The board (the "**Board**") of directors (the "**Directors**", and each a "**Director**") of the Company hereby notifies the shareholders and potential investors of the Company that, based on the Group's unaudited consolidated management accounts for the six months ended 30 June 2026 (the "**Reporting Period**") and information currently available to the Board, during the Reporting Period, the Company is expected to record an operating revenue of approximately RMB760.50 million, representing an increase of approximately 107.79% compared with the corresponding period in 2025; and is expected to record a pre-tax loss of approximately RMB53.88 million, representing a decrease of approximately 69.71% compared with the corresponding period in 2025. The Board attributes this primarily to the combined impact of the following factors:

In particular, sales volume of our self-developed iDC series advanced

driving assistance domain controllers and iFC series intelligent front cameras increased by approximately 160.36% compared with the corresponding period in 2025;

(2) During the Reporting Period, as the Company's mass production and delivery scale rapidly increased, the economies of scale gradually emerged, leading to a significant improvement in the gross profit margin.

The Company is currently in the process of finalizing the unaudited interim results of the Group for the Reporting Period. The information contained in this announcement is only based on a preliminary assessment by the Board with reference to the unaudited consolidated management accounts of the Group for the Reporting Period and other information currently available to the Board, and such information has not been confirmed by the independent auditor of the Company nor reviewed by the audit committee of the Company and is subject to finalization and necessary adjustments.
