## **VOLUNTARY ANNOUNCEMENT LAUNCH OF NEXTB2B, AN AI AGENT FOR THE TRADING INDUSTRY**

This is a voluntary announcement made by the board of directors (the “**Board**”) of ZG Group (the “**Company**”, collectively with its subsidiaries, the “**Group**”).

### **JOINT LAUNCH OF NEXTB2B WITH TENCENT WORKBUDDY**

The Board is pleased to announce that the Group has jointly launched NextB2B with the Tencent WorkBuddy team. NextB2B is the first B2B full-process AI Agent solution based on Tencent WorkBuddy, comprising four enterprise intelligent agent expert modules covering procurement, sales, back-office operations and operational management, which address core challenges such as product sourcing, business growth and operational management. It also plans to incorporate A2A transaction capabilities, which will enable dialogue and transactions between enterprise Agents in the future.

WorkBuddy is an all-scenario AI office workspace developed by Tencent, covering daily office work, code development, design and creative work. Users can assign tasks in natural language, and WorkBuddy can autonomously reason, break down tasks, plan execution steps and ultimately deliver work products that are ready for direct acceptance.

### **OVERVIEW OF NEXTB2B**

NextB2B combines WorkBuddy’s general-purpose AI agent capabilities with the industry knowledge, business experience and digital service capabilities accumulated by the Group in the B2B trading and distribution sector. The Group provides SKILL, MCP, data and workflows for general application across the broader trading and distribution industry.

## **PRODUCT FEATURES**

Its key functions include conducting procurement sourcing and supplier price comparisons based on product models, specifications and procurement requirements; identifying customer enquiries and procurement needs, assisting in generating quotations, following up with customers and recording historical business dealings; retrieving information relating to counterparties' corporate registration, litigation, public sentiment and other risk factors, and monitoring abnormal orders, overdue receivables, potential bad debts and risks relating to title to goods; assisting in handling routine work relating to orders, inventory, funds, reconciliations, invoicing and cross-departmental follow-up and task expediting; compiling operational information relating to sales, collection of payments, inventory, customers and teams and generating operational reports; and automatically generating daily operational reports at predetermined times, continuously monitoring market conditions, customer follow-ups and transaction risks and proactively issuing alerts.

NextB2B incorporates A2A transaction capabilities and will enable direct Agent-to-Agent dialogue in the future. It incorporates an A2A transaction Skill, enabling enterprise Agents to remain continuously online and automatically discover, match and connect with business opportunities across industries. All connected enterprises will share the same unified industry-wide trading network and be interconnected under a unified ATP protocol. The key industries that NextB2B may cover include electronic components, electrical products and equipment, automotive and motorcycle parts, chemicals and plastics, agricultural and livestock products, freight forwarding and logistics, metals and energy, etc.

## **FEE MODEL**

NextB2B adopts a fee model combining a basic version, value-added modules and Token top-ups. The standard price of the basic version is RMB20,000. Customers may purchase value-added modules based on their business scale and application needs, for which separate service fees will be charged. Customers will make separate Token top-ups based on their actual usage to cover the Token consumption arising from use of the product. The specific service period, number of accounts, functional configuration, Token quota and scope of services shall be subject to the final agreements or orders entered into between the Group and its customers.

## **REASONS FOR AND BENEFITS OF LAUNCHING NEXTB2B**

The Group has continued to invest in research and development in AI and has obtained three AI-related invention patents. In 2025, the Group's transaction value exceeded RMB150 billion, and it accumulates more than one million structured order records and over 100 million unstructured chat records each year. The launch of NextB2B will enable the Group to make its long-accumulated industry data, business experience and AI application capabilities available to external corporate customers, while exploring new sources of revenue from basic software services, value-added functionalities and Token top-ups. The Board believes that Tencent WorkBuddy's capabilities in AI agents and task execution are complementary to the Group's understanding of B2B trading processes, industry data and corporate operational needs, and that this cooperation will facilitate the practical application of AI in the B2B trading and distribution industry.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares and warrants of the Company and to be mindful of market risks.

By order of the Board  
**ZG GROUP**  
**WANG Dong**  
*Chairman of the Board*

Hong Kong, September 2, 2026
