VOLUNTARY ANNOUNCEMENT

UPDATE ON BUSINESS DEVELOPMENT: BOTEC-BRANDED ECO-FRIENDLY SANDWICH BOX WITH TRANSPARENT WINDOW APPROVED AND LISTED ON THE PRODUCT LIST OF HONG KONG EPD'S GREEN TABLEWARE PLATFORM

This announcement is made by Green Fresh Biotechnology Company Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to keep shareholders of the Company (the “**Shareholders**”) and potential investors informed of the latest business development of the Group.

The board (the “**Board**”) of directors (the “**Directors**”) of the Company is pleased to announce that the Group’s BOTEC-branded eco-friendly sandwich box with transparent window, which is one of the application product series with 100% bio-degradable seaweed polysaccharide film self-developed by the Group’s subsidiary, Blue Ocean Algae Membrane (Fujian) Biotechnology Co., Ltd. (藍海藻膜(福建)生物科技有限公司) and distributed by the Group’s wholly-owned subsidiary, Greenwich (China) Technology Development Limited (格林(中國)科技發展有限公司) (“**Greenwich (China)**”), has recently been officially approved by the Environmental Protection Department (the “**EPD**”) of Hong Kong to be listed on the “Green Tableware Platform” as an eco-friendly disposable tableware product, and Greenwich (China) has also been listed as a supplier for such product.

In order to reduce the use of disposable plastic tableware at source with a view to minimising the impacts of plastic pollution on the marine environment and human health, and mitigating climate change, the Product Eco-responsibility Ordinance (Cap. 603 of the Laws of Hong Kong) was amended to introduce provisions regulating disposable plastic tableware and other plastic products, which came into operation on 22 April 2024. The Green Tableware Platform aims to assist the food and beverage (F&B) industry and the public in procuring alternatives to disposable plastic tableware that meet the statutory requirements.

The self-developed seaweed polysaccharide film featuring high transparency which is used in the above-mentioned product possesses core market advantages, and represents the first-of-its-kind innovative transparent food-grade polysaccharide material in the market. The transparent polysaccharide film has been certified by a third-party authoritative institution as 100% plastic-free. Meanwhile, the product was also awarded the TÜV DIN Home Compostable certification (Germany) in March this year, demonstrating the Group's internationally leading technological capability in the field of eco-friendly transparent new materials.

The Board considers that the inclusion of the Group's BOTEC-branded eco-friendly sandwich box on the Green Tableware Platform not only signifies full recognition of its environmental standards but also marks an important milestone for the Group in promoting sustainable development and the deployment of green technology products. This is expected to enhance the brand awareness and competitiveness of the Group's products in Hong Kong and international markets and will have a positive impact on the Group's business development.

Looking ahead, the Group will continue to uphold its green and eco-friendly philosophy, increase investment in research and development, and launch more high-quality products that comply with international and regional environmental standards. The Group will actively respond to the global trend of plastic reduction, striving to contribute to the sustainable development of society and create long-term returns for its Shareholders.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Green Fresh Biotechnology Company Limited
CHAN Kam Chung
Chairman

Hong Kong, 8 July 2026

As at the date of this announcement, the Board comprises Mr. CHAN Kam Chung, Mr. GUO Dongxu, Mr. CHAN Shui Yip, Mr. SHE Xiaoying and Ms. CHEN Yi as executive Directors; and Mr. HO Kwai Ching, Mark, Mr. NG Man Kung and Mr. HU Guohua as independent non-executive Directors.
