VOLUNTARY ANNOUNCEMENT
STRATEGIC COOPERATION FRAMEWORK AGREEMENT IN RELATION TO THE GREEN POWER ENERGY BUSINESS

This announcement is published by Acme International Holdings Limited (the "**Company**", together with its subsidiaries, the "**Group**") on a voluntary basis to keep the shareholders of the Company (the "**Shareholders**") and potential investors informed of the latest business development of the Group.

The board of directors (the "**Board**") of the Company is pleased to announce that on 28 May 2026, Green Global Development Limited ("**Green Global**"), a wholly-owned subsidiary of the Company, and LONGi Solar Technology Co., Ltd.* (隆基樂葉光伏科技有限公司) ("**LONGi**") have entered into a cooperation framework agreement (the "**Cooperation Agreement**"), pursuant to which the parties intend to establish a strategic partnership on green power energy projects and related product supply in Southeast Asia and Oceania.

INFORMATION ON LONGi

LONGi is a subsidiary of LONGi Green Energy Technology Co., Ltd.* (隆基綠能科技股份有限公司), which is one of the global leading solar energy technology companies, with businesses covering monocrystalline silicon wafers, cells and modules, distributed photovoltaic solutions, centralized power plant solutions, hydrogen energy equipment and other areas, and ranks among the top in global module shipments.

THE COOPERATION AGREEMENT

According to the Cooperation Agreement, the parties intend to cooperate in the field of green power energy projects, including but not limited to investment, construction, operation, and supply of related products for solar power and energy storage projects in Southeast Asia and Oceania (including New Zealand, Australia, and Pacific Island nations). The parties' cooperation is anticipated to include solar power projects with a total scale of more than 300MW and energy storage project capacity of more than 60MW/240MWh. Depending on the respective project requirements, the subsidiaries or partners of Green Global will negotiate and enter into specific technical service, equipment procurement or supply agreements with LONGi.

Pursuant to the Cooperation Agreement, LONGi will provide necessary support to Green Global's projects in the regions where it operates and will prioritise Green Global's service and product needs for related projects. The parties shall enter into a formal agreement in respect of the specific terms of cooperation, including price, quantity, delivery arrangements and technical specifications.

REASONS FOR AND BENEFITS OF ENTERING INTO THE COOPERATION AGREEMENT

The Group has been actively developing business and exploring investment opportunities in the green power energy sector by continuously advancing its power generation and energy storage projects as well as the related EPC service business in the Southeast Asia and Oceania regions. The Board believes that the entering into of the Cooperation Agreement by the Group will facilitate a cooperation framework with an industry partner with leading market position and technical strength, thereby advancing the development of the Group's green power energy business.

The Board also believes that LONGi has extensive experience and technological advantages in photovoltaic product research and development, manufacturing and global supply, and can provide the Group with industrial resources and technical support for expanding green power energy projects. The proposed cooperation is expected to allow the Group to leverage the technology, product supply, and service support of LONGi in photovoltaics and related green power energy products, thereby enhancing the Group's capabilities in regional green power energy market expansion, project implementation and supply chain synergy, and further optimising the supply chain of the Group. In particular, the solar power generation projects in the Philippines and the distributed project portfolio in New Zealand covered by the Cooperation Agreement have a total capacity of over 300MW, which will assist the Group in accelerating the development of its regional project portfolio and is in line with the long-term business development strategy of the Group and in the best interests of the Company and its Shareholders as a whole.

Save as to certain provisions in relation to the confidentiality, governing law and jurisdiction, the Cooperation Agreement is not legally binding on the parties. The cooperation between the parties is subject to further negotiation and the entering into of a formal agreement by the parties. As of the date of this announcement, the Group and LONGi have not entered into any formal and binding agreement regarding the cooperation described in the Cooperation Agreement. The Company will make further announcement(s) regarding the entering into of any formal cooperation agreement as and when appropriate in compliance with the Listing Rules.

Shareholders and potential investors are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Acme International Holdings Limited
Kwan Kam Tim
Chairman and Executive Director

Hong Kong, 28 May 2026

As at the date of this announcement, the Board comprises six members, of which Mr. Kwan Kam Tim, Mr. Yip Wing Shing and Mr. Zhang Guangying are the executive Directors; and Prof. Hon. Lau Chi Pang, BBS, J.P., Mr. Chin Wai Keung Richard and Prof. Mo Lai Lan are the independent non-executive Directors.
