II. STATISTICS BASED ON REGIONAL DISTRIBUTION

Unit: billion Yuan Currency: RMB

Regional distribution	Value of newly-signed contracts	Increase/ decrease over same period last year
Domestic	184.806	-35.71%
Overseas	91.390	-9.91%
Total	276.196	-28.98%

To actively respond to the adverse impacts of changes in the domestic market environment and international regional conflicts, the Company adhered to implementing the requirements of high-quality development from the source of operation, conformed to the global trend of green and low-carbon development in energy, seized major development opportunities such as the new energy security strategy, the "dual carbon" strategy and the construction of an energy powerhouse, focused on the core businesses of energy and power and water conservancy, and continuously optimized the business structure. In the first quarter of 2026, the proportion of contracts signed for domestic energy and power business to the total contracts signed for domestic business increased from 65.2% in the same period of the previous year to 79.4%, and its market share remained among the top in the industry; the amount of contracts signed for domestic survey, design and consulting business increased by 45.5% year-on-year, and its proportion to the total contracts signed for domestic business increased from 2.1% in the same period of the previous year to 4.8%; the amount of contracts signed for domestic water conservancy business increased by 236.6% year-on-year. The Company adhered to the business philosophy of "prioritizing spot exchange and focusing on major spot exchange". The proportion of contracts signed for domestic spot exchange business increased from 78.0% in the same period of the previous year to 99.6%, and the proportion of contracts signed for overseas spot exchange business increased from 80.8% in the same period of the previous year to 96.1%.

Next, the Company will focus on the main line of high-quality development, concentrate on main responsibilities and main businesses, and fully leverage advantages of high-end think tanks and planning & design leadership, advantages in energy technology innovation and talent team, advantage of full industrial chain integration, advantage of "Energy +" integrated development and advantage of international layout. On the basis of vigorously promoting the high-end, intelligent and green transformation and upgrading of traditional advantageous businesses, and consolidating the foundation of production and operation, the Company will vigorously cultivate emerging industries and future industries in key areas such as new energy storage, computing and power coordination, green hydrogen-based energy, artificial intelligence and controllable nuclear fusion, and accelerate the development of the "second growth curve". Meanwhile, the Company will continue to focus on the spot exchange projects, and improve cash flow and operational efficiency by enhancing contract conversion and collection efficiency.

The above-mentioned information is preliminary statistics. Since there are uncertainties, the above-mentioned information may vary from the information to be disclosed in the periodic reports.
