北京五一视界数字孪生科技股份有限公司

(A joint stock company incorporated in the People's Republic of China with limited liability)

(Stock Code: 06651)

VOLUNTARY ANNOUNCEMENT – BUSINESS UPDATE

Reference is made to the announcement of Beijing 51WORLD Digital Twin Technology Co., Ltd. (the “**Company**”, together with its subsidiaries, the “**Group**”) dated August 20, 2026 in relation to the AperData business of the Company (the “**Announcement**”). Unless otherwise defined, terms used in this announcement shall have the same meanings as those defined in the Announcement.

The Board is pleased to announce that, since the launch of the Group’s embodied intelligence business (the “**Aper Business**”) on August 18, 2026, the market response has been enthusiastic and order demand has continued to grow. As of the date of this announcement, the accumulated amount of orders on hand for the Aper Business (including AperData and AperOne) has exceeded RMB200 million. The customers cover embodied data collection companies, embodied robot body companies, world model companies, and end-use scenario enterprises such as industrial parks and mines. It is expected that over 90% of these orders will achieve mass production and delivery within this year.

The Aper Business of the Group includes:

AperData (embodied intelligence data platform): directly addresses the challenge of “data scarcity” in embodied intelligence. The Group and its hardware partner, Union Image, have co-established a hardware-software integrated collection system, comprising a complete data link from data collection and data processing to model training, which features the hardware-software integration of AperEgo and AperOS and cloud-based collaboration.

AperOne (embodied application closed-loop platform): directly addresses the challenge of “low fault tolerance” in embodied intelligence. It establishes a complete closed loop of “reconstruction → training → evaluation → deployment → operation”, assisting embodied robots in specific scenarios to move from “rolling off the production line” to large-scale “deployment”.

As the embodied intelligence industry accelerates into the stage of large-scale implementation, the market demand for high-quality real-world data and embodied application platforms is becoming increasingly robust. The Aper Business will further open up a broader space for the subsequent revenue growth of the Group.

Shareholders and investors of the Company are reminded that this announcement is published as a voluntary announcement to inform the public of the latest business developments of the Company. The amount of orders on hand and relevant prospects set out in this announcement represent preliminary estimates made by the Group based on the current order status and past experience, and do not constitute any forecast or guarantee by the Company in respect of its future performance, profitability or any financial indicators. Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Beijing 51WORLD Digital Twin Technology Co., Ltd.
北京五一视界数字孪生科技股份有限公司
