## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS OVERVIEW

GHW International (the “**Company**”) and its subsidiaries (collectively referred to as the “**Group**”) is an applied chemical intermediates provider in the integrated chemical services market, which primarily engages in the production and sales of chemicals and sales of chemicals produced by third party manufacturers based in mainland China, the Southeast Asia region, Europe and the United States (the “**US**”). With headquarters in mainland China, our Group offers a comprehensive product portfolio with a wide range of applications and a full spectrum of services relating to chemical intermediates supply chain through extensive global operations and sales network, including research and development (“**R&D**”) on production processes, strong product customisation capabilities, manufacturing of quality chemical products, sourcing of wide-ranging chemicals manufactured by third party manufacturers, efficient and safe logistics services and after-sales services.

As at the date of this report, we have seven principal business segments, including: Methylamine Industry Series, Goldenhighway New Materials, Advanced Materials Intermediates Series, Green Products, Healthcare and Wellness, Iodine Derivatives and Supporting Products, as well as Happy Elephant Selections.

The Methylamine Industry Series segment primarily consists of animal nutrition chemical products, with choline chloride and betaine being the two major products. These two products are additives commonly used in feeds for poultry and livestock, which are crucial to the downstream animal husbandry industries. Choline chloride is an additive in animal feeds to accelerate animal growth. It can also be used as a clay stabiliser in oil and gas drilling and hydraulic fracturing. Betaine can be used as dietary feeding, playing a vital physiological role in animal bodies and enhancing the growth and survival rate of fish, poultry, swine and other animals.

The Goldenhighway New Materials segment focuses primarily on our trading business, including fine chemicals and polyurethane materials, as well as self-manufacturing polymer polyethers. Regarding the fine chemicals products, our Group primarily sources products, such as resins, oleochemicals and ethylene oxide from third-party manufacturers for onward selling to our customers. The major use of resins and oleochemicals involves the production of cosmetics, emulsifiers and lubricants, whereas ethylene oxide is used as the raw material in the production of choline chloride and is used in chemical synthesis, sterilization and as an industrial additive. On the other hand, polyurethane materials, such as polymeric methylene diphenyl diisocyanate (“**polymeric MDI**”) and toluene diisocyanate (“**TDI**”), have extensive use in manufacturing industries, including insulation, building materials, adhesives, sponges, shoe materials, foam pads, interior components, and other lightweight automotive parts to promote fuel and energy efficiency. Self-manufacturing polymer polyether is application-oriented products designed to provide customised production solutions and services. During the past years, the sales structure of polyether polyol shifted from the rigid foam insulation industry to the soft foam automotive interior sector. Our Group provides products with diverse formulations to offer customers more competitive and value-added solutions.

The Advanced Materials Intermediates Series segment mainly consists of two self-manufactured products, namely isooctanoic acid and diethyl sulfate. The Group’s isooctanoic acid holds a significant market share in mainland China. It serves critical applications including paint drier, polyvinyl chloride (PVC) liquid stabilizer, catalyst and pharmaceutical raw materials, and synthesis of dyes, pesticides and pharmaceutical intermediates. We started to trade isooctanol in October 2025. Isooctanol is a raw material in the production of isooctanoic acid and its downstream customers are DOP and DOTP plasticisers.

## MANAGEMENT DISCUSSION AND ANALYSIS

With increasing emphasis on environmental protection and sustainable development of our downstream customers, our Group has expanded into the Green Products segment, primarily producing cardanol products. The global cardanol market is experiencing a steady growth, with rising demand in traditional application fields and expanding applications. Cardanol is a natural product extracted from cashew nutshell liquid and is widely used in coatings, resins, pharmaceuticals and other fields. It also serves as a bio-based raw material. Our Group manufactures cardanol products at its production facility in Vietnam.

In the field of Healthcare and Wellness segment, our Group sells pharmaceutical products, such as cefpodoxime proxetil dispersible tablets, as well as other pharmaceutical intermediates. We have developed our moxifloxacin hydrochloride side chain production line and launched during 2025.

The Iodine Derivatives and Supporting Products segment primarily consists of organic and inorganic iodine derivatives, as well as iodine.

Happy Elephant Selections segment represents one of our Group's new business segments, which primarily focuses on selling nutrition products sourced from third parties. Since 2022, our Group has been selling supplements acquired from third party manufacturers, such as vitamin tablets. Additionally, our Group organized sports events during 2024, which effectively promoted the product brand and supported the development of the sales market for supplements and related products.

### BUSINESS REVIEW

In the first half of 2026, the chemical intermediates market in the mainland China experienced a notable recovery, spurred by supply-side optimization, capacity rationalization, and a rebound in downstream demand. Specific products saw generally strong prices and tight supply, influenced by geopolitical disruptions and concentrated plant maintenance, though this was partly offset by high domestic capacity in some segments. Overall, the Chinese market showed signs of fundamental improvement, with a sentiment of recovery overshadowing previous weakness.

The choline chloride market in 2026 is shaped by a combination of geopolitical supply shocks and trade policy interventions. Following the effective closure of the Strait of Hormuz since early 2026, approximately 15-20% of global petrochemical feedstocks have been removed from the market, driving up raw material costs for choline chloride production. This has been compounded by the European Commission applying definitive anti-dumping duties on choline chloride imports in February 2026, aiming to shield domestic producers from low-cost Asian competition. On the supply side, upstream core raw materials like trimethylamine and ethylene oxide have experienced price increment. Despite these upstream pressures and trade policy interventions, the choline chloride and betaine market overall remained relatively stable in early 2026, with a consistent production rate of choline chloride and betaine manufacturers, as well as the continuous demand from livestock manufacturers.

The polymeric MDI market experienced significant supply disruptions and regional divergence. Two MDI plants in the Middle East have been offline since March 2026, disrupting local export logistics and creating supply gaps in neighboring markets. Force majeure on MDI productions and scheduled maintenance announced by substantial polymeric MDI manufacturers triggered a flurry of price increase announcements. These incidents provided an opportunity for us to strive for higher profit margin on our trading business.

The iodine and iodine derivatives market in the first half of 2026 faced significant cost-driven inflationary pressures. Rising production expenses and elevated energy prices pressured manufacturers across major economies during the first quarter of 2026. The Asia-Pacific region remains the world's foremost consumption hub. Regional supply remains extraordinarily concentrated, with Japan producing more than 80% of regional output. Although the global iodine derivatives market is estimated to have a projected CAGR of more than 5% through 2035, the market faces uncertainty from the Middle East conflict, which has triggered volatility in global trade flows and shipping costs. Pharmaceutical demand for diagnostic imaging and radiopharmaceuticals remains a key support factor. The healthcare sector's resilient demand is expected to keep prices firm through 2026.

## MANAGEMENT DISCUSSION AND ANALYSIS

During the six months ended 30 June 2026, our Group recorded a revenue of approximately RMB2,232.8 million (2025: RMB1,856.7 million), representing an increase of 20.3% as compared to the corresponding period last year. Profit for the period significantly increased by 302.9% from approximately RMB7.9 million for the six months ended 30 June 2025 to approximately RMB31.7 million for the six months ended 30 June 2026. The increase in revenue for the period was primarily attributed to the increase in revenue from various segments, such as Methylamine Industry Series, Goldenhighway New Materials and Advanced Materials Intermediates Series, where:

- Revenue from the Methylamine Industry Series segment increased by 31.7% from RMB601.0 million to RMB791.7 million. Such increase was primarily attributable to the expansion in the market share of our different products in this segment.
- Revenue from the Goldenhighway New Materials segment increased by 15.7% from RMB399.1 million to RMB461.8 million. Such increase was primarily attributable to revenue contributed by our new trading products such as ethylene oxide and monomeric polyether, as well as the increasing sales volume of polymeric MDI.
- Revenue from the Advanced Materials Intermediates Series segment increased by 85.1% from RMB132.5 million to RMB245.3 million. Such increase was primarily attributable to both revenue contributed by our new trading products isooctanol since October 2025 and increase in sales volume of isooctanoic acid as a result of the resumption of Group's full production capacity during the period.

The increase in profit for the period was primarily attributable to the increase in gross profit by 46.3% from approximately RMB170.5 million to RMB249.5 million mainly derived from the strong performance in our Methylamine Industry Series products, in particular choline chloride and betaine, as well as Goldenhighway New Materials products, in particular polymeric MDI. The improvement was mainly driven by higher average selling prices of these products and our successful procurement strategies for trading products, which are further explained below. The increase in net profit was partially offset by (i) other loss of approximately RMB8.8 million (2025: other gain of RMB9.4 million) resulting from the decrease in net exchange gain as a result of the depreciation of various foreign currencies, such as United States dollar ("US\$"), against Renminbi ("RMB") during the current period; (ii) an increase in selling expenses due to the increase in logistic costs (including transportation, port charges and shipment costs), as driven by the increase in sales volumes of several products; and (iii) an increase in income tax expense from approximately RMB2.7 million to RMB13.0 million, which was in line with the increase in profit generated for the period.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Methylamine Industry Series

The revenue from choline chloride, betaine, methylamine, and other products in this segment increased by 31.7% from approximately RMB601.0 million for the six months ended 30 June 2025 to approximately RMB791.7 million for the six months ended 30 June 2026. Such increase was primarily attributable to both the increasing sales volumes, market prices and profit margin of choline chloride and betaine during the period.

The sales volume of choline chloride and betaine increased by approximately 8% and 17%, respectively. This increase was primarily attributable to the Group's established strategy of gradually capturing more market share, further increasing market penetration. On the other hand, during 2025, there were an upgrade of production equipment of methylamine, leading to reduction in days of operation of the production line in the corresponding period last year. The production facilities had resumed to normal during the current period, leading to an increase in sales volume of methylamine by approximately 212%.

On the other hand, the average selling prices of choline chloride and betaine increased by approximately 8% and 18%, respectively, as a result of warfare in the Middle East leading to the increase raw material costs of production. We are able to transfer the additional costs to our customers, leading to an increase in both revenue and gross profit of the above products.

### Iodine Derivatives and Supporting Products

The revenue from this segment decreased by 4% from approximately RMB588.3 million for the six months ended 30 June 2025 to approximately RMB565.7 million for the six months ended 30 June 2026, primarily because of a partial shift from trading to sub-processing model, as requested by one of our largest downstream customers, which was partially offset by the increase in sales volume of iodine during the period.

The sales volume of trading iodine derivatives decreased by approximately 15%, mainly due to a portion of iodine salt trading shifting to sub-processing sales at the request of customers.

The sales volume of sub-processing iodine derivatives increased by approximately 120 tonnes, due to a partial shift from trading to sub-processing model. The increase in sub-processing iodine derivatives sales volume matched the decrease in sales volume of trading iodine derivatives. Its average selling price slightly increased by approximately 5%, driven by our increasing material cost of production, which was partially transferred to our customer.

The sales volume of iodine significantly increased by approximately 43%, driven by increased market share, higher market occupancy and greater sales volume. The average selling price of iodine slightly dropped by approximately 1%, driven by the depreciation of US\$ against RMB during the current period.

### Goldenhighway New Materials

The revenue from Goldenhighway New Materials segment, with resins, ethylene oxide, monomeric polyether, polymeric MDI, TDI and polymer polyethers as the major products, increased by 16% from approximately RMB399.1 million for the six months ended 30 June 2025 to approximately RMB461.8 million for the six months ended 30 June 2026. The increase in revenue mainly derived from the increase in sales volume of new products such as ethylene oxide and polyether monomer, as well as the increase sales volume of polymeric MDI, which was partially offset by the decreasing sales volume of ethylene glycol.

We started to trade ethylene oxide and monomeric polyether during 2025. Ethylene oxide is a raw material in the production of choline chloride and is used in chemical synthesis, sterilization and as an industrial additive. Our customers mainly involved in industries including solvent (alcohol ethers), demulsifier, pesticide emulsifier and surfactant. Monomeric polyethers are raw materials in the production of polymer polyethers and are critical in the automotive industry for producing flexible and rigid polyurethane (PU) foams, coatings, and specialized elastomers. The sales volume of ethylene oxide and monomeric polyethers increased by approximately 5,277 tonnes and 2,376 tonnes, respectively. These products also contributed a reasonable gross profit to our Group.

## MANAGEMENT DISCUSSION AND ANALYSIS

The sales volume of polymer MDI increased by approximately 22%, primarily because of the Group's procurement strategy to maintain a sufficient level of inventory at the end of last year, and released the stock to the market during the first quarter of 2026, when the market supply was not stable as a result of warfare in the Middle East. Such trading strategy also helped increasing the gross profit of the product during the period.

A drop in sales volume was noted in ethylene glycol by approximately 72% as its market price during the first half of 2026 was highly volatile due to the Strait of Hormuz disruption, leading to the reduction of our trading for this product. The management will closely monitor the price trend of the product and consider resuming the trading market when it fits.

### Advanced Materials Intermediates Series

The revenue from isooctanol, isooctanoic acid and diethyl sulfate in this segment increased from approximately RMB132.5 million for the six months ended 30 June 2025 to approximately RMB245.3 million for the six months ended 30 June 2026. Such increase was due to (i) the introduction of isooctanol, a new trading product of our Group, during the period, and (ii) an increase in sales volume of isooctanoic acid as a result of resumption of production from a one-month malfunction in the Group's reactor equipment requiring maintenance in the first half of 2025.

We started to trade isooctanol in October 2025. Isooctanol is a raw material in the production of isooctanoic acid and its downstream customers are DOP and DOTP plasticisers. The sales volume of isooctanol increased by approximately 8,782 tonnes. However, the gross profit attributable to this product is minimal during the period due to the keen market competition.

The sales volume of isooctanoic acid and diethyl sulfate increased by approximately 28% and 30%, respectively, mainly due to the resumption of Group's full production capacity during the period. Besides, we had explored more sales channels of diethyl sulfate in overseas, leading to increase in sales volume.

The average selling prices of isooctanoic acid and diethyl sulfate increased by approximately 7% and 11%, respectively, as a result of increasing raw material costs of these two products.

### Green Products

The revenue of cardanol significantly increased by 34% from approximately RMB111.5 million for the six months ended 30 June 2025 to approximately RMB148.9 million for the six months ended 30 June 2026, primarily because of the increased sales volume as a result of the increased production capacity as well as the market demand.

In the past few years, the Group actively explored new geographic markets. Despite both increase in the sales volume and the market price, the gross profit attributable to cardanol was decreased as we are still fine-tuning our production manufacturing technology, leading to additional cost of production over the increase in average selling price.

### Happy Elephant Selections

During the period, the Group sold supplements, such as vitamin tablets and ammonia sugar. The Group also engaged in the organisation of sports events to promote our brand. The segment contribution increased significantly with a revenue of RMB7.9 million, mainly driven by the increase of sales volume in supplements. During the period, the Group kept seeking collaborative product selection with third party customers, conducted promotion and marketing through tournament platforms, contestants and clubs.

### Healthcare and Wellness

The revenue from this segment decreased by 73% from approximately RMB15.0 million for the six months ended 30 June 2025 to approximately RMB4.0 million six months ended 30 June 2026. The decrease in revenue and gross profit was primarily attributable to the relocation of our supplier's factory for cefpodoxime proxetil dispersible tablets, leading to suspension of sales since April 2026.

## MANAGEMENT DISCUSSION AND ANALYSIS

Our revenue derived from mainland China contributed approximately 76.4% and 74.4% of our total revenue for the six months ended 30 June 2025 and 2026, respectively. Given that the revenue derived from mainland China constitutes a substantial portion of our total revenue, the fluctuations in revenue of sales in mainland China for our business segments were in line with the fluctuations in the overall revenue of each of these segments.

Our revenue derived from Europe, Asia (excluding mainland China and Vietnam) and Vietnam changed from approximately RMB183.5 million, RMB95.9 million and RMB85.8 million for the six months ended 30 June 2025 to approximately RMB192.0 million, RMB148.0 million and RMB138.6 million for the six months ended 30 June 2026, respectively. The fluctuation trend was in line with the financial performance of each of our business segments as described above.

### Cost of sales

Our cost of sales comprises mainly cost of raw materials and inventories, staff costs, manufacturing overheads, depreciation and others. Cost of raw materials and inventories is our main cost of sales. Staff costs mainly comprise salaries, wages and social insurance costs for those who are directly involved in the production and the management team of the production plants.

Our cost of sales increased from approximately RMB1,686.2 million for the six months ended 30 June 2025 to approximately RMB1,983.3 million for the six months ended 30 June 2026. The increase in our cost of sales was mainly attributable to the increase in costs for Methylamine Industry Series, Goldenhighway New Materials and Advanced Materials Intermediates Series, which was partially offset by the decrease in raw material costs in the production of iodine derivatives due to the reduction in sales volume of trading iodine derivatives.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Gross profit and gross profit margin

The table below sets forth a breakdown of gross profit and gross profit margin by business segments during the six months ended 30 June 2026:

Total gross profit by business segments

|                                            | For the six months ended 30 June |              |                |             |

| Others                                     | 1,301                            | 17.4%        | 1,128          | 13.6%       |
| <b>Total</b>                               | <b>249,461</b>                   | <b>11.2%</b> | <b>170,463</b> | <b>9.2%</b> |

Our gross profit increased from approximately RMB170.5 million for the six months ended 30 June 2025 to approximately RMB249.5 million for the six months ended 30 June 2026. Our overall gross profit margin increased from 9.2% for the six months ended 30 June 2025 to approximately 11.2% for the six months ended 30 June 2026.

The increase in our gross profit and gross profit margin was mainly due to the increase in the gross profit and gross profit margin of Methylamine Industry Series and Goldenhighway New Materials segment, especially choline chloride, betaine and polymeric MDI as a result of the increase in market prices as a result of warfare in the Middle East, which outweighed the increase in cost of raw materials.

### Other income

Our other income primarily consists of one-off and unconditional subsidies from the relevant government authority and interest income.

Our other income decreased from approximately RMB12.3 million for the six months ended 30 June 2025 to approximately RMB10.8 million for the six months ended 30 June 2026. The decrease in our other income was mainly due to (i) a decrease in income derived from an additional value-added tax credit policy to approximately RMB5.5 million in the current period (2025: RMB7.5 million) and (ii) decrease in other government grants from approximately RMB2.6 million to RMB2.0 million.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Other gains and losses

Our other gains and losses primarily comprise (i) net foreign exchange gains or losses which primarily arose from appreciation or depreciation of US\$, Russian Ruble, Mexican Peso and Ukrainian Hryvnia against RMB as the functional currency of our subsidiaries in the mainland China is RMB while their export sale to customers and purchase from overseas suppliers were mainly settled in other currencies; (ii) gains/losses on disposals of plant and equipment; and (iii) net gains or losses arising from fair value changes on derivative financial instruments and financial asset at fair value through profit or loss ("FVTPL").

Our Group recorded net other gains of approximately RMB8.9 million for the six months ended 30 June 2025 and net other losses of approximately RMB15.1 million for the six months ended 30 June 2026. Such increase in loss in our net other gains and losses was mainly because of (i) the net foreign exchange loss of approximately RMB8.8 million (2025: other gain of RMB9.4 million), as a result of the depreciation of various currencies, such as US\$ against RMB during the period, comparing to the appreciation of Russian Ruble and Mexican Peso against RMB during the corresponding period last year; and (ii) increase in loss on disposals of plant and equipment from RMB1.1 million in 2025 to RMB5.4 million in the current period due to technical updates on several production lines.

### Selling and distribution expenses

Our selling and distribution expenses primarily comprise transportation costs, staff remuneration for our sales and marketing team, port charges, storage costs, material costs for export and packaging materials and insurance costs.

Our selling and distribution expenses increased from approximately RMB72.3 million for the six months ended 30 June 2025 to approximately RMB87.3 million for the six months ended 30 June 2026. The increase in our selling and distribution expenses was primarily due to the increase in logistic costs (including transportation, port charges and shipment costs), as driven by the increase in sales volumes of several products such as choline chloride, methylamine, ethylene oxide and isooctanol.

### Administrative expenses

Administrative expenses primarily comprise staff costs, including salary, social insurance costs and provident funds for our staff (other than the staff who are directly involved in the production, the management team of the production plants and the sales and marketing team), entertainment expenses, travelling expenses, rent, depreciation and amortisation of leasehold improvements, office equipment and motor vehicle, safety costs, office expenses, repair expenses, and environmental protection costs in relation to implementation of safety and environmental protection measures and others.

Our administrative expenses slightly increased from approximately RMB65.5 million for the six months ended 30 June 2025 to approximately RMB70.0 million for the six months ended 30 June 2026. The slight increase in our administrative expenses was primarily due to the increase in staff costs of approximately RMB7.3 million as a result of the provision of bonus which is in line with the increase in profit for the period, which was partially offset by the decrease in consultancy fee of approximately RMB3.7 million as a reduction of expenses related to feasibility study in Malaysia.

## MANAGEMENT DISCUSSION AND ANALYSIS

### R&D expenses

R&D expenses primarily comprise raw materials consumed for conducting R&D activities, staff costs and social insurance costs for our R&D personnel, electricity expenses, depreciation of our research centre, hardware supplies and transportation cost of raw materials for conducting R&D.

R&D expenses consist of all costs that are directly attributable to our R&D activities. Because of the nature of our R&D activities which mainly aimed to develop production equipment and method for improving our own production efficiency, it is difficult to assess the probable future economic benefits in the research phase of a project and the criteria for recognition of such costs as an asset are not met. As such, our R&D costs are generally recognised as expenses in the period in which they are incurred.

Our R&D expenses maintained at approximately RMB26.0 million for the six months ended 30 June 2025 and 2026.

### Finance costs

Finance costs represent interest on bank and other borrowings and loans from related companies, discounted bills and lease liabilities.

Our finance costs decreased from approximately RMB19.6 million for the six months ended 30 June 2025 to approximately RMB17.1 million for the six months ended 30 June 2026. The decrease in finance costs was mainly due to the repayment of a long-term loan with a relative high interest rate of 7.2% during the current period and last year.

### Income tax expenses

Our income tax expenses increased from approximately RMB2.7 million for the six months ended 30 June 2025 to approximately RMB13.0 million for the six months ended 30 June 2026. Our effective tax rate was approximately 29.0% (2025: 25.8%) for the six months ended 30 June 2026. The increase of income tax expense was in line with the increase in profit before tax for the current period, whereas the effective tax rate was maintained at a similar level during the current period.

### Profit for the period

As a result of the foregoing, we recorded a profit for the period of approximately RMB31.7 million for the six months ended 30 June 2026, comparing to a profit for the period of approximately RMB7.9 million for the six months ended 30 June 2025, as a combined result of the above fluctuations

## PROSPECTS

The Middle East war has created a lasting supply shock fundamentally reshaping chemical markets in 2026. The effective closure of the Strait of Hormuz has disrupted global supply chains and driven up prices for ethylene and other oil-derived commodities. While raw material costs have increased worldwide, abundant production capacity in China has maintained a highly competitive market environment. Iodine derivatives face production cost inflation from higher energy and logistics expenses. The effects of these disruptions are expected to persist beyond the resolution of geopolitical tensions, as restoring production facilities and supply infrastructure may take months, if not years.

Despite market uncertainties, the Group will maintain its strategic commitment, capitalizing on the steady advancement of its smart manufacturing facility to support capacity expansion efforts, while broadening its footprint in varied regional markets through tiered customer collaborations and customized offerings. This approach will fortify supply chain resilience, creating a robust platform for sustainable long-term value growth.

## MANAGEMENT DISCUSSION AND ANALYSIS

### CAPITAL STRUCTURE, LIQUIDITY AND FINANCIAL RESOURCES

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to the shareholders of the Company (the “**Shareholders**”) through the optimisation of the debt and equity balance. The capital structure of the Group consists of debt, including bank and other borrowings and loans from related companies, and equity attributable to owners of the Company, comprising issued capital and reserves. The management of the Group reviews the capital structure by considering the cost of capital and the risks associated with each class of capital. In view of this, the Group will balance its overall capital structure through the payment of dividends and new share issues as well as the issuance of debts and repayment of existing borrowings. The Group’s overall strategy remained unchanged throughout the period.

During the six months ended 30 June 2026, the Group’s working capital was financed by both internal resources and borrowings.

As at 30 June 2026, the Group’s total assets and bank balances and cash amounted to approximately RMB2,168.4 million (31 December 2025: RMB2,068.2 million) and RMB136.7 million (31 December 2025: RMB115.8 million), respectively. The bank balances and cash were mainly denominated in RMB and US\$.

As at 30 June 2026, the borrowings (including loans from related companies) were approximately RMB883.9 million (31 December 2025: RMB810.4 million). As at 30 June 2026, borrowings amounting to approximately RMB883.9 million (31 December 2025: RMB810.4 million) are carried at fixed interest rates ranging from 2.4% to 7.2% (31 December 2025: from 2.4% to 7.2%) per annum and repayable from 2026 to 2050 (31 December 2025: from 2026 to 2050).

The gearing ratio of the Group, which was calculated by dividing the total external borrowings by total equity as at the end of the period and multiplied by 100%, is 132.7% (31 December 2025: 127.5%). The increase in gearing ratio of the Group was mainly due to the increasing borrowing as at 30 June 2026.

### PRINCIPAL RISKS AND UNCERTAINTIES AND RISK MANAGEMENT

The Group’s financial condition, results of operations, businesses and prospects would be affected by a number of risks and uncertainties including market risk (currency risk and interest rate risk), credit risk and liquidity risk.

#### Market risk

The Group’s activities expose it primarily to currency risk and interest rate risk. There has been no change in the Group’s exposure to these risk or the manner in which it manages and measure the risks.

#### Currency risk

Certain financial instruments are denominated in foreign currencies of respective group entities which are exposed to foreign currency risk. The Group currently does not have a foreign currency hedging policy. However, the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Interest Rate Risk

The Group is exposed to fair value interest rate risk for certain financial assets, financial liabilities and lease liabilities, which carried interests at fixed interest rates.

The Group is also exposed to cash flow interest rate risk for its interest bearing financial liabilities and certain of its interest bearing financial assets, which carried interests at variable interest rates.

The Group currently does not have an interest rate hedging policy. The management monitors interest rate risk exposure and will consider hedging significant interest rate exposure should the need arises. The Group aims at keeping borrowings at variable rates. The Group manages its interest rate exposures by assessing the potential impact arising from any interest rate movements based on interest rate level and outlook. The management will review the proportion of borrowings in fixed and floating rates and ensure they are within reasonable range.

### Credit Risk

The Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge the obligations by counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the condensed consolidated statement of financial position at the end of the reporting period.

The Group's credit risk is primarily attributable to its trade receivables. In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of trade debt at the end of each reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. The Group performs impairment assessment under expected credit loss model upon the application of IFRS 9 on trade receivables. In this regard, the Directors consider that the Group's credit risk is significantly reduced.

The Group has applied the simplified approach to measure the loss allowance on trade receivables at lifetime expected credit loss.

The credit risk on bill receivables at fair value through other comprehensive income are limited as those bills are issued by banks with high credit ratings assigned by international credit-rating agencies and no history of default in the past, thus no loss allowance provision for bills was recognised during the period.

For other receivables, rental deposits and amount due from an associate, management of the Group makes periodic collective assessment as well as individual assessment on the recoverability of these receivables based on historical settlement records, past experience and also available and supportive forward-looking information. The management of the Group believes that the credit risk inherent in the Group's outstanding balances of other receivables, rental deposits and amount due from an associate is insignificant.

The Group has concentration of credit risk on bank balances and restricted bank deposits which are deposited with several banks. However, the credit risk on bank balances and restricted bank deposits is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies, and expected credit loss is insignificant.

The Group has no significant concentration of credit risk on trade and bill receivables and other receivables, with exposure spread over a large number of counterparties and customers.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Liquidity Risk

Liquidity risk is the risk of non-availability of funds to meet all contractual financial commitments as they fall due. In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows.

### TREASURY POLICIES

The Group has adopted a prudent treasury policy and thus maintained a healthy liquidity position throughout the period. The Group strives to reduce credit risk by performing ongoing credit assessments and evaluations of the financial status of its customers. To manage liquidity risk, the Board closely monitors the Group's liquidity position to ensure that the liquidity structure of the Group's assets, liabilities and other commitments can meet its funding requirements from time to time.

### FOREIGN EXCHANGE EXPOSURE

The Group's foreign currency transactions are mainly denominated in RMB and US\$. The Group has currency exposure as certain income and expenses incurred in mainland China were denominated in RMB and certain overseas sales income were denominated in US\$ and other currencies. The Group is subject to foreign exchange rate risk arising from future commercial transactions and recognised assets and liabilities which are denominated in RMB. During the period, the Group did not commit to any financial instruments to hedge its exposure to foreign currency risk.

### CAPITAL EXPENDITURES

During the period, the Group's capital expenditures consisted of additions to property, plant and equipment and construction in progress in our operations amounting to approximately RMB57.4 million (2025: RMB70.1 million).

### CAPITAL COMMITMENT

As at 30 June 2026, the Group had a capital commitment of approximately RMB8.9 million (31 December 2025: RMB12.0 million). The capital commitments were primarily related to the purchase of machinery and equipment in mainland China for existing usage. We intend to fund these commitments with cash generated from our operations and bank and other borrowings.

### PLEDGE OF ASSETS

As at 30 June 2026, save as (i) restricted bank deposits of approximately RMB40.5 million (31 December 2025: RMB51.1 million); (ii) right-of-use assets and property, plant and equipment of approximately RMB60.1 million and RMB112.7 million respectively (31 December 2025: right-of-use assets and property, plant and equipment of approximately RMB61.5 million and RMB304.3 million respectively); (iii) bill receivables at fair value through other comprehensive income of approximately RMB78.3 million (31 December 2025: RMB65.4 million); (iv) cash and cash equivalents of approximately RMB1.3 million (31 December 2025: RMB1.8 million); (v) inventories of approximately RMB21.7 million (31 December 2025: RMB12.4 million); and (vi) trade receivables and other receivables and prepayments of approximately RMB6.2 million (31 December 2025: RMB1.8 million) to secure the borrowings, the Group did not pledge any other assets.

### CONTINGENT LIABILITIES

As at 30 June 2026, the Group did not have any significant contingent liabilities (31 December 2025: Nil).

### DIVIDEND

The Board has resolved not to recommend the payment of any interim dividend for the six months ended 30 June 2026 (2025: Nil).

## MANAGEMENT DISCUSSION AND ANALYSIS

### EMPLOYEES AND REMUNERATION POLICIES

As at 30 June 2026, the Group had a total of 1,123 (2025: 1,093) employees, including the Directors. Total staff costs (including Directors' remuneration) was approximately RMB82.6 million (2025: RMB71.8 million) for the six months ended 30 June 2026.

Remuneration is determined with reference to market norms and individual employees' performance, qualification and experience.

On top of the basic salaries, bonuses may be paid by reference to the Group's performance as well as the individual's performance. Other major staff benefits include contributions to defined contribution retirement benefit plan, Hong Kong's Mandatory Provident Fund Scheme and the state-managed retirement benefit schemes.

The salaries and benefits of the Group's employees are kept at a competitive level and employees are rewarded on a performance related basis within the general framework of the Group's salary and bonus system, which is reviewed annually. The Group also operates a share option scheme adopted by the Company on 16 December 2019 where options to subscribe for Shares may be granted to the Directors and employees of the Group.

The Company adopted a share award plan on 1 March 2023. Please refer to the section headed "Share Award Plan" below for details.

### SIGNIFICANT INVESTMENTS

During the six months ended 30 June 2026, the Group did not hold any significant investment or capital assets (2025: Nil).

### FUTURE PLANS FOR MATERIAL INVESTMENTS AND CAPITAL EXPENDITURES

The Group did not have any other plans for material investments or capital expenditures in the coming year.

The Group will finance the future acquisitions through internally generated funds and other fund-raising activities, including but not limited to issue of new debts or equity instruments.

### MATERIAL ACQUISITIONS AND DISPOSALS OF SUBSIDIARIES, ASSOCIATES AND JOINT VENTURES

The Group has not acquired nor disposed of any of its material subsidiaries, associates or joint ventures during the six months ended 30 June 2026.

### EVENTS AFTER REPORTING PERIOD

The Group does not have any material subsequent event after the six months ended 30 June 2026 and up to the date of this report.

## OTHER INFORMATION

### CORPORATE GOVERNANCE PRACTICES

The Company has adopted the code provision (the “**Code Provisions**”) as set out in the Corporate Governance Code (the “**CG Code**”) in Appendix C1 to the Rules Governing the Listing of Securities on the Stock Exchange (the “**Listing Rules**”). During the six months ended 30 June 2026, the Company has complied with all the Code Provisions of the CG Code, save and except for the Code Provision C.2.1. Details of the deviation from the Code Provision C.2.1 are explained in the section “Chairman and Chief Executive Officer” of this report. The Board is committed to complying with the principles of the CG Code contained in the Appendix C1 to the Listing Rules. The Company is committed to achieving and maintaining high standards of corporate governance consistent with the needs and requirements of its business and the Shareholders. The corporate governance principles of the Company emphasise a quality board, sound internal controls, and transparency and accountability to all the Shareholders. The Board will continue to review and enhance its corporate governance practice to ensure compliance with the CG Code, and make necessary changes as appropriate.

### CHAIRMAN AND CHIEF EXECUTIVE OFFICER

Under Code Provision C.2.1 of the CG Code, the roles of the Chairman of the Board and chief executive officer of the Company should be separated and should not be performed by the same individual.

During the six months ended 30 June 2026, the Company has not separated the roles of the Chairman of the Board and the Chief Executive Officer of the Company. Mr. Yin Yanbin (“**Mr. Yin**”) is the Chairman of the Board and also the Chief Executive Officer of the Company responsible for overseeing the operations of the Group during the period. The Board believes that vesting the roles of both the Chairman of the Board and the Chief Executive Officer of the Company in the same person provides the Company with strong and consistent leadership, and allows for effective and efficient planning and implementation of business decisions and strategies. The Board shall nevertheless review the structure from time to time to ensure appropriate move is being taken should suitable circumstances arise.

### DIRECTORS’ SECURITIES TRANSACTIONS

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the “**Model Code**”) as set forth in Appendix C3 to the Listing Rules as its own code of conduct regarding the dealings in securities of the Company by the Directors and employees during the six months ended 30 June 2026.

Having made specific enquiry of all Directors, each Director has confirmed that he/she has complied with the required standard set out in the Model Code during the six months ended 30 June 2026.

## OTHER INFORMATION

### RELATED PARTY TRANSACTIONS/EXEMPTED CONTINUING CONNECTED TRANSACTIONS

Details of the related party transactions of the Group are set out in notes 15 and 19 to the condensed consolidated financial statements.

During the period, the Group had the following continuing connected transactions which are exempted from the reporting, announcement or independent shareholders' approval requirements under Rule 14A.90 of the Listing Rules and are included herein for information only.

On 1 April 2025, an agreement was entered into between Nanjing Hanhe Enterprises Co., Ltd. ("**Hanhe Enterprises**"), an indirectly-owned subsidiary of Mr. Yin, as lender and the Group as borrower, pursuant to which Hanhe Enterprises had agreed to provide a loan facility to the Group in the aggregate amount of RMB100,000,000 at interest rate of 3.5% per annum. On 1 January 2026, a supplemental agreement was entered into between the parties to reduce the interest rate to 3.3% per annum. The repayment term of each respective loan will be mutually agreed upon the respective loan advance dates. As at 30 June 2026, the outstanding loan from Hanhe Enterprises amounting to approximately RMB18,000,000 (31 December 2025: RMB15,850,000), with repayment date of 30 June 2028. Detailed terms of the loan facilities were disclosed in note 15 of the condensed consolidated financial statements.

On 1 April 2025, an agreement was entered into between Nanjing Jinhan Tianxia Sports Culture Development Company Limited ("**Jinhan Tianxia**"), an indirectly-owned subsidiary of Mr. Yin, as lender and the Group as borrower, pursuant to which Jinhan Tianxia had agreed to provide loans to the Group in the aggregate amount of RMB100,000,000 at an interest rate of 3.5% per annum. On 1 January 2026, a supplemental agreement was entered into between the parties to reduce the interest rate to 3.3% per annum. The repayment term of each respective loan will be mutually agreed upon the respective loan advance dates. As at 30 June 2026, the outstanding loan from Jinhan Tianxia amounted to RMB56,800,000 (31 December 2025: RMB57,300,000), with repayment date of 30 June 2028. Detailed terms of the loan facilities were disclosed in note 15 of the condensed consolidated financial statements.

As at the dates of the above principal loan agreements, Mr. Yin held approximately 54.79% of the issued share capital of the Company in aggregate and is a Controlling Shareholder and is therefore a connected person of the Company. Accordingly, the above principal loan agreements constitute connected transactions of the Company under Chapter 14A of the Listing Rules.

The above principal loan agreements had been reviewed by the Independent Non-executive Directors who have confirmed that the transactions were entered into: (a) in the ordinary and usual course of business of the Group; (b) either on normal commercial terms or, if there are not sufficient comparable transactions to judge whether they are on normal commercial terms, on terms no less favourable to the Group than terms available to or from (as appropriate) independent third parties; and (c) in accordance with the relevant agreements governing such transactions on terms that are fair and reasonable and in the interests of Shareholders as a whole. Accordingly, the above principal loan agreements are fully exempted from the shareholders' approval, annual review and all disclosure requirements under Rule 14A.90 of the Listing Rules.

Save in the notes to the condensed consolidated financial statements and as disclosed above, the Group has not entered into any connected transaction or continuing connected transaction during the year which should be disclosed pursuant to the requirements under the Listing Rules.

### MANAGEMENT CONTRACTS

No contracts concerning the management and administration of the whole or any substantial part of the business of the Company were entered into or existed during the period.

As at the date of this report, the total number of Shares available for issue under the Share Option Scheme was 100,000,000 Shares, representing approximately 9.91% of the total number of issued Shares on such date.

## SHARE AWARD PLAN

On 1 March 2023, the Company adopted a share award plan (the “**Share Award Plan**”). Details of which were disclosed in the announcement (the “**Announcement**”) dated 1 March 2023 (the “**Adoption Date**”). The purposes of the Plan are to recognise and reward the contribution of Eligible Participants (as defined in the Announcement), to give incentives to Eligible Participants in order to retain them for the continual operation and development of the Group and to attract suitable personnel for further development of the Group.

The vesting date in respect of any award shall be not less than 12 months from the grant date. The aggregate maximum number of Shares (the “**Plan Mandate Limit**”) (i) to be purchased by the trustee by applying the group contribution; and (ii) to be issued under any other share option schemes adopted or to be adopted by the Company from time to time, shall not exceed 10% of the total number of issued Shares as at the adoption date or the relevant date of approval of the refreshment of the Plan Mandate Limit. The aggregate maximum number of Shares (the “**Service Provider Sub-limit**”) to be purchased by the trustee by applying the group contribution for the awards to be awarded to all service providers pursuant to the Share Award Plan shall not exceed 10% of the total number of issued Shares as at the adoption date or the relevant date of approval of the refreshment of the Service Provider Sub-limit. The maximum entitlement of each Eligible Participant shall not exceed 1% of the issued Shares at the Adoption Date (i.e. 10,000,000 Shares). The number of awards available for grant as of 1 January 2026 and 30 June 2026 are 64,276,000 Shares and 66,298,000 Shares, respectively, representing approximately 6.37% and 6.57% of the total number of issued share capital of the Company at such dates respectively.

The Share Award Plan shall be valid and effective for a period of 10 years commencing from the adoption date but may be terminated earlier as determined by the Board or the Remuneration Committee, provided that such termination shall not affect any subsisting rights of any selected participant.

On 23 December 2024, the Company entered into a public relation consultancy agreement with DLK Advisory Group Limited (the “**Service Provider**”), pursuant to the which, as the settlement of part of the consultancy service, 33,035 Shares will be granted to the Service Provider on 23 June 2025 and the remaining 33,035 Shares will be granted on 23 September 2025, at nil consideration with a vesting period of 1 year from the date of grant. Details of the transaction can be referred to the announcements of the Company dated 23 December 2024. As at the date of this report, the Company is negotiating an extension with the Service Provider and no shares have been granted to the Service Provider.

## OTHER INFORMATION

Note a: Capital reserve represented (i) the capital injection from owners of Nanjing Goldenhighway International Supply Chain Management Company Limited ("GHW International SCM"), a subsidiary of the Company, in excess of nominal value of share capital amounting to RMB26,071,000 prior to reorganisation; (ii) contribution from shareholders net of capital gain tax related to reorganisation amounting to RMB28,336,000; (iii) acquisition of additional interest in Taian Havay Group Co., Ltd., a subsidiary of the Company, related to reorganisation amounting to RMB1,717,000; (iv) deemed contribution from a shareholder in relation to a waiver of amount due to a shareholder amounting to RMB444,000; (v) effect of re-denominating the par value of the Company's shares amounting to RMB60,000; and (vi) deemed contribution from a shareholder in relation to loans from a related company controlled by Mr. Yin Yanbin amounting to RMB1,735,000.

Note b: Pursuant to the relevant regulation in the People's Republic of China (the "PRC"), a subsidiary of the Group in the mainland of China is required to provide for safety reserve based on annual sales amount. The reserve can be used for improvements of safety storage and production process, and eligible to be transferred to retained earnings upon utilisation.

Note c: As stipulated by the relevant laws in the mainland of China, the mainland of China subsidiaries are required to maintain a statutory reserve fund. The minimum transfer to statutory reserve is 10% of profit after tax of the mainland of China subsidiaries according to the mainland of China subsidiaries' statutory financial statements. No appropriation is required if the balance of the statutory reserve has reached 50% of the registered capital of the mainland of China subsidiaries.

Note d: On 12 August 2024, all the conditions precedent under the capital increase agreement entered into on 10 May 2024 among GHW International SCM and Tai'an Taiying Caijian Equity Investment Fund Partnership (Limited Partnership) (泰安市泰鷹財建股權投資基金合夥企業 (有限合夥)) (the "Existing Shareholders"), Tai'an Jinwei Ruokun Investment Partnership (Limited Partnership) (泰安市金威若鯤投資合夥企業 (有限合夥)), Tai'an Jinwei Ruopeng Investment Partnership (Limited Partnership) (泰安市金威若鵬投資合夥企業 (有限合夥)), Tai'an Jinweilai Investment Partnership (Limited Partnership) (泰安市金威泰投資合夥企業 (有限合夥)), Nanjing Weijinhe Investment Partnership (Limited Partnership) (南京市威金合投資合夥企業 (有限合夥)) and Nanjing Jinwei Yongzheng Investment Partnership (Limited Partnership) (南京市金威永正投資合夥企業 (有限合夥)) (the "Subscribers") and Havay Group (the "Target Company") (the "Capital Increase Agreement") had been fulfilled and the completion of the Capital Increase Agreement (the "Completion") took place on the same date. Upon the Completion, GHW International SCM, a wholly-owned subsidiary of the Company, and the Subscribers own approximately 91.95% and 8.05% of the effective interest in the registered capital of the Target Company, respectively. The Target Company is no longer wholly-owned by the Company but has become a non-wholly owned subsidiary of the Company. Details of the transaction can be referred to the announcements of the Company dated 10 May 2024, 21 June 2024 and 12 August 2024.

## 2. BASIS OF PREPARATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" issued by the International Accounting Standards Board ("**IASB**") as well as with the applicable disclosure requirements of Appendix D2 to the Listing Rules.

The condensed consolidated financial statements are presented in RMB, which is the same as the functional currency of the Company.

## 3. SIGNIFICANT ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values, as appropriate.

Other than the change in accounting policies resulting from application of amendments to IFRS Accounting Standards, agenda decisions of the IFRS Interpretations Committee (the "**Committee**") of the IASB, and application of certain accounting policies which became relevant to the Group in the current interim period, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2026 are the same as those presented in the Group's annual consolidated financial statements for the year ended 31 December 2025.

In the current interim period, the Group has applied the amendments to IFRS Accounting Standards issued by the IASB, for the first time, which are mandatory effective for the annual period beginning on or after 1 January 2026 for the preparation of the Group's condensed consolidated financial statements.

The application of the amendments to IFRS Accounting Standards and the Committee's agenda decisions in the current interim period has had no material impact on the Group's financial positions and performance for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

The categorisation of types of goods has been revised to provide a more precise and accurate representation of the Group's financial performance and operations.

The Group's revenue are under fixed price arrangement with corporate customers. Under the Group's standard contract terms, the credit term is generally 60 days and customers have a right to exchange or return the goods only under the condition of quality issue tested by a third-party testing institution. In the opinion of Directors, based on historical experiences, the impact of revenue reversal would be immaterial.

All performance obligations for sales of goods are for periods of one year or less. As permitted under IFRS 15, the transaction price allocated to unsatisfied performance obligations as at the end of the reporting period is not disclosed.

For the purpose of resources allocation and performance assessment, the key management of the Group, being the chief operating decision maker, reviews the consolidated results as a whole when making decisions about allocating resources and assessing performance of the Group and hence, the Group has only one reportable segment and no further analysis of this single segment is presented.

The basis of determining the inputs and assumptions and the estimation techniques used in the condensed consolidated financial statements for the six months ended 30 June 2026 are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2025.

During the six months ended 30 June 2026, the Group provided impairment allowance of RMB294,000 (2025: RMB136,000). In particular a specific loss allowance of RMB294,000 (2025: RMB136,000) has been made to individual debtors because the debtors are in severe financial difficulty and there is no realistic prospect of recovery.

During the six months ended 30 June 2026, the Group reversed the impairment allowance of RMB134,000 (2025: RMB2,492,000).

### 20. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

The following provides information about how the Group determines fair value of various financial assets.

#### (i) Fair value measurement of the Group's financial assets that are measured at fair value on a recurring basis

Some of the Group's financial assets are measured at fair values at the end of the reporting period. The following table gives information about how the fair values of these financial assets are determined (in particular, the valuation technique(s) and inputs used).

| Unobservable                      | Fair value as at            |                               | Fair value hierarchy | Valuation techniques and key inputs                                                                                                                                 |
|-----------------------------------|-----------------------------|-------------------------------|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Bill receivables at FVTOCI        | RMB93,780,000               | RMB89,867,000                 | Level 2              | Discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of the bill receivables |

#### (ii) Fair value of the Group's financial assets and financial liabilities that are not measured at fair value on a recurring basis

The management of the Group considers that the carrying amounts of the financial assets and financial liabilities of the Group recorded at amortised cost in the condensed consolidated financial statements at the end of the reporting period approximate their fair values.

The fair values of financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on a discounted cash flow analysis.
