future cash flow of each cash generating unit.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

11. DIRECTORS', CHIEF EXECUTIVE AND SUPERVISORS' EMOLUMENTS

The remuneration of the Target Company's directors (including the chief executive) and supervisors during the Relevant Periods and the seven months ended 31 July 2024 are as follows:

26. CASH AND CASH EQUIVALENTS (CONTINUED)

(d) Total cash outflow for leases

Amounts included in the consolidated statements of cash flows for leases comprise the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Within operating cash flows	12	12	9	9	3
Within financing cash flows	43	35	38	23	34
	55	47	47	32	37

These amounts relate to the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Lease rental paid	55	47	47	32	37

27. DEFERRED TAXATION

The Target Group

For the purpose of the presentation in the consolidated statement of financial position, certain deferred tax assets and liabilities have been offset. The following is the analysis of the deferred tax balances for financial reporting purpose.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million (unaudited)	31 July 2025 RMB million
Deferred tax assets	208	354	365	344
Deferred tax liabilities	(49)	(12)	(19)	(16)
	159	342	346	328

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. DEFERRED TAXATION (CONTINUED)

The Target Group (continued)

The following are the major deferred tax assets and liabilities recognised and movements thereon during the year/period:

	1 January 2022 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2022 RMB million
Provision for asset impairment	342	(144)	198
Long-term assets (reclamation expenses)	-	(31)	(31)
Lease transactions	-	(2)	(2)
Others	12	(18)	(6)
Net deferred tax assets	354	(195)	159

	1 January 2023 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2023 RMB million
Provision for asset impairment	198	98	296
Long-term assets (reclamation expenses)	(31)	80	49
Lease transactions	(2)	4	2
Others	(6)	1	(5)
Net deferred tax assets	159	183	342

	1 January 2024 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2024 RMB million
Provision for asset impairment	296	1	297
Long-term assets (reclamation expenses)	49	12	61
Lease transactions	2	(13)	(11)
Others	(5)	4	(1)
Net deferred tax assets	342	4	346

	1 January 2025 RMB million	Credited/(charged) to profit or loss RMB million	31 July 2025 RMB million
Provision for asset impairment	297	35	332

Lease transactions	(11)	(5)	(16)
Others	(1)	5	4
Net deferred tax assets	346	(18)	328

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. DEFERRED TAXATION (CONTINUED)

The Target Group (continued)

As at 31 December 2022, 2023, 2024 and 31 July 2025, the Target Group had unused tax losses of RMB2,932 million, RMB2,881 million, RMB2,289 million and RMB2,522 million, respectively, and unrecognised deductible temporary differences of RMB4,908 million, RMB6,552 million, RMB3,300 million and RMB3,411 million, respectively, available for offset against future profits. No deferred tax asset has been recognised in respect of the remaining RMB2,932 million, RMB2,881 million, RMB2,289 million and RMB2,522 million losses at 31 December 2022, 2023, 2024 and 31 July 2025, respectively, due to the unpredictability of future profit streams.

The expiry dates of the tax losses of the Target Group for which no deferred income tax assets were recognised are summarised as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
2023	357	-	-	-
2024	678	678	-	-
2025	856	856	856	856
2026	491	491	479	479
2027	550	550	535	535
2028	-	306	202	202
2029 and thereafter	-	-	217	450
	2,932	2,881	2,289	2,522

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

28. BORROWINGS

The Target Group

An analysis of the Target Group's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Short-term bank and other borrowings	4,546	3,068	3,490	4,167
Current portion of long-term borrowings	10,385	4,962	1,229	2,924
	14,931	8,030	4,719	7,091
Non-current borrowings:				
Long-term borrowings, less current portion	9,050	13,323	12,581	9,249
	9,050	13,323	12,581	9,249
Secured	1,836	762	183	153
Unsecured	22,145	20,591	17,117	16,187
	23,981	21,353	17,300	16,340

As at 31 December 2022, the Target Group's short-term borrowings bore interest at rates ranging from 1.97% to 3.60% per annum, and long-term borrowings bore interest at fixed rates ranging from 2.50% to 4.10% per annum, and at floating rates ranging from LPR-0.80% to LPR+0.35% per annum.

As at 31 December 2023, the Target Group's short-term borrowings bore interest at rates ranging from1.97% to 3.65% per annum, and long-term borrowings bore interest at fixed rates ranging from 2.40% to 3.65% per annum, and at floating rates ranging from LPR-1.80% to LPR+0.35% per annum.

As at 31 December 2024, the Target Group's short-term borrowings bore interest at rates ranging from 2.10% to 2.60% per annum, and long-term borrowings bore interest at fixed rates ranging from 2.50% to 2.70% per annum, and at floating rates ranging from LPR-1.80% to LPR-0.01% per annum.

As at 31 July 2025, the Target Group's short-term borrowings bore interest at rates ranging from 2.11% to 2.60% per annum, and long-term borrowings bore interest at fixed rates ranging from 2.50% to 2.70% per annum, and at floating rates ranging from LPR-1.80% to LPR-0.1% per annum.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Paid-up capital	47,261	47,261	47,261	47,261

35. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratio as at 31 December 2022, 2023 and 2024 and 31 July 2025 was 62.3%, 60.4%, 50.6% and 46.6%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS

36.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	10,329	13,307	11,858	12,324
Financial assets at fair value through other comprehensive income	5	3	-	-
Financial assets measured at fair value through profit or loss	2	-	-	-

Financial liabilities				
Amortised cost	33,676	34,159	28,365	25,447

36.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables, loans and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, amounts due from/to associates, other receivables, accounts and bills payables, borrowings, other payables, long-term liabilities and bonds. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate and currency risks), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

(i) Currency risk

The functional currency of the Target Group entities is RMB in which most of the transactions are denominated. However, certain of the Target Group's bank balances and borrowings are denominated in foreign currencies other than the functional currency in which they are measured.

(ii) Interest rate risk

The Target Group is exposed to fair value interest rate risk in relation to fixed-rate loan and borrowings.

The Target Group is also exposed to cash flow interest rate risk in relation to variable-rate borrowings and variable-rate loans. Other than the concentration of interest rate risk related to the movements in Secured Overnight Financing Rate and the loan interest published by the People's Bank of China ("PBOC"), the Target Group has no significant concentration of interest rate risk.

The Target Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for variable-rate borrowings at the end of the reporting period.

The analysis is prepared assuming variable-rate borrowings outstanding at the end of the reporting period were outstanding for the whole year.

If interest rates had been 100 basis points higher/lower and all other variables were held constant, the Target Group's profit for the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025 would decrease/increase by RMB127 million, RMB129 million, RMB118 million, RMB69 million (unaudited) and RMB101 million, respectively.

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, other than those financial assets whose carrying amounts best represent the maximum exposure to credit risk, the Target Group's maximum exposure to credit risk which will cause a financial loss to the Target Group arising from the amount of financial guarantees provided by the Target Group is none. The Target Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets and financial guarantee contracts.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (CONTINUED)

36.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the Directors consider that the Target Group's credit risk is significantly reduced.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China and Agricultural Bank of China.

Other receivables

Other receivables represent pledge and guarantee deposit, dividend receivables and interest receivables. The pledge and guarantee deposit is paid for regular businesses. The dividend receivables relate to the investments of the Target Company and the interest receivables mainly relate to related parties and stated owned entities. Thus, the credit risk on other receivables are limited.

The tables below detail the credit risk exposures of the Target Group's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Entrusted loan	24	N/A	12-month ECL	8	700	516	140
Restricted bank deposits	25	N/A	12-month ECL	42	391	468	501
Cash and cash equivalents	26	N/A	12-month ECL	2,993	5,046	3,632	4,366
Other receivables	24	N/A	12-month ECL	-	-	-	-
			Credit-impaired	3,262	3,803	3,576	3,338
Accounts receivable (note)	23	N/A	Provision matrix	2,703	2,075	1,779	2,564
			Credit-impaired	274	233	17	1
Bills receivable	23	N/A	Credit-impaired	148	470	461	-

Note:

For accounts receivable, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors with credit-impaired, the Target Group determines the ECL on these items by using a provision matrix, grouped by debtors' aging.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (CONTINUED)

36.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – debtors' ageing

As part of the Target Group's credit risk management, the Target Group uses debtors' ageing to assess the impairment for its receivables from customers in relation to its sales of coal and power because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivables which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). Accounts receivable with credit-impaired with gross carrying amounts of RMB274 million, RMB233 million, RMB17 million and RMB1 million as at 31 December 2022, 2023 and 2024 and 31 July 2025, respectively, were assessed individually.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	2	2,703	2	2,075	-	1,779	-	2,564

The loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

During the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 2025, the Target Group provided RMB81 million, RMB9 million, nil and nil impairment allowance for accounts receivable, reversed RMB2 million, RMB1 million, RMB166 million, and RMB16 million and written off nil, RMB50 million, RMB16 million, and nil, respectively, based on the provision matrix.

As at 31 July 2025	-	40	40

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligation as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for the servicing of operation, financial, and capital obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (CONTINUED)

36.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of each of the Relevant Periods) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1 – 2 years RMB million	2 – 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million

		15,209	6,586	2,500	4,726	29,021	25,447

Saved as discussed above, the Target Group also makes use of banks and financial institutions facilities as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (CONTINUED)

36.3 Fair value measurements

Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate their fair values:

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Borrowings-fixed interests rates	896	838	192	177	118	112	97	93

The fair value of fixed rate bank borrowings above in the Level 2 category is measured using discounted cash flow method where the future cash flows are estimated based on the contract and discounted at a rate that reflects the credit risk of the banks.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. COMMITMENTS AND CONTINGENT LIABILITIES

37.1 Capital commitments

At the end of each of the Relevant Periods, the Target Group had capital commitments for land, buildings and mining rights, exploration and evaluation assets, equipment and other as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	7,246	4,899	3,896	5,412
– Equipment	1,349	1,147	5,866	6,931
	8,595	6,046	9,762	12,343

37.2 Environmental contingencies

To date, the Target Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Group. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

38. EMPLOYEE BENEFITS PLAN

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2025 were RMB718 million, RMB773 million, RMB712 million, and RMB306 million, respectively.

39. RELATED PARTY TRANSACTIONS

39.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group

The Target Group is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, an associate of China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its associates, over which the Target Group can exercise significant influence.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (CONTINUED)

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (CONTINUED)

39.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(ii) Income from an entrusted loan represents interest earned from an entrusted loan to an associate of the Target Group. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iii) Interest expense represents interest incurred from loans from China Energy Group and fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iv) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Group's operations from fellow subsidiaries and associates of China Energy Group.

(v) Ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries and associates of China Energy Group.

(vi) Sale of coal represents income from sale of coal to fellow subsidiaries and associates of China Energy Group.

(vii) Purchase of coal represents coal purchased from associates of the Target Group, associates of China Energy Group and fellow subsidiaries.

(viii) Property leasing expense represents rental paid or payable in respect of properties leased from fellow subsidiaries.

(ix) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

(x) Other income includes agency income, repairs and maintenance service income, sales of ancillary materials and spare parts, management fee income, sales of water and electricity, financial service income, lease income, etc. earned from China Energy Group, an associate of China Energy Group and fellow subsidiaries.

(xi) Net deposits placed with Finance Company represents net deposits placed by the Target Group with Finance Company.

(xii) Granting of loans from China Energy Group and fellow subsidiaries.

(xiii) Repayment of loans from China Energy Group and fellow subsidiaries.

(xiv) Granting of loans to China Energy Group and fellow subsidiaries.

(xv) Recover the loan from China Energy Group and fellow subsidiaries.

(xvi) Bills receivables discounted from Finance Company represents bill acceptance and discount services provided by Finance Company to the Target Group.

(xvii) Factoring services refer to receiving factoring services from China Energy Group and fellow subsidiaries.

The directors are of the opinion that the above transactions with related parties were in accordance with the agreements governing such transactions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (CONTINUED)

39.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

Amounts due from/to China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Cash and time deposits at bank	2,740	4,690	3,424	4,273

Long-term liabilities	230	1,737	2,193	1,756
Total amounts due to China Energy Group, an associate of China Energy Group and fellow subsidiaries, and associates of the Target Group	16,368	18,780	15,753	15,147

Other than those disclosed in notes 20, 23, 24, 28, 30, 31 and 32 to the Historical Financial Information, amounts due from/to China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group bear no interest, are unsecured and are repayable in accordance.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (CONTINUED)

39.2 Key management personnel emoluments

Key management personnel receive compensation in the form of fees, basic salaries, housing and other allowances, benefits in kind, discretionary bonuses and retirement scheme contributions.

Key management personnel compensation of the Target Group is summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Short-term employee benefits	10	9	9	7	4
Post-employment benefits	*	1	1	*	*
	10	10	10	7	4

Total remuneration is included in "personnel expenses" as disclosed in note 10 to the Historical Financial Information.

39.3 Contributions to post-employment benefit plans

The Target Group participates in various defined contribution post-employment benefit plans organised by municipal and provincial governments and a supplemental defined contribution pension plan approved by the government for its employees. Further details of the Target Group's post-employment benefit plans are disclosed in note 38 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (CONTINUED)

39.4 Transactions with other government-related entities in the PRC (continued)

The Target Company is ultimately controlled by the PRC government and the Target Group operates in an economic environment currently predominated by government-related entities.

Other than those transactions with China Energy Group, fellow subsidiaries and associates of the Target Group as disclosed above, the Target Group conducts business with other government-related entities which include but are not limited to the following:

- Sales and purchases of coal;
- Transportation services;
- Construction work;
- Purchases of ancillary materials and spare parts;
- Ancillary and social services; and
- Financial services arrangements.

These transactions are conducted in the ordinary course of the Target Group's business on terms comparable to those with other entities that are not government-related. The Target Group has established its pricing policies in respect of sale of goods and provision of services, and approval process for purchases of products and services. Such policies and approval process apply to all counterparties regardless of whether the counterparty is government-related or not.

The balances with government-related enterprises also included the accounts receivable due from sales of electricity and coal, the bank deposits placed with and loans from government-related financial institutions as well as accounts payable and other payables arising from the purchases of coal and property, plant and equipment construction and related labour service provided by other government-related enterprises.

40. NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD

Up to the Historical Financial Information approval date, there was no significant event after the Relevant Periods that need to be disclosed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

41. SUBSIDIARIES

Details of non-wholly owned subsidiaries that have material non-controlling interests

Summarised financial information in respect of each of the Target Group's subsidiaries that has material non-controlling interests is set out below. The summarised financial information below represents amounts before intragroup eliminations.

31 December 2022/Year ended 31 December 2022

Name of the subsidiary	Place of incorporation and operation	Proportion of ownership interest held by non-controlling interest	Profit allocated to non-controlling interests	Accumulated non-controlling interests
			RMB million	RMB million
Wenjiapo Power Generation (note)	PRC /Mainland China	49%	-	98
Guoneng Baoqing Coal Electrochemical Co., Ltd.	PRC /Mainland China	10%	34	37

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF CHINA ENERGY XINJIANG ENERGY & CHEMICAL CO.,LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of China Energy Xinjiang Energy & Chemical Co., Ltd. (the "Target Company") and its subsidiaries except for the Excluded Businesses as defined in note 2.1 to the Historical Financial Information (together, the "Target Group") set out on pages II-B-3 to II-B-134, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-B-3 to II-B-134 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-B-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.

Note:

Pursuant to the relevant PRC regulations, the Target Group is required to transfer production and maintenance funds at fixed rates based on relevant bases, such as, production volume, to a specific reserve account. The production and maintenance funds could be utilised when expenses or capital expenditures on production maintenance and safety measures are incurred. The amount of production and maintenance, funds utilised would be transferred from the specific reserve account to retained earnings/accumulated losses.

Pursuant to the Acquisition, as more fully explained in the paragraph headed "Pre-reorganisation" in the section headed "MAJOR AND CONNECTED TRANSACTION" in the Circular, the Target Company agreed to dispose of its equity interests in Guoneng Xinjiang Kuangou Mining Co., Ltd., Manas County Laobawan Coal Mine Branch of China Energy Xinjiang Energy & Chemical Co., Ltd. Guoneng Urumqi New Energy Development Co., Ltd., Guoneng Zhongji Qitai New Energy Co., Ltd., Guoneng Xinjiang Wenquan Power Generation Co., Ltd., Guoneng Urumqi Photovoltaic Power Generation Co., Ltd., Guoneng Kuitun New Energy Development Co., Ltd., Guoneng Zele Energy Co., Ltd., Guoneng Luopu Energy Co., Ltd., Guoneng Moyu Energy Co., Ltd., Guoneng Bole Energy Co., Ltd., the Activated Carbon Branch of China Energy Xinjiang Energy & Chemical Co., Ltd. and Guoneng Xinjiang Ganquanpu Comprehensive Energy Co., Ltd. (collectively, the "Excluded Business") before the Acquisition (the "Disposal"). The Target Group then comprised the Target Company and its subsidiaries except the Excluded Businesses.

The Historical Financial Information excludes the Excluded Business, which are under the control of the ultimate holding company, but are not strategically complementary for the Acquisition purpose. In evaluating whether the Historical Financial Information fairly presents the history of the Target Group's businesses, the directors considered, among others, the following:

1) whether the Excluded Business was in dissimilar businesses;
2) whether the Excluded Business was and would be operated autonomously both before and after the Disposal; and
3) whether the Excluded Business had no more than incidental common facilities and costs.

The Historical Financial Information has been prepared as if the Disposal had been completed at the beginning of the Relevant Periods and accounted for as a distribution to the holding company of Target Company. The Historical Financial Information does not include the assets, liabilities, results of the operations and cash flows of the Excluded Business. The transactions and balances between the Target Group and the Excluded Business have not been eliminated.

For business combination under common control in which subsidiaries directly or indirectly held by the ultimate holding company of the Target Company (the "Common Control Acquiree Entities") are acquired by the Target Group, it is accounted for using the principles of merger accounting. The consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for the Relevant Periods and the seven months ended 31 July 2024 include the results and cash flows of the Common Control Acquiree Entities from the beginning of the Relevant Periods or since the date when the Common Control Acquiree Entities first came under the common control of the ultimate holding company, where this is a shorter period. The consolidated statements of financial position of the Target Group as at 31 December 2022, 2023 and 2024 and 31 July 2025 have been prepared to present the assets and liabilities of the Common Control Acquiree Entities using the existing book values from the ultimate holding company's perspective. No adjustments are made to reflect fair values, or recognise any new assets or liabilities as a result of the business combination under common control.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) as issued by the International Accounting Standards Board (the "IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared under the going concern basis notwithstanding the fact that, as at 31 July 2025, the Target Group and the Target Company recorded net current liabilities amounting to RMB2,845 million and RMB2,918 million, respectively, because (i) there were unutilised banking facilities of RMB1,800 million available to the Target Group as at 31 July 2025, and (ii) it is expected that there would be sufficient cash inflows to be generated from the Target Group's operation based on the Target Group's cash flow projection prepared by management of the Target Group, which covered a period of not less than twelve months from 31 July 2025. In view of the above, the directors of the Target Company consider it is appropriate to prepare the Historical Financial Information on a going concern basis.

The Historical Financial Information has been prepared on the historical cost basis, except for certain financial instruments as disclosed in note 37.3 to the Historical Financial Information, which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 BASIS OF PREPARATION (CONTINUED)

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Group is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. The new standard is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES

Basis of consolidation

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries except the Excluded Business. Control is achieved when the Target Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to equity holder of the Target Company.

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Business combinations

Acquisitions of businesses, other than business combination under common control, are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*, respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the Target Group of cash-generating units) retained.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Investments in associates and joint ventures

An associate is an entity over which the Target Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The results and assets and liabilities of associates and joint ventures are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates and joint ventures used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Target Group's share of losses of an associate or a joint venture exceeds the Target Group's interest in that associate or joint venture(which includes any long-term interests that, in substance, form part of the Target Group's net investment in the associate or joint venture, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that associate or joint venture.

On acquisition of the investment in an associate or a joint venture, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in an associate or a joint venture may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investments in associates and joint ventures. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in an associate or a joint venture but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate or a joint venture of the Target Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Historical Financial Information only to the extent of interests in the associate and joint venture that are not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e., when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at the point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e., only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered services entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that is taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Taxation (Continued)

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investments in subsidiaries, associates and joint venture to the extent that the Target Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development ("OECD").

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, except where the Target Group is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current tax and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current tax and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment

Property, plant and equipment, which consist of freehold land and buildings, mining structures and mining rights, mining related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment (other than freehold land and construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for freehold land, and mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation
Land and buildings	8 to 55 years
Mining structures and mining rights	3 – 30 years and production-based depreciation
Mining related machinery and equipment	3 to 30 years
Generators related machinery and equipment	12 to 20 years
Railway and port	6 to 25 years
Coal chemical related machinery and equipment	15 to 20 years
Furniture, fixtures, motor vehicles and other equipment	3 to 45 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes is carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related costs are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment (Continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a unit-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Group's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a unit-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and do not provide any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Exploration and evaluation assets

Exploration and evaluation assets comprise costs which are directly attributable to the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource:

- researching and analysing historical exploration data;
- gathering exploration data through topographical, geochemical and geophysical studies;
- exploratory drilling, trenching and sampling;
- determining and examining the volume and grade of the resource;
- surveying transportation and infrastructure requirements; and
- conducting market and finance studies.

Expenditure during the initial exploration preparation stage of a project is charged to profit or loss as incurred. Exploration and evaluation costs, including the costs of acquiring licenses, are capitalised as exploration and evaluation assets on a project-by-project basis pending determination of the technical feasibility and commercial viability of the project.

Once the final feasibility study has been completed and a development decision has been taken, accumulated capitalised exploration and evaluation expenditures in respect of an area of interest are transferred to property, plant and equipment. In circumstances when an area of interest is abandoned or management decides it is not commercially viable, any accumulated costs in respect of that area are written off in the period the decision is made.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment (Continued)

Obligations for land reclamation

The Target Group's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Group estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are escalated for inflation, then discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Group records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the unit-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Intangible assets (Continued)

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or a rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or a rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case, the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the end of the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets (continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying asset to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-lease is classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made at the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

– the financial asset is held within a business model whose objective is to collect contractual cash flows; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset, the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that is required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investments. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets

The Target Group recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable and other receivables). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are performed based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. The ECL on these assets is assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g., a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collateral held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected loss is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or caters for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e., the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loan receivables are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognisation. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables, other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group.

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2 to the Historical Financial Information, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are critical judgements, apart from those involving estimation (see note 3.2 below), that the directors have made in the process of applying the Target Group's accounting policies and that have the most significant effect on the amounts recognised in the Historical Financial Information.

Going concern

As described in note 2.1 of the Historical Financial Information, the Target Group's ability to continue as a going concern is dependent on generating cash inflows from its operating activities and obtaining cash inflows from borrowings to ensure sufficient cash flow to meet its liabilities as they fall due. Should the Target Group be unable to obtain adequate funding, there exists a material uncertainty regarding the Target Group's ability to continue as a going concern. The Historical Financial Information does not include any adjustments that would be necessary to the carrying amounts and classification of assets and liabilities should the Target Group be unable to continue as a going concern.

3.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Group's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated on a regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised costs of mining structures and mining rights are amortised based on the units of coal produced.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.2 Key sources of estimation uncertainty (continued)

Impairment losses

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, exploration and evaluation assets, intangible assets, right-of-use assets, interests in associates and joint ventures and other non-current assets, the recoverable amounts of the assets need to be determined. The recoverable amount is the higher of fair value less cost of disposal and value in use. It is difficult to precisely estimate the fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs and future returns.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The Target Group recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 28 to the Historical Financial Information.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Group considers the factors including the development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Group and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Group may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 34 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	17,913	19,025	17,808	10,289	6,820
Others	630	398	424	154	170
	18,543	19,423	18,232	10,443	6,990

The Target Group's revenues are all derived from contracts with customers.

The Target Group produces and sells coal to customers at spot market. For sales of coal, revenue is recognised when control of the goods has been transferred, being when the goods have been shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return of coal occurred. There are no sales-related warranties associated with coal.

The Target Group provides railway transportation services, shipment transportation services as well as port loading and storage services to customers. Such services are recognised as a performance obligation satisfied over time as the Target Group rendering the services. Revenue is recognised for these services based on the stage of completion of the performance obligation using output method.

All performance obligations of sales of coal, railway and shipment transportation services, and port loading and storage services are part of the contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group only has one reportable operating segment. Management monitors the operating results of the Target Group's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Group's revenue from external customers was from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of the Target Group's non-current and non-financial assets (excluding deferred tax assets) were located at Mainland China as at the end of each of the Relevant Periods.

No single customer's revenue was accounted for 10% or more of the Target Group's total revenue during the Relevant Periods and the seven months ended 31 July 2024.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	18	9	9	4	3
Total interest income	18	9	9	4	3
Interest on:					
– borrowings	246	124	69	43	57
– lease liabilities	12	17	28	9	12
Total finance costs on financial liabilities	258	141	97	52	69
Less: amount capitalised	(2)	-*	(1)	-*	(4)
	256	141	96	52	65
Other	2	2	3	1	3
Unwinding of discount	26	58	119	10	65
Total finance costs	284	201	218	63	133
Net finance costs	266	192	209	59	130

* Amount less than RMB500,000

Borrowing costs capitalised during the year ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025 arose on the general borrowing pools and were calculated by applying capitalisation rates 2.19%, 0.62%, from 0.88% to 1.45%, from 0.88% to 1.45% (unaudited), from 0.43% to 1.10%, respectively per annum to expenditure on qualifying assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	1,019	673	549	235	157
Deferred tax	(39)	10	8	-	24
	980	683	557	235	181

The tax charge for the year/period can be reconciled to the profit before income tax per consolidated statement of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit before income tax	6,205	3,294	2,702	2,014	357
Tax at the PRC income tax rate of 25%	1,551	824	676	504	89
Tax effects of:					
– different tax rates of subsidiaries	(794)	(524)	(433)	(180)	(43)
– non-deductible expenses	402	418	309	56	38
– share of results of associates	(44)	(41)	(38)	15	9
– utilisation of tax losses and deductible temporary difference previously not recognised	(166)	(21)	-	-	-
– tax losses and deductible temporary difference not recognised	31	27	43	(160)	88
Income tax expense	980	683	557	235	181

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate applicable for the PRC group entities was 25% for the Relevant Periods and for the seven months ended 31 July 2024, except for subsidiaries operating in the Western developing region of the PRC which are qualified to be entitled to a preferential tax rate of 15% from 2021 to 2030.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR/PERIOD

Profit for the year/period has been arrived at after charging/(crediting):

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Personnel expenses, including	1,362	2,428	1,618	1,195	1,028

	(21)	-*	(1)	-	-

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR/PERIOD (CONTINUED)

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Other gains and losses, represent					
– gains on disposal of property, plant and equipment, intangible assets and non-current assets	2	1	11	-	(5)
– income from entrusted loans	(15)	(61)	(44)	(23)	(31)
– impairment losses on property, plant and equipment (note 14)	-	79	-	-	-
– provision for impairment of inventories	-	(1)	-*	-	-*
	(13)	18	(33)	(23)	(36)
Operating lease charges relating to short-term leases, leases of low-value assets and variable lease payments	2	3	4	2	2
Auditors' remuneration					
– audit service	-*	-*	-*	-*	-*

* Amount less than RMB500,000

Note:

The Target Group has recorded impairment losses for certain long-term assets.

The recoverable amount is the higher of the fair value of the cash generating units ("CGU") less costs to sell and value in use ("VIU") of the CGUs.

Recoverable amount by calculating fair value less costs to sell:

As at 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025, the Group had determined the recoverable amount by using fair value less cost of disposal. Certain assets had been valued via market method. The fair value was categorised into Level 3 measurement.

Recoverable amount by calculating present value of estimated future cash flow:

The Group had treated companies with impairment indicators as individual cash-generating units and had made relevant impairment assessment by calculating the present value of estimated future cash flow of each cash generating unit.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

11. DIRECTORS' AND SUPERVISORS' EMOLUMENTS

The remuneration of the Target Company's directors and supervisors during the Relevant Periods and the seven months ended 31 July 2024 are as follows:

24. ACCOUNTS AND BILLS RECEIVABLES

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– China Energy Group and fellow subsidiaries	34	78	197	329
– Third parties	272	207	262	509
	306	285	459	838
Bills receivable				
– Third parties	1,389	1,172	1,175	788
	1,695	1,457	1,634	1,626

As at the end of each of the Relevant Periods, all accounts and bills receivables are from contracts with customers.

Bills receivable were mainly issued by PRC banks and others financial institutions, which would expire within one year. As at the end of each of the Relevant Periods, the Target Group had no bills pledged to secure bills payable.

As at the end of each of the Relevant Periods, the ageing analysis of accounts receivable, based on the invoice date and net of loss allowance, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	302	285	459	836
One to two years	4	-	-	2

	306	285	459	838

* Amount less than RMB500,000

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

24. ACCOUNTS AND BILLS RECEIVABLES (CONTINUED)

The Target Group (continued)

As at the end of each of the Relevant Periods, there were no accounts and bills receivables of the Target Group that were past due.

Details of credit risks of accounts and bills receivables as at the end of each of the Relevant Periods are set out in note 37.2 to the Historical Financial Information.

All amounts in accounts and bills receivables are denominated in RMB.

Transfers of financial assets

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group endorsed bills receivable amounting to RMB4,763 million, RMB5,267 million, RMB4,478 million and RMB1,696 million, respectively, to suppliers to settle the accounts payable of same amounts. In accordance to the relevant laws in the PRC, the holders of the bills receivable have a right of recourse against the Target Group if the issuing banks default payment (the "Continuing Involvement"). In the opinion of the directors, the fair values of the Continuing Involvement are insignificant, and the Target Group has transferred substantially all the risks and rewards of ownership relating to these bills receivable, and accordingly derecognised the full carrying amounts of the bills receivable, and in the case of bills receivable being endorsed to suppliers, derecognised the associated accounts payable.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

The Target Company's long-term borrowings comprise:

		31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Loans from banks and other institutions					
RMB denominated	Interest rates ranging 2.80% per annum with maturities through 14 December 2023	82	-	-	-
RMB denominated	Interest rates ranging from LPR-1.65% to LPR-0.8% per annum with maturities through 9 July 2027	3,064	1,407	1,199	1,368
Total		3,146	1,407	1,199	1,368
Less: current portion of long-term borrowings		1,192	1,181	99	34
		1,954	226	1,100	1,334

As at 31 December 2022, 2023 and 2024 and 31 July 2025, included in the above outstanding long-term borrowings were borrowings from China Energy Group and fellow subsidiaries amounting to RMB2,054 million, nil, RMB1,101 million and RMB1,102 million, which bore interest at rates ranging from 3.00% to 3.20% per annum, nil, 2.30% to 2.90% per annum, LPR-1.65% to LPR-0.8% per annum, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

30. LEASE LIABILITIES

The Target Group

The lease liabilities were repayable as follow:

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Present value of the minimum lease payments RMB million	Total minimum lease payments RMB million	Present value of the minimum lease payments RMB million	Total minimum lease payments RMB million	Present value of the minimum lease payments RMB million	Total minimum lease payments RMB million	Present value of the minimum lease payments RMB million	Total minimum lease payments RMB million
Within 1 year	67	75	197	219	421	439	195	204
After 1 year but within 2 years	67	73	193	210	124	128	59	64
After 2 years but within 5 years	85	88	213	216	92	95	7	8
	219	236	603	645	637	662	261	276
Less: total future interest expenses		(17)		(42)		(25)		(15)

35. PAID-UP CAPITAL

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Paid-up capital	9,125	9,213	9,213	9,213

36. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain the investors', creditors' and market's confidence and to sustain the future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratio as at 31 December 2022, 2023 and 2024 and 31 July 2025 were 58.5%, 60.0%, 61.5% and 61.9%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS

37.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	6,565	7,020	8,393	8,109
Accounts and bills receivables at FVTOCI (note 20)	249	335	90	208
	6,814	7,355	8,483	8,317
Financial liabilities				
Amortised cost	6,769	11,629	14,118	13,307

37.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables, loans and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, amounts due from/to associates, other receivables, accounts and bills payables, borrowings, other payables and long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate and currency risks), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

(i) Currency risk

The functional currency of all of the members of the Target Group is RMB in which all of the transactions are denominated. So the management do not expect any significant impact from the change in exchange rates.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Market risk (continued)

(ii) Interest rate risk

The Target Group is exposed to fair value interest rate risk in relation to fixed-rate loan and receivables and borrowings.

The Target Group is also exposed to cash flow interest rate risk in relation to variable-rate borrowings and variable-rate loans. Other than the concentration of interest rate risk related to the movements in Secured Overnight Financing Rate and the loan interest published by the People's Bank of China, the Target Group has no significant concentration of interest rate risk.

The Target Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for variable-rate borrowings at the end of the reporting period.

The analysis is prepared assuming variable-rate borrowings at the end of the reporting period were outstanding for the whole year.

If interest rates had been 100 basis points higher/lower and all other variables were held constant, the Target Group's profit for the year ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025 would decrease/increase by RMB29 million, decrease/increase by RMB14 million, decrease/increase by RMB8 million, decrease/increase by RMB3 million (unaudited) and decrease/increase by RMB7 million, respectively.

Credit risk and impairment assessment

The Target Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets and financial guarantee contracts.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for the determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by analysis by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the directors consider that the Target Group's credit risk is significantly reduced.

Loan receivables

The credit risks on loan receivables are limited because the counterparties are mainly related parties, the Target Group assesses the recoverability by reviewing their financial positions and results periodically and considers that its exposure to credit risk arising from default of the counterparties is limited.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as Industrial and Commercial Bank of China.

Other receivables

Other receivables represent pledged and guaranteed deposits, dividend receivables and interest receivables. The pledged and guaranteed deposits are for regular businesses. The dividend receivables relate to the investments of the Target Group and the interest receivables mainly relate to related parties and stated owned entities. Thus, the credit risk on other receivables are limited.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The tables below detail the credit risk exposures of the Target Group's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Loan receivables	25	N/A	12-month ECL	2,023	1,427	2,009	2,107
Restricted bank deposits	26	N/A	12-month ECL	9	8	4	12
Cash and cash equivalents and time deposits	27	N/A	12-month ECL	1,633	3,198	2,957	2,393
Other receivables	25	N/A	12-month ECL	1,202	926	685	1,168
			Credit-impaired	3	3	3	3
Accounts receivable (note)	24	N/A	Provision matrix	306	285	459	838
			Credit-impaired	-	-	-	-

Note:

For accounts receivable, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors that are credit-impaired, the Target Group determines the ECL on these items using a provision matrix, grouped by debtors' ageing.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – debtors' ageing

As part of the Target Group's credit risk management, the Target Group uses debtors' ageing to assess the impairment for its receivables from customers in relation to its sales of coal, power, coal chemical products and transportation services because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivable which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). There are no credit-impaired that are gross carrying amounts of accounts receivable as at 31 December 2022, 2023 and 2024 and 31 July 2025 were assessed individually.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	-	306	-	285	-	459	-	838

The loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

During the year ended 31 December 2022, the Target Group did not provide any impairment allowance for accounts receivable but reversed RMB5 million, based on the provision matrix. During the years ended 31 December 2023 and 2024 and for the seven months ended 31 July 2024 and 2025, the Target Group did not provide any impairment allowance and did not reverse any amounts for accounts receivable, based on the provision matrix.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Gross carrying amount (continued)

The following tables show the reconciliation of loss allowances that have been recognised for other receivables and other loans.

	12-month ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	50	3	53
– Impairment losses recognised	1	-	1
– Impairment losses reversed	(17)	-	(17)
As at 31 December 2022 and 1 January 2023	34	3	37
– Impairment losses recognised	1	-	1
– Impairment losses reversed	-*	-	-*
As at 31 December 2023 and 1 January 2024	35	3	38
– Impairment losses reversed	(1)	-	(1)
As at 31 December 2024 and 1 January 2025	34	3	37
As at 31 July 2025	34	3	37

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligations as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for its operations and financial and capital obligations, which excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of the Relevant Periods , which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the Relevant Periods) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1 to 2 years RMB million	2 to 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities		4,503	151	285	726	5,665	5,148
Borrowings variable interest rate	3.16	1,289	999	1,469	-	3,757	3,607
Borrowings fixed interest rate	3.53	177	-	-	-	177	172
		5,969	1,150	1,754	726	9,599	8,927

Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities		6,743	643	779	3,700	11,865	10,499
Borrowings variable interest rate	2.68	322	1,198	345	369	2,234	2,150
Borrowings fixed interest rate	2.07	1,965	-	-	-	1,965	1,927
		9,030	1,841	1,124	4,069	16,064	14,576

Save as disclosed above the Target Group also makes use of facilities from banks and financial institutions as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.3 Fair value measurements

Fair value of the Target Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million	Fair value hierarchy	Valuation technique(s) and key input(s)
Financial assets:						
Financial assets at fair value through other comprehensive income						Discounted cash flow method. The significant unobservable inputs used by the Group for the valuation are the expected rates of return.
- Bills receivables	249	335	90	208	Level 3	

There were no transfers between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. FINANCIAL INSTRUMENTS (CONTINUED)

37.3 Fair value measurements (continued)

Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate to their fair values.

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Fixed rate bank borrowings	172	166	-	-	-	-	1,927	1,923

The fair value of fixed rate bank borrowings above in the Level 2 category is measured using discounted cash flow method where the future cash flows are estimated based on the contract and discounted at a rate that reflects the credit risk of the issuers.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

38. COMMITMENTS AND CONTINGENT LIABILITIES

38.1 Capital commitments

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had capital commitments for land, buildings, exploration and evaluation assets, equipment and other as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	110	2,443	237	141
– Equipment	219	107	279	165
	329	2,550	516	306

38.2 Financial guarantees issued

As at 31 December 2022, 2023 and 2024 and 31 July 2025, there were no certain financial guarantees issued by the Target Group.

38.3 Environmental contingencies

To date, the Target Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Group. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. EMPLOYEE BENEFIT PLANS

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligations for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025 were RMB139 million, RMB164 million, RMB178 million, RMB104 million and RMB122 million, respectively.

40. RELATED PARTY TRANSACTIONS

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group

The Target Group is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its associates, over which the Target Group can exercise significant influence.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

The Target Group had the following transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025:

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the People's Bank of China ("PBOC").

(ii) Income from entrusted loan represents interest earned from an entrusted loan to an associate of the Target Group. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iii) Interest expense represents interest incurred from loans from China Energy Group and fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iv) Purchases of ancillary materials and spare parts represent the purchase of materials and utility supplies related to the Target Group's operations from fellow subsidiaries and associates of China Energy Group.

(v) Ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries and associates of China Energy Group.

(vi) Transportation service income represents income earned from fellow subsidiaries in respect of coal transportation services.

(vii) Sale of coal represents income from the sale of coal to fellow subsidiaries and associates of China Energy Group.

(viii) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

(ix) Other income includes agency income, repairs and maintenance service income, sales of ancillary materials and spare parts, management fee income, sales of water and electricity, financial service income, lease income, etc. earned from China Energy Group, and fellow subsidiaries.

(x) Net deposits placed with China Energy Finance Co., Ltd. ("Finance Company") represents the net deposits placed by the Target Group with Finance Company.

(xi) Granting of loans from China Energy Group and fellow subsidiaries.

(xii) Repayment of loans from China Energy Group and fellow subsidiaries.

(xiii) Factoring services refer to receiving factoring services from China Energy Group and fellow subsidiaries.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

The directors are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and in accordance with the agreements governing such transactions.

The Target Group entered into a number of agreements with China Energy Group, fellow subsidiaries, and associates of the Target Group. The terms of the principal agreements are summarised as follows:

(i) The Target Company has entered into a mutual supply agreement for the mutual provision of production supplies and ancillary services with associates of China Energy Group and fellow subsidiaries. Pursuant to the agreement, associates of China Energy Group and fellow subsidiaries provide the Target Group with the production supplies and services, ancillary production services including the use of the information network system and ancillary administrative services. On the other hand, the Target Group provides fellow subsidiaries with water supplies, rolling stock management, railway management, railway transportation and other related or similar production supplies or services and use of the information network system.

The products and services provided under the agreement, other than the sharing of use of the information network system which is free of charge, are provided in accordance with the following pricing policy:

- price prescribed by the state (including any price prescribed by any relevant local government), if applicable;
- where there is no state-prescribed price but where there is a state-guidance price, then the state-guidance price;
- where there is neither a state-prescribed price nor a state-guidance price, the market price; or
- where none of the above is applicable or where it is not practical to apply the above pricing policies in reality, the price to be agreed between the relevant parties shall be based on reasonable costs incurred in providing the goods or services plus a reasonable profit margin of such costs.

(ii) The Target Company has entered into coal supply agreements with fellow subsidiaries and associates of the Target Group. The coal supplied is charged at the prevailing market price.

(iii) The Target Company has entered into a financial services agreement with Finance Company. Pursuant to the agreement, Finance Company provides financial services to the Target Group. The interest rate for the deposits with Finance Company from the Target Group should not be lower than the lowest limit published by the PBOC for the same type of deposit. The interest rate for loans made by Finance Company to the Target Group should not be higher than the highest limit published by the PBOC for the same type of loan. The above interest rates should be determined by reference to the rate charged by normal commercial banks in the PRC for comparable deposits and loans on normal commercial terms. The fees charged by Finance Company for the provision of other financial services shall be determined according to the rates chargeable by the PBOC or the China Banking Regulatory Commission.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

The Target Group entered into a number of agreements with China Energy Group, fellow subsidiaries, and associates of the Target Group. The terms of the principal agreements are summarised as follows: (continued)

(iv) The Target Group entered into an agency agreement for the sale of coal with fellow subsidiaries of China Energy Group. The Target Group is appointed as the exclusive sales agent of fellow subsidiaries of China Energy Group for thermal coal and non-exclusive sales agent for coking coal. The Target Group is entitled to receive an agency fee, which is 1.7 yuan/ton based on transaction settlement volume of coal sales.

(v) The Target Company has entered into a factoring service agreement with Guoneng (Beijing) Commercial Factoring Co., Ltd. ("Guoneng Factoring Company"). Pursuant to the agreement, Guoneng Factoring Company agreed to provide the Target Group with factoring services and factoring-related services. For the provision of factoring services by Guoneng Factoring Company to the Target Group, the financing cost shall not be higher than that determined by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the financing fee determined by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall not be higher than the financing fee calculated based on the Loan Prime Rate (LPR) of the PBOC for the same period. For the service fee charged from the provision of other relevant services by Guoneng Factoring Company to the Target Group, the service fee shall not be higher than that charged by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the service fee charged by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall be determined at the cost plus a reasonable profit margin (around 10%).

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.1 Transactions with China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

Amounts due from/to China Energy Group, fellow subsidiaries, and associates of the Target Group:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million

Total amounts due to China Energy Group, and associates of the Target Group	2,775	1,866	2,031	3,769

Other than those disclosed in note 29 to the Historical Financial Information, amounts due from/to China Energy Group, fellow subsidiaries, and associates of the Target Group bear no interest, are unsecured and repayable in accordance.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.2 Key management personnel emoluments

Key management personnel receive compensation in the form of fees, basic salaries, housing and other allowances, benefits in kind, discretionary bonuses and retirement scheme contributions.

Key management personnel compensation of the Target Group is summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Short-term employee benefits	119	1,115	1,129	1,419	1,352
Post-employment benefits	14	14	14	57	16
	133	1,129	1,143	1,476	1,368

Total remuneration is included in "personnel expenses" as disclosed in note 12 to the Historical Financial Information.

40.3 Contributions to post-employment benefit plans

The Target Group participates in various defined contribution post-employment benefit plans organised by municipal and provincial governments and a supplemental defined contribution pension plan approved by the government for its employees. Further details of the Target Group's post-employment benefit plans are disclosed in note 39 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. RELATED PARTY TRANSACTIONS (CONTINUED)

40.4 Transactions with other government-related entities in the PRC

The Target Company is ultimately controlled by the PRC government and the Target Group operates in an economic environment currently predominated by government-related entities.

Other than those transactions with China Energy Group, fellow subsidiaries and associates of the Target Group as disclosed above, the Target Group conducts business with other government-related entities which include but are not limited to the following:

– Sales and purchases of coal;

– Transportation services;

– Construction work;

– Purchases of ancillary materials and spare parts;

– Ancillary and social services; and

– Financial services arrangements.

These transactions are conducted in the ordinary course of the Target Group's business on terms comparable to those with other entities that are not government-related. The Target Group has established its pricing policies in respect of sale of goods and provision of services, and approval process for purchases of products and services. Such policies and approval process apply to all counterparties regardless of whether the counterparty is government-related or not.

Transactions between the Target Group and other government-related entities, including state-controlled banks in the PRC mainly involve coal sales. And balances between the Target Group and other government-related entities, including state-controlled banks in the PRC mainly involve cash and time deposits at banks.

41. NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD

Up to the Historical Financial Information approval date, there was no significant event after the Relevant Periods that need to be disclosed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF CHINA SHENHUA COAL LIQUEFACTION AND CHEMICAL COMPANY LIMITED TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of China Shenhua Coal Liquefaction and Chemical Company Limited (the "Target Company") and its subsidiaries (together, the "Target Group") set out on pages II-C-3 to II-C-108, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-C-3 to II-C-108 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation of the Interim Comparative Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-C-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.

I HISTORICAL FINANCIAL INFORMATION

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The financial statements of the Target Group for the Relevant Periods, on which the Historical Financial Information is based, were audited by Ernst & Young in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") (the "Underlying Financial Statements").

The Historical Financial Information is presented in Renminbi ("RMB") and all values are rounded to the nearest million except when otherwise indicated.

Notes:

(i) Statutory reserves

According to the PRC Company Law and the Target Company's articles of association, the Target Company is required to transfer 10% of its net profit as determined in accordance with the China Accounting Standards for Business Enterprises ("China Accounting Standards") to its statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of a dividend to shareholders.

(ii) Other reserves

Other reserves mainly represent the share of other reserves of associates.

(iii) Accumulated losses

Included in the accumulated losses of the Target Group were its share of the surplus reserve of its domestic subsidiaries amounted to RMB10 million,RMB21 million,RMB50 million and RMB50 million as at 31 December 2022, 31 December 2023, 31 December 2024 and 31 July 2025, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

Principal activities

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at 9/F and 10/F, No. 16, Ande Road, Dongcheng District, Beijing, the PRC.

During the Relevant Periods, the Target Group was involved in the following principal activities: (i) production and sales of coal chemical products; and (ii) research and development of direct and indirect coal liquefaction projects, coal chemical projects and supporting projects.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company is China Energy Investment Corporation Limited ("China Energy Group"), which is established in the PRC.

As at the date of this report, the Target Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies. The particulars of principal subsidiaries are set out below:

Name	Place and date of registration and place of operations	Paid-up capital RMB million	Proportion of ownership interest held by the Target Group(%)	Principal activities
Guoneng Yulin Chemical Co., Ltd 國能榆林化工有限公司	PRC/Mainland China 14 June 2016	10,041	100.00	Production and sales of coal chemical products
Guoneng Xinjiang Chemical Co., Ltd 國能新疆化工有限公司	PRC/Mainland China 20 July 2016	7,084	100.00	Production and sales of coal chemical products
Shenhua Engineering Technology Co., Ltd 神華工程技術有限公司	PRC/Mainland China 14 September 2017	487	100.00	Engineering service
Shaanxi Shenmu Chemical Industrial Co., Ltd. 陝西神木化學工業有限公司	PRC/Mainland China 12 June 2003	650	62.32	Production and sales of coal chemical products
Shaanxi Yushen Energy Thermal Power Co., LTD 陝西榆神能源熱電有限公司	PRC/Mainland China 22 December 2022	1,500	65.00	Heat production and supply

Note:

The statutory financial statements of the above entities for the years ended 31 December 2022 prepared under China Accounting Standards were audited by Lixin Certified Public Accountants LLP, certified public accountants registered in the PRC, and the statutory financial statements of the above entities for the year ended 31 December 2023 and 2024 were audited by Zhongxinghua Certified Public Accountants LLP, certified public accountants registered in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which includes all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) as issued by the International Accounting Standards Board (the "IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared under the going concern basis notwithstanding the fact that, as at 31 July 2025, the Target Group and the Target Company recorded net current liabilities amounting to RMB5,673 million and RMB1,988 million, respectively, because (i) there were unutilised banking facilities of RMB4,450 million available to the Target Group as at 31 July 2025; and (ii) it is expected that there would be sufficient cash inflows to be generated from the Target Group's operation based on the Target Group's cash flow projection prepared by management of the Target Group, which covered a period of not less than twelve months from 31 July 2025. In view of the above, the directors of the Target Company consider it is appropriate to prepare the Historical Financial Information on a going concern basis.

The Historical Financial Information has been prepared on the historical cost basis, except for certain financial instruments as disclosed in note 35.3 to the Historical Financial Information, which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION (CONTINUED)

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

2.2 ISSUED BUT NOT YET EFFECTIVE HONG KONG FINANCIAL REPORTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Group is in the process of making an assessment of the impact of these new and amended IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. The new standard is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES

Basis of consolidation

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries. Control is achieved when the Target Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to equity holders of the Target Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Business combinations

Acquisitions of businesses, other than business combination under common control are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*, respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Investments in associates

An associate is an entity over which the Target Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the associate. When the Target Group's share of losses of an associate exceeds the Target Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Group's net investment in the associate, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in an associate but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate of the Target Group, profits and losses resulting from the transactions with the associate are recognised in the Historical Financial Information only to the extent of interests in the associate that are not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than entity's functional currencies (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Taxation (continued)

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investment in subsidiaries, associates and joint venture to the extent that the Target Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development ("OECD").

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, except where the Target Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment

Property, plant and equipment, which consists of buildings, coal chemical related machinery and equipment, generators related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statements of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Depending on the nature of the item of property, plant and equipment, depreciation is calculated on the straight-line basis to write off the cost of each asset to its residual value over its estimated useful life. The estimated useful lives for the assets depreciated on the straight-line basis are as follows:

Categories	Term for deprecation (year)
Buildings	10 – 55 years
Mining related machinery and equipment	8 – 15 years
Generators related machinery and equipment	20 – 22 years
Railway and port	10 – 16 years
Coal chemical related machinery and equipment	4 – 20 years
Furniture, fixtures, motor vehicles and other equipment	10 – 15 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Intangible assets (continued)

Intangible assets acquired in a business combination not under common control

Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination with finite useful lives are reported at cost less accumulated amortisation and any accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Leased assets (continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of spare parts, raw materials, finished goods and semi-finished goods are determined on the weighted average method. Cost of semi-finished goods and finished goods comprises direct materials, direct labour and an appropriate proportion of overheads. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income (the "FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets

The Target Group recognises a loss allowance for ECL on financial assets which are subject to impairment under IFRS 9 (including accounts receivable, other receivables, etc.). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. The ECL on these assets are assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collaterals held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concessions that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e. the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognisation. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued)

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables, and other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (CONTINUED)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person:

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group;

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) Both entities are joint ventures of the same third party;

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group;

(vi) The entity is controlled or jointly controlled by a person identified in (a);

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity);

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2.3, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are critical judgements, apart from those involving estimation (see note 3.2 to the Historical Financial Information below), that the Directors have made in the process of applying the Target Group's accounting policies and that have the most significant effect on the amounts recognised in the Historical Financial Information.

Going concern

As described in note 2.1 to the Historical Financial Information, the Target Group's ability to continue as a going concern is dependent on obtaining cash inflows from borrowings to ensure sufficient cash flow to meet its liabilities as they fall due. Should the Target Group be unable to obtain adequate funding, there exists a material uncertainty regarding the Target Group's ability to continue as a going concern. The Historical Financial Information does not include any adjustments that would be necessary to the carrying amounts and classification of assets and liabilities should the Target Group be unable to continue as a going concern.

3.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Impairment loss

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, intangible assets, right-of-use assets, interests in associates and other non-current assets, the recoverable amount of the asset needs to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs and future returns.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The realisation of the deferred tax assets mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are less or more than expected, a material reversal or further provision of deferred tax assets may arise, which will be recognised in profit or loss in the period in which such a reversal or further provision takes place. Further details are included in note 28 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.2 Key sources of estimation uncertainty (continued)

Provision of ECL for accounts and bills receivables

The Target Group uses provision matrix to calculate ECL for accounts and bills receivables. The provision rates are based on the aging of accounts receivable as groupings of receivables that have similar loss patterns. The provision matrix is based on the Target Group's historical default rates taking into consideration forward-looking information that is available without undue costs or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered. In addition, accounts and bills receivables with significant balances and credit impaired are assessed for ECL individually.

The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Target Group's accounts receivable are disclosed in notes 23 and 35.2 to the Historical Financial Information, respectively.

Estimated useful lives and residual values of property, plant and equipment

The Target Group determines the estimated useful lives and residual values (if applicable) and consequently the related depreciation charges for its property, plant and equipment. These estimates are based on the historical experience, anticipated change of technology, market condition and the actual consumption of related assets. The depreciation charge will increase when useful lives are less than previously estimated. In addition, technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down. Actual economic lives may differ from estimated useful lives and actual residual values may differ from estimated residual values. Periodic review could result in change in useful lives and residual values and therefore change in depreciation expense in future periods.

Estimated net realisable value of inventories

In accordance with the Target Group's accounting policy, the Target Group estimated the net realisable value of inventories based on specific facts and circumstances. For different types of inventories, it requires the estimation on selling prices, costs of conversion, selling expenses and the related tax expense to calculate the net realisable amount of inventories. For inventories held for executed sales contracts, management estimates the net realisable amount based on the contracted price. For other finished goods, net realisable value is based on estimated selling prices taking into account the fluctuation of selling price directly relating to events occurring after the end of the period to the extent that such events confirm conditions existing at the end of the period. For raw materials and work in progress, management has established a model in estimating the net realisable amount at which the inventories can be realised in the normal course of business after considering the manufacturing cycles, production capacity and forecasts, estimated future conversion costs and selling prices. Management also takes into account the price or cost fluctuations and other related matters occurring after the end of the reporting period which reflect conditions that existed at the end of the reporting period.

It is reasonably possible that if there is a significant change in circumstances including the Target Group's business and the external environment, outcomes within the next financial year would be significantly affected.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from contracts with customers					
– Coal chemical products	27,111	24,749	25,400	15,272	11,598
– Services	520	541	711	286	288
– Others	351	361	318	209	76
	27,982	25,651	26,429	15,767	11,962

The Target Group's revenues are all derived from contracts with customers.

The Target Group produces and sells coal chemical products to customers at spot market. For sales of coal chemical products, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return of coal chemical products occurred. There is no sales-related warranties associated with coal chemical products.

All performance obligations for the sale of coal chemical products are part of contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group has only one reportable operating segment. Management monitors the operating results of the Target Group's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

The Target Group's revenue from external customers was as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Mainland China	27,503	25,163	25,665	15,388	11,262
Overseas	479	488	764	379	700
	27,982	25,651	26,429	15,767	11,962

All of the Target Group's non-current non-financial assets (excluding deferred tax assets) were located at Mainland China as at the end of each of the Relevant Periods.

No single customer's revenue was accounted for 10% or more of the Target Group's during the Relevant Periods and the seven months ended 31 July 2024.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Materials, fuel and power	16,427	14,892	14,514	8,083	7,137
Personnel expenses	1,497	1,613	1,866	1,286	1,252
Depreciation and amortisation	1,994	2,172	1,941	1,144	1,078

Compensation income	58	1	-	-	1
Others	31	83	100	78	30
	103	120	112	78	37

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	3	10	5	4	1
– other loans and receivables	49	11	17	6	10
Total interest income	52	21	22	10	11
Interest on:					
– borrowings	741	473	408	237	231
– lease liabilities	-	2	2	-	-
Total finance costs on financial liabilities	741	475	410	237	231
Less: amount capitalised	-	-	(2)	-	(4)
	741	475	408	237	227
Others	1	2	8	3	-
Exchange loss, net	5	-	(7)	(6)	(4)
Total finance costs	747	477	409	234	223
Net finance costs	695	456	387	224	212

Borrowing costs capitalised during the year ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025 arose from the general borrowing pools and were calculated by applying capitalisation rates of nil, nil, LPR-0.9% per annum, nil (unaudited) and LPR-0.9% per annum, respectively, to expenditure on qualifying assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	70	2	34	29	41
Income tax different adjustment in respect of prior year/period	-	7	1	-	-
Deferred tax	32	31	23	21	20
	102	40	58	50	61

The tax charge for the year/period can be reconciled to the profit/(loss) before income tax per consolidated statement of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit/(loss) before income tax	2,326	318	1,323	724	(489)
Tax at the PRC income tax rate of 25%	582	80	331	181	(122)
Tax effects of:					
– different tax rates	(237)	(34)	(202)	(75)	51
– non-deductible expenses	15	98	32	28	64
– share of results of associates	(96)	(73)	(95)	(84)	(46)
– utilisation of tax losses and deductible temporary difference previously not recognised	(171)	(37)	(119)	-	(45)
– tax losses and deductible temporary difference not recognised	26	10	89	-	130
– tax adjustment for prior year/period	-	7	1	-	-
– Others	(17)	(11)	21	-	29
Income tax expense	102	40	58	50	61

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate applicable for the PRC group entities was 25% for the Relevant Period and for the seven months ended 31 July 2024 except for subsidiaries operating in the Western developing region of the PRC which are qualified to be entitled to a preferential tax rate of 15% from 2021 to 2030. Additionally, the Company and its subsidiaries Shenhua Engineering Technology Co., Ltd, Guoneng Xinjiang Chemical Co., Ltd and Guoneng Yulin Chemical Co., Ltd are subject to income tax rate of 15% after being assessed as high and new technology enterprises.

(ii) As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company has long-term entrusted loans of RMB1,990 million, RMB2,780 million, RMB1,450 million and RMB450 million, respectively, to subsidiaries through PRC state-owned bank and China Energy Finance Co., Ltd., with an interest rates ranging from 0% to 4.65% per annum, 0% to 4.65% per annum, 0% to 4.85% per annum, of nil per annum, respectively. As at 31 December 2022, the mature dates of entrusted loans were between 18 May 2025 and 22 April 2026. As at 31 December 2023, the mature dates of entrusted loans were between 18 May 2025 and 31 July 2026. As at 31 December 2024, the mature dates of entrusted loans were between 18 March 2026 and 31 July 2026. As at 31 July 2025, the mature dates of entrusted loans were 31 July 2026.

21. RIGHT-OF-USE ASSETS

The Target Group

The right-of-use assets represent the considerations of land use rights paid to the PRC's government authorities and the amounts of leased assets. The Target Group is in the process of applying for the title certificates of certain land use rights certificates with aggregate net carrying amounts of RMB52 million, RMB51 million and RMB50 million as at 31 December 2023 and 2024 and 31 July 2025, respectively. The directors are of the opinion that the Target Group is entitled to lawfully and validly occupy or use the above mentioned lands.

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had no bank loans secured by the Target Group's right-of-use assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– China Energy Group and fellow subsidiaries	230	176	380	249
– Third parties	19	106	92	196
	249	282	472	445
Less: allowance for credit losses	6	9	6	3
	243	273	466	442
Bills receivable				
– China Energy Group and fellow subsidiaries	9	1	19	10
– Third parties	15	62	20	29
	24	63	39	39
	267	336	505	481

As at the end of each of the Relevant Periods, all accounts and bills receivables are from contracts with customers.

Bills receivable were mainly issued by PRC banks and others financial institutions, which would expire within one year. As at the end of each of the Relevant Periods, the Target Group had no bills pledged to secure bills payable.

As at the end of each of the Relevant Periods, the aging analysis of accounts receivables, based on the invoice date and net of loss allowance, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	239	255	454	432
One to two years	1	17	5	2
Two to three years	-	-	6	8
More than three years	3	1	1	-
	243	273	466	442

As at 31 December 2022, 2023 and 2024 and 31 July 2025, included in the Target Group's accounts receivable are debtors with aggregate gross carrying amounts of RMB15 million, RMB14 million, RMB14 million and RMB8 million which are past due as at the report dates. The past due balances are not considered as in default because the debtors are not in significant financial difficulty and the management expects that the debtors are able and likely to pay for the debts. The Target Group does not hold any collateral over these balances.

Details of credit risks of accounts and bills receivables as at the end of each of the Relevant Periods are set out in note 35.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES (CONTINUED)

The Target Group (continued)

Included in accounts receivable, the following amounts are denominated in foreign currencies:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
United States Dollars ("USD")	-	8	21	14

Transfers of financial assets

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group endorsed bills receivable amounting to RMB90 million, RMB88 million, RMB69 million and RMB5 million, respectively, to suppliers to settle the accounts payable of same amounts. In accordance to the relevant laws in the PRC, the holders of the bills receivable have a right of recourse against the Group if the issuing banks default payment (the "Continuing Involvement"). In the opinion of the Directors, the fair values of the Continuing Involvement are insignificant, and the Group has transferred substantially all the risks and rewards of ownership relating to these bills receivable, and accordingly derecognised the full carrying amounts of the bills receivable, in case of bills receivable endorsed to suppliers, derecognised the associated accounts payable.

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES (CONTINUED)

The Target Company (continued)

As at the end of each of the Relevant Periods, all accounts and bills receivables are from contracts with customers.

Bills receivable were mainly issued by PRC banks and others financial institutions, which would expire within one year. As at the end of each of the Relevant Periods, the Target Company had no bills pledged to secure bills payable.

As at the end of each of the Relevant Periods, the aging analysis of accounts receivables, based on the invoice date and net of loss allowance, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	144	98	239	328
One to two years	-	1	-	-
	144	99	239	328

As at the end of each of the Relevant Periods, there were no accounts and bills receivables of the Target Company that were past due.

Details of credit risks of accounts and bills receivables as at the end of each of the Relevant Periods are set out in note 35.2 to the Historical Financial Information.

Included in accounts receivable, the following amounts are denominated in foreign currencies:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
USD	-	6	21	14

Note:

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company has entrusted loans of RMB2,023 million, RMB131 million, RMB1,561 million and RMB1,761 million to subsidiaries through PRC state-owned bank and China Energy Finance Co., Ltd., which would expire within one year. The interest rates ranged from 0% to 4.99% per annum as at 31 December 2022. As at 31 December 2023 and 2024 and 31 July 2025, the entrusted loans were interest free.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

25. CONTRACT ASSETS

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Completed but unsettled project contracting and technical service contracts	26	275	327	389

As at the end of each of the Relevant Periods, the carrying amount of contract assets was due from related parties within China Energy Group, and there was no significant credit risk.

26. RESTRICTED BANK DEPOSITS

Restricted bank deposits mainly include performance bonds, time deposits or notice deposits used for guarantees, housing reform funds, etc.

The Target Group performed impairment assessment on restricted bank deposits and concluded that the probability of defaults of the counterparty banks are insignificant and accordingly, no allowance for credit losses is provided.

Details of impairment assessment of restricted bank deposits are set out in note 35.2 to the Historical Financial Information.

27. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS

(a) Cash and cash equivalents

The Target Group

Cash and cash equivalents in the consolidated statements of financial position and the consolidated statements of cash flows comprise cash at bank and in hand, and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with banks and other financial institutions	4,359	3,376	4,129	6,978
Less: Restricted bank deposits	-	208	11	11
Less: Time deposits with original maturity over three months	654	90	-	580
Cash and cash equivalents	3,705	3,078	4,118	6,387

As at the end of each of the Relevant Periods, the Target Group performed impairment assessment on bank balances and concluded that the probability of defaults of the counterparty banks are insignificant and accordingly, no allowance for credit losses is provided. Details of impairment assessment of bank deposits are set out in note 35.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS (CONTINUED)

(a) Cash and cash equivalents (continued)

The Target Company

Cash and cash equivalents in the statements of financial position comprise cash at bank and in hand, and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million

		10,330	11,406	10,020	6,947

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

29. BORROWINGS (CONTINUED)

The Target Group (continued)

As at 31 December 2022, 2023 and 2024 and 31 July 2025, included in the above outstanding long-term borrowings, were borrowings from China Energy Group and fellow subsidiaries amounting to RMB6,406 million, RMB8,607 million, RMB9,726 million and RMB11,120 million, respectively. As at 31 December 2022, 2023 and 2024 and 31 July 2025, current portion of long-term borrowings bore interest at rates of LPR-0.25% per annum, LPR-1.30% per annum, nil per annum and nil per annum, respectively, and other long-term borrowings bore interest at rates of 3.25% per annum, nil per annum, nil per annum, nil per annum and of LPR-1.60% per annum, ranging from LPR-1.80% to LPR-1.60% per annum, LPR-1.80% to LPR-1.20% per annum, LPR-1.80% to LPR-1.20% per annum, respectively.

Among the long-term loans due within one year as of 31 July, 2025 and December 31, 2024, there is an overdue loan of RMB300 million. This loan was borrowed by the Target Group's subsidiary Shaanxi Shenmu Chemical Industry Co., Ltd. from one of its non-controlling shareholder on 15 March, 2021, with an annual interest rate of 4.85%. The loan was due on 14 March, 2024. As of 31 July, 2025, the two parties have not entered into an extension agreement of this loan. The interest calculated at the contract rate of 4.85% has been paid as scheduled, while the penalty interest of RMB10 million, as calculated by 50% of the contracted interest rate on the overdue amount, was accrued at 31 July 2025.

The Target Company

An analysis of the Target Company's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Short-term bank and other borrowings	200	-	-	-
Current portion of long-term borrowings	2,957	5	1,404	5,600
	3,157	5	1,404	5,600
Non-current borrowings:				
Long-term borrowings, less current portion	4,400	5,900	4,500	1,800
	7,557	5,905	5,904	7,400
Secured	1,450	-	-	-
Unsecured	6,107	5,905	5,904	7,400
	7,557	5,905	5,904	7,400

As at 31 December 2022, the Target Company short-term borrowings bore interest at rates of LPR-0.25% per annum. Long-term borrowings bore fixed interest at rates ranging from 2.75% to 3.25% per annum as at 31 December 2022, and as at 31 December 2023 and 2024 and 31 July 2025, there were no borrowings with fixed interest rates. As at 31 December 2022, 2023 and 2024 and 31 July 2025, long-term borrowings bore floated interest at rates ranging from LPR-1.60% per annum, LPR-1.75% to LPR-1.60% per annum, LPR-1.75% to LPR-1.60% per annum, and LPR-1.75% to LPR-1.25% per annum, respectively.

33. PAID-UP CAPITAL

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Registered and paid-up capital	31,237	31,237	31,237	31,237

34. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratio as at 31 December 2022, 2023 and 2024 and 31 July 2025 was 57.3%, 54.4%, 52.1% and 57.6%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS

35.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	4,800	3,892	4,902	7,680
Equity securities at FVTOCI (note 19)	20	20	20	20
Financial assets measured at fair value through profit or loss	-	-	10	10
	4,820	3,912	4,932	7,710
Financial liabilities				
Amortised cost	20,635	17,959	17,769	20,990

35.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables, loans and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, amounts due from/to associates, other receivables, accounts payables, borrowings, other payables and long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (currency and interest rate risks), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

(i) Currency risk

The functional currency of the Target Group is RMB in which most of the transactions are denominated, the foreign exchange risk exposure is insignificant.

(ii) Interest rate risk

The Target Group is exposed to fair value interest rate risk in relation to fixed-rate borrowings (see note 29).

The Target Group is also exposed to cash flow interest rate risk in relation to variable-rate borrowings and variable-rate loans. Other than the concentration of interest rate risk related to the movements in Secured Overnight Financing Rate and the loan interest published by the The People's Bank of China ("PBOC"), the Target Group has no significant concentration of interest rate risk.

The Target Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS (CONTINUED)

35.2 Financial risk management objectives and policies (continued)

Market risk (continued)

(ii) Interest rate risk (continued)

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for variable-rate borrowings and variable-rate loans and receivables at the end of the reporting period. No sensitivity analysis has been presented for the exposure to interest rates for bank balances as the management of the Target Group considers that, taking into account that the fluctuation in interest rates on bank balances is minimal, the impact of profit or loss for the year is insignificant.

The analysis is prepared assuming variable-rate borrowings and variable-rate loans and receivables outstanding at the end of the reporting period were outstanding for the whole year.

If interest rates had been 100 basis points, 100 basis points, 100 basis points, 100 basis points and 100 basis points higher/lower and all other variables were held constant, the Target Group's profit for the year ended 31 December 2022, 2023 and 2024, for the seven months ended 31 July 2024 and 2025 would decrease/increase by RMB91 million, decrease/increase by RMB125 million, decrease/increase by RMB135 million, decrease/increase by RMB128 million and decrease/increase by RMB153 million.

Credit risk and impairment assessment

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the Directors consider that the Target Group's credit risk is significantly reduced.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China and Agricultural Bank of China.

Other receivables

Other receivables mainly represent pledge and guarantee deposit and receivables from related parties. The pledge and guarantee deposit is paid for regular businesses. Thus, the credit risk on other receivables are limited.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS (CONTINUED)

35.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The tables below detail the credit risk exposures of the Target Group's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Restricted bank deposits	23	N/A	12-month ECL	-	208	11	11
Cash and cash equivalents and time deposits	24	N/A	12-month ECL	4,359	3,168	4,118	6,967
Other receivables	22	N/A	12-month ECL	14	41	99	97
			Credit-impaired	178	193	202	160
Accounts receivable (note)	21	N/A	Provision matrix	17	20	39	196
			Credit-impaired	232	262	433	249

Note:

For accounts receivable, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors with credit-impaired, the Target Group determines the ECL on these items by using a provision matrix, grouped by debtors' aging.

Provision matrix – debtors' aging

As part of the Target Group's credit risk management, the Target Group uses debtors' aging to assess the impairment for its receivables from customers in relation to its coal chemical products. Because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivables which are assessed based on provision matrix as at as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). Accounts receivable with credit-impaired with gross carrying amounts of RMB232 million, RMB262 million, RMB433 million and RMB249 million as at 31 December 2022, 2023 and 2024 and 31 July 2025, respectively, were assessed individually.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS (CONTINUED)

35.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	0%	2	0%	6	0%	25	0%	188
Less than one year past due	7%	10	6%	7	6%	11	6%	6
One to two years past due	17%	1	9%	3	10%	1	10%	-
More than three years past due	70%	4	86%	4	100%	2	100%	2
		17		20		39		196

The estimated loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

During the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024, 2025, the Target Group provided RMB2 million, RMB7 million, RMB6 million, RMB6 million and RMB0 million impairment allowance for accounts receivable, respectively, and reversed RMB5 million, RMB2 million, RMB8 million, RMB8 million and RMB3 million, respectively, based on the provision matrix.

– Impairment losses recognised	-	-	-
– Impairment losses reversed	(5)	-	(5)
– Write-offs	-	-	-
As at 31 July 2025	4	74	78

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligation as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for the servicing of operation, financial, and capital obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS (CONTINUED)

35.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1 – 2 years RMB million	2 – 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts payables, other payables, lease liabilities and long-term liabilities	-	5,229	-	-	-	5,229	5,229
Borrowings variable interest rate	4	2,217	1,367	4,826	1,479	9,889	9,150
Borrowings fixed interest rate	3	3,100	3,356	-	-	6,456	6,256
	-	10,546	4,723	4,826	1,479	21,574	20,635

	-	14,623	1,891	4,964	-	21,478	20,990

Saved as discussed above, the Target Group also makes use of banks and financial institutions facilities as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. FINANCIAL INSTRUMENTS (CONTINUED)

35.3 Fair value measurements

Fair value of the Target Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million	Fair value hierarchy	Valuation technique(s) and key input(s)
Financial assets:						
Financial assets at fair value through profit or loss	-	-	10	10	Level 3	Market comparison approach. Fair value is estimated based on value of comparable listed companies, multiples and discount for lack of liquidity.
Unlisted equity securities	20	20	20	20	Level 3	

There were no transfer between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024, and for the seven months ended 31 July 2024 and 2025.

Except as detailed in the following table, the Directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate their fair values:

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Fixed rate bank borrowings	6,256	5,900	300	310	300	310	300	308

36. CAPITAL COMMITMENTS

As at the end of each of the Relevant Periods, the Target Group had capital commitments for equipment and others as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Equipment and others	1,683	2,565	2,001	1,494

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. EMPLOYEE BENEFITS PLAN

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the years ended 31 December 2022, 2023 and 2024, for the seven months ended 31 July 2024 and 2025 were RMB287 million, RMB343 million, RMB387 million, RMB258 million and RMB290 million, respectively.

38. RELATED PARTY TRANSACTIONS

38.1 Transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group

The Target Group is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, associates of China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its associates, over which the Target Group can exercise significant influence.

The Target Group had the following transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024, and for the seven months ended 31 July 2024 and 2025:

	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

38. RELATED PARTY TRANSACTIONS (CONTINUED)

38.1 Transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

Notes:

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(ii) Interest expense represents interest incurred from loans from China Energy Group and fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iii) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Group's operations from fellow subsidiaries and associates of China Energy Group.

(iv) Ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries and associates of China Energy Group.

(v) Transportation service represents expenses paid to fellow subsidiaries in respect of transportation services.

(vi) Purchase of coal represents coal purchased from associates of the Target Group, associates of China Energy Group and fellow subsidiaries.

(vii) Property leasing expense represents rental paid or payable in respect of properties leased from fellow subsidiaries.

(viii) Repairs and maintenance services expense represents expense related to machinery repairs and maintenance services provided by associates of China Energy Group and fellow subsidiaries.

(ix) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

(x) Sale of coal chemical product represents income from sale of coal chemical product to fellow subsidiaries.

(xi) Income from engineering and technical services refers to the income from providing engineering and technical services to related parties

(xii) Net deposits placed with Finance Company represents net deposits placed by the Target Group with Finance Company.

(xiii) Granting of loans from China Energy Group and fellow subsidiaries.

(xiv) Repayment of loans from China Energy Group and fellow subsidiaries.

(xv) Factoring services refer to receiving factoring services from China Energy Group and fellow subsidiaries.

(xvi) Purchase chemical products from China Energy Group without processing and directly resell them.

The directors are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and in accordance with the agreements governing such transactions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

38. RELATED PARTY TRANSACTIONS (CONTINUED)

38.1 Transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

The Target Group entered into a number of agreements with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group. The terms of the principal agreements are summarised as follows:

(i) The Target Company has entered into a mutual supply agreement for the mutual provision of production supplies and ancillary services with associates of China Energy Group and fellow subsidiaries. Pursuant to the agreement, associates of China Energy Group and fellow subsidiaries provide the Target Group with the production supplies and services, ancillary production services including the use of the information network system and ancillary administrative services.

The products and services provided under the agreement, other than the sharing of use of the information network system which is free of charge, are provided in accordance with the following pricing policy:

- price prescribed by the state (including any price prescribed by any relevant local government), if applicable;
- where there is no state-prescribed price but where there is a state-guidance price, then the state-guidance price;
- where there is neither a state-prescribed price nor a state-guidance price, the market price; or
- where none of the above is applicable or where it is not practical to apply the above pricing policies in reality, the price to be agreed between the relevant parties shall be based on reasonable costs incurred in providing the goods or services plus a reasonable profit margin of such costs.

(ii) The Target Company has entered into coal supply agreements with associates of China Energy Group, fellow subsidiaries and associates of the Target Group. The coal supplied is charged at the prevailing market price.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

38. RELATED PARTY TRANSACTIONS (CONTINUED)

38.1 Transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, and associates of the Target Group (continued)

(iii) The Target Company has entered into a financial services agreement with Finance Company. Pursuant to the agreement, Finance Company provides financial services to the Target Group. The interest rate for the deposits with Finance Company from the Target Group should not be lower than the lowest limit published by the PBOC for the same type of deposit. The interest rate for loans made by Finance Company to the Target Group should not be higher than the highest limit published by the PBOC for the same type of loan. The above interest rates should be determined by reference to the rate charged by normal commercial banks in the PRC for comparable deposits and loans on normal commercial terms. The fees charged by Finance Company for the provision of other financial services shall be determined according to the rates chargeable by the PBOC or the China Banking Regulatory Commission.

(iv) The Target Group has entered into a property leasing agreement with fellow subsidiaries of China Energy Group for leasing of certain properties to each other. No rent is payable by the Target Group before fellow subsidiaries obtains the relevant property ownership certificate. The rental charges are based on comparable market rates. If fellow subsidiaries of China Energy Group negotiate to sell a leased property to a third party, the Target Company has a pre-emptive right to purchase such property under terms no less favorable than other third party.

(v) The Target Group has entered into agreements with fellow subsidiaries of China Energy Group under which the Target Group has been granted the right to use certain trademarks. Fellow subsidiaries of China Energy Group bear its own cost for the registration of such trademarks during the term of the trademarks license agreement and expenses for enforcement against any infringement of the licensed trademarks by third parties.

(vi) The Target Company has entered into a factoring service agreement with Guoneng (Beijing) Commercial Factoring Co., Ltd. ("Guoneng Factoring Company"). Pursuant to the agreement, Guoneng Factoring Company agreed to provide the Target Group with factoring services and factoring-related services. For the provision of factoring services by Guoneng Factoring Company to the Target Group, the financing cost shall not be higher than that determined by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the financing fee determined by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall not be higher than the financing fee calculated based on the Loan Prime Rate (LPR) of the PBOC for the same period. For the service fee charged from the provision of other relevant services by Guoneng Factoring Company to the Target Group, the service fee shall not be higher than that charged by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the service fee charged by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall be determined at the cost plus a reasonable profit margin (around 10%).

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF CHINA ENERGY WUHAI COAL GROUP CORPORATION LIMITED TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of China Energy Wuhai Coal Group Corporation Limited (the "Target Company") and its subsidiaries except for the Excluded Businesses as defined in note 2.1 to the Historical Financial Information (together, the "Target Group" as defined in note 2.1) set out on pages II-D-3 to II-D-106, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-D-3 to II-D-106 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-D-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

Principal activities

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at Chuangye Road West, Shenhua Street South, Binhe District, Wuhai City, Inner Mongolia Autonomous Region, the PRC.

During the Relevant Periods, the Target Group were involved in the production and sale of coal in the PRC.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company is China Energy Investment Corporation Limited ("China Energy Group"), which is established in the PRC.

As at date of this report, the Target Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies. The particulars of principal subsidiaries are set out below:

Name	Place and date of registration and place of operations	Paid-up capital	Proportion of ownership interest held by the Target Group (%)	Principal activities
		RMB million		
Inner Mongolia Limin Coal Coke Co., Ltd. (內蒙古利民煤焦有限責任公司)	PRC/Mainland China 20 September 1999	452	100.00	Coal mining, processing, and sales of coal
Guoneng Wuhai Energy Wuda Coal Processing Co., Ltd. (國能烏海能源烏達煤炭加工有限公司)	PRC/Mainland China 5 February 2021	130	100.00	Bituminous and anthracite coal mining and washing
Guoneng (Wuhai Hainan District) Coal Processing Co., Ltd. (國能（烏海海南區）煤炭加工有限公司)	PRC/Mainland China 27 December 2023	90	100.00	Petroleum, coal, and other fuel processing
Wuhai Lutian Mining Co., Ltd. (烏海市路天礦業有限責任公司)	PRC/Mainland China 22 April 2004	78	86.65	Coal mining and deep processing of coal and its by-products
Wuhai Gongwusu Coal Industry Co., Ltd.(烏海市公烏素煤業有限責任公司)	PRC/Mainland China 22 April 2004	74	80.52	Coal mining and deep processing of coal and its by-products
Guoneng Wuhai Energy Wuhushan Mining Co., Ltd. (國能烏海能源五虎山礦業有限責任公司)	PRC/Mainland China 16 August 2007	59	65.00	Coal mining and deep processing of coal and its by-products
Guoneng Wuhai Energy Huangbaizi Mining Co., Ltd. (國能烏海能源黃白茨礦業有限責任公司)	PRC/Mainland China 22 March 2004	84	51.10	Coal mining and deep processing of coal and its by-products

Note:

The statutory financial statements of the above entities for the years ended 31 December 2022 prepared under China Accounting Standards were audited by ShineWing Certified Public Accountants LLP, certified public accountants registered in the PRC.

The statutory financial statements of the above entities for the years ended 31 December 2023 and 2024 prepared under China Accounting Standards were audited by Baker Tilly China Certified Public Accountants LLP, certified public accountants registered in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PRESENTATION

Pursuant to the Acquisition, as more fully explained in the paragraph headed "Principal Terms of the Asset Purchase Agreement (as supplemented by the Supplemental Asset Purchase Agreement)" in the section headed "MAJOR AND CONNECTED TRANSACTION" in the Circular, the Target Company agreed to dispose of its equity interests in Inner Mongolia Alxa League Tianrong Coal Co., Ltd., Wuhai Shenhua Junzheng Industry Co., Ltd. and the related mining right of Baiyinwusu Coal Mine of Shenhua Group Haibowan Mining Co., Ltd. (collectively, the "Excluded Business") before the Acquisition (the "Disposal"). The Target Group then comprised the Target Company and its subsidiaries except the Excluded Businesses.

The Historical Financial Information excludes the Excluded Business, which are under the control of the ultimate holding company, but are not strategically complementary for the Acquisition purpose. In evaluating whether the Historical Financial Information fairly presents the history of the Target Group's business, the directors considered, among others, the following:

1) whether the Excluded Business was in dissimilar businesses;
2) whether the Excluded Business was and would be operated autonomously both before and after the Disposal; and
3) whether the Excluded Business had no more than incidental common facilities and costs.

The Historical Financial Information has been prepared as if the Disposal had been completed at the beginning of the Relevant Periods and accounted for as a distribution to the holding company of Target Company. The Historical Financial Information does not include the assets, liabilities, results of the operations and cash flows of the Excluded Business. The transactions and balances between all companies now comprising the Target Group and the Excluded Business have not been eliminated.

2.2 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and interpretations) as issued by the International Accounting Standards Board ("IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information have been prepared on the historical cost basis, except for certain financial instruments as disclosed in note 34.3 to the Historical Financial Information, which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 BASIS OF PREPARATION (continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

– Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

– Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

– Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Group is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. The new standard is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

2.4 MATERIAL ACCOUNTING POLICIES

Basis of consolidation

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries except the Excluded Business. Control is achieved when the Target Company:

– has power over the investee;

– is exposed, or has rights, to variable returns from its involvement with the investee; and

– has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Basis of consolidation (continued)

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to equity holder of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Business combinations

Acquisitions of businesses, other than business combination under common control are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*, respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Investments in associates

An associate is an entity over which the Target Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the associate. When the Target Group's share of losses of an associate exceeds the Target Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Group's net investment in the associate, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in an associate but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate of the Target Group, profits and losses resulting from the transactions with the associate are recognised in the Historical Financial Information only to the extent of interests in the associate that are not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary difference between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary difference. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Taxation (continued)

Deferred tax is not recognised for:

- temporary difference on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary difference;

- temporary difference related to investment in subsidiaries and associates to the extent that the Target Group is able to control the timing of the reversal of the temporary difference and it is probable that they will not reverse in the foreseeable future; and

- taxable temporary difference arising on the initial recognition of goodwill;

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (the "OECD").

.

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary difference associated with investments in subsidiaries and associates, except where the Target Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary difference associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary difference and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment, which consists of freehold land and buildings, mining structures and mining rights, mining related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than freehold land and construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for freehold land, and mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation (year)
Land and buildings	10 – 55 years
Mining related machinery and equipment	5 – 40 years
Generators related machinery and equipment	5 – 35 years
Furniture, fixtures, motor vehicles and other equipment	10 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Group's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and does not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Obligations for land reclamation

The Target Group's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Group estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Group records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets (continued)

Intangible assets acquired in a business combination not under common control

Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination with finite useful lives are reported at cost less accumulated amortisation and any accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets (continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant periods. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

– the financial asset is held within a business model whose objective is to collect contractual cash flows; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income (the "FVTOCI"):

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

Impairment of financial assets

The Target Group recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable and other receivables). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. The ECL on these assets are assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collaterals held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concessions that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e. the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including accounts and bills payables and other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person:

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group.

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2.4 to the Historical Financial Information, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Group's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

Impairment losses

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, intangible assets, interests in associates and other non-current assets, the recoverable amount of the asset need to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs, future returns and discount rates.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

Key sources of estimation uncertainty (Continued)

Deferred tax assets

The Target Group recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary difference will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary difference, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 27 to the Historical Financial Information.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Group considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Group and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Group may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 31 to the Historical Financial Information.

Provision of defined benefit plan

The Target Group has implemented organizational reforms, under which certain branches and subsidiaries have introduced internal retirement programs, allowing eligible employees to voluntarily exit their positions and enter a period of rest and recuperation. The Target Group has an obligation to pay internal retirement allowances to these employees prior to their reaching statutory retirement age. The Target Group calculates the monthly internal retirement allowance for each participating employee based on the internal retirement plan's established criteria. It also accrues and pays the required social insurance and housing fund contributions for these employees in accordance with local regulations. The Target Group forecasts future payments of internal retirement allowances by referencing expected inflation rates. In addition, the Target Group operates an unfunded defined benefit plan for all eligible employees within China. Under this plan, employees are entitled to receive post-retirement benefits such as heating subsidies and other supplementary welfare benefits outside the statutory pension scheme.

The plan is subject to risks related to interest rates, changes in the expected life expectancy of retirees, and anticipated salary growth rates. Given that these estimates involve judgments regarding future economic conditions and personnel policies, they are subject to significant uncertainty. Management has carefully assessed the underlying assumptions and made its judgments based on historical data and current operational conditions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	12,527	10,644	9,726	6,430	4,025
– Power	8	7	3	2	1
Others	71	93	41	27	14
	12,606	10,744	9,770	6,459	4,040

The Target Group's revenues from contracts with customers amounted to RMB12,601 million, RMB10,744 million, RMB9,752 million, RMB6,449 million (unaudited) and RMB4,035 million for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025, respectively.

The Target Group produces and sells coal to customers at spot markets. For sales of coal, revenue is recognised when control of the goods has been transferred, being when the goods have been picked up by the customer or shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return of coal occurred. There are no sales-related warranties associated with coal products.

For sales of power, revenue is recognised upon the transmission of electric power to the power grid companies. Power could not be returned or exchanged and there are also no warranties associated with power sales.

All performance obligations of sales of coal and power are part of the contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group only has one reportable operating segment. Management monitors the operating results of the Target Group's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Group's revenue from external customers was derived from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of the Target Group's non-current non-financial assets (excluding deferred tax assets) were located at Mainland China as at the end of each of the Relevant Periods.

Revenue derived from single customers which accounted for 10% or more of the Target Group's total revenue is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Customer A	1,489	-*	-*	-*	-*
Customer B	1,430	1,292	-*	-*	-*
Customer C	-*	-*	1,011	-*	516

* The corresponding revenue did not contribute over 10% of the total revenue of the Target Group during that particular year/period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022	Year ended 31 December 2023	Year ended 31 December 2024	Seven months ended 31 July 2024	Seven months ended 31 July 2025

– impairment losses on intangible assets (note 16) (note)	-	-*	-	-	-
– impairment losses on right-of-use assets (note 21) (note)	-	16	4	-	-
	(11)	779	264	(22)	-
Carrying amount of inventories sold	5,672	7,481	5,982	3,608	3,120
Operating lease charges relating to short-term leases, leases of low-value assets and variable lease payments	6	8	19	11	13
Auditors' remuneration					
– audit service	-*	-*	1	-*	-*

* Amount less than RMB500,000

Note:

The Target Group has recorded impairment losses for certain long-term assets.

The recoverable amount is the higher of the fair value of the cash generating unit ("CGU") less costs to sell and value in use ("VIU") of the CGUs.

Recoverable amount by calculating fair value less costs of disposal:

As of 31 December 2023 and 2024, the Target Group had determined the recoverable amount by using fair value less cost of disposal. Certain assets had been valued via market method. The fair value was categorised into Level 3 measurement.

Recoverable amount by calculating present value of estimated future cash flow:

As of 31 December 2023 and 2024, the Target Group had treated companies with impairment indicators as individual cash-generating units and had made relevant impairment assessment by calculating the present value of estimated future cash flow of each cash generating unit. The pre-tax discount rate used in the impairment assessment was based on the weighted average cost of capital, ranging from 11.33% and 8.64%.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

11. DIRECTORS' AND SUPERVISORS' EMOLUMENTS

The remuneration of the Target Company's directors and supervisors during the Relevant Periods and the seven months ended 31 July 2024 are as follows:

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Non-current assets				
Unlisted equity securities (note (i))	1	1	1	1
Current assets				
Accounts and bills receivables (note (ii))	27	-	2	-
	28	1	3	1

Notes:

(i) The above unlisted equity investments represent the Target Group's equity interests in entities established in the PRC. The directors of the Target Company have elected to designate these equity investments as at FVTOCI as it is the Target Group's strategy to hold these investments for long-term purposes and realising their performance potential in the long run.

(ii) As at 31 December 2022, 2023 and 2024 and 31 July 2025, certain accounts and bills receivables were classified as financial assets at FVTOCI, as the Target Company's and certain subsidiaries' business model is achieved both by collecting contractual cash flows and selling of these assets.

23. ACCOUNTS AND BILLS RECEIVABLES

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– China Energy Group and fellow subsidiaries	405	326	128	31
– Third parties	159	198	232	151
	564	524	360	182
Less: Allowance for credit losses	4	3	2	2
	560	521	358	180
Bills receivable				
– Third parties	-	-	1	-
	560	521	359	180

As at the end of each of the Relevant Periods, accounts and bills receivables from contracts with customers amounted to RMB553 million, RMB501 million, RMB348 million and RMB180 millions, respectively.

Bills receivable were mainly issued by the PRC banks, which would expire within one year. As at the end of each of the Relevant Periods, the Target Group had no bills pledged to secure bills payable.

As at the end of each of the Relevant Periods, the ageing analysis of accounts receivables, based on the invoice date and net of loss allowance, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	557	518	355	179
One to two years	-	-*	-	1
Two to three years	-	-	-	-
More than three years	3	3	3	-*

* Amount less than RMB500,000

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES (CONTINUED)

The Target Group (Continued)

As at 31 December 2022, 2023 and 2024 and 31 July 2025, included in the Target Group's accounts receivable are debtors with aggregate gross carrying amounts of RMB4 million, RMB3 million, RMB2 million and RMB2 million which are past due as at the report dates. The past due balances are not considered as in default because the debtors are not in significant financial difficulty and the management expects that the debtors are able and likely to pay for the debts. The Target Group does not hold any collateral over these balances.

Details of credit risks of accounts and bills receivables as at the end of each of the Relevant Periods are set out in note 34.2 to the Historical Financial Information.

Transfers of financial assets

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group endorsed bills receivable amounting to RMB41 million, RMB2 million, nil and nil, respectively, to suppliers to settle the accounts payable of the same amounts. In accordance with the relevant laws in the PRC, the holders of the bills receivable have a right of recourse against the Target Group if the issuing banks default on payments (the "Continuing Involvement"). In the opinion of the directors, the fair values of the Continuing Involvement are insignificant, and the Target Group has transferred substantially all the risks and rewards of ownership relating to these bills receivable, and accordingly derecognised the full carrying amounts of the bills receivable, and in the case of bills receivable being endorsed to suppliers, derecognised the associated accounts payable.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES (CONTINUED)

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– China Energy Group and fellow subsidiaries	1,282	796	1,047	1,185
– Third parties	19	51	117	71
	1,301	847	1,164	1,256
Less: Allowance for credit losses	-	-	-	-
	1,301	847	1,164	1,256

As at the end of each of the Relevant Periods, accounts receivables from contracts with customers amounted to RMB1,290 million, RMB824 million, RMB1,152 million and RMB1,254 millions, respectively.

As at the end of each of the Relevant Periods, the ageing analysis of accounts receivables, based on the invoice date and net of loss allowance, is less than one year.

As at as at the end of each of the Relevant Periods, there were no accounts receivable that were in default.

Details of credit risks of accounts as at the end of each of the Relevant Periods are set out in note 34.2 to Historical Financial Information.

Transfers of financial assets

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company endorsed bills receivable amounting to RMB41 million, RMB2 million, nil and nil, respectively, to suppliers to settle the accounts payable of the same amounts. In accordance with the relevant laws in the PRC, the holders of the bills receivable have a right of recourse against the Target Company if the issuing banks default on payments (the "Continuing Involvement"). In the opinion of the directors, the fair values of the Continuing Involvement are insignificant, and the Target Company has transferred substantially all the risks and rewards of ownership relating to these bills receivable, and accordingly derecognised the full carrying amounts of the bills receivable, and in the case of bills receivable being endorsed to suppliers, derecognised the associated accounts payable.

Notes:

(i) As at 31 December 2024, the balance of the entrusted loan provided by the Target Company to China Energy Group Hangjin Energy Co., Ltd., which is the Target Company's fellow subsidiary, through China Energy Group Finance Co., Ltd., which is the Target Company's fellow subsidiary, was RMB1,159 million, with an annual interest rate of 2.3% and a term of one year. The entrusted loan became mature in April 2025, and China Energy Group Hangjin Energy Co., Ltd. repaid the principal and interest accordingly. As at 31 December 2022, the balance of the entrusted loan provided by the Target Company to Inner Mongolia Limin Coal & Coke Co., Ltd. through Bank of Communications was RMB52.25 million, with an annual interest rate of 3.83% and a term of one year. The entrusted loan became mature in March 2023, and Inner Mongolia Limin Coal & Coke Co., Ltd. repaid the principal and interests accordingly.

(ii) As at 31 December 2022, 2023 and 2024 and 31 July 2025, the balance of the debt investment provided by the Target Group to China Energy Leasing Co., Ltd., which is the Target Company's fellow subsidiary, through Yingda International Trust Co., Ltd. amounted to nil, RMB4,200 million, RMB2,500 million and RMB2,805 million, respectively, with an annual interest rate of 2.05% and a term of one year. China Energy Leasing Co., Ltd. repaid the principal and interest accordingly.

25. RESTRICTED BANK DEPOSITS

The Target Group and the Target Company

Restricted bank deposits mainly include the mine geographical environment governance recovery fund of coal mines, letter of guarantee deposit, bill acceptance deposits, and Government Subsidy Funding for Coal Mine Safety Renovation Projects.

The Target Group and the Target Company performed impairment assessment on restricted bank deposits and concluded that the probability of default of the counterparty banks is insignificant and accordingly, no allowance for credit losses has been provided.

Details of impairment assessment of restricted bank deposits are set out in note 34.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

26. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS

(a) Cash and cash equivalents

The Target Group

Cash and cash equivalents in the consolidated statements of financial position and the consolidated statements of cash flows comprise cash at banks and on hand, and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with banks and other financial institutions	11,512	9,096	10,209	11,432
Less: Restricted bank deposits	667	370	471	515
Less: Time deposits with original maturity of three months and over	9,400	5,580	5,300	8,037
Cash and cash equivalents	1,445	3,146	4,438	2,880

As at the end of each of the Relevant Periods, the Target Group performed impairment assessment on bank balances and concluded that the probability of default of the counterparty banks is insignificant and accordingly, no allowance for credit losses has been provided. Details of impairment assessment of bank deposits are set out in note 34.2 to the Historical Financial Information.

The Target Company

Cash and cash equivalents in the statements of financial position comprise cash at banks and on hand.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million

Cash and cash equivalents	1,399	3,110	4,205	2,631

As at the end of each of the Relevant Periods, the Target Company performed impairment assessment on bank balances and concluded that the probability of default of the counterparty banks is insignificant and accordingly, no allowance for credit losses has been provided. Details of impairment assessment of bank deposits are set out in note 34.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

26. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS (CONTINUED)

(b) Total cash outflow for leases

Amounts included in the consolidated statements of cash flows for leases comprise the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Within investing cash flows	100	68	66	30	19

These amounts relate to the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Lease rental paid	100	68	66	30	19

27. DEFERRED TAXATION

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deferred tax assets	1	20	20	19

The following are the deferred tax assets recognised and the movements thereon during the year/period:

	At 1 January 2022 RMB million	Credited/(charged) to profit or loss RMB million	At 31 December 2022 RMB million
Others	1	-	1

	At 1 January 2023 RMB million	Credited/(charged) to profit or loss RMB million	At 31 December 2023 RMB million
Accrued Reclamation Obligations Assets	-	19	19
Others	1	-	1
Deferred tax assets	1	19	20

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. DEFERRED TAXATION (CONTINUED)

The Target Group (Continued)

The following are the deferred tax assets recognised and the movements thereon during the year/period:

	At 1 January 2024 RMB million	Credited/(charged) to profit or loss RMB million	At 31 December 2024 RMB million
Accrued Reclamation Obligations Assets	19	-	19
Others	1	-	1
Deferred tax assets	20	-	20

	At 1 January 2025 RMB million	Credited/(charged) to profit or loss RMB million	At 31 July 2025 RMB million
Accrued Reclamation Obligations Assets	19	(1)	18
Others	1	-	1
Deferred tax assets	20	(1)	19

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had unused tax losses of RMB152 million, RMB150 million, RMB45 million and RMB103million and unrecognised deductible temporary differences of RMB3,728 million, RMB5,922 million, RMB6,400 million and RMB6,790 million available for offset against future profits. No deferred tax asset has been recognised in respect of the remaining RMB152 million, RMB150 million, RMB45 million and RMB103 million losses at 31 December 2022, 2023, 2024 and 31 July 2025, respectively, due to the unpredictability of future profit streams.

The expiry dates of the tax losses of the Target Group for which no deferred income tax assets were recognised are summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
Year of expiry				
2023	8	-	-	-
2024	105	105	-	-
2025	19	19	19	19
2026	14	14	14	14
2027	6	6	6	6
2028	-	6	6	6
2029	-	-	-	58
Total	152	150	45	103

The Target Company

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company had no unused tax losses and had unrecognised deductible temporary differences of RMB2,324 million, RMB2,962 million, RMB2,749 million and RMB2,725 million available for offset against future profit.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

Non-current liabilities	3,343	2,960	2,988	2,698
	3,601	3,218	3,469	3,386

Notes:

(i) The payables for acquisition of mining rights represent the present value of the payable mining rights. The mining rights payable shall be paid annually during the execution of the contract.

(ii) Deferred income mainly represents grants provided by several local governments in the PRC to encourage the construction of non-current assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

30. LONG-TERM LIABILITIES (CONTINUED)

(iii) Defined benefit plans (The Target Group and the Target Company)

Presentation of defined benefit plans:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Termination benefits (note (i))	1,266	931	919	781
Post-employment benefits – defined benefit plans (note (i))	933	979	1,097	1,091
	2,199	1,910	2,016	1,872
Less: Reclassification of amounts due within one year to employee benefits payable	392	316	285	258
Total	1,807	1,594	1,731	1,614

Notes:

(i) Including long-term employee benefits payable within one year.

The movements in the present value of the termination benefit plans (including long-term employee benefits payable within one year) are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
At the beginning of the year/period	1,682	1,266	931	919
Recognised in current expenses				
Past service cost	-	-	235	-
Interest cost	38	28	18	6
Actuarial gain or loss	2	8	26	(6)
Other changes				
Benefits paid	(456)	(371)	(291)	(138)
At the end of the year/period	1,266	931	919	781

The principal actuarial assumptions used as at the end of the reporting year/period are as follows:

	31 December 2022	31 December 2023	31 December 2024	31 July 2025
Discount rate (%)	2.55-2.75	2.35-2.40	1.20-1.40	1.45-1.55
Expected rate of salary increases (%)	5.00-6.00	5.00-6.00	5.00-6.00	5.00-6.00

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

30. LONG-TERM LIABILITIES (CONTINUED)

(iii) Defined benefit plans (The Target Group and the Target Company) (continued)

The movements in the present value of the post-employment benefits – defined benefit plans (including long-term employee benefits payable within one year) are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
At the beginning of the year/period	893	933	979	1,097
Recognised in current expenses				
Interest cost	28	28	26	12
Recognised in other comprehensive income				
Actuarial gain or loss	26	40	117	7
Other changes				
Benefits paid	(14)	(22)	(25)	(25)
At the end of the year/period	933	979	1,097	1,091

The principal actuarial assumptions used as at the end of the reporting year/period are as follows:

	31 December 2022	31 December 2023	31 December 2024	31 July 2025
Discount rate (%)	3.00	2.70	1.85	1.80
Average life expectancy(year)	88.69	88.91	89.14	89.28
Expected rate of salary increases (%)	5.00	5.00	5.00	5.00

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

31. ACCRUED RECLAMATION OBLIGATIONS

The Target Group

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	574	838	2,677	2,831
Addition for the year/period	272	1,663	512	76
Accretion expense	34	186	54	53
Accrued reclamation obligations utilised	(42)	(10)	(412)	(463)
At the end of the year/period	838	2,677	2,831	2,497

The Target Company

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million

Addition for the year/period	99	1,536	401	46
Accretion expense	8	156	38	43
Accrued reclamation obligations utilised	(1)	(1)	(224)	(70)
At the end of the year/period	197	1,888	2,103	2,122

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

32. PAID-UP CAPITAL

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Registered and paid-up capital	26,927	26,927	26,927	26,927

33. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain the investors', creditors' and market's confidence and to sustain the future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets, the Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratios as at 31 December 2022, 2023 and 2024 and 31 July 2025 were 47.55%, 46.98%, 44.16% and 44.53%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS

34.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	12,485	13,997	14,415	14,607
Equity securities at FVTOCI (note 19)	1	1	1	1
Accounts and bills receivables at FVTOCI (note 19)	27	-	3	-
	12,513	13,998	14,419	14,608
Financial liabilities				
At amortised cost	4,030	3,639	3,247	3,043

34.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, amounts due from/to associates, other receivables, accounts and bills payables, other payables and long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate and currency risks), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

(i) Currency risk

The functional currency of all of the members of the Target Group is RMB in which all of the transactions are denominated.

(ii) Interest rate risk

The Target Group has no significant variable interest-bearing assets and liabilities and thus the exposure to interest rate risk is minimal.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, other than those financial assets whose carrying amounts best represent the maximum exposure to credit risk, the Target Group's exposure to credit risk is minimal. The Target Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets and financial guarantee contracts.

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for the determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by analysis. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the directors consider that the Target Group's credit risk is significantly reduced.

Loan receivables

The credit risks on loan receivables are limited because the counterparties are mainly related parties, the Target Group assesses the recoverability by reviewing their financial positions and results periodically and considers that its exposure to credit risk arising from default of the counterparties is limited.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, China Merchants Bank, Bank of China and Agricultural Bank of China.

Other receivables

Other receivables represent pledged and guaranteed deposits. The pledged and guaranteed deposits are paid for regular businesses. Thus, the credit risk on other receivables is limited.

The Target Group does not have any significant concentration of credit risk. Accounts and bills receivables are due from a large number of customers, spreading across diverse industries and geographical areas.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment (Continued)

The tables below detail the credit risk exposures of the Target Group's financial assets, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022	31 December 2023	31 December 2024	31 July 2025
				RMB million	RMB million	RMB million	RMB million
Financial assets at amortised costs							
Loan receivables	24	N/A	12-month ECL	-	4,200	3,659	2,805
Restricted bank deposits	26	N/A	12-month ECL	667	370	471	515
Time deposits with original maturity of three months and over	26	N/A	12-month ECL	9,400	5,580	5,300	8,037
Cash and cash equivalents	26	N/A	12-month ECL	1,445	3,146	4,438	2,880
Other receivables	24	N/A	Provision matrix	414	181	189	190
			Credit-impaired	36	32	32	32
Accounts receivable (note)	23	N/A	Provision matrix	564	524	360	182

Note:

For accounts receivable, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors that are credit-impaired, the Target Group determines the ECL on these items by using a provision matrix, grouped by debtors' ageing.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment (Continued)

Provision matrix – debtors' ageing

As part of the Target Group's credit risk management, the Target Group uses debtors' ageing to assess the impairment for its receivables from customers in relation to its sales of coal, power and transportation services because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivable which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired).

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	-	560	-	521	-	358	-	180
Less than one year past due	-	-	-	-	-	-	-	-
One to two years past due	-	-	-	-	-	-	-	-
Two to three years past due	-	-	-	-	-	-	-	-
More than three years past due	100%	4	100%	3	100%	2	100%	2
	1%	564	1%	524	1%	360	1%	182

The loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment (Continued)

Gross carrying amount (Continued)

The following table shows the movements in lifetime ECL that has been recognised for accounts receivable under the simplified approach.

	Lifetime ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	6	-	6
Impairment losses reversed	(2)	-	(2)
As at 31 December 2022 and 1 January 2023	4	-	4
Impairment losses reversed	(1)	-	(1)
As at 31 December 2023 and 1 January 2024	3	-	3
Impairment losses reversed	(1)	-	(1)
As at 31 December 2024 and 1 January 2025	2	-	2
Impairment losses reversed	-	-	-
As at 31 July 2025	2	-	2

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Credit risk and impairment assessment (Continued)

Gross carrying amount (Continued)

The following tables show the reconciliation of loss allowances that have been recognised for other receivables and other loans.

	12-month ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	4	36	40
– Impairment losses reversed	(3)	-	(3)
As at 31 December 2022 and 1 January 2023	1	36	37
– Impairment losses recognised	-	32	32
– Impairment losses reversed	-	(36)	(36)
As at 31 December 2023 and 1 January 2024	1	32	33
– Impairment losses reversed	(1)	-	(1)
As at 31 December 2024 and 1 January 2025	-	32	32
– Impairment losses reversed	-	-	-
As at 31 July 2025	-	32	32

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligations as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for its operations, and financial and capital obligations, which excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Liquidity risk (Continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate	On demand or less than 1 year	1 to 2 years	2 to 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables and long-term liabilities	-	3,283	207	621	828	4,939	4,366

	31 December 2023						
	Weighted average interest rate	On demand or less than 1 year	1 to 2 years	2 to 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables and long-term liabilities	-	2,866	207	622	622	4,317	4,018

	31 December 2024						
	Weighted average interest rate	On demand or less than 1 year	1 to 2 years	2 to 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables and long-term liabilities	-	2,195	207	622	415	3,439	3,203

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.2 Financial risk management objectives and policies (Continued)

Liquidity risk (Continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of the reporting period, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Target Group can be required to pay: (continued)

	31 July 2025						
	Weighted average interest rate	On demand or less than 1 year	1 to 2 years	2 to 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables and long-term liabilities	-	2,165	207	622	208	3,202	2,999

Save as disclosed above the Target Group also makes use of facilities from banks and financial institutions as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (CONTINUED)

34.3 Fair value measurements

Fair value of the Target Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million	Fair value hierarchy	Valuation technique(s) and key input(s)
Financial assets at fair value through other comprehensive income(non-current) -Unlisted equity securities	1	1	1	1	Level 3	Comparable Public Company Method: Fair value is estimated primarily based on key input variables, including the fair market values, valuation multiples, and illiquidity discount rates of comparable publicly traded companies within the same industry.
Financial assets at fair value through other comprehensive income(current) -Bills receivables	27	-	3	-	Level 2	The Target Group's significant unobservable input is the expected rate of return.

There were no transfers between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024, and the seven months ended 31 July 2025.

Fair values of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate to their fair values.

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial assets:								
Debt investment	-	-	4,200	4,060	2,500	2,425	2,805	2,723
Entrusted Loan	-	-	-	-	1,159	1,124	-	-

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. COMMITMENTS AND CONTINGENT LIABILITIES

35.1 Capital commitments

As at the end of each of the Relevant Periods, the Target Group had capital commitments for land, buildings and mining rights, exploration and evaluation assets, equipment and other as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	113	132	405	249
– Equipment	53	116	111	343
– Other	71	72	83	91
	237	320	599	683

35.2 Financial guarantees issued

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had no outstanding financial guarantees.

35.3 Legal contingencies

The Target Group is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Target Group.

35.4 Environmental contingencies

To date, the Target Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Group. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. EMPLOYEE BENEFIT PLANS

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. the Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligations for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the years ended 31 December 2022, 2023 and 2024, for the seven months ended 31 July 2024 and 2025 were RMB343 million, RMB369 million, RMB371 million, RMB216 million (unaudited) and RMB222 million, respectively.

37. RELATED PARTY TRANSACTIONS

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group

The Target Group is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, an associate of China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its associates, over which the Target Group can exercise significant influence.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (CONTINUED)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group (Continued)

The Target Group had the following transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024, and the seven months ended 31 July 2024 and 2025:

	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income	(i)	163	161	81	46	73
Income from entrusted loan and debt investment	(ii)	-	4	95	44	33
Purchases of ancillary materials and spare parts	(iii)	44	36	42	26	48
Ancillary service income	(iv)	8	6	4	4	3
Ancillary and social services expenses	(v)	65	23	39	10	32
Transportation service expenses	(vi)	14	24	30	-*	31
Sale of coal	(vii)	3,885	3,621	2,003	1,409	796
Purchase of equipment and construction work	(viii)	169	146	202	(72)	203

Granting of loans to China Energy Group	(xi)	-	4,200	3,658	1,158	300
Repayment of loans from China Energy Group	(xii)	-	-	4,200	-	1,158

* Amount less than RMB500,000

(i) Interest income represents interest earned from deposits in fellow subsidiaries.

(ii) Income from the entrusted loan and debt investment represent interest earned from the entrusted loan and debt investment to an associate of the Target Group.

(iii) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Group's operations from fellow subsidiaries and associates of China Energy Group.

(iv) Ancillary service income from the income earned from fellow subsidiaries and associates of China Energy Group in respect of coal mining ancillary services.

(v) Ancillary and social services expenses represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries and associates of China Energy Group.

(vi) Transportation service expenses represent expenses paid to fellow subsidiaries in respect of coal transportation services.

(vii) Sale of coal represents income from the sale of coal to fellow subsidiaries and associates of China Energy Group.

(viii) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (CONTINUED)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group (Continued)

The Target Group had the following transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024, and the seven months ended 31 July 2024 and 2025: (continued)

(ix) Other income includes coal washing income, agency income, repairs and maintenance service income, sales of ancillary materials and spare parts, management fee income, sales of water and electricity, financial service income, lease income, etc. earned from China Energy Group, an associate of China Energy Group and fellow subsidiaries.

(x) Net deposits placed with China Energy Group Finance Co., Ltd. ("Finance Company") represents the net deposits placed by the Target Group with Finance Company. The Finance Company is a subsidiary of China Energy Group and provides financial services exclusively to the Target Group and its affiliates.

(xi) Granting of loans to China Energy Group and fellow subsidiaries.

(xii) Repayment of loans from China Energy Group and fellow subsidiaries.

(xiii) The above related party transactions are priced at market rates.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group (Continued)

The directors are of the opinion that the above transactions with related parties were in accordance with the agreements governing such transactions.

Amounts due from/to China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Group:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Cash and time deposits at banks	11,040	8,626	9,708	10,904
Accounts and bills receivables	405	326	128	31
Prepaid expenses and other current assets	63	4,222	3,684	2,862
Total amounts due from China Energy Group, an associate of China Energy Group, fellow subsidiaries and associates of the Target Group	11,508	13,174	13,520	13,797

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF INNER MONGOLIA PINGZHUANG COAL (GROUP) CO., LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd. (the "Target Company") and its subsidiaries except for the Excluded Business as defined in note 2.1 to the Historical Financial Information (together, the "Target Group") set out on pages II-E-3 to II-E-120, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-E-3 to II-E-120 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-E-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at Middle Section of Hahe Street, Pingzhuang Town, Yuanbaoshan District, Chifeng City, Inner Mongolia Autonomous Region, the PRC.

During the Relevant Periods, the Target Group was involved in the production and sale of coal in the PRC.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company is China Energy Investment Corporation Limited ("China Energy Group"), which is established in the PRC.

As at the date of this report, the Target Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies. The particulars of principal subsidiaries are set out below:

Name	Place and date of registration and place of operations	Paid-up capital RMB million	Proportion of ownership interest held by the Target Group (%)	Principal activities
Inner Mongolia Pingxi Baiyinhua Coal Industry Co., Ltd. 內蒙古平西白音華煤業有限公司	PRC/ Mainland China 29 August 2007	520	100	Coal mining and sales
Guoneng Mengxi Mining Co., Ltd. 國能蒙西礦業有限責任公司	PRC/ Mainland China 27 May 2022	231	100	Coal mining and sales
Inner Mongolia Xilinhe Coal Chemical Co., Ltd. 內蒙古錫林河煤化工有限責任公司	PRC/ Mainland China 27 March 2006	1,207	51	Coal mining and sales

Note:

The statutory financial statements of the above subsidiaries for the year ended 31 December 2022 prepared under China Accounting Standards were audited by ShineWing Certified Public Accountants LLP, certified public accountants registered in the PRC. The statutory financial statements of the above subsidiaries for the years ended 31 December 2023 and 2024 prepared under China Accounting Standards were audited by Baker Tilly China Certified Public Accountants LLP, certified public accountants registered in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PRESENTATION

Pursuant to the Acquisition, as more fully explained in the paragraph headed "Pre-reorganisation" in the section headed "MAJOR AND CONNECTED TRANSACTION" in the Circular, the Target Company agreed to dispose of its equity interests in Liujia Coal Mine of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., Laogongyingzi Coal Mine of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., Xilutian Coal Mine of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., Fengshuigou Coal Mine of Inner Mongolia Pingzhuang Coal (Group) Co., Ltd., Xilingol Mengdong Mining Co., Ltd. and Mengdong Energy Holdings Co., Ltd. including its subsidiary Xilin Gol League Ulantuga Coal Co., Ltd. (collectively, the "Excluded Business") before the Acquisition (the "Disposal"). The Target Group then comprised the Target Company and its subsidiaries except the Excluded Business.

The Historical Financial Information excludes the Excluded Business, which are under the control of the ultimate holding company, but are not strategically complementary for the Acquisition purpose. In evaluating whether the Historical Financial Information fairly presents the history of the Target Group's business, the directors considered, among others, the following:

1) whether the Excluded Business was in dissimilar businesses;
2) whether the Excluded Business was and would be operated autonomously both before and after the Disposal; and
3) whether the Excluded Business had no more than incidental common facilities and costs.

The Historical Financial Information has been prepared as if the Disposal had been completed at the beginning of the Relevant Periods and accounted for as a distribution to the holding company of Target Company. The Historical Financial Information does not include the assets, liabilities, results of the operations and cash flows of the Excluded Business. The transactions and balances between the Target Group and the Excluded Business have not been eliminated.

For business combination under common control in which subsidiaries directly or indirectly held by the ultimate holding company of the Target Company (the "Common Control Acquiree Entities") are acquired by the Target Group, it is accounted for using the principles of merger accounting. The consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for the Relevant Periods and the seven months ended 31 July 2024 include the results and cash flows of the Common Control Acquiree Entities from the beginning of the Relevant Periods or since the date when the Common Control Acquiree Entities first came under the common control of the ultimate holding company, where this is a shorter period. The consolidated statements of financial position of the Target Group as at 31 December 2022, 2023 and 2024 and 31 July 2025 have been prepared to present the assets and liabilities of the Common Control Acquiree Entities using the existing book values from the ultimate holding company's perspective. No adjustments are made to reflect fair values, or recognise any new assets or liabilities as a result of the business combination under common control.

2.2 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards which comprise all standards and interpretations approved by the International Accounting Standards Board ("IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared under the going concern basis notwithstanding the fact that, as at 31 July 2025, the Target Group and the Target Company recorded net current liabilities amounting to RMB17,316 million and RMB13,269 million, respectively, because (i) there were unutilised banking facilities of RMB18,038 million available to the Target Group as at 31 July 2025; and (ii) it is expected that there would be sufficient cash inflows to be transferred to the Target Company via dividends from its subsidiaries. In view of the above, the directors of the Target Company consider it is appropriate to prepare the Historical Financial Information on a going concern basis.

The Historical Financial Information has been prepared on the historical cost basis, except for certain financial instruments as disclosed in note 36.3 to the Historical Financial Information, which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 BASIS OF PREPARATION (continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

– Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

– Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

– Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Group is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. The new standard is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

2.4 MATERIAL ACCOUNTING POLICIES

Basis of consolidation

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries except the Excluded Business. Control is achieved when the Target Company:

– has power over the investee;

– is exposed, or has rights, to variable returns from its involvement with the investee; and

– has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Basis of consolidation (continued)

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to equity holder of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Business combinations

Acquisitions of businesses, other than business combination under common control are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits,* respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Goodwill (continued)

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

Investments in joint ventures

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The results and assets and liabilities of joint ventures are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of joint ventures used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the joint venture. When Target the Target Group's share of losses of a joint venture exceeds the Target Group's interest in that joint venture (which includes any long-term interests that, in substance, form part of the Target Group's net investment in the joint venture, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that joint venture.

On acquisition of the investment in a joint venture, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in a joint venture may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in joint ventures. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in a joint venture but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with a joint venture of the Target Group, profits and losses resulting from the transactions with the associate are recognised in the Historical Financial Information only to the extent of interests in the associate that are not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Taxation (continued)

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investment in subsidiaries, associates and joint venture to the extent that the Target Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (the "OECD").

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and joint ventures, except where the Target Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment, which consists of freehold land and buildings, mining structures and mining rights, mining related machinery and equipment, railway and port and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation (year)
Buildings	10 – 55 years
Mining related machinery and equipment	5 – 20 years
Railway and port	5 – 20 years
Furniture, fixtures, motor vehicles and other equipment	5 – 20 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Group's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and does not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Exploration and evaluation assets

Exploration and evaluation assets comprise costs which are directly attributable to the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource:

- researching and analysing historical exploration data;
- gathering exploration data through tographical, geochemical and geophysical studies;
- exploratory drilling, trenching and sampling;
- determining and examining the volume and grade of the resource;
- surveying transportation and infrastructure requirements; and
- conducting market and finance studies.

Expenditure during the initial exploration preparation stage of a project is charged to profit or loss as incurred. Exploration and evaluation costs, including the costs of acquiring licenses, are capitalised as exploration and evaluation assets on a project-by-project basis pending determination of the technical feasibility and commercial viability of the project.

Once the final feasibility study has been completed and a development decision has been taken, accumulated capitalised exploration and evaluation expenditures in respect of an area of interest are transferred to property, plant and equipment. In circumstances when an area of interest is abandoned or management decides it is not commercially viable, any accumulated costs in respect of that area are written off in the period the decision is made.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Obligations for land reclamation

The Target Group's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Group estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are escalated for inflation, then discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Group records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets (continued)

Intangible assets acquired in a business combination not under common control

Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination with finite useful lives are reported at cost less accumulated amortisation and any accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets (continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

– the financial asset is held within a business model whose objective is to collect contractual cash flows; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income (the "FVTOCI"):

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

Impairment of financial assets

The Target Group recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable, other receivables, long-term receivables included in other non-current assets, and entrusted loans included in prepaid expenses and other current assets). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. The ECL on these assets are assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collaterals held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concessions that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e. the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognisation. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables, other payables and long-term liabilities are subsequently measured at amortised cost, using the effective interest method.

Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument. Financial guarantee contract liabilities are measured initially at their fair values. It is subsequently measured at the higher of:

- the amount of the loss allowance determined in accordance with IFRS 9/IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*; and

- the amount initially recognised less, where appropriate, cumulative amortisation recognised over the guarantee period.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.4 MATERIAL ACCOUNTING POLICIES (continued)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person:

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group.

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2.4 to the Historical Financial Information, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are critical judgements, apart from those involving estimation (see note 3.2 below), that the directors have made in the process of applying the Target Group's accounting policies and that have the most significant effect on the amounts recognised in the Historical Financial Information .

Going concern

As described in note 2.1 to the Historical Financial Information, the Target Group's ability to continue as a going concern is dependent on generating cash inflows from its operating activities and obtaining cash inflows from borrowings to ensure sufficient cash flow to meet its liabilities as they fall due. Should the Target Group be unable to obtain adequate funding, there exists a material uncertainty regarding the Target Group's ability to continue as a going concern. The Historical Financial Information does not include any adjustments that would be necessary to the carrying amounts and classification of assets and liabilities should the Target Group be unable to continue as a going concern.

3.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Group's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.2 Key sources of estimation uncertainty (continued)

Impairment losses

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, exploration and evaluation assets, intangible assets, interests in joint ventures and other non-current assets, the recoverable amount of the asset needs to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs, future returns and discount rates.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The Target Group recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions.

Provision of ECL for accounts and bills receivables

The Target Group uses provision matrix to calculate ECL for accounts and bills receivables. The provision rates are based on the aging of accounts and bills receivables as groupings of receivables that have similar loss patterns. The provision matrix is based on the Target Group's historical default rates taking into consideration forward-looking information that is available without undue costs or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered. In addition, accounts and bills receivables with significant balances and credit impaired are assessed for ECL individually.

The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Target Group's accounts and bills receivables are disclosed in notes 23 and 33.2 to the Historical Financial Information, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.2 Key sources of estimation uncertainty (continued)

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Group considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Group and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Group may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 32 to the Historical Financial Information.

Provision of defined benefit plan

The Target Group has implemented organisational reforms, under which certain branches and subsidiaries have introduced internal retirement programs, allowing eligible employees to voluntarily exit their positions and enter a period of rest and recuperation. The Target Group has an obligation to pay internal retirement allowances to these employees prior to their reaching statutory retirement age. The Target Group calculates the monthly internal retirement allowance for each participating employee based on the internal retirement plan's established criteria. It also accrues and pays the required social insurance and housing fund contributions for these employees in accordance with local regulations. The Target Group forecasts future payments of internal retirement allowances by referencing expected inflation rates.

The plan is subject to risks related to interest rates, changes in the expected life expectancy of retirees, and anticipated salary growth rates. Given that these estimates involve judgments regarding future economic conditions and personnel policies, they are subject to significant uncertainty. Management has carefully assessed the underlying assumptions and made its judgments based on historical data and current operational conditions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	9,506	8,982	9,861	5,654	5,683
– Others	160	104	134	70	204
Others	171	113	50	20	18
	9,837	9,199	10,045	5,744	5,905

The Target Group's revenues from contracts with customers are RMB9,836 million, RMB9,198 million, RMB10,043 million, RMB5,743 million (unaudited) and RMB5,902 million for the year ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025, respectively.

The Target Group produces and sells coal to customers at spot markets. For sales of coal, revenue is recognised when control of the goods has been transferred, being when the goods have been shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return of coal occurred. There are no sales-related warranties associated with coal.

The Target Group provides engineering and training services to certain customers. Such services are recognised as a performance obligation satisfied over time as the Target Group render the services. Revenue is recognised for these services based on the stage of completion of the performance obligation using the output method.

All performance obligations of sales of coal and provision of engineering and training services are part of the contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group only has one reportable operating segment. Management monitors the operating results of the Target Group's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Group's revenue from external customers was derived from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of the Target Group's non-current non-financial assets (excluding deferred tax assets) were located at Mainland China as at the end of each of the Relevant Periods.

Revenue derived from single customers which accounted for 10% or more of the Target Group's total revenue is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Customer A	5,156	5,360	5,037	2,827	2,709
Customer B	N/A*	N/A*	N/A*	N/A*	590
Customer C	N/A*	972	N/A*	N/A*	N/A*

* The corresponding revenue did not contribute over 10% of the total revenue of the Target Group during that particular year/period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

The Target Company

Exploration and evaluation assets represent the expenditures related to coal exploration and evaluation activities incurred by the Target Company. As at 31 December 2022, 2023, 2024 and 31 July 2025, the carrying amounts of the exploration and evaluation assets were RMB2,501 million, RMB2,501 million, RMB2,501 million and RMB2,501 million, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

17. INTANGIBLE ASSETS

The Target Group

The movements of intangible assets, mainly licences, software and franchises, are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	995	963	950	915
Additions	3	18	-	2
Amortisation	(33)	(31)	(35)	(20)
Disposals	-	-	-	(5)
Impairment losses	(2)	-	-	-
At the end of the year/period	963	950	915	892

The Target Company

The movements of intangible assets, mainly licences, software and franchises, are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	170	169	169	159
Additions	17	8	-	2
Amortisation	(16)	(8)	(10)	(6)
Disposals	-	-	-	(5)
Impairment losses	(2)	-	-	-
At the end of the year/period	169	169	159	150

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

18. INVESTMENTS IN JOINT VENTURES

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Unlisted investments, at cost	221	221	221	221
Less: Impairment	167	167	193	193
	54	54	28	28

The Target Group's joint venture is unlisted and established in the PRC and not material to the Target Group. Share of the joint venture's profit and total comprehensive income was nil during the Relevant Periods and the seven months ended 31 July 2024.

19. INVESTMENTS IN SUBSIDIARIES

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Unlisted investments, at cost	2,742	2,792	2,925	2,986
Less: Impairment	183	183	183	183
Net carrying amount	2,559	2,609	2,742	2,803

The Target Company's balances with subsidiaries are unsecured, interest-free and repayable on demand. Further details of the Target Company's balances with subsidiaries are included in note 41 to the Historical Financial Information.

Particulars of the Target Company's principal subsidiaries, which are directly owned by the Target Company, are included in note 1 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

20. FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Non-current assets

	3,959	4,275	3,640	3,865

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Non-current assets				
Listed equity securities (note (i))	3,878	4,204	3,334	3,510
Unlisted equity securities (note (i))	20	20	20	24
Subtotal	3,898	4,224	3,354	3,534
Current assets				
Accounts and bills receivables (note (ii))	-	-	-	36
Total	3,898	4,224	3,354	3,570

Notes:

(i) The above listed and unlisted equity investments represent the Target Group and Target Company's equity interests in entities established in the PRC. The directors of the Target Company have elected to designate these equity investments as at FVTOCI as it is the Target Group's strategy to hold these investments for long-term purposes and realising their performance potential in the long run.

(ii) As at 31 December 2022, 2023 and 2024 and 31 July 2025, certain accounts and bills receivables were classified as financial assets at FVTOCI, as the Target Company's and certain subsidiaries' business model is achieved both by collecting contractual cash flows and selling these assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

21. OTHER NON-CURRENT ASSETS

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Prepayments in connection with construction work, equipment purchases and others	12	23	883	1,339

Cost	462	462	462	462
Less: Accumulated impairment losses	18	18	18	18
Net carrying amount	444	444	444	444

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

21. OTHER NON-CURRENT ASSETS (continued)

The Target Group (continued)

Notes: (continued)

(i) Impairment test of goodwill (continued)

In the impairment assessment of the Target Group, goodwill is allocated to cash-generating units ("CGUs") that were expected to benefit from the synergies of the business combination and is allocated to the relevant CGUs based on the mines where they are located. The CGUs are consistent with those used on the purchase dates and in the impairment tests during the Relevant Periods. The carrying amounts of the major goodwill allocated to individual CGU are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Inner Mongolia Xilinhe Coal Chemicals Co., Ltd. ("Xilin River Coal Chemical")	406	406	406	406

The recoverable amount of a CGU has been determined based on value-in-use calculations. The cash flow projections of CGUs are based on management's forecasted cash flows in the next five years. Based on existing production capacity, the Target Group expects cash flows beyond such periods will be similar to that in the fifth year and thus a zero terminal growth rate is utilised in the forecasts. Assumptions were used in the value in use calculation of the cash-generating unit of Xilin River Coal Chemical at 31 December 2022, 2023 and 2024 and 31 July 2025. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill:

Forecast period — The basis used to determine the operating period is the remaining exploitable years of the coal mine owned by Xilin River Coal Chemical, taking into account the annual coal production capacity.

Discount rate — The discount rate adopted by the Target Group reflects the specific risks of the relevant asset unit. The pre-tax discount rates used at 31 December 2022, 2023 and 2024 and 31 July 2025 were 10.96%, 11.04%, 10.71% and 12.28%, respectively.

Coal production capacity—According to the mining licence approved by the government, the annual production capacity of Xilin River Coal Chemical's mine is 15 million tons per year.

Sales price — The sales price is based on the historical average sales price of Xilin River Coal Chemical, adjusted according to future supply and demand forecasts.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

21. OTHER NON-CURRENT ASSETS (continued)

The Target Group (continued)

Notes: (continued)

(i) Impairment test of goodwill (continued)

According to the impairment assessment, there was no impairment provided for the goodwill of Xilin River Coal Chemical for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025.

In addition to the goodwill allocated to the Xilin River Coal Chemical, as mentioned above, the Target Group also recognised goodwill arising from the acquisition of Inner Mongolia Pingxi Baiyinhua Coal Industry Co., Ltd. ("Baiyinhua Coal Industry"). The carrying amount of the goodwill was RMB38 million as of 31 December 2022, 2023 and 2024 and 31 July 2025. The Target Group determined the recoverable amount of its asset group based on the value-in-use calculations. According to the results of the impairment assessment of goodwill, no impairment provision was made by the Group for the years ended 31 December 2022, 2023 and 2024, and for the seven months ended 31 July 2024 and 2025.

(ii) The movements of long-term deferred expenses during the year/period are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	660	1,027	1,448	1,476
Additions	425	448	164	14
Amortisation	(23)	(27)	(80)	(62)
Reclassification	(35)	-	(56)	-

At the end of the year/period	876	1,303	1,390	1,343

22. RIGHT-OF-USE ASSETS

The Target Group

The right-of-use assets represent the consideration of land use rights paid to the PRC's government authorities and the amounts of leased assets. The Target Group was in the process of applying for the title certificates of certain land use rights with aggregate carrying amounts of RMB30 million and RMB30 million as at 31 December 2022 and 2023, respectively. The directors of the Target Company are of the opinion that the Target Group is entitled to lawfully and validly occupy or use the above mentioned lands.

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had no bank loans secured by the Target Group's right-of-use assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

22. RIGHT-OF-USE ASSETS (continued)

The Target Group (continued)

The Target Group leases assets including land use rights. Information about leases for which the Target Group is a lessee is presented below.

23. ACCOUNTS AND BILLS RECEIVABLES

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– China Energy Group and fellow subsidiaries	825	720	757	829
– Third parties	448	366	214	712
	1,273	1,086	971	1,541
Less: allowance for credit losses	293	271	126	103
	980	815	845	1,438
Bills receivable				
– Third parties	-	-	-	10
	980	815	845	1,448

As at the end of each of the Relevant Periods, all accounts and bills receivables are from contracts with customers.

Bills receivable were mainly issued by PRC banks and others financial institutions, and would expire within one year. As at the end of each of the Relevant Periods, the Target Group had no bills pledged to secure bills payable.

As at 31 July 2025, the Target Group had accounts receivable amounting to RMB100 millions pledged to secure the Target Group's factoring financing activities.

As at the end of each of the Relevant Periods, the ageing analysis of accounts receivable, based on the invoice date and net of loss allowance, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	837	737	786	1,387

Two to three years	-	1	-	-
More than three years	141	77	59	51
	980	815	845	1,438

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

23. ACCOUNTS AND BILLS RECEIVABLES (continued)

The Target Group (continued)

As at the end of each of the Relevant Periods, certain accounts receivable of the Target Group are past due. The past due balances are not considered as in default because the debtors are not in significant financial difficulty and the management expects that the debtors are able and likely to pay for the debts. The Target Group does not hold any collateral over these balances.

Details of credit risks of accounts and bills receivables as at the end of each of the Relevant Periods are set out in note 36.2 to the Historical Financial Information.

All accounts and bills receivables are denominated in RMB.

Transfers of financial assets

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group endorsed bills receivable amounting to RMB189 million, RMB65 million, RMB8 million and RMB36 million, respectively, to suppliers to settle the accounts payable of same amounts. In accordance to the relevant laws in the PRC, the holders of the bills receivable have a right of recourse against the Target Group if the issuing banks default payment (the "Continuing Involvement"). In the opinion of the directors, the fair values of the Continuing Involvement are insignificant, and the Target Group has transferred substantially all the risks and rewards of ownership relating to these bills receivable, and accordingly derecognised the full carrying amounts of the bills receivable, in case of bills receivable endorsed to suppliers, derecognised the associated accounts payable.

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million

Note:

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company provided short-term entrusted loans of RMB501 million, RMB300 million, RMB200 million and RMB201 million, respectively, to Mengdong Energy, through a PRC state-owned bank or a fellow subsidiary, with interest rates of 3.65%, 2.35%, 2.35% and 2.35% per annum, respectively.

25. RESTRICTED BANK DEPOSITS

The Target Group

Restricted bank deposits mainly include the mine geographical environment governance recovery fund of coal mines, mining safety risk deposit, collaterals for bills payable and litigation freezing deposits.

The Target Group performed impairment assessment on restricted bank deposits and concluded that the probability of defaults of the counterparty banks are insignificant and accordingly, no allowance for credit losses is provided.

Details of impairment assessment of restricted bank deposits are set out in note 36.2 to the Historical Financial Information.

The Target Company

Proceeds from borrowings	9,059
Repayments of borrowings	(5,935)
Interest expenses	193
At 31 December 2024 and 1 January 2025	12,041
Interest paid	(123)
Proceeds from borrowings	6,762
Repayments of borrowings	(5,145)
Interest expenses	143
At 31 July 2025	13,678

(c) Total cash outflow for leases

Amounts included in the consolidated statements of cash flows for leases comprise the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Within operating cash flows	4	5	6	2	3

These amounts relate to the following:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Lease rental paid	4	5	6	2	3

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. DEFERRED TAXATION

The Target Group

For the purpose of the presentation in the consolidated statements of financial position, certain deferred tax assets and liabilities have been offset. The following is the analysis of the deferred tax balances for financial reporting purpose.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deferred tax assets	263	260	390	340
Deferred tax liabilities	(839)	(894)	(650)	(680)
	(576)	(634)	(260)	(340)

The following are the major deferred tax assets and liabilities recognised and movements thereon during the year/period:

	1 January 2022 RMB million	Credited/(charged) to profit or loss RMB million	Credited/(charged) to other comprehensive income RMB million	31 December 2022 RMB million
Allowances, primarily for receivables and inventories	23	(1)	-	22
Property, plant and equipment	428	(25)	-	403
Interests in joint ventures	41	1	-	42
Tax allowable expenses not yet incurred	4	1	-	5
Right-of-use assets	2	2	-	4
Financial assets at fair value	62	-	(370)	(308)
Appraisal increment from business combination	(492)	23	-	(469)
Long-term liabilities	(294)	19	-	(275)
Net deferred tax liabilities	(226)	20	(370)	(576)

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. DEFERRED TAXATION (continued)

The Target Group (continued)

The following are the major deferred tax assets and liabilities recognised and movements thereon during the year/period: (continued)

	1 January 2023 RMB million	Credited/(charged) to profit or loss RMB million	Credited/(charged) to other comprehensive income RMB million	31 December 2023 RMB million
Allowances, primarily for receivables and inventories	22	-	-	22
Property, plant and equipment	403	(25)	-	378
Interests in joint ventures	42	-	-	42

28. BORROWINGS

The Target Group

An analysis of the Target Group's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Short-term bank and other borrowings	3,588	6,269	8,119	8,330
Current portion of long-term borrowings	643	135	1,745	1,331
	4,231	6,404	9,864	9,661
Non-current borrowings:				
Long-term borrowings, less current portion	3,344	2,510	2,177	4,017
	7,575	8,914	12,041	13,678
Secured	83	-	-	100
Unsecured	7,492	8,914	12,041	13,578
	7,575	8,914	12,041	13,678

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group's short-term borrowings were RMB denominated and bore interest at rates ranging from 3.20% to 3.60% per annum, 1.92% to 2.60% per annum, 2.02% to 2.85% per annum and 2.01% to 2.35% per annum, respectively, and long-term borrowings were RMB denominated and bore interest at rates ranging from LPR-1.50% to LPR+0.35% per annum, LPR-1.50% to LPR+0.35% per annum, LPR-1.55% to LPR+0.35% per annum and LPR-1.55% to LPR+0.35% per annum, respectively.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
The exposure of the long-term borrowings and the contractual maturity dates:				
Within one year	643	135	1,745	1,331
More than one year, but not exceeding two years	132	1,738	704	1,011
More than two years, but not exceeding five years	2,839	399	1,070	2,551
More than five years	373	373	403	455
	3,987	2,645	3,922	5,348

As at 31 December 2022, 2023, 2024 and 31 July 2025, the Group's short-term borrowings from China Energy Group and fellow subsidiaries amounted to RMB3,167 million, RMB3,267 million, RMB2,266 million and RMB1,766 million, respectively, and long-term borrowings from China Energy Group and fellow subsidiaries amounted to RMB2,062 million, RMB1,551 million, RMB1,852 million and RMB1,303 million, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

28. BORROWINGS (continued)

The Target Company

An analysis of the Target Company's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Short-term bank and other borrowings	3,587	5,368	6,368	7,128
Current portion of long-term borrowings	2	2	854	8
	3,589	5,370	7,222	7,136
Non-current borrowings:				
Long-term borrowings, less current portion	2,223	1,522	870	1,867
	5,812	6,892	8,092	9,003
Secured	-	-	-	-
Unsecured	5,812	6,892	8,092	9,003
	5,812	6,892	8,092	9,003

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company's short-term borrowings were RMB denominated and bore interest at rates ranging from 3.20% to 3.60% per annum, 1.92% to 2.25% per annum, 2.02% to 2.27% per annum and 2.01% to 2.27% per annum, respectively, and long-term borrowings were RMB denominated and bore interest at rates ranging from LPR-0.81% to LPR-0.70% per annum, LPR-1.37% to LPR-0.70% per annum, LPR-1.37% to LPR-0.66% per annum and LPR-1.37% to LPR-0.66% per annum, respectively.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
The exposure of the long-term borrowings and the contractual maturity dates:				
Within one year	2	2	854	8
More than one year, but not exceeding two years	-	851	299	301
More than two years, but not exceeding five years	1,850	298	198	1,193
More than five years	373	373	373	373
	2,225	1,524	1,724	1,875

As at 31 December 2022, 2023, 2024 and 31 July 2025, the Company's short-term borrowings from China Energy Group and fellow subsidiaries amounted to RMB3,167 million, RMB2,666 million, RMB1,365 million and RMB1,466 million, respectively, and long-term borrowings from China Energy Group and fellow subsidiaries amounted to RMB851 million, RMB851 million, RMB851 million and nil, respectively.

Current liabilities	78	76	86	86
Non-current liabilities	1,967	1,749	1,814	1,830
	2,045	1,825	1,900	1,916

Notes:

(i) The payables for acquisition of mining rights is the present value of the payable mining rights. The mining rights payable shall be paid annually during the execution of the contract.

(ii) In 2024, Xilin River Coal Chemical committed to donate RMB5,000 million to the China Energy Foundation for ecological remediation initiatives. The first donation of RMB1,700 million was paid in 2024, with the remaining amount to be paid in tranches according to the donation agreement. These future payments were recognised as long-term liabilities, with a balance of RMB3,232 million as of the end of 2024. As of 31 July 2025, the Target Group had paid the second donation of RMB1,600 million, reducing the outstanding balance to RMB1,669 million.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

31. LONG-TERM LIABILITIES (continued)

Notes: (continued)

(iii) On 22 February 2022, Xilin River Coal Chemical entered into an agreement with the State-Owned Assets Supervision and Administration Commission of Wulagei Management Area, under which it agreed to pay a penalty of RMB2,709 million to State-Owned Assets Supervision and Administration Commission of Wulagei Management Area resulting from unauthorised mining at the Hesige Wula South Open-Pit Coal Mine. As of 31 December 2022, the remaining balance was RMB1,566 million, which was fully settled in 2023.

(iv) Defined benefit plans

Presentation of defined benefit plans:

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Long-term termination benefits	1,315	1,171	1,281	1,149
Total	1,315	1,171	1,281	1,149

The long-term termination benefits within one year are presented in accrued expenses and other payables.

The movements in the present value of the defined benefit plans (including long-term termination benefits within one year) are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
At the beginning of the year/period	2,017	1,636	1,494	1,576
Recognised in current expenses				
Past service cost	-	171	362	-
Interest cost	46	30	15	12

34. RESERVES

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Capital reserve	(124)	(497)	(453)	(454)
Statutory reserves	1,838	1,813	1,785	1,699
Other reserves	1,108	1,353	793	927
Accumulated losses	(1,810)	(1,437)	(3,847)	(3,089)
	1,012	1,232	(1,722)	(917)

(i) Statutory reserves

Statutory surplus reserve

According to the PRC Company Law and the Target Company's Articles of Association, the Target Company is required to transfer 10% of its net profit as determined in accordance with the China Accounting Standards for Business Enterprises ("China Accounting Standards") to its statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of a dividend to shareholders.

No appropriation of net profit to the statutory surplus reserve has been proposed in 2022, 2023, 2024 and seven months ended 31 July 2025.

Statutory surplus reserve can be used to make up losses, if any, or to expand the Target Company's business, and may be converted into paid-up capital by the issue of new shares to shareholders in proportion to their existing shareholdings or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital of the Company. The statutory surplus reserve is not distributable.

Specific reserve for maintenance and production funds

Pursuant to the relevant PRC regulations, the Target Group is required to transfer production and maintenance funds at fixed rates based on relevant bases, such as production volume, to a specific reserve account. The production and maintenance funds could be utilised when expenses or capital expenditures on production maintenance and safety measures are incurred. The amount of production and maintenance funds utilised would be transferred from the specific reserve account to accumulated losses.

(ii) Other reserves

Other reserves mainly represent the consideration paid for acquisition of subsidiaries under common control and acquisition of non-controlling interests in subsidiaries and fair value change reserves.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratio as at 31 December 2022, 2023 and 2024 and 31 July 2025 was 76.8%, 75.6%, 89.5% and 86.7%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

36. FINANCIAL INSTRUMENTS

36.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	3,738	3,594	3,318	4,123
Equity securities at FVTOCI (note 20)	3,934	4,260	3,632	3,812
Accounts and bills receivables at FVTOCI (note 20)	25	15	8	53
	7,697	7,869	6,958	7,988
Financial liabilities				
Financial liabilities at amortised cost	20,847	21,413	26,448	26,403

36.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables, loans and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, amounts due from/to joint ventures, other receivables, accounts and bills payables, borrowings, other payables and long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Market risk

(i) Interest rate risk

The Target Group is exposed to fair value interest rate risk in relation to fixed-rate loan receivables and borrowings.

The Target Group is also exposed to cash flow interest rate risk in relation to variable-rate borrowings and variable-rate loans. Other than the concentration of interest rate risk related to the movements in Secured Overnight Financing Rate and the loan interest published by the People's Bank of China("PBOC"), the Target Group has no significant concentration of interest rate risk.

The Target Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for variable-rate borrowings and variable-rate loans and receivables at the end of the reporting period. No sensitivity analysis has been presented for the exposure to interest rates for bank balances as the management of the Target Group considers that, taking into account that the fluctuation in interest rates on bank balances is minimal, the impact on profit or loss for the relevant periods was insignificant.

The analysis is prepared assuming variable-rate borrowings and variable-rate loans and receivables outstanding at the end of the reporting period were outstanding for the whole year.

If interest rates had been 100 basis points higher/lower and all other variables were held constant, the Target Group's profit for the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024, 2025 would decrease/increase by RMB35 million, RMB26 million, RMB38 million, RMB 22 million (unaudited) and RMB42 million, respectively.

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, the Target Group's maximum exposure to credit risk which will cause a financial loss to the Target Group arising from those financial assets whose carrying amounts best represent the maximum exposure to credit risk. The Target Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets and financial guarantee contracts.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for the determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the directors consider that the Target Group's credit risk is significantly reduced.

Loan receivables

The credit risks on loan receivables are limited because the counterparties are mainly related parties, the Target Group assesses the recoverability by reviewing their financial positions and results periodically and considers that its exposure to credit risk arising from default of the counterparties is limited.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China and Agricultural Bank of China.

Other receivables

Other receivables represent dividend receivables and interest receivables. The dividend receivables relate to the investments of the Target Company and the interest receivables mainly relate to related parties and state-owned entities. Thus, the credit risk on other receivables is limited.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The tables below detail the credit risk exposures of the Target Group's financial assets, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Loans receivables	24	N/A	12-month ECL	501	300	200	201
Restricted bank deposits	25	N/A	12-month ECL	299	491	488	441
Cash and cash equivalents	26	N/A	12-month ECL	1,536	1,508	1,261	1,502
Other receivables	24	N/A	12-month ECL	320	453	408	435
			Credit-impaired	3	3	3	3
Other non-current assets	21	N/A	12-month ECL	149	69	165	145
Accounts and bills receivables (note)	23	N/A	Provision matrix	1,112	948	902	1,494
			Credit-impaired	161	138	69	47

Note:

For accounts and bills receivables, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors that are credit-impaired, the Target Group determines the ECL on these items using a provision matrix, grouped by debtors' ageing.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – debtors' ageing

As part of the Target Group's credit risk management, the Target Group uses debtors' ageing to assess the impairment for its receivables from customers in relation to its sales of coal, power, coal chemical products and transportation services because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivable which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). Accounts receivable that are credit-impaired with gross carrying amounts of RMB161 million, RMB137 million, RMB70 million and RMB47 million as at 31 December 2022, 2023 and 2024 and 31 July 2025, respectively, were assessed individually.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022	Average loss rate 31 December 2023	Accounts receivable 31 December 2023	Average loss rate 31 December 2024	Accounts receivable 31 December 2024	Average loss rate 31 July 2025	Accounts receivable 31 July 2025
	%	RMB million	%	RMB million	%	RMB million	%	RMB million
Current (not past due)	2	972	*	808	*	846	*	1,438
Less than one year past due	10	3	10	-	-	-	-	-
One to two years past due	20	-	20	1	20	-	-	-
Two to three years past due	50	48	50	-	50	1	50	1
Three to four years past due	-	-	80	48	-	-	-	-
More than four years past due	100	89	100	91	100	55	100	55
		1,112		948		902		1,494

* Ratio less than 0.05%
** Amount less than RMB 0.5 million

The loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

Impairment losses reversed	(1)	-	(1)
As at 1 January 2025	49	3	52
As at 31 July 2025	49	3	52

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligations as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for its operations, financial, and capital obligations, which excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of each of the Relevant Periods) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate	On demand or less than 1 year	1 – 2 years	2 – 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:

Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities		9,889	1,978	835	2,981	15,683	14,407
Borrowings variable interest rate	2.73	2,146	448	1,410	30	4,034	3,848
Borrowings fixed interest rate	2.26	8,317	-	-	-	8,317	8,193
		20,352	2,426	2,245	3,011	28,034	26,448

	31 July 2025						
	Weighted average interest rate	On demand or less than 1 year	1 to 2 years	2 to 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities		10,057	278	835	2,703	13,873	12,725
Borrowings variable interest rate	2.29	3,682	1,093	2,668	57	7,500	7,148
Borrowings fixed interest rate	2.24	6,577	1	2	28	6,608	6,530
		20,316	1,372	3,505	2,788	27,981	26,403

Saved as discussed above, the Target Group also makes use of banks and financial institutions facilities as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.3 Fair value measurements

Fair value of the Target Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million	Fair value hierarchy	Valuation technique(s) and key input(s)
Financial assets:						
Financial assets at fair value through other comprehensive income (non-current)	3,878	4,204	3,334	3,510	Level 1	Quoted prices in active market.
Unlisted equity securities	56	56	298	302	Level 3	Market comparison approach. Fair value is estimated based on value of comparable listed companies, multiples and discount for lack of liquidity. Discounted cash flow method. The significant observable inputs used by the Target Group for the valuation are the expected rates of return
Accounts and bills receivables	25	15	8	53	Level 2	

There were no transfers between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2025.

Except as detailed in the following table, the directors of the Target Company consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate to their fair values.

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Fixed rate bank borrowings	3,960	3,881	6,342	6,233	8,193	8,038	6,530	6,415

The fair value of fixed rate bank borrowings above in the Level 2 category is measured using discounted cash flow method where the future cash flows are estimated based on the contracts and discounted at rates that reflect the credit risk of the issuers.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. COMMITMENTS AND CONTINGENT LIABILITIES

37.1 Capital commitments

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group had capital commitments for land, buildings, exploration and evaluation assets and equipment as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	284	508	546	403
– Equipment	193	166	135	223
	477	674	681	626

37.2 Legal contingencies

The Target Group is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. Meanwhile, the Target Company is also the defendant in a lawsuit related to Excluded Business, and the outcome of the lawsuit will be borne by the acquiree of the Disposal. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Target Group.

37.3 Environmental contingencies

To date, the Target Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Group. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

38. EMPLOYEE BENEFITS PLAN

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the year ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025 were RMB296 million, RMB314 million, RMB313 million, RMB179 million and RMB198 million, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS

39.1 Transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group

The Target Group is controlled by China Energy Group and has significant transactions and relationships with China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its joint ventures, over which the Target Group can exercise significant influence.

The Target Group had the following transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025:

	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (continued)

39.1 Transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group (continued)

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(ii) Income from entrusted loans represents interest earned from an entrusted loan to fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iii) Interest expense represents interest incurred from loans from China Energy Group and fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iv) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Group's operations from fellow subsidiaries of China Energy Group.

(v) Purchases of ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries.

(vi) Provide of ancillary services represents income earned from fellow subsidiaries coal mining services.

(vii) Sale of coal represents income from sale of coal to fellow subsidiaries of China Energy Group.

(viii) Purchase of coal represents coal purchased from China Energy Group and fellow subsidiaries.

(ix) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

(x) Other income includes agency income, repairs and maintenance service income, sales of ancillary materials and spare parts, management fee income, sales of water and electricity, lease income, etc. earned from China Energy Group and fellow subsidiaries.

(xi) Grant of loans represents loans granted from China Energy Group and fellow subsidiaries.

(xii) Repayment of loans represents repayment of loans from China Energy Group and fellow subsidiaries.

(xiii) Factoring services refer to receiving factoring services from Guoneng (Beijing) Commercial Factoring Co., Ltd.

(xiv) Other procurement expenses mainly include brokerage and agency service fees, information technology service fees.

The directors of the Target Company are of the opinion that the above transactions with related parties were in accordance with the agreements governing such transactions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (continued)

39.1 Transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group (continued)

The Target Group entered into a number of agreements with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group. The terms of the principal agreements are summarised as follows:

(i) The Target Group has entered into a mutual supply agreement for the mutual provision of production supplies and ancillary services with China Energy Group and fellow subsidiaries. Pursuant to the agreement, China Energy Group and fellow subsidiaries provide the Target Group with the production supplies and services, ancillary production services including the use of the information network system and ancillary administrative services. On the other hand, the Target Group provides fellow subsidiaries with water supplies, rolling stock management, railway transportation and other related or similar production supplies or services and use of the information network system.

The products and services provided under the agreement, other than the sharing of use of the information network system which is free of charge, are provided in accordance with the following pricing policy:

- price prescribed by the state (including any price prescribed by any relevant local government), if applicable;
- where there is no state-prescribed price but where there is a state-guidance price, then the state-guidance price;
- where there is neither a state-prescribed price nor a state-guidance price, the market price; or
- where none of the above is applicable or where it is not practical to apply the above pricing policies in reality, the price to be agreed between the relevant parties shall be based on reasonable costs incurred in providing the goods or services plus a reasonable profit margin of such costs.

(ii) The Target Group has entered into coal supply agreements with China Energy Group and fellow subsidiaries and joint ventures of the Target Group. The coal supplied is charged at the prevailing market price.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (continued)

39.1 Transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group (continued)

(iii) The Target Group has entered into a financial services agreement with Finance Company. Pursuant to the agreement, Finance Company provides financial services to the Target Group. The interest rate for the deposits with Finance Company from the Target Group should not be lower than the lowest limit published by the PBOC for the same type of deposit. The interest rate for loans made by Finance Company to the Target Group should not be higher than the highest limit published by the PBOC for the same type of loan. The above interest rates should be determined by reference to the rate charged by normal commercial banks in the PRC for comparable deposits and loans on normal commercial terms. The fees charged by Finance Company for the provision of other financial services shall be determined according to the rates chargeable by the PBOC or the China Banking Regulatory Commission.

(iv) The Target Group has entered into a property leasing agreement with fellow subsidiaries of China Energy Group for leasing of certain properties to each other. No rent is payable by the Target Group before fellow subsidiaries obtains the relevant property ownership certificate. The rental charges are based on comparable market rates. If fellow subsidiaries of China Energy Group negotiate to sell a leased property to a third party, the Target Company has a pre-emptive right to purchase such property under terms no less favorable than other third party.

(v) The Target Group has entered into a land leasing agreement with fellow subsidiaries of China Energy Group. The annual rent is determined based on the local market rate. The Target Group is not allowed to sub-let the leased land.

(vi) The Target Group has entered into agreements with fellow subsidiaries of China Energy Group under which the Target Group has been granted the right to use certain trademarks. Fellow subsidiaries of China Energy Group bear its own cost for the registration of such trademarks during the term of the trademarks license agreement and expenses for enforcement against any infringement of the licensed trademarks by third parties.

(vii) The Target has entered into a factoring service agreement with Guoneng (Beijing) Commercial Factoring Co., Ltd. ("Guoneng Factoring Company"). Pursuant to the agreement, Guoneng Factoring Company agreed to provide the Target Group with factoring services and factoring-related services. For the provision of factoring services by Guoneng Factoring Company to the Target Group, the financing cost shall not be higher than that determined by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the financing fee determined by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall not be higher than the financing fee calculated based on the Loan Prime Rate (LPR) of the PBOC for the same period. For the service fee charged from the provision of other relevant services by Guoneng Factoring Company to the Target Group, the service fee shall not be higher than that charged by an independent third-party factoring company for providing the same kind of services to the Target Group, and it should be determined on normal commercial terms. When the service fee charged by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall be determined at the cost plus a reasonable profit margin (around 10%).

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (continued)

39.1 Transactions with China Energy Group, fellow subsidiaries, and joint ventures of the Target Group (continued)

Amounts due from/to China Energy Group, fellow subsidiaries, and joint ventures of the Target Group:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with Finance Company	1,536	1,550	1,301	1,541
Accounts and bills receivables	825	720	757	829
Prepaid expenses and other current assets	620	514	317	341
Total amounts due from China Energy Group, fellow subsidiaries, and joint ventures of the Target Group	2,981	2,784	2,375	2,711
Borrowings	5,229	4,818	4,118	3,069
Accounts payable	310	262	331	706
Accrued expenses and other payables	5,663	5,397	5,400	5,057
Contract liabilities	-	-	-	35
Total amounts due to China Energy Group, fellow subsidiaries, and joint ventures of the Target Group	11,202	10,477	9,849	8,867

Other than those disclosed in notes 23, 24, 26, 28, 29, 30 and 31 to the Historical Financial Information, amounts due from/to China Energy Group, fellow subsidiaries, and joint ventures of the Target Group bear no interest, are unsecured and are repayable in accordance with normal commercial terms.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

39. RELATED PARTY TRANSACTIONS (continued)

39.2 Key management personnel emoluments

Key management personnel receive compensation in the form of fees, basic salaries, housing and other allowances, benefits in kind, discretionary bonuses and retirement scheme contributions.

Key management personnel compensation of the Target Group is summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Short-term employee benefits	9	10	11	3	4
Post-employment benefits	1	1	1	1	1
Total	10	11	12	4	5

Total remuneration is included in "personnel expenses" as disclosed in note 11 to the Historical Financial Information.

39.3 Contributions to post-employment benefit plans

The Target Group participates in various defined contribution post-employment benefit plans organised by municipal and provincial governments and a supplemental defined contribution pension plan approved by the government for its employees. Further details of the Target Group's post-employment benefit plans are disclosed in note 38 to the Historical Financial Information.

39.4 Transactions with other government-related entities in the PRC

The Target Company is ultimately controlled by the PRC government and the Target Group operates in an economic environment currently predominated by government-related entities.

Other than those transactions with China Energy Group, fellow subsidiaries and joint ventures of the Target Group as disclosed above, the Target Group conducts business with other government-related entities which include but are not limited to the following:

– Sales and purchases of coal;

– Transportation services;

– Construction work;

– Purchases of ancillary materials and spare parts;

– Ancillary and social services; and

– Financial services arrangements.

These transactions are conducted in the ordinary course of the Target Group's business on terms comparable to those with other entities that are not government-related. The Target Group has established its pricing policies in respect of sale of goods and provision of services, and approval process for purchases of products and services. Such policies and approval process apply to all counterparties regardless of whether the counterparty is government-related or not.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

40. NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD

Up to the Historical Financial Information approval date, there was no significant event after the Relevant Periods that need to be disclosed.

41. SUBSIDIARIES

Equity transaction with non-controlling interests

In January 2022, Inner Mongolia Pingzhuang Energy Co., Ltd. (内蒙古平莊能源股份有限公司) ("Pingzhuang Energy"), a former subsidiary of the Target Company previously listed on the Shenzhen Stock Exchange (before delisting) and in which the Target Company held 61.42% shares, was absorbed and merged by China Longyuan Power Group Corporation Limited (龍源電力集團股份有限公司) ("Longyuan Power") through a share swap and completed a material asset disposal with the Target Company (the "Transaction"). Under the Transaction, Pingzhuang Energy transferred all of its assets and liabilities (excluding deferred tax assets, deferred revenue, and taxes payable)(the "Disposed assets") to the Target Company in exchange for a cash consideration of RMB3,437 million, paid by the Target Company to Longyuan Power, the surviving company after the merger.

In return, Longyuan Power issued a total of 345,574,164 A shares (par value RMB1 per share) to the shareholders of Pingzhuang Energy on the registration date of implementation of the merger, in exchange for their holdings of Pingzhuang Energy's A shares. Upon the completion of the merger, Pingzhuang Energy ceased to be listed and its legal entity status was ultimately cancelled. As a result, the Target Company acquired 212,238,141 A shares of Longyuan Power, which were recognised as financial assets at fair value through other comprehensive income at RMB 2,398 million on the Transaction date.

After the Transaction, the carrying amount of non-controlling interests was reduced by RMB1,076 million. The fair value of the consideration amounting to RMB1,039 million, being the difference of the cash payment for the Disposed assets and the equity interest received in Longyuan Power by the Target Company, was recognised in equity in 2022.

Details of non-wholly owned subsidiaries that have material non-controlling interests

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF GUODIAN CONSTRUCTION AND INVESTMENT INNER MONGOLIA ENERGY CO., LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of Guodian Construction and Investment Inner Mongolia Energy Co., Ltd. (the "Target Company") set out on pages II-F-3 to II-F-85, which comprises the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Company for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-F-3 to II-F-85 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Company for each of the Relevant Periods in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Company which comprises the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation of the Interim Comparative Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-F-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which contains information about the dividends paid by the Target Company in respect of the Relevant Periods.

Note:

(i) Statutory reserves

Statutory surplus reserve

According to the PRC Company Law and the Target Company's Articles of Association, the Target Company is required to transfer 10% of its net profit as determined in accordance with the China Accounting Standards for Business Enterprises ("China Accounting Standards") to its statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before the distribution of a dividend to shareholders.

The statutory surplus reserve has reached 50% of the registered capital in 2009. Accordingly, no appropriation of net profit to the statutory surplus reserve has been proposed since 1 January 2010.Statutory surplus reserve can be used to make up losses, if any, or to expand the Target Company's business, and may be converted into share capital by the issue of new shares to shareholders in proportion to their existing shareholdings or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital of the Target Company. The statutory surplus reserve is not distributable.

Specific reserve for maintenance and production funds

Pursuant to the relevant PRC regulations, the Target Company is required to transfer production and maintenance funds at fixed rates based on relevant bases, such as production volume, to a specific reserve account. The production and maintenance funds could be utilised when expenses or capital expenditures on production maintenance and safety measures are incurred. The amount of production and maintenance funds utilised would be transferred from the specific reserve account to retained earnings.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

Principal activities

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at Bulian Office, Nalanmulun Town, Yijinholuo Banner, Ordos, Inner Mongolia, the PRC.

During the Relevant Periods, the Target Company was involved in integrated coal mining and coal-powered electricity generation business as well as renewable energy business.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company are China Energy Group Western Energy Investment Co. Ltd. ("Western Energy") and China Energy Investment Corporation Limited ("China Energy Group"), respectively, both of which are established in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards, which comprise all standards and interpretations approved by the International Accounting Standards Board ("IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Company in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared under the going concern basis notwithstanding the fact that, as at 31 July 2025, the Target Company recorded net current liabilities and net liabilities amounting to RMB8,228 million and RMB1,162 million, respectively, because (i) there were unutilised banking facilities of RMB5,302 million available to the Target Company as at 31 July 2025; and (ii) it is expected that there would be sufficient cash inflows to be generated from the Target Company's operation based on the Target Company's cash flow projection prepared by management of the Target Company, which covered a period of not less than twelve months from 31 July 2025. In view of the above, the directors of the Target Company consider itis appropriate to prepare the Historical Financial Information on a going concern basis.

The Historical Financial Information has been prepared on the historical cost basis, except for certain financial instruments as disclosed in note 34.3 to the Historical Financial Information, which have been measured at fair value at the end of each reporting period, as explained in the accounting policies set out below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Company takes into account the characteristics of the asset or liability if market participants would take those asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION (continued)

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3.2 to the Historical Financial Information.

Material accounting policies adopted by the Target Company are disclosed below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Company has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Company intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Company is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact The Target Company's presentation in the statement of profit or loss and other comprehensive income and disclosures of The Target Company's financial performance. The new standard is not expected to have any impact on The Target Company's results of operations and financial position but has an impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Company considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Company's results of operations and financial position.

2.3 MATERIAL ACCOUNTING POLICIES

Investments in associates

An associate is an entity over which the Target Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Company for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the statement of financial position at cost and adjusted thereafter to recognise the Target Company's share of the profit or loss and other comprehensive income of the associate. When the Target Company's share of losses of an associate exceeds the Target Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Company's net investment in the associate, after applying the expected credit losses (the "ECL") model to such other long-term interests where applicable), the Target Company discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Company has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Company's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Company's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Investments in associates (continued)

The Target Company assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Company reduces its ownership interest in an associate but the Target Company continues to use the equity method, the Target Company reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

Revenue from contracts with customers

Under IFRS 15, the Target Company recognises revenue when (or as) a performance obligation is satisfied, i.e., when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Company's performance as the Target Company performs;

- the Target Company's performance creates and enhances an asset that the customer controls as the Target Company performs; or

- the Target Company's performance does not create an asset with an alternative use to the Target Company and the Target Company has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Company's right to consideration in exchange for goods or services that the Target Company has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Company's unconditional right to consideration, i.e., only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Company's obligation to transfer goods or services to a customer for which the Target Company has received consideration (or an amount of consideration is due) from the customer.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Company will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Company recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Company should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Company with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Company to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, and therefore, the Target Company has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Target Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Taxation (continued)

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investment in subsidiaries, associates and joint venture to the extent that the Target Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development ("OECD").

The Target Company recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, except where the Target Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Company expects, at the end of the reporting period, to recover or settle the carrying amounts of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment, which consist of freehold land and buildings, mining structures and mining rights, mining related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment (other than freehold land and construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for freehold land, and mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation (year)
Landing and buildings	10 to 45 years
Mining related machinery and equipment	8 to 40 years
Generators related machinery and equipment	8 to 22 years
Furniture, fixtures, motor vehicles and other equipment	5 to 22 years

The Directors review the estimated useful lives of the assets annually based on the Target Company's historical experience with similar assets, taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes is carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for their intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Company's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and does not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Exploration and evaluation assets

Exploration and evaluation assets comprise costs which are directly attributable to the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource:

- researching and analysing historical exploration data;
- gathering exploration data through topographical, geochemical and geophysical studies;
- exploratory drilling, trenching and sampling;
- determining and examining the volume and grade of the resource;
- surveying transportation and infrastructure requirements; and
- conducting market and finance studies.

Expenditure during the initial exploration preparation stage of a project is charged to profit or loss as incurred. Exploration and evaluation costs, including the costs of acquiring licenses, are capitalised as exploration and evaluation assets on a project-by-project basis pending determination of the technical feasibility and commercial viability of the project.

Once the final feasibility study has been completed and a development decision has been taken, accumulated capitalised exploration and evaluation expenditures in respect of an area of interest are transferred to property, plant and equipment. In circumstances when an area of interest is abandoned or management decides it is not commercially viable, any accumulated costs in respect of that area are written off in the period the decision is made.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Obligations for land reclamation

The Target Company's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Company estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are escalated for inflation, then discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Company records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and to use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for an internally-generated intangible assets are the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets (continued)

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Company reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually. When it is not possible to estimate the recoverable amount individually, the Target Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis determined by the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets

At inception of a contract, the Target Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and the right to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where a contract contains lease component and non-lease component, the Target Company has elected not to separate the non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Company recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Company enters into a lease in respect of a low-value asset, the Target Company decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where a lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or when there is a change in the Target Company's estimate of the amount expected to be payable under a residual value guarantee, or when there is a change arising from the reassessment of whether the Target Company will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case, the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets (continued)

(ii) As a lessor

When the Target Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying asset to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Company allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Company is an intermediate lessor, the sub-leases are classified as finance leases or operating leases with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Company applies the exemption method, then the Target Company classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Company will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of an instrument. All regular-way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular-way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset, the Target Company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Company may irrevocably designate a financial asset that is required to be measured at amortised cost or FVTOCI to be measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit-impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in other reserves, and they are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets

The Target Company recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable and other receivables). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Company always recognises lifetime ECL for accounts receivable. The ECL on these assets is assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Company measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g., a significant increase in the credit spread, the credit default swap prices for the debtor; and
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Company presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Company has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Company assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if (i) it has a low risk of default; (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Company becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Company considers the changes in the risk that the specified debtor will default on the contract.

The Target Company regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying a significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Company considers that an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Company, in full (without taking into account any collateral held by the Target Company). The Target Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted the borrower concessions that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Company writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Company's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted for forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Company in accordance with the contract and the cash flows that the Target Company expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Company is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses are the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Company expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Company applies a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis to cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- nature of financial instruments (i.e., the Target Company's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

- past-due status; and

- external credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on the amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9; and the amount initially recognised less, where appropriate, the cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Company recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Derecognition of financial assets

The Target Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in an equity instrument which the Target Company has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables and other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Company derecognises financial liabilities when, and only when, the Target Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Company if that person:

(i) has control or joint control over the Target Company;

(ii) has significant influence over the Target Company; or

(iii) is a member of the key management personnel of the Target Company or the Target Company's parent.

(b) An entity is related to the Target Company if any of the following conditions applies:

(i) the entity and the Target Company are members of the same group;

(ii) one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) both entities are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Target Company or an entity related to the Target Company;

(vi) the entity is controlled or jointly controlled by a person identified in (a);

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and

(viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Target Company or to the Target Company's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Company's accounting policies, which are described in note 2.3 to the Historical Financial Information, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are critical judgements, apart from those involving estimation (see Note 3.2 below), that the Directors have made in the process of applying the Target Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Going concern

As described in note 2.1 to the Historical Financial Information, the Target Company's ability to continue as a going concern is dependent on generating cash inflows from its operating activities and obtaining cash inflows from borrowings to ensure sufficient cash flow to meet its liabilities as they fall due. Should the Target Company be unable to obtain adequate funding, there exists a material uncertainty regarding the Target Company 's ability to continue as a going concern. The Historical Financial Information does not include any adjustments that would be necessary to the carrying amounts and classification of assets and liabilities should the Target Company be unable to continue as a going concern.

3.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Company's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

3.2 Key sources of estimation uncertainty (continued)

Impairment losses

In considering the impairment losses that may be required for certain of the Target Company's assets which mainly include property, plant and equipment, construction in progress, exploration and evaluation assets, intangible assets, right-of-use assets, interests in associates and other non-current assets, the recoverable amount of the asset needs to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Company uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs and future returns.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is about the ability of the debtors to settle the receivables.

Notwithstanding that the Target Company has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The Target Company recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 26 to the Historical Financial Information.

Fair value measurement of financial instruments

The Target Company's unquoted equity instruments amounting to RMB245 million, RMB306 million, RMB295 million and RMB295 million as at 31 December 2022, 31 December 2023, 31 December 2024 and 31 July 2025 are measured at fair values with fair values being determined based on observable inputs using valuation techniques as set out in note 34.3 to the Historical Financial Information. Changes in assumptions relating to any key inputs may have a material impact on the reported fair values of these instruments.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Company considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Company and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Company may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 31 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business line is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	4,726	1,444	1,010	-	1,663
– Power	2,577	1,246	2,040	1,124	1,206
Others	4	15	16	7	3
	7,307	2,705	3,066	1,131	2,872

The Target Company's revenues are all derived from contracts with customers.

The Target Company produces and sells coal products to customers at spot market. For sales of coal products, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customers' specific location. According to the Target Company's historical experiences, there was no significant exchange or return of coal occurred. There is no sales-related warranties associated with coal products.

For sales of power, revenue is recognised upon the transmission of electric power to the power grid companies. Power could not be returned or exchanged and there is also no warranties associated with power sales.

All performance obligations of sales of coal, power and other materials are part of contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Company has only one reportable operating segment. Management monitors the operating results of the Target Company's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Company's revenue from external customers was from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of the Target Company's non-current non-financial assets (excluding deferred tax assets) were located at Mainland China as at the end of each of the Relevant Periods.

Revenue derived from single customers which accounted for 10% or more of the Target Company's total revenue is as follows:

	Year ended 31 December 2022	Year ended 31 December 2023	Year ended 31 December 2024	Seven months ended 31 July 2024	Seven months ended 31 July 2025
	RMB million	RMB million	RMB million	RMB million (unaudited)	RMB million
Customer A	2,483	1,228	2,054	1,150	1,163
Customer B	2,667	962	1,005	-*	1,664

* The corresponding revenue did not contribute over 10% of the total revenue of the Group during that particular period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Materials, fuel and power	207	608	1,250	1,054	74
Personnel expenses	499	567	628	379	439
Depreciation and amortisation	800	708	706	374	441
Repairs and maintenance	140	96	131	54	31
Transportation charges	231	71	73	-	141
Taxes and surcharges	704	246	246	20	237
Other operating costs	705	602	339	111	239
	3,286	2,898	3,373	1,992	1,602

7. OTHER INCOME

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Government grants	2	4	1	1	1
Carbon emission quota income	-	-	16	-	-
Write-off of accounts payable	-	-	-	-	2
Others	5	2	1	-	3
	7	6	18	1	6

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	6	5	4	2	1
Total interest income	6	5	4	2	1
Interest on:					
– borrowings	256	196	269	147	174
Total finance costs on financial liabilities	256	196	269	147	174
Less: amount capitalised	-	-	-	-	(1)
	256	196	269	147	173
Others	2	5	-*	-*	-*
Unwinding of discount	-	-	16	5	71
Total finance costs	258	201	285	152	244
Net finance costs	252	196	281	150	243

* Amount smaller than RMB500,000

Note:

Borrowing costs capitalised during the year ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025 arose from the general borrowing pools and were calculated by applying capitalisation rates from nil, nil, nil, nil (unaudited) and from 1.82% to 3.12%, respectively, per annum to expenditure on qualifying assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	529	-	-	-	-
Income tax difference adjustment in respect of prior year/period	(10)	17	-	-	-
Deferred tax	(7)	8	21	21	(71)
	512	25	21	21	(71)

The tax charge for the year/period can be reconciled to the profit/(loss) before income tax per the statement of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit/(loss) before income tax	1,450	(463)	(7,164)	(1,578)	789
Tax at the PRC income tax rate of 25%	363	(116)	(1,791)	(395)	197
Tax effects of:					
– effect of preferential tax rates	(145)	46	716	158	(79)
– non-deductible expenses	304	17	997	156	5
– utilisation of tax losses and deductible temporary difference previously not recognised	-	-	-	-	(136)
– tax losses and deductible temporary difference not recognised	-	62	102	102	-
– tax losses recognised	-	-	-	-	(57)
– income tax difference adjustment in respect of prior year/period	(10)	17	-	-	-
– income not subject to taxation		(1)	(3)	-	(1)
Income tax expense	512	25	21	21	(71)

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate applicable for the PRC resident enterprise was 25% for the Relevant Periods and for the seven months ended 31 July 2024. The Target Company is qualified to be entitled to a preferential tax rate of 15% from 2021 to 2030 because the Target Company operates in the Western developing region of the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT/(LOSS) FOR THE YEAR/ PERIOD

Profit/(loss) for the year/period has been arrived at after charging/(crediting):

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Personnel expenses, including	575	643	711	514	497
– Contributions to defined contribution plans	52	76	82	60	50
Depreciation of property, plant and equipment (note 14)	654	511	502	417	311
Depreciation of right-of-use assets (note 20)	3	4	20	188	11
Amortisation of intangible assets (note 16)	6	6	7	2	4
Amortisation of long-term deferred expenses	142	194	200	117	113
Depreciation and amortisation charged for the year/period	805	715	729	724	439
Loss allowances					
– Other receivables and other loans (note 34.2)	-	(1)	-	-	-

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT/(LOSS) FOR THE YEAR/PERIOD (continued)

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Other gains and losses, representing:					
– Losses/(gains) on changes in fair value of financial assets	-	(5)	1	2	(1)
– Impairment losses on construction in progress (note 15)	41	-	-	-	-
– Write-down of inventories	5	-	-	-	-
	46	(5)	1	2	(1)
Carrying amount of inventories sold	1,309	477	352	-	728
Operating lease charges relating to short-term leases,	-*	-*	-*	-*	1
Auditors' remuneration					
– Audit service	1	-	1	-	-

Note:

The Target Company has recorded impairment losses for certain long-term assets.

The recoverable amount is the higher of the fair value of the cash generating units ("CGU") less costs to sell and value in use ("VIU") of the CGUs.

Recoverable amount by calculating fair value less costs to sell:

As at 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025, the Target Company had determined the recoverable amount by using fair value less cost of disposal. Certain assets had been valued via market method. The fair value was categorised into Level 3 measurement.

Recoverable amount by calculating present value of estimated future cash flow:

The Target Company had treated long-term assets groups with impairment indicators as individual cash-generating units and had made relevant impairment assessment by calculating the present value of estimated future cash flow of each cash generating unit.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

11. DIRECTORS' AND SUPERVISORS' EMOLUMENTS

The remuneration of the Target Company's directors and supervisors during the Relevant Periods and the seven months ended 31 July 2024 are as follows:

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

32. PAID-UP CAPITAL

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Registered and paid-up capital	4,135	4,135	4,135	4,135

33. CAPITAL RISK MANAGEMENT

The Target Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Target Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Company monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Company aims to maintain the gearing ratio at a reasonable level. The Target Company's gearing ratios as at 31 December 2022, 2023 and 2024 and 31 July 2025 were 60.1%,66.4%, 114.6% and 107.7%, respectively.

There were no changes in the Target Company's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS

34.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	1,307	757	876	847
Equity securities at FVTOCI (note 18)	245	306	295	295
	1,552	1,063	1,171	1,142
Financial liabilities				
Amortised cost	8,660	9,372	16,323	15,478

34.2 Financial risk management objectives and policies

The Target Company's major financial instruments include accounts and bills receivables, loans and advances to/deposits from/amounts due to China Energy Group and fellow subsidiaries, other receivables, accounts and bills payables, borrowings, other payables, long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate and currency risks), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

Market risk

(i) Interest rate risk

The Target Company is exposed to fair value interest rate risk in relation to fixed-rate borrowings.

The Target Company is also exposed to cash flow interest rate risk in relation to variable-rate borrowings. Other than the concentration of interest rate risk related to the movements in Secured Overnight Financing Rate and the loan interest published by the People's Bank of China ("PBOC"), the Target Company has no significant concentration of interest rate risk.

The Target Company's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.2 Financial risk management objectives and policies (continued)

Market risk (continued)

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for variable-rate borrowings and variable-rate loans and receivables at the end of the reporting period. No sensitivity analysis has been presented for the exposure to interest rates for bank balances as the management of the Target Company considers that, taking into account that the fluctuation in interest rates on bank balances is minimal, the impact of profit or loss for the year is insignificant.

The analysis is prepared assuming variable-rate borrowings and variable-rate loans and receivables outstanding at the end of the reporting period were outstanding for the whole year.

If interest rates had been 100 basis points, 100 basis points, 100 basis points, 100 basis points and 100 basis points higher/lower and all other variables were held constant, the Target Company's profit for the year ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025 would decrease/increase by RMB32 million, RMB38 million, RMB39 million, RMB44 million (unaudited) and RMB45 million, respectively.

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, other than those financial assets whose carrying amounts best represent the maximum exposure to credit risk, the Target Company's maximum exposure to credit risk which will cause a financial loss to the Target Company arising from the amount of financial guarantees provided by the Target Company is disclosed in note 35.2. The Target Company does not hold any collateral or other credit enhancements to cover its credit risk associated with its financial assets and financial guarantee contracts.

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Company has delegated a team responsible for determination of credit limits and credit approvals. Before accepting any new customer, the Target Company uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the Directors consider that the Target Company's credit risk is significantly reduced.

Bank balances

The credit risk on bank balances is limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China and Agricultural Bank of China.

Other receivables

Other receivables represent pledged and guarantee deposits, dividend receivables and interest receivables. The pledged and guarantee deposits are paid for regular businesses. The dividend receivables relate to the investments of the Target Company and the interest receivables mainly relate to related parties and stated owned entities. Thus, the credit risk on other receivables is limited.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The tables below detail the credit risk exposures of the Target Company's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised cost							
Loans receivables	26	N/A	12-month ECL	-	-	-	-
Restricted bank deposits	27	N/A	12-month ECL	170	273	132	157
Cash and cash equivalents	28	N/A	12-month ECL	751	333	416	241
Other receivables	26	N/A	12-month ECL	-	4	39	31
			Credit-impaired	1	-	-	-
Service concession receivables	22, 26	N/A	12-month ECL	-	-	-	-
Other loans	26	N/A	Credit-impaired	6	-	-	-
Accounts receivable (note)	25	N/A	Provision matrix	386	149	289	418
			Credit-impaired	-	-	-	-

Note:

For accounts receivable, the Target Company has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors with credit-impaired, the Target Company determines the ECL on these items by using a provision matrix, grouped by debtors' ageing.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – debtors' ageing

As part of the Target Company's credit risk management, the Target Company uses debtors' ageing to assess the impairment for its receivables from customers in relation to its sales of coal and power because these customers consist of a large number of customers with common risk characteristics that are representative of the customers' ability to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivable which are assessed based on a provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). The Target Company has no accounts receivable assessed that are credit-impaired individually.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	-	-	-	-	-	-	-	-
Less than one year past due	-	386	-	149	-	289	-	418
	-	386	-	149	-	289	-	418

The loss rates are based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The Target Company is regularly reviewed by management to ensure relevant information about specific debtors is updated.

During the years ended 31 December 2022, 2023 and 2024, and for the seven months ended 31 July 2024 and 2025, the Target Company provided impairment allowance for accounts receivable RMB7 million, nil, nil, nil (unaudited) and nil, respectively, based on the provision matrix.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The following tables show reconciliation of loss allowances that has been recognised for other receivables and other loans.

	12-month ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	1	-	1
– Impairment losses reversed	-	-	-
As at 31 December 2022 and 1 January 2023	1	-	1
– Impairment losses reversed	(1)	-	(1)
As at 31 December 2023 and 1 January 2024	-	-	-
– Impairment losses reversed	-	-	-
As at 31 December 2024 and 1 January 2025	-	-	-
– Impairment losses reversed	-	-	-
As at 31 July 2025	-	-	-

Liquidity risk

Liquidity risk is the risk that the Target Company will not be able to meet its financial obligations as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or damage to the Target Company's reputation.

The Target Company closely monitors cash flow requirements and optimises its cash returns. The Target Company prepares cash flow forecasts and ensures it has sufficient cash for the servicing of operation, financial, and capital obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Company's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of each of the Relevant Periods) and the earliest date the Target Company can be required to pay:

	31 December 2022						
	Weighted average interest rate	On demand or less than 1 year	1 – 2 years	2 – 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	1,237	582	395	-	2,214	2,093
Borrowings variable interest rate	2.90%	1,306	984	1,231	136	3,657	3,206
Borrowings fixed interest rate	3.55%	1,573	40	11	-	1,624	1,609
	–	4,116	1,606	1,637	136	7,495	6,908

Borrowings fixed interest rate	3.65%	3,545	10	-	-	3,555	3,540
	-	6,475	834	2,854	40	10,203	9,648

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. FINANCIAL INSTRUMENTS (continued)

36.2 Financial risk management objectives and policies (continued)

Liquidity risk (Continued)

	31 December 2024						
	Weighted average interest rate	On demand or less than 1 year	1 – 2 years	2 – 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	4,003	2,185	67	-	6,255	5,834
Borrowings variable interest rate	3.00%	3,767	1,809	727	-	6,303	5,924
Borrowings fixed interest rate	3.55%	2,804	-	2,263	-	5,067	5,054
	-	10,574	3,994	3,057	-	17,625	16,812

	31 July 2025						
	Weighted average interest rate	On demand or less than 1 year	1 – 2 years	2 – 5 years	More than 5 years	Total undiscounted cash flows	Total carrying amount
	%	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	3,731	67	-	-	3,798	3,392
Borrowings variable interest rate	2.90%	1,552	1,943	1,342	-	4,837	4,366
Borrowings fixed interest rate	3.55%	4,424	497	3,029	-	7,950	7,862
	-	9,707	2,507	4,371	-	16,585	15,620

Save as discussed above, the Target Company also makes use of bank and financial institution facilities as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.3 Fair value measurements

Fair value of the Target Company's financial assets and financial liabilities that are measured at fair value on a recurring basis

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million	Fair value hierarchy	Valuation technique(s) and key input(s)
Financial assets:						
Unlisted equity securities	245	306	295	295	Level 3	Comparable Public Company Method: Fair value is estimated primarily based on key input variables, including the fair market values, valuation multiples, and illiquidity discount rates of comparable publicly traded companies within the same industry.

There were no transfer between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. FINANCIAL INSTRUMENTS (continued)

34.3 Fair value measurements (continued)

Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate their fair values:

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Fixed rate bank borrowings	1,609	1,566	3,540	3,433	5,054	4,746	7,862	7,464

The fair value of fixed rate bank borrowings above in the Level 2 category is measured using discounted cash flow method where the future cash flows are estimated based on the contract and discounted at a rate that reflects the credit risk of the banks.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

35. COMMITMENTS AND CONTINGENT LIABILITIES

35.1 Capital commitments

As at the end of each of the Revant Periods, the Target Company had capital commitments for land, buildings and mining rights, exploration and evaluation assets, equipment and other as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	59	105	275	584
– Equipment and others	493	171	128	821
	552	276	403	1,405

35.2 Financial guarantees issued

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company had no outstanding financial guarantees.

35.3 Legal contingencies

The Target Company is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Target Company.

35.4 Environmental contingencies

To date, the Target Company has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Company. The regulatory bodies, however, have moved, and may move further towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Company's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

35.5 Other contingency

In September 2025, the Target Company received a notice from the Ordos Bureau of Natural Resources requiring the Target Company to carry out with the payment procedures for the mining rights grant proceeds in respect of the Chahasu Coal Mine. The Target Company and China Energy Group are currently engaged in ongoing discussions with the relevant authorities regarding this matter. China Energy Group has further confirmed that, should the Target Company be required to make any additional payment of mining rights grant proceeds for the Chahasu Coal Mine (License No.: C1500002024071210157148), China Energy Group will be responsible for coordinating the resolution of such payment obligation.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. EMPLOYEE BENEFIT PLANS

The Target Company participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Company is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. The Target Company has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Company's contributions for the years ended 31 December 2022, 2023 and 2024, and for the seven months ended 31 July 2024 and 2025 were RMB52 million, RMB76 million, RMB82 million, RMB60 million (unaudited) and RMB50 million, respectively.

37. RELATED PARTY TRANSACTIONS

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company

The Target Company is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, an associate of China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Company has also entered into transactions with its associates, over which the Target Company can exercise significant influence.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company (continued)

The Target Company had the following transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company that were carried out in the normal course of business during years ended 31 December 2022, 2023 and 2024 and seven months ended 31 July 2024 and 2025:

	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company (continued)

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the People's Bank of China (PBOC).

(ii) Interest expense represents interest incurred from loans from China Energy Group and fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the People's Bank of China (PBOC).

(iii) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Company's operations from fellow subsidiaries and associates of China Energy Group.

(iv) Ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to China Energy Group, fellow subsidiaries and associates of China Energy Group.

(v) Transportation service income represents income earned from fellow subsidiaries in respect of coal transportation services.

(vi) Sale of coal represents income from sale of coal to fellow subsidiaries and associates of China Energy Group.

(vii) Purchase of coal represents coal purchased from associates of the Target Company, associates of China Energy Group and fellow subsidiaries.

(viii) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by fellow subsidiaries.

(ix) Other income includes agency income, repairs and maintenance service income, sales of ancillary materials and spare parts, management fee income, sales of water and electricity, lease income, etc. earned from China Energy Group, an associate of China Energy Group and fellow subsidiaries.

(x) Net deposits placed with Finance Company represent net deposits placed by the Target Company with the Finance Company.

(xi) Granting of loans from China Energy Group and fellow subsidiaries.

(xii) Repayment of loans from China Energy Group and fellow subsidiaries.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company (continued)

The Target Company entered into a number of agreements with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company. The terms of the principal agreements are summarised as follows:

(i) The Target Company has entered into a mutual supply agreement for the mutual provision of production supplies and ancillary services with associates of China Energy Group and fellow subsidiaries. Pursuant to the agreement, associates of China Energy Group and fellow subsidiaries provide the Target Company with the production supplies and services, ancillary production services including the use of the information network system and ancillary administrative services. On the other hand, the Target Company provides fellow subsidiaries with water supplies, rolling stock management, railway management, railway transportation and other related or similar production supplies or services and the use of the information network system.

The products and services provided under the agreement, other than the shared use of the information network system which is free of charge, are provided in accordance with the following pricing policy:

- price prescribed by the state (including any price prescribed by any relevant local government), if applicable;
- where there is no state-prescribed price but where there is a state-guidance price, then the state-guidance price;
- where there is neither a state-prescribed price nor a state-guidance price, the market price; or
- where none of the above is applicable or where it is not practicable to apply the above pricing policy, the price to be agreed between the relevant parties shall be based on the reasonable costs incurred in providing the goods or services plus a reasonable profit margin of such costs.

(ii) The Target Company has entered into coal supply agreements with an associate of China Energy Group, fellow subsidiaries and associates of the Target Company. The coal supplied is charged at the prevailing market price.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company (continued)

(iii) The Target Company has entered into a financial services agreement with Finance Company. Pursuant to the agreement, Finance Company provides financial services to the Target Company. The interest rate for the deposits with Finance Company from the Target Company should not be lower than the lowest limit published by the People's Bank of China (PBOC) for the same type of deposit. The interest rate for loans made by Finance Company to the Target Company should not be higher than the highest limit published by the People's Bank of China (PBOC) for the same type of loan. The above interest rates should be determined by reference to the rate charged by normal commercial banks in the PRC for comparable deposits and loans on normal commercial terms. The fees charged by Finance Company for the provision of other financial services shall be determined according to the rates chargeable by the People's Bank of China (PBOC) or the China Banking Regulatory Commission.

(iv) The Target Company has entered into a property leasing agreement with fellow subsidiaries of China Energy Group for leasing of certain properties to each other. No rent is payable by the Target Company before the fellow subsidiaries obtain the relevant property ownership certificate. The rental charges are based on comparable market rates. If fellow subsidiaries of China Energy Group negotiate to sell a leased property to a third party, the Target Company has a pre-emptive right to purchase such property on terms no less favorable than other third party.

(v) The Target Company has entered into a land leasing agreement with fellow subsidiaries of China Energy Group. The annual rent is determined based on the local market rate. The Target Company is not allowed to sub-let the leased land.

(vi) The Target Company has entered into an agency agreement for the export of coal with a fellow subsidiary of China Energy Group. The fellow subsidiary is appointed as a non–exclusive export agent of the Target Company and is entitled to receive an agency fee based on the relevant market rates or lower rates. Currently, the rate is 0.7% of the free on board sales price of coal exported. When obtaining export agent conditions from a third party that are equal to or inferior to those of the China Energy Group, the Target Company shall give preference to the China Energy Group as the export agent of coal products.

(vii) The Target Company has entered into an agency agreement for the sale of coal with fellow subsidiaries of China Energy Group. The Target Company is appointed as the exclusive sales agent of fellow subsidiaries of China Energy Group for thermal coal and a non-exclusive sales agent for coking coal. The Target Company is entitled to receive an agency fee, which is based on its related costs incurred plus a profit margin of 5% for sales of coal outside the Inner Mongolia Autonomous Region. No agency fee is charged for sales of coal within the Inner Mongolia Autonomous Region.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.1 Transactions with China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company (continued)

(viii) The Target Company has entered into agreements with fellow subsidiaries of China Energy Group under which the Target Company has been granted the right to use certain trademarks. Fellow subsidiaries of China Energy Group bear its own cost for the registration of such trademarks during the term of the trademarks license agreement and expenses for enforcement against any infringement of the licensed trademarks by third parties.

(ix) The Target Company has entered into a factoring service agreement with Guoneng (Beijing) Commercial Factoring Co., Ltd. ("Guoneng Factoring Company"). Pursuant to the agreement, Guoneng Factoring Company agreed to provide the Target Company with factoring services and factoring-related services. For the provision of factoring services by Guoneng Factoring Company to the Target Company, the financing cost shall not be higher than that determined by an independent third-party factoring company for providing the same kind of services to the Target Company, and it should be determined on normal commercial terms. When the financing fee determined by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall not be higher than the financing fee calculated based on the Loan Prime Rate (LPR) of the People's Bank of China (PBOC) for the same period. For the service fee charged from the provision of other relevant services by Guoneng Factoring Company to the Target Company, the service fee shall not be higher than that charged by an independent third-party factoring company for providing the same kind of services to the Target Company, and it should be determined on normal commercial terms. When the service fee charged by the independent third-party factoring company for providing the same kind of services is difficult to obtain, it shall be determined at the cost plus a reasonable profit margin (around 10%).

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

* Amount smaller than RMB500,000

Other than those disclosed in notes 19, 22, 23, 27 and 28 to the Historical Financial Information, amounts due from/to China Energy Group, an associate of China Energy Group, fellow subsidiaries, and associates of the Target Company bear no interest, are unsecured and are repayable in accordance with normal commercial terms.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

37. RELATED PARTY TRANSACTIONS (continued)

37.2 Key management personnel emoluments

Key management personnel receive compensation in the form of fees, basic salaries, housing and other allowances, benefits in kind, discretionary bonuses and retirement scheme contributions.

Key management personnel compensation of the Target Company is summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Short-term employee benefits	4	5	5	4	1
Post-employment benefits	-*	-*	-*	-*	-*
	4	5	5	4	1

* Amount smaller than RMB500,000

Total remuneration is included in "personnel expenses" as disclosed in note 11 to the Historical Financial Information.

37.3 Contributions to post-employment benefit plans

The Target Company participates in various defined contribution post-employment benefit plans organised by municipal and provincial governments and a supplemental defined contribution pension plan approved by the government for its employees. Further details of the Target Company's post-employment benefit plans are disclosed in note 36 to the Historical Financial Information.

37.4 Transactions with other government-related entities in the PRC

The Target Company is ultimately controlled by the PRC government and the Target Company operates in an economic environment currently predominated by government-related entities.

Other than those transactions with China Energy Group, fellow subsidiaries and joint ventures of the Target Company as disclosed above, the Target Company conducts business with other government-related entities which include but are not limited to the following:

Sales and purchases of coal;

Transportation services;

Construction work;

Purchases of ancillary materials and spare parts;

Ancillary and social services; and

Financial services arrangements.

These transactions are conducted in the ordinary course of the Target Company's business on terms comparable to those with other entities that are not government-related. The Target Company has established its pricing policies in respect of sale of goods and provision of services, and approval process for purchases of products and services. Such policies and approval process apply to all counterparties regardless of whether the counterparty is government-related or not.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

38. NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD

Up to the Historical Financial Information approval date, there was no significant event after the Relevant Periods that need to be disclosed.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF CHINA ENERGY SHAANXI SHENAN COAL CO., LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of China Energy Shaanxi Shenyan Coal Co., Ltd. (the "Target Company") set out on pages II-G-3 to II-G-67, which comprises the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Company for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-G-3 to II-G-67 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua"), dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua ("the Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Company for each of the Relevant Periods in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Company which comprises the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation of the Interim Comparative Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-G-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which contains information about the dividends paid by the Target Company in respect of the Relevant Periods.

I HISTORICAL FINANCIAL INFORMATION
STATEMENTS OF CHANGES IN EQUITY (continued)

Notes:

(i) The other reserve represents (i) the difference between the total amount of the increase in registered capital of the Target Company and the amount of the net proceeds received upon the capital injection in 2023, and (ii) the changes in other components of equity of the Target Company's associate (note 17).

(ii) Statutory reserves

Statutory surplus reserve

According to the PRC Company Law and the Target Company's Articles of Association, the Target Company is required to transfer 10% of its net profit as determined in accordance with the China Accounting Standards for Business Enterprises ("China Accounting Standards") to its statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of a dividend to shareholders.

Specific reserve for maintenance and production funds

Pursuant to the relevant PRC regulations, the Target Company is required to transfer production and maintenance funds at fixed rates based on relevant bases, such as production volume, to a specific reserve account. The production and maintenance funds could be utilised when expenses or capital expenditures on production maintenance and safety measures are incurred. The amount of production and maintenance funds utilised would be transferred from the specific reserve account to retained earnings.

Discretionary surplus reserve

The appropriation to the discretionary surplus reserve is subject to the shareholders' approval. The utilisation of the reserve is similar to that of the statutory surplus reserve.

The directors of the Target Company (the "Directors") have not proposed any appropriation to the discretionary surplus reserve in 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located at Office Building of Xiwan Open-Pit Coal Mine, Yusheng Industrial Park, Shenmu City, Yulin City, Shaanxi Province, the PRC.

During the Relevant Periods, the Target Company was involved in the production and sale of coal to companies in the PRC.

In the opinion of the directors, the immediate holding company and the ultimate holding company of the Target Company is China Energy Investment Corporation Co., Ltd. ("China Energy Group"), which is established in the PRC.

2.1 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) as issued by the International Accounting Standards Board (the "IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Target Company in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared on the historical cost basis.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION (continued)

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Company are disclosed below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Company has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Company intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Historical Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to IFRS 9 and IFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[1]
Amendments to IFRS 9 and IFRS 7	*Contracts Referencing Nature-dependent Electricity*[1]
Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Company is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Company's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Company's financial performance. IFRS18 is not expected to have any impact on the Target Company's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Company considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Company's results of operations and financial position.

2.3 MATERIAL ACCOUNTING POLICIES

Investments in associates

An associate is an entity over which the Target Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The historical financial information of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Company for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the statement of financial position at cost and adjusted thereafter to recognise the Target Company's share of the profit or loss and other comprehensive income of the associate. When the Target Company's share of losses of an associate exceeds the Target Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Company's net investment in the associate, after applying the expected credit loss ("ECL") model to such other long-term interests where applicable), the Target Company discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Company has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Company's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Company's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Investments in associates (continued)

The Target Company assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Company reduces its ownership interest in an associate but the Target Company continues to use the equity method, the Target Company reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

Revenue from contracts with customers

Under IFRS 15, the Target Company recognises revenue when (or as) a performance obligation is satisfied, i.e., when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Company's performance as the Target Company performs;

- the Target Company's performance creates and enhances an asset that the customer controls as the Target Company performs; or

- the Target Company's performance does not create an asset with an alternative use to the Target Company, and the Target Company has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Company's right to consideration in exchange for goods or services that the Target Company has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Company's unconditional right to consideration, i.e., only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Company's obligation to transfer goods or services to a customer for which the Target Company has received consideration (or an amount of consideration is due) from the customer.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Company will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Company recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Company should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Company with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Company to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Company has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the statement of profit or loss and other comprehensive income because of the income or expense that is taxable or deductible in other years and items that are never taxable or deductible. The Target Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investments in subsidiaries, associates and joint venture to the extent that the Target Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development ("OCED").

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Taxation (continued)

The Target Company recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with interests in associates, except where the Target Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment, which consists of buildings, mining structures and mining rights, mining related machinery and equipment, furniture, fixtures, motor vehicles and other equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except for mining structures and mining rights and obligations for land reclamation, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation (year)
Buildings	10 - 45
Mining related machinery and equipment	5 - 20
Furniture, fixtures, motor vehicles and other equipment	5 - 20

The directors reviewed the estimated useful lives of the assets annually based on the Target Company's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Company's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the costs of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation, etc. incurred during the production stage of the ore body and not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Obligations for land reclamation

The Target Company's obligations for land reclamation consist of spending estimates at surface mines in accordance with the PRC rules and regulations. The Target Company estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Company records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Company reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets

At inception of a contract, the Target Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Company has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Company recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Company enters into a lease in respect of a low-value asset, the Target Company decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Company's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Company will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets (continued)

(ii) As a lessor

When the Target Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Company allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Company is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Company applies the exemption method, then the Target Company classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Company will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when the Target Company becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Company may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Company may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated at FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the line item "other gains and losses".

Impairment of financial assets

The Target Company recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable and other receivables). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Company always recognises lifetime ECL for accounts receivable. The ECL on accounts receivable is assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Company measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Company recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g., a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Company presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Company has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Company assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default; ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Company becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Company considers the changes in the risk that the specified debtor will default on the contract.

The Target Company regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Company considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Company, in full (without taking into account any collateral held by the Target Company). The Target Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Company writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Company's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) *Measurement and recognition of ECL* (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Company in accordance with the contract and the cash flows that the Target Company expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Company is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected loss is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Company expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Company will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments (i.e., the Target Company's accounts receivable and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

- Past-due status; and

- External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9 and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Company recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Derecognition of financial assets

The Target Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Company has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts payable, other payables and long-term liabilities are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Company derecognises financial liabilities when, and only when, the Target Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Company if that person:

(i) has control or joint control over the Target Company;

(ii) has significant influence over the Target Company; or

(iii) is a member of the key management personnel of the Target Company or the Target Company's parent.

(b) An entity is related to the Target Company if any of the following conditions applies:

(i) The entity and the Target Company are members of the same group;

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) Both entities are joint ventures of the same third party;

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Company or an entity related to the Target Company;

(vi) The entity is controlled or jointly controlled by a person identified in (a);

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity);

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Company or to the Target Company's parent;

(iv) Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Company's accounting policies, which are described in note 2.3 to the Historical Financial Information, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Impairment of financial assets

The Target Company reviews financial instruments measured at amortized cost at each reporting date to assess expected credit losses. The Target Company estimates the likelihood of credit losses occurring and the expected loss rates using information from past events, while taking current conditions and future projections into account. Changes in the likelihood of credit losses occurring and the expected loss rates resulting from updates to the aforementioned relevant information are treated as changes in estimates. The resulting increase or reversal of credit impairment losses is recognized in profit or loss for the period.

Coal reserves

Engineering estimates of the Target Company's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

Depreciation

Other than the mining structures and mining rights and obligations for land reclamation, property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives of the assets, after taking into account the estimated residual value. The Target Company reviews the estimated useful lives and residual value of the assets regularly based on the Target Company's historical experience with similar assets and taking into account anticipated technological changes. Depreciation for future periods is adjusted if there is a significant change from previous estimates. The carrying amount of the property, plant and equipment is disclosed in note 14 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

Key sources of estimation uncertainty (continued)

Deferred tax assets

The Target Company recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 25 to the Historical Financial Information.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Company considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Company and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Company may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 30 to the Historical Financial Information.

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	7,136	6,820	7,058	4,244	3,584
Others	1	4	1	-*	1
	7,137	6,824	7,059	4,244	3,585

* Amount less than RMB500,000

The Target Company's revenues from contracts with customers are RMB7,136 million, RMB6,820 million, RMB7,058 million, RMB4,244 million (unaudited) and RMB3,584 million for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025, respectively.

The Target Company produces and sells coal and coal-based powder to customers at spot market. For sales of coal and coal-based powder, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customers from the Target Company. According to the Target Company's historical experiences, there was no significant exchange or return of coal and coal-based powder occurred. There are no sales-related warranties associated with coal and coal-based powder.

All performance obligations of sales of coal and coal-based powder are part of contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Company only has one reportable operating segment. Management monitors the operating results of the Target Company's operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Company's revenue from external customers was from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of Target Company's non-current non-financial assets (excluding deferred tax assets) were located in Mainland China as at the end of each of the Relevant Periods.

Revenue derived from single customers which accounted for 10% or more of the Target Company's total revenue is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Customer A	3,623	3,471	3,600	2,164	1,834
Customer B	3,470	3,346	3,458	2,080	1,751

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Materials, fuel and power	275	281	346	200	171
Personnel expenses	311	376	464	307	261
Depreciation and amortisation	530	626	664	390	396
Taxes and surcharges	888	876	909	540	473
Stripping costs	675	1,041	825	635	479
Repairs and maintenance	13	22	16	7	3
Other operating costs	92	155	185	89	50
	2,784	3,377	3,409	2,168	1,833

7. OTHER INCOME

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Government grants	-*	-*	3	-	-
Compensation and penalty income	2	6	2	2	2
Others	-*	-*	1	-*	-*
	2	6	6	2	2

* Amount less than RMB500,000

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	16	57	26	15	21
Total interest income	16	57	26	15	21
Interest on:					
– borrowings	13	2	1	1	-
– lease liabilities	5	-	-	-	-
– long-term liabilities	-	5	2	2	-
Total finance costs on financial liabilities	18	7	3	3	-
Unwinding of discount	4	23	10	6	4
Total finance costs	22	30	13	9	4
Net finance costs	6	(27)	(13)	(6)	(17)

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	656	535	586	348	281
Deferred tax	13	(25)	(26)	(37)	(19)
	669	510	560	311	262

The tax charge for the year/period can be reconciled to the profit before income tax per statement of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit before income tax	4,270	3,356	3,533	2,040	1,737
Tax at the PRC income tax rate of 25%	1,068	839	883	510	434
Tax effects of:					
– effect of preferential tax rate	(427)	(336)	(353)	(204)	(174)
– non-deductible expenses	23	8	31	5	3
– share of results of an associate	5	(1)	(1)	-	(1)
Income tax expense	669	510	560	311	262

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rates applicable for the PRC resident enterprise is 25% for the Relevant Periods and for the seven months ended 31 July 2024. The Target Company is qualified to be entitled to a preferential tax rate of 15% from 2021 to 2030 because the Target Company operates in the Western developing region of the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR/PERIOD

Profit for the year/period has been arrived at after charging:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Personnel expenses, including	311	376	464	307	261
– contributions to defined contribution plans	41	48	62	35	39
Depreciation of property, plant and equipment (note 14)	280	381	410	241	249
Depreciation of right-of-use assets (note 19)	17	4	4	2	2
Amortisation of intangible assets (note 16)	-*	1	1	-*	1
Amortisation of long-term deferred expenses (note 18)	236	242	250	148	145

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

11. DIRECTORS' AND SUPERVISORS' EMOLUMENTS (continued)

The remuneration of the Target Company's directors (including the chief executive) and supervisors during the Relevant Periods and the seven months ended 31 July 2024 are as follows: (continued)

		Seven months ended 31 July 2025				
	Notes	Fee RMB million	Basic salaries, housing and other allowance and benefits in kind RMB million	Discretionary bonuses RMB million	Retirement scheme contributions RMB million	Total RMB million
Directors						
Huang Xiangming	(iii)	-	0.26	0.22	0.09	0.57
Cui Jianping		-	0.25	0.22	0.03	0.50
Yang Yonghong	(i) & (iii)	-	-	-	-	-
Wang Jianping	(ii)	-	-	-	-	-
Yang Ming	(iii)	-	0.21	0.22	0.06	0.49
Zhang Huaiguo		-	0.23	0.22	0.09	0.54
Sub-total		-	0.95	0.88	0.27	2.10
Supervisors						
Dong Liming		-	0.12	0.24	0.07	0.43
Yang Cheng	(iii)	-	0.20	0.19	0.07	0.46
Dai Yongjun	(ii)	-	-	-	-	-
Ren Zhipeng	(iii)	-	0.21	0.22	0.06	0.49
Sub-total		-	0.53	0.65	0.20	1.38
Total		-	1.48	1.53	0.47	3.48

Discretionary bonuses were determined in accordance with the relevant human resources policies.

Notes:

(i) The emoluments of these directors and supervisors were borne by China Energy Group during the Relevant Periods and the seven months ended 31 July 2024.

(ii) The emoluments of these directors and supervisors were borne by Shaanxi Yanchang Petroleum and Mining Co., Ltd. ("Yanchang Petroleum") during the Relevant Periods and the seven months ended 31 July 2024.

(iii) Mr. Huang Xiangming was appointed as a director on 20 September 2023.
Mr. Yang Yonghong was appointed as a director on 8 May 2024.
Mr. Yang Ming was appointed as a director on 15 November 2023.
Mr. Yang Cheng was appointed as a supervisor on 15 November 2023.
Mr. Ren Zhipeng was appointed as a supervisor on 15 November 2023.

(iv) Mr. Liu Minqiang ceased to serve as a director on 30 August 2023.
Mr. Huang Jing ceased to serve as a director on 9 November 2023.
Mr. Qiu Yashe ceased to serve as a director on 9 November 2023.
Mr. You Wenshun ceased to serve as a director on 8 May 2024.
Ms. Xue Li ceased to serve as a supervisor on 28 October 2024.
Mr. Yang Gensheng ceased to serve as a director on 25 October 2024.

Except for those emoluments of directors or supervisors whose emoluments were borne by China Energy Group and Shaanxi Yanchang Petroleum and Mining Co., Ltd., the executive directors' and supervisors' emoluments shown above were mainly for their services in connection with the management of the affairs of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

12. EMPLOYEES' EMOLUMENTS

Of the five individuals with the highest emoluments within the Target Company, two, two, three, three and two were the directors of the Target Company whose remuneration are disclosed in note 11 to the Historical Financial Information above for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025, respectively. The emoluments of other three, three, two, two and three highest paid individuals are as follows：

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Basic salaries, housing and other allowances and benefits in kind	1.00	1.09	0.77	0.46	0.71
Discretionary bonuses	1.86	2.45	1.42	0.44	0.66
Retirement scheme contributions	0.34	0.39	0.26	0.14	0.24
Total	3.20	3.93	2.45	1.04	1.61

The number of non-director highest paid employees whose remuneration fell within the following bands is as follows:

	Year ended 31 December 2022	Year ended 31 December 2023	Year ended 31 December 2024	Seven months ended 31 July 2024 (unaudited)	Seven months ended 31 July 2025
HKD500,001 to HKD1,000,000	-	-	-	2	3
HKD1,000,001 to HKD1,500,000	3	2	2	-	-
HKD1,500,001 to HKD2,000,000	-	1	-	-	-
Total	3	3	2	2	3

13. DIVIDENDS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Dividend paid	-	5,433	2,097	-	-

At 31 December 2022	696	3,199	1,461	8	5,364
At 31 December 2023	740	2,990	1,533	7	5,270
At 31 December 2024	730	2,771	1,572	6	5,079
At 31 July 2025	729	2,645	1,502	6	4,882

Notes:

(i) The Target Company was in the process of applying for the title certificates of certain of its properties with aggregate carrying amounts of RMB182 million, RMB185 million, RMB180 million and RMB178 million as at 31 December 2022, 2023 and 2024 and 31 July 2025, respectively. The directors are of the opinion that the Target Company is entitled to lawfully and validly occupy or use the above mentioned properties.

(ii) There is no pledged property, plant and equipment of Target Company to secure the banking facilities granted to the Target Company at 31 December 2023.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

15. CONSTRUCTION IN PROGRESS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	138	154	48	14
Additions	137	178	57	24
Transferred to property, plant and equipment (note 14)	(120)	(280)	(91)	(8)
Transferred to intangible assets (note 16)	(1)	(4)	-	-
At the end of the year/period	154	48	14	30

16. INTANGIBLE ASSETS

The movements of intangible assets, mainly software and franchises, are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	24	50	77	54
Additions	25	24	59	16
Transferred from construction in progress (note 15)	1	4	-	-
Amortisation	-*	(1)	(1)	(1)
Transferred to property, plant and equipment (note 14)	-	-	(82)	-
At the end of the year/period	50	77	54	68

* Amount less than RMB500,000

17. INTERESTS IN AN ASSOCIATE

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Unlisted shares, at cost	15	15	15	15
Share of post-acquisition profits, net of dividend received	13	19	15	19
	28	34	30	34

The Target Company's associate is unlisted and established in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

17. INTERESTS IN AN ASSOCIATE (continued)

Aggregate information of associates that are not individually material:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Carrying amount of immaterial associate	28	34	30	34

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Amounts of the Target Company's share of immaterial associate					
– Profit for the year/period	5	6	5	5	4
– Total comprehensive income for the year/period	5	6	5	5	4

18. OTHER NON-CURRENT ASSETS

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Prepayments for mining projects	425	425	425	425
Long-term deferred expenses (note)	1,408	1,162	912	767
	1,833	1,587	1,337	1,192

Note:

The movements of long-term deferred expenses during the year/period are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	1,650	1,408	1,162	912
Amortisation	(236)	(242)	(250)	(145)
Disposal	(6)	(4)	-	-
At the end of the year/period	1,408	1,162	912	767

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

19. RIGHT-OF-USE ASSETS

The right-of-use assets represent the consideration of land use rights paid to the PRC's government authorities and the amounts of leased assets.

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company had no bank loans secured by the Target Company's right-of-use assets.

The Target Company leases assets including buildings, machinery, equipment and other properties, and land use rights. Information about leases for which the Target Company is a lessee is presented below.

	Buildings RMB million	Machinery, equipment and other properties RMB million	Land use rights RMB million	Total RMB million
Cost				
At 1 January 2022	9	179	175	363
Transferred to property, plant and equipment (note 14)	-	(179)	-	(179)
Disposals	(2)	-	-	(2)
At 31 December 2022, 2023 and 2024 and 31 July 2025	7	-	175	182
Accumulated depreciation				
At 1 January 2022	5	4	12	21
Depreciation	3	11	3	17
Transferred to property, plant and equipment (note 14)	-	(15)	-	(15)
Disposals	(2)	-	-	(2)
At 31 December 2022 and 1 January 2023	6	-	15	21
Depreciation	1	-	3	4
At 31 December 2023 and 1 January 2024	7	-	18	25
Depreciation	-	-	4	4
At 31 December 2024 and 1 January 2025	7	-	22	29
Depreciation	-	-	2	2
At 31 July 2025	7	-	24	31
Net carrying amounts				
At 31 December 2022	1	-	160	161
At 31 December 2023	-	-	157	157
At 31 December 2024	-	-	153	153
At 31 July 2025	-	-	151	151

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

20. INVENTORIES

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Coal	10	21	6	2
Materials and supplies	112	123	100	121
	122	144	106	123

21. ACCOUNTS RECEIVABLE

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable				
– Fellow subsidiaries	477	465	425	418
– Associates	-	-	-	-
– A non-controlling shareholder	846	761	630	249
	1,323	1,226	1,055	667
Less: Allowance for credit losses	-	-	-	-
	1,323	1,226	1,055	667

As at the end of each of the Relevant Periods, all accounts receivable are from contracts with customers.

As at the end of each of the Relevant Periods, the ageing analysis of accounts receivable, based on the invoice date and net of loss allowance, is less than one year.

As at the end of each of the Relevant Periods, there were no accounts receivable of the Target Company that were pass due.

All accounts receivable are denominated in RMB.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

22. PREPAID EXPENSES AND OTHER CURRENT ASSETS

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets measured at amortised cost				
– Other receivables due from associates	5	1	1	17
– Other receivables	70	75	2	5
	75	76	3	22
Less: Impairment losses	-	-	-	-
	75	76	3	22
Prepaid expenses and deposits	45	60	64	89
Deductible Value-added tax ("VAT") and other taxes	14	13	-	-
	134	149	67	111

23. RESTRICTED BANK DEPOSITS

Restricted bank deposits mainly include the mine geographical environment governance recovery fund of coal mines and restoration development deposits.

The Target Company performed impairment assessment on restricted bank deposits and concluded that the probability of defaults of the counterparty banks is insignificant and accordingly, no allowance for credit losses is provided.

Details of impairment assessment of restricted bank deposits are set out in note 33.2 to the Historical Financial Information.

24. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS

(a) Cash and cash equivalents

Cash and cash equivalents in the statements of financial position and the statements of cash flows comprise cash at bank and in hand, and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with banks and other financial institutions	3,039	3,017	3,750	5,594
Less: Restricted bank deposits	539	795	993	1,140
Less: Time deposits with original maturity over three months	1,500	-	-	2,812
Cash and cash equivalents	1,000	2,222	2,757	1,642

As at the end of each of the Relevant Periods, the Target Company performed impairment assessment on bank balances and concluded that the probability of defaults of the counterparty banks was insignificant and accordingly, no allowance for credit losses is provided. Details of impairment assessment of bank deposits are set out in note 33.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

24. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS (continued)

(b) Reconciliation of liabilities arising from financing activities

The table below shows the detailed changes in the Target Company's liabilities arising from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are those for which cash flows were, or future cash flows will be, classified in the Target Company's statement of cash flows as cash flows from financing activities.

	Borrowings RMB million (note 26)	Long-term liabilities RMB million (note 29)	Current portion of long-term liabilities RMB million (note 29)	Lease liabilities RMB million	Total RMB million
At 1 January 2022	1,233	-	-	28	1,261

	1 January 2023 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2023 RMB million
Depreciation of property, plant and equipment	(232)	46	(186)
Accrued salaries and other expenses not yet paid	180	(19)	161
Gross profit from trial production	28	(2)	26
Deferred tax (liabilities)/assets	(24)	25	1

	1 January 2024 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2024 RMB million
Depreciation of property, plant and equipment	(186)	48	(138)
Accrued salaries and other expenses not yet paid	161	(20)	141
Gross profit from trial production	26	(2)	24
Deferred tax assets	1	26	27

	1 January 2025 RMB million	Credited/(charged) to profit or loss RMB million	31 July 2025 RMB million
Depreciation of property, plant and equipment	(138)	28	(110)
Accrued salaries and other expenses not yet paid	141	(8)	133
Gross profit from trial production	24	(1)	23
Deferred tax assets	27	19	46

As at the end of each of the Relevant Periods, the Target Company had no unused tax losses.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

26. BORROWINGS

An analysis of the Target Company's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Short-term borrowings	-	501	-	-
Unsecured	-	501	-	-

As at 31 December 2023, the Target Company's short-term borrowings were unsecured and bore interest at a rate of 2.2% per annum.

As at 31 December 2023, the Target Company has short-term borrowings from China Energy Finance Co., Ltd. (Finance Company) amounting to RMB501 million.

27. ACCOUNTS PAYABLE

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts payable				
– An associate of China Energy Group and fellow subsidiaries	117	200	144	126
– Third parties	1,141	1,067	849	800
	1,258	1,267	993	926

As at the end of each of the Relevant Periods, the ageing analysis of accounts payable, based on invoice dates, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	1,218	1,233	931	870
One to two years	35	34	48	33
Two to three years	5	-	14	23
	1,258	1,267	993	926

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

28. ACCRUED EXPENSES AND OTHER PAYABLES

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accrued staff wages and welfare benefits	21	18	27	82
Taxes payable other than income tax	222	215	232	166
Dividends payable	-	2,100	-	-
Other accrued expenses and payables (note)	125	319	372	424
	368	2,652	631	672

Note:

Other accrued expenses and payables of the Target Company included:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Amounts due to China Energy Group and fellow subsidiaries	-*	-*	-*	-*

* Amount less than RMB500,000

The above balances are unsecured, interest-free and payable on demand.

29. LONG-TERM LIABILITIES

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Long-term liabilities under finance lease (note)	123	116	-	-
Analysed for reporting purpose as:				
Current liabilities	33	69	-	-
Non-current liabilities	90	47	-	-
	123	116	-	-

Note:

The Target Company entered into a finance lease arrangement with Guoneng Financial Leasing Co., Ltd. for the purchase of mining trucks. The finance lease bears interest at 4.3% per annum.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

30. ACCRUED RECLAMATION OBLIGATIONS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	80	537	225	155
Addition for the year/period	537	-	-	-
Accretion expense	4	23	10	4
Accrued reclamation obligations utilised	(84)	(335)	(80)	(36)
At the end of the year/period	537	225	155	123
Analysed for reporting purpose as:				
Current liabilities	311	70	54	22
Non-current liabilities	226	155	101	101
	537	225	155	123

31. PAID-UP CAPITAL

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Registered and paid-up capital	2,180	2,739	2,739	2,739

During the year ended 31 December 2023, the equity holders made a capital contribution of RMB1,796 million to the Target Company, of which RMB559 million were recorded as paid-up capital.

32. CAPITAL RISK MANAGEMENT

The Target Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Target Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or raise capital to reduce debts.

The Target Company monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Company aims to maintain the gearing ratio at a reasonable level. The Target Company's gearing ratios as at 31 December 2022, 2023 and 2024 and 31 July 2025 were 21.2%, 42.6%, 17.5% and 13.9%, respectively. The increase in gearing ratio as at 31 December 2023 was mainly due to dividend payable amounting to RMB2,100 million (note 28).

There were no changes in the Target Company's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS

33.1 Categories of financial instruments

The carrying amounts of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	4,437	4,319	4,808	6,283
Financial liabilities				
Amortised cost	1,506	3,802	1,364	1,350

33.2 Financial risk management objectives and policies

The Target Company's major financial instruments include accounts receivable, deposits to China Energy Group and fellow subsidiaries, amounts due from/to an associate, other receivables, accounts payable, borrowings, other payables, long-term liabilities. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk, credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

Interest rate risk

The Target Company is exposed to fair value interest rate risk in relation to fixed-rate borrowings (see note 26). The Target Company does not have variable rate borrowings or variable loans, therefore the directors believe the Target Company has no significant concentration of interest rate risk.

The Target Company's exposure to interest rate risk on financial liabilities is detailed in the liquidity risk management section of this note.

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, the Target Company's maximum exposure to credit risk was best represented by those financial assets' carrying amounts. The Target Company does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets.

Accounts receivable arising from contracts with customers

In order to minimise the credit risk, the management of the Target Company has delegated a team responsible for determination of credit limits and credit approvals. Before accepting any new customer, the Target Company uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the directors consider that the Target Company's credit risk is significantly reduced.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China and Agricultural Bank of China.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Other receivables

Other receivables represent dividend receivables and interest receivables. The dividend receivables relate to the investments of the Target Company and the interest receivables mainly relate to related parties and stated owned entities. Thus, the credit risk on other receivables is limited.

The table below details the credit risk exposures of the Target Company's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month ECL or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Restricted bank deposits	23	N/A	12-month ECL	539	795	993	1,140
Cash and cash equivalents and time deposits	24	N/A	12-month ECL	2,500	2,222	2,757	4,454
Other receivables	22	N/A	12-month ECL	75	76	3	22
			Credit-impaired	-	-	-	-
Accounts receivable (note)	21	N/A	Provision matrix	1,323	1,226	1,055	667
			Credit-impaired	-	-	-	-

Note:

For accounts receivable, the Target Company has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors with credit-impaired, the Target Company determines the ECL on these items by using a provision matrix, grouped by age of debtors.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – age of debtors

As part of the Target Company's credit risk management, the Target Company uses age of debtors to assess the impairment for its receivables from customers in relation to its sales of coal and coal-based powder because these customers have common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivable which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). The Target Company has no individually assessed accounts receivable as at 31 December 2022, 2023 and 2024 and 31 July 2025.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	-	1,323	-	1,226	-	1,055	-	667

The estimated loss rates are estimated based on historical observed default rates over the expected lives of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated. As at 31 July 2025, the Target Company had not incurred any default in relation to its accounts receivable.

Liquidity risk

The following table details the remaining contractual maturity of the Target Company's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates) and the earliest date on which the Target Company can be required to pay:

	31 December 2022						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1-2 years RMB million	2-5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Accounts payable, other payables, lease liabilities and long-term liabilities	-*	1,422	36	60	-	1,518	1,506

* Ratio less than 0.05%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Company's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates) and the earliest date on which the Target Company can be required to pay: (continued)

	31 December 2023						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1-2 years RMB million	2-5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Accounts payable, other payables, lease liabilities and long-term liabilities	-*	3,733	45	32	-	3,810	3,802
Borrowings fixed interest rates	2.20	501	-	-	-	501	501
	-*	4,234	45	32	-	4,311	4,303

* Ratio less than 0.05%

	31 December 2024						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1-2 years RMB million	2-5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Accounts payable, other payables, lease liabilities and long-term liabilities	-*	1,364	-	-	-	1,364	1,364

* Ratio less than 0.05%

	31 July 2025						
	Weighted average interest rate %	On demand or less than 1 year RMB million	1-2 years RMB million	2-5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Accounts payable, other payables, lease liabilities and long-term liabilities	-	1,350	-	-	-	1,350	1,350

Saved as discussed above, the Target Company also makes use of banks and financial institution facilities as one of the effective sources of liquidity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.3 Fair value measurements

Fair values of the Target Company's financial assets and financial liabilities that are measured at fair value on a recurring basis

The Target Company does not have financial asset or financial liabilities that are measure at fair value on a recuring basis.

Fair values of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate to their fair values. The fair values of fixed rate borrowings approximate their fair values as they are borrowed on a period of 3 to 6 months, during which the time value of money is insignificant.

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Long-term liabilities	123	124	116	118	-	-	-	-

The fair value of the long-term liabilities above is in the Level 2 category, and is measured using discounted cash flow method where the future cash flows were estimated based on the contracts and discounted at a rate that reflected the credit risks of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. COMMITMENTS AND CONTINGENT LIABILITIES

34.1 Capital commitments

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company had capital commitments for land, buildings and mining rights, exploration and evaluation assets, equipment and others as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Land, buildings and exploration and evaluation assets	36	23	35	36
– Equipment	142	196	422	437
	178	219	457	473

34.3 Legal contingencies

The Target Company is the defendant in several legal proceedings and the plaintiff in other lawsuits arising from daily operations. Although the outcome of these legal proceedings cannot be determined at this time, the directors believe that any liabilities arising therefrom will not have a material adverse effect on the Historical Financial Information.

34.2 Environmental contingencies

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Company has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and has not accrued any further amounts for environmental remediation relating to its operations apart from the provision for land reclamation costs. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Company. The regulatory bodies, however, have moved, and may move towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Company's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to, coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present and could be material.

35. EMPLOYEE BENEFIT PLANS

The Target Company participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Company is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Company makes contribution to a supplemental defined contribution pension plan for its employees. The fund of that plan is managed by a qualified fund manager. The Target Company has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Company's contributions for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025 were RMB40 million, RMB47 million, RMB60 million, RMB35 million and RMB38 million, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS

36.1 Transactions with associates of China Energy Group, fellow subsidiaries, the associate of the Target Company and Yanchang Petroleum

The Target Company is controlled by China Energy Group and has significant transactions and relationships with China Energy Group, associates of China Energy Group and subsidiaries of China Energy Group ("fellow subsidiaries"). Related parties refer to enterprises over which China Energy Group is able to exercise significant influence or control. The Target Company has entered into transaction with Yanchang Petroleum, which is the second largest equity holder of the Target Company, and has significant influence over the Target Company. The Target Company also has entered into transactions with its associate, over which the Target Company can exercise significant influence.

The Target Company had the following transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, the associate of the Target Company and Yanchang Petroleum. The following transactions were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024 and seven months ended 2024 and 2025:

	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income	(i)	9	41	10	4	14
Interest expense	(ii)	6	6	3	-	-
Purchases of ancillary materials and spare parts	(iii)	66	100	107	64	74
Ancillary services	(iv)	21	22	26	13	14
Sale of coal	(v)	3,623	3,469	3,600	2,164	1,833
Purchase of equipment and construction work	(vi)	91	415	343	230	221
Other income	(vii)	1	3	1	-	1
Net deposits placed with Finance Company	(viii)	1,739	(277)	535	1,379	1,697
Granting of loans from Finance Company	(ix)	-	500	-	-	-
Repayment of loans from Finance Company	(x)	-	-	500	500	-

Transactions with Yanchang Petroleum	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Sale of coal	(v)	3,470	3,346	3,458	2,080	1,751

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS (continued)

36.1 Transactions with associates of China Energy Group, Fellow Subsidiaries, the associate of the Target Company and Yanchang Petroleum (continued)

The Target Company had the following transactions with China Energy Group, associates of China Energy Group, fellow subsidiaries, the associate of the Target Company and Yanchang Petroleum. The following transactions were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024 and seven months ended 2024 and 2025: (continued)

(i) Interest income represents interest earned from deposits in Finance Company. The applicable interest rate is determined in accordance with the prevailing interest rates published by the People's Bank of China (PBOC).

(ii) Interest expense represents interest incurred from loans from Fellow Subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(iii) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Company's operations from Fellow Subsidiaries and associates of China Energy Group.

(iv) Ancillary services represent expenditures for support services such as operation and maintenance service fee, engineering consulting fee and the supply of electricity to associates of China Energy Group, Fellow Subsidiaries and associates of the Target Company.

(v) Sale of coal represents income from sale of coal to Fellow Subsidiaries, the associate of China Energy Group and Yanchang Petroleum.

(vi) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by Fellow Subsidiaries.

(vii) Other income mainly includes sales of water and electricity to associates of China Energy Group, Fellow Subsidiaries and the associate of the Target Company.

(viii) Net deposits placed with Finance Company represents net deposits placed by the Target Company with Finance Company.

(ix) Granting of loans from Finance Company.

(x) Repayment of loans from Finance Company.

The directors are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and in accordance with the agreements governing such transactions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS (continued)

36.1 Transactions with associates of China Energy Group, Fellow Subsidiaries, the associate of the Target Company and Yanchang Petroleum (continued)

Amounts due from/to associates of China Energy Group, Fellow Subsidiaries, the associate of the Target Company and Yanchang Petroleum:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Cash and time deposits at bank	2,499	2,222	2,756	4,453
Accounts receivable	477	465	425	418
Prepaid expenses and other current assets	38	53	60	87
Total amounts due from associates of China Energy Group, Fellow Subsidiaries and the associate of the Target Company	3,014	2,740	3,241	4,958
Borrowings	-	500	-	-
Accounts payable	117	200	144	126
Accrued expenses and other payables	-*	-*	40	40
Total amounts due to associates of China Energy Group and Fellow Subsidiaries, and the associate of the Target Company	117	700	184	166

Transactions with Yanchang Petroleum	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts receivable	846	761	630	249
Total amounts due from Yanchang Petroleum	846	761	630	249

* Amount less than RMB500,000

Other than those disclosed in notes 21, 22, 24, 26, 27, 28 and 29 to the Historical Financial Information, amounts due from/to associates of China Energy Group, Fellow Subsidiaries, the associate of the Target Company and Yanchang Petroleum bear no interest, are unsecured and are repayable in accordance with normal commercial terms.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS (continued)

36.2 Key management personnel emoluments

Key management personnel receive compensation in the form of fees, basic salaries, housing and other allowances, benefits in kind, discretionary bonuses and retirement scheme contributions.

Key management personnel compensation of the Target Company is summarised as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Short-term employee benefits	3.28	3.71	3.82	1.29	1.76
Post-employment benefits	0.32	0.37	0.44	0.17	0.27
	3.60	4.08	4.26	1.46	2.03

Total remuneration is included in "personnel expenses" as disclosed in note 10 to the Historical Financial Information.

36.3 Contributions to post-employment benefit plans

The Target Company participates in various defined contribution post-employment benefit plans organised by municipal and provincial governments and a supplemental defined contribution pension plan approved by the government for its employees. Further details of the Target Company's post-employment benefit plans are disclosed in note 35 to the Historical Financial Information.

37. NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD

Up to the Historical Financial Information approval date, there was no significant event after the Relevant Periods that need to be disclosed.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF SHANXI PROVINCE JINSHEN ENERGY CO., LTD. TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the Historical Financial Information of Shanxi Province Jinshen Energy Co., Ltd. (the "Target Company") and its subsidiaries (together, the "Target Group") set out on pages II-H-3 to II-H-103, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-H-3 to II-H-103 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim comparative financial information

We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation of the Interim Comparative Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-H-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which contains information about the dividends paid by the Target Company in respect of the Relevant Periods.

I HISTORICAL FINANCIAL INFORMATION

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The financial statements of the Target Group for the Relevant Periods, on which the Historical Financial Information is based, were audited by Ernst & Young in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") (the "Underlying Financial Statements").

The Historical Financial Information is presented in Renminbi ("RMB") and all values are rounded to the nearest million except when otherwise indicated.

CONSOLIDATED STATEMENTS OF CHANGES IN EQUITY (continued)

Note:

(i) Statutory reserves

Statutory surplus reserve

According to the PRC Company Law and the Target Company's Articles of Association, the Target Company is required to transfer 10% of its net profit as determined in accordance with the China Accounting Standards for Business Enterprises ("China Accounting Standards") to its statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of dividends to shareholders.

Specific reserve for maintenance and production funds

Pursuant to the relevant PRC regulations, the Target Group is required to transfer production and maintenance funds at fixed rates based on relevant bases, such as production volume, to a specific reserve account. The production and maintenance funds could be utilised when expenses or capital expenditures on production maintenance and safety measures are incurred. The amount of production and maintenance funds utilised would be transferred from the specific reserve account to retained earnings.

Discretionary surplus reserve

The appropriation to the discretionary surplus reserve is subject to the shareholders' approval. The utilisation of the reserve is similar to that of the statutory surplus reserve.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. PRINCIPAL ACTIVITIES AND ORGANISATION

Principal activities

The Target Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Target Company is located in Heping 2nd Lane, Qixiang Road, Xinfu District, Xinzhou City, Shanxi Province, the PRC.

During the Relevant Periods, the Target Group was involved in the following principal activities: (i) the production and sale of coal; and (ii) the provision of railway transportation services to coal production and sales companies in the PRC.

In the opinion of the directors the immediate holding company and the ultimate holding company of the Target Company are Shanxi Coal Transportation and Sales Group Co., Ltd. and Jinneng Holdings Group Co., Ltd., respectively, both of which are established in the PRC.

As at the date of this report, the Target Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies, the particulars of which are set out below:

Name	Place and date of registration and place of operations	Paid-up capital RMB million	Proportion of ownership interest held by the Target Group	Principal activities
Shanxi Jinshen Hequ Coal Development Co., Ltd.山西晉神河曲煤炭開發有限公司	PRC/Mainland China 30 September 2005	15	99.50	Research and development of new coal technologies
Shanxi Jinshen Employee Education and Training Co., Ltd.山西晉神職工教育培訓有限公司	PRC/Mainland China 25 September 2013	1	99.50	Business services
Shanxi Jinshen Shaping Coal Industry Co., Ltd.山西晉神沙坪煤業有限公司	PRC/Mainland China 5 July 2010	80	100.00	Coal mining and selection
Shanxi Hequ Jinshen Ciyaogou Coal Industry Co., Ltd. 山西河曲晉神磁窯溝煤業有限公司	PRC/Mainland China 17 June 2011	240	60.00	Coal mining and selection
Shanxi Xinzhou Jinshen Coal Sales Co., Ltd.山西忻州晉神煤炭銷售有限公司	PRC/Mainland China 18 November 2014	10	100.00	Coal distribution, wholesale, loading and unloading
Shanxi Xinzhou Local Railway Co., Ltd.山西省忻州地方鐵路有限公司	PRC/Mainland China 02 December 1985	0	100.00	Railway transportation
Shanxi Jinshen Railway Co., Ltd.山西晉神鐵路有限公司	PRC/Mainland China 12 April 2012	20	100.00	Railway transportation

The statutory financial statements of the above entities for the years ended 31 December 2022, 2023 and 2024 prepared under Chinese Accounting Standards were audited by Shanxi Tianzheng Certified Public Accountants Co., Ltd., certified public accountants registered in the PRC.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.1 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) as issued by the International Accounting Standards Board (the "IASB"). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been early adopted by the Group in the preparation of the Historical Financial Information throughout the Relevant Periods and in the period covered by the Interim Comparative Financial Information.

The Historical Financial Information has been prepared on the historical cost basis.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Target Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the Historical Financial Information is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of IFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets.*

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in note 3 to the Historical Financial Information.

Material accounting policies adopted by the Target Group are disclosed below.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.2 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Target Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Target Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	*Presentation and Disclosure in Financial Statements*[2]
IFRS 19	*Subsidiaries without Public Accountability: Disclosures*[2]

Amendments to IFRS 10 and IAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3]
Annual Improvements to IFRS Accounting Standards – Volume 11	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7[1]

1 Effective for annual periods beginning on or after 1 January 2026
2 Effective for annual/reporting periods beginning on or after 1 January 2027
3 No mandatory effective date yet determined but available for adoption

The Target Group is in the process of making an assessment of the impact of these new and revised IFRS Accounting Standards upon initial application. IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information. The new requirements are expected to impact the Target Group's presentation in the statement of profit or loss and other comprehensive income and disclosures of the Target Group's financial performance. IFRS 18 is not expected to have any impact on the Target Group's results of operations and financial position but has impact on the presentation and disclosure of the Historical Financial Information. Other than IFRS 18, so far, the Target Group considers that IFRS 19 and the revised IFRS Accounting Standards are unlikely to have a significant impact on the Target Group's results of operations and financial position.

2.3 MATERIAL ACCOUNTING POLICIES

Basis of consolidation

The Historical Financial Information incorporates the financial statements of the Target Company and its subsidiaries. Control is achieved when the Target Company:

– has power over the investee;

– is exposed, or has rights, to variable returns from its involvement with the investee; and

– has the ability to use its power to affect its returns.

The Target Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Basis of consolidation (continued)

When the Target Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Target Group considers all relevant facts and circumstances in assessing whether or not the Target Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Target Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Target Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Target Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Target Group obtains control over the subsidiary and ceases when the Target Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Target Group gains control until the date when the Target Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to equity holders of the Target Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to equity holders of the Target Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Target Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Target Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Target Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Target Group's ownership interests in existing subsidiaries

Changes in the Target Group's interests in subsidiaries that do not result in the Target Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Target Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Target Group and the non-controlling interests according to the Target Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Target Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Business combinations

Acquisitions of businesses, other than business combination under common control are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Target Group, liabilities incurred by the Target Group to the former owners of the acquiree and the equity interests issued by the Target Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits*, respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are initially measured at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Target Group's cash-generating units (or group of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit or any of the cash-generating units within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Target Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Investments in associates

An associate is an entity over which the Target Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in the Historical Financial Information using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Target Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Target Group's share of the profit or loss and other comprehensive income of the associate. When the Target Group's share of losses of an associate exceeds the Target Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Target Group's net investment in the associate, after applying the expected credit loss ("ECL") model to such other long-term interests where applicable), the Target Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Target Group has incurred legal or constructive obligations or made payments on behalf of that associate.

On acquisition of the investment in an associate, any excess of the cost of acquisition over the Target Group's share of the net fair value of the identifiable assets, liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Target Group's share of the net fair value of the identifiable assets and liabilities over the cost of investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Target Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss is recognised when the recoverable amount is less than the carrying value of the investment in associates. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Target Group reduces its ownership interest in an associate but the Target Group continues to use the equity method, the Target Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate of the Target Group, profits and losses resulting from the transactions with the associate are recognised in the Historical Financial Information only to the extent of interest in the associate that is not related to the Target Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Revenue from contracts with customers

Under IFRS 15, the Target Group recognises revenue when (or as) a performance obligation is satisfied, i.e, when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Target Group's performance as the Target Group performs;

- the Target Group's performance creates and enhances an asset that the customer controls as the Target Group performs; or

- the Target Group's performance does not create an asset with an alternative use to the Target Group and the Target Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A contract asset represents the Target Group's right to consideration in exchange for goods or services that the Target Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Target Group's unconditional right to consideration, i.e, only the passage of time is required before payment of that consideration is due.

A contract liability represents the Target Group's obligation to transfer goods or services to a customer for which the Target Group has received consideration (or an amount of consideration is due) from the customer.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Target Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Target Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Target Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Target Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Retirement benefit costs

Payments to state-managed retirement benefit schemes and a supplemental defined contribution pension plan approved by the government are recognised as an expense when employees have rendered service entitling them to the contributions.

The contributions made by the Target Group to such insurance plans on behalf of employees are fully attributed to the employees at the time of payment, therefore the Target Group has no abandoned contributions that can be utilised.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the reporting period. Taxable profit differs from "profit before income tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of the income or expense that is taxable or deductible in other years and items that are never taxable or deductible. The Target Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;

- temporary differences related to investments in subsidiaries, associates and joint venture to the extent that the Target Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future;

- taxable temporary differences arising on the initial recognition of goodwill; and

- those related to the income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (the "OECD").

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Taxation (continued)

The Target Group recognised deferred tax assets and deferred tax liabilities separately in relation to its lease liabilities and right-of-use assets.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, except where the Target Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that future taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Target Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Target Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment, which consists of freehold land and buildings, mining structures and mining rights, mining related machinery and equipment, and other items of plant and equipment, held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write-off the cost of items of property, plant and equipment (other than freehold land and construction in progress, which are subject to impairment assessment) less their residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Property, plant and equipment, except freehold land, and mining structures and mining rights, are depreciated on a straight-line basis at the following rates per annum:

Categories	Term for deprecation)
Land and buildings	20 to 35 years
Mining rights，mining related machinery and equipment	5 to 12 years
Furniture, fixtures, motor vehicles and other equipment	5 to 8 years

The directors reviewed the estimated useful lives of the assets annually based on the Target Group's historical experience with similar assets and taking into account anticipated technological changes.

Construction in progress intended to be used for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Target Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property, plant and equipment, commences when the assets are ready for their intended use.

Items may be produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling any such items and the related cost are recognised in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Property, plant and equipment (continued)

Mining structures and mining rights

The costs of mining structures and mining rights, which include the costs of acquiring and developing mining structures and mining rights, are firstly capitalised as "construction in progress" in the reporting period in which they are incurred and then reclassified to "Mining structures and mining rights" under property, plant and equipment when they are ready for commercial production.

Mining structures and mining rights are depreciated on a units-of-production basis utilising only proved and probable coal reserves in the depletion base.

The Target Group's mining rights are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves to be mined in accordance with current production schedules.

Stripping costs incurred to develop a mine (or pit) before the production commences or to improve access to the component of the ore body during the production stage are capitalised as part of the cost of constructing the mine (or pit) and subsequently amortised over the life of the mine (or pit) on a units-of-production basis. Stripping costs and secondary development expenditure, mainly comprising costs on blasting, haulage, excavation. Incurred during the production stage of the ore body and does not providing any improved access to the ore body are charged to profit or loss as incurred.

Commercial reserves are proved and probable reserves. Changes in the commercial reserves affecting unit of production calculations are dealt with prospectively over the revised remaining reserves.

Obligations for land reclamation

The Target Group's obligations for land reclamation consist of spending estimates at both surface and underground mines in accordance with the PRC rules and regulations. The Target Group estimates its liabilities for land reclamation and mine closure based upon detailed calculations of the amount and timing of the future cash flows for the required work. Spending estimates are escalated for inflation, then discounted at a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability such that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The Target Group records a corresponding asset associated with the liability for final reclamation and mine closure. The obligation and corresponding asset are recognised in the period in which the liability is incurred. The asset is depreciated on the units-of-production method over its expected life and the liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation and the corresponding asset are recognised at the appropriate discount rate.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Intangible assets (continued)

Intangible assets acquired in a business combination not under common control

Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination with finite useful lives are reported at cost less accumulated amortisation and any accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

Impairment of tangible and intangible assets other than goodwill

At the end of the reporting period, the Target Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of tangible and intangible assets are estimated individually, when it is not possible to estimate the recoverable amount individually, the Target Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a basis based on the carrying amount of each asset in the unit. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit. An impairment loss is recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets

At inception of a contract, the Target Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Target Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for all leases.

At the lease commencement date, the Target Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Target Group enters into a lease in respect of a low-value asset, the Target Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Target Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Target Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the consolidated statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Leased assets (continued)

(ii) As a lessor

When the Target Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Target Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis.

When the Target Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Target Group applies the exemption method, then the Target Group classifies the sub-lease as an operating lease.

Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are calculated using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Provisions

Provisions are recognised when the Target Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Target Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for accounts receivable arising from contracts with customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities measured at fair value through profit and loss (the "FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities FVTPL are recognised immediately in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

– the financial asset is held within a business model whose objective is to collect contractual cash flows; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and

– the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Target Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

In addition, the Target Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial assets (continued)

Classification and subsequent measurement of financial assets (Continued)

(ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the other reserves; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained earnings.

Dividends from these investments in equity instruments are recognised in profit or loss when the Target Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the "other income" line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI or designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets

The Target Group recognises a loss allowance for expected credit loss ("ECL") on financial assets which are subject to impairment under IFRS 9 (including accounts receivable, other receivables, etc.). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Target Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Target Group always recognises lifetime ECL for accounts receivable. ECLs on these assets are assessed individually for credit-impaired debtors or using a provision matrix with appropriate groupings.

For all other instruments, the Target Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Target Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Target Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external credit rating (if available);
- significant deterioration in external market indicators of credit risk, e.g., a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Target Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Target Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Target Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if (i) it has a low risk of default, (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Target Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Target Group considers the changes in the risk that the specified debtor will default on the contract.

The Target Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(ii) Definition of default

For internal credit risk management, the Target Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Target Group, in full (without taking into account any collateral held by the Target Group). The Target Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

(a) significant financial difficulty of the issuer or the borrower;

(b) a breach of contract, such as a default or past due event;

(c) the lenders of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lenders would not otherwise consider;

(d) it is becoming probable that the borrower will enter bankruptcy or other financial re-organisation; or

(e) the disappearance of an active market for that financial asset because of financial difficulties.

(iv) Write-off policy

The Target Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Target Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

Generally, the ECL is the difference between all contractual cash flows that are due to the Target Group in accordance with the contract and the cash flows that the Target Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Target Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected loss is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Target Group expects to receive from the holder, the debtor or any other party.

For ECL on financial guarantee contracts, the Target Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

– Nature of financial instruments (i.e., the Target Group's accounts and bills receivables and other receivables are each assessed as a separate group. Loans receivable are assessed for ECL on an individual basis);

– Past-due status; and

– External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with IFRS 9 and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Impairment of financial assets (continued)

(v) Measurement and recognition of ECL (continued)

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognisation. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Target Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Derecognition of financial assets

The Target Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Target Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Target Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in equity instrument which the Target Group has elected on initial recognition to measure at FVTOCI upon application of IFRS 9, the cumulative gain or loss previously accumulated in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Target Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Financial liabilities at amortised cost

Financial liabilities including borrowings, accounts and bills payables and other payables are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Target Group derecognises financial liabilities when, and only when, the Target Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

2.3 MATERIAL ACCOUNTING POLICIES (continued)

Related parties

(a) A person, or a close member of that person's family, is related to the Target Group if that person:

(i) has control or joint control over the Target Group;

(ii) has significant influence over the Target Group; or

(iii) is a member of the key management personnel of the Target Group or the Target Group's parent.

(b) An entity is related to the Target Group if any of the following conditions applies:

(i) The entity and the Target Group are members of the same group;

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

(iii) Both entities are joint ventures of the same third party;

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) The entity is a post-employment benefit plan for the benefit of employees of either the Target Group or an entity related to the Target Group;

(vi) The entity is controlled or jointly controlled by a person identified in (a);

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity);

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Target Group or to the Target Group's parent;

(ix) Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Target Group's accounting policies, which are described in note 2.3, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Coal reserves

Engineering estimates of the Target Group's coal reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated coal reserves can be designated as "proved" and "probable". Proved and probable coal reserve estimates are updated at regular basis and have taken into account recent production and technical information of each mine. In addition, as prices and cost levels change from year to year, the estimate of proved and probable coal reserves also changes. This change is considered as a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expenses and impairment loss. Depreciation rates are determined based on estimated proved and probable coal reserve quantity (the denominator) and capitalised costs of mining structures and mining rights (the numerator). The capitalised cost of mining structures and mining rights are amortised based on the units of coal produced.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (CONTINUED)

3.1 KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

Impairment losses

In considering the impairment losses that may be required for certain of the Target Group's assets which mainly include property, plant and equipment, construction in progress, exploration and evaluation assets, intangible assets, right-of-use assets, interests in associates and other non-current assets, the recoverable amount of the asset need to be determined. The recoverable amount is the higher of its fair value less cost of disposal and value in use. It is difficult to precisely estimate fair value because quoted market prices for these assets may not be readily available. In determining the value in use, the Target Group uses all readily available information in determining expected cash flows generated by the cash-generating unit to which the asset belongs, and they are discounted to their present value, which requires significant judgement relating to cash flow items such as level of sale volume, selling price, amount of operating costs and future returns.

In considering the impairment losses that may be required for current receivables and other financial assets, future cash flows need to be determined. One of the key assumptions that has to be applied is regarding the ability of the debtors to settle the receivables.

Notwithstanding that the Target Group has used all available information to make this estimation, inherent uncertainty exists and actual write-offs may be higher or lower than the amount estimated.

Deferred tax assets

The Group recognises the deferred income tax assets to the extent that it is probable that future taxable profit and taxable temporary differences will be available against which the deductible temporary differences and tax losses carried forward can be utilised, using tax rates that are expected to be applied in the period when the asset is recovered. Recognition of deferred income tax assets was complex because it requires significant estimation and judgement, and it involves significant assumptions, including future taxable profits, future tax rates, the reversal of deductible and taxable temporary differences, and the possible utilisation of tax losses carried forward that could be significantly affected by changes in the tax law framework and future market or economic conditions. Further details on deferred taxes are disclosed in note 25 to the Historical Financial Information.

Obligations for land reclamation

The estimation of the liabilities for reclamation and mine closure involves the estimates of the amount and timing for the future cash spending as well as the discount rate used for reflecting current market assessments of the time value of money and the risks specific to the liability. The Target Group considers the factors including development plan of the mines, the geological structure of the mining regions and reserve volume to determine the scope, amount and timing of reclamation and mine closure works to be performed. Determination of the effect of these factors involves judgements from the Target Group and the estimated liabilities may turn out to be different from the actual expenditure to be incurred. The discount rate used by the Target Group may also be altered to reflect the changes in the market assessments of the time value of money and the risks specific to the liability, such as change of the borrowing rate and inflation rate in the market. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the performance of reclamation activities), the revisions to the obligation will be recognised at the appropriate discount rate. The carrying amounts of the obligations are disclosed in note 30 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

4. REVENUE FROM GOODS AND SERVICES

Disaggregation of revenue of business lines is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Revenue from goods and services					
– Coal	5,809	5,523	3,042	1,992	1,771
– Transportation and other services	96	95	13	10	-
Others	12	7	5	4	-
	5,917	5,625	3,060	2,006	1,771

The Target Group's revenues are all derived from contracts with customers.

The Target Group produces and sells coal to customers at spot market. For sales of coal, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customers' specific location. According to the Target Group's historical experiences, there was no significant exchange or return of coal occurred. There are no sales-related warranties associated with coal.

The Target Group provides railway transportation services to customers. Such services are recognised as a performance obligation satisfied over time as the Target Group rendering the services. Revenue is recognised for these services based on the stage of completion of the performance obligation.

All performance obligations of sales of coal and railway transportation services are part of contracts with an original expected duration of one year or less, and as permitted under IFRS 15, the transaction prices allocated to these unsatisfied contracts are not disclosed.

5. SEGMENT AND OTHER INFORMATION

For management purposes, the Target Group is not organised into business units based on their services and only has one reportable operating segment. Management monitors the operating results of operating segment as a whole for the purpose of making decisions about resource allocation and performance assessment.

All of the Target Group's revenue from external customers was from Mainland China during the Relevant Periods and the seven months ended 31 July 2024. All of Target Group's non-current non-financial assets (excluding deferred tax assets) were located in Mainland China as at the end of each of the Relevant Periods.

Revenue derived from a single customer which accounted for 10% or more of the Target Group's total revenue is as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Customer A	5,532	5,521	3,030	1,983	1,768

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

6. COST OF SALES

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Materials, fuel and power	1,349	1,480	1,024	618	864
Personnel expenses	323	382	336	203	188
Depreciation and amortisation	229	184	151	83	116
Taxes and surcharges	444	400	278	183	215
	2,345	2,446	1,789	1,087	1,383

7. OTHER INCOME

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million

Others	-	5	4	-	2
	-	12	5	1	3

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

8. INTEREST INCOME/FINANCE COSTS

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income from:					
– bank deposits	7	9	7	5	4
– other loans and receivables	4	-	-	-	-
Total interest income	11	9	7	5	4
Interest on:					
– borrowings	50	8	-	-	-
Total finance costs on financial liabilities	50	8	-	-	-
Unwinding of discount	11	11	9	6	5
Total finance costs	61	19	9	6	5
Net finance costs	50	10	2	1	1

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

9. INCOME TAX EXPENSE

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Current tax	807	650	220	164	54
Income tax difference adjustment in respect of prior year/period	6	7	8	16	-
Deferred tax	7	41	8	3	4
	820	698	236	183	58

The tax charge for the year/period can be reconciled to the profit before income tax per consolidated statements of profit or loss and other comprehensive income as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Profit before income tax	3,132	2,742	885	696	154
Tax at the PRC income tax rate of 25%	783	686	221	174	39
Tax effects of:					
– non-deductible expenses	30	5	9	(6)	19
– share of results of associates	1	-	(2)	(1)	-
– Income tax difference adjustment in respect of prior year/period	6	7	8	16	-
Income tax expense	820	698	236	183	58

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate applicable for the PRC group entities was 25% for the Relevant Periods and for the seven months ended 31 July 2024.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

10. PROFIT FOR THE YEAR/PERIOD

Profit has been arrived at after charging/(crediting):

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Personnel expenses, including	559	661	613	351	329
– Contributions to defined contribution plans	55	60	67	39	37
Depreciation of property, plant and equipment (note 14)	285	258	202	111	165
Depreciation of right-of-use assets (note 16)	2	2	2	1	1

Cost	273	273	273	273
Accumulated impairment losses	-	-	-	-
Net carrying amount	273	273	273	273

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

19. OTHER NON-CURRENT ASSETS (continued)

Notes: (continued)

(i) Impairment test of goodwill (continued)

In the impairment assessment of the Target Group, goodwill is allocated to cash-generating units ("CGUs") that were expected to benefit from the synergies of the business combination and is allocated to the relevant CGUs. The CGUs are consistent with those used on the purchase dates and in the impairment tests during the Relevant Periods. The carrying amount of the goodwill allocated to CGU are as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Carrying amount of goodwill("Jinshen CGU")	273	273	273	273

The recoverable amount of a CGU has been determined based on value-in-use calculations. The cash flow projections of CGUs are based on management's forecasted cash flows in the next five years. Based on existing production capacity, the Target Group expects cash flows beyond such periods will be similar to that in the fifth year and thus a zero terminal growth rate is utilised in the forecasts. The following describes each of the key assumptions on which management has based its cash flow projections of Jinshen CGU to undertake impairment testing of goodwill during the Relevant Periods:

Forecast period — The basis used to determine the operating period is the remaining exploitable years of the coal mine within Jinshen CGU, taking into account the annual coal production capacity.

Discount rate — The discount rate adopted by the Target Group reflects the specific risks of the relevant asset unit. The pre-tax discount rates used at 31 December 2022, 2023 and 2024 and 31 July 2025 were 10.38%, 10.26%, 9.96% and 10.06%, respectively.

Coal production capacity—According to the mining licence approved by the government, the annual production capacity of Jinshen CGU is 13 million tons per year.

Sales price — The sales price is based on the historical average sales price, adjusted according to future supply and demand forecasts.

According to the impairment assessment, there was no impairment provided for the goodwill for the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2024 and 2025.

(ii) The movements of long-term deferred expenses during the year/period are as follows:

	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2025 RMB million
At the beginning of the year/period	70	63	101	138
Additions	14	77	57	58
Amortisation	(21)	(39)	(20)	(104)
At the end of the year/period	63	101	138	92

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

22. PREPAID EXPENSES AND OTHER CURRENT ASSETS

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets measured at amortised cost				
– Other receivables	783	3,501	3,069	2,360
Less: Impairment losses	51	51	52	52
	732	3,450	3,017	2,308
Prepaid expenses and deposits	38	54	34	21
Deductible VAT and other taxes	1	14	126	69
	771	3,518	3,177	2,398

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets measured at amortised cost				
– Other receivables	1,579	3,433	3,162	2,507
Less: Impairment losses	11	11	11	11
	1,568	3,422	3,151	2,496
Prepaid expenses and deposits	21	-	-	-
Deductible VAT and other taxes	-	3	4	-
	1,589	3,425	3,155	2,496

23. RESTRICTED BANK DEPOSITS

The Target Group

Restricted bank deposits mainly include the mine geographical environment governance recovery fund of coal mines, restoration development deposits and litigation freezing deposits.

The Target Group performed impairment assessment on restricted bank deposits and concluded that the probability of defaults of the counterparty banks is insignificant and accordingly, no allowance for credit losses is provided.

Details of impairment assessment of restricted bank deposits are set out in note 33.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

24. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS

(a) Cash and cash equivalents

The Target Group

Cash and cash equivalents in the consolidated statements of financial position and the consolidated statements of cash flows comprise cash at bank and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with banks and other financial institutions	3,276	757	702	869
Less: Restricted bank deposits	429	662	688	610
Less: Time deposits with original maturity over three months	-	-	-	180
Cash and cash equivalents	2,847	95	14	79

As at the end of each of the Relevant Periods, the Target Group performed impairment assessment on bank balances and concluded that the probability of defaults of the counterparty banks was insignificant and accordingly, no allowance for credit losses is provided. Details of impairment assessment of bank deposits are set out in note 33.2 to the Historical Financial Information.

The Target Company

Cash and cash equivalents in the statements of financial position comprise cash at bank and in hand, and time deposits with original maturity within three months.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deposits with banks and other financial institutions	2,738	21	4	15
Less: Restricted bank deposits	-	-	2	2
Cash and cash equivalents	2,738	21	2	13

As at the end of each of the Relevant Periods, the Target Company performed impairment assessment on bank balances and concluded that the probability of defaults of the counterparty banks was insignificant and accordingly, no allowance for credit losses is provided. Details of impairment assessment of bank deposits are set out in note 33.2 to the Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

24. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS (continued)

(b) Reconciliation of liabilities arising from financing activities

The table below shows the detailed changes in the Target Group's liabilities arising from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are those for which cash flows were, or future cash flows will be, classified in the Target Group's consolidated statements of cash flows as cash flows from financing activities.

	Borrowings RMB million (note 26)	Long-term liabilities RMB million (note 29)	Accrued interest payable RMB million (note 28)	Total RMB million
At 1 January 2022	918	398	-	1,316
Capital element of lease rentals paid	-	(215)	-	(215)
Interest element of lease rentals paid	-	(46)	-	(46)
Interest paid	-	-	(50)	(50)
Repayments of borrowings	(410)	-	-	(410)
Interest accrual	-	-	50	50
At 31 December 2022	508	137	-	645
At 1 January 2023	508	137	-	645
Capital element of lease rentals paid	-	(41)	-	(41)
Interest element of lease rentals paid	-	(46)	-	(46)
Interest paid	-	-	(9)	(9)
Repayments of borrowings	(490)	-	-	(490)
Interest accrual	-	-	9	9
At 31 December 2023 and 1 January 2024	18	50	-	68
Capital element of lease rentals paid	-	-	-	-
Interest element of lease rentals paid	-	(40)	-	(40)
At 31 December 2024	18	10	-	28
At 1 January 2025	18	10	-	28
Capital element of lease rentals paid	-	-	-	-
Interest element of lease rentals paid	-	(10)	-	(10)
At 31 July 2025	18	-	-	18

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

25. DEFERRED TAXATION

The Target Group

For the purpose of the presentation in the consolidated statement of financial position, certain deferred tax assets and liabilities have been offset. The following is the analysis of the deferred tax balances for financial reporting purpose.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Deferred tax assets	82	41	33	29
	82	41	33	29

The following are the major deferred tax assets and liabilities recognised and movements thereon during the year/period:

	1 January 2022 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2022 RMB million
Depreciation of property, plant and equipment	90	(9)	81
Allowance for receivables	-	1	1
Net deferred tax assets	90	(8)	82

	1 January 2023 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2023 RMB million
Depreciation of property, plant and equipment	81	(41)	40
Allowance for receivables	1	-	1
Net deferred tax assets	82	(41)	41

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

25. DEFERRED TAXATION (continued)

The Target Group (continued)

The following are the major deferred tax assets and liabilities recognised and movements thereon during the year/period: (continued)

	1 January 2024 RMB million	Credited/(charged) to profit or loss RMB million	31 December 2024 RMB million
Depreciation of property, plant and equipment	40	(8)	32
Allowance for receivables	1	-	1
Net deferred tax assets	41	(8)	33

	1 January 2025 RMB million	Credited/(charged) to profit or loss RMB million	31 July 2025 RMB million
Depreciation of property, plant and equipment	32	(4)	28
Allowance for receivables	1	-	1
Net deferred tax assets	33	(4)	29

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

26. BORROWINGS

The Target Group

An analysis of the Target Group's borrowings is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Current borrowings:				
Current portion of long-term borrowings	180	-	-	-
	180	-	-	-
Non-current borrowings:				
Long-term borrowings, less current portion	328	18	18	18
	508	18	18	18
Secured	112	-	-	-
Unsecured	396	18	18	18
	508	18	18	18

As at 31 December 2022, 2023 and 2024 and 31 July 2025, the Target Group's borrowings were unsecured and bore interest at rates ranging from 3.60% to 6.80% per annum, 3.60% per annum, 3.60% per annum and 3.60% per annum, respectively.

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
The exposure of the long-term borrowings and the contractual maturity dates:				
Within one year	180	-	-	-
More than five years	328	18	18	18
	508	18	18	18

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

26. BORROWINGS (continued)

The Target Group's long-term borrowings comprise:

		31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Loans from banks and other institutions					
RMB denominated	Interest rate of 10% per annum with maturity of 23 September 2023	180	-	-	-
RMB denominated	Interest rate 6.80% per annum with maturity of 15 January 2025	310	-	-	-
RMB denominated	Interest rate 3.60% per annum	18	18	18	18
		508	18	18	18
Less: Current portion of long-term borrowings		180	-	-	-
		328	18	18	18

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

27. ACCOUNTS PAYABLE

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts payable				
–China Energy Group and associates	8	-	3	12
– Jinneng Holding Group and fellow subsidiaries	57	55	57	15
– Third parties	270	335	275	244
	335	390	335	271

As at the end of each of the Relevant Periods, the ageing analysis of accounts payable, based on invoice date, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	320	350	307	243
One to two years	6	34	11	24
Two to three years	1	1	12	2
More than three years	8	5	5	2
	335	390	335	271

The Target Company

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Accounts payable				
– Jinneng Holding Group and fellow subsidiaries	4,519	3,308	2,714	2,359

As at the end of each of the Relevant Periods, the ageing analysis of accounts payable, based on invoice date, is as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Less than one year	4,497	3,308	2,705	2,340
One to two years	22	-	9	19
	4,519	3,308	2,714	2,359

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

30. ACCRUED RECLAMATION OBLIGATIONS

The Target Group

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
At the beginning of the year/period	653	558	498	440
Accretion expense	11	10	9	5
Accrued reclamation obligations utilised	(106)	(70)	(67)	(13)
At the end of the year/period	558	498	440	432

31. PAID-UP IN CAPITAL

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Registered and paid-up capital	574	574	574	574

32. CAPITAL RISK MANAGEMENT

The Target Group's policy is to maintain a strong capital base so as to maintain investor, creditor and the market and to sustain future development of the business.

The Target Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares to reduce debts.

The Target Group monitors capital using a gearing ratio which is total liabilities divided by total assets. The Target Group aims to maintain the gearing ratio at a reasonable level. The Target Group's gearing ratios as at 31 December 2022, 2023 and 2024 and 31 July 2025 were 19.03%, 13.77%, 14.25% and 7.93%, respectively.

There were no changes in the Target Group's approach to capital management during the Relevant Periods.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS

33.1 Categories of financial instruments

The carrying amounts of each of the following categories of financial assets and financial liabilities at the end of each of the Relevant Periods are set out as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets				
Financial assets at amortised cost	902	876	879	1,032
Financial liabilities				
Amortised cost	1,352	950	1,149	654

33.2 Financial risk management objectives and policies

The Target Group's major financial instruments include accounts and bills receivables, loans and advances to, deposits from and amounts due to China Energy Group and fellow subsidiaries, amounts due from/to associates, other receivables, accounts and bills payables, borrowings, other payables, long-term liabilities and bonds. Details of the financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risk (interest rate), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Market risk

Interest rate risk

The Target Group is exposed to fair value interest rate risk in relation to fixed-rate loan and receivables and borrowings (see note 26).

Credit risk and impairment assessment

As at the end of each of the Relevant Periods, The Target Group did not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets.

Accounts and bills receivables arising from contracts with customers

In order to minimise the credit risk, the management of the Target Group has delegated a team responsible for determination of credit limits and credit approvals. Before accepting any new customer, the Target Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In this regard, the Directors consider that the Target Group's credit risk is significantly reduced.

Bank balances

The credit risks on bank balances are limited because the counterparties are banks with high credit ratings assigned by credit-rating agencies, such as China Construction Bank, Industrial and Commercial Bank of China, Bank of China, China CITIC Bank and Agricultural Bank of China.

Other receivables

Other receivables represent a pledge and guarantee deposit, dividend receivables. The pledge and guarantee deposit is paid for regular businesses. The dividend receivables relate to the investments of the Target Company. Thus, the credit risk on other receivables are limited.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

The table below detail the credit risk exposures of the Target Group's financial assets and financial guarantee contracts, which are subject to ECL assessment:

	Notes	External credit rating	12-month or lifetime ECL	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Financial assets at amortised costs							
Restricted bank deposits	23	N/A	12-month ECL	429	662	688	610
Cash and cash equivalents and time deposits	23	N/A	12-month ECL	2,847	95	14	259
Other receivables	21	N/A	12-month ECL	783	3,501	3,069	2,360
			Credit-impaired	(51)	(51)	(52)	(52)
Accounts receivable (note)	20	N/A	Provision matrix	100	44	30	61
			Credit-impaired	(25)	(26)	(26)	(25)

Note:

For accounts receivable, the Target Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. Except for debtors with credit-impaired, the Target Group determines the ECL on these items by using a provision matrix, grouped by age of debtor.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Provision matrix – age of debtor

As part of the Target Group's credit risk management, the Target Group uses age of debtor to assess the impairment for its receivables from customers in relation to its sales of coal and transportation services because these customers consist of a large number with common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The following table provides information about the exposure to credit risk for accounts receivables which are assessed based on provision matrix as at the end of each of the Relevant Periods within lifetime ECL (not credit-impaired). Accounts receivable with credit-impaired with gross carrying amounts of RMB100 million, RMB44 million, RMB30 million and RMB61 million as at 31 December 2022, 2023 and 2024 and 31 July 2025, respectively, were assessed individually.

Gross carrying amount

	Average loss rate 31 December 2022	Accounts receivable 31 December 2022 RMB million	Average loss rate 31 December 2023	Accounts receivable 31 December 2023 RMB million	Average loss rate 31 December 2024	Accounts receivable 31 December 2024 RMB million	Average loss rate 31 July 2025	Accounts receivable 31 July 2025 RMB million
Current (not past due)	-	-	-	-	-	-	-	-
Less than one year past due	-	-	-	-	-	-	-	-
One to two years past due	-	-	-	-	-	-	-	-
Two to three years past due	80%	-	-	-	-	-	-	-
More than three years past due	97%	100	97%	44	97%	30	97%	61
		100		44		30		61

The estimated loss rates are estimated based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

During the year ended 31 December 2022, 2023 and 2024 and for the seven months ended 31 July 2024 and 2025, the Target Group provided RMB1 million, RMB6 million and RMB1 million impairment allowance for accounts receivable and reversed RMB1 million, based on the provision matrix.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Gross carrying amount (continued)

The following table shows the movement in lifetime ECL that has been recognised for accounts receivable under the simplified approach.

	Lifetime ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	24	-	24
Impairment losses recognised	1	-	1
As at 1 January 2023	25	-	25
Impairment losses recognised	6	-	6
Write-offs	(5)	-	(5)
As at 1 January 2024	26	-	26
Impairment losses recognised	-	-	-
As at 1 January 2025	26	-	26
Impairment losses reversed	(1)	-	(1)
As at 31 July 2025	25	-	25

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Credit risk and impairment assessment (continued)

Gross carrying amount (continued)

The following tables show reconciliation of loss allowances that has been recognised for other receivables and other loans.

	12-month ECL (not credit-impaired) RMB million	Lifetime ECL (credit-impaired) RMB million	Total RMB million
As at 1 January 2022	50	-	50
– Impairment losses recognised	1	-	1
As at 1 January 2023	51	-	51
– Impairment losses recognised	-	-	-
As at 1 January 2024	51	-	51
– Impairment losses recognised	1	-	1
As at 1 January 2025	52	-	52
– Impairment losses recognised	-	-	-
As at 31 July 2025	52	-	52

Liquidity risk

Liquidity risk is the risk that the Target Group will not be able to meet its financial obligation as they fall due. The approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Target Group's reputation.

The Target Group closely monitors cash flow requirements and optimising its cash return. The Target Group prepares cash flow forecasts and ensures it has sufficient cash for the servicing of operation, financial and capital obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

The following table details the remaining contractual maturity of the Target Group's financial liabilities at the end of each of the Relevant Periods, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Target Group can be required to pay:

	31 December 2022						
	Weighted average interest rate	On demand or less than 1 year RMB million	1 – 2 years RMB million	2 – 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	319	6	1	8	334	334
Borrowings fixed interest rate	3.60%-6.8%	508	-	-	-	508	508
	-	827	6	1	8	842	842

	31 December 2023						
	Weighted average interest rate	On demand or less than 1 year RMB million	1 – 2 years RMB million	2 – 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	350	34	1	5	390	390
Borrowings fixed interest rate	3.60%	18	-	-	-	18	18
	-	368	34	1	5	408	408

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.2 Financial risk management objectives and policies (continued)

Liquidity risk (continued)

	31 December 2024						
	Weighted average interest rate	On demand or less than 1 year RMB million	1 to 2 years RMB million	2 to 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	307	11	12	5	335	335
Borrowings fixed interest rate	3.60%	18	-	-	-	18	18
	-	325	11	12	5	353	353

	31 July 2025						
	Weighted average interest rate	On demand or less than 1 year RMB million	1 to 2 years RMB million	2 to 5 years RMB million	More than 5 years RMB million	Total undiscounted cash flows RMB million	Total carrying amount RMB million
Financial liabilities:							
Accounts and bills payables, other payables, lease liabilities and long-term liabilities	-	280	24	2	2	308	308
Borrowings fixed interest rate	3.60%	18	-	-	-	18	18
	-	298	24	2	2	326	326

Saved as discussed above, the Target Group also makes use of banks and financial institution facilities as one of the effective sources of liquidity.

33.3 Fair value measurements

Fair values of the Target Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

There were no transfer between Level 1, Level 2 and Level 3 during the years ended 31 December 2022, 2023 and 2024, and the seven months ended 31 July 2024 and 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

33. FINANCIAL INSTRUMENTS (continued)

33.3 Fair value measurements (continued)

Fair values of financial assets and financial liabilities that are not measured at fair value on a recurring basis

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the Historical Financial Information approximate their fair values:

	31 December 2022		31 December 2023		31 December 2024		31 July 2025	
	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million	Carrying amount RMB million	Fair value RMB million
Financial liabilities:								
Fixed rate bank borrowings	508	506	18	18	18	18	18	18

The fair values of fixed rate bank borrowings above in the Level 2 category are measured using discounted cash flow method where the future cash flows are estimated based on the contract and discounted at a rate that reflects the credit risk of the issuers.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

34. COMMITMENTS AND CONTINGENT LIABILITIES

34.1 Capital commitments

As at the end of each of the Relevant Periods, the Target Group had capital commitments for land, buildings and mining rights, exploration and evaluation assets, equipment and other as follows:

	31 December 2022 RMB million	31 December 2023 RMB million	31 December 2024 RMB million	31 July 2025 RMB million
Contracted for but not provided				
– Equipment	7	404	144	330
– Other	73	35	17	16
	80	439	161	346

34.2 Legal contingencies

The Target Group is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Target Group.

34.3 Environmental contingencies

To date, the Target Group has not incurred any significant expenditure for environmental remediation, is currently not involved in any environmental remediation, and apart from the provision for land reclamation costs, has not accrued any further amounts for environmental remediation relating to its operations. Under the existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Target Group. The regulatory bodies, however, have moved, and may move towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Target Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to coal mines and land development areas, whether operating, closed or sold; (ii) the extent of required cleanup efforts; (iii) varying costs of alternative remediation strategies; (iv) changes in environmental remediation requirements; and (iv) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under future environmental legislation cannot reasonably be estimated at present, and could be material.

35. EMPLOYEE BENEFIT PLANS

The Target Group participates, in line with the regulations of the PRC, mainly in various defined contribution retirement plans organised by municipal and provincial governments for its employees. The Target Group is required to make contributions to the retirement plans at a certain proportion of the salaries, bonuses and certain allowances of the employees. In addition, as approved by the government, the Target Group makes contribution to a supplemental defined contribution pension plan for its employees. The fund is managed by a qualified fund manager. The Target Group has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Target Group's contributions for the years ended 31 December 2022, 2023 and 2024, and the seven months ended 31 July 2024 and 2025 were RMB55 million, RMB60 million, RMB67 million, RMB39 million and RMB37 million, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS

36.1 Transactions with Jinneng Holding Group and China Energy Group, fellow subsidiaries, and associates of the Target Group

The Target Group is controlled by Jinneng Holding Group, China Energy Group has significant influence on the Target Group as the second largest shareholder. The Target Group has significant transactions and relationships with Jinneng Holding Group and China Energy Group, subsidiaries of Jinneng Holding Group ("fellow subsidiaries"), and subsidiaries of China Energy Group ("associates"). Related parties refer to enterprises over which Jinneng Holding Group or China Energy Group is able to exercise significant influence or control. The Target Group also has entered into transactions with its associates, over which the Target Group can exercise significant influence.

The Target Group had the following transactions with Jinneng Holding Group and China Energy Group, subsidiaries of Jinneng Holding Group ("fellow subsidiaries"), and subsidiaries of China Energy Group ("associates"), and associates of the Target Group that were carried out in the normal course of business during the years ended 31 December 2022, 2023 and 2024 and seven months ended 31 July 2024 and 2025.

Transactions with China Energy	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income	(i)	-	-	-	-	-
Purchases of ancillary materials and spare parts	(ii)	-	-	-	-	23
Ancillary and social services	(iii)	-	-	8	2	20
Sale of coal	(iv)	5,607	5,521	3,030	1,983	1,768
Purchase of equipment and construction work	(ii)	35	20	16	11	-

Transactions with Jinneng Holding Group	Notes	Year ended 31 December 2022 RMB million	Year ended 31 December 2023 RMB million	Year ended 31 December 2024 RMB million	Seven months ended 31 July 2024 RMB million (unaudited)	Seven months ended 31 July 2025 RMB million
Interest income	(i)	-	6	4	2	1
Purchases of ancillary materials and spare parts	(ii)	1	383	31	31	-
Ancillary and social services	(iii)	21	17	25	14	17
Sale of coal	(iv)	6	2	10	6	3
Purchase of equipment and construction work	(ii)	274	302	467	222	53

(i) Interest income represents interest earned from deposits in fellow subsidiaries. The applicable interest rate is determined in accordance with the prevailing interest rates published by the PBOC.

(ii) Purchases of ancillary materials and spare parts represent purchase of materials and utility supplies related to the Target Group's operations from Jinneng Holding Group and China Energy Group, fellow subsidiaries and associates.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION
36. RELATED PARTY TRANSACTIONS (continued)

36.1 Transactions with Jinneng Holding Group and China Energy Group, an associate of Jinneng Holding Group and China Energy Group, fellow subsidiaries, and associates of the Target Group (Continued)

(iii) Ancillary and social services represent expenditures for social welfare and support services such as property management, water and electricity supply, and canteen expense paid to Jinneng Holding Group and China Energy Group, fellow subsidiaries and associates..

(iv) Sale of coal represents income from sale of coal to Jinneng Holding Group and China Energy Group, fellow subsidiaries and associates..

(v) Purchase of equipment and construction work represents expenditure related to equipment and construction service provided by Jinneng Holding Group and China Energy Group, fellow subsidiaries and associates.

The directors are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and in accordance with the agreements governing such transactions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

36. RELATED PARTY TRANSACTIONS (continued)

36.1 Transactions with Jinneng Holding Group and China Energy Group, an associate of Jinneng Holding Group and China Energy Group, fellow subsidiaries, and associates of the Target Group (Continued)

Amounts due from/to Jinneng Holding Group and China Energy Group, fellow subsidiaries, and associates of the Target Group:

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION OF CHINA ENERGY GROUP BAOTOU MINING COMPANY LIMITED TO THE DIRECTORS OF CHINA SHENHUA ENERGY COMPANY LIMITED

Introduction

We report on the historical financial information of China Energy Group Baotou Mining Company Limited (the "Target Company") and its subsidiaries except for the Excluded Businesses as defined in note 2.1 to the Historical Financial Information (together, the "Target Group") set out on pages II-I-3 to II-I-87, which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Target Group for each of the years ended 31 December 2022, 2023 and 2024 and the seven months ended 31 July 2025 (the "Relevant Periods"), and the consolidated statements of financial position of the Target Group and the statements of financial position of the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages II-I-3 to II-I-87 forms an integral part of this report, which has been prepared for inclusion in the circular of China Shenhua Energy Company Limited ("China Shenhua") dated 24 December 2025 (the "Circular") in connection with the proposed acquisition by China Shenhua (the "Acquisition").

Directors' responsibility for the Historical Financial Information

The directors of the Target Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion
In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Target Group and the Target Company as at 31 December 2022, 2023 and 2024 and 31 July 2025 and of the financial performance and cash flows of the Target Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Review of interim comparative financial information
We have reviewed the interim comparative financial information of the Target Group which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the seven months ended 31 July 2024 and other explanatory information (the "Interim Comparative Financial Information"). The directors of the Target Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments
In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page II-I-3 have been made.

Dividends
We refer to note 13 to the Historical Financial Information which states that no dividends have been paid by the Target Company in respect of the Relevant Periods.
