# VOLUNTARY ANNOUNCEMENT SIGNING OF SALES CONTRACT FOR DRIVERLESS LOGISTICS VEHICLES

This announcement is made by Minieye Technology Co., Ltd (the "**Company**", together with its subsidiaries, the "**Group**") on a voluntary basis.

The board of directors (the **"Board**") of the Company is pleased to announce that the Group has recently formally entered into the Product Sales Contract for Driverless Logistics Vehicles (the "**Sales Contract**") with an independent third-party enterprise located in Henan Province (the "**Counterparty**"). The securing of this order marks a significant milestone for the Group's driverless logistics vehicle business in terms of large-scale commercial deliveries and expansion of regional smart logistics scenario deployments.

Pursuant to the terms of the Sales Contract, the Group shall supply its in-house developed driverless logistics vehicles and supporting autonomous driving technology services to the Counterparty, based on the principles of "equality and voluntariness, mutual benefit and win-win, honesty and credibility" as mutually agreed by both parties. This contract involves the sales of 500 units of driverless logistics vehicles and related supporting services, with the delivered products to be primarily deployed in smart mobility scenarios such as park logistics, supermarkets and last-mile delivery.

## REASONS FOR AND BENEFITS OF ENTERING INTO THE SALES CONTRACT

This sales cooperation with the Counterparty allows the Group to fully leverage its core strengths in autonomous driving technology, integrated hardware-software R&D and mass-production delivery, while combining the Counterparty's resources and capabilities in regional scenario deployment and integration of local operation resources, so as to facilitate the implementation and popularization of autonomous driving technology in the regional smart logistics field. The signing of this 500-unit Sales Contract represents the continuous acceleration of the commercialization process of the Group's driverless vehicle business. It will facilitate the Group in further expansion of its market share in driverless vehicles and supporting solutions, elevating brand influence, and continuously driving the large-scale commercial application of commercial autonomous driving products in logistics scenarios, thereby consolidating the Group's industry-leading position. Meanwhile, by leveraging this cooperation to establish a channel in the Central China market, it will lay a solid foundation for subsequent regional market expansion and continuously strengthen the Group's market competitiveness and industry influence.

## ABOUT THE GROUP'S BUSINESS

The Group is committed to shaping an automotive intelligence ecosystem through technological innovations to improve road safety and enhance driving experiences. We focus on the innovation and implementation of technologies in intelligent driving, intelligent cabin, smart mobility, and smart logistics. Leveraging our full-stack in-house platform technology, integrated hardware-software R&D capabilities and advanced mass production capability, and adhering to the strategy of "customer-first, scenario-focused, iterative product development, and boundary expansion", we continue to develop solutions with an improving automation level, striving to become a key driver of intelligent transformation in the industry.
