VOLUNTARY ANNOUNCEMENT LATEST BUSINESS DEVELOPMENTS

This announcement is made by Unisound AI Technology Co., Ltd. (the "**Company**") on a voluntary basis to inform the shareholders and potential investors of the Company of its latest business developments.

Recently, by leveraging its solid technological accumulation in large medical models and its profound understanding of various business scenarios and relevant laws and regulations in the medical industry, the Company has successively won bids for large medical model projects from several Grade A Class 3 hospitals, including Henan Cancer Hospital, Changzhou Hospital of Traditional Chinese Medicine, and The Eighth Affiliated Hospital of Sun Yat-sen University, making a strong breakthrough in the industry competition and fully demonstrating the Company's core competitiveness in the AI medical field.

With the successive implementation of several benchmark hospital projects, the cumulative scale of the Company's commercialized large medical model projects has been continuously increasing. This move signifies that the Company's large medical model has advanced from pilot applications in specific scenarios to the output of mature, replicable, and scalable industrial implementation capabilities, setting a benchmark for the commercial application of large vertical medical models. Subsequently, the Company will continue to deeply cultivate the field of large vertical medical models. By focusing on core scenarios such as AI-powered medical record quality control, medical insurance fund supervision, automatic generation of medical record documents, and refined hospital management, the Company will continuously refine its intelligent application solutions to empower medical institutions to improve quality and efficiency with its core AI technology, and maintain its leading position in the commercialization of large medical models.
