Notes:

- (1) Certain power plants of the Group further increased the grid-connection installed capacity of approximately 55MW in total in Q3 of 2026.
- (2) By the end of December 2025, certain power plants of the Group ceased to be consolidated as subsidiaries, but were reclassified as associates of the Company. Therefore, the comparative amounts of electricity generation volume for Q3 of 2025 from these power plants were reclassified from “Power plants held by the subsidiaries of the Company” to “Power plants held by the associates of the Company” to conform to the current quarter presentation accordingly as if the deconsolidation had taken effect on 1 January 2025.
- (3) The operation figures previously announced have been adjusted to be in line with the available accounting figures and to reflect the changes in our portfolio of power plants with effect from the respective completion date of each transaction.
- (4) The figures provided herein may be subject to adjustment due to actual business development or accounting procedures.

Shareholders and/or potential investors of the Company are hereby reminded that the information provided above merely represents the preliminary operating performance of the renewable energy power plants beneficially owned by the Group and its associates as of 30 September 2026 based on data currently available to the management, and is by no means a representation or a basis of reference or indication of the revenue or profit to be generated or derived by the Group or any financial performance of the Group in Q3 of 2026 or for the nine months ended 30 September 2026. Accordingly, shareholders and/or potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.
