The board of directors (the "**Board**") of the Company hereby informs the shareholders of the Company and potential investors that, based on the currently available unaudited consolidated management accounts of the Group for the year ended 30 June 2026 and other information currently available to the Board, the Group is expected to record a loss attributable to shareholders (before taking into account of other comprehensive income & expenses) ranging from approximately HK$52 million to 58 million, as compared with a loss attributable to shareholders of approximately HK$44 million (before taking into account of other comprehensive income & expenses) for the year ended 30 June 2025. The increase in loss attributable to shareholders for the year ended 30 June 2026 was attributed to:

(i) the substantial decrease in operating results from smart city solution business segment, driven by difficulties in sourcing critical components such as chip and GPU due to geopolitical sanctions, a significant increase in the provision for expected credit loss on account receivables as a result of the deteriorating triangular debt problems, and prolonged payment cycles from customers;

(ii) a decrease in operating results from renewable energy business segment as a result of weakened market sentiment and reduced investment in solar photovoltaic systems in Hong Kong as the FiT scheme is approaching its expiry in the year 2033; and

(iii) the unexpected delay in commercial production of the Innovative Ecoglory Oxyhydrogen Gas System after deploying substantial amount of investment by the Group.
