VOLUNTARY ANNOUNCEMENT

AWARD OF ISCC EU AND ISCC PLUS CERTIFICATIONS TO SUBSIDIARY BY RINA (AN INTERNATIONAL CERTIFICATION BODY)

This announcement is made by Standard Development Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to inform the shareholders and potential investors of the Company about the latest business development of the Group.

The board (the “**Board**”) of directors (the “**Directors**”) of the Company is pleased to announce that a subsidiary of the Company, Standard Development (Shandong) Co., Ltd.* (標準發展(山東)有限公司) (“**Standard Development (Shandong)**”), has recently passed the independent audit conducted by RINA Services S.p.A. (“**RINA**”), an internationally renowned certification body under the International Sustainability and Carbon Certification (“**ISCC**”) framework; and has been awarded the ISCC EU and ISCC PLUS certifications (the “**Certifications**”).

The Certifications confirm that Standard Development (Shandong) meets the sustainability requirements and criteria for reducing greenhouse gas emissions (GHG) defined by the European Renewable Energy Directive, as well as the sustainability requirements defined by ISCC for bioeconomy and circular economy. In particular, the Certifications confirm that the Group possesses production knowhow and capabilities and technical compliance means for processing and conversion of various waste carbon-based resources (such as waste tires) into low-carbon marine fuel oil, low-carbon diesel, and sustainable aviation fuel (SAF).

Following the previous award of ISCC EU certification in biomethane and biomethanol to the Group, the Certifications mark significant progress in the Group's expansion of its green energy products:

- **Establishing diverse solid waste conversion knowhow and capabilities:** The Group has successfully established the knowhow for production of low-carbon fuel using carbon-based waste such as industrial waste tires as raw materials. The Certification confirm that the Group's relevant knowhow meets strict international standards for full lifecycle greenhouse gas reduction and supply chain traceability, and possesses the technical knowhow and capability to produce low-carbon marine fuel, low-carbon diesel, and sustainable aviation fuel (SAF) that comply with international standards.
- **Building a multi-domain technology reserve matrix for sea, land and air:** With the establishment of the aforementioned knowhow, the Group has built a reserve of clean energy knowhow covering multi-dimensional scenarios in respect of both technology and compliance, covering "maritime, land, aviation and industrial sectors", laying a solid foundation for future engineering implementation and commercial application in various specific scenarios.
- **Practicing a circular economy to support global climate governance:** The efficient energy conversion of bulk industrial solid waste such as waste tires offers both "pollution control" and "replacement of fossil energy". The Group will continue to rely on advanced knowhow development to promote advancement of clean energy technologies, helping customers and the industry chain achieve deep carbon reduction in the future, and actively deal with global climate change.

While the award of the Certifications would give the Group access to the global green energy market in terms of compliance requirements, the subsequent engineering implementation of the relevant knowhow, development progress of production line(s), actual capacity, market and customer development, timing of order(s) and actual contributions to the Group's financial performance and operating results will be affected by multiple external and internal uncertainties including but not limited to macroeconomic and policy changes, fluctuations in market fuel price and capital expenditure plan(s) of the Group.

Shareholders and the potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.

By Order of the Board
Standard Development Group Limited
Liu Zhancheng
Chairman and Executive Director

Hong Kong, 13 October 2026

As at the date of this announcement, the Board comprises Mr. Liu Zhancheng and Mr. Xu Jing as executive Directors; and Dr. Su Lixin, Mr. Zhao Changsheng and Mr. Tsui Siu Hung Raymond as independent non-executive Directors.
