山東極視角科技股份有限公司

(A joint stock company incorporated in the People's Republic of China with limited liability)

(Stock Code: 6636)

POSITIVE PROFIT ALERT

This announcement is made by Shandong Extreme Vision Technology Co., Ltd.* (the "**Company**", together with its subsidiaries, the "**Group**") pursuant to Rule 13.09(2)(a) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**") and the Inside Information Provisions (as defined under the Listing Rules) under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to inform the shareholders (the "**Shareholders**") and potential investors of the Company that, based on the preliminary assessment of the unaudited consolidated management accounts of the Group for the six months ended June 30, 2026 (the "**Reporting Period**") and information currently available to the Board: (1) the Group expects to record revenue of approximately RMB153.4 million to RMB165.2 million during the Reporting Period, representing an increase of approximately 160% to 180% as compared with the corresponding period in 2025; (2) the Group expects to record an adjusted net profit (non-IFRS measures) up to approximately RMB6.0 million for the Reporting Period, as compared with an adjusted net loss (non-IFRS measures) of approximately RMB30.0 million to RMB35.0 million for the corresponding period in 2025; (3) due to the impact of adjustment items such as share-based payment expenses and listing expenses, the Group expects to record a net loss ranging from approximately RMB38.0 million to RMB44.0 million for the Reporting Period, as compared with a net loss of approximately RMB40.0 million to RMB45.0 million for the corresponding period in 2025.

* *For identification purpose only*

The adjusted net profit (non-IFRS measures) is calculated based on the Group's profit for the Reporting Period, excluding the effects of share-based payment expenses and listing expenses. Among which, share-based payment expenses are non-cash items, while listing expenses primarily relate to the Company's Global Offering and are one-off expenses. The Group believes that, after excluding the effects of the above items, the adjusted net profit can more accurately reflect the Group's operating results and core operational performance, and help investors better understand the actual operating conditions of the Group's business.

The aforementioned increase in revenue was primarily attributable to the rapid commercialization of the Group's large model solutions business. It is expected that revenue from large model solutions during the Reporting Period will exceed RMB80.0 million, representing a significant increase from RMB1.9 million in the corresponding period of 2025 (representing a year-on-year growth of over 4,110%), and gradually becoming an important source of the Group's revenue growth.

During the Reporting Period, the Group continued to seize development opportunities in the artificial intelligence (AI) industry. Leveraging its accumulated proprietary computer vision AI technologies, the Group accelerated the R&D and commercial application of vision large models, multimodal large models and enterprise-grade agent solutions. It continued to increase investment in AI computing resources, model capabilities and intelligent application platform development, steadily enhanced the product capabilities and large-scale delivery capacity of its large model solutions, and promoted the implementation of relevant solutions in key industries including intelligent manufacturing, smart transportation and smart energy. As the commercialization of large model products advances steadily, the proportion of revenue generated from large model solutions in total revenue has risen markedly, driving continuous optimization of the Group's business mix and further improvement in the quality of revenue growth.

The aforementioned improvement in the adjusted net profit (non-IFRS measures) was primarily attributable to a significant increase in revenue during the Reporting Period, particularly the rapid development of the large model solutions business. As the Group continues to advance the productization and standardization of its AI solutions, the delivery efficiency of large model-related products and solutions has been steadily improving, leading to an optimized revenue mix and improved gross margin, thereby further enhancing the Group's overall profitability.

The Company is still in the process of finalizing its interim results of the Group for the Reporting Period. The information contained in this announcement is solely based on a preliminary assessment by the Board with reference to the unaudited consolidated management accounts and information currently available, which have not been audited or reviewed and confirmed by the auditor or the audit committee of the Company, and are subject to change upon further implementation and adjustments where necessary. Shareholders and potential investors of the Company should refer to the interim results announcement of the Company for the six months ended June 30, 2026, which is expected to be published by the end of August 2026.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Shandong Extreme Vision Technology Co., Ltd.*
