PROFIT WARNING

The board (the "**Board**") of directors (the "**Directors**") of the Company hereby informs the shareholders of the Company (the "**Shareholders**") and potential investors that, based on the preliminary review of the relevant financial information of the Group for the six months ended June 30, 2026 (the "**Reporting Period**") and taking into account the information currently available to the Board, it is expected that the Group will record an unaudited net loss of approximately RMB20.3 million for the Reporting Period, as compared to an unaudited net profit of approximately RMB26.1 million for the six months ended June 30, 2025.

The main reasons for the expected decrease in the Group's profit are set out below:

(i) In view of the current economic environment and industry conditions, the Group continued to adjust its business structure to enhance on quality and efficiency by scaling down digital freight businesses with high working capital requirements and low gross profit margins while developing new businesses such as data services to scale, which lifted its overall gross profit margin. During the Reporting Period, the gross profit from new businesses still fell short of offsetting the gross profit gap left by the decline in digital freight businesses, resulting in an overall gross profit decline.

(ii) The Group continued to invest in research and development for AI applications and digital solutions, while prioritizing increased sales resource investment in data services and digital businesses to steer its business structure toward higher-margin areas. These strategic initiatives maintained its research and development expenses as well as its selling and marketing expenses at the level required to support the business structure adjustment.
