**VOLUNTARY ANNOUNCEMENT**

**PHASE III CLINICAL TRIAL OF DOCETAXEL FOR INJECTION  
(ALBUMIN-BOUND) (HB1801) FOR THE TREATMENT OF ADVANCED  
BREAST CANCER OFFICIALLY INITIATED IN CHINA**

The Board of Directors (the “**Board**”) of CSPC Pharmaceutical Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) is pleased to announce that Phase III clinical trial of docetaxel for injection (albumin-bound) (“**HB1801**”) developed by the Group for the treatment of advanced breast cancer (HB1801-017) has been officially initiated at the first centre in China recently.

HB1801 is one of the representative drugs independently developed by the Group’s nanomedicine technology platform. HB1801 encapsulates docetaxel in human serum albumin. Compared with traditional docetaxel injection, it has significant advantages: (1) Safety: it has no risk of allergic reactions and requires no steroid premedication; it can be administered rapidly at high concentration, effectively enhancing the safety profile and patient treatment compliance; (2) Efficacy: multiple preclinical and clinical studies have demonstrated its excellent anti-tumour activity, allowing for higher doses in clinical practice to further improve efficacy.

The HB1801-017 study is a randomised, open-label, multicentre Phase III clinical trial, aimed at evaluating the efficacy and safety of HB1801 versus docetaxel (Taxotere®) in participants with advanced breast cancer. Currently, participant recruitment and screening for the HB1801-017 study are actively underway.

By order of the Board  
**CSPC Pharmaceutical Group Limited**  
**CAI Dong Chen**  
*Chairman*

Hong Kong, 24 September 2026
