INSIDE INFORMATION
SIGNING OF STRATEGIC COOPERATION FRAMEWORK AGREEMENT

This announcement is made by 160 Health International Limited (the "**Company**", together with its subsidiaries and consolidated affiliated entities, the "**Group**") pursuant to Rule 13.09 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**") and the Inside Information Provisions (as defined under the Listing Rules) under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

STRATEGIC COOPERATION FRAMEWORK AGREEMENT

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to announce that on September 16, 2026, Shenzhen 160 Internet Technology Co., Ltd.* (深圳市一六零網絡科技有限公司) ("**160 Internet Technology**"), an indirect wholly-owned subsidiary of the Group, entered into a strategic cooperation framework agreement (the "**Cooperation Framework Agreement**") with a limited liability company incorporated in Shenzhen, the PRC (the "**Partner**"). The Partner is a national high-tech enterprise focusing on the enterprise-grade computing power infrastructure sector, offering services such as equipment leasing and AI cloud computing power. The Partner was established for over 10 years with a registered capital of over RMB100 million, and has been recognized as a provincial-level specialized and sophisticated small and medium-sized enterprise and a municipal-level gazelle enterprise. To the best of the knowledge, information and belief of the Board, the Partner and its ultimate beneficial owners are third parties independent of the Company and its connected persons (as defined under the Listing Rules).

DETAILS OF THE COOPERATION

1. Consideration of cooperation

The Partner has preliminarily agreed to purchase a certain scale of enterprise-grade AI computing power infrastructure from 160 Internet Technology, with an estimated total cooperation amount of approximately RMB650 million. The estimated total cooperation amount is for reference only, and the exact configuration quantity and pricing of orders shall be separately negotiated by both parties based on prevailing market conditions at the time.

2. Term of cooperation

The Cooperation Framework Agreement is valid for a period of one year from September 16, 2026 to September 15, 2027.

3. Rules for execution of subsequent orders

The Partner shall issue a purchase requirement notice to 160 Internet Technology according to its project implementation progress. Within five working days of such requirement notice being received, 160 Internet Technology shall provide the Partner with a detailed configuration plan, a quotation based on market conditions at the time, and an estimated delivery cycle for the corresponding batch of AI computing power infrastructure. A formal AI Computing Power Infrastructure Purchase Order (the "**Purchase Order**") shall be signed after 160 Internet Technology and the Partner agree on all details of the corresponding batch of cooperation, including configuration, price, delivery, acceptance, and payment.

REASONS FOR AND BENEFITS OF SIGNING THE COOPERATION FRAMEWORK AGREEMENT

The Group is deeply rooted in the internet healthcare and wellness industry, having built a broad client base in the PRC by relying on its proprietary core products such as "160 AI Hospital". While deploying AI healthcare and wellness solutions for clients, the Group noticed huge demand among downstream clients for computing power infrastructure. Consequently, the Group decided to adopt an integrated solution of "healthcare AI agent + hardware + integrated debugging service" as a business entry point to provide overall delivery services that pair AI healthcare products with computing power infrastructure, thereby broadening the Group's revenue sources and opening up a new direction for business development. As of the date of this announcement, the Group has successfully completed the delivery of the first order of integrated solution. Following the successful practice of the first order, the Group has received multiple expressions of interest from the market regarding the AI computing power infrastructure within the framework of such solution.

The Board believes that signing the Cooperation Framework Agreement will help the Group accumulate large-scale delivery experience, laying a solid foundation for the ongoing delivery of integrated solutions to the healthcare and wellness industry and a broader client base, which aligns with the Group's long-term strategy of broadening revenue sources and cultivating new business growth drivers. The Cooperation Framework Agreement was entered into on normal commercial terms, and is fair and reasonable and in the interests of the Company and its shareholders as a whole.

GENERAL

The Board wishes to emphasize that the Cooperation Framework Agreement serves as the basis for cooperation between 160 Internet Technology and the Partner and is not legally binding. The cooperation scale of approximately RMB650 million set out in the Cooperation Framework Agreement is an estimate and does not represent a firm commitment to cooperate. The exact scale and amount of future cooperation will depend on a combination of factors, including the actual demand of the Partner, changes in market prices at the time, and the supply capacity of the Group, which shall be negotiated and determined between 160 Internet Technology and the Partner in the formal Purchase Order.

The agreement and the transactions contemplated thereunder do not constitute a notifiable transaction under Chapter 14 of the Listing Rules, nor do they constitute a connected transaction under Chapter 14A of the Listing Rules.

Shareholders and prospective investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
160 Health International Limited
