MANAGEMENT DISCUSSION AND ANALYSIS

OVERALL FINANCIAL PERFORMANCE

For the six months ended 30 June 2026, the Group recorded a revenue of approximately HK\$472,517,000 from continuing operations (six months ended 30 June 2025: approximately HK\$514,673,000 from continuing operations), representing a decrease of revenue of approximately 8% over the same period in 2025. This variance was entirely due to foreign exchange translation effects between Renminbi and HK\$, while underlying sales performance remained stable.

During the period under review, the profit recorded by the Group was approximately HK\$499,094,000 (six months ended 30 June 2025: approximately HK\$105,848,000), representing a huge increase compare to the same period in 2025, such profit for the period was mainly attributable to a gain on disposal of subsidiaries of approximately HK\$375,287,000. The mining operations had a substantial positive impact on the Group's overall performance.

BUSINESS REVIEW

The principal profit generation activities of the Group is mining operations — exploitation and exploration of mineral resources. An analysis of this business segment is presented below:

Mining Operations — Exploitation and Exploration of Mineral Resources

The Group's mining operation mainly includes the exploitation and exploration of molybdenum concentrate in the PRC. Our molybdenum concentrate was produced by the molybdenum mine operated by Shaanxi Province Luo Nan Xian Jiu Long Kuang Ye Company Limited ("**Jiu Long Kuang Ye**"), a non-wholly owned subsidiary of the Group. The grading of molybdenum concentrate produced by our molybdenum mine was approximately 45%–50%.

During the period under review, the volume of molybdenum concentrate sold was about 2,240 tonnes (six months ended 30 June 2025: 3,487 tonnes), whereas the grade of molybdenum concentrate was approximately 45%–50%. The average selling price of molybdenum concentrate was approximately HK\$160,476 per tonne. During the period under review, the mining operation contributed a revenue of approximately HK\$472,517,000 to the Group, of which approximately HK\$359,409,000 was contributed by sales of molybdenum concentrate and approximately HK\$113,108,000 was contributed by sales of sulfuric acid and iron concentrate. Molybdenum concentrate sales accounted for approximately 76.06% of core business revenue, representing the Group's primary revenue source. Gross profit was approximately HK\$237,269,000 and the gross profit margin was 50.21%. During the period, the Group recognised an amortisation of mining rights included in cost of sales of approximately HK\$21,838,000.

MANAGEMENT DISCUSSION AND ANALYSIS

DISCONTINUED OPERATIONS

On 4 December 2025, the Company and a purchaser entered into a sale and purchase agreement to disposal of 久龍投資(上海)有限公司 (Jiulong Investment (Shanghai) Company Limited) (the “**Disposal Company**”) and its subsidiaries (collectively referred as the “**Disposal Group**”), which involved in manufacturing and sales of chemical products and sale of aluminum plate products (the “**Chemical and Metal Products Operation**”).

Reference to the announcements were made on 4 December 2025, 13 February 2026 and 19 March 2026, in relation to the very substantial disposal of the Chemical and Metal Products Operation for consideration of HK\$1,000,000. Such disposal was completed on 25 March 2026. The Board considered that the disposal had no material negative impact on the Group’s financial position, and the consideration of the disposal arrived at arm’s length negotiations between the Company and the purchaser on normal commercial terms, and was fair and reasonable and in the interests of the Company and its shareholders as a whole. The Board also take into account a number of factors in making their decision, in particular the current financial situation of the subsidiary and its business prospects.

EVENT AFTER THE REPORTING PERIOD

Final Distribution of Scheme Shares by the Scheme Company

Subsequent to the end of the reporting period, pursuant to the terms of the Scheme, the physical share certificates representing the final batch of Scheme Shares (which had been previously allotted and issued to the Scheme Company and held on trust for the Scheme Creditors with Admitted Claims) were duly dated and issued under the names of the relevant Scheme Creditors for the purpose of substantive transfer.

The physical distribution of these share certificates to the relevant Scheme Creditors will commence on 1 September 2026, provided that such creditors have completed both the registration and the Hong Kong stamp duty payment.

Those who failed to submit the relevant documents to the Scheme Administrators or pay the Hong Kong stamp duty by 31 July 2026, their respective share certificates will not be collectible on 1 September 2026 onwards and will be processed in the next batch. Please refer to the relevant terms as set out in the Scheme Document.

MANAGEMENT DISCUSSION AND ANALYSIS

As the relevant Scheme Shares had already been included in the issued share capital of the Company and the underlying liabilities had been fully derecognized upon issuance in September 2023, the current distribution and transfer of shares by the Scheme Company has no financial impact on the consolidated financial statements and total issued share capital of the Company as at 30 June 2026.

PROSPECTS

As we enter second half of 2026, our Group is striving to build resilience in a time of uncertainty.

The economic outlook remains uncertain in second half of 2026. Global economies will continue to face multiple macroeconomic headwinds, including geopolitical uncertainties, inflation and tightened financial conditions. Many industries are still plagued by supply chain issues that emerged in recent years. Ongoing inflation and subdued economic growth are expected. In order to combat this, our Group aims to improve our resilience in through strategic management, development and expansion of our two core businesses as well as building protective measures into supply chains to deal with shortages and rising business costs.

For mining operation, following the infrastructure upgrades and licence renewals, our mining operation delivered enhanced performance in 2026. A stronger global market for molybdenum concentrate pushed average selling prices higher, which, combined with improved plant efficiency, resulted in an increase in net profit compared to the prior period. The Group will continue to invest in technological refinements to secure sustainable, long-term margins.

The operation environment of China's steel industry is the key factor that affects the development of the country's molybdenum market. As required by China's environmental protection policy and supply-side reform policy, steel factories have no alternative but to transform and shift to produce high quality special steel. Meanwhile, the normalization of fall/winter production restriction will further accelerate the enhancement and reconstruction of the steel industry, there are still ample room to increase the production of stainless steel and high strength steel. All the factors stated above will further drive up the demand for molybdenum, and it was expected that the demand for molybdenum in China will keep increasing. It was expected that the molybdenum market would continue to improve in the second half of 2026.

MANAGEMENT DISCUSSION AND ANALYSIS

The Group will continue to be receptive to the market's views candidly and humbly. It will endeavor to maintain effective communication with stakeholders. As a way to gauge capital markets' perception of the Group, we will continue to improve the quality of investor relations management and will ponder on investors' concerns and advices in order to further enhance the Group's operating management and corporate governance. The investor relations department will maintain professionalism at its work so that capital markets will be able to gain a thorough understanding of the Group's business. This will help unlock the potential investment value and contribute to the long term and healthy development of the Group.

LIQUIDITY AND FINANCIAL RESOURCES

The Group generally finances its operations with internally generated cash flow and proceeds from suitable source of funding. During the period under review, the Group recorded a net cash inflow of approximately HK\$376,156,000 (six months ended 30 June 2025: cash inflow of approximately HK\$38,391,000). The cash inflow was mainly due to the net cash inflow from operating activities. The current ratio as at 30 June 2026 was approximately 0.93 as contrasted by 0.44 as at 31 December 2025. The debt equity ratio as at 30 June 2026 was approximately 0.96 as contrasted by 1.48 as at 31 December 2025. It is confident that the Group would have adequate financial resources to satisfy full repayment of the current liabilities.
