INSPUR DIGITAL ENTERPRISE TECHNOLOGY LIMITED
浪潮數字企業技術有限公司

(Incorporated in the Cayman Islands with limited liability)
(Stock code: 596)

INSIDE INFORMATION — PROFIT WARNING

This announcement is made by Inspur Digital Enterprise Technology Limited (the "**Company**", together with its subsidiaries, the "**Group**") pursuant to Rule 13.09 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**") and the provisions of the Inside Information Provisions (as defined in the Listing Rules) under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

The board of directors of the Company (the "**Board**") hereby informs the shareholders and potential investors of the Company that, based on a preliminary assessment of the Company's unaudited consolidated management accounts for the six months ended 30 June 2026 (the "**Reporting Period**"):

1. Revenue for the Reporting Period is expected to range from approximately RMB3.7 billion to RMB3.8 billion, representing a decrease of approximately 11.6% to 14.0% compared to the same period in 2025 (same period in 2025: approximately RMB4.3 billion). Net profit attributable to owners of the Company is expected to range from approximately RMB60 million to RMB70 million, representing a decrease of approximately 61.1% to 66.7% compared to the same period in 2025 (same period in 2025: approximately RMB180 million). Revenue and net profit attributable to owners of the Company both declined year-over-year, primarily due to: (i) the Company's strategic realignment of its business portfolio, focusing on core AI sectors, optimizing the order structure, and proactively downsizing the volume of orders accepted for traditional Internet of Things (IoT) solutions business; (ii) extended delivery cycles for certain projects due to stricter client compliance requirements and elevating product requirements brought by AI technological evolution, resulting in a delay in revenue recognition; and (iii) continued increased investment in AI initiatives to implement the medium to long-term development plan under its AI-native strategy, which has temporarily pressured profitability.

2. During the Reporting Period, the AI Application and Intelligent Computing Center businesses demonstrated strong growth momentum and steady expansion in business scale, primarily driven by: (i) the accelerated implementation of the Group's "1321" strategy and the continuous refinement of its enterprise AI-native intelligent product system centered on the "Four Layers, Three Drivers" architecture, which integrates the four core layers of models and data, digital and intelligence platforms, intelligent applications, and intelligent interaction, including the launch of core digital-intelligent products such as the Inspur Haiyue Mano Intelligent Execution System. These products have been deployed in several central and state-owned enterprises, driving rapid growth in the AI application business; and (ii) the domestic business of the Intelligent Computing Center has deepened its arrangements around the eight national computing hub nodes under the "East Data, West Computing" initiative, while the overseas business has focused on expanding its presence in core Southeast Asian markets. Computing infrastructure construction is progressing systematically, with sustained growth in regional market share for computing services.

The Group will continue to uphold the "1321" strategy, strengthen strategic focus, optimize its business structure, drive internal quality improvements, continuously enhance the market competitiveness of its software and AI products, and accelerate its progress towards becoming a world-class provider of enterprise software, enterprise AI products, technologies, and services. The Board and management are confident in the Company's future development.

The Company is still in the process of preparing and finalizing the interim financial results of the Company for the financial year 2026. The information contained in this announcement is only a preliminary assessment based on information currently available to the Company and has not been audited by the Company's auditors or reviewed by the Company's audit committee. Accordingly, the actual results of the Company for the interim financial year 2026 may differ from those disclosed in this announcement. Details of the interim financial results of the Company for the financial year 2026 are expected to be disclosed in the interim results announcement of the Company for the financial year 2026 to be published before the end of August 2026.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By Order of the Board
Inspur Digital Enterprise Technology Limited
Wei Daisen
Chairman

Hong Kong, 2 August 2026
