Note:

The premium income stated in the above table are data under "Accounting Standards for Business Enterprises ("**ASBE**") No. 25 – Direct Insurance Contracts", "ASBE No. 26 – Reinsurance Contracts" (Caikuai [2006] No. 3) and "Regulations regarding the Accounting Treatment of Insurance Contracts" (Caikuai [2009] No. 15). The net investment yield, comprehensive investment yield, average net investment yield for the recent three years and average comprehensive investment yield for the recent three years are data under "ASBE No. 22 – Recognition and Measurement of Financial Instruments" (Caikuai [2006] No. 3) and other standards on financial instruments and calculated in accordance with the formulas specified in the "Solvency Regulatory Rules for Insurance Companies No. 18: Solvency Report".

The indicators for net profit, total assets, total equity and insurance contract liabilities are disclosed based on the data from the financial report of the Company for the first quarter of 2026 (which is prepared in accordance with "ASBE No. 22 – Recognition and Measurement of Financial Instruments" (Caikuai [2017] No. 7), "ASBE No. 25 – Insurance Contract" (Caikuai [2020] No. 20) and other ASBE). Basic earnings per share, total equity yield and total assets yield are calculated based on the results of the above indicators and in accordance with the formulas specified in the "Solvency Regulatory Rules for Insurance Companies No. 18: Solvency Report". The formulas are as follows:

Total equity yield = Net profit ÷ [(Total equity at the beginning of the period + Total equity at the end of the period) ÷ 2] × 100%

Total assets yield = Net profit ÷ [(Total assets at the beginning of the period + Total assets at the end of the period) ÷ 2] × 100%

Net investment yield = (Investment income + Fair value changes gains/losses + Foreign exchange gains/losses – Impairment loss of investment assets – Taxes and surcharges of investment – Interest expense) ÷ Average balance of funds application during the reporting period × 100%

Comprehensive investment yield = (Investment income + Fair value changes gains/losses + Foreign exchange gains/losses + Net change in fair value of financial assets available for sale – Impairment loss of investment assets – Taxes and surcharges of investment – Interest expense) ÷ Average balance of funds application during the reporting period × 100%

13-month persistency rate = (Number of in-force long-term life insurance policies at the end of the comparable quarter of the previous year that remain in force at the end of the current quarter ÷ Number of in-force long-term life insurance policies at the end of the comparable quarter of the previous year) × 100%

Comprehensive surrender rate = (Surrender payment + Surrender payment of insured reserves and investment funds + Surrender payment of the separate accounts of investment-linked insurance) ÷ (Opening balance of long-term insurance reserves + Opening balance of insured reserves and investment funds + Opening balance of separate account liabilities + Written premiums for the year) × 100%

(4) Net/(Comprehensive) Investment Yield for the Recent Three Years

The average net investment yield and the average comprehensive investment yield of the Company for the recent three years were 3.93% and 4.84%, respectively.

4. RISK MANAGEMENT CAPABILITY

(1) Type of the Company

1) In accordance with the requirements under Article 5 and Article 6 of the "Solvency Regulatory Rules for Insurance Companies No. 12: Solvency Aligned Risk Management Requirements and Assessment" with respect to the criteria for classification of companies, the Company is a Type I insurance company.

2) The Company is a life insurance company established in Beijing, China on June 30, 2003 according to the Company Law and the Insurance Law of the People's Republic of China, and was listed overseas in December 2003 and returned to the domestic A-share market for listing in January 2007.

3) In 2025, the Company had written premiums of RMB938,600 million (unaudited), total assets of RMB7,399,355 million and 36 provincial branches.

(2) Assessment Results of the Recent Solvency Aligned Risk Management Requirements and Assessment

The Former CBIRC conducted an assessment of Solvency Aligned Risk Management Requirements and Assessment (SARMRA) on the Company in 2022. According to the "Letter of Opinions from the Solvency Supervision Department of the CBIRC Regarding the 2022 SARMRA On-site Assessment of China Life Insurance Company Limited" (Yin Bao Jian Chang Fu [2023] No. 14), the Company got a score of 84.83 in the 2022 assessment and the respective scores in nine areas are as follows:17.05 in the foundation and environment of risk management, 8.01 in the objectives and tools of risk management, 8.5 in insurance risk management, 8.33 in market risk management, 8.5 in credit risk management, 8.38 in operational risk management, 8.74 in strategic risk management, 8.6 in reputational risk management, and 8.72 in liquidity risk management.

(3) Measures for the Improvement of Risk Management Adopted During the Reporting Period and Their Progress

Firstly, the Company consistently strengthened the development of its risk management system. It further enhanced its emergency management capabilities, standardized risk management mechanisms, and improved the comprehensive risk management system. In response to new circumstances, the Company strengthened country risk emergency management to improve its ability to handle extreme risks. Simultaneously, in alignment with actual management practices, the Company consistently conducted systematic and rigid control work on a long-term basis, continuously improving the systematization and intelligence level of risk prevention and control. The Company continued its awareness-raising and education initiatives on anti-money laundering, prevention of illegal fundraising, risk management and compliance, strengthened risk and compliance awareness among all levels of staff, and vigorously fostered an enterprise-wide culture of risk management and compliance.

Secondly, the Company further enhanced the efficiency in normal risk monitoring and early warning, stepped up efforts on risk analysis, monitoring and early warning, as well as tracking and assessment in major areas of concern. In the meantime, the Company kept on reinforcing its actions on research, analysis, monitoring and screening with respect to, among others, sales risk, investment risk and money laundering risk, so as to reveal, manage and control relevant risks in a timely manner.

Thirdly, the Company continued to advance the digital and intelligent transformation of risk control. On one hand, it further promoted the application of artificial intelligence, large models and other technologies in risk prevention and control, constructed more scientific and rigorous monitoring and early-warning models, and created a precise, moderate, flexible, and efficient risk early-warning system, thereby continuously enhancing the accuracy of risk positioning, management and control. On the other hand, it deepened the digital services and intelligent applications for anti-money laundering, further improved the efficiency of centralized operations, and strengthened the "four-early" capabilities of risk control – namely "early identification, early warning, early exposure and early disposal" – through refined and penetrating oversight, thereby reinforcing the risk-control safeguards underpinning the high-quality development of the Company.

(4) Self-assessment on Risk Management

The Company continued to proceed with rectification and upgrading measures, sorted out and refined all existing issues on an individual basis, stepped up its efforts to rectify such issues, and continuously enhanced its capability of risk management, after making reference to the assessment opinions of the Former CBIRC's inspection in 2022 and the Company's self-assessment results in 2025, and taking into account the actual situation of its risk management.

5. INTEGRATED RISK RATING (IRR) (CLASSIFICATION REGULATION)

(1) Information of the Company's IRR

To date, according to the C-ROSS Supervision Information System of the NFRA, the results of the IRR of the Company in the second quarter and the third quarter of 2025 were both AAA Category.

(2) Self-assessment on Risks

The Company conducts an assessment on the insurance risk, market risk, credit risk, strategic risk, operational risk, reputational risk, liquidity risk and other risks faced by it on a quarterly basis, and a comprehensive risk management quarterly report will be prepared and submitted to the President's Office of the Company for review.

For strategic risk, the Company focused on conducting proper analysis on macro environment and policies, made accurate risk assessment and identification, and prepared a report of the management team of the Company on business operation and management every quarter and an evaluation report on the implementation of medium- to long-term planning every year through the regular monitoring and evaluation of strategic plan implementation, to strengthen the management of strategic risk. In general, the business structure and quality of the Company continued to stay healthy.

For operational risk, the Company consistently optimized the development of three management tools, namely loss data room for operational risk, self-assessment on operational risk, and key risk indicators, further strengthened the construction of intelligent risk prevention and control, and promoted operational risk management by technological means to build an operational risk management system featuring full chain, which fully improved the efficiency in the management and control of operational risks. The Company also conducted the collection and analysis of operational risk events as well as key risk indicators monitoring on a quarterly basis.

For reputational risk, the Company consistently monitored public opinions around the clock for seven days a week, and strengthened its efforts to analyze public opinions by actively grasping their main characteristics and development trends, in order to seize the initiative to address the public opinions. The public opinions on the Company remained stable in general and there was no major incident of reputational risk for the Company in this quarter.

For liquidity risk, the Company monitored the regulatory indicators and monitoring indicators for liquidity risk on a quarterly basis and carried out stress tests on cash flows in accordance with the requirements under the "Solvency Regulatory Rules for Insurance Companies No. 13: Liquidity Risk". The Company constantly stepped up its effort in liquidity risk management pursuant to the regulatory requirements and its own regulations, and the liquidity risk of the Company remained at a lower level.

7. MANAGEMENT ANALYSIS AND DISCUSSION

(1) Change of Solvency Ratios and the Reasons therefor

As at March 31, 2026, the core solvency ratio and comprehensive solvency ratio of the Company were 156.87% and 202.31%, respectively, representing increases of 28.10 percentage points and 28.30 percentage points as compared to those as at the end of the previous quarter. The main reason for the change is divided into two aspects:

Firstly, actual capital increased by RMB195,145 million from the end of the previous quarter, as a result of which the comprehensive solvency ratio increased by 32.33 percentage points. In particular, admitted assets rose by RMB453,308 million from the end of the previous quarter, which was primarily due to an increase of RMB479,573 million in investment assets; and admitted liabilities rose by RMB258,163 million from the end of the previous quarter, which was mainly attributable to an increase of RMB248,291 million in reserve liabilities.

Secondly, the minimum capital increased by RMB12,003 million from the end of the previous quarter, as a result of which the comprehensive solvency ratio decreased by 4.03 percentage points. In particular, the minimum capital for insurance risk increased by RMB2,260 million, the minimum capital for market risk increased by RMB18,220 million, and the minimum capital for credit risk decreased by RMB5,460 million.

In general, the core solvency ratio and comprehensive solvency ratio of the Company are well above the regulatory requirements, and the Company has sufficient solvency.

(2) Change of Regulatory Indicators for Liquidity Risk and the Reasons therefor

At the end of the first quarter of 2026, the regulatory indicators for liquidity risk of the Company were conformed to the regulatory standards. There was no significant change in the liquidity coverage ratio as compared to that of the previous quarter. Backtracking of net cash flow from operating activities has shown positive deviation, and the cumulative net cash flow as at the end of first quarter amounted to RMB-8,275 million. Pursuant to the provisions of the "Solvency Regulatory Rules for Insurance Companies No. 13: Liquidity Risk" and the relevant requirements, the Company has established a well-developed liquidity risk management mechanism to monitor various regulatory indicators for liquidity risk on a quarterly basis, with a view to preventing liquidity risk in an effective manner.

(3) Analysis of the Change in the IRR Results

According to the C-ROSS Supervision Information System of the NFRA, the result of the IRR of the Company in the third quarter of 2025 was AAA Category, which was maintained at A Category for 30 consecutive quarters and remained stable.

(4) Analysis of the Key Risks Faced by the Company

In light of the financial environment and capital market, and after taking into account the measures adopted and initiatives taken by it in respect of risks, the Company conducted a comprehensive analysis of the key risks affecting solvency, with the specific details as follows:

Currently, the development of the industry is navigating an increasingly complex and challenging external environment. The heightened tensions in US-Iran conflict have exacerbated economic uncertainty, impacting households' demand for insurance products. Long-term interest rates persist at historically low levels, the equity markets are subject to volatile trends, and the low-interest-rate environment continues, accelerating the reshaping of the industry's operational model. Achieving efficient asset-liability interaction, advancing refined management, and driving product and service innovation are all major challenges facing the industry. In terms of investment returns, achieving a balance and integration between asset safety and returns in a low-interest-rate environment remains a work in progress, necessitating further refinement. The pace of high-quality development also requires acceleration. Moreover, the personal insurance sector is contending with frequent incidents of negative public opinion, which are rapidly and widely disseminated via self-media, and the number of industry complaints continues to rise. In this context, as a leading enterprise in the industry, the Company faces heightened challenges in managing reputational risks, which are becoming increasingly unpredictable, contagious, and external in nature.
