OVERSEAS REGULATORY ANNOUNCEMENT

Power Generation and On-grid Tariff for the First Half of 2026 and Commencement of Operation of Power Generating Units

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

As at 30 June 2026, the total amount of power cumulatively generated by Huadian Power International Corporation Limited* (the "**Company**") and its subsidiaries (the "**Group**") calculated on the basis of the consolidated financial statements according to the China Accounting Standards for Business Enterprises for the first half of 2026 was 107.78 million MWh, representing a decrease of approximately 10.65% as compared with that of the same period of the previous year; and the total amount of on-grid electricity sold was 101.04 million MWh, representing a decrease of approximately 10.82% as compared with that of the same period of the previous year. The decrease in the amount of power generated and on-grid electricity sold for the first half of 2026 was mainly attributable to the crowding out of the power generation space of existing units by the combined impact of favorable hydrological conditions in water-abundant regions, the continuous increase in installed capacity of new energy sources, and newly installed coal-fired capacity. Additionally, the utilization hours of thermal power units declined as relatively low summer temperatures in certain regions where the Group's assets are located led to a decrease in peak load demand. Through preliminary accounting, the average tariff of on-grid electricity sold by the Group for the first half of 2026 was approximately RMB517.70 per MWh, representing an increase of approximately RMB0.91 per MWh as compared with that of the same period of the previous year, or an increase of approximately 0.18% year-on-year.

The table below shows the amount of power generated and the on-grid electricity sold during the first half of 2026 by each of the main generating units under operation of the Group currently.

Type	Name of power plant/company	Power generated from April to June 2026 (Million MWh)	On-grid electricity sold from April to June 2026 (Million MWh)	Power generated from January to June 2026 (Million MWh)	On-grid electricity sold from January to June 2026 (Million MWh)
