Quick facts

Stock code	3093 – HKD counter
Trading lot size:	100 Units – HKD counter
Manager:	Fullgoal Asset Management (HK) Limited
Trustee:	Cititrust Limited
Custodian and administrator:	Citibank N.A., Hong Kong Branch
Registrar:	Citicorp Financial Services Limited
Ongoing charges over a year*:	0.90% *As the Sub-Fund is newly set up, this figure is a best estimate only. It represents the sum of the estimated ongoing expenses over a 12-month period expressed as a percentage of the average net asset value (" NAV ") over the same period. The actual figure may be different from this estimated figure and it may vary from year to year. As the Sub-Fund adopts a single management fee structure, the estimated ongoing charges of the Sub-Fund will be equal to the amount of the single management fee which is capped at a maximum of 0.90% of the average NAV of the Sub-Fund. Any ongoing expenses exceeding 0.90% of the average NAV of the Sub-Fund will be borne by the Manager and will not be charged to the Sub-Fund. Please refer to "Ongoing fees payable by the Sub-Fund" below and the Prospectus for details.
Estimated annual tracking difference#:	-1.4% #This is an estimated annual tracking difference as the Sub-Fund is newly set up. Investors should refer to the website of the Sub-Fund for more up-to date information on actual tracking difference.
Financial year end:	31 December
Base currency:	HKD
Trading currency:	Hong Kong dollars (HKD) – HKD counter
Underlying index:	Hang Seng HK-US Robotics Theme Index (net total return version)

Dividend policy:

The Manager may make distributions at its discretion. There is no guarantee that the Sub-Fund will make any regular dividend distribution nor is there any guarantee on the amount of dividend being distributed from time to time. Distributions on all Units, if any, will be in HKD only.

Dividends may be paid out of capital, or out of gross income and all or part of the fees and expenses may be charged to capital at the Manager's discretion, resulting in an increase in distributable income for the payment of dividends and therefore, dividends may be paid effectively out of capital. This may result in an immediate reduction of NAV per Unit.

What is this product?

The Sub-Fund is a sub-fund of Fullgoal ETF Series, an umbrella unit trust established by a trust deed dated 6 March 2026. It is governed by the laws of Hong Kong.

The Sub-Fund is a passively managed index tracking exchange traded fund authorised under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "**Code**"). The units of the Sub-Fund (the "**Units**") are traded on The Stock Exchange of Hong Kong Limited (the "**SEHK**") like stocks.

The Sub-Fund offers both listed class of Units (the "**Listed Class of Units**") and unlisted class(es) of Units (the "**Unlisted Class of Units**"). This statement contains information about the offering of the Listed Class of Units, and unless otherwise specified references to "Units" in this statement shall refer to the "Listed Class of Units". Investors should refer to a separate statement for the offering of the Unlisted Class of Units.

Investment Objective and Investment Strategy**Investment Objective**

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the Hang Seng HK-US Robotics Theme Index (net total return version) (the "**Index**").

Investment Strategy

In seeking to achieve the Sub-Fund's investment objective, the Manager intends to adopt a combination of physical representative sampling and synthetic representative sampling strategy. The Sub-Fund will (i) primarily use a physical representative sampling strategy by investing 50% to 100% of its NAV in securities constituting the Index ("**Index Securities**"); and (ii) where the Manager believes such investments are beneficial to the Sub-Fund and will help the Sub-Fund achieve its investment objective, use a synthetic representative sampling strategy as an ancillary strategy by investing up to 50% of its NAV in financial derivative instruments ("**FDIs**"), which will only be funded total return swaps with one or more counterparties.

Physical representative sampling sub-strategy

The Sub-Fund primarily uses a physical representative sampling strategy by investing 50% to 100% of its NAV in Index Securities. The Sub-Fund may invest up to 100% of its NAV directly in equity securities listed on the SEHK and the U.S. stock exchanges.

Synthetic representative sampling sub-strategy

In pursuing the representative sampling strategy, the Manager may invest up to 50% of its NAV in FDIs, which will only be direct investment in funded total return swap transaction(s) whereby the Sub-Fund will pass on the relevant portion of cash to the swap counterparty(ies) and in return the swap counterparty(ies) will provide the Sub-Fund with an exposure to the economic gain/loss in the

performance of the Index Securities (net of indirect costs). The Manager will only use a synthetic representative sampling strategy when it considers that such investments are beneficial to the Sub-Fund.

The Sub-Fund shall bear the swap fees (including the brokerage commission and any costs associated with the entering into, or unwinding or maintenance of, any hedging arrangements in respect of such swaps). The swap fees, which include all costs associated with swap transactions and are subject to the discussion and consensus between the Manager and the swap counterparty based on the actual market circumstances on a case-by-case basis, represent a variable spread (which can be positive or negative) plus HIBOR which reflects the brokerage commission and the swap counterparty's costs of financing the underlying hedge in order to provide the performance. In extreme market conditions and exceptional circumstances, the brokerage commission and costs associated with the hedging arrangement may increase significantly and in return increase the swap fees. Swap fees are accrued daily and spread out over the month. The maximum unwinding fee payable by the Sub-Fund is 0.3% per transaction on the notional amount of the swap unwound.

The swap fees will be disclosed in the interim and annual financial reports of the Sub-Fund. The swap fees will be borne by the Sub-Fund and hence may have an adverse impact on the NAV and the performance of the Sub-Fund, and may result in higher tracking error.

Exposure of the Sub-Fund to the Index Securities (either through direct investment or FDIs) will be in substantially the same weightings (i.e. proportions) as these Index Securities have in the Index. In pursuing a representative sampling strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on condition that the maximum deviation from the Index weighting of any constituent will not exceed 3% or such other percentage as determined by the Manager after consultation with the SFC.

Other investments

The Sub-Fund may invest less than 30% of the Sub-Fund's NAV in collective investment schemes ("CIS"), each being either an exchange traded fund or an unlisted index tracking fund which tracks an index that has a high correlation with the Index. Such CIS may be authorised by the SFC, eligible schemes under Chapter 7.11A of the Code, or non-eligible schemes. For the avoidance of doubt, the Sub-Fund's aggregate investment in non-eligible schemes and not authorised by the SFC may not exceed 10% of the NAV of the Sub-Fund.

The Sub-Fund may also invest in money market funds (subject to the investment restrictions as set out in Chapter 7 of the Code), and in cash deposits and cash equivalents for cash management purposes, up to 5% of its NAV.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions, with the maximum level for up to 50% and expected level for approximately 20% of its NAV, and is able to recall the securities lent out at any time. As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included). The collateral will be marked-to-market on a daily basis and be safekept by the Custodian. All securities lending transactions will only be carried out in the best interest of the Sub-Fund.

The Manager does not currently intend to enter into sale and repurchase transactions, reverse repurchase transactions and other similar over-the-counter transactions on behalf of the Sub-Fund. The Manager will seek prior approval of the SFC (to the extent required under applicable regulatory requirements) and provide at least one month's prior notice to unitholders before the Manager engages in any such transactions.

The Sub-Fund may invest in FDIs for non-hedging (i.e. investment) and/or hedging purposes, in order to achieve efficient portfolio management.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in the Prospectus.

Index

The Index aims to reflect the performance of companies that are involved in the robotics development business and are listed in Hong Kong or the U.S. The universe of the Index consists of the following: (i)

constituents of the Hang Seng Composite Index (which covers top 95% of the market capitalisation of the companies listed on the SEHK) that are eligible under the Southbound Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively, the “**Stock Connect**”) and (ii) common stocks listed on NASDAQ that are among the top 700 by company market capitalisation of all common stocks listed on NASDAQ or the New York Stock Exchange, excluding share classes without voting right.

The Index is a free float-adjusted market capitalisation weighted index, whereby the weights of Index constituents are based on their investable market capitalisations. A security is eligible for constituent selection if it fulfils the turnover requirements as detailed in the Prospectus and falls within one of the sectors as set out below. The sectors are classified under the Hang Seng Industry Classification System, and include automobiles, interactive media & services, digital solution services, commercial vehicles & trucks, industrial components & equipment, auto parts, home appliances, transportation, robotic systems & solutions, internet services and infrastructure, semiconductors, and semiconductor equipment & materials. Each eligible security will be assigned a relevance score[^] according to its business exposure to the robotics theme. The HK-listed securities and U.S.-listed securities will be ranked in two separate groups, and the 20 securities with the highest relevant score in each group will be selected as constituents. The number of constituents of the Index is fixed at 40. The aggregate weightings of HK-listed securities and U.S.-listed securities are set at 65% and 35% respectively on each capping day. The individual constituents from the subsector automobiles (which is applied exclusively to US-listed securities only), interactive media & services and digital solution services are each capped at 10%, and other individual constituents are capped at 5%. The weighting of a constituent may exceed the cap level after the rebalancing date due to price movement.

The Index is reviewed and reconstituted on a semi-annual basis in June and December each year, where the constituent changes will take effect in September and March. The Index is rebalanced on a quarterly basis in March, June, September and December each year according to the rebalancing schedule of the Index Provider (as defined below) available at <https://www.hsi.com.hk/en-hk/index-resources/index-schedule/> (this website has not been reviewed by the SFC). The adjustments will generally be effective as of the next trading day after the third Friday in March, June, September and December each year.

The Index is a net total return index, which means that it reflects the reinvestment of dividends or distributions, after deduction of any withholding tax. The Index is denominated and quoted in HKD.

The Index is compiled and managed by Hang Seng Indexes Company Limited (the “**Index Provider**”). The Manager (and each of its Connected Persons) is independent of the Index Provider.

The Index was launched on 19 March 2026 and had a base value of 10,000 on 30 December 2022. As of 9 April 2026, the Index had a total free-float market capitalisation of HKD84,628 billion and 40 constituents.

The most updated list of the constituents of the Index and their respective weightings, the last closing index level, and additional information and other important news of the Index can be obtained from the website of the Index Provider at <https://www.hsi.com.hk/eng/indexes/all-indexes/hsusrt> (the contents of which has not been reviewed by the SFC). The Index is quoted on both Bloomberg and Refinitiv where latest update of the index level can be obtained thereon.

[^]The relevance score is rated based on screening of publicly available information such as announcements published on the relevant exchanges and company annual reports using natural language processing algorithm by (i) measuring how frequently the keywords that represent the robotics theme appear in a company’s published financial reports and announcements and (ii) adjusting for how common these keywords appear across all companies being assessed in their annual reports, announcements and any other publicly available information with generic terms given less weight and more distinctive terms given more weight. If two or more company constituents under each of the HK-listed securities and US-listed securities groups are rated and shared last rank in terms of relevance score, the constituent with larger market capitalisation would be selected.

Bloomberg Code: HSUSRTN
Refinitiv Code: HSUSRTN

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's NAV.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

1 General investment risk

The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore, investors' investments in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

2 Equity market risk

The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3 Passive investment risk

The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Declines in the Index are expected to result in corresponding decreases in the Sub-Fund's value.

4 Robotics sector risk

The Sub-Fund invests primarily in the equity securities of companies that engage in the robotics development business and as such, is particularly sensitive to risks to those types of companies. These risks include, but are not limited to, small or limited markets for such securities, changes in business cycles, world economic growth, technological progress, rapid obsolescence, and government regulation.

Securities of robotics companies, especially companies with smaller market capitalisation and/or limited operating history, tend to be more volatile than securities of companies that do not rely heavily on technology. Rapid change to technologies that affect a company's products could have a material adverse effect on such company's operating results. Robotics companies may rely on a combination of patents, copyrights, trademarks and trade secret laws to establish and protect their proprietary rights in their products and technologies, which may be subject to the risks of loss or impairment of intellectual property rights or licences. There can be no assurance that the steps taken by these companies to protect their proprietary rights will be adequate to prevent the misappropriation of their technology or that competitors will not independently develop technologies that are substantially equivalent or superior to such companies' technology.

Increasing global regulatory scrutiny in this area may also impede the development of new robotics product and technology, and hamper the commercial rollout of such products and affect market demand. There is no guarantee that the products produced by these companies will materialise into commercially successful products. The success of companies in the robotics sector is typically dependent on the companies' ability to maintain relationships with their technology partners. If a company's relationship with a technology partner is impaired or terminated, the company may not be able to enter into a new technology alliance on a timely basis or on commercially favourable terms, which could result in significant additional cost or disruptions to its businesses.

5 Concentration risk

The Sub-Fund's investments are concentrated in Hong Kong and the U.S. market and in the robotics sector. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Hong Kong and U.S. markets and the robotics sector.

6 Risk associated with small-capitalisation/mid-capitalisation companies

The Sub-Fund may make investments in small-capitalisation and mid-capitalisation companies. The stocks of such companies may have lower liquidity and their prices are more volatile and susceptible to adverse economic developments than those of larger capitalisation companies in general.

7 Tracking error risk

The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

8 New index risk

The Index is a new index and has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.

9 Currency risk

Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. The NAV of the Sub-Fund may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

10 Trading risk

The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Sub-Fund's NAV.

As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Units on the SEHK, investors may pay more than the NAV per Unit when buying Units on the SEHK, and may receive less than the NAV per Unit when selling Units on the SEHK.

11 Trading hour differences risk

As the markets in which the Sub-Fund invests may be open when Units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Units. Differences in trading hours between the overseas stock exchanges and the SEHK may increase the level of premium/discount of the Unit price to its NAV.

12 Risks relating to securities lending transactions

Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.

13 Risks associated with investment in FDI

Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund. Exposure to FDI may lead to a high risk of significant loss by the Sub-Fund.

The Sub-Fund may use FDIs for hedging purposes, and in adverse situations, such hedging may become ineffective and the Sub-Fund may suffer significant loss.

The Manager may adopt synthetic representative sampling strategy for the Sub-Fund, which may involve investing up to 50% of its NAV in funded total return swaps. In case of swaps, the Sub-Fund may suffer significant loss if a swap counterparty fails to perform its obligations, or in case of insolvency or default of the swap counterparty(ies).

14 Reliance on market maker risk

Although the Manager will use its best endeavours to put in place arrangements so that at least one market maker will maintain a market for the Units and that at least one market maker gives not less than 3 months' notice prior to terminating market making under the relevant market maker agreement, liquidity in the market for the Units may be adversely affected if there is no market maker for the HKD traded Units. There is also no guarantee that any market making activity will be effective.

15 Distributions out of/effectively out of capital risk

Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to such original investments. Any such distributions may result in an immediate reduction of the NAV per Unit of the Sub-Fund. This may also reduce the capital that the Sub-Fund has available for investment in future and may constrain capital growth.

16 Differences in dealing arrangements between Listed and Unlisted Classes of Units risk

Investors of Listed Class of Units and Unlisted Class of Units are subject to different pricing and dealing arrangements. The NAV per Unit of each of the Listed Class of Units and Unlisted Class of Units may be different due to different fees and cost applicable to each class. The trading hours of SEHK applicable to the Listed Class of Units in the secondary market and the dealing deadlines in respect of the Listed Class of Units (on the primary market) or the Unlisted Class of Units are also different.

Listed Class of Units are traded on the stock exchange in the secondary market on an intraday basis at the prevailing market price (which may diverge from the corresponding NAV), while Unlisted Class of Units are sold through intermediaries based on the Dealing Day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Listed Class of Units may be at an advantage or disadvantage compared to investors of the Unlisted Class of Units.

In a stressed market scenario, investors of the Unlisted Class of Units could redeem their Units at NAV while investors of the Listed Class of Units in the secondary market could only sell at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Units could sell their Units on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Class of Units could not do so in a timely manner until the end of the day.

17 Differences in cost mechanisms between Listed Class of Units and Unlisted Classes of Units risk

Investors should note that different cost mechanisms apply to Listed Class of Units and Unlisted Classes of Units. For Listed Class of Units, the transaction fee and the duties and charges in respect of creation and realisation applications are paid by the participating dealer applying for or realising such units and/or the Manager. Investors of Listed Class of Units in the secondary market will not

bear such transaction fees and duties and charges (but for the avoidance of doubt, may bear other fees, such as SEHK trading fees).

On the other hand, the subscription and realisation of Unlisted Classes of Units may be subject to a subscription fee and realisation fee respectively, which will be payable to the Manager by the investor subscribing or realising. In addition, in determining the subscription price and realisation price, the Manager is entitled to add/deduct an amount which it considers represents an appropriate allowance for the fiscal and purchase/sale charges.

Any or all of these factors may lead to a difference in the NAV of the Listed Class of Units and Unlisted Classes of Units.

18 Termination risk

The Sub-Fund may be terminated early under certain circumstances, for example, if the size of the Sub-Fund falls below HKD50,000,000 (or equivalent). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

How has the Sub-Fund performed?

There is insufficient data to provide a useful indication of past performance to investors as the Sub-Fund is newly launched.

Is there any guarantee?

The Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the units of the Sub-Fund:

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% of the trading price of the Units ¹
Trading fee	0.00565% of the trading price of the Units ²
Accounting and Financial Reporting Council ("AFRC") levy	0.00015% of the trading price of the Units ³
Stamp duty	Nil

¹ Transaction levy of 0.0027% of the price of the Units payable by each of the buyer and the seller.

² Trading fee of 0.00565% of the price of the Units, payable by each of the buyer and the seller.

³ AFRC transaction levy of 0.00015% of the trading price of the Units, payable by each of the buyer and the seller.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

Fee	Annual rate (as a % of the Sub-Fund's NAV unless otherwise specified)
-----	---

Management Fee*	0.90% p.a.
Trustee Fee^	Included in the Management Fee
Registrar Fee	Included in the Management Fee
Performance Fee	Nil

**The management fee is a single flat fee, covering all of the Trustee's and Registrar's fees and other costs and expenses. The Trustee will bear the fees of the Custodian and the Administrator. Please note that these fees may be increased up to a permitted maximum on giving one month's notice to unitholders. Please refer to the section of the Prospectus entitled "Fees and Expenses" for further details of the fees and charges payable and the permitted maximum of such fees allowed.*

^The trustee fee is inclusive of custodian and administration fee.

Other Fees

You may have to pay other fees and charges when dealing in the units of the Sub-Fund.

Please refer to the section "Fees and Expenses" of the Prospectus for details of other fees and expenses.

Additional Information

You may obtain the following information of the Sub-Fund at the following website at <https://www.fullgoal.com.hk/> (the contents of this website have not been reviewed by the SFC) including:

- (a) the Prospectus and this statement (as revised from time to time);
- (b) the latest annual and semi-annual financial reports (in English only);
- (c) any notices relating to material changes to the Sub-Fund that may have an impact on its investors, including notice for material alterations or additions to the Sub-Fund's offering documents or constitutive documents;
- (d) any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and Index, the notices of the suspension of the calculation of the NAV, changes in fees and the suspension and resumption of trading;
- (e) the tracking difference and tracking error of the Sub-Fund;
- (f) the near real time indicative NAV per Unit updated every 15 seconds during normal trading hours on the SEHK in HKD;
- (g) the last NAV of the Sub-Fund in HKD and the last NAV per Unit in HKD;
- (h) the full portfolio information of the Sub-Fund (updated on a monthly basis);
- (i) the compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months;
- (j) the latest list of the participating dealers and market makers; and
- (k) the past performance information of the Sub-Fund.

The official last NAV per Unit in HKD will not be updated when the underlying market is closed. Please refer to the Prospectus for details.
