As set out in the Reply Letter, based on the preliminary estimates of the Company's management, from January to June 2026, driven by a significant increase in the Company's revenue from cobot and embodied intelligence businesses, it is expected to achieve an operating revenue of RMB300 million to RMB330 million (unaudited), representing a year-on-year increase of 94.65% to 114.12%; a gross profit of RMB140 million to RMB170 million, representing a year-on-year increase of 84.73% to 124.31%; a net profit attributable to owners of the parent of RMB-90 million to RMB-120 million, and a net profit attributable to owners of the parent of RMB-140 million to RMB-170 million after deducting non-recurring profit or loss (or adjusted net profit of approximately RMB-35 million to RMB-65 million, excluding exchange losses and share-based payments). The increase in losses in the first half of 2026 was mainly due to the provisional increase in the exchange losses and share-based payments, which in turn resulted in the temporary and significant year-on-year increase in expenses during the period and the increase in temporary losses. Meanwhile, in order to seize the significant development opportunities in the embodied intelligence industry, build core technical barriers in the cutting-edge fields and form an industry-leading position, the Company has proactively increased investments in the coverage of key regional markets and the layout of the embodied intelligence research and development system.
