VOLUNTARY ANNOUNCEMENT
LATEST BUSINESS DEVELOPMENTS

This announcement is made by Unisound AI Technology Co., Ltd. (the "**Company**") on a voluntary basis to inform the shareholders and potential investors of the Company of its latest business developments.

Recently, leveraging the leading technological advantages of our expert large model for the medical sector, "UniGpt Medical Large Model", our full-stack service capabilities including big data governance, as well as our deep understanding of policies, regulations, and business characteristics in the medical insurance industry, the Company has successfully secured in-depth cooperations with the Jiangsu Healthcare Security Bureau, the Health Commission of Shijiazhuang, and the Health Commission of Jinshui District, Zhengzhou City in areas including medical insurance vertical large models, regional healthcare quality management and intelligent hospital information construction, with a total cooperation amount exceeding RMB20 million.

These cooperations not only demonstrate the technological strength and service capabilities of the Company in the field of medical digitalization, extend the application scenarios of our medical large model from single scenario to a full-process management system, and upgrade from standalone hospital cooperations to regional integrated services, they also signify that the large model services of the Company have fully evolved from application system output to a more fundamental and core model capability output, providing in-depth technical support for the intelligent and refined upgrade of the medical insurance industry.

Since we have been deeply engaged in empowering the intelligent upgrade of China's healthcare industry, the Company has leveraged technology to address the pain points of poor management efficiency and weak collaboration in the traditional medical system, and improve the efficacy of healthcare quality and safety control. While forging in-depth partnerships with numerous Class-III Grade-A hospitals, the Company also promotes the deep integration of large models with

clinical operations in hospitals within our district, accelerating the intelligent upgrade of services and management. Going forward, the Company will be adhering to national strategies, take technological innovation as the driving engine, strategically focus on the intelligent healthcare sector, improve regional intelligent healthcare solutions, continuously expand our business operations, and create greater industrial and social value.
