(Stock Code: 1071)

OVERSEAS REGULATORY ANNOUNCEMENT

Power Generation and On-grid Tariff for the

First Three Quarters of 2026

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

As at 30 September 2026, the total amount of power cumulatively generated by Huadian Power International Corporation Limited* (the "**Company**") and its subsidiaries (the "**Group**") calculated on the basis of the consolidated financial statements according to the China Accounting Standards for Business Enterprises for the first three quarters of 2026 was 175.04 million MWh, representing a decrease of approximately 13.06% as compared with the same period of the previous year; and the total amount of on-grid electricity sold was 164.27 million MWh, representing a decrease of approximately 13.19% as compared with the same period of the previous year. The decrease in the amount of power generated and on-grid electricity sold for the first three quarters of 2026 was mainly attributable to the combined impact of heavy hydropower output in certain regions where the Company's assets are located during the summer crowding out thermal power generation space and temperatures lower than the same period of the previous year; the increase in installed capacity of new energy crowding out power generation space; and the decrease in the installed capacity share of the Company's coal-fired generating units. Through preliminary accounting, the average tariff of on-grid electricity sold by the Group for the first three quarters of 2026 was approximately RMB519.01 per MWh, representing an increase of approximately RMB9.46 per MWh as compared with the same period of the previous year, or an increase of approximately 1.86% year-on-year.

The table below shows the amount of power generated and the on-grid electricity sold during the first three quarters of 2026 by each of the main generating units under operation of the Group currently.

Type	Name of power plant/company	Power generated from July to September 2026 (Million MWh)	On-grid electricity sold from July to September 2026 (Million MWh)	Power generated from January to September 2026 (Million MWh)	On-grid electricity sold from January to September 2026 (Million MWh)
Thermal power	Zouxian Plant	2.67	2.45	5.95	5.42
