Announcement No.: 2026-107

Luxshare Precision Industry Co., Ltd.

Announcement on the Company and Its Controlled Subsidiary Being Subject to a Section 337 Investigation by the U.S. International Trade Commission

The Company and all members of the Board of Directors warrant that the information disclosed herein is true, accurate and complete, and that there are no false statements, misleading representations or material omissions.

Recently, Luxshare Precision Industry Co., Ltd. (“Luxshare Precision” or the “Company”) was informed that the U.S. International Trade Commission (“ITC”) announced on 9 October 2026 (U.S. time) the formal initiation of a Section 337 investigation (Investigation No. 337-TA-1526) in response to certain patent infringement allegations made by Vicor Corporation (“Vicor”). Details of the matter are set out below:

1. Background of the Matter

The investigation concerns U.S. Patent No. 10,903,734 relating to vertical power delivery (VPD) systems, related components and computing systems incorporating such products. The Company and its controlled subsidiary, Dongguan Luxshare Technologies Co., Ltd.*(東莞立訊技術股份有限公司) (“Luxshare Technologies”), have been named as respondents in the investigation.

According to publicly available information of the ITC, Vicor has previously initiated multiple Section 337 investigations against companies in the industry chain relating to data centre power supply technologies. The investigation is currently at a preliminary stage, and the ITC has not made any substantive determination in respect of the alleged patent infringement claims.

2. Impact on the Company

Based on the Company’s preliminary assessment, the products involved in the investigation are primarily used in integrated power supply solutions between power modules and processors in the data centre sector. The products involved in the investigation are currently at the customer validation phase and have not yet entered mass production. Based on the current business progress of the relevant products, it is expected that the investigation will not have any material adverse impact on the Company’s current production and operations or its financial results for the current period.

3. Measures Taken by the Company

In response to the Section 337 investigation, the Company has promptly commenced a review of the patent(s) involved and the relevant products. The Company is actively organising its technical, legal and business teams to formulate specific response strategies and work plans, drawing on its experience in handling previous similar cases.

Going forward, the Company will actively defend its position in the investigation, continue to advance its analysis of the relevant patent technologies, evaluation of product solutions and necessary technical optimisation, and strengthen communication with relevant customers and supply chain partners, with a view to safeguarding the legitimate rights and interests of the Company and all its shareholders and ensuring the orderly progression of the relevant business activities.

The Company recognises that opportunities and challenges always coexist on the path of technological innovation and global development. The Company remains firmly confident in its technological research and development capabilities and long-term development prospects, and will continue to uphold independent innovation and respect for intellectual property rights. The Company will actively respond to the relevant disputes in a professional and pragmatic manner, continuously enhance the competitiveness of its technologies and products, and create long-term value for customers worldwide.

4. Risk Warning

The Section 337 investigation is currently at its case initiation stage, and the outcome of the case remains uncertain. The Company will closely monitor the subsequent progress of the case, continuously assess the potential impact of the matter on its operations, and duly fulfil its information disclosure obligations in accordance with applicable laws and regulations. Investors are advised to view cross-border intellectual property disputes rationally and be mindful of investment risks.

This announcement is hereby made.

Luxshare Precision Industry Co., Ltd.

The Board of Directors

10 October 2026
