VOLUNTARY ANNOUNCEMENT

THE COMPANY WINS THE SECOND PRIZE OF JIANGXI PROVINCIAL SCIENCE AND TECHNOLOGY PROGRESS AWARD

MOBI'S RF FILTERING TECHNOLOGY ONCE AGAIN RECEIVES PROVINCIAL-LEVEL AUTHORITATIVE RECOGNITION

This announcement is made on a voluntary basis by MOBI Development Co., Ltd. (the “**Company**”, together with its subsidiaries, the “**Group**”) to provide the latest information on the Group’s business progress.

The Company is pleased to announce that The People’s Government of Jiangxi Province recently announced the evaluation results of the “2025 Jiangxi Provincial Science and Technology Award”, and the project “Research, Development and Industrialisation of Wide Stopband Miniaturised Cavity Filters”, which was completed with the participation of MOBI Telecommunications Technologies (Ji’an) Co., Ltd. (hereinafter referred to as “MOBI Jian”), a subsidiary of the Group, was awarded the Second Prize of the Science and Technology Progress Award.

The project achieved a series of breakthroughs in areas such as wideband electromagnetic design, miniaturised structural realisation and mass production process control, establishing a complete technical system from R&D and design to large-scale production. Previously, leveraging its technical strength and innovation capability in the field of communication base station filters, MOBI Antenna Technologies (Shenzhen) Co., Ltd., a subsidiary of the Group, was also successfully selected for the second batch of the “Shenzhen Manufacturing Single Champion Enterprises (2025-2028)” list published by the Industry and Information Technology Bureau of Shenzhen Municipality. The consecutive receipt of the municipal-level Manufacturing Single Champion Enterprise recognition and the provincial-level Science and Technology Award is a full affirmation and high recognition of the Group’s technological innovation strength and industrialisation capability.

Currently, as global communication technologies continue to evolve toward 5G-A and 6G, the demand for deployment of high-frequency bands and large bandwidth at base stations continues to rise, driving RF devices toward miniaturisation, lightweight designs, high integration and high reliability. Facing an industry landscape where technological iteration and market competition proceed in parallel, the Group will continue to increase its R&D investment in core areas, deepen industry-academia-research cooperation, continuously enhance its independent innovation capability and industrialisation level, sharpen its overall competitiveness through technological iteration and steadily increase its global market share.

The above awards are honorary recognitions and do not constitute a profit forecast or performance commitment. **Shareholders and potential investors are cautioned not to unduly rely on such information and are advised to exercise caution when dealing in the shares of the Company.**

By order of the Board
MOBI Development Co., Ltd.
Hu Xiang
Chairman

Hong Kong, 21 September 2026

As at the date of this announcement, the executive directors of the Company are Mr. Hu Xiang, Ms. Zhou Lingbo and Mr. Ye Rong; the non-executive director is Mr. Qu Deqian; and the independent non-executive directors are Mr. Li Tianshu, Mr. Zhang Han and Ms. Ge Xiaojing.
