VOLUNTARY ANNOUNCEMENT OBTAINMENT OF THE ISCC EU CERTIFICATE

This announcement is made by Beijing Shougang LanzaTech Technology Co., Ltd. (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to keep the shareholders of the Company (the “**Shareholders**”) and potential investors informed of the latest development of the Group.

The board of directors (the “**Board**”) of the Company is pleased to announce that Hebei Shoulang New Energy Technology Co., Ltd. (河北首朗新能源科技有限公司), a wholly-owned subsidiary of the Company, has been granted the International Sustainability and Carbon Certification (“**ISCC EU**”) by SCS Global Services on September 14, 2026. This marks the first time such certification has been issued in the global recycled carbon fuel sector.

ISCC EU is a sustainability certification system officially recognised by the European Union, ensuring that the production and use of biomass energy and biofuels meet robust environmental and sustainability standards. The certification confirms compliance with the requirements of the Revised Renewable Energy Directive (Directive (EU) 2023/2413) (the “**RED III**”). The RED III is a core regulatory framework under the European Union’s green transition agenda, which sets out targets for renewable energy and establishes sustainability criteria, full life-cycle carbon emission reduction standards and feedstock traceability requirements for biofuels and sustainable green fuels.

As an EU-recognised certification system, ISCC EU certification serves as a key market access credential for green fuels entering the European market. The obtainment of the ISCC EU certificate signifies that the Group’s ethanol products, produced from industrial off-gases, possess the requisite international sustainability qualifications to serve as feedstock for the production of sustainable green fuels. After obtaining the ISCC EU certification, the Group’s ethanol products can be sold as a certified recycled carbon fuel for direct use in the marine fuel and road transport fuel markets in the European Union, as well as for aviation fuel markets in the European Union and the United Kingdom.

The obtainment of this certification is expected to open up overseas fuel supply chain channels for the Group, and in particular, facilitate the Group's products in accessing the European Union's ReFuelEU aviation decarbonisation market, thereby broadening the Group's international green fuels business footprint.

Shareholders and potential investors are advised to exercise caution when dealing in the H Shares of the Company.

By order of the Board
Beijing Shougang LanzaTech Technology Co., Ltd.
Executive Director and General Manager
Ms. Dong Yan

Hong Kong, September 23, 2026

As at the date of this announcement, the Board comprises: (i) Ms. Dong Yan and Mr. Lin Siyu as executive directors; (ii) Dr. Ma Lishen, Dr. Jennifer Holmgren, Dr. Wu Bin, Mr. Zhang Dan and Ms. Wang Yan as non-executive directors; and (iii) Dr. Hu Shanying, Dr. Feng Yingang, Dr. Chen Xin and Mr. Hoong Cheong Thard as independent non-executive directors.
