VOLUNTARY ANNOUNCEMENT

**SYS6088 INJECTION (A TRI-SPECIFIC ANTIBODY) OBTAINS
CLINICAL TRIAL APPROVAL IN CHINA**

The Board of Directors (the “**Board**”) of CSPC Pharmaceutical Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) is pleased to announce that SYS6088 Injection (the “**Product**”) developed by the Group has obtained approval from the National Medical Products Administration of the People’s Republic of China to conduct clinical trials in China.

The Product is a recombinant humanised trispecific antibody targeting programmed cell death protein 1 (“**PD-1**”), vascular endothelial growth factor A (“**VEGFA**”) and cytotoxic T-lymphocyte-associated antigen 4 (“**CTLA-4**”). It can specifically bind to PD-1 and CTLA-4 on the surface of T cell membranes and to VEGFA in the tumour microenvironment, thereby restoring the killing function of T lymphocytes (T cells) and inhibiting angiogenesis in the tumour microenvironment, as well as promoting the activation and expansion of T cells during the immune priming phase, exerting a triple synergistic anti-tumour effect. Fc engineering reduces the toxicity risk of the Product and effectively prolongs its half-life.

The indication for the approved clinical trial is advanced or metastatic solid tumours. Preclinical studies showed that the Product had broad-spectrum anti-tumour potential and demonstrated significant anti-tumour activity in various malignant tumour models and a favourable safety profile, indicating high clinical development value.
