The Group recorded a profit of RMB185.4 million, successfully turning losses into profits, and has now entered an accelerated phase of profitable growth with enhanced certainty and value realization. The Company's medical aesthetics business has become its largest pillar, driven by the synergistic development of blockbuster products and new growth drivers. This segment generated revenue of RMB1,485.3 million, a substantial year-on-year increase of 99.6%, accounting for 57% of total revenue and exceeding the 50% mark for the first time. The Company's self-developed, flagship regenerative medical aesthetics products have received successive marketing approvals and are undergoing rapid commercialization. Furthermore, through an investment in Swiss company Suisselle, the Group has entered the European medical aesthetics market via an "overseas investment + resource integration" model, accelerating its global expansion. The innovative drug business is also accelerating its value realization, with revenue growth more than doubling year-on-year. This business has entered a full-scale commercialization harvest period, achieving continuous breakthroughs in research and development, market launch, and National Reimbursement Drug List (NRDL) inclusion. Against this backdrop, the share purchases under the share award scheme are conducive to stabilizing the core team and strengthening long-term incentives. This initiative is highly aligned with the Company's established profit inflection point and the stage of sustainable high growth, providing strong support for the continuous execution of the Group's strategy and the enhancement of shareholder value. Looking ahead, with the further consolidation of the full medical aesthetics product matrix and global competitive advantages, coupled with the continued volume growth from the commercialization of innovative drugs, the Group possesses ample momentum for long-term development.
