COMPANY PROFILE

The Company was established as a joint stock company with limited liability in the People's Republic of China (the "PRC" or "China") under the Company Law of the PRC on 12 September 2007. The A Shares and H shares issued by the Company were listed on the Shanghai Stock Exchange and the Main Board of The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange") on 3 December 2007 and 7 December 2007, respectively.

We are one of the largest multi-functional integrated construction groups in the world in terms of the total revenue of the engineering contract. We offer a full range of construction-related services, including infrastructure construction, survey, design and consulting services and engineering equipment and component manufacturing, and also expand to other businesses such as property development and mining development.

We have outstanding advantages in the construction of infrastructure facilities such as railways, highways, municipal works and urban rails. In particular, we hold leading positions in the design and construction of bridges, tunnels and electrified railways, and the design and manufacturing of bridge steel structures and turnouts in the PRC, which have achieved advanced international standards. While we operate in every province across the PRC, we have also explored extensive global markets.

Adhering to the motto of "striving to challenge limits and achieve excellence", the Company is committed to continuous development to create a brighter and better future.

On 30 March 2026, the Company held the twentieth meeting of the sixth session of the Board, which considered and approved the Proposal on Mr. KONG Dun's Cessation of Serving as the Vice President and Chief Engineer of China Railway Group Limited, and agreed to remove Mr. KONG Dun from the position of Vice President and Chief Engineer of the Company due to retirement.

On 28 April 2026, Mr. ZHAO Bin tendered his resignation to the Board as Chief Economist due to health reasons. Upon his resignation, Mr. ZHAO Bin ceased to serve as the Chief Economist of the Company.

On 31 July 2026, Mr. MA Yonghong tendered his resignation as a joint company secretary of the Company and the secretary to the Board with effect from 1 August 2026 due to reaching retirement age. After his resignation, Mr. MA Yonghong has been appointed by the Company as an external director of its subsidiary. Mr. CHEN Wenjian, the Chairman of the Company, temporarily acts as the secretary to the Board until a new secretary to the Board is appointed. Mr. TAM Chun Chung, another joint company secretary of the Company, continues to serve as the company secretary of the Company.

On 31 August 2026, Mr. SUN Cui tendered his resignation to the Board as Chief Accountant due to reaching retirement age. Upon his resignation, Mr. SUN Cui ceased to serve as the Company's Chief Accountant.

4 Dealings of Securities by Directors

The Company has adopted the Model Code as the code of conduct regarding securities transactions by directors. The Company has made enquiries to all directors, and each director confirmed that he/she has complied with the Model Code throughout the period from 1 January 2026 to 30 June 2026.

MANAGEMENT DISCUSSION AND ANALYSIS

China Railway is one of the largest multi-functional integrated construction groups in the world, enabling it to offer a full range of construction and industrial products and related services to our customers. The Company holds a leading industry position in fields such as engineering construction, design consulting, and equipment manufacturing. The Company also diversifies its business and expands its value-added services by venturing into other businesses such as property development, financial and merchandise trading, asset operation and resource utilization. After years of practice and development, the Company has gradually formed a product and industrial layout that is vertically “integration within the construction sector” and horizontally “focused on core business with related diversification”.

1 Industry Development Overview

Engineering construction

(1) Domestic

In the first half of 2026, national fixed-asset investment (excluding rural households) was RMB22,637.0 billion, representing a year-on-year decrease of 5.7%. Of this, infrastructure investment decreased by 2.4% year-on-year, with the growth rate declining by 11.3 percentage points compared with the same period last year. The construction sector remains in a period of profound transformation and adjustment, with the market having shifted comprehensively from incremental expansion to stock-based competition. The sector has moved beyond extensive, scale-driven growth and entered a transitional phase focused on improving quality, enhancing efficiency and optimising structure. However, with the accelerated planning and construction of the “Six Networks”, the successive implementation of specialised plans such as urban renewal, and the orderly deployment of policy-driven funds, including ultra-long-term special government bonds and central budgetary investment, there remains potential and scope for infrastructure investment in areas such as new-type infrastructure construction, urban renewal, the upgrading of traditional facilities, and addressing shortcomings in people’s livelihoods.

(2) International

In the first half of 2026, the external environment was complex and volatile, with intensifying geopolitical conflicts and their deepening impact, and the volatility in international financial markets increased, presenting both opportunities and challenges for China’s overseas engineering contracting enterprises. According to statistics from the Ministry of Commerce, in the first half of 2026, new contracts secured under China’s overseas engineering contracting business totalled RMB866.06 billion, representing a decrease of 7.2% (equivalent to US\$125.64 billion, a decrease of 3.3%); turnover reached RMB606.26 billion, representing a year-on-year increase of 8% (equivalent to US\$87.95 billion, an increase of 12.6%). The newly signed engineering contracts by Chinese enterprises in countries participating in the “Belt and Road” initiative amounted to RMB787.48 billion, representing a year-on-year decrease of 3.4% (equivalent to US\$114.24 billion, an increase of 0.7%); completed turnover totalled RMB520.71 billion, representing a year-on-year increase of 11.8% (equivalent to US\$75.54 billion, an increase of 16.5%).

MANAGEMENT DISCUSSION AND ANALYSIS

Design and consulting

As a technology- and knowledge-intensive production-oriented service sector, design and consulting operates at the forefront of engineering construction projects across numerous industries, including architecture, transport, power, water conservancy. It runs throughout the entire life-cycle of engineering construction projects, providing comprehensive technical and management services to support project decision-making and implementation. It plays an irreplaceable supporting role in enhancing the investment returns and social benefits of engineering projects, driving technological and industrial upgrading, and promoting synergistic value creation across the industrial chain. In recent years, the design and consulting sector has faced a period of profound adjustment and transformation. Survey and design firms are confronted with a combination of pressures, including sluggish growth in traditional design and consulting services, cash-flow constraints in their core businesses, and the need to consolidate the economies of scale and profitability of new business lines. However, the continued advancement of national strategies such as green and low-carbon development, Digital China, urban-rural coordination and industrial upgrading has given rise to new demands within the design and consulting sector, providing the industry with new opportunities for development.

Equipment manufacturing

Since 2026, guided by policy and driven by market forces, China's equipment manufacturing sector has continued to serve as the core engine of industrial growth. The optimisation of the industrial structure has proceeded in tandem with the cultivation of new growth drivers. According to data from the National Bureau of Statistics, in the first half of the year, the value added of industrial enterprises above designated size nationwide increased by 5.4% year-on-year, with manufacturing increasing by 5.6% year-on-year. The value added of equipment manufacturing enterprises above designated size increased by 9.3% year-on-year, while that of high-tech manufacturing increased by 13.3% year-on-year. High-tech manufacturing and the equipment manufacturing sector have maintained relatively rapid growth, with output of emerging products such as new-energy equipment, integrated circuits and industrial robots achieving substantial increases; meanwhile, demand in traditional manufacturing has come under pressure, and domestic and international markets have shown divergent trends. At the policy level, the state has successively issued documents such as the Implementation Opinions on the "Artificial Intelligence + Manufacturing" Special Action (《「人工智能+製造」專項行動實施意見》) and the Guiding Opinions on the Construction of Zero-Carbon Factories (《零碳工廠建設指導意見》), continuously promoting the transformation of the manufacturing sector towards high-end, intelligent and green development, and fostering the development of new quality productive forces.

Featured property

In the first half of 2026, driven by a series of regulatory measures, the domestic property market as a whole exhibited characteristics of "overall stabilisation at the bottom with increasing divergence". Nationwide, indicators such as property development investment, the floor area of completed properties by property developers, and the sales area of new commercial housing continued to decline year-on-year; however, the rate of decline slowed marginally, inventory continued to be reduced, and the disparity between hot and cold markets across different tiers of cities widened. The second-hand property market was the first to show signs of recovery, thereby stimulating a virtuous cycle in the market. In April, the meeting of the Political Bureau of the Central Committee called for "efforts to stabilise the property market and steadily advance urban renewal", identifying the prevention of property risks as a key component of economic security. In May, the State Council issued the "15th Five-Year Plan" for Urban Renewal (《城市更新「十五五」規劃》), which further clarified six major tasks and 23 specific actions for urban renewal during the "15th Five-Year Plan" period. This has brought new opportunities for the development of the property sector and has become a key lever for stabilising the industry. Meanwhile, urban renewal will also serve as a key focus for unlocking the potential of urban resources. The business models of property enterprises will shift from large-scale new development to the renewal, revitalisation, operation and servicing of existing stock, thereby generating comprehensive effects such as stimulating investment, driving consumption and expanding opportunities for new industries.

Asset operation

As the opening year of the “15th Five-Year Plan”, 2026 saw the coordinated implementation and targeted deployment of macroeconomic cross-cycle adjustment policies, with their benefits continuing to materialise. Supported by measures such as ultra-long-term special government bonds, policy-based financial instruments and local government special-purpose bonds, infrastructure investment generally maintained moderate resilience; however, overall growth momentum remained weak, with investment characterised by pressure on total volume and structural divergence. In particular, investment in traditional transport and municipal infrastructure showed sluggish growth, with only certain sectors addressing bottlenecks and sub-sectors related to people’s livelihoods achieving structural recovery; growth in previously high-growth sectors such as pipeline transport and intermodal transport slowed significantly; conversely, investment in new-type infrastructure and high-tech industries grew strongly against the trend, while sectors with existing shortcomings, such as water transport, railway infrastructure and integrated logistics support, showed a modest recovery.

Resource utilization

In the first half of 2026, the global mineral resources sector was influenced by multiple factors, including ongoing disruptions caused by geopolitical conflicts, macroeconomic and monetary policy dynamics, and structural demand driven by the energy transition. Consequently, the security of strategic mineral resources rose to the top of the strategic agenda for nations worldwide, leading to a profound realignment of the mining landscape. Policy uncertainty increased in major international mining nations, while the supply of industrial metals remained tight in the medium-to-long term. On the demand side, a shift from traditional to new growth drivers continued. Demand from traditional manufacturing sectors saw a moderate recovery, while the power infrastructure, energy storage, new energy and digital computing sectors continued to expand, effectively driving demand for key mineral products such as copper and nickel. Gold’s role as a safe-haven asset and store of value became more pronounced, with prices fluctuating at elevated levels. Driven by fluctuating expectations regarding US dollar liquidity and the interplay of supply and demand fundamentals, commodity price volatility intensified during the first half of the year. Domestically, efforts to vigorously advance a new round of strategic initiatives for breakthroughs in mineral exploration continued, while the Implementation Regulations of the Mineral Resources Law of the People’s Republic of China (《中華人民共和國礦產資源法實施條例》) formally came into force, accelerating the industry’s transition towards intensive utilisation and green, intelligent development.

Financial and merchandise trading

(1) Financial

In the first half of 2026, the domestic financial sector thoroughly implemented the “Five Major Initiatives”, remained steadfast in its fundamental role of serving the real economy, and coordinated risk resolution, structural optimisation and digital and intelligent transformation, while focusing on empowering new quality productive forces and the real economy. The sector continued to maintain a strict regulatory and strong compliance-oriented approach, and as a whole, entered a phase of standardised, refined and high-quality development. The regulatory framework for the trust industry underwent comprehensive reform, with the new Measures for the Administration of Trust Companies (《信託公司管理辦法》) formally coming into force in 2026. These measures strengthened capital constraints and fiduciary responsibilities, eliminated the practice of rigid redemption, and strictly controlled non-standard channel business. Financial companies adhered to a policy of strict supervision, risk prevention and enhanced capacity-building, strictly controlling non-compliant financing and improper related-party transactions, and preventing the cross-transmission of risks between the industrial and financial sectors.

MANAGEMENT DISCUSSION AND ANALYSIS

(2) Merchandise trading

In the first half of 2026, China's foreign trade expanded rapidly, with its structure continuing to optimise and upgrade. The logistics sector, closely aligned with the development priorities of digitalisation, greening and integration, exhibited trends such as the deep integration of artificial intelligence and logistics, the upgrading of green supply chains, and the synergistic integration of industrial and supply chains. While these developments strengthened the foundations for growth, the sector also faced challenges posed by a complex and volatile international environment and the need to further bolster supply chain resilience, presenting an overall landscape featuring both opportunities and challenges.

Emerging business

In the first half of 2026, China continued to coordinate the high-quality development of both traditional and new infrastructure. Projects in the water conservancy and hydropower, clean energy, and ecological and environmental protection sectors accelerated their implementation and continued to improve their structure. In the water conservancy and hydropower sector, in the first half of the year, national investment in water conservancy construction reached RMB515.1 billion with a total of 33,000 projects under construction and 25 major projects newly commenced in the first half of the year. In the clean energy sector, in the first half of the year, 117 million kilowatts of new renewable energy capacity was connected to the grid nationwide, accounting for 73.9% of all new power generation capacity newly added nationwide; the cumulative installed capacity of domestic renewable energy reached 2.455 billion kilowatts, representing 60.7% of the country's total installed power generation capacity. In the field of ecology and environmental protection, efforts continued to be focused on the three major campaigns to safeguard blue skies, clear waters and clean soil, while advancing the integrated management of multiple pollutants and expanding the pilot programme for "waste-free cities". The national carbon emissions trading market was steadily expanded and refined; the voluntary greenhouse gas emissions reduction mechanism and the carbon footprint management system covering the entire industrial chain were accelerated; and market-based carbon reduction tools were further enhanced, helping to upgrade the green competitiveness of industrial chains.

2 Business Development Overview

In the first half of 2026, the Company embraced and practised the corporate values of "Creation, Quality and Brand", accelerated the "Two-Pronged" transformation and integrated development, continued to strengthen its core businesses with competitive advantages, consolidated asset quality, and strove to promote the Company's high-quality development to achieve a solid start to the "15th Five-Year Plan".

Shouldering the mission of serving the overall national interests. The Company was fully committed to advancing the construction of a "Transport-Power Nation" in a substantive and effective manner, and integrated deeply into major national strategies such as the coordinated development of the Beijing-Tianjin-Hebei region, the integrated development of the Yangtze River Delta, and the development of the Guangdong-Hong Kong-Macao Greater Bay Area. Key projects such as the Xi'an-Shiyan High-Speed Railway, the Ningma Urban Railway, Phase I of Wuhan Metro Line 12, and the Miyu Expressway in Yunnan were put into operation, while key engineering projects such as the Xihoumen Bridge and Xiamen's Third Eastern Corridor advanced steadily. The Company earnestly fulfilled its social responsibilities as a central state-owned enterprise, carrying out solid and effective assistance programmes for Xinjiang and Tibet as well as targeted assistance initiatives, and took full part in emergency relief and rescue operations following the Liuzhou earthquake and Typhoon Bavi.

Forging ahead amid operational pressures. In the first half of the year, the amount of new contracts was RMB1,005.68 billion, with a revenue of RMB473.107 billion and a profit before income tax of RMB13.548 billion. The operating cash conversion ratio improved by 16.13 percentage points year-on-year, the debt-to-asset ratio decreased by 0.7 percentage point compared with the beginning of the year, and trade payables and bills payable decreased by RMB70.715 billion compared with the beginning of the year. Against a backdrop of contracting industry demand and intensifying competition, the Company stabilised its core development foundations and demonstrated strong resilience. It rigorously enforced project performance management, implemented enhanced management of key and challenging projects, strengthened the coordinated allocation of resources, and made every effort to ensure the progress of construction projects. It carried out in-depth special campaigns to recover outstanding receivables, strengthened cash flow control, accelerated the disposal of inefficient and non-performing assets, and effectively reduced the debt-to-asset ratio, thereby robustly safeguarding the security of its cash flow.

Pressing ahead with reform and innovation in greater depth. Reforms in key areas advanced in depth; the Company's "15th Five-Year Plan" development blueprint was systematically mapped out; specialised integration was steadily advanced; and three-system reforms were deepened. Reforms to strengthen the industrial workforce were thoroughly advanced, with increased efforts to establish in-house specialised operational teams and in-house work crews for key production processes. The effectiveness of scientific and technological innovation improved at a faster pace. Key tasks, such as the third phase of the Central State-Owned Enterprises Key Projects Initiative and the original technology source sites initiative, proceeded in an orderly manner, with two achievements showcased at the 2026 World Artificial Intelligence Conference. Positive progress was made in the preparatory work for the Central SOEs Tunnel Boring Machine Innovation Consortium and the International Organisation for Underground Transport Engineering. Seven scientific and technological achievements were honoured with National Science and Technology Awards, with the Company ranking first among central SOEs in the construction sector in terms of the number of awards received.

Advancing high-quality "Belt and Road" cooperation. The Company deeply participated in high-quality "Belt and Road" cooperation. It fully leveraged its comprehensive strengths in core technological fields such as the survey and design of major infrastructure, engineering construction, high-end equipment and mineral resources, coordinated both domestic and international markets and integrated high-quality global resources to push forward its "going global" strategy. During the reporting period, the Company successfully secured contracts for key projects including Ho Chi Minh City Metro Line 2 in Vietnam, the Arenor Molybdenum Mine Stripping and Mine Construction Project in Sukhbaatar Province, Mongolia, and the NESBA & SAFA Apartment Block Project in Sharjah, United Arab Emirates. Construction commenced on the China-Kyrgyzstan-Uzbekistan Railway, freight services commenced on the Hungarian section of the Hungary-Serbia Railway, and the Ulaanbaatar Central Sewage Treatment Plant, a major China-Mongolia cooperation project, was officially commissioned. Core equipment products, such as shield machines and TBMs, achieved rolling operations in high-end markets including Italy and Austria.

In the first half of 2026, the Company's new contract value amounted to RMB1,005.68 billion, representing a year-on-year decrease of 9.3%. Among which, domestic business recorded new contracts amounting to RMB935.09 billion, representing a year-on-year decrease of 5.0%, while overseas business recorded new contracts amounting to RMB70.59 billion, representing a year-on-year decrease of 43.5%.

Engineering construction

The Company's construction business covers sectors including railways, highways, municipal works, building construction and urban rail transit, with operations spanning more than 100 countries and regions across the globe. The Company holds Special Grade qualifications for general contracting in a wide range of construction sectors, including railway engineering, highway engineering, municipal public works, building construction, port and waterway engineering, water conservancy and hydropower engineering, and mining engineering. The Company's basic business model is to secure orders through market competition both domestically and internationally, and to undertake survey, design, procurement, construction, operation and other tasks of engineering projects in accordance with contractual agreements through approaches such as engineering, procurement and construction and general contracting, while being responsible for the quality, safety and schedule of the contracted projects. The Company has long maintained a leading position in China's infrastructure construction industry and is one of the largest construction engineering contractors in the world. The Company owns three national laboratories (engineering research centres), namely the National Engineering Research Centre for High-Speed Railway Construction Technology (高速鐵路建造技術國家工程研究中心), the National Key Laboratory of Tunnel Boring Machines and Intelligent Operation and Maintenance (隧道掘進機及智能運維全國重點實驗室), and the National Key Laboratory of Intelligent and Green Bridge Construction (橋樑智能與綠色建造全國重點實驗室), as well as 10 postdoctoral workstations, one national-local joint engineering research centre (the National-Local Joint Engineering Research Centre for Digital Rail Transit Technology Research and Application), and 62 provincial and ministerial-level R&D centres (laboratories). The Company represents the most advanced technological level in terms of the construction of railways, bridges, tunnels and rail transit in China. The Company is one of the major infrastructure construction forces under the "Belt and Road" initiative, and the main contractor for representative "Belt and Road" projects including the China-Laos Railway, the Jakarta-Bandung High-Speed Railway in Indonesia, the Hungary-Serbia Railway, the Padma Bridge and Railway Connection Project in Bangladesh, and the China-Kyrgyzstan-Uzbekistan Railway.

Design and consulting

The Company's design and consulting services are at the forefront of the industry, covering the full spectrum of infrastructure development, from preliminary research, planning consultancy, cost evaluation, survey and design, construction supervision, and general contracting to product industrialisation. The Company's businesses span a wide range of traditional advantageous sectors, including railways, urban rail transit, highways, municipal works, building construction, water transport, water conservancy, and hydropower survey and design. The Company is also actively expanding into new sectors and fields such as new infrastructure, smart transport, civil aviation airports, ports and terminals, urban regeneration, compressed air energy storage, and energy conservation and environmental protection. The Company's basic business model involves securing design and consulting orders through market-oriented competition both domestically and internationally, and providing design, consulting and related services for engineering projects in accordance with contractual agreements. Besides, the Company deeply integrates new technologies such as Building Information Modelling (BIM), artificial intelligence and "air-space-ground" integration, continuously exploring innovative production and operation models for design and consulting business. By fully leveraging its core advantages in the planning of urban transportation infrastructure, and driven by both market traction and spatial expansion, the Company utilises digital and intelligent transformation to activate new quality productive forces, continuously strengthening its integrated service capabilities across the industrial chain to achieve collaborative and mutually beneficial development throughout the entire industrial chain. In the 2026 ENR rankings of the world's 150 largest design firms and the 225 largest international design firms, the Company was ranked 34th and 131st respectively.

MANAGEMENT DISCUSSION AND ANALYSIS

Equipment manufacturing

The Company's equipment manufacturing business mainly serves the infrastructure construction domestically and overseas, and its products cover turnouts, tunnel construction equipment, steel structures for bridge construction, engineering construction machinery, fabricated building components and rail transit electrification equipment, etc. The basic operation mode is mainly to obtain orders through market competition at home and abroad, and provide relevant products and services with guaranteed quality and quantity on schedule according to the contract. The Company has a leading position in the field of high-end equipment manufacturing related to transportation infrastructure such as railways, highways, urban rail transit and underground engineering in the country and even the world. It has outstanding advantages in technological innovation capabilities, core technical advantages, manufacturing capabilities and brand recognition. The Company is the world's leading shield/TBM research and development manufacturer, the world's leading steel structure manufacturer of turnouts and bridges, the leading railway construction equipment manufacturer in China, and the world's leading manufacturer of infrastructure construction service equipment. The market share of the products developed and manufactured by the Company, including tunnel boring machines, specialised mechanised tunnelling equipment, construction machinery, railway switches and steel bridges, continues to lead the industry. CRHIC (stock code: 600528.SH), a majority-owned subsidiary of the Company, has the most complete spectrum of products in the field of railway infrastructure equipment in China and is the only industrial enterprise in A-share main board that mainly engages in high-end equipment for rail transit and underground excavation. CRHEEC (stock code: 688285.SH) is an important supplier engaging in the research and development, production and system integration of domestic electrified catenary components and power supply equipment for urban rail transit. CRPCC (stock code: 300374.SZ) is a supplier with rich product structures and integration service capability of prefabricated buildings in the domestic prefabricated building component industry, and can provide a complete set of solutions for prefabricated buildings.

Property development

The Company's property development business possesses integrated capabilities across the entire industry chain, including investment and financing, design and research and development, construction, commercial operations, property management and asset revitalisation, enabling it to provide comprehensive solutions and services for integrated urban development and operations. Business scope covers a variety of business formats including secondary property development, primary land preparation, urban regeneration, social housing, properties above metro stations, cultural tourism and wellness, and industrial real estate. In recent years, the Company's property business has remained focused on major national development strategies, implemented property market regulation policies, actively responded to urban renewal initiatives and the call for 'quality housing', and endeavoured to establish a new model for property development. By accelerating the transformation and upgrading of its property operations, the Company is gradually shifting from traditional commercial property development towards integrated urban development that combines multiple business formats, industries and functions. In the first half of 2026, the Company's property business proactively addressed new market developments. On the one hand, it continued to optimise its investment layout and structure, with new investments concentrated on high-quality projects in core first- and second-tier cities; it implemented a comprehensive business management philosophy, newly commenced projects fully implemented the "Good Homes" construction standards, and focused on enhancing product competitiveness. On the other hand, it intensified efforts to drive sales and cash inflows from existing projects, scientifically managed the investment pace of existing projects, adhered to a "production based on sales" approach, and fostered a virtuous cycle of investment recovery.

Asset operation

The scope of the Company's asset management operations primarily comprises the operational management and asset management of infrastructure investment projects, covering a wide range of sectors including urban rail transport, motorways, underground utility tunnels, water and environmental protection, and industrial parks. Its operations span most cities and regions across the country. The business encompasses three operational models: independent operation, joint operation and entrusted operation. The Company has established the operational brand of China Railway in the motorway and water and environmental protection sectors. The Company vigorously advanced the high-quality development of its asset management business, focusing on enhancing the ability to create value throughout the full life cycle of investment projects. It comprehensively assessed projects' financial viability over their entire life cycle and capital recovery periods, while continuously strengthening risk management and control; it proactively identified and cultivated high-quality projects with potential for revitalisation, and intensified research into and application of revitalisation measures such as publicly offered REITs, quasi-REIT structures, Pre-REITs and equity capital swaps.

Resource utilization

The Company's resource utilization business primarily focuses on the operation and development of mining assets. Currently, the Company has invested in and commissioned five modern mines at home and abroad through wholly-owned, controlling or equity-participation arrangements: Luming Molybdenum Mine in Heilongjiang, Luishia Copper-Cobalt Mine, MKM Copper-Cobalt Mine, and Huagang SICOMINES Copper-Cobalt Mine in the DRC, as well as Ulaan Lead-Zinc Mine in Mongolia, all of which maintain sound production and operation status. In recent years, the Company has steadily advanced the development of its mineral resources. In March 2026, a joint venture formed by China Railway Resources, a wholly-owned subsidiary of the Company, and Zhongjin Gold successfully secured the exploration rights for the Fuxingtun Silver-Lead-Zinc Polymetallic Mine in Xing'an League. Related work on this project has been progressing in an orderly manner. Following years of development, the Company's digital and intelligent empowerment of mining operations and its green, low-carbon development have reached new heights. Luming Mining's "Molybdenum Light Large Model" platform has been deeply integrated into the entire production and operation process, effectively reshaping cross-system collaborative operation models, and has received authoritative national certification as a "5G Factory". In the first half of 2026, the Company's mineral resources business maintained steady production and operation, producing 158,200 tonnes of cathode copper, 2,968 tonnes of cobalt metal, 7,077 tonnes of molybdenum metal, 5,620 tonnes of lead metal, 13,500 tonnes of zinc metal and 22 tonnes of silver metal.

Financial and merchandise trading

(1) Financial business

The Company has rigorously implemented the requirements of national financial regulatory policies, adhered to the core positioning of serving the real economy and empowering the principal construction business, and upheld the operating principles of “serving internal needs, focusing on principal business development, insisting on value creation and prioritizing benefit allocation”. The Company has optimized the allocation of financial resources, focused on high-quality and efficient assets, improved the comprehensive risk prevention and control system, and firmly safeguarded the bottom line of preventing systemic financial risks. The Company possesses complete financial business qualifications and a well-established business layout, holds the financial licenses for trust, finance company and public fund, and is approved to engage in such financial business as assets management, private equity fund, insurance brokerage, finance lease and commercial factoring, which the State-owned Assets Supervision and Administration Commission (the “SASAC”) allows to be conducted in a prudent and regulated manner. The Company has built a multi-level, wide-span and differentiated collaborative service system of “finance and quasi-finance” represented by China Railway Trust Co., Ltd., China Railway Finance Co., Ltd. and China Railway Capital Co., Ltd.

(2) Merchandise trading

The merchandise trading business of the Company represents the trading business carried out by the trading enterprises at all levels of the Company relying on the demand advantage and product advantage from the main production and operation business of the Company, as well as the resource channel advantage from centralized purchase and supply, which mainly focuses on internal trade within the Company and moderately conducts external business. China Railway Resources, a wholly-owned subsidiary of the Company, is responsible for the sales of mineral products in the resource utilization sector. China Railway Material Trade, a wholly-owned subsidiary of the Company, has established a national-wide operation and service network, and maintained good cooperative relationships with domestic large-scale production enterprises of steel, cement, petrochemical, components for communications engineering, signal engineering, electrical engineering and electrification engineering, building decoration materials and other products, carried out centralized procurement and supply of major materials at the Company level, and supplied materials to other domestic construction enterprises.

Emerging business

The Company's emerging business encompasses the "second curve" emerging business and strategic emerging industries (including future industries). Emerging business is a key support for implementing national strategies, building a modern industrial system, accelerating the formation of new quality productive forces, and ensuring the sustainable development of enterprises, and plays a vital role in establishing a competitive advantage for the future. In terms of the "second curve", the Company has been closely centering on national strategies such as the "3060" dual carbon goals and "Two Priorities" construction, focused on key regions and emerging fields, adjusted the industrial structure with market orientation, guided the business model with scientific and technological innovation, and concentrated its efforts in the fields of water conservancy and hydropower, clean energy, ecological and environmental protection. In terms of strategic emerging industries, the Company focuses on four major areas: artificial intelligence, industrial software, high-end machine tools and future space, and has increased its development efforts in high-end equipment manufacturing and energy conservation and environmental protection (green building); strengthened the industrial layout in new materials and strategic emerging related service industries; and leveraged its advantages in main business to specialize in and expand construction engineering and related engineering services for strategic emerging industries such as new energy.

3 Scientific Research Investment and Technological Achievements

As an ultra-large construction central enterprise, the Company proactively served the national innovation landscape, deeply integrated into the national innovation system, and actively undertaken various major innovation projects. The Company coordinated the implementation of key special projects including technological breakthrough projects, the construction of original technology sources, the cultivation of future industries such as deep underground space, and the establishment of high-quality datasets, to fully accelerate the development of new quality productive forces. During the reporting period, the Company continued to optimize the allocation of R&D resources, and focused resources on core areas of the main business such as long-span bridges, complex geological tunnels, railway communications engineering, signal engineering, electrical engineering and electrification engineering projects, high-end engineering equipment, and intelligent construction technologies. Meanwhile, the Company continuously strengthened its fundamental research capabilities, concentrated efforts on overcoming key and core technologies in the industry, and focused on resolving critical technological bottlenecks in the engineering sector.

MANAGEMENT DISCUSSION AND ANALYSIS

Looking ahead, the Company will continue to implement the innovation-driven development strategy and maintain a stable and reasonable intensity of R&D investment. Focusing on the technical demands of major national projects such as plateau railways and large-scale hydropower, and closely adhering to its transformation and upgrading goals, the Company will address shortcomings, strengthen weak areas, leverage advantages and consolidate the foundation. The Company will continue to deepen basic research and key technological breakthroughs, build a collaborative and efficient innovation system integrating industry, academia, research and application, accelerate the industrialization of scientific and technological achievements, and continuously lead and support the high-quality development of the Company through technological innovation.

4 Consolidated Results of Operations

A comparison of the financial results for the six months ended 30 June 2026 and the corresponding period of 2025 is set forth below.

Revenue

In the first half of 2026, the Group's revenue decreased year-on-year by 7.7% to RMB473.107 billion, mainly due to the decrease in revenue from infrastructure construction business. Among which, the revenue generated from overseas was RMB36.705 billion, basically the same as the same period of last year.

Cost of sales and services and gross profit

The Group's cost of sales and services primarily includes cost of raw materials and consumables, subcontracting cost, equipment usage cost (consisting of maintenance, rental and fuel), employee compensation and benefits and depreciation and amortization expenses. For the six months ended 30 June 2026, the Group's cost of sales and services decreased year-on-year by 7.4% to RMB435.447 billion. In the first half of 2026, gross profit of the Group decreased year-on-year by 11.2% to RMB37.660 billion. The gross profit margin was 8.0%, representing a decrease of 0.3 percentage point from 8.3% for the same period of last year.

Other income

The Group's other income primarily consists of interest income from other financial assets at amortised cost and subsidies from government. For the six months ended 30 June 2026, the Group's other income was RMB1.386 billion, representing a decrease of 37.8% from the same period of last year. It was mainly due to the decrease in interest income from other financial assets at amortised cost.

Other expenses

The Group's other expenses primarily includes penalty cost, lawsuit expenditure and others. For the six months ended 30 June 2026, other expenses increased by 39.0% to RMB0.670 billion from the same period of last year, mainly due to the increase in penalty cost and lawsuit expenditure.

Net impairment losses on financial assets and contract assets

The Group's net impairment losses on financial assets and contract assets mainly includes impairment losses on trade and other receivables, contract assets and other financial assets at amortised cost. For the six months ended 30 June 2026, the Group's net impairment losses on financial assets and contract assets was RMB1.838 billion, representing a year-on-year decrease of 11.3%. It was mainly due to the decrease in impairment losses on trade and other receivables.

Other gains and losses, net

The Group's other gains and losses, net mainly include gains and losses on disposal/write-off of right-of-use assets and property, plant and equipment, foreign exchange gains/losses, and gains and losses on changes in the fair value of financial assets/liabilities through profit and loss. The other losses, net for the first half of 2026 was RMB359 million (first half of 2025: other losses, net of RMB14 million), which mainly includes net gains of RMB142 million on disposal/write-off of property, plant and equipment and foreign exchange losses, net of RMB750 million.

Losses from derecognition of financial assets at amortised cost

The Group's losses from derecognition of financial assets at amortised cost mainly include the losses arising on derecognition of trade receivables and bills receivables which were transferred in accordance with asset-backed medium-term notes ("ABN") and asset-backed securities ("ABS") issuance, non-recourse factoring agreements and bills receivables discounting arrangements. In the first half of 2026, the Group's losses from derecognition of financial assets at amortised cost was RMB1.498 billion, representing a year-on-year decrease of 3.0%. For the six months ended 30 June 2026, the Group transferred trade receivables of RMB33.003 billion and long-term trade receivables of RMB1.386 billion under the issuance of ABN and ABS, respectively (first half of 2025: RMB29.233 billion and RMB1.502 billion, respectively) and transferred trade receivables of RMB7.163 billion and long-term trade receivables of RMB1.387 billion under non-recourse factoring agreements, respectively (first half of 2025: RMB10.226 billion and RMB0, respectively).

Selling and marketing expenses

The Group's selling and marketing expenses primarily consist of employee compensation and benefits, and advertising costs. For the six months ended 30 June 2026, the Group's selling and marketing expenses was RMB2.824 billion, representing a decrease of 0.9% from the same period of last year. It was mainly due to the decrease in sales and marketing expenses of real estate business. Selling and marketing expenses as a percentage of total revenue was 0.6% for the first half of 2026, basically the same as the same period of last year.

Administrative expenses

The Group's administrative expenses mainly consist of employee compensation and benefits and depreciation and amortization of its assets related to administration. For the six months ended 30 June 2026, the Group's administrative expenses was RMB9.941 billion, representing a decrease of 11.2% from the same period of last year. It was mainly due to the Group's continued strengthening of management expense control and expenditure reduction. Administrative expenses as a percentage of total revenue for the first half of 2026 was 2.1%, representing a decrease of 0.1 percentage point as compared to 2.2% for the same period of last year.

Research and development expenditures

For the six months ended 30 June 2026, the Group's research and development expenditures was RMB6.520 billion, representing a decrease of 19.6% from the same period of last year. The Group's investment in research and development continued to remain at a high level.

Finance costs, net

For the six months ended 30 June 2026, the Group's finance costs, net (finance costs less finance income) was RMB3.631 billion, representing an increase of 24.3% from the same period of last year. It was mainly due to the decrease in interest income from bank deposits.

MANAGEMENT DISCUSSION AND ANALYSIS

Profit before income tax

The Group's profit before income tax for the six months ended 30 June 2026 decreased by 19.5% to RMB13.548 billion from RMB16.823 billion for the same period of last year.

Income tax expense

For the six months ended 30 June 2026, the Group's income tax expense was RMB3.658 billion, representing a decrease of 0.6% from the same period of last year. By excluding the effect of land appreciation tax, the effective corporate income tax rate of the Group was 25.8% for the first half of 2026, representing an increase of 6.0 percentage points from 19.8% for the same period of last year, mainly due to the increase in the divergence in profit-and-loss performance among subsidiaries.

Profit for the period attributable to owners of the Company

Profit for the period attributable to owners of the Company for the six months ended 30 June 2026 was RMB8.655 billion, representing a decrease of 26.8% from the same period of last year. The profit margin of the profit for the period attributable to owners of the Company for the first half of 2026 was 1.8%, representing a decrease of 0.5 percentage point from 2.3% for the same period of last year.

5 Segment Results

¹ Profit/(loss) before income tax margin is the profit/(loss) before income tax divided by revenue.

Infrastructure construction

Revenue from the operation of the Group's infrastructure construction business is mainly derived from railway, highway and municipal works construction. Revenue from the operation of the infrastructure construction business continues to account for a high percentage of total revenue of the Group. For the first half of 2026, the revenue from the infrastructure construction business accounted for 83.6% of the total revenue of the Group (first half of 2025: 83.6%). For the first half of 2026, the Group's revenue from the infrastructure construction business was RMB410.396 billion, representing a decrease of 8.5% from the same period of last year. Gross profit margin and profit before income tax margin of the infrastructure construction segment for the first half of 2026 was 6.5% and 3.1%, respectively (first half of 2025: 6.9% and 3.5%, respectively). The decrease in gross profit margin and profit before income tax margin was mainly due to the decrease in profitability of highway and municipal works businesses.

Design and consulting

Revenue from the operation of the design and consulting business primarily derives from providing a full range of survey, design and consulting services, research and development, feasibility studies and supervision services on infrastructure construction projects. For the first half of 2026, the Group's revenue from design and consulting business amounted to RMB7.626 billion, representing a decrease of 19.0% from the same period of last year. For the first half of 2026, gross profit margin and profit before income tax margin was 23.5% and 6.0%, respectively (first half of 2025: 25.0% and 6.8%, respectively). The decrease in gross profit margin and profit before income tax margin was mainly due to the high design difficulty and high investment cost of certain design projects.

Equipment manufacturing

Revenue from the operation of the equipment manufacturing business primarily derives from the design, research and development, manufacture and sale of turnouts and other railway equipment, bridge steel structures and engineering machinery. For the first half of 2026, the Group's revenue from the equipment manufacturing business decreased by 1.2% to RMB15.952 billion from the same period of last year. For the first half of 2026, gross profit margin and profit before income tax margin was 18.4% and 4.5%, respectively (first half of 2025: 18.3% and 5.1%, respectively).

Property development

For the first half of 2026, revenue of property development business decreased by 28.6% to RMB11.299 billion from the same period of last year. Gross profit margin and profit before income tax margin for the first half of 2026 was 5.6% and -25.3%, respectively (first half of 2025: 8.3% and -9.1%, respectively). The decrease in gross profit margin and profit before income tax margin was mainly due to the continuous decline of real estate market.

Other businesses

For the first half of 2026, the Group has progressively implemented its limited-relevant diversification strategy. Revenue of other businesses decreased by 2.6% to RMB45.023 billion from the same period of last year. Gross profit margin and profit before income tax margin for the first half of 2026 was 17.7% and 5.5%, respectively (first half of 2025: 17.5% and 5.1%, respectively). Among which: ① revenue from infrastructure operation business increased year-on-year by 61.6% to RMB3.621 billion; ② revenue from mineral resources business increased year-on-year by 32.6% to RMB5.345 billion; ③ revenue from merchandise trading business decreased year-on-year by 16.1% to RMB23.822 billion; and ④ revenue from financial business decreased year-on-year by 10.0% to RMB2.022 billion.

MANAGEMENT DISCUSSION AND ANALYSIS

6 Cash Flow

For the six months ended 30 June 2026, the net cash outflow from operating activities of the Group amounted to RMB86.661 billion, representing an increase compared with the net cash outflow of RMB79.630 billion for the first half of 2025. It was mainly because payments from certain owners of the Group's engineering projects were delayed. At the same time, in order to ensure the orderly advancement of production and operations, the Group abided by its contracts and paid suppliers in a timely manner. For the six months ended 30 June 2026, the net cash outflow from investing activities of the Group amounted to RMB19.584 billion, representing an increase compared with net cash outflow of RMB13.078 billion for the first half of 2025. It was mainly due to the year-on-year decrease in cash received from other investing-related activities and the year-on-year increase in investment of long-term assets. For the six months ended 30 June 2026, the net cash inflow from financing activities of the Group amounted to RMB48.875 billion, representing a decrease compared with the net cash inflow of RMB51.978 billion for the first half of 2025. It was primarily due to the decrease in cash received from borrowings from the same period of last year.

Capital expenditure

The capital expenditure of the Group primarily comprises expenditure on purchases of equipment, upgrading of the Group's production facilities and investment in infrastructure investment projects under intangible assets mode. The Group's capital expenditure for the first half of 2026 was RMB27.307 billion (among which, RMB18.255 billion was for purchase of intangible assets and RMB7.896 billion was for purchase of fixed assets), representing an increase of 20.9% as compared to RMB22.593 billion for the same period of last year.

No provision has been made for those pending lawsuits where the management considered that the outcome of the lawsuits cannot be reasonably estimated or management believes the outflow of resources is not probable. The aggregate sum of those unprovided claims is disclosed in the table above.

9 Business Risks

The major risks the Company may face include real estate investment risk, international operations risk, infrastructure investment risk and cash flow risk.

- Real estate investment risk:** This refers to the possibility of incurring losses due to investment returns falling below expectations resulting from significant changes occurring in factors such as external environment, interest rates, market supply and demand, market competition and relevant policies during real estate project development and operation.
- International operation risk:** This refers to the possibility of financial losses or reputational damage exposed to the Company resulting from the negative impact of international political situation, foreign policy changes, administrative intervention from government, economic, social, environmental or technological standard changes and other factors on the Company's operations which caused that overseas production and operations cannot proceed normally.
- Infrastructure investment risk:** This refers to the possibility of incurring losses due to investment returns falling below expectations resulting from significant changes in external policies, market environment and financing conditions during infrastructure investment.
- Cash flow risk:** This refers to the possibility of financial losses or reputational damage exposed to the Company resulting from escalating financing scale, potential delays in payments, investments or debt repayment of the Company due to increased cash outflows, relatively slower cash inflows and significant financial pressure.

To strengthen the prevention and control of various risks, the Company continued to improve and refine its risk management and internal control system, regularly conducted major risk identification and assessment, dynamic monitoring, and early warning alerts, embedded risk control requirements into all business processes, identified key control points across each business process, established process control checklists with detailed control measures, gradually consolidated the responsibilities for risk control and key node management at every level, achieved deep integration of risk control with daily operation and management, and controlled risk triggers and hidden hazards from the source. The Company strictly implemented key control procedures including preliminary feasibility studies, planning, review, audit, approval and decision-making, strengthened dynamic whole-process control and post-evaluation review, and improved risk response strategies and special emergency plans, ensuring the overall controllability of the Company's various types of risks.

10 Foreign Exchange Fluctuation Risk

The Group primarily conducts its business in China, and the majority of its transactions are settled in RMB. The Group is not exposed to significant foreign exchange rate fluctuation risk. However, the Group will continuously monitor its foreign exchange exposure and take appropriate actions to mitigate foreign exchange risk when necessary.

Summary of the 2021 Restricted Share Incentive Scheme

(i) Purpose of the 2021 Restricted Share Incentive Scheme

In order to further promote the establishment and improvement of the long-term incentive mechanism of the Company, attract and retain talents, fully incentivize the senior management personnel, middle management personnel and core personnel of the Group, effectively align the interests of the shareholders, the Company with the individual interests of the operators to focus on and work collectively for the long-term development of the Company, the 2021 Restricted Share Incentive Scheme was formulated in accordance with the relevant requirements under the Securities Law, the Company Law, the Articles of Association and other relevant laws and regulations as well as in conjunction with the current management systems such as the remuneration system and performance appraisal system of the Company.

(ii) Participants of the 2021 Restricted Share Incentive Scheme

The participants include: 1. senior management of the Group; 2. middle management of the Group; and 3. core key personnel of the Group.

(iii) Total number of shares available for issue under the 2021 Restricted Share Incentive Scheme and their percentage in the total shares issued as at the end of the reporting period

The number of restricted shares to be granted under the 2021 Restricted Share Incentive Scheme is not more than 200,000,000 A shares, of which 180,000,000 A shares are to be initially granted and 20,000,000 A shares are reserved. As of 30 June 2026, the 2021 Restricted Share Incentive Scheme was fully implemented. The Company granted 170,935,835 A shares under the 2021 Restricted Share Incentive Scheme (excluding the 67,353,754 restricted shares that were repurchased and canceled by the Company pursuant to the terms of the 2021 Restricted Share Incentive Scheme as of 30 June 2026), and the number of restricted shares issued accounted for approximately 0.84% of the total A share capital and 0.70% of the total share capital of the Company as of 30 June 2026.

(iv) Cap of restricted shares available for grant to each participant in the 2021 Restricted Share Incentive Scheme

The total number of the Company's restricted shares granted under the 2021 Restricted Share Incentive Scheme that are in effect to any of the participants shall not exceed 1% of the total A share capital of the Company at the time when the 2021 Restricted Share Incentive Scheme was submitted for approval at the general meeting. The value of the entitlements granted to senior management shall be determined at no more than 40% of the total remuneration level (including the value of interests granted) at the time of grant, and the value of the entitlements granted to other participants such as the core members in management, technology and business shall be determined reasonably by the Board.

(v) The period within which the option may be exercised by the participants under the 2021 Restricted Share Incentive Scheme

No options which may be exercised were granted under the 2021 Restricted Share Incentive Scheme.

(vi) Vesting period and lock-up period of restricted shares granted under the 2021 Restricted Share Incentive Scheme

The restricted shares granted under the 2021 Restricted Share Incentive Scheme do not have any vesting period as they were all vested with the participants at the same time as they were granted. The restricted shares have lock-up period. The lock-up periods of the restricted shares granted under the 2021 Restricted Share Incentive Scheme shall be 24 months, 36 months and 48 months from the relevant completion date of registration of the restricted shares under the corresponding grant. After the expiry of each of the three unlocking periods, 1/3 of the restricted shares under the first grant and the grant of the reserved shares will be unlocked. The restricted shares granted to the participants under the 2021 Restricted Share Incentive Scheme shall not be transferred, used for guarantee or debt repayment until the sales restrictions are released.

SIGNIFICANT EVENTS

(vii) Amount (if any) payable for the acceptance of restricted shares and the term for payment or notification of payment

The amount payable for the acceptance of restricted shares is the grant price multiplied by the number of restricted shares granted. As of 30 June 2026, the total grant price was RMB605,330,497.29 (excluding the 67,353,754 restricted shares that were repurchased and cancelled by the Company as of 30 June 2026). The participants of the restricted shares of the first grant remitted the payment into the Company's fund-raising special account before the payment deadline of 28 January 2022, and the participants of the grant of the reserved restricted shares remitted the payment into the Company's fund-raising special account before the payment deadline of 16 November 2022.

(viii) Basis of determining the grant price

The grant price of the restricted shares under the first grant shall not be less than the nominal value of the shares, and shall not be lower than 60% of the fair market value. The fair market value shall be the higher of the following prices: 1. the average trading price of the underlying A shares of the Company on the last trading day immediately preceding the date of the relevant announcement of the first grant (the total transaction value for the last trading day/total volume of the shares of the Company traded for the last trading day); or 2. any of the average trading prices of the underlying A shares of the Company for the last 20 trading days, 60 trading days and 120 trading days immediately preceding the date of the relevant announcement.

The grant of the restricted shares under the reserved grant is subject to the consideration and passing of related resolutions by the Board and the disclosure of related information. The grant price of the restricted shares under the reserved grant shall not be less than the nominal value of the shares, and shall not be lower than 60% of the fair market value. The fair market value shall be the higher of the following prices: 1. the average trading price of the A shares on the last trading day immediately preceding the date of the announcement of Board resolutions on the reserved grant; 2. any of the average trading prices of the A shares for the last 20 trading days, 60 trading days or 120 trading days immediately preceding the date of the announcement of Board resolutions on the reserved grant.

(ix) Remaining life of the 2021 Restricted Share Incentive Scheme

The term of the 2021 Restricted Share Incentive Scheme commenced from the completion date of registration of the restricted shares under the first grant and will end on the date when all the restricted shares granted to the participants have been unlocked or repurchased and cancelled, the maximum period of which shall not exceed 72 months. Therefore, the validity period of the 2021 Restricted Share Incentive Scheme is from 23 February 2022 (the date when the registration of the restricted shares of the first grant was completed) to 30 November 2026 (the date when all reserved restricted shares are unlocked).

(x) Agreement on the granting of restricted shares

The Company entered into an agreement on the granting of restricted shares with the participants in order to determine their respective rights and obligations pursuant to the 2021 Restricted Share Incentive Scheme.

Details of the restricted shares granted under the 2021 Restricted Share Incentive Scheme

Except for the 2021 Restricted Share Incentive Scheme which was implemented completely in the first half of 2026, the Company did not have any other share scheme which was applicable for the disclosure requirements of Chapter 17 of the Hong Kong Listing Rules during the reporting period. Notes:

- The participants of the 2021 Restricted Share Incentive Scheme are the employees of the Group, including (1) senior management of the Group; (2) middle management of the Group; and (3) core key personnel of the Group. The participants do not include (i) each of the directors, chief executive or substantial shareholders of the Company, or their respective associates; (ii) each participant with options and awards granted and to be granted in excess of 1% individual limit; or (iii) each related entity participant or service provider with options and awards granted and to be granted in any 12-month period exceeding 0.1% of the relevant class of shares in issue.
- On 29 September 2025, the Company decided to repurchase and cancel 54,786,990 restricted shares held by 678 participants which were granted but had not met the unlocking conditions for the third unlocking period. In particular, the Company repurchased and cancelled a total of 50,813,003 restricted shares granted to 628 participants under the first grant but had not met the unlocking conditions for the third unlocking period, with the repurchase price of RMB2.766 per share; and a total of 3,973,987 restricted shares granted to 50 participants under the reserved grant but had not met the unlocking conditions for the third unlocking period, with the repurchase price of RMB3.092 per share. On 24 November 2025, the Company completed the repurchase and cancellation procedures of 54,723,290 restricted shares which were granted to 677 participants thereof but not yet unlocked. On 19 January 2026, the Company completed the repurchase and cancellation procedures of 63,700 restricted shares which were granted to the remaining 1 participant but not yet unlocked.

SIGNIFICANT EVENTS

3. *Under the 2021 Restricted Share Incentive Scheme, the restricted shares were granted to the participants directly, and it did not involve the grant of any options or awards in respect of which shares may be issued. Therefore, particulars of the outstanding options and unvested awards at the beginning and end of the first half of 2026 are not applicable. The number of restricted shares granted under the 2021 Restricted Share Incentive Scheme is not more than 200,000,000 A shares and 181,266,700 A shares have been granted by the Company in fiscal year 2022 and the 2021 Restricted Share Incentive Scheme was fully implemented (which means that no shares were available for grant under the 2021 Restricted Share Incentive Scheme at the beginning and end of the first half of 2026).*
4. *Conditions of grant of the restricted shares: the Company granted restricted shares to the participants upon satisfaction of all of the following conditions of grant, and no restricted shares would be granted to the participants if any of the following conditions of grant have not been satisfied. 1. None of the following events with respect to the Company has occurred: i. issue of an auditors' report with adverse opinion or which indicates an inability to give an opinion by a certified public accountant with respect to the financial and accounting report of the Company for the latest accounting year; ii. issue of an auditors' report with adverse opinion or which indicates an inability to give an opinion by a certified public accountant with respect to the internal control of the financial report of the Company for the latest accounting year; iii. failure to conduct profit distribution in accordance with laws and regulations, the Articles of Association and public undertakings during the 36 months after listing; iv. prohibition from implementation of a share incentive scheme by laws and regulations; v. other circumstances as determined by the CSRC. 2. None of the following events with respect to the participant has occurred: i. he or she has been determined by the stock exchange as an ineligible person in the past 12 months; ii. he or she has been determined by the CSRC and any of its delegated agencies as an ineligible person in the past 12 months; iii. he or she has been imposed with administrative penalties or measures prohibiting access into the securities market by the CSRC and any of its delegated agencies due to material non-compliance of laws and regulations in the past 12 months; iv. he or she is prohibited from being a director or senior management of the Company under the Company Law; v. he or she is prohibited from participating in any share incentive scheme of listed companies as required by laws and regulations; vi. he or she falls under any other circumstances as determined by the CSRC. 3. The Company is deemed to have achieved the performance target if all of the following conditions are satisfied: i. the average growth rate of the net profit for 2018 to 2020 shall not be less than 11.75%; ii. the average return on net assets for 2018 to 2020 shall not be less than 9.86%; iii. the economic value-added performance targets set by SASAC in 2020 are achieved. 4. The individual performance appraisal of the participants: the individual performance appraisal result of the participants in 2020 is competent or above.*
5. *On 9 January 2026, the total number of restricted shares unlocked and listed under the second unlocking period under the reserved grant of the 2021 Restricted Share Incentive Scheme of the Company was 3,973,988 shares. On 19 January 2026, the Company repurchased and cancelled 63,700 restricted shares held by 1 participant which were granted but had not met the unlocking conditions for the third unlocking period.*
6. *The restricted shares granted under the 2021 Restricted Share Incentive Scheme do not have any vesting period as they were all vested with the participants at the same time as they were granted.*
7. *No options which may be exercised were granted under the 2021 Restricted Share Incentive Scheme.*
8. *The lock-up periods of the restricted shares granted under the 2021 Restricted Share Incentive Scheme shall be 24 months, 36 months and 48 months from the relevant completion date of registration of the restricted shares under the corresponding grant. After the expiry of each of the three unlocking periods, 1/3 of the restricted shares granted under the first grant and the grant of the reserved shares will be unlocked.*
9. *In accordance with the relevant requirements of the "Accounting Standards for Business Enterprises No.11 – Share-based Payment", the Company shall measure the fair value of the restricted shares based on the market prices of the shares. On the measurement date, the fair value of share-based payment per restricted share shall equal the market price of the shares of the Company minus the grant price. Based on the data on 17 January 2022, the total amount of the fair value of share-based payment of the first grant of restricted shares by the Company to the participants was RMB414.9 million. The accounting treatment of the reserved restricted shares granted to the participants subsequently is the same as that of the restricted shares under the first grant. Based on the data on 2 November 2022, the total amount of the fair value of share-based payment of the reserved restricted shares granted by the Company to the participants was RMB16.3 million.*
10. *As of the respective dates of grants of restricted shares, the weighted average closing price immediately before the dates on which the restricted shares were granted was RMB5.88 per share.*
11. *The total number of restricted shares granted under the 2021 Restricted Share Incentive Scheme by the Company represents approximately 0.89% of the weighted average number of issued A shares of the Company during the first half of 2026.*
12. *Under the 2021 Restricted Share Incentive Scheme, the restricted shares were granted to the participants directly, and except for the restricted shares cancelled, it did not involve the grant of any options or awards which could lapse.*

15 Work of Consolidating and Expanding Poverty Alleviation Results and Rural Revitalization

In the first half of 2026, the Company thoroughly implemented General Secretary Xi Jinping's important directives on "Sannong" work and on comprehensively advancing rural revitalization. It made solid progress in targeted assistance in Rucheng and Guidong counties in Hunan Province and Baode County in Shanxi Province, as well as paired assistance in Karuo District, Changdu City, Xizang, to support the comprehensive revitalization of rural areas in these regions. The Company plans to invest RMB86.5 million throughout the year to precisely empower high-quality development in the four designated assistance regions. Specifically, RMB21.5 million was allocated to each of the three assisted counties to specifically advance key projects such as roads, school buildings, high-altitude vegetable bases, and photovoltaic power stations; RMB20 million was allocated to Karuo District, Changdu City, Xizang, primarily for the construction of a livable, business-friendly and beautiful rural environment in Mangda Village, Mangda Township; RMB2 million was centrally allocated for the training of grassroots cadres in the assisted counties and districts to strengthen the intellectual support for the assistance efforts. As of the end of June, the assistance funds had been fully disbursed. In June, a team led by Zhao Dianlong, the president of the Company, went to Chenzhou City, Rucheng County and Guidong County in Hunan Province to conduct a special survey on targeted assistance. The Company signed a strategic cooperation agreement with Chenzhou City, stipulating that during the "15th Five-Year" period, both parties would focus on key areas such as the development and utilization of mineral resources, forestry and ecological conservation, the cultivation of cultural tourism and wellness industries, and major infrastructure construction, conduct comprehensive, in-depth, and pragmatic cooperation to ensure that targeted assistance is carried out thoroughly and effectively through regular collaboration between the Company and local authorities.

REPORT ON REVIEW OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

TO THE BOARD OF DIRECTORS OF CHINA RAILWAY GROUP LIMITED

(Incorporated in the People's Republic of China with limited liability)

Introduction

We have reviewed the condensed consolidated financial statements of China Railway Group Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 62 to 116, which comprise the condensed consolidated statement of financial position as of 30 June 2026 and the related condensed consolidated statement of profit or loss, condensed consolidated statement of profit or loss and other comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows for the six-month period then ended, and notes to the condensed consolidated financial statements. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") as issued by the International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with IAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" ("ISRE 2410") as issued by the International Auditing and Assurance Standards Board. A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2026

1. General Information

China Railway Group Limited (the “Company”) was established in the People’s Republic of China (the “PRC”) on 12 September 2007 as a joint stock company with limited liability, as part of the Group reorganisation of China Railway Engineering Group Company Limited (“CREC”) in preparation for the listing of the Company’s A shares on Shanghai Stock Exchange and H shares on the Main Board of The Stock Exchange of Hong Kong Limited (the “HKSE”).

The address of the Company’s registered office is 918, Block 1, No.128 South 4th Ring Road West, Fengtai District, Beijing, the PRC. The Company’s ultimate holding company is CREC, established in the PRC.

The Company and its subsidiaries (together, the “Group”) are principally engaged in infrastructure construction, survey, design and consulting services, engineering equipment and component manufacturing, property development, mining and merchandise trading, financial trust management, comprehensive financial services and insurance agent.

The condensed consolidated financial statements were approved for issue on 28 August 2026.

The condensed consolidated financial statements are presented in Renminbi (“RMB”), unless otherwise stated.

2. Basis Of Preparation

The condensed consolidated financial statements for the six-month period ended 30 June 2026 have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by the International Accounting Standards Board (the “IASB”) as well as the applicable disclosure requirements of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”). The condensed consolidated financial statements do not include all the information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group’s consolidated financial statements for the year ended 31 December 2025.

As at 30 June 2026, the Group’s current liabilities exceeded its current assets by approximately RMB56,909 million. Considering the Group’s sources of liquidity and the unutilised bank facilities as at 30 June 2026, the directors of the Company (the “Directors”) believe that adequate funding is available to fulfil the Group’s debt obligations and capital expenditure requirements to enable the Group to continue in operational existence for the foreseeable future when preparing these condensed consolidated financial statements for the six-month period ended 30 June 2026. Accordingly, these condensed consolidated financial statements have been prepared on a basis that the Group will be able to continue as a going concern.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2026

3. Principal Accounting Policies

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair values.

Other than application of amendments to IFRS Accounting Standards, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six-month period ended 30 June 2026 are the same as those presented in the Group's annual consolidated financial statements for the year ended 31 December 2025.

Application of amendments to IFRS Accounting Standards

In the current interim period, the Group has applied the following amendments to IFRS Accounting Standards issued by the IASB, for the first time, which are mandatorily effective for the Group's annual period beginning on 1 January 2026 for the preparation of the Group's condensed consolidated financial statements:

Amendments to IFRS 9 and IFRS 7	Amendments to the Classification and Measurement of Financial Instruments
Amendments to IFRS 9 and IFRS 7	Contracts Referencing Nature-dependent Electricity
Amendments to IFRS Accounting Standards	Annual Improvements to IFRS Accounting Standards – Volume 11

The application of the above amendments to IFRS Accounting Standards in the current interim period has had no material impact on the Group's financial positions and performance for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

4. Segment Information

The Directors are the chief operating decision maker. Management has determined the operating segments based on the reports reviewed by the Directors that are used to allocate resources to the segments and assess their performance. The reports reviewed by the Directors are prepared in accordance with the relevant PRC accounting standards, which resulted in the difference in the basis of measurement of segment results, segment assets and segment liabilities, the details of which are shown as reconciling items.

The Directors consider the business from the service and product perspective. Management assesses the performance of the following five operating segments:

- (a) Construction of railways, highways, bridges, tunnels, metropolitan railways (including subways and light railways), buildings, irrigation works, hydroelectricity projects, ports, docks, airports and other municipal works ("Infrastructure construction");
- (b) Survey, design, consulting, research and development, feasibility study and compliance certification services with respect to infrastructure construction projects ("Design and consulting");
- (c) Design, research and development, manufacture and sale of turnouts, bridge steel structures, and other railway related equipment, engineering equipment, component manufacturing and materials ("Equipment manufacturing");

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2026

4. Segment Information (Continued)

- (d) Development, sale and management of residential and commercial properties (“Property development”); and
- (e) Mining, financial business, operation of service concession arrangements, merchandise trading and other ancillary business (“Other businesses”).

Revenue between segments is carried out at actual transaction prices.

The segment information regarding the Group’s reportable and operating segments is presented below.

24. STATUTORY RESERVES

The statutory reserves comprise the statutory surplus reserve, trust compensation reserve and general risk reserve.

According to the PRC Company Law and the Company's article of association, the Company is required to make an appropriation at 10 percent of the profit for the year as shown in the PRC statutory financial statements, prepared in accordance with the PRC accounting standards, to the statutory surplus reserve fund until the balance reached 50 percent of the registered capital of the Company. The statutory surplus reserve can only make up losses or use to increase the registered capital of the Company and is not distributable.

According to the relevant laws and regulations for financial institutions and trust management entities in the PRC, certain subsidiaries of the Company are required to set aside certain amounts to trust compensation reserve and general risk reserve to address unidentified potential impairment risks.

25. PERPETUAL NOTES

Total	52,794	4,006	(1,400)	55,400

- (a) In June 2026, the Company redeemed in cash two series of publicly offered perpetual corporate bonds (the "Perpetual Bonds") issued on 3 June 2021 and 18 June 2021, respectively. The redemption amounts were RMB0.4 billion and RMB1 billion, respectively.

In April and June 2026, the Company issued two tranches of Renewable Bonds with an aggregate principal amount of RMB2 billion and RMB2 billion respectively. The Renewable Bonds are unsecured or unguaranteed and listed on the Shanghai Stock Exchange by way of bond issues to professional investors. Pursuant to the terms and conditions of the Renewable Bonds, the Renewable Bonds has no maturity date. The interest is payable annually in arrears. Provided that compulsory interest payment events have not occurred, the Company may, at its sole discretion, elect to defer the distribution of interest, and is not subject to any restriction as to the number of times the distribution can be deferred.

The Directors are of the opinion that the Group has no contractual obligation to repay the principal or to pay the distribution for the Renewable Bonds, the Renewable Bonds should be classified as equity.

- (b) For the six-month period ended 30 June 2026, as a consequence of the compulsory interest payment event, i.e. the final dividend declared to the shareholders of the Company, the Company declared dividends to perpetual notes holders totaling RMB476 million.

The credit period on purchases of goods ranges from 180 days to 360 days. As at 30 June 2026, included in trade and bills payables are retention payables of RMB34,838 million (31 December 2025: RMB37,630 million). Retention payables are interest-free and payable at the end of the retention period of the respective infrastructure construction and products manufacturing and installation contracts.

The balances of other payables mainly include payments made by the third parties on behalf of the Group, guarantee money payables and others.

To ensure that suppliers can obtain financing support and facilitate the settlement in advance, the Group has entered into supplier financing arrangements. Since some arrangements do not allow the Group to obtain bank financing by extending the original repayment term, the Group believes that the debts owed to the bank should be classified as trade payables. At the end of the period, the balance of trade payables under this arrangement was RMB179,645 million, accounting for 23.63% of the total balance of trade payables (31 December 2025: RMB165,308 million, accounting for 20.33%). Among them, RMB123,966 million (31 December 2025: RMB120,598 million) has been received by suppliers from the financing provider. The payment due dates for trade payables under the supplier financing arrangement are generally consistent with those for comparable trade payables not under the supplier financing arrangement, with both ranges being 6 to 12 months.

30. Fair Value Measurements of Financial Instruments

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used), as well as the level of the fair value hierarchy into which the fair value measurements are categorised (levels 1 to 3) based on the degree to which the inputs to the fair value measurements is observable.

- Level 1: The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.
- Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.
- Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, unlisted open-end equity funds, unlisted entrusted products, and other financial assets at FVTPL.

(b) Fair value of financial assets and liabilities measured at amortised cost

Except as detailed in the following table, the Directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the condensed consolidated interim financial information approximate to their fair values:

	As at			
	30 June 2026		31 December 2025	
	Carrying amount	Fair value	Carrying amount	Fair value
	RMB million	RMB million	RMB million	RMB million
	(Unaudited)		(Audited)

Other financial assets at amortised cost – fixed rate	29,023	30,695	31,218	32,592
Financial liabilities				
Long-term bank borrowings				
– fixed rate	67,178	66,806	66,987	66,504
Long-term debentures – fixed rate	62,876	62,501	58,842	58,423
Other long-term borrowings				
– fixed rate	18,405	18,902	19,340	19,431

The fair values hierarchy of the fair value of fixed rate other financial assets at amortised cost, long-term bank borrowing, long-term debentures and other long-term borrowings are included in level 3. The fair values have been determined based on a discounted cash flow analysis, with the most significant input being the discount rate that reflects the credit risk of counterparties or the issuer.

31. RELATED-PARTY TRANSACTIONS

The Company is controlled by the following entity:

Name	Relationship	Place of incorporation and operation	Ownership interest	
			As at 30 June 2026	31 December 2025
CREC	Parent and ultimate holding company	PRC	47.38%	47.08%

The Company is controlled by CREC, the parent company and a state-owned enterprise established in the PRC. CREC is controlled by the PRC government (CREC and its subsidiaries other than the Group are referred to as the “CREC Group”). The Group operates in an economic environment currently predominated by entities controlled, jointly controlled or under significant influence by the PRC government (“government-related entities”).

During the period, the Group had transactions with government-related entities including, but not limited to, the provision of infrastructure construction services, survey, design and consulting services and sales of goods. The Directors consider that the transactions with these government-related entities are activities in the ordinary course of the Group’s business and that the dealings of the Group have not been significantly or unduly affected by the fact that the Group and these government-related entities are ultimately controlled or owned by the PRC government. The Group has also established pricing policies for services and products, and such pricing policies do not depend on whether or not the customers are government-related entities. For the purpose of the related party transaction disclosures, management believes that meaningful information relating to related party transactions has been adequately disclosed.

The following is a summary of significant related party transactions between the Group and its related parties during the period and balances arising from related party transactions at the end of the reporting period.
