The board of directors (the "**Board**") of the Company wishes to inform the shareholders and potential investors of the Company that, based on the preliminary assessment on the latest available financial information of the Group, the Group expects to record an increase of not less than 30% in operating profit and profit attributable to equity shareholders of the unaudited consolidated financial results for the year ended 31 March 2026 (the "**Year**"), as compared to that for the year ended 31 March 2025.

Based on the information currently available to the Board, the increase in profit is expected to be primarily attributable to the following factors:

In the second half of the Year, AI-related server products, including application-specific integrated circuit (ASIC), have commenced their bulk delivery, which has been reflected in the results of the Group. During the Year, AI-related products have accounted for over 10% of the Group's revenue from its server enclosures segments, which has become one of the key drivers of the growth in turnover and profit of the Group.

(II) Production capacity expansion and operational improvements in Thailand

During the Year, the continued capacity expansion and operational improvements at the production bases in Thailand has been progressing smoothly, demonstrating the Group's ability to respond swiftly to the needs of international branded clients and clients in the AI sector, and further enhancing the Group's delivery capabilities, operational efficiency and supply chain resilience.
