VOLUNTARY ANNOUNCEMENT
LATEST DEVELOPMENT OF THE GROUP'S UPSTREAM CORE CHIP
PROCUREMENT BUSINESS FOR 2027

This announcement is made by Crealights Technology Co., Ltd. (the **"Company"**, together with its subsidiaries, the **"Group"**) on a voluntary basis to inform shareholders and potential investors of the Company of the latest business development of the Group.

The board (the **"Board"**) of directors (the **"Directors"**) of the Company is pleased to announce that, in order to further strengthen the stability of the supply chain, secure the long-term production and delivery capabilities of the Group's high-speed optical interconnect products, and address the risks of tight supply of core chips and cyclical fluctuations in the industry, the Group has finalized its chip procurement arrangements for 2027 with upstream independent third-party core chip suppliers.

As of the date of this announcement, the Group has cumulatively secured confirmed orders for an aggregate procurement quantity of approximately 10,000,000 Digital Signal Processor (DSP) chips scheduled for delivery in 2027. Such procurement orders are legally binding on the contracting parties, and the suppliers will deliver the relevant chips in batches in 2027. This chip is a core component supporting the high-frequency bandwidth transmission of high-speed optical modules. The advance securing of the production capacity for tens of millions of core chips under these arrangements demonstrates the Group's forward-looking supply chain planning capability, which will help safeguard the Group's supply of raw materials, thereby robustly underpinning the Group's production capacity planning and satisfying the delivery requirements of downstream customers.

Cautionary Statement: This announcement is published on a voluntary basis. The contents contained herein are merely objective statements of the business development of the Group. The chip procurement orders referred to in this announcement are legally binding on the contracting parties. There are uncertainties as to the actual benefits of the relevant arrangements, which are subject to the impact of multiple factors including downstream market demand, industry cycles, technological iterations, and the performance of obligations by both contracting parties. Should there be any material fluctuation in downstream end-user demand, it may exert pressure on the inventory management and operating costs of the Group. This announcement does not constitute any profit forecast, performance guidance or investment advice, and investors should not infer the future financial performance and operating results of the Group solely based on the contents of this announcement. Shareholders and potential investors are advised to exercise caution when dealing in the securities of the Company.

By order of the Board
Crealights Technology Co., Ltd.
Dr. Hu Zhaoyang
*Founder, Chairman of the Board,
Executive Director, and Chief
Executive Officer*

Hong Kong, July 31, 2026
